(o) Proposed increased distance commodity rates on interstate shipments of scrap and waste paper from Pacific coast points to Boston by water, thence by rail to points in New England, for distances of 50 miles and under, found not justified. Proposed rates exceed those maintained by respondents for same distances on a number of comparable commodities and rates maintained on same commodities for similar distances between points on lines of other carriers. Similar increases on shipments originating on and destined to points on respondents' lines found justified. Various Commodities between New England Points, 113 I. C. C. 44.

(p) Local and joint class rates between points in Arizona, on the one hand, and points in California, New Mexico, and El Paso, Tex., on the other hand, found unreasonable. Rates assailed are materially higher than those prescribed in 21 I. C. C. 640, and 74 I. C. C. 207, for application in the Pacific Northwest and at present in effect throughout the northern half of the Mountain-Pacific group. Operating and transportation conditions in territory here under consideration compare favorably with those in much of the territory in which the lower rates apply. Temporary scale of distance rates prescribed which will accord the Pacific Southwest substantially same scale of rates as now applies in the Pacific Northwest. Arizona Corp. Commission v. A. E., 113 I. C. C. 52.

(q) Upon reconsideration, original report, 107 I. C. C. 681, modified with respect to method of computing distances under scales therein prescribed; distances to be used to be those over direct routes embracing as a maximum the lines or parts of lines of no more than three carriers via existing connections for interchange of c. l. traffic, except that where shorter routes are now in use which embrace the lines of more than three carriers such shorter routes should be used. Southwestern Brick Cases, 113 I. C. C. 169.

(r) Upon reconsideration, finding in 109 I. C. C. 300, 312, modified to provide that in computing distances under the scale of rates prescribed for application in southern territory, for use of the shortest routes over which c. l. traffic can be moved without transfer of lading. Accordingly the distance scale of rates originally prescribed slightly increased to compensate carriers for the change in computing distances. Southern Class Rate Investigation, 113 I. C. C. 200.

(s) One level of class rates should prevail in southern territory and no sound reason exists for departing from this principle by making distinctions in computation of distances, of necessity largely arbitrary, between single-line and joint-line routes. Not only will resulting rate structure be simpler without such distinctions, but it will also be more generally satisfactory to shippers served. Nor will carriers have any just cause of complaint if distance scale is made high enough to compensate fairly for its general application to routes of varying efficiency and for the measurement of distances in all cases by short-line routes. Southern Class Rates Investigation, 113 I. C. C. 200, 205.

(t) Rates on fresh meats and packing-house products, c. l. and l. c. l., from Pueblo, Colo., to points in New Mexico, found unreasonable and unduly prejudicial as compared with rates on like traffic from El Paso and Fort Worth, Tex., Oklahoma City, Okla., Wichita, Kans., and

Cactus, Ariz., to same destinations. Reasonable scale of distance rates based on the so-called Cactus-El Paso scale laid down in 81 I. C. C. 115 and 100 I. C. C. 4, for application in same general territory for like distances, prescribed and reparation awarded. Nuckolls Packing Co. v. A. T. & S. F., 113 I. C. C. 229.

(u) In original report, 88 I. C. C. 543, commission granted fourth-section relief under the distance scale there prescribed on brick and related articles between points in southern territory by authorizing indirect lines to meet direct lines' rates at competitive points and maintain higher rates at intermediate points. Upon a showing by carriers that publication of all routes over which rates apply would impose upon them tremendous labor and expense and result in such an increase in the bulk of tariffs as to render them cumbersome and difficult to use, original findings modified and in the interest of tariff simplicity carriers authorized, in lieu of publication of specific routing between points of origin and destination, to publish a general rule showing rates and maximum distances for routing. Brick and Clay Products in the South, 113 I. C. C. 380.

(v) Dissatisfaction on the part of shippers and users as well as of carriers with the rates on commercial fertilizer and fertilizer materials in southern territory has for some time been increasingly evident. Interstate rates vary greatly for substantially similar hauls; many indefensible fourth section departures exist; and the intrastate rates which have been forced by some of the states are attacked by the carriers as unreasonably low, and it is alleged they adversely affect manufacturers and dealers shipping into those states over interstate routes. The purpose of this proceeding, therefore, is to determine upon a basis of interstate rates for the movement of fertilizer and fertilizer materials throughout southern territory which will be reasonable and free from undue prejudice and preference, and which will conform, as nearly as may be, to the provisions of the fourth section. Fertilizer tonnage is of relatively greater importance to the southern carriers than to the lines in other sections. It is beyond debate that agriculture in the south can not be conducted successfully without the use of fertilizer, and agriculture has been and probably still is the basic industry of that section. The record indicates that in official territory fertilizer moves to quite an extent on specific commodity rates, and many of these, as well as the class rates, are blanketed over rather extensive groups. The doctrine that the burden of rail transportation should be distributed among the various kinds of freight with some regard for the economic needs of the country has always had recognition in one way or another, in the rate structure. The principle which has been quite generally recognized in public regulation, that the value as well as the cost of service is a factor entering into the determination of just and reasonable rates, has had a similar result. In another form the same thought seems to be predominant in the Hoch-Smith resolution. But the inevitable result of such a distribution of the transportation burden must be that some kinds of freight traffic, under just and reasonable rates, will earn materially less for the carriers than others. There are manifest limitations to the doctrine. It may be conceded that the Commission has no power to fix rates upon any kind of freight which will fail to produce some margin over operating cost. Moreover the fact that certain carriers are largely dependent upon a particular form of traffic and have little opportunity to recoup a deficiency in profit upon such traffic by recourse to higher rates upon other kinds must be taken into consideration. But here the Commission is without evidence as to the cost of service, and it is not understood that the carriers contend that even the shippers scale would result in operating loss. Nor does it appear that fertilizer traffic is the main reliance of any of the respondent carriers. So far as the record discloses the traffic of all is reasonably well diversified. HELD, rates applicable to interstate transportation in carloads of mixed fertilizers and of the fertilizer materials over standard lines in south for future unreasonable to extent they exceed rates ranging from per ton $1.00 for 10 miles and under to $7.25 per ton for 1000 miles. Fertilizers between southern points, 113 I. C. C. 389.

(w) Upon investigation by commission on its own motion into and concerning the general basis of rates on fertilizer and fertilizer materials in southern territory, FOUND: That in view of characteristics of this traffic it is reasonably entitled to a relatively low basis of rates. Maximum reasonable rates based

on a distance scale prescribed for uniform application over standard lines, and certain so-called short or weak lines accorded arbitraries or a percentage over such prescribed standard line rates. Fertilizers between Southern Points, 113 I. C. C. 389.

(x) Upon further consideration, former report, 101 I. C. C. 196, finding rates on bananas and coconuts, in straight and mixed carloads, from New Orleans and subports taking same rates, and Gulfport, Miss., to various destinations in Oklahoma and to Arkansas City, Kans., and from New Orleans and subports taking same rates to certain Texas points, unreasonable and prescribing a scale of distance rates to Oklahoma and Arkansas City and a single rate to Texas destinations in order to conform to the Texas common-point method of rate making, affirmed. Dawson Produce Co. v. A. & V., 113 I. C. C. 454.

(y) Upon further consideration, former report, 101 I. C. C. 196, finding rates on bananas and coconuts, in straight and mixed carloads, from New Orleans and subports taking same rates, and Gulfport, Miss., to various destinations in Oklahoma and to Arkansas City, Kans., unreasonable and prescribing a scale of distance rates, affirmed. Dawson Produce Co. v. A. & V., 113 I. C. C. 454.

(z) Rates on cream from certain points on the Minneapolis & St. Louis R. R. west of Winthrop, to Sioux City, Iowa, via Hanley Falls, Minn., found not unduly prejudicial but unreasonable. Reasonable maximum distance scale of rates prescribed for future and reparation awarded. Hanford Produce Co. v. Am. Ry. Exp. Co., 113 I. C. C. 523.

(aa) Complainant attacked commodity rates on cement, in carloads, from Harrys, Tex., to all destinations in Oklahoma and moving interstate to destinations in Texas on the Wellington branch of the M. K. T. and on the Spearman branch of the P. & S. F., as unreasonable, unjustly discriminatory and unduly prejudicial. Harrys is a local point on the T. P., 3.8 miles west of Dallas, Tex. Eagle Ford is 2 miles west of Harrys. The rates from both points are on the same basis. Complainant is in active competition with the intervener at Ada, Okla., who ships cement from that point to destinations in Oklahoma and Texas. The rates on cement from Ada to destinations in central and northern Texas were considered in 27 I. C. C. 101 and the Commission found the rates from Ada to Texas should not be higher than the rates from Harrys and Eagle Ford to Oklahoma. Mile for mile, the rates from Harrys into Oklahoma and interstate to Texas are higher than those from Ada into Texas and the same carriers, participate in both the northbound and southbound rates. HELD, rates attacked unduly prejudicial to extent they exceed rates from Ada for like distances to Texas. Texas Portland Cement Co. v. A. W. Ry., 113 I. C. C. 536.

(bb) Distance is not the only factor to be considered either in making of a rate by a carrier or in commission's determination of what would be a reasonable basis. Benson Produce Co. v. G. N., 113 I. C. C. 541, 546, 547.

(cc) Following 101 I. C. C. 34, rates on salt from Burmester, Utah, to destinations in Montana and Washington, found unreasonable to extent they exceeded rates for similar distances under distance scale of rates prescribed in Inland Crystal Salt Co., 78 I. C. C. 659. Reparation awarded. Morton Salt Co. v. B., A. & P. Ry., 113 I. C. C. 548.

(dd) Rates on linseed oil from Minneapolis, Minn., to Dallas, Tex., found unreasonable to extent they exceeded rates based on distance scale prescribed in 98 I. C. C. 183 for application on cottonseed oil. Reasonable rates prescribed for future and reparation awarded. Deforest Co. v. A. T. & S. F., 113 I. C. C. 591.

(ee) Rate on sand from Sandusky, Ohio, to Pittsburgh, Pa., found not unseasonable as applied to past shipments, but unreasonable for future to extent it exceeded rate for like distances under the distance scale prescribed in 104 I. C. C. 717 for application from points in western Pennsylvania to points in Ohio. Rates prescribed in cited case forming basis of a general readjustment, a finding that rates applicable prior thereto were unreasonable to extent they exceeded the rates under new basis, and that damages were accordingly sustained, is not warranted. Moreover, reparation will not ordinarily be awarded to basis of a finding resulting in a widespread readjustment of rates. Accordingly, reparation denied in instant case, but reasonable rate prescribed for future. Booth & Flinn v. P. R. R., 113 I. C. C. 613.

(ff) Complainant attacked commod-

ity rates on sugar, carloads from New Orleans, La., and points in Louisiana taking the same rates or rates basing thereon, from Sugarland, Tex., and from various producing points in Kansas, Colorado, Nebraska, Idaho and Utah, to 78 named destinations in Oklahoma, as unreasonable, and in violation of section four. Sugarland is 27 miles west of Houston, Tex. The rates asked by complainants from all points of origin are based on the scale of rates on sugar prescribed in 77 I. C. C. 473, with 20 miles added to the actual distances for the river crossings. RATES FROM LOUISIANA AND TEXAS. The Louisiana producing territory extends west and northwest of New Orleans. It is about 180 miles from New Orleans to the most distant producing point. Blanket rates on sugar have applied for many years from these points to Oklahoma and various other destinations. On Nov. 27, 1923 the Memphis scale was established from New Orleans to Arkansas and eastern Oklahoma. The rates from New Orleans to Texas points were reduced 22c on Oct. 25, 1921 and rates from Sugarland to Texas common points were increased only 25% on June 25, 1918 and a reduction of 6c was made on April 5, 1922. The through rates from New Orleans and Sugarland to numerous points in Oklahoma have been and are in excess of combinations of commodity rates to various points in Texas and Arkansas and fifth class rates beyond. RATES FROM WESTERN POINTS. The territory is divided into four rate groups. Group 1 includes a few points in Nebraska and points of production in Colorado except Delta and Grand Junction. The latter points are in the extreme western portion of the state and are embraced in group 3. Group 2 includes only Garden City, Kas., and Group 4 includes all producing points in Utah and Idaho. The important groups are 1 and 4. Garden City usually takes Group 1 rates to all points east, but to Oklahoma points on the Santa Fe and some of that carriers short line connections somewhat lower rates are maintained. From Groups 3 and 4 the rates are based differentially over group 1. At least since 1912 the established basis from group 1 to Oklahoma City has been the contemporaneous rate from New Orleans. However, while the present rate from group 1 to Oklahoma City is 72c, or the same as the rate with the higher minimum from New Orleans, alternative rates are not provided from these western origin groups. Since Nov. 15, 1920 all sugar rates to Oklahoma from these groups have been subject to a minimum of 60,000 pounds. The minimum prior to that date was 33,000 pounds. No reduction was made in the rate when the minimum was increased. HELD, rates from New Orleans and points taking same rates and from Sugarland and Texas City, Tex., to Oklahoma unreasonable to extent they exceed rates ranging from 10c single line 12c joint line for 5 miles to 73c single and joint for 1,000 miles minimum 60,000. In constructing rates from Louisiana east of the Mississippi river to Oklahoma a ferry toll for the river transfer service not exceeding 2.5c per 100 pounds may be added to the rates based upon the distances to and from the river under the scale herein prescribed. Rates attacked from Kansas, Colorado, Nebraska, Idaho, Utah to Oklahoma destinations unreasonable to extent they are in excess of 7.5c less than present rates. Oklahoma Traffic Asso. v. A. G. S. R. R., 113 I. C. C. 635.

(gg) Rates on sugar from New Orleans and Louisiana points taking same rates, and from Sugarland and Texas City, Tex., to points in Oklahoma, found unreasonable. Reasonable distance scale of rates prescribed, subject to a minimum of 60,000 pounds, actual weight to apply when the car is loaded to full visible capacity. Oklahoma Traffic Asso. v. A. G. S., 113 I. C. C. 635.

(hh) In constructing distance rates herein prescribed on sugar from points in Louisiana east of Mississippi River to Oklahoma, a ferry toll for the river transfer service not in excess of 2.5 cents per 100 pounds authorized to be added to rates based upon distances to and from the river. Oklahoma Traffic Asso. v. A. G. S., 113 I. C. C. 635, 648.

(ii) In computing distances under scale of rates herein prescribed on sugar from Louisiana points east of Mississippi River to Oklahoma, the shortest routes via existing connections for interchange of c. l. traffic required to be used, embracing as a maximum not more than three line-haul carriers for distances not exceeding 500 miles; four line-haul carriers for distances not over 800 miles; and five line-haul carriers for distances exceeding 800 miles, lines under common ownership or control to be considered as

single line, and where same line is used twice, it to be counted as a separate line each time. Oklahoma Traffic Asso. v. A. G. S. R. R. Co., 113 I. C. C. 635, 648, 649.

(jj) Complainant attacked rates on cement, carloads, from the Kansas gas belt to destinations in western Kansas, in Nebraska and South Dakota, eastern Colorado and on the Burlington and as unreasonable and as compared with rates on cement from Missouri and Iowa to the same destinations. Also rates on cement from Portland and Concrete, Colo., Superior, Neb., and Ada, Okla., as unreasonable and unduly prejudicial. The rates under consideration were established following 48 I. C. C. 201, 48 I. C. C. 402, and 52 I. C. C. 225 and 69 I. C. C. 644. The destination scale principle is now applied throughout western cement scale territories except from points in scale II and III territories to points in scale IV territory and from scale IV territory to points in the lower rated territories east thereof. Little, if any, cement moves, however, from producing points in scale IV territory to points in scale II or scale III territories. In view of the particular circumstances and conditions surrounding the transportation and marketing of cement the Commission is becoming more and more persuaded that there is substantial merit in the destination scale principle for more general application to cement rates in this territory. Such a basis would put all producing points in a given territory of destination on the same distance basis, and, thereby, remove much complaint that is based on the different rate scales in this western territory. HELD, rates attacked from Portland and Concrete, Colo., not unreasonable or unduly prejudicial, complaint dismissed. HELD, rates from Ada and Superior not unreasonable or unduly prejudicial except that rates from Ada to points in scale III territory in Missouri and from Ada and Superior to points in scale II territory in Missouri, Iowa and Minnesota are unreasonable to extent they exceed scale III rates from Ada to points in scale III territory in Missouri and scale II rates from Ada and Superior to points in scale II territory in Missouri, Iowa and Minnesota subject to the limitations of paragraph 4 following and that the rates from Superior and to Sioux Falls, S. D., and Sioux City, Ia., and from Superior and Ada to Kansas City unreasonable to extent they exceed rates based on scale II subject to limitations of paragraph 4 following. Rates attacked from Kansas gas belt and Bonner Springs to scale IV territory are neither unreasonable nor unduly prejudicial except that rates to points in Nebraska, South Dakota, Colorado, Montana and Wyoming that are in excess of rates based on the average of scales II, III and IV calculated on the distances through scales II, III and IV territories, under the formula used in checking in rates in cement cases, 87 I. C. C. 451, and unreasonable to extent they exceed rates based on average of scales II, III and IV calculated on the distances through scale II territory, the rates from Bonner Springs to be based on the distances from Kansas City. That no fourth section relief will be granted over reasonably direct routes, and in order to comply with the requirements of the long and short haul provision of that section on traffic from a higher rated to a lower rated scale territory, defendants will be permitted to hold the border point rates as maxima at more distant points in the lower rated territory. Reparation awarded. Iola Cement Mills Traffic Asso. v. A. V. I. Ry., 115 I. C. C. 49.

(kk) Complainant attacked commodity rates on cement, in carloads, from Kosmosdale, Ky., to destinations in Illinois, Indiana, Ohio, Michigan, Pennsylvania, and West Virginia as unduly prejudicial to extent it exceeded rates from Hannibal, St. Louis and Cape Girardeau, Mo., and various places in central territory. Kosmosdale is 18 miles southwest of Louisville, Ky., on the Ohio river and is served by the I. C. Rates on cement from Kosmosdale to central territory have been before the Commission in other cases. Rates from Kosmosdale to central territory are now generally 2.5c higher than those from New Albany or Jeffersonville, Ind., except that to Illinois they are on a somewhat lower level. In 81 I. C. C. 1, the Commission prescribed a distance scale of rates on cement from Hannibal, St. Louis and Buffington to Illinois and Indiana. The carriers voluntarily extended the application of that scale from all producing points in central territory, including Hannibal and St. Louis, to all of central territory. Complainant seeks the establishment of that scale from Kosmosdale. The fact that a relatively higher basis of rates, distance considered, applies from Kosmosdale, which for all practical purposes is

situated on the border of central territory, than that from competing points in the same territory indicates a maladjustment which should be corrected, provided thansportation conditions are fairly comparable. HELD, rates attacked unduly prejudicial to extent they exceeded the rates from other producing points such as St. Louis to the same territory. Kosmos Portland Cement Co. v. I. C. R. R., 115 I. C. C. 561.

(ll) Respondents proposed to restrict the application of distance rates between Missouri B territory and points in Arkansas, Louisiana, Oklahoma and Texas so as to exclude from that territory all stations on the Frisco from St. Louis, Mo., to Pacific, Mo. The effect of the proposed change would be to move that part of the northern boundary line of Missouri B territory between St. Louis and Pacific from south of the M. P. to south of the Frisco. From Pacific west to Kansas City no change is contemplated. Under the proposed change the St. Louis territorial or group rates would be applicable from points on the Frisco between St. Louis and Pacific instead of the distance scales now applicable. HELD, schedules not justified. Description of Missouri group B territory, 118 I. C. C. 119.

(mm) Complainant attacked as unreasonable and unduly prejudicial, rates on hay from South Dakota to Minnesota, Iowa, Wisconsin, Illinois, Nebraska, and Wyoming. Shipping points in Minnesota, North Dakota, Iowa and Nebraska are alleged to be unduly preferred. There are joint rates to the livestock markets from South Dakota and adjoining states. To other destinations in Wisconsin, Iowa, and Illinois, located off the originating line the usual basis of rates is the combination of locals from South Dakota and joint rates from adjoining states. To points in Iowa and Illinois directly intermediate to Chicago, Ill., the Chicago basis is blanketed back over a considerable distance. In addition to lower rates to markets and other points complainant seeks joint rates to points on connecting lines in Wisconsin, Iowa, and Illinois, comparable with those from adjacent states, and rates lower than the Chicago basis to points in Iowa and Illinois directly intermediate to Chicago. Hay is rated class C in the western classification, but it generally moves from South Dakota and other northwestern states on commodity rates lower than class C, minimum 20,000 pounds. The record in this case, although less comprehensive than might be desirable, is sufficient to show that the rates on hay from South Dakota to the destinations here considered, aside from their inherent reasonableness are in such a state of confusion as to require revision. The rates from South Dakota certainly should not be higher than from Oklahoma to Arkansas and from Oklahoma to Texas. For the longer distances they should be lower than that scale, owing to the greater density of tonnage as the Chicago and Milwaukee districts are approached. HELD, rates attacked unreasonable to extent they exceed distance rates ranging from 8c single line, 10c joint line for 10 miles to 47c for 1,200 miles. Rates from points west of the Missouri river in South Dakota unreasonable to extent they exceed rates prescribed plus differentials ranging from 1.5c for 25 miles or less to 6c for 300 miles. It seems obvious that this adjustment is unduly prejudicial to shippers from South Dakota and unduly preferential of their Nebraska competitors. The record does not contain evidence sufficient for the Commission to determine the precise extent of this undue prejudice, or to fix reasonable maximum rates, and no definite finding will be made. Defendants should study the situation with a view of establishing these rates on a nonprejudicial basis. South Dakota R. R. Commissioners v. C. & N. W. Ry., 118 I. C. C. 139.

(nn) Complainant attacked commodity rates on hay, in carloads, from El Paso and other points in Texas differential territory and from points in New Mexico on the Santa Fe to destinations in southern Arkansas and northern Louisiana as unreasonable and unduly preferential of Texarkana. Tex., and Monroe, La., and unjustly discriminatory and in violation of the fourth section. The rates on hay, in carloads, from El Paso, a point in Texas differential territory to points in Arkansas and Louisiana are either the Texarkana, Monroe, Gibbsland or Orange combinations of locals, or are joint through rates. Most of the destination points are within a radius of 100 miles of either Texarkana or Monroe. The record shows that, due to lower rates, distance considered, dealers in alfalfa hay at Texarkana and Monroe have a distinct advantage over their competitors located at points of destination to which the as-

sailed rates apply. Transportation conditions to all of these destinations are substantially similar. HELD, rates attacked are unreasonable to extent they exceed rates set forth in section A of the appendix in Ark. Jobbers Assn. v. A. T. & S. F. Ry., 80 I. C. C. 607, plus the differentials set forth in section B of the same appendix for the hauls in Texas differential territory and New Mexico. Arkansas Jobbers & Mfrs. Asso. v. A. T. & S. F. Ry., 118 I. C. C. 238.

(oo) In 98 I. C. C. 183, the Commission prescribed single line and somewhat higher joint line scales for application to cottonseed and related commodities in the territory embraced in this case. Among other things, it provided that rates between points west of the Mississippi river, on the one hand, and Memphis and other east bank crossings south thereof, on the other, should be constructed by application of the scales to the distances or from west bank points plus bridge or ferry tolls not exceeding 2c per 100 pounds for the river crossings. The St. L. S. W. operates its own trains between points on its own lines and Memphis. Part of this operation, namely, between Brinkley and Briark, the latter 0.6 miles west of Bridge Jct., all in Arkansas, is over a line of the Rock Island under a trackage arrangement with the latter, and over the line and bridge of a terminal company between Briark and Memphis. The joint line scales were intended for application only to joint line movements in fact, with the usual incidents thereof. The traffic in this instance is not in fact shipped to or from Bridge Jct., but to or from Memphis. The reasons for the application of joint line scales are not present. HELD, single line rates should apply plus bridge toll of 2c. Oklahoma Corporation Commission v. A. & S. Ry., 118 I. C. C. 439.

(pp) Rates on cement from Superior, Nebr., to points in Scale II territory and Kansas City, Mo., Sioux City, Iowa, and Sioux Falls, S. Dak., and from Ada, Okla., to Kansas City, to points in Scale II territory, and to points in Scale III territory in Missouri found unreasonable. Reasonable rates and bases of rates prescribed for future. Iola Cement Mills Traffic Asso. v. A. V. I., 115 I. C. C. 49.

(qq) Rates on cement from points in the Kansas gas belt, Bonner Springs, Kans., Ada, Okla., Superior, Nebr., and Portland and Concrete, Colo., to points in western cement Scale III and IV territories found not unreasonable or unjustly discriminatory except where lower rates from the Kansas gas belt can be arrived at by use of the average of rates under Scales II, III, and IV, based on distances over routes through Scale II territory. Iola Cement Mills Traffic Asso. v. A. V. I., 115 I. C. C. 49.

(rr) Proposed increased distance rates on cream, and on milk, cream, and buttermilk, transported by railroads on passenger trains in the territory embracing points in Montana, North Dakota, Minnesota and other northwestern States, found not justified. Such increases are designed as a revenue measure, in interest of uniformity, and to remove any existing discrimination between interstate and intrastate traffic. Competition in territory involved is keen between butter manufacturers who draw their cream mainly from distant points and local creamers who receive their cream from near-by points. Any substantial rate increase, if borne by the butter manufacturers, would be detrimental to them and indirectly to farmers producing the cream. Moreover, under the Hoch-Smith resolution the commission is required to give particular consideration to establishment of a rate structure under which agricultural products shall freely move. Milk and Cream in Northwest, 115 I. C. C. 77.

(ss) Rates on cottonseed from Memphis, Tenn., to Eagle Pass, Tex., found unreasonable prior to August 15, 1923, to extent they exceeded for like distance the rate contemporaneously applied on cottonseed between Shreveport and points in Texas under the Shreveport scale, and thereafter to extent they exceeded for like distance the rate prescribed in Oklahoma Corp. Comm., 98 I. C. C. 183. Reparation awarded. Russell-Heckle Seed Co. v. M. P. R. R., 115 I. C. C. 253.

(tt) Rates on cement from Kosmosdale, Ky., to destinations in c. f. a. territory, found unduly prejudicial to Kosmosdale and unduly preferential of Marquette, St. Louis, and Hannibal, Mo., Mitchell, Speeds, and Buffington, Ind., and other producing points with which Kosmosdale comes into active competition, to extent that rates from Kosmosdale exceed those contemporaneously maintained from the competing points for like distances under the Atlas scale

prescribed in 81 I. C. C. 1. Kosmos Portland Cement Co. v. I. C., 115 I. C. C. 561.

(uu) Distance rates on sand and gravel from Portsmouth, Ohio, to Williamson, W. Va., based on distance via a circuitous route, found unreasonable to extent they exceeded rates based on actual distance via a shorter and more desirable route. Shorter route is free from heavy grades and curves such as are encountered on circuitous route and no good reason appears why rates constructed on lower basis should not have been applied on shipments moving via shorter line. Reasonable rate prescribed and reparation awarded. Good Construction Co. v. N. & W., 115 I. C. C. 629.

(vv) Rates on potatoes from points in the Carolinas on Atlantic Coast Line R. R., to Kalamazoo, Jackson, Battle Creek, and Sturgis, Mich., found unreasonable and unduly prejudicial to extent they exceed corresponding rates contemporaneously in effect to Grand Rapids, Mich. Distance scale of rates prescribed for future and reparation denied on past shipments because the evidence on which the adjustment prescribed is based is general in character and savors of a general readjustment. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633.

(ww) An isolated shipment of limestone rock from Margerum, Ala., to Dallas, Tex., to be used for street paving, moved to Memphis, Tenn., at commodity rate applicable on broken stone, and at commodity rate applicable on paving stone, rough quarried beyond. Upon contention that broken or crushed stone rate should have applied over entire route, using scale prescribed in 77 I. C. C. 473, HELD: Scale basis sought was not prescribed to apply to Texas common points and its extension to that territory from New Orleans, on paving and roofing materials was denied in 102 I. C. C. 31, being found too low for application between those points. Moreover, as class rates are ordinarily assessed on sporadic movements, charges collected under commodity rates in instant case were not unreasonable. Florence Chamber of Commerce v. S. Ry., 118 I. C. C. 7.

(xx) Rates on hay from points in South Dakota to destinations in Iowa, Nebraska, Illinois, Wisconsin, and Minnesota, found unreasonable in their relation to rates on various other commodities and with rates on hay from producing points in States located in same general territory to same destinations. Reasonable distance basis of rates prescribed for the future. South Dakota R. R. Commrs. v. C. & N. W., 118 I. C. C. 139.

(yy) Rates on hay from points in Texas differential territory and New Mexico to destinations in southern Arkansas and northern Louisiana, found unduly prejudicial to extent that differences between such rates and corresponding rates to Monroe, La., are more favorable to last-named point than would result by application of distance scale of rates prescribed in 101 I. C. C. 116, extended beyond 800 miles at same rate of progression as for the last 300 miles in that scale, plus differentials for hauls in differential territory and New Mexico. Nonprejudicial basis of rates prescribed for future. Arkansas Jobbers & Mfrs. Asso. v. A., T. & S. F., 118 I. C. C. 238.

(zz) Sixth-class rates on logs from Adrian, Grosvenor, and Pittsford, Mich., to Hicksville, Ohio, found unreasonable to extent they exceeded rates based on the c. f. a. log scale prescribed in 85 I. C. C. 533 for similar distances. See also 107 I. C. C. 379 and 112 I. C. C. 399 wherein sixth-class rates on this commodity from various Indiana and Michigan points to Hicksville were found unreasonable. Reparation awarded. Crook Son & Co. v. N. Y. C., 118 I. C. C. 512.

(3a) Joint rates on pipe from Youngstown, Ohio, to Tioga and other Louisiana points found unreasonable as compared with lower rates contemporaneously in effect between various points in same general territory for comparable distances and to extent they exceeded lower distance rate approved in 77 I. C. C. 473 for general application in this territory, which rate was subsequently established to the more distant point of Alexandria. Reparation awarded. Hope Engineering & Supply Co. v. M. P., 118 I. C. C. 598.

(3b) Combination rates based on Ohio and Mississippi River crossings on cattle and hogs from Chicago, East St. Louis, St. Louis, Kansas City, St. Joseph, Omaha, Fort Worth, and Oklahoma City to Atlanta and Moultrie, Ga., and from Chicago to Birmingham, Jacksonville, Chattanooga, Knoxville, and Nashville,

found not unreasonable in the past but for future found unreasonable and reasonable scale of distance rates, based upon scale approved in 81 I. C. C. 33, prescribed. The practice of basing the interterritorial rates on a combination of factors to and from the river crossings has been in effect for many years, and rates assailed, when judged as combination rates, do not produce excessive earnings. Under the circumstances they were not unreasonable in the past. However, no sound reason exists why interterritorial shipments that cross the rivers should pay materially higher rates than intraterritorial shipments within the Southeast, Southwest, and c. f. a. territories for comparable distances where shipments do not cross the river boundaries. White Provision Co. v. A., B. & A., 118 I. C. C. 601.

(3c) Fifth-class rates on iron and steel pipe from Louisiana points to destinations in El Dorado and Smackover districts of Arkansas, found unreasonable to extent they exceeded those for like distances under scale prescribed in 77 I. C. C. 473. See also 95 I. C. C. 709, and other cited cases. Reparation awarded. Standard Oil Co. v. T. & P., 118 I. C. C. 627.

(3d) Rate on iron and steel pipe from Ranger, Tex., to Ada, Bristow, Byng, Paden, and Seminole, Okla., and from Jefferson, Okla., to Ranger, Tex., found unreasonable to extent it exceeded rates for like distances computed under scale prescribed on iron and steel pipe in 77 I. C. C. 473. Reasonable rates prescribed for future and reparation awarded. Texas Pacific Coal & Oil Co. v. A., T. & S. F., 118 I. C. C. 719.

(3e) No question of short hauling is involved inasmuch as the method of computing distances for the purpose of applying a distance scale does not determine the route of movement. Salt between Western and Southwestern Points, 120 I. C. C. 91, 97.

(3f) Complainant attacked commodity rates on logs, except walnut, cherry and cedar, carloads, from south of Charleston, S. C., to Savannah, Ga., as unreasonable. Lumber rates applied. Effective August 15, 1925, a distance scale was established which made a material reduction. The same scale was and is generally applicable on interstate traffic between points in South, North Carolina and Virginia. HELD, rates attacked unreasonable to extent they exceeded 3.5 cents for 30 miles to 6.5 cents for 120 miles. Southern Cotton Oil Co. v. A. C. L. R. R., 120 I. C. C. 190.

(3g) Complainant attacked through commodity rate charged on 29 cars of rough and clean rice shipped between Sept 1, 1923, and July 8, 1925, from Louisiana and Texas to Galveston, there accorded transit, and clean rice reshipped to Oklahoma as unreasonable. Charged 67 cents, rates sought range from 53 to 61.5 cents. Complainant relies on 95 I. C. C. 645 and 98 I. C. C. 581, wherein the rates on clean rice, carloads, from Memphis, Tenn., and Arkansas, Louisiana and Texas to Oklahoma were found unreasonable to extent they exceeded a distance scale prescribed therein. Defendants introduced no evidence. HELD, rates attacked unreasonable to extent they exceeded those prescribed in 95 I. C. C. 645 and 98 I. C. C. 581, reparation awarded. Seaboard Rice Milling Co. v. A., T. & S. F. Ry., 120 I. C. C. 263.

(3h) Following 96 I. C. C. 682, fifth-class rates on steel castings from Attica, Ind., to St. Louis, Mo., Chicago, Peoria, Streator, and Mount Vernon, Ill., found unreasonable and unduly prejudicial as compared with rates from various competing points in Illinois, Indiana, and Missouri. Distance scale of rates prescribed for future and reparation awarded. Nat'l Car Coupler Co. v. A., T. & S. F., 120 I. C. C. 37.

(3i) Upon further consideration, the original report 102 I. C. C. 419 modified, and distance rates on metal beds and related articles taking same rates from New Orleans to points in southern territory, found unreasonable to extent they exceed fourth-class rates minimum 12,000 pounds, and sixth-class rates minimum 30,000 pounds, prescribed in Southern Class Rate Investigation, 109 I. C. C. 300; 113 I. C. C. 200. Crescent Bed Co. v. A. & V., 120 I. C. C. 151.

(3j) Proposed distance rates on cement between Oklahoma and Texas points and between points in Texas over interstate routes, and cancellation of routes through Texas on shipments from Oklahoma to destinations in Arkansas, Louisiana, and Mississippi, designed for purpose of complying with commission's order for removal of undue prejudice in 113 I. C. C. 536, found not justified. Car-

riers compared proposed rates with similar rates applicable on other commodities, without a showing as to similarity in transportation characteristics or relationship between rates applicable thereon and rates on cement, nor was any evidence offered showing rates on cement in comparable territory. Moreover, rates proposed compare unfavorably with those prescribed in 87 I. C. C. 451, for application from Ada, Okla., to Kansas points. Cement Between Oklahoma and Texas, 120 I. C. C. 177.

(3k) Rates on logs, except walnut, cherry, and cedar, from points on Atlantic Coast Line in South Carolina south of Charleston, to Savannah, Ga., found unreasonable as compared with lower rates under distance scales in effect in same general territory, and to extent they exceed rates prescribed by the State public service commission for intrastate application in Alabama. Reasonable maximum scale of rates prescribed for future. Southern Cotton Oil Co. v. A. C. L., 120 I. C. C. 190.

(3l) Following 95 I. C. C. 645; 98 I. C. C. 581, rates on rice from Louisiana and Texas points to Oklahoma destinations, with transit at Galveston, Tex., found unreasonable to extent they exceeded rates constructed in accordance with distance scale prescribed in abovecited cases. Reparation awarded. Seaboard Rice Milling Co. v. A., T. & S. F., 120 I. C. C. 263.

(3m) Sixth-class rates on commercial fertilizer between points in c. f. a. territory found not unreasonable or otherwise unlawful in the past as compared with rates in the South and West, but for future found unreasonable to extent they exceed distance rates herein prescribed. As volume of movement is substantial and increasing use of fertilizers is an adjunct to successful farming, rates thereon should be more on a parity with those prescribed in 113 I. C. C. 389 in southern territory. However, on evidence presented the commission is not convinced that sixth-class rate produces rates which might be condemned as exceeding the limits of maximum reasonableness if evidence covering conditions in c. f. a. territory in general was fully presented, and scale prescribed therefor is without prejudice to any future findings which may be made on a more comprehensive record. Ohio Farm Bureau Federation v. A. & W., 120 I. C. C. 361.

(3n) Proposed revision, including increases and reductions, in rates between points in southern Missouri, eastern Oklahoma, Arkansas, and Louisiana, and from points in this territory to Mississippi River crossings and Memphis, in purported conformity with distance scale of rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, and 98 I. C. C. 654, found not justified. While rates prescribed in above case were fixed as reasonable maxima, present lower adjustment on fruits and vegetables was not disapproved therein. Moreover, schedules as proposed would result in undue prejudice to Memphis in favor of St. Louis, in addition to creating fourth-section violations. Fruits and Vegetables, 120 I. C. C. 395.

(3o) Upon reargument, findings in original report, 102 I. C. C. 540, prescribing a distance scale of reasonable maximum rates on salt from Louisiana mines to Mississippi destinations, and awarding reparation on shipments moving in the past, affirmed, except that McLain, Miss., is eliminated as a destination to which the scale shall apply as maxima. Differences in distance considered, the scale prescribed is in harmony with southwestern scale prescribed in 120 I. C. C. 91 and with rates from Kansas mines to western trunk-line territory prescribed in 92 I. C. C. 388. Mississippi R. R. Comm. v. A. & V., 120 I. C. C. 569.

(3p) Upon reargument, differentials which may be added to rates on salt under scale prescribed in original report, 102 I. C. C. 540, from Louisiana mines to local points on certain Mississippi short-line carriers, increased from 50 to 60 cents per net ton, and equidistant clause of fourth section of the act not required to be observed by these short lines in meeting more distant junction point rates. Misisssippi R. R. Comm. v. A. & V., 120 I. C. C. 569.

(3q) Authority granted carriers to apply under distance rates herein prescribed on salt from Louisiana mines to Mississippi destinations over all routes, the lowest rate available over any route from and to said points, and to maintain higher rates from and to intermediate points; provided that rates from and to the intermediate points shall in no case exceed the lowest combination, and that the relief granted shall not include routes more than 50 per cent longer than the

direct route from and to the competitive points. Mississippi R. R. Comm. v. A. & V., 120 I. C. C. 569.

(3r) Rates on butter, eggs, and dressed poultry, c. l. and l. c. l. from points in the Dakotas, Nebraska, and Minnesota to Duluth, Minn., found unreasonable, unduly prejudicial to Duluth, and unduly preferential of Chicago. Reasonable and nonprejudicial distance bases of rates prescribed for the future. Duluth Chamber of Commerce v. C. & N. W., 120 I. C. C. 683.

(3s) Complainant attacked rates on metal beds, in carloads, from New Orleans, La., to Arkansas, Louisiana west of the Mississippi River, Oklahoma and Texas, as unreasonable and unduly prejudicial. Metal beds, in carloads, minimum 20,000 pounds are rated fourth class in western classification. Lower commodity rates, however, are in effect from New Orleans to this territory, some subject to a minimum of 12,000 pounds and others to a minimum of 30,000 pounds. To Oklahoma the commodity rates are subject to minima of 30,000 pounds and 35,000 pounds. HELD, rates attacked not unreasonable or unduly prejudicial except that the rates to Oklahoma are unreasonable to extent they exceed rates ranging from 5 miles single line of 14 cents joint line 17 cents to 92 cents single and joint line for over 800 miles; that rate to Texas common points subject to 30,000 pounds is unreasonable to extent it exceeds 76 cents; that to Texas differential territory unreasonable to extent they exceed rates constructed by adding to the rates prescribed to Texas common points amounts equal to the amounts by which the class C rates to such points exceed the class C rate to the Texas common points. Crescent Bed Co. v. C. R. I. & P. Ry., 123 I. C. C. 41.

(3t) Respondents proposed to revise their rates on bananas, carloads, from New Orleans, and Port Chalmette, La., Gulfport, Miss., Mobile, Ala., and Pensacola, Fla., to destinations in southeastern Carolina and Mississippi Valley territories, also to Ohio River crossings and certain other points in Arkansas, Kentucky, Louisiana, Virginia and West Virginia. From Gulf ports the readjustment is in purported compliance with 109 I. C. C. 211, Bananas from Gulf Ports. The commission is of opinion that a proper revision of rates from the Gulf ports can be published by respondents, based on a mileage scale. It is essential however that a fixed rule for the computation of distances be adopted which will not be subject to varying interpretations. The distance formula prescribed in second supplemental report in the Southern Class Case, 109 I. C. C. 300. A scale is suggested ranging from 32 cents for 100 miles to 96 cents for 1,000 miles. HELD, suspended schedules not justified, without prejudice to the filing of new schedules in conformity herewith. Bananas from Gulf Ports, 123 I. C. C. 181.

(3uvw) In Fertilizers between Southern points, 113 I. C. C. 389, the commission prescribed a distance scale of rates for the transportation of fertilizers and fertilizer materials over standard lines in southern territory, and, with certain exceptions, authorized an arbitrary of 50 cents per net ton to be added to the standard line rates between points on certain so-called short or weak lines which it named of record and between those points and points on standard lines, the arbitraries to accrue solely to the short or weak line carriers. The American Short Line Railroad Association, by petition, now requests similar authority in the case of other short or weak lines, which were overlooked. HELD, the commission is justified in granting the prayers of these petitions, including the general amendment of fourth section order No. 9346. The N. C. & St. L., may use 50 miles as the constructive distance via Hobbs Island and Gunters Landing, Ala. Fertilizers between Southern Points, 123 I. C. C. 193.

(3x) Upon complaints bringing in issue the distance rates on articles in the uniform brick list prescribed in 68 I. C. C. 213, or on hollow building tile only from producing points in Indiana and Illinois to the Chicago switching district, FOUND: That the interstate rates on hollow building tile from St. Anne, Kankakee and Beaverville, Ill., are unreasonable; that the interstate rate on articles in the uniform brick list from Hobart, Ind., is not unreasonable; and that the rates (a) on intrastate shipments of hollow building tile from St. Anne, Kankakee, and Beaverville, and (b) on interstate and intrastate shipments of articles in the uniform brick list from Chicago Heights, Ill., are unduly preferential of those points and unduly prejudicial to Indiana producing points in the Wabash Valley group and

to Hobart. Reasonable and nonprejudicial bases prescribed. Indiana State Chamber of Commerce v. A., T. & S. F., 122 I. C. C. 81.

(3y) Upon further hearing, FOUND: That in applying distance scale of rates prescribed in 112 I. C. C. 7, on lime from Ohio points to destinations in c. f. a. territory, the so-called Woodville, Sandusky, and Carey groups should be considered as a single group. This finding expresses unanimous desire of Ohio lime producers, and commission is unable to find that use of a single group would unduly prejudice other shippers, or be inconsistent with application of distance scale prescribed in original report. Washington Building Lime Co. v. A. & B. B. R. R., 122 I. C. C. 105.

(3z) Rates on common brick from Harrisonville, Mo., to Kansas City, Kans., and Argentine, Kans., found unreasonable to extent they exceeded via various routes, 80 per cent of rates on other brick, which rates are equal to those prescribed for similar distances in Ballou Brick case, 77 I. C. C. 4, considered, in connection with the General Brick case. 68 I. C. C. 213. Reparation awarded. Harrisonville Brick & Tile Co. v. A., T. & S. F., 122 I. C. C. 489.

(4a) Distance rates assessed on cement from Ilasco, Mo., to various destinations in scale territories prescribed in 48 I. C. C. 201, found not unreasonable or unduly prejudicial. Complainant's contention that it was entitled to lowest possible rates which could be made under scale by use of distances over indirect routes through lower rated territory, even though shorter routes were available entirely within higher rated territory, is unsound. While distances used by carriers were not in all instances in accordance with a proper interpretation of term "short-line workable route," it would be impracticable to determine whether rates to each of destinations covered by complaint were based on proper distances. Moreover, complainant has had benefit of lower rates during the period prior to date they were increased by combining scale territories, which more than offsets reductions which would result from change in method of figuring distances. Atlas Portland Cement Co. v. Director General. 122 I. C. C. 680.

(4b) Rates on metal beds from New Orleans to destinations in western Louisiana, Arkansas, Oklahoma, and Texas found not unreasonable or unduly prejudicial as compared with rates contemporaneously in effect from St. Louis, Atlanta, Chicago, Kenosha, and New York, to same destinations, except to extent that rates to Oklahoma exceed rates based on distance scale prescribed herein; that rates to Texas common points exceed Table 14 rate prescribed in 77 I. C. C. 473; and that rates to Texas differential territory exceed rates constructed in accordance with method prescribed, all subject to a minimum of 30,000 pounds. Reasonable rates prescribed for future. Crescent Bed Co. v. C., R. I. & P., 123 I. C. C. 41.

(4c) Class and commodity rates applying to, from, or between points in the Southwest and Kansas-Missouri territory found to be in generally chaotic condition, and the tariffs complicated and unsatisfactory. Comprehensive system of rates based on distance, and embodying uniform class percentages so adjusted as to permit greater carload movement on class rates needed to correct situation. Consolidated Southwestern Cases, 123 I. C. C. 203, 217, 235.

(4d) All-rail class and commodity rates on various articles should be on same level throughout the Southwest and designated portions of Kansas-Missouri territory; and on standard-rail lines a single scale of first-class distance rates should be used as basis for maximum reasonable interstate rates within those areas. Consolidated Southwestern Cases, 123 I. C. C. 203, 382, 385, 386.

(4e) Fifth-class rate on structural steel from Denison, Tex., to Henryetta, Okla., based on the short single-line distance over a route other than route of movement, found unreasonable as compared with lower rates contemporaneously in effect for similar distances between various points in same general territory based on the distance scale prescribed in 77 I. C. C. 473, and to extent it exceeded joint-line rate under that scale for the distance shipments actually moved. Reparation awarded. Okmulgee County Commrs. v. M.-K.-T., 126 I. C. C. 1.

(4f) Rates on lumber and related articles from points in coast, Spokane and Oregon groups (Groups 1, 2, and 3) to Gordon, Irwin, Merriman, and Eli, Nebr., found unreasonable to extent they exceeded rates based on distance scale prescribed in 104 I. C. C. 695, for appli-

cation in same general territory. Carriers required to preserve the existing competitive relationships between the various groups as pointed out in 78 I. C. C. 746, in publication of rates in conformity with that scale. Reasonable rates prescribed for future and reparation awarded. Walrath & Sherwood Lbr. Co. v. C. & N. W., 126 I. C. C. 97.

(4g) Upon further hearing, rates for interstate transportation of lignite coal from mines in North Dakota, to destinations in North Dakota, South Dakota, and Minnesota, over single lines, based on the so-called conference scale of distance rates set out in original report, 89 I. C. C. 726, extended at same rate of progression for distances over 400 miles with addition of 20 cents per ton for joint-line hauls, which is the scale formerly in effect on intrastate traffic in North Dakota, approved for future. Lignite Coal from North Dakota, 126 I. C. C. 243.

(4h) Rate on crude phosphate rock, from Tilphosco and Brewster, Fla., to Meridian, Miss., found unreasonable as compared with lower rates to various destinations in Alabama, Tennessee, and Georgia, for comparable distances, and to extent it exceeds distance rates prescribed in 101 I. C. C. 165, for application on phosphate rock from Florida mines to Knoxville, Tenn. Reasonable rate prescribed for future and reparation awarded. Meridian Fertilizer Factory v. A. C. L., 126 I. C. C. 478.

(4i) Proposed rates on hay between points in Texas and between those points and points in the Shreveport, La., group, based on a composite scale observing as minima the rates prescribed in 48 I. C. C. 312, or those under distance scale prescribed in 101 I. C. C. 116, whichever are higher, plus differentials when through Texas differential territory, using as maximum a rate now applicable as a maximum blanket rate between points in Texas common-point territory, found not justified. In 101 I. C. C. 116, commission stated that whatever rates would be ultimately prescribed between Texas points should be applied between Texas points and Shreveport, but because of loss involved respondents have been unwilling to extend this intrastate adjustment beyond 350 miles. The proposed rates are in nature of a compromise, are apparently satisfactory to no one, and to extent they exceed those constructed in accordance with distance scale prescribed in last cited case, would be unreasonable, and many of them unduly prejudicial. Hay Between Points in Tex., La., and Ark., 126 I. C. C. 524.

(4j) Upon further hearing, rates on sand and gravel from Montgomery, Ala., to La Grange, Ga., found not unreasonable as compared with those contemporaneously in effect from Birmingham. While rates from latter district were lower for like distances than between various other points in the Southeast, carriers point out that rates assailed were lower than those between points in the Southeast other than to the Birmingham and Atlanta groups and compare favorably with those prescribed in 83 I. C. C. 436. Moreover, a scale of maximum interstate rates on sand and gravel for application in this general territory was prescribed in 122 I. C. C. 133 and in accordance therewith, finding in former report 85 I. C. C. 184 reversed. Roquemore Gravel Co. v. A. & W. P. R. R., 126 I. C. C. 575.

(4k) Rates on cement from Ada, Okla., and points in the Kansas gas belt to Texas destinations in Scale III and Scale IV territories, and from Portland and Concrete, Colo., to said Scale IV territory, found unreasonable, and rates from Kansas gas-belt points found unduly prejudicial as compared with those from Ada, Bonner Springs, Kans., Sugar Creek, Mo., and Portland and Concrete, Colo. Reasonable and nonprejudicial distance rates prescribed for interstate application, which will remove the undue prejudice in relationship of interstate and intrastate rates within Texas. Adjustment of intrastate rates left to State authorities and carriers. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63.

(4l) Joint-line interstate rates under agreed distance scale on livestock to Atlanta and Howell Stockyards, Ga., over certain lines under separate management and control, found reasonable. Complainant contended that as certain groups of carriers were under common management and control the single-line rates rather than joint-line rates should have been applied in conformity with order in 74 I. C. C. 419. However, carriers showed that the traffic policy of any of the roads was in no way dictated by officials of other carriers. Carriers found not to be under same management and control as defined in 87 I. C. C. 654. Bragg & Millsops Co. v. A. & W. P., 128 I. C. C. 238.

(4m) Original report, 120 I. C. C. 91, prescribing scale of rates on salt from Kansas producing points to points in the Southwest for distances up to and including 800 miles, modified to provide for extension of distance scale up to and including 1,000 miles; for addition of differentials for hauls through New Mexico to points in Texas differential territory when rate-making routes pass through New Mexico; and for the restriction of publication of prescribed rates to agency stations, provision being made for rates to intermediate nonagency stations. Salt Between Western and Southwestern Points, 128 I. C. C. 431.

(4n) In Salt Between Western and Southwestern points, 120 I. C. C. 91, division 3 prescribed reasonable maximum rates on salt, common, in packages, in blocks, or in bulk from Kansas producing points to destinations in southwestern territory. HELD, publication of rates permitted only to agency stations, with a provision to the effect that the rates to intermediate nonagency stations shall be the highest rate published to either of the agency stations between which the nonagency station is located. Scale extended to 1,000 miles, same fourth section relief granted. Salt between western and southwestern points, 128 I. C. C. 431.

(4o) Upon further consideration, findings in former report 123 I. C. C. 41, that rates on metal beds from New Orleans to destinations in Louisiana, Arkansas, Oklahoma, and Texas were not unreasonable or unduly prejudicial, except to Oklahoma, Texas common points, and Texas differential territory, minimum weight 30,000 pounds, modified and rates found unreasonable to extent they exceed column 55 and 41 rates, minimum weight 12,000 and 30,000 pounds respectively, prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable rates prescribed for future. Crescent Bed Co. v. C., R. I. & P., 128 I. C. C. 505.

(4p) In Crescent Bed Co. v. C., R. I. & P. Ry., 123 I. C. C. 41, the Commission found that the rates on metal beds, carloads, from New Orleans, La., to western Louisiana, Arkansas, Oklahoma and Texas were not and are not unreasonable or unduly prejudicial, except that the present rates to Oklahoma, Texas common points, and Texas differential territory, subject to a minimum weight of 30,000 pounds, are unreasonable. Metal beds, carloads, minimum 20,000 pounds, are rated fourth class in western classification. Lower commodity rates, however, are in effect from New Orleans to all of this destination territory, those to the Louisiana, Arkansas and Texas destinations being subject to minima of 12,000 and 30,000 pounds, and those to the Oklahoma destinations to a minima of 30,000 and 35,000 pounds. HELD, rates attacked unreasonable to extent they exceed column 55 and column 41 rates, from and to the same points prescribed in Consolidated Southwestern Cases 123 I. C. C. 203, with minimum weights of 12,000 and 30,000 pounds, respectively. Crescent Bed Co. v. C., R. I. & P. Ry., 128 I. C. C. 505.

(4q) Rates on brick and clay products included in uniform brick list from Perla and Fort Smith, Ark., to points in Alabama, Florida, Georgia, Kentucky, Mississippi, and Tennessee, except points on the Mississippi River, found unreasonable as compared with lower rates constructed under distance scales prescribed in 107 I. C. C. 681; 88 I. C. C. 543; 68 I. C. C. 213, for application in Southeast, official classification territory, and under uniform brick list, respectively, and to extent they exceed 12 per cent of first-class (column 100) all-rail rates approved or prescribed between Perla and Fort Smith, on the one hand, and points in said States on the other, in Consolidated Southwesten Cases, 123 I. C. C. 203. Reasonable rates prescribed for future. Acme Brick Co. v. A. & V., 128 I. C. C. 715.

(4r) Complainant attacked commodity rates charged on brick and other clay products in the uniform brick list, in carloads, from Perla and Fort Smith, Ark., to Alabama, Florida, Georgia, Kentucky, Mississippi and Tennessee as unreasonable and as compared with rates from points in the six states named to Arkansas, with rates from St. Louis, Mo., and other brick producing points, principally in the south, to points in the states above named, and with the intrastate rates in Mississippi and Tennessee, as unduly prejudicial. Perla is in southern Arkansas on the M. P. Fort Smith is in northwestern Arkansas served by several carriers. The short line distances to Memphis, Tenn., from Perla and Fort Smith are 174 and 296 miles, in each instance made over M. P. to Little Rock, Ark., thence C., R. I. & P. Single line distances are 189 and 308 miles, in each instance over the M. P.

Through rates from Perla and Fort Smith and, generally speaking, other points in the southwest, to the southeast are usually made by combination of rates to and from Memphis. At the time of the hearings proportional rates applied from Perla and Fort Smith to Memphis of 11c and 16c. These proportional rates were 2.5c and 1c less than the local rates from these points. Rates on brick from St. Louis, Mo., and alleged competitive points, to the southeast are constructed on the basis of 4.5c over the rates from Cairo, Ill., and Evansville, Ind. Distances from St. Louis to Cairo and Evansville are 152 and 165 miles, respectively. The rates here assailed are not only much higher than the average of the respective scales prescribed by the Commission for application on the same commodities in each of the territories through which shipments from Perla and Fort Smith are transported in moving to the southeast but are also substantially in excess of the higher or southwestern brick scale. HELD, rates attacked unreasonable to extent they exceed 12% of first class all-rail rates Consolidated Southwestern Cases, 123 I. C. C. 203. Acme Brick Co. v. A. & V. Ry., 128 I. C. C. 715.

(4s) Rates on sand from Pacific, Mo., to Fort Smith, Ark., found unreasonable on shipments moving over St. Louis-San Francisco, but not unreasonable on those moving over the Missouri Pacific. Distance rates over the Frisco are based on distance scale prescribed in 77 I. C. C. 473, and rate over Missouri Pacific is lower than that resulting from use of that scale. Harding Glass Co. v. M. P. 128 I. C. C. 754.

(4t) Complainant alleged that the rates on portland cement and wall plaster, in straight or mixed carloads, from Hanover, Mont., and on portland cement, carloads, from Trident, Mont., to the western and central portions of North and South Dakota are unreasonable, unduly prejudicial and unduly preferential of certain points in western trunk line territory. Joint rates are not maintained except to destinations in South Dakota on the Burlington. One factor single line rates apply only to stations west of the Missouri river; to stations east thereof rates are made on combination. Hanover is 7 miles west of Lewistown, Mont., and 110 miles southeast of Great Falls, Mont., on the G. N. and C. M. & St. P. Trident is 6 miles northwest of Logan, Mont., and 68 miles southeast of Helena, Mont., on the N. P. The record is convincing that the rates on cement from Hanover and Trident to this territory of destinations are unreasonable. Transportation and other conditions affecting the movement of this traffic are not so dissimilar from those within existing scale IV territory, as to justify rates higher than those applying within that territory. RATES ON WALL PLASTER. Piedmont and Black Hawk, S. D., alleged to be preferred, Fort Dodge, Ia., also. Taking into consideration the transportation conditions, it appears from a study of the rates in evidence (a) that with some exceptions, the rates from Hanover are unreasonable, especially those made on combination; (b) that certain of the intrastate rates from Piedmont and Black Hawk to South Dakota destinations are unduly preferential; and (c) that the rates to this territory of destination from other points alleged to be preferred, and from Piedmont and Black Hawk to North Dakota are not unduly preferential. No order will be entered at this time in respect of the relation as between intrastate and interstate rates but opportunity will be afforded to the carriers and the state authorities of South Dakota to remove the remaining undue prejudice and preference and unjust discrimination against interstate commerce. The present bases on mixed shipments give an undue advantage to certain other shipping points, alleged to be preferred. Defendants have no objection to granting the same privilege as to stopping in transit to complainant that is given to other producers. HELD, rates on cement, carloads from Hanover and Trident unreasonable and unduly prejudicial to extent they exceed rates ranging from 24.5c for 400 miles to 42.5c for 1,000 miles. Rates on wall plaster unreasonable and unduly prejudicial to extent they exceed rates ranging from 35.5c for 400 miles to 62.5c for 1,000 miles minimum 30,000 pounds, 31c to 54.5c minimum 40,000 pounds and 26.5c to 46.5c, 60,000 pounds. Three Forks Portland Cement Co. v. C. B. & Q. R. R., 129 I. C. C. 107.

(4u) Complainant attacked rates on limestone, broken, crushed or ground, in carloads, from Colrock and Margerum, Ala., to southern territory as unreasonable and unjustly discriminatory and unduly prejudicial to extent they exceed

the rates applied on crushed stone in southern territory. Colrock and Margerum are on the main line of the Southern about 15 and 23 miles, west of Sheffield, Ala. Effective May 6, 1925 the Southern published its crushed stone scale of distance commodity rates on asphaltic limestone, broke or crushed, from Margerum to destinations on its system lines, except to stations in Indiana, Illinois and Kentucky. These rates were made applicable from Colrock on July 15, 1925, and are now in effect. HELD, rates attacked unreasonable and unduly prejudicial to extent they exceed rates ranging from 60c single line and 80c joint line for 5 miles to 390c for 1,000 miles. Colbert Limerock Asphalt Co. v. A. C. R. R., 129 I. C. C. 177.

(4v) In Cooperative Oil & Paint Co. v. Director General, 88 I. C. C. 747, the Commission found that the rates on roofing and paving material, in carloads, from St. Louis and Kansas City, Mo., Cleveland and Lockland, O., and Chicago, Aurora, Madison, Marseilles, and East St. Louis, Ill., to Little Rock, Texarkana and Hope, Ark., and Shreveport, La., were not and are not unreasonable or otherwise unlawful, and dismissed the complaint. On further hearing, 122 I. C. C. 227 the finding was affirmed. HELD, a new scale of rates applicable on roofing and paving material, in carloads, from and to the points here considered has been prescribed in the Consolidated Southwestern Cases, 123 I. C. C. 203, complaint dismissed. Cooperative Oil & Paint Co. v. Director General, 129 I. C. C. 213.

(4w) In Fertilizers between southern points, 113 I. C. C. 389, the Commission prescribed a distance scale of rates within southern territory. It appears that in the maintenance of groups under the authority of that order, the rates between various points will be somewhat higher than they would be if the scale were strictly applied on a point to point basis. Such departures from the scale were forbidden in fourth section order 9346, issued in connection with the original report, and the carriers now ask that that order may be amended so that it will not interfere with the grouping plan. Fourth section order 9346 will be amended to permit the maintenance of rates from and to intermediate points on circuitous routes in excess of the scale basis strictly applied, but subject, however, to the limitation that on and after Sept. 20, 1927, such rates shall not exceed the scale basis by more than 15c per ton. Carolina R. R., asks for authority to maintain the same rates to Snow Hill as are contemporaneously in effect to Maury, and to maintain rates to the intermediate stations on the basis prescribed in the report. Commission is not convinced that the relief sought is necessary or desirable under the circumstances, and the petition will be denied. A supplemental order will be issued authorizing the short or weak lines to maintain the higher basis of 50c per ton over the standard line scale. Fertilizers between southern points, 129 I. C. C. 215.

(4x) Complainant alleged commodity rates on coke, carloads, from Troy, N. Y., to Massachusetts, Rhode Island, and Connecticut, on the New Haven, and Central New England, were and are unreasonable and unduly prejudicial. The N. Y. C. and B. & A. are willing that through rates be established from Troy. The New Haven and Central New England ask that the scale be established for single line hauls and that a difference of at least 20c be maintained between rates for single line and joint line hauls. HELD, rates attacked unreasonable to extent they exceed a distance scale ranging from 113c per ton for 10 miles to 441c for 500 miles, reparation awarded. Hudson Valley Coke & Products Corp. v. N. Y. N. H. & H. R. R., 129 I. C. C. 472.

(4y) Complainant alleged that the rates on portland cement, in carloads, from Mason City, Ia., to northern Minnesota, North Dakota, and points on the stub branches of the Soo Line extending into South Dakota to Greenville and Pollock, were and are unreasonable, unduly prejudicial and unduly preferential of cement producing points in western trunk line territory, including Steelton, Minn., and the Kansas gas belt, and Duluth, Minn. The rates prescribed are those prescribed in Lehigh Portland Cement Co. v. Director General, 61 I. C. C. 613, and are the scale III and IV rates fixed in the original report in Western Cement Rates, 48 I. C. C. 201. The basis sought are the revised scale III and IV rates prescribed in the second supplemental report in Western Cement Rates 69 I. C. C. 644. The Mason City cement mills are served directly by the Northwestern, C. G. A., M. & St. L. and Rock Island, and through switching arrange-

ments by the Milwaukee. They are nearer to this territory of destination than any cement mill, except that at Steelton. Application of the destination scale through from Mason City appears appropriate in this case. The more general application of the destination scale principle to cement rates in western territory was discussed with approval, although not prescribed because the record was not sufficiently comprehensive in Iola Cement Mills Traffic Asso. v. A. V. I. Ry., 115 I. C. C. 49, 63. HELD, rates assailed not unduly prejudicial but for future will be unreasonable to extent they exceed for the distance through from Mason City, the present revised scale III rates to extended scale III territory in Minnesota and North Dakota and to points in South Dakota on the Greenville branch of the Soo Line, and the present revised scale IV rates to extended scale IV territory in North Dakota and to points in South Dakota on the Pollock branch of the Soo Line. Lehigh Portland Cement Co. v. B. F. & I. F. Ry., 132 I. C. C. 3.

(4z) Complainant alleged that the commodity rates on sand and gravel from La Grange, Mo., to destinations in central Illinois and southeastern Iowa are unreasonable, unjustly discriminatory and unduly prejudicial. Shipments from La Grange into Illinois move south along the west bank of the river 8.5 miles to West Quincy, Ill., and thence over the bridge between the latter point and Quincy, Ill. The points in Illinois to which rates are alleged to be unreasonable are on the Burlington, C. M. A., Big Four, C. P. & St. L., C. & E. I., T. P. & W. and Wabash. HELD, rates to central Illinois unreasonable and unduly prejudicial to extent they exceed the basis of rates prescribed in Dolese Bros. Co. v. A. T. & S. F. Ry., 89 I. C. C. 110 and 122 I. C. C. 133. HELD, further, rates to points in southeastern Iowa on the Burlington, east of a line drawn from Pekin, Ia., through Ottumwa to Bloomfield, Ia., and on and south of the Burlington from Burlington to Pekin, unreasonable to extent they exceed the Iowa interstate distance scale, reparation awarded. Missouri Gravel Co. v. C. B. & Q. R. R., 132 I. C. C. 200.

(5a) Complainant alleged rates and minimum weight on iron beds and furniture were unreasonable. Original report 128 I. C. C. 445. HELD, rates assailed on iron beds and other articles of furniture classified therewith, in carloads, from Memphis, Tenn., to destinations in central, Buffalo-Pittsburgh and southern territories, are and for the future will be, unreasonable to extent they exceed, with a minimum of 12,000 pounds, the fourth class rates to be established under Southern Class Rate Investigation, 100 I. C. C. 513, 199 I. C. C. 300, 113 I. C. C. 200 and 128 I. C. C. 567, and to the extent they exceed, with a minimum of 30,000 pounds, the sixth class rates to be established thereunder. Memphis Freight Bureau v. A. G. S. Ry., 132 I. C. C. 223.

(5b) Complainant alleged rates on pu'l rods, sucker rods, and sucker rod joints, in carloads, from St. Louis, Mo., and Toledo, O., to Oklahoma and Texas were unreasonable. Both kinds of rods are wired for shipment in bundles of three, each bundle weighing around 100 pounds, and are loaded in open top equipment in straight or mixed carloads. St. Louis is the pivotal point in the rate adjustment under consideration, the rates from Toledo being made certain differentials over that point according to the adjustment of rates generally from defined territories to the southwest. The rates sought from St. Louis are based on the joint line distance scale of commodity rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, for application on bags, soap and potatoes throughout southern Missouri, Arkansas and Louisiana west of the Mississippi river. Pull rods were formerly rated class A, minimum 36,000 pounds, and were grouped with oil well outfits and supplies in western classification. Since Aug. 15, 1926 they have been rated fifth class. That classification rates sucker rods and sucker rod joints fifth class, minimum 36,000 pounds, when made of iron or steel, and provides for the application on sucker rods and sucker rod joints of the rating and minimum on oil well supplies when shipped in mixed carloads with these articles. HELD, rates assailed were not unreasonable in the past but will be unreasonable for the future to extent they exceed the column 32½ basis of rates prescribed in Consolidated Southwestern Cases, supra, 123 I. C. C. 203, minimum 40,000 pounds. Humble Oil & Refining Co. v. B. S. L. & W. Ry., 132 I. C. C. 225.

(5c) Complainant alleged commodity distance rate charged of $1.20 on 100 cars of gravel and 34 cars of sand shipped

from Paducah, Ky., to Menglewood, Tenn., between May 5 and July 21, 1923 was unreasonable and in violation of section four. On May 23, 1923 a commodity rate of $1.02 was established from Gravel Switch, Ky., to Menglewood on gravel. At the same time a rate of 90c was established from the same point to Dyersburg, Jackson, Bolivar and Memphis, Tenn., 112, 132, 160 and 188 miles. These rates did not apply on sand. Gravel Switch is on defendants line 22 miles northeast of Paducah, Ky., the latter point being directly intermediate to Menglewood. Effective July 22, 1923 the rate was reduced to $1.10. HELD, rates assailed not unreasonable or otherwise unlawful, complaint dismissed. Forcum James Lumber & Cooperage Co. v. I. C. R. R., 132 I. C. C. 293.

(5d) Complainant alleged commodity rates on cottonseed cake and meal, in straight and mixed carloads, from Quanah, Sweetwater and Lubbock, Tex., to Texas, Oklahoma, New Mexico, Colorado, Wyoming, Montana and Nebraska were and are unreasonable. The Commission prescribed a distance scale of rates in Oklahoma Corporation Commission v. A. & S. Ry., 98 I. C. C. 183 in this territory. HELD, rates assailed were unreasonable to extent they exceeded rates prescribed in 98 I. C. C. 183, reparation awarded. Quanah Cotton Oil Co. v. A. T. & S. F. Ry., 132 I. C. C. 304.

(5e) Complainant alleged that rates on cement in the entire southeastern territory were unreasonable, unjustly discriminatory and unduly prejudicial. Cement is frequently, and perhaps usually, loaded to the maximum capacity of the cars furnished, although the comparatively low minimum weights now prevalent in some parts of the south doubtless have an effect on the average loading. Cement may be loaded in any kind of moisture proof equipment and loss and damage claims are negligible. It is attractive traffic from a transportation standpoint, is eagerly sought by the carriers, and moves quite regularly throughout the year, particularly in the southern states, where climatic conditions make construction work possible at all times. The present rates on cement between points in the southern states, exclusive of the Mississippi valley, conform to no recognizable plan. The rates to the ports and many of the large and important consuming centers and junction points are lower, both relatively and actually, than the rates to intermediate points, even over the direct lines. The adjustment largely reflects the old "basing point" system. Defendants admit that the present rates are in urgent need of revision and therefore make no effort to justify them. The intrastate rates are equally inconsistent. On the whole it seems that the Commission may safely reach the conclusion that there is no great difference between densities in western cement scale II territory and in southern territory, but that the comparison would probably favor the former territory if it were possible to segregate its density from that of surrounding territories. The densities in trunk line and central territories are, of course, substantially higher than in either southern territory or the western district. In southwestern territory, where the Commission has normally fixed rates somewhat higher relatively than in southern territory, the Commission has prescribed cement rates on the same III basis in two important cases. The present rates on cement from all points of production to destinations in the Florida peninsula are the rates to Jacksonville, plus proportional rates south thereof, subject to a deduction of 2.5c under the socalled Jones combination tariff. HELD, rates assailed unreasonable to extent they exceed a distance scale of rates ranging from 4c for 5 miles to 46.5c for 1500 miles. Southern Cement Rates, 132 I. C. C. 427.

(5f) Complainant alleged that commodity rate of $2.30 applicable on gypsum block, carloads, from Port Clinton, O., to Detroit, Mich., from June 1923 to Oct. 1924, was unreasonable and unduly prejudicial to extent it exceeded $1.65. Complainant relies largely on Acme Cement Plaster Co. v. A. C. & Y. R. R., 47 I. C. C. 1, 53 I. C. C. 46 and 77 I. C. C. 691. Port Clinton is on the main line of the N. Y. C. about 35 miles east of Toledo, O., and 101.3 miles from Detroit. HELD, rate assailed not shown to have been unreasonable or otherwise unlawful, complaint dismissed. American Gypsum Co. v. N. Y. C. R. R., 132 I. C. C. 561.

(5g) Complainant alleged that rates on plaster, carloads, from Portland, Colo., to Panhandle region northwest of Wichita Falls and Abilene, Tex., and in the extreme northeastern portion of New Mexico, are unreasonable and unduly prejudicial. Portland is about 26 miles west of

Pueblo, Colo., and is served by Santa Fe and D. & R. G. W. At present complainant only enjoys commodity rates only to destinations on the Santa Fe. The record makes it clear that in many instances the relationship in the rates as between Portland on the one hand and Acme, Tex., on the other hand, results in undue prejudice and preference. It is equally clear that the evil lies in the rates from Portland, and not in those from Acme. The record shows no difference in transportation conditions which would justify a level of rates, mile for mile, from Portland, higher than that which obtains from Acme, Tex., and Acme, N. M., to the same territory. HELD, rates charged unreasonable and unduly prejudicial to extent they exceed rates ranging from 21.5c to 41c. Colorado Portland Cement Co. v. A. T. & S. F. Ry., 132 I. C. C. 671.

(5h) Complainant alleged that commodity rate charged on mine run and crude fire clay, in carloads, from Springfield, Ill., and Clayton and St. Louis, Mo., to Bartlesville, Okla., are unreasonable and unduly prejudicial. Springfield is not a producing point of fire clay. The Shipments moving during April and May 1924 represented surplus material on hand when complainants plant at Springfield was closed. The distance over the route of movement is 547 miles, charged 20.5c. There is no probability of any future movement of this commodity from Springfield and there is no necessity, therefore, for relief for the future from this point. Charged from Clayton and St. Louis 14.5c, distance 494 miles. Crude fire clay is of low value, ordinarily being worth less than $2 per ton. The 9702 scale was but an extension of the old Shreveport basis prescribed on sand and gravel in 1918, and these rates were not altered by the findings in Consolidated Southwestern Cases, 123 I. C. C. 203. HELD, rates charged unreasonable to extent they exceed 13.5c from Clayton and St. Louis, Mo., and 14.5c from Springfield, and for the future the rate from Clayton and St. Louis to Bartlesville via the direct route will be unreasonable to extent it exceeds 12.5c, reparation awarded. National Zinc Co. v. C., R. I. & P. Ry., 132 I. C. C. 724.

(5i) While in 48 I. C. C. 201, commission observed that "under present rate systems rates seem more nearly proportional to square root of the distance than to distance itself," this statement must be taken with qualification, as functions of the parabolic curve thus described tend toward a condition as distance increases, where added mileage does not carry any increment in the rate at all. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 38.

(5j) Sixth-class rates on crushed stone moving interstate from Security, Md., to Best Gate, Md., found unreasonable as compared with those under distance scale prescribed in 49 I. C. C. 681; 100 I. C. C. 411, from Pennsylvania and Maryland points to destinations in Maryland, New York, New Jersey, Delaware, Virginia, and District of Columbia, and to extent they exceeded lower commodity rates subsequently established. Reparation awarded. North American Cement Corp. v. W. M., 129 I. C. C. 90.

(5k) Rates on Portland cement from Hanover and Trident, Mont., to western and central portions of North Dakota and South Dakota, coterminous with original and extended cement Scale IV territory in those States, found unreasonable as compared with rates under that scale prescribed in 48 I. C. C. 201; 69 I. C. C. 644, from Portland, Colo., to Montana Scale IV territory and Utah destinations; from El Paso, Tex., to groups just described for comparable distances; and unreasonable and unduly prejudicial as compared with lower rates from Mason City, Iowa, and Steelton and Duluth, Minn., competing points, to extent they exceed distance rates herein prescribed. Reasonable and nonprejudicial rates prescribed for future. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107.

(5l) Rates on wall plaster from Hanover, Mont., to western and central portions of North Dakota and South Dakota, found unreasonable as compared with rates contemporaneously in effect from competing points in Loveland, Colo., Laramie, Wyo., and St. Paul, Minn., and from South Dakota points to destinations in North Dakota, for comparable distances; and unreasonable and unduly prejudicial as compared with intrastate rates from Piedmont and Black Hawk, S. Dak., to various South Dakota destinations. While distance rates herein prescribed will not completely remove

existing undue prejudice and preference between intrastate and interstate rates in South Dakota, no order will at present be entered with respect thereto but carriers and State authorities will be given opportunity to adjust their rates so as to remove balance thereof. Reasonable and nonprejudicial basis of rates prescribed for future. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107.

(5m) Contention that as proportional rate is but part of a through rate it is impossible to determine an issue of undue prejudice to one market and undue preference of another solely with respect to proportional rate unless evidence of though rates based on each market is available, not sustained, since each of such rates must be judged upon its own merits. See 46 I. C. C. 343, 350. This is especially apt where inbound rates to prejudiced or preferred markets are upon a distance scale. Des Moines Board of Trade v. F. D., D. M. & S., 129 I. C. C. 138, 145.

(5n) Rates on limestone containing 2.5 per cent or more of asphalt, broken, crushed, or ground from Margerum and Colrock, Ala., to destinations in southern territory, except Florida, found unreasonable and unduly prejudicial as compared with rates on similar asphalt rock from Oklahoma and Texas to Mississippi River points and west thereof and with those on sandstone asphaltic rock produced at Kyrock, Ky., competitive products; with rates prescribed in 96 I. C. C. 319, on crushed asphalt rock from Dougherty, Okla., to Kansas City, Mo.-Kans.; and to extent they exceeded distance rates herein prescribed. Reasonable maximum rates prescribed for future and reparation denied. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177.

(5o) Rates on lard substitutes from Greenville, Tex., to Arkansas and Louisiana destinations west of Mississippi River and to Joplin, Mo., collected on basis of rates from Fort Worth, Tex., with which Greenville was apparently grouped, found unreasonable to extent they exceeded rates based on distance scale prescribed in 22 I. C. C. 160. While lard substitutes were not originally included in list of commodities on which that scale applied, it has been prescribed for application on packinghouse products in southwestern territory generally and was found to be a reasonable basis on lard substitutes in 32 I. C. C. 192, and other cited cases. Reparation awarded. Texas Refining Co. v. C., R. I. & G., 129 I. C. C. 304.

(5p) Rate on lumber from Luverne, Ala., to Sarasota, Fla., found not unreasonable as compared with lower rates under distance scale for comparable hauls. Scale referred to was not scaled up to length of haul here involved and did not cover the shipment. Moreover, rate assailed compares favorably with rates between various points in same general territory for comparable distance and is lower than rate constructed on basis prescribed in Southern Class Rate Investigation, 100 I. C. C. 513; 109 I. C. C. 300; 113 I. C. C. 200. Aycock-Holley Lbr. Co. v. A. C. L., 129 I. C. C. 306.

(5q) Combinations of single-line interstate distance rates on cream, in 10-gallon cans, in baggage cars in passenger and mixed-train service, from certain points in North Dakota and South Dakota to Aberdeen, S. Dak., found not unduly prejudicial but unreasonable as compared with rates under the Beatrice, C. F. A., and Kirschbaum scales prescribed in 15 I. C. C. 109; 46 I. C. C. 601; and 100 I. C. C. 28, respectively, and to extent they exceeded distance rates herein prescribed, with addition of drayage charges as herein provided. Reasonable rates prescribed for future and reparation awarded. Beatrice Creamery Co. v. C., M. & St. P., 129 I. C. C. 375.

(5r) Rates on coke from Troy, N. Y., to destinations in New England territory found unreasonable as compared with contemporaneous rates under Seaboard distance scale prescribed in 62 I. C. C. 317, 327, or rates of same level from points in New Jersey, Rhode Island, and Massachusetts to same destinations, and to extent they exceeded distance rates based on shortest routes over which carload traffic can be moved without transfer of lading, subject to minimum weights as herein provided. See 113 I. C. C. 200. Reasonable rates prescribed for future and reparation awarded. Hudson Valley Coke & Products Corp. v. N. Y., N. H. & H., 129 I. C. C. 472.

(5s) Class rates on rough quarried granite, c. l., from East Weymouth, Mass., to local points on the N. Y., N. H. & H., found unreasonable and unduly prejudicial as compared with lower commodity rates contemporaneously applicable on common brick and on stone and granite paving and curbing; and to extent they exceeded, exceed, or may exceed, rates based on distance scale herein prescribed, minimum 48,000 pounds. Reparation awarded. Plymouth Quarries v. N. Y., N. H. & H., 129 I. C. C. 621.

(5t) Joint rates on wool, in the grease, in sacks, from points in Nebraska, Kansas, and Missouri, just west of Missouri River, to Boston, Mass., based on distance scale prescribed in Wool Rates Investigation, 1923, 91 I. C. C. 235, found not unreasonable, unduly prejudicial, or unjustly discriminatory as compared with combination of proportional rates previously in effect over same territory; with rates prescribed in 77 I. C. C. 431, from Iowa points to Boston; and rates to Boston from territory west of that here involved. Attack is directed against reasonableness of scale as applied from a small portion of territory, which exceeded for a time the aggregate of intermediates. However, record shows this violation was removed by certain tariff restrictions and presumption of uneasonableness found to have been rebutted. Boston Wool Trade Asso. v. A., T. & S. F., 129 I. C. C. 681.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Upon contention that commission is without jurisdiction to require an adjustment of divisions on past shipments because, one-half of the carrier's excess income for some years having been recaptured under section 15a, the earnings on value of railway property held for and used in service of transportation for those years have been "established by law;" and that excess earnings for other years are being held in abeyance to be recovered by and paid to the proper authority whenever net railway operating income, based upon value of property, have been finally determined. FOUND: Contentions are not well founded, recapture payments having been the result of tentative computations based upon carrier's figures and not upon a finding by commission. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 434.

(b) Upon contention that commission is without jurisdiction to prescribe divisions of joint rates, except for future application, where joint rates were not established pursuant to an order issued by it. FOUND: Joint rates here in issue being established pursuant to commission's findings in 58 I. C. C. 220, they come within plain language of section 15 (6) of the act, which gives commission power to require a readjustment of divisions for period subsequent to date investigation was instituted where joint rates were established pursuant to a finding or order of commission. See also 89 I. C. C. 695; 96 I. C. C. 402. Divisions

Received by B. R. R. & C. Co., 104 I. C. C. 415, 433, 434.

(c) Under the law, the commission is authorized to prescribe divisions only where joint rates are involved, or in a proceeding where joint rates are prescribed. Proportional Rates on Livestock, 109 I. C. C. 417, 424.

(d) Power or authority of commission to pass upon lawfulness of international joint rates and fix maxima in which the American lines may lawfully participate is not, as a matter of law, dependent upon adequacy or inadequacy of divisions accorded or available to those lines. Spanish River Pulp & Paper Mills v. A. & W., 120 I. C. C. 251, 252.

(e) The jurisdiction of the commission to require an adjustment of divisions between common carriers in the past is limited to joint rates established pursuant to its findings, and, in cases of that class, from the date the complaint was filed. St. Louis-San Francisco Ry. v. N. A. Ry., 123 I. C. C. 599, 603.

(fg) The Commission has no jurisdiction to fix the divisions of joint intrastate rates. It has no jurisdiction to fix the division of joint interstate rates retroactively unless those rates were established pursuant to an order or finding by it, in which case it may require an adjustment of divisions from the date of filing the complaint, the date of the order of investigation, as the case may be. Sugar Land Ry., 126 I. C. C. 529, 534.

(h) The power of the Commission over divisions is founded upon the public interest; that the carriers are mutually dependent parts of the transportation system; that the public interest requires that all essential parts be maintained, so far as possible, in effective working condition; that the relative amount and cost under economical and efficient management of the service rendered is a prime factor in determining the fair and equitable share of joint revenue which each carrier shall receive; and that included in such cost is a due proportion of the burden of maintaining the financial integrity and credit of the carrier. New England Divisions, 126 I. C. C. 579, 592.

(i) Upon analysis, the "equitable consideration" stressed by defendants mean only that the complainants are in great need of the joint rates in question while defendants are not in such need, and, indeed might in some cases prefer to refrain from participating. It follows that defendants have a strategic advantage, if divisions were to be fixed by the ordinary process of bargaining. But one of the duties of a common carrier is to participate in such joint rates as the public interest requires. This is an incident of their public undertaking, and equity does not necessarily demand that they be compensated by larger divisions in the instances where it might be more advantageous to confine traffic to their own lines. In the opinion of the Commission it was to avoid the unduly prejudicial effect of such strategic advantages upon the weaker carriers and the resulting impairment of transportation facilities upon which substantial proportion of the country depends that the powers of the Commission over divisions were clarified and strengthened. New England Divisions, 126 I. C. C. 579, 654.

(j) Interstate Commerce Act, § 1 (4), as amended by Transportation Act 1920, § 400 (Comp. St. § 8563), makes it the duty of carriers to establish through routes, and in case of joint rates to establish just and equitable divisions thereof. Section 15 (6) as amended by section 418 (Comp. St. § 8583), authorizes the Interstate Commerce Commission, after hearing, to change such division on a finding that the division in force is unjust and inequitable, and, "in cases, where the joint rate * * * was established pursuant to a finding or order of the Commission," it may make its order changing the division retroactive. HELD that, where the rate in question was a changed rate, put into effect by the carriers themselves, but under authority granted by Commission, it was established "pursuant to a finding or order of the Commission," within the meaning of the statute, and that in making a new division the Commission had power to make the change effective from the date of institution of the proceedings for that purpose. Brimstone R. & Canal Co. v. United States, 17 Fed. (2d) 165.

(k) Commission has no jurisdiction to fix divisions of joint intrastate rates. Sugar Land Ry. Co., 126 I. C. C. 529, 534.

(l) Commission has no jurisdiction to fix divisions of joint interstate rates retroactively, unless those rates were established pursuant to an order or finding by it, in which case it may require ad-

justment from date of filing complaint, or date of order or finding, as the case may be. See Section 15 (6); 61 I. C. C. 272. Sugar Land Ry. Co., 126 I. C. C. 529, 534.

(m) Joint rates in which Canadian lines participate found to apply to a service which is not "wholly within the confines of the United States" within meaning of section 1 of the act, and over which the commission has no jurisdiction. The commission having no power to prescribe such joint rates, it must follow that it is also without power to prescribe their divisions. In absence of treaty provisions or concurrent legislation in both countries affecting the matter, conflict of authority would be inevitable if any different rule were followed. New England Divisions, 126 I. C. C. 579, 637, 671.

III. COMPUTATION OF DIVISIONS.

§3. In General.

See Advanced Rates, §18 (10); Through Routes and Joint Rates §11 (2) (p).

(a) In 265 U. S. 274, 284, the Supreme Court said that in fixing divisions commission may take into consideration financial needs of a weaker road and give it a division larger than justice, merely as between the parties, would suggest in order to maintain it in effective operation as part of an adequate transportation system, and in 263 U. S. 456, 478, stated that transportation act seeks affirmatively to build up a system of railways prepared to handle promptly all interstate traffic of the country. Similar considerations may properly govern commission's action in establishing through routes, and commission has taken them into account in cases of this nature. See 78 I. C. C. 328; 95 I. C. C. 237; 88 I. C. C. 312. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 525.

(b) Based principally upon its weak financial condition and inability under present divisions to earn sufficient revenue to pay cost of operation, taxes, and a fair return on investment, and taking into consideration relative cost of service, fact that carrier is wholly an originating and delivering line, amounts of revenue required to pay operating expenses, taxes, and a fair return, and importance to the public of the transportation services afforded, existing divisions of joint interstate rates accorded the Minnesota Western R. R. found unreasonable and inequitable. Reasonable and equitable divisions prescribed. Minnesota Western R. R. v. A., T. & S. F., 109 I. C. C. 127.

(c) While in numerous cases the commission has recognized the rate prorate basis as an approximate means of dividing rates in accordance with amount and cost of service rendered, it is evident that the computation of divisions on such basis between carriers in official and western territories, made solely on basis of the respective first-class rates, is not convincing. Different classifications apply in the two territories, rates on lower classes bear considerably different percentage relationships to first class in the east from those in the west, and much traffic between the two territories moves on combinations of local or proportional factors to and from Chicago or Mississippi River gateways. Revenues in Western District, 113 I. C. C. 3, 24.

(d) Proposal of C., B. & Q., to withdraw transit arrangements at Denver, Colo., on grain and products originating on connecting lines, when previous transit has been accorded at Missouri River junctions and traffic is delivered to it for transportation to far western States under joint rates, found not justified. Under present divisional arrangements inbound carriers to river junctions retain their full locals, whereas for movement therefrom to Denver the Burlington is required to perform transportation at a deficit. Record affords no convincing reasons why revenue on traffic accorded a through status by virtue of transit arrangements should not be divided in same way as that on through traffic moving without interruption. Moreover, Missouri River and Nebraska grain markets have long enjoyed present arrangements, curtailment of transit would seriously affect their interests, and situations of character here disclosed should be met by increasing revenues to a reasonable level for existing services rather than by curtailment of services. Transit Privileges on Grain, 113 I. C. C. 374.

(e) The ultimate question here is whether the east side lines or west side lines should bear the expense incident to the transfer across the Mississippi river from East St. Louis, Ill., to St. Louis, Mo., of practically all carload and less carload through freight originating east of the East St. Louis-St. Louis dis-

trict and destined west thereof. Complainants are four of the important west side carriers serving St. Louis, the Frisco, M. P., M. K. T. and Rock Island. The principal defendants are the east side carriers serving East St. Louis, 13 in number, although most of the carriers in the eastern and southern groups are also named as defendants. None of the east side lines serving East St. Louis has its own rails across the river to St. Louis and none of the west side lines serving St. Louis have their own rails directly across the river to East St. Louis. The traffic is transferred from one side of the river to the other by the Terminal Railroad Association and its subsidiaries. For years past the west side lines have borne the transfer charges on practically all eastbound and westbound through traffic. They are willing to continue the present practice with respect to all eastbound traffic, but contend that the east side lines should bear the charges on all the westbound traffic. The practice of breaking the joint rates on East St. Louis rather than on St. Louis is apparently due largely to the fact that in 1877 the C. & A., extended a line from the west across the Mississippi river at Louisiana, Mo., and thence south through Alton, Ill., to East St. Louis. Having its own line into East St. Louis, it there interchanges its traffic with the east side lines. To meet this situation the west side lines, other than the Alton, absorb the transfer charge between St. Louis and East St. Louis. As a rule, the carrier which performs the inbound haul, the delivering carrier, switches or trucks the freight to its connection, or pays the expense of that service if performed by a third party. Regardless of the original cause, the fact is that St. Louis and East St. Louis, as to traffic moving to and from these points, are now in one rate group. In deciding upon what would be a reasonable practice, primary consideration should be given to what is a fair method of apportioning the revenue regardless of the competition of the Alton. If that competition is forceful now, it will continue so, regardless of whether or not the relief sought is granted. The east side lines are entitled to such advantageous effects as it may hereafter produce, but its history does not control in determining a reasonable practice. The history of both the Combination rates and the divisions of joint rates applicable to this traffic indicates that the transfer charge was given little or no consideration in the establishment of any of these rates or divisions. The fact is that, finding the opportunity there, defendants took advantage of it to require complainants to continue to pay the transfer charge, not only on eastbound traffic, but also on westbound traffic. No carrier participating in a through route, except by special agreement with its connection or connections, can be charged with responsibility for transporting any shipment over such through route until that shipment has been offered to it at a recognized interchange point on its lines. Until it has been so offered the responsibility rests with the connecting line. In this instance the connecting lines are the east side carriers whose lines, by virtue of the fact that St. Louis is shown as a point on their lines, extend to the respective points of interchange with complainant west side lines in St. Louis, and the responsibility of transporting this traffic rests with the east side lines until its delivery to complainants at St. Louis. Defendants practice is contrary to the generally accepted practice throughout the country. The usual practice among rail carriers is to divide the switching expenses when the services of an intermediate carrier are utilized in effecting interchange, the switching charge being absorbed by the carrier that delivers the traffic to its connection. There is a generally recognized obligation on part of all carriers on through traffic to make delivery on the rails of their connections, either direct or by bearing the charges of the intermediate switching line, and this is the general practice of railroads throughout the country. The Commission believes this to be a just, fair and reasonable practice for general application, and one which should be followed by the carrier serving the East St. Louis-St. Louis district. HELD, practice of east side lines in requiring the west side lines to bear the transfer charges on westbound freight traffic moving through St. Louis and East St. Louis on combination rates which are the same on St. Louis as on East St. Louis will be unjust and unreasonable, and that the just and reasonable practice with respect to such traffic will be for the east side lines to bear or absorb all such transfer charges. C. R. I. & P. Ry. v. B. & O. R. R., 113 I. C. C. 681.

(f) Upon a consideration of the character of service, and cost studies submitted in evidence, a division of $3 per loaded car, which covers empty as well as loaded movement, found just, reasonable, and equitable to the Peoria & Pekin Union Ry. Co., for interchanging freight cars between all connecting lines in the Peoria switching district. Rates of P. & P. U. Ry., 115 I. C. C. 469, 481, 497, 513, 514.

(g) In 115 I. C. C. 469, commission prescribed a division to the Peoria & Pekin Union of $3 per loaded car interchanged by it "which covered the empty as well as the loaded movement." Upon petition that commission modify its order so as to make a charge of $1.50 per empty car where the loaded movement was not over the Union's line, HELD: Empty cars are generally handled free under rules of American Railway Association and commission does not believe that a separate charge on such cars handled by the Union would be justified at present time. Rates of Peoria & Pekin Union Ry., 118 I. C. C. 127, 129.

(h) Former report 115 I. C. C. 469, prescribing a division to the Peoria & Pekin Union of $3 per loaded car interchanged by it at Peoria & East Peoria, Ill., modified so as to permit substitution of a plan for publication of switching charges and absorption thereof by line-haul carriers, provided such plan is agreed upon by all carriers and satisfactory provision made to protect shippers against any increase in charges. Rates of Peoria & Pekin Union Ry., 118 I. C. C. 127, 129, 130.

(i) Simply because a certain division of a joint rate was once agreed upon by participating carriers and respective services rendered thereunder by them were later changed is not conclusive that one or another of those agreed divisions is equitable. Minnesota-Atlantic Transit Co. v. C., St. P., M. & O., 123 I. C. C. 485, 492.

(j) Provisions of the act protect carriers against confiscatory divisions. See 295 U. S. 274, 285. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 509.

(k) It is settled that in determining what the divisions should be, the Commission may, in the public interest, take into consideration the financial needs of a weaker road; and that it may be given a division larger than justice merely as between the parties would suggest "in order to maintain it in effective operation as part of an adequate transportation system," provided the share left to its connections is "adequate to avoid a confiscatory result." New England Divisions, 126 I. C. C. 579, 599.

(l) Circumstances and conditions under which freight rates on perishables were established between Boston and Chicago and conditions affecting divisions of such rates are substantially different from those affecting establishment of rates on milk for application within New England territory, and, aside possibly from some incidental features in connection with so-called fast-freight service, the services are not comparable. Furthermore, divisions from perishable-freight traffic received by some of the New England roads do not afford a sound basis upon which to judge reasonableness of rates on milk throughout New England. Milk and Cream Between New England Points, 126 I. C. C. 38, 63.

(m) Upon reconsideration, findings in former report, 87 I. C. C. 21, that divisions accorded Sewell Valley R. R. Co., out of joint rates on coal from points on its line were not unjust, unreasonable, or inequitable, affirmed. While present divisions on coal traffic, based on a percentage of through rate with a maximum allowance is unusual, and results in relatively low divisions on some movements, the average divisions have not been materially below the maxima allowed and commission is unable to condemn this basis. Moreover, present record demonstrates that a greatly increased tonnage has been handled promptly; that operating costs have been materially reduced since 1922; and it is believed that this showing is indicative of what net income the present basis of rates and divisions may be expected to yield in future. Sewell Valley R. R. Co. v. C. & O., 126 I. C. C. 425.

(n) Upon investigation by commission on its own motion, divisions of joint rates on interstate and foreign commerce maintained by Sugar Land Ry. Co., and its trunk-line connections, found unjust, unreasonable, inequitable, unduly preferential and prejudicial as between carriers parties thereto, to extent they departed from basis of divisions subsequently established by agreement between re-

spective carriers involved. Adjustment of divisions directed, retroactive to Aug. 26, 1920, on which date joint rates of the Sugar Land were increased pursuant to an order or finding of commission and director general advised as to proper basis for adjustment during period of Federal control. Sugar Land Ry., 126 I. C. C. 529.

(o) If a general rate structure is well adjusted, a very significant and valuable test of divisions may be made by comparing them with local rates for same hauls. It should be borne in mind, particularly in New England, that same considerations which justify relatively high divisions also justify relatively high local rates. New England Divisions, 126 I. C. C. 579, 590.

(p) The financial needs of weak lines are an important factor for consideration by commission in cases involving the fixation of divisions. New England Divisions, 126 I. C. C. 579, 599.

(q) While equitable considerations are a factor of importance in the bargain and trade by which carriers arrive voluntarily at divisions, it is not a factor to which commission can give much weight in fixing divisions of joint rates over through routes which are necessary in the public interest. New England Divisions, 126 I. C. C. 579, 654.

(r) A mileage prorate is an unsatisfactory test for divisions when hauls are short on one side and long on the other. A terminal line with a short average haul could not sustain burden of terminal expense without relatively high ton-mile earnings and this is universally recognized in construction of rate scales and in the principle, followed in those scales, that ton-mile yields should decrease with distance. There is no good reason why same principle should not apply to divisions, and it is because of this fact that a rate prorate, when the rates are fairly comparable, affords a valuable test of divisions. New England Divisions, 126 I. C. C. 579, 667.

(s) On further hearing, finding of original report, 96 I. C. C. 116, that operation of joint passenger-train service between Seattle and Tacoma, Wash., and Portland, Ore., and division of earnings therefrom will be in interest of better service to the public, will promote economy of operation, and will not unduly restrain competition; and that terms and conditions under which such division is proposed to be made are just and reasonable, affirmed and new contract extending terms and conditions of original contract for three years and amendment thereto eliminating requirement that one pool train be operated daily between Portland and Centralia, Wash., approved upon showing that pool trains were being operated at a loss and upon arrangement for additional stops and flags of through trains. Puget Sound-Portland Joint Passenger-Train Service, 128 I. C. C. 149.

(t) Pennsylvania and its affiliated lines ask certain modifications of the order reported in 126 I. C. C. 579, New England Division. These requests are denied with the exception of those which seek increases in the divisions of joint rates on anthracite coal which were prescribed, covering movements from mines served by the Pennsylvania to Jersey City, N.J., and to Rotterdam Jct., N. Y. The division prescribed covering the movements to Jersey City was $2.15 per long ton. The Commission is of the opinion that the divisions should be increased. HELD, finding on page 660 of the report in 126 I. C. C. 579 should be amended so as to provide over routes from mines served by the Pennsylvania a division of $2.25 per long ton to Jersey City and a division of $3.30 per long ton to Rotterdam Jct. New England Divisions, 132 I. C. C. 93.

(u) Complainant, Hoboken Manufacturers R. R. Co., a common carrier by railroad engaged in interstate commerce alleged that the division of joint rates accorded to it on shipments of silk from points on the Pacific coast to destinations on its line is unjust and unreasonable. Hoboken is primarily a switching and terminal railroad at Hoboken, N. J. Practically all of its revenues are derived from the performance of those services. Its operations extend over a distance of about 1 mile, exclusive of side and team tracks, from a point at Second St. to Eighteenth St., where it has direct track connections and interchanges freight with the Erie. It also interchanges freight with other railroad companies through the Erie over its own float bridge at Hoboken. Silk moves at a transcontinental any quantity rate of $9 per 100 pounds. Carriers east of Chicago, receive 27.5% of this rate, or $2.475 which is about 175% of their first class rate from Chicago to New York. The Hobokens division is 5.25c or the same as it ordinarily receives on less carload

freight. Special armed guards are employed to protect the silk from theft while it is on the Hoboken until it is unloaded. The unloading is perforced for the Hoboken by the testing company in whose ware-house the silk is stored for the period of free time or 48 hours. Delivery to the consignee is made by the testing company upon the rodero f the Hoboken. HELD, on and since Aug. 6, 1926, the division received by the Hoboken out of joint rates on silk from points on the Pacific coast to destinations will be unjust and unreasonable in that upon its line was, is, and for the future it was, is, and for the future may be less than 22c per 100 pounds. Hoboken Mfrs. R. R. Co. v. A. T. & S. F. Ry., 132 I. C. C. 579.

§4. Inability to Agree.

See Advanced Rates §7 (6); Discrimination §10½; Through Routes and Joint Rates §5.

(a) The act provides a method for adjusting disputes between carriers over divisions and controversies of that character afford no justification for increased rates and will not be permitted to work injury to shippers. This principle, however, has no application where carriers desire to eliminate through routes via Canada since commission has no authority either to require establishment of joint rates over Canadian routes or to prevent their cancellation. Elimination of G. T. Ry. from Certain Routes, 115 I. C. C. 609, 611.

§7. As Evidence.

See Comparative Rates; Evidence §13 (2), §13 (3); Through Routes and Joint Rates §14.

(a) While the commission has frequently said that divisions ordinarily afford little basis for determining reasonable maximum rates, it would seem that they may properly be given more weight in the determination of a reasonable minimum rate in the nature of a proportional rate. Ex lake iron ore from Chicago to Granite City, 120 I. C. C. 75, 80.

(b) Divisions of joint rates are not, generally speaking, of value as a test of reasonableness of rates. Farrell Foundry & Machine Co. v. A., B. & A., 123 I. C. C. 127, 130.

(c) Divisions of a joint rate are not ordinarily a sound test of reasonableness of rates. American Grain & Hay Co. v. I. C., 129 I. C. C. 225, 229.

IV. LEGALITY.

§8. In General.

See Allowances IV; Legality of Rates; Tap Lines §7.

(a) Proportional rates are but parts of through rates and are in nature of divisions rather than of high rates. Where joint through rates are reasonable and free from undue prejudice shippers are not concerned with whether divisions up to or beyond a given gateway are higher on their traffic than on traffic of their competitors. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 128.

(b) The public is not concerned as to divisions agreed upon by joint carriers so long as through rates are not involved, unless one or more of the divisions are so low as to throw a burden upon other traffic. Alabama Mining Institute v. I. C., 109 I. C. C. 740, 754.

(c) Commission instituted an investigation into and concerning the ownership and control of the Sugar Land Ry. Co., with a view to determining whether the divisions received by it on traffic handled interline with its trunk line connections, and the rules, regulations and practices of that carrier and its connections are unduly preferential or otherwise unlawful. The Sugar Land extends from Cabell, Tex., southerly to Anchor, Tex., 38.5 miles, with a branch of 1.7 miles easterly to House from House Jct, 18.3 miles from Cabell. It connects with the S. P. at Sugarland, 4.9 miles from Cabell; with the Santa Fe at Santa Fe Jct., and Sugarland Jct., 16.2 miles from Cabell; with the International at House; with the I. & B. V. at Anchor and at Houston with all lines entering that city. The Sugar Land conforms to the federal laws applicable to common carriers by railroad engaged in interstate or foreign commerce. It files tariffs and annual reports, pays per diem on freight cars used by it to the owning carriers, enters into average demurrage agreements with some of its patrons, and in all other respects acts as a common carrier. It is and at all times covered by this investigation, has been a common carrier subject to the act. It does not appear that the Sugar

Land has any direct control over either the Sugarland Industries or the sugar company, or that they have any control over the Sugar Land. Practically all traffic handled by the Sugar Land either originates on or is destined to points on its line. The haul of the Sugar Land to and from its various interchange points is less than 1 mile to Sugar Land 11.3 miles to Santa Fe Jct., 15.1 miles to House, 33.6 miles to Anchor and 36.1 miles to Houston. HELD, divisions of joint rates with respondents were on and after August 26, 1920 unreasonable to extent they departed from the divisions agreed upon effective Sept. 1, 1920, and adjustment of said divisions as between respondents should be made in accordance with said basis in respect of traffic on and after Aug. 26, 1920. Sugar Land Ry. Co., 126 I. C. C. 529.

V. REASONABLENESS.

§9. In General.

See Reasonableness of Rates.

(a) Based upon cost of service and a fair return upon value of property held for and used in service of transportation for public generally, just, reasonable, and equitable divisions to Brimstone R. R. & Canal Co., prescribed on traffic to and from its connections and a retroactive adjustment thereof required. Former reports, 68 I. C. C. 375 and 88 I. C. C. 62. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415.

(b) At request of carriers and in order to facilitate agreement, commission apportioned the rate found reasonable by setting forth amount thereof due each participating carrier, but made no definite finding, and no order to that effect, commission not claiming any authority to so apportion the rate, no joint rate being prayer for, established, or prescribed for future. Watab Paper Co. v. N. P., 107 I. C. C. 131, 135.

(c) In 265 U. S. 274, 284, the Supreme Court said that in fixing divisions commission may take into consideration financial needs of a weaker road and give it a division larger than justice, merely as between the parties, would suggest in order to maintain it in effective operation as part of an adequate transportation system, and in 263 U. S. 456, 478, stated that transportation act seeks affirmatively to build up a system of railways prepared to handle promptly all interstate traffic of the country. Similar considerations may properly govern commission's action in establishing through routes, and commission has taken them into account in cases of this nature. See 78 I. C. C. 328; 95 I. C. C. 237; 88 I. C. C. 312. Ft. S., S. & R. I. R. R. Co. v. A. & V., 107 I. C. C. 523, 525.

(d) When other methods of increasing earnings or reducing operating costs have been examined without discovering required relief for a weak road it becomes necessary to consider preventing needed revenue from passing to more prosperous connections. Minnesota Western R. R. v. A. T. & S. F., 109 I. C. C. 127, 131.

(e) There is nothing to prevent carriers perorfming a movement into transit point from being adequately compensated for all expenses in connection with such service through a proper apportionment of through charges in division between respective carriers forming through route. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(f) Divisions of through rates accorded certain short lines in lower Mississippi Valley by Illinois Central and other carriers on coal moving with divisions accorded such short lines by carriers moving similar traffic from Birmingham district of Alabama. Illinois Central reserves same or about same amount of through rate at common junction points as is reserved by carriers serving Alabama mines, and as long as this basis of equality is maintained, and divisions of the Illinois Central are not so low as to throw a burden upon other traffic, and weak short lines are beneficiaries of a liberal policy in respect of divisions, there is no undue prejudice or discrimination. Alabama Mining Institute v. I. C., 109 I. C. C. 740, 752, 755.

(g) Former report 115 I. C. C. 469, requiring establishment of joint rates on traffic interchanged by the Peoria & Pekin Union at Peoria or East Peoria, Ill., and classifying division of the Toledo, Peoria & Western west of Peoria as an east-side carrier thereby requiring that line to bear division of the Pekin Union on all traffic brought into Peoria over its western division, modified so as to classify eastern division of the Toledo's line with east-side or East-Peoria carriers and its western division with west-side carriers. Rates of Peoria & Pekin Union Ry., 118 I. C. C. 127, 128.

(h) Upon petition of the Peoria & Pekin Union, former report 115 I. C. C. 469, providing that said line shall not receive any division on traffic delivered to C. & N. W. at Peoria or East Peoria, Ill., by west-side carriers for switching service at those points, modified so as to not prevent the Pekin from receiving a division of joint rates on such traffic provided same shall come out of rates or proportions or joint rates now accruing to the C. & N. W. Rates of Peoria & Pekin Union Ry., 118 I. C. C. 127, 128, 129.

(i) While divisions ordinarily afford little basis for determining reasonable maximum rates, they may properly be given more weight in determination of a reasonable minimum rate in nature of a proportional rate. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 80.

(j) Simply because a certain division of a joint rate was once agreed upon by the participating carriers and the respective services rendered thereunder by them were later changed is not conclusive that one or another of those agreed divisions is inequitable. Minnesota Atlantic Transit Co. v. C., St. P., M. & O. Ry., 123 I. C. C. 485, 492.

(k) While it may be urged that the divisions are, perhaps, noncompensatory, the provisions of the act now protect carriers against confiscatory divisions. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 509.

(l) Frisco Ry. attacked as unjust, unreasonable, inequitable and prejudicial, the division of $2.50 per car allowed it for the transportation from the interchange track of the Southern Ry. to the coal tipple of the Mississippi Warrior River section of the Inland Waterways, known as the barge line, near Cordova, Ala., of coal, in carloads, moving from points on the N. A. and Southern to New Orleans, La., and to Mobile, Ala. Original report in 88 I. C. C. 107. HELD, the divisions between complainant and defendants of the joint rates here considered have been and since and including August 26, 1920, and for future will be unjust, unreasonable and inequitable to extent they differ from the following basis: on traffic to New Orleans between August 26, 1920 and June 30, 1922, 55 cents per ton to Southern and N. A., $3 per car to complainant, and remainder to barge line. Since June 30, 1922 and for future 49.5 cents per ton to Southern and N. A. Ry., $2.70 per car to complainant and remainder to barge line. On traffic to Mobile, Ala., between August 26, 1920 and June 30, 1922, 45 cents per ton to Southern and N. A., $3 per car to complainant and remainder to the barge line. Since June 30, 1922 and for the future 40.5 cents per ton to Southern and N. A., $2.70 per car to complainant and remainder to barge line. St. Louis San Francisco Ry. v. N. A. Ry., 123 I. C. C. 599.

(m) Divisions of joint rates on anthracite coal from points on the lines of the C. R. R. Co. of N. J., via Maybrook, N. Y., to points on the New York, New Haven & Hartford and Central New England railroads, found not in violation of section 208 (b) of the transportation act, 1920. Reasonableness and fairness of divisions on this traffic via Maybrook and New York Harbor under section 1 (4) of the interstate commerce act left for determination in a pending proceeding. C. R. R. Co. of N. J. v. N. Y., N. H. & H., 122 I. C. C. 661, 675, 677.

(n) Refusal of rail carriers at Duluth to accord the Minnesota-Atlantic Transit Co., increased divisions for handling carload freight between cars and floor of its privately owned docks, found not unjustly discriminatory, unduly prejudicial, nor in violation of section 1 (4) of the act. The law does not require defendants to perform service sought merely because they perform them at their own docks so long as no discrimination is practiced. Here defendants perform no loading or unloading at any private dock, at any dock leased by it to steamship lines or shippers, or at docks of other carriers to which, for convenience of shipper or steamship line, it switches cars. Moreover, the issue of divisions has not been presented with sufficient particularity to warrant a finding as to their reasonableness. Minnesota-Atlantic Transit Co. v. C., St. P., M. & O., 123 I. C. C. 485.

(op) Upon further hearing, carriers being unable to agree upon divisions of joint rates to be paid the St. L.-S. F. Ry., on coal, moving from points on the Northern Alabama and Southern railways to New Orleans, and points taking same rates, and to Mobile, and transported from interchange track of the

Southern Ry., to coal tipple of the Mississippi Warrior River barge line, near Cordova, Ala., just, reasonable, and equitable divisions to be received by respective carriers established and readjustment thereof back to date of commission's order prescribing joint rates required. Former report, 88 I. C. C. 107. St. Louis-San Francisco Ry. v. N. A. Ry., 123 I. C. C. 599.

(q) In Sewell Valley R. R. Co., v. C. & O. Ry., 87 I. C. C. 21, division 1 found that the divisions accorded complainant out of joint rates on coal from points on its line were not unjust, unreasonable or inequitable, and the complaint was dismissed. The evidence presented upon the further hearing does not show any material change in the line of the Sewell Valley excepting that the branch line which terminated at Rupert, W. Va., has been extended 4 miles to Glencoe, W. Va. Certain betterments have been made in the way of reducing curvatures and grades, and there has been a substantial replacement of 70 pound rails with 100 pound rails. The Sewell Valley is practically an intermediate carrier of coal which now constitutes more than 90% of the total tonnage. The present record demonstrates that a greatly increased tonnage has been handled promptly and that operating costs have been materially reduced, and it is believed that the showing made for the years since 1922 is indicative of what net income the present basis of rates and divisions may be expected to yield to this railroad in the future. The present basis of divisions on coal accorded complainant is perhaps unusual, and results in relatively low divisions on some movements, but the average divisions have not been materially below the maximum allowed, and the Commission is unable to condemn this basis. HELD, previous findings affirmed. Sewell Valley R. R. v. C. & O. R. R., 126 I. C. C. 425.

(r) In the original complaint No. 11756 certain steam railroads operating almost wholly in New England, sought increased divisions out of joint freight rates between points in New England on their lines and all other points in the United States and adjacent foreign territories. Original report, New England Divisions, 62 I. C. C. 513, Report on reargument, New England Divisions 66 I. C. C. 196, report construeing original order New England Divisions 85 C. C. 482. It is estimated that the increase in divisions realized under the order averaged 9.75% for the New Haven and Central New England; 11.8% for the Boston & Maine; 6% for the Rutland; 6.62% for the Maine Central; and 2% for the Central Vermont. THE INCREASES SOUGHT ON MERCHANDISE TRAFFIC. Speaking broadly, subject to exceptions, the request is that 0% be substituted for the 15% in the effective order. In the opinion of the Commission the available evidence does not show that the New England divisions, considered as a whole, are too low in relation to comparative costs of service. The dangers of an assumpton that deficiencies in local earnings must inevitably be made up on interchange business at the expense of connecting lines is obvious. Communities and the roads which serve them might too readily arrive at the conclusion that they are "unable" to increase local rates and, in disregard of the principle of self-help, unduly rely upon others to carry their burdens. However, it is clear that the financial needs of weaker lines are an important factor in the consideration of divisions. THE PETITION OF THE WESTERN CARRIERS. The joint rates to or from points in what is known as Illinois and Wisconsin prorating territory were increased 40% in 1920 instead of 33.3%, and as to those rates the western lines are willing to share in the burden of the increased New England divisions. Apparently this prorating territory all of that portion of Illinois in which the western lines operate and all portions of Wisconsin where the rates to and from the Atlantic Seaboard territory are made certain percentages of the Chicago rates. It also appears that the 40% increase was extended to the rail-lake-rail rates to and from Duluth and the Twin Cities. The joint all rail rates to the Twin Cities, however, were increased only 33.3%. The Commission finds that it does not justify the conclusion that the divisions now received by the New England lines under the amended order on traffic to and from western points is too high. Western carriers ask only that the burden of the increase be confined to the eastern defendants. This involves the question as to what the primary divisions of the joint rates should be east and west of Chicago or other border gateway. The record is inedequate for the determinination of this important

issue. The fact stands out, however, that in the case of transcontinental rates the western and eastern lines, with the exception of the New England complainants, have agreed upon a division of 27.5% east of Chicago, with 3c added as a terminal arbitrary in the case of citrus fruit, and to this the B. & A. in New England has also agreed. Related percentages have been agreed upon east of the other border gateways. For the purposes of this case, therefore, these primary divisions of the joint rates may be taken as fair and reasonable without prejudice to the rights of both groups of carriers to bring this issue before the Commission for determination in another proceeding upon a more adequate record. This will give the eastern lines, with the exception noted above as to citrus fruit, 27.5% of the transcontinental joint rates for their haul east of Chicago and related percentages east of other border gateways, out of which the increased divisions of the New England complainants are to be paid, and will leave to the western lines, subject to the same exception, 72.5% west of Chicago and related percentages west of the other gateways, out of which no contribution is to be made to the New England lines. Many of the joint intergroup rates between New England and western trunk line territory were increased 40% at the time of the general increase of 1920 instead of the normal 33.3%. As to these, the western lines are willing to contribute pro rata to the increased New England divisions. In the case of such joint rates, however, as were not increased 40%, the evidence is not convincing that the western lines should contribute to the New England increase. The record warrants the conclusion that the divisions received by the eastern lines out of these rates are adequate to enable them to bear the full burden of the increases. It should be said, however, that in the case of all the joint rates between the Atlantic seaboard and western trunk line territory it appears that the divisional arrangements between the eastern and western lines are in need of revision. THE PETITION OF THE SOUTHERN CARRIERS. Class rates are not an accurate index of differences in general rate levels. A larger part of the traffic moves on commodity rates in the south, and many of these rates are as low as or lower than rates which move the same traffic in the eastern group. It appears that the southern carriers have had the principal voice in fixing the level of the freight rates between the two groups, but that the the eastern lines have had the principal voice in fixing the divisions. By reason, however, of the relatively greater increases which have been made in the eastern intragroup rates than in the intergroup rates, the divisions which the eastern lines receive out of the latter are considerably smaller in comparison with the corresponding local rates than they were when they were first established. The divisional situations differ, also, as to class and commodity rates. Competitive influences have affected the commodity rates more than the class rates, and the shrink made necessary by such influences has apparently been borne chiefly by the southern lines. While it is difficult to draw general conclusions from the evidence as to the commodity rate divisions, it appears that the southern lines have on the whole made out the better case. With respect to commodity rates via Potomac Yard, Norfolk, and Richmond, it has not been shown that the southern lines should reasonably be required to contribute to the increased New England divisions, except where they receive as large percentage of the rate as they receive of the class rate upon which the traffic would move in the absence of a commodity rate. With respect to both class and commodity rates via the Ohio river crossings, it has not been shown that the southern lines should be required to contribute to the increased New England divisions. With respect to both class and commodity rates via Hagerstown, there is no showing that would justify a change in the present divisional arrangements. These conclusions are without prejudice to any different conclusions which might be reached if the issue of the divisions between the southern carriers and their northern connections were more directly raised and more comprehensively tried in another proceeding. Obviously there is no rhyme or reason in many of these divisions. PETITION OF DELAWARE & HUDSON. The D. & H. asks that the amended order be modified so that it shall not be required to receive lower divisions generally on traffic interchanged with complainants than prior to the effective date of the order. Its petition also contains specific prayers that rates to and from points on the

line of the Rutland between Rouses Point and Ogdensburg, N. Y., and to and from points on its own lines north of Albany, Troy or Delanson, N. Y., shall be excluded, and that it shall not be required to surrender to complainants a greater share of its gross operating revenues than is surrendered "by other defendants in this proceeding, or other defendants operating in the eastern rate group, considered as a whole." The D. & H. interchanges more tonnage, including or excluding coal, with complainants than any other connection except the New York Central and the Pennsylvania. Conceding that a tentative valuation is without probative effect in any judicial proceeding where the value of the property is in issue, the Commission is of the opinion that tentative valuations made by the same body following identical methods in each case are an aid in checking the relative status of property investment acounts of carriers. HELD, the Commission is not persuaded that the present divisions of the D. & H. on joint merchandise traffic with the New England complainants are unjust, unreasonable or inequitable. PETITION OF THE ERIE. Erie alleged that their division of joint rates on all class and commodities with the New England carriers are unjust, unreasonable, and unduly prejudicial. They also desire exemption from the amended order. HELD, the Commission is not persuaded that the present divisions of the Erie lines on joint merchandise traffic interchanged with the New England lines are unjust, unreasonable or inequitable. PETITION OF CENTRAL OF NEW JERSEY. They seek to be exempted from the amended order. It may be that this defendant is not receiving a fair proportion of the revenue from the joint rates which accrue to the lenes west of the Hudson river; it may be that too large a share of the revenue accrues to the New England lines; both these situations may exist in combination; or neither of them may exist. Upon the record it is impracticable to determine the facts in this respect. The issue was presented by the Jersey Central in the evidence as one wholly between it and the New England lines, whereas other carriers are directly involved. Under the circumstances it appears that the Central of New Jersey has presented insufficient evidence with respect to this traffic and that it can be accorded no relief upon this record. HELD, the Central of New Jersey has sustained its contention that it should be exempted from the amended order in the case of interchange merchandise traffic in which it is the sole participating deefndant. PETITION OF NEW YORK CHICAGO & ST. LOUIS. This petition was filed by the N. Y. C. & St. L., successor of the L. E. & W., and asks in behalf of the latter for exemption from the order. The L. E. & W. was a comparatively weak line operating in central territory which was consolidated with the N. Y. C. & St. L. in 1923. HELD, the meager evidence introduced affords no basis for the relief sought. CANADIAN TRAFFIC. The Commission is of the opinion that the joint rates in which Canadian lines participate apply to a service which is not "wholly within the confines of the United States" and over which it has no jurisdiction. The Commission has repeatedly held that it has no power to prescribe such joint rates and it must follow that it is without power to prescribe their divisions. In the absence of treaty provisions or concurrent legislation in both countries affecting the matter, conflict of authority would be inevitable if any different rule were followed. The conclusion that the Commission is without authority to do what is sought makes it unnecessary to consider the evidence bearing on these divisions. THE NEW ENGLAND STEAMSHIP COMPANY. This company operates boat lines on Long Island sound between Bridgeport, New Haven and New London, Conn., Providence, R. I., Fall River and New Bedford, Mass., on the one hand and New York City on the other. The New Haven owns all its stock and bonds but it is separately operated. It was not originally named as a complainant and, therefore, its divisions were not affected by the order, 85 I. C. C. 482, 489. But where it is an intermediate carrier in rail-water-rail routes between points on the New Haven or Boston & Maine and points of defendants lines, the divisions of the New England rail lines were increased. The New England Steamship Company has now been made a complainant and seeks the same increase in its divisions as was granted to the rail lines. Here the New England Steamship Company enjoys all rail rates and the same divisions as the all rail lines received prior to the order herein, and its situation with respect to the expense of transfer

at New York City is more favorable than that of the New Haven. HELD, the meager record with respect to this water carrier does not sufficiently support a conclusion that its divisions are unjust, unreasonable, or inequitable. JOINT RATES TO AND FROM POINTS ON OTHER NEW ENGLAND LINES. Complainants participate in joint rates to and from points in New England on the C. & A., C. P., G. T., B. & A. and certain independently operated short lines. The record contains no specific evidence with respect to such joint rates to and from points on the B. & A., C. P. and G. T. On most of the traffic to and from the Bangor & Aroostook points combination rates based on its junction with the Maine Central apply. There are certain joint rates, but in such instances it appears that the division of the B. & A. is the same as the proportional rate which it receives on similar traffic as to which joint rates do not apply. In other words, the combination rate is published as a joint rate, doubtless for the convenience of shippers. The result of the order as it now reads is that complainants receive an increase in divisions when combination rates apply but not when joint rates equal to the combination apply. The B. & A. is not seeking an increase in its divisions of such joint rates. HELD, the order should be further amended so that it will cover complainants divisions of joint rates to and from points on the B. & A. and short lines named above, but without affecting the divisions received by the B. & A. or the short lines or the manner in which the latter are deducted before prorating or borne by the New Haven, as the case may be. SPECIAL COMMODITY DIVISIONS. HELD, an increase, corresponding to the increase granted in the case of the divisions of other joint rates on merchandise traffic, should be granted in the case of divisions of these various commodity rates. BOSTON AND ALBANY AMENDMENT. The B. & A., which is leased to and operated by the N. Y. C., is a defendant in No. 756 although it is a New England line. The original order did not separate this carrier from the other defendants. That order would have increased the divisions of complainants on joint traffic with the B. & A. within New England, and it would have reduced the divisions of the latter not only on such traffic but also on traffic in which it participates with other defendants and complainants as an intermediate carrier. The latter traffic is largely to and from points on the New Haven. The original order further provided that complainants divisions should be increased by 15% of their own amount or by 15% of the amount of defendants divisions, whichever was smaller. The result of including the B. & A. with the other defendants would thus have been to increase the divisions of the New Haven the full 15% in practically all cases where the B. & A. is an intermediate carrier, notwithstanding that only a small part of the entire haul might be west of the Hudson river. On traffic interchanged directly with other defendants, on the other hand, the divisions of the New Haven for similar hauls were in many cases increased by less than the full 15%. Upon consideration it seems to the Commission that these results were unfair to the N. Y. C. system. The conclusion is warranted that operating conditions are on the whole substantially more favorable on the B. & A. than on the New Haven. HELD, the Commission is not persuaded that the present divisions of the New England complainants on traffic interchanged with defendants through the B. & A. are unjust, unreasonable or inequitable. DIVISIONAL ARBITRARIES. Some of the divisions which complainants receive are made up in part of a percentage of the joint rate and in part of a specific amount termed an arbitrary. There is no evidence that the arbitraries were increased at the time of the general 5% increase in rates. Nor is there evidence that they were increased at the time of the 15% increase, except in so far as it became effective after December, 1917, i. e., during federal control. HELD, on March 28, 1922 complainants and defendants divisions of the joint rates in issue were the divisions which existed in Dec. 1917, changed in proportion, in each case, to the changes in the joint rate of which the division is a part which occurred between Dec. 31, 1917 and Dec. 1, 1919. HELD, it would seem unfair for the future to increase all arbitraries—those of defendants as well as those of complainants—as they existed in Dec. 1917, by 50% and to forget the past. In making this suggestion the Commission has in mind the particular circumstances of this case, including the increase in complainants divisions which was ef-

fected by the order, the fact that the increase was in part premised on the circumstances that the arbitraries had not been increased in harmony with the general rate changes, and the subsequent trend of earnings on the New England lines. The suggestion is not to be taken as an indication that the Commission is of the opinion that arbitrary divisions should not in general be changed in proportion with rate changes. On the contrary, the fact that in the past there has been no such change has resulted in substantial injustice to many carriers. DIVISIONS ON ANTHRACITE COAL. The New Haven, Central New England, Boston & Maine, Maine Central and Central Vermont ask that their divisions of joint rates on anthracite coal be increased 15%. It is immaterial to defendants, they say, whether coal moves all rail to New England or to tidewater for transshipment by barge. This can hardly be true of the D. & H., which has no route of its own to tidewater and secures only a short haul when the coal moves that way. The claim has more substance in the case of the other anthracite lines, all of which reach tidewater. But while this is a factor of importance in the bargain and trade by which carriers arrive voluntarily at divisions, it is not a factor to which the Commission can give much weight in fixing divisions of joint rates over through routes which are necessary in the public interest. The evidence shows that the anthracite divisions of the New England complainants are in many cases less than a mileage prorate would produce and in yet more cases they are lower than a rate prorate would produce, using Anderson scale rates as a measure both east and west of the Hudson river although it is conceded that the level of local rates should be lower in trunk line territory than in southern New England and lower still than in northern New England. These comparisons give no consideration to the socalled "disability ratio" of the New England lines. Their divisions are much less favorable on this traffic than their current divisions on merchandise traffic. HELD, a just and reasonable result will be produced if the divisions on prepared sizes are made the following amounts per long ton, based on the rates in effect in 1923; To Jersey City, $2.15 over the Pennsylvania and $2.10 over all other routes. To Maybrook, $1.90 over Reading and Jersey Central and $1.80 over all other routes. To Mechanicville, $2.30 over all routes. To Rotterdam Jct., $2.65 over all routes. DIVISIONS OF BITUMINOUS COAL. The New Haven, Central New England, Maine Central and Central Vermont seek an increase of 10% in all their divisions of joint rates on bituminous coal. The two originating roads most vitally interested are Pennsylvania and B. & O. The evidence indicates that the bituminous divisions of the New England lines, unlike their anthracite divisions, are in all cases in excess of what a mileage prorate would produce. However, judged by complainants exhibits, they are in many cases less than a rate prorate would produce, using the Anderson scale as a measure. A mileage prorate is an unsatisfactory test when the hauls are short on one side and long on the other. As a matter of fact a terminal line with so short an average haul as the Central Vermont could not sustain the burden of the terminal expense without relatively high ton mile earnings. This is universally recognized in the construction of rate scales and in the principle that ton mile yields should decrease with distance. There is no good reason why the same principle should not apply to divisions, and it is because of this fact that a rate prorate, when the rates are fairly comparable, affords a valuable test of divisions. While the bituminous divisions appear to be relatively less favorable than the merchandise divisions, the Commission believes that weight should be given to the considerations mentioned in connection with the anthracite divisions,—namely, to the fact that defendants particularly concerned in the bituminous traffic are the defendants upon whom the burden of the increase in merchandise divisions chiefly fell, and to the fact that the increase in merchandise divisions was in part based upon serious financial depression of the New England lines from which they appear to be recovering. HELD, sufficient reason has not been shown for increasing the divisions of bituminous joint rates received by the B. & M., Me. C., and C. V. In the case of the New Haven, need exists for the fixing of reasonable rates in view of the failure of the carriers in general to agree upon a basis, and in prescribing these divisions the Commission thinks the evidence warrants some slight shrink in defendants share and corresponding increase in the New

Haven share. This can be accomplished by fixing defendants divisions from the Clearfield region to both Jersey City and Maybrook at $2.43 and by providing that the divisions from the other regions shall be related thereto by adding or deducting the established differentials. No sufficient reason is shown for changing the aggregate divisions received by the New Haven on bituminous interchanged with the N. Y. C. at B. & A. gateways or Beacon. New England divisions, 126 I. C. C. 579.

(s) Upon further hearing, divisions of joint rates between lines in New England and other carriers in eastern, southern, and western territories, as covered by commission's order of March 28, 1922, found unjust, unreasonable and inequitable in some instances but not in others. Just, reasonable, and equitable divisions prescribed or suggested for future application. Former reports, 62 I. C. C. 513; 66 I. C. C. 196; and 85 I. C. C. 482. New England Divisions, 126 I. C. C. 579.

(t) Complainant, Erie, R. R., alleged that the divisions, claimed by defendants of the joint through rates on anthracite coal from producing points in Pennsylvania to destinations in Illinois beyond the Chicago switching district and within the boundary marked by the line of the E. J. & E., are unjust, unreasonable, inequitable and unduly prejudicial. The through rates prior to Nov. 13, 1922 were made on full combination over Chicago. In Chicago Coal Merchants Asso. v. Director General 73 I. C. C. 161, the Commission found that the rates on this traffic were unduly prejudicial to the destinations here considered and unduly preferential of points within the Chicago switching district, and prescribed certain arbitraries over Chicago to remove such undue prejudice. On Nov. 13, 1922 the carriers established this relationship by reducing the through rates so as to maintain the arbitraries prescribed. The divisions claimed by defendants by their lines are composed of these arbitraries plus 30c, subject to their local rate as maxima. The division claimed by complainants for their lines is their full local rate to Chicago, leaving as a division for defendants only the arbitraries prescribed by the Commission. Taking the adjustment as a whole, however, the mathematical average of complainants and defendants shares of the through rates prior to Nov. 13, 1922 were 78.6 and 21.4%, respectively. Of the present through rates, 21.4% is roughly the equivalent of the applicable arbitraries over Chicago plus 20c per ton, subject to defendants local rates as maxima. HELD, just, reasonable, equitable and nonprejudicial divisions on this traffic are, and for the future will be, the applicable arbitraries over Chicago plus 20c per ton subject to defendants local rates as maxima, to accrue to defendants, with the remaining portions of the through rates to accrue to complainants, since Feb. 17, 1924. Erie R. R. Co. v. C. & N. W. Ry., 129 I. C. C. 743.

(u) Complainant, Artemus Jellico R. R., alleged that the divisions of joint rates received by it, for the transportation of interstate shipments of bituminous coal from mines on its line are unjust, unreasonable and unduly discriminatory. Complainants line is situated in the southeastern part of Kentucky and extends from Artemus to Wheeler, with a branch to Anchor, distance 12.9 miles. It connects with the L. & N. at Artemus about 20 miles southeast of Corbin, Ky. Corbin is on the main line of the defendant, L. & N., extending from Cincinnati, O., to Atlanta, Ga. Passenger service on complainants line is operated by a socalled jitney line under a contract which provides that complainant shall receive one fourth of the gross receipts from the passenger business. The record is not convincing that complainants difficulties are principally traceable to lack of fair divisions. Paucity of traffic seems to constitute the chief reason for its failure to earn a fair return. HELD, divisions received out of interstate joint rates on bituminous coal since Nov. 5, 1925 have been and for future will be unjust, unreasonable and inequitable, and should be not less than 25c per net ton. Artemus Jellico Railroad Co. v. L. & N. Ry., 132 I. C. C. 183.

(v) Divisions of joint rates on anthracite coal from Pennsylvania points to destinations in Illinois beyond Chicago switching district, found unreasonable, inequitable, and unduly prejudicial to extent they exceed applicable arbitraries over Chicago, plus 20 cents per ton, subject to defendant's local rates as maxima, to accrue to defendants, with balance of through rates to accrue to complainants. In 73 I. C. C. 161, arbitraries over Chicago were prescribed to remove undue prejudice which arbitraries carriers established by reducing through

rates so as to maintain the arbitraries. Here, divisions climed by complainants would stand no portion of a similar reduction; those claimed by defendants only a portion of it; and no consideration would be given to divisions accruing to connecting lines. Erie Railroad Co. v. C. & N. W., 129 I. C. C. 743.

§10. Evidence and Procedure.

See Evidence; Procedure Before Commission.

(a) Expenses of one particular short line should not govern as to maximum expenses of another particular short line, unless some definite showing as to similarity of conditions is in evidence, but where a number of comparable short lines have been selected with particular care such comparisons are of probative value. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 424, 425.

(b) In order to be helpful, exhibits dealing with divisions, like those covering rates, should give either the distances over the direct lines, or the average distance over all lines, or the average hauls of all actual shipments. Rates of Peoria & Pekin Union Ry. Co., 115 I. C. C. 469, 506.

(c) To require specific evidence, and separate adjudication, in respect to each division of each rate of each carrier, would be tantamount to denying the possibility of granting relief. New England Divisions, 126 I. C. C. 579, 643.

(d) If a general rate structure is well adjusted, a very significant and valuable test of divisions may be made by comparing them with local rates for same hauls. It should be borne in mind, particularly in New England, that same considerations which justify relatively high divisions also justify relatively high local rates. New England Divisions, 126 I. C. C. 579, 590.

(e) Although in the fixation of divisions the Commission is required to take into account the amount of revenue required to pay operating expenses, taxes, and a fair return on the property held for and used in the service of transportation, this is only one of the elements which it is required to consider, and the fact that complainant has not earned a fair return does not necessarily entitle it to an increase in divisions that will produce such return. Artemus Jellico R. R. Co. v. L. & N. R. R., 132 I. C. C. 183, 188.

DOUBLE ADVANCES

See Advanced Rates §9½.

DOUBLE LOADING

See Classification §7½.

DRAYAGE

See Absorption of Charges §5 (a) (b) (d); Allowances §8 (5) (b), §8 (8).

(a) This investigation was instituted on motion of the commission on April 6, 1925 into and concerning the lawfulness and propriety of Southwest Missouri R. R. tariff I. C. C. 12, providing for certain absorptions on account of the drayage of ore, in carloads, from mines and switches enumerated in said tariff to the company's terminals and loading tracks at Picher and other points in Oklahoma. The Southwest Missouri is an electric line owning no freight cars. The Picher mining district is not served directly by any trunk line but is served by the Northeast Oklahoma R. R., and Miami Mineral Belt R. R., as well as by the Southwest Missouri. The average distance from all of the mines in this district to a loading track of either the Northeast Oklahoma or the Miami Mineral Belt is less than .025 mile. There are only 8 or 10 mines in this district that with respect to drayage distances are as favorably located to the tracks and sidings of the Southwest Missouri as to the tracks and sidings of the Northeast Oklahoma or the Miami Mineral Belt. With a view of attracting to its rails ore traffic from certain mines in this district which would normally move over the Northeast Oklahoma or Miami Mineral Belt because of the shorter drayage required to the loading tracks of one or the other of those roads, the Southwest Missouri then filed the tariff here under consideration. It describes four zones one half mile in width and provides that on ore, in carloads, drayed to specified loading tracks, from mines in zone 1, not over ¼ mile from such loading tracks, no draying absorption will be paid; that from mines in zone 2, within one half mile beyond zone 1, a drayage absorption of 15c per ton will be paid; that from mines in zone 3, within one half mile beyond zone 2, a drayage absorption of 30c per ton will be paid; and that from mines in zone 4, within one half mile beyond zone 3, a drayage absorption of 45c per ton will be paid. The tariff also contains a list

of mines with their zone location and the amount of absorption on ore originating at each mine. The operation of the absorption arrangement is to pay to the teamster making the haul to the Southwest Missouri tracks the amount specified in the tariff, thereby generally relieving the shipper of the necessity of making any payment to the teamster in addition to the turn around charge, should the shipper desire to ship over the Southwest Missouri, and at the same time according to the shipper for the rail transportation a rate as low as that available over other lines. The amount received from the carrier does not represent the teamster's total charge for the haul from the mines, but he receives in addition the 50c turn around charge from the shipper. The tariff provides no policing rules intended to insure that the allowances paid are correct. While as a matter of form the amounts of the tariff absorption are paid to the teamster, the teamster is in fact the agent of the shipper and not of the carrier. The railroad to which the ore is being drayed is designated by the shipper and the teamster hauls the ore to that railroad as directed by the shipper. The Southwest Missouri pays to the teamster a part of the drayage charges which the shipper would otherwise have to pay if he desired to ship by that line. While the Southwest Missouri volunteers to make this payment, it does not by the absorption tariff hold itself out to perform any part of the drayage service from the mine bins to its loading tracks, and in fact it expressly disclaims that it has possession of the ore or any control over it until the drayage service has been completed and the ore has been placed in the course of rail transportation by delivery to the carrier at its loading tracks. When closely analyzed the tariff under consideration in its present form is nothing more or less than a statement that out of its published tariff rate for rail transportation subject to the jurisdiction of the commission the Southwest Missouri will make to shippers at certain mines, either directly or indirectly through the medium of payments to teamsters employed by and under the direction and control of those shippers, specified rebates varying in amount in inverse ratio with the accessibility of such mines to that carrier's rails, but that shippers at other mines, including those nearer to as well as farther distant from its rails, will be required to pay the full published tariff rate if they tender to the Southwest Missouri at the same loading tracks like traffic for like transportation subject to the act. Such a practice is clearly unjustly discriminatory in violation of section 2 which provides that no carrier subject to the act shall, directly or indirectly, by any special rate, rebate or other device, charge or receive from any person a greater or less compensation for any service rendered in the transportation of property subject to the act than it charges or receives from any other person for doing for him a like and contemporaneous service in the transportation of a like kind of property under substantially similar circumstances and conditions. HELD, the tariff described in this report provides for the application of more than one rate, and for unjustly discriminatory rates, to the transportation of a particular class of traffic from one point of origin to certain points of destination, in violation of section 2 and 6 of the act. Drayage absorptions by S. W. M. R. R., 113 I. C. C. 179.

(b) Upon investigation by commission on its own motion into and concerning a certain tariff of Southwest Missouri R. R., an electric line, providing for absorption of drayage charges on ore from the Picher, Okla., district, FOUND: Such tariff is nothing more or less than a statement that out of its published tariff rate the carrier will make to shippers at certain mines, either directly or through the medium of payments to teamsters employed by them, specified rebates varying in amount in inverse ratio with the accessibility of such mines to its rails, but that shippers at other mines, including those nearer to as well as farther distant from its rails, will be required to pay full published tariff rate if they tender at same loading tracks like traffic for like transportation. Such tariff clearly results in unjust discrimination under section 2, and provides for application of more than one rate in violation of section 6 of the act. Drayage Absorptions by S. W. M., 113 I. C. C. 179.

(c) Carrier contended that in absence of a violation of the statute the commission is without power to substitute its judgment for that of a carrier with respect to its operating policies, and urges that since its absorptions for drayage services are available to any teamsters who care to perform the service, there is no discrimination between them and com-

mission has no authority to require that they shall be supplied or withdrawn, citing 91 I. C. C. 539, 547, wherein commission said: "There is nothing in the act to prevent establishment of such service or publication of charges in connection therewith by carriers subject to the act." HELD: Quotation relied upon referred to accessorial terminal services by carriers subject to commission's jurisdiction in the collection and delivery of freight commonly referred to as store-door delivery, which services carriers undertake to perform as a part of the transportation subject to commission's jurisdiction. Drayage Absorption by S. W. M., 113 I. C. C. 179, 183.

(d) Complainant alleged refusal of defendant to refund drayage charges on two cars of grapes forwarded on Sept. 27 and 29, 1922 from Pasadena and Cucamonga, Calif., to Jersey City, N. J., and defendants failure to complete transportation contract, as unreasonable and unlawful. Shipments were reconsigned at Pittsburgh and billed for delivery to complainant at Jersey City over defendants lines. The cars arrived in the vicinity of Jersey City on Oct. 21, 1922 but because of freight congestion were placed on Manhattan Produce Yards, N. J., about 5 miles west of Jersey City, where delivery was accepted by complainant. He then had the grapes trucked to Newark, N. J., about 4 miles and sold them there. The transportation charges are not attacked, but complainant contends that by reason of defendants failure to effect delivery at billed destination in violation of its legal obligation he has been subject to the payment of drayage charges from point of delivery to Newark in amount of $197.90. It does not appear that defendants failure to effect billed delivery was due to any unreasonable conduct or practices on its part. On the contrary its inability to do so was because of circumstances beyond its control. As complainant chose for his own convenience to take delivery at Manhattan Produce Yards rather than await delivery at Jersey City, defendants obligation to perform further transportation was terminated by the delivery made. HELD, drayage charges not result of violation of section 1, complaint dismissed. Berger v. Pennsylvania R. R., 115 I. C. C. 697.

(e) Interstate shipments of grapes moving to Jersey City, N. J., because of congestion, were placed at a point short of billed destination. Complainant was duly advised of existing conditions but elected to take delivery and dray shipments. Upon contention that failure to effect delivery specified in bill of lading violated carrier's legal obligation, HELD: Failure to effect delivery desired was not due to any unreasonable conduct or practice of carrier but to circumstances beyond its control, and as shipper chose for his own convenience to accept delivery short of billed destination the carrier's obligation to perform further transportation terminated with delivery made. Drayage charges incurred were not therefore a result of any violation by carrier of section 1 of the act. Berger v. P. R. R., 115 I. C. C. 697.

(f) On strawberries from Plant City, Fla., consigned to Jersey City, N. J., delivery was accepted at Manhattan Produce Yards, N. J., a point four miles short of billed destination. No claim for reparation was made for drayage charges incurred because of carrier's failure to complete delivery, but relying upon 69 I. C. C. 59, complaint alleged misrouting and sought damages resulting therefrom in amount of difference in price at which strawberries were sold and price they might have brought if delivery had been made at Jersey City. HELD: Contention of misrouting not sustained. There was no deviation from route named in bill of lading, and transportation charges are same to Manhattan Produce Yards as to Jersey City. Situation here involves carrier's failure to complete a transportation service which it contracted to perform and on which no violation of the act can be predicated. Complainant's remedy, therefore, if any, lies in the courts. Long v. A. C. L., 120 I. C. C. 601.

(g) Carriers make allowances to shippers who, in lieu of switching, dray their cotton from uptown warehouses to ship side which cotton carriers are under obligation to transport under transit arrangements. Upon contention of water-front warehouses that inasmuch as city-delivery and shipside rates are to be equalized such allowance should be discontinued or allowance made for handling cotton from water-front warehouses to ship side, HELD: No reason appears for condemning reasonable allowances for drayage, such drayage being a substitute for rail transportation, but they must not be more than

reasonable and must not be used as a cloak for unlawful preferences to shippers furnishing such substitute service. This applies equally to barging where barging is used as a substitute for switching. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 696.

(h) Hand or electric trucking of cotton, or movement by overhead trolley from warehouse or compress to the wharf, is not a substitute for rail transportation but is an intraplant movement just the same as the handling of commodities from the interior of a warehouse to the railroad car or dray and no allowances may lawfully be made therefor. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 696, 697.

(ha) Complainant sought refund of allowance for "drayage and ferriage in lieu of lighterage," on grapes unloaded at Jersey City and carted across the Hudson River to New York, provided in tariff. Upon contention that complainants were not entitled to refund because while they were entitled to lighterage they did not desire it because points in interior Manhattan and Brooklyn could be reached only by trucking or carting and that drayage preformed was, therefore, not a service "in lieu of lighterage" but a more extensive service to points which could not be reached by lighters, HELD, Complainants clearly had the right to lighterage, but having not elected to exercise that right and having carted shipments across the river in accordance with tariff, they were entitled to allowance specified. Moreover, it is immaterial to what point in New York shipments were hauled. Reparation awarded. Taub v. L. V., 128 I. C. C. 105.

(hb) Complainant alleged that defendants refusal to refund allowance for drayage and ferriage in lieu of lighterage on 15 cars of grapes, unloaded at Jersey City, N. J., during the period Oct. 13, 1923, to Oct. 17, 1924, and carted to New York deliveries, was and is in violation of section 6. Complainants shipments originated in California and were consigned to them either at Jersey City or at New York, the record not being clear as to point of destination. The cars were unloaded at Jersey City and their contents carted across the Hudson river to destinations in New York. Complainants clearly had the right to lighterage. Having elected not to exercise that right and having carted the shipments across the Hudson river in accordance with the requirements of defendants tariff they were entitled to the allowance specified. It is immaterial to what point in New York the shipments were hauled. HELD, reparation awarded to the amount of 3c per 100 pounds. Taub v. L. V. R. R., 128 I. C. C. 105.

(i) Proposed absorption of charges for draying lead or zinc ore to loading tracks of Southwest Missouri R. R. in the Picher district of northeastern Oklahoma and southeastern Kansas, found not justified. Proposed schedules violate section 6 of the act because they do not plainly state places between which the property will be carried, and they would also create undue prejudice and preference. Method of publishing rates for transportation of certain classes of property which provides by way of absorption for a uniform reduction in rates is neither a proper method nor one which satisfies the requirements of section 6. Moreover, if permitted to become effective, schedules would be inconsistent with the performance of the duty imposed upon commission by section 15a of the act. Absorption of Drayage Charges, 128 I. C. C. 405.

I. CONTROL AND REGULATION.

See Control and Regulation; Interstate Commerce II.

(a) Differences in traffic and opera-

tions in general between steam and electric lines, including interurban electric lines, are such that Congress has recognized the distinction in their treatment under various provisions of the law. Commission is authorized, however, to establish joint rates on traffic interchanged between steam and electric lines engaged in general business of transporting freight, and can pass upon the justness, reasonableness, and equitableness of divisions of rates for such interchanged traffic. Spokane & Eastern Ry. v. S. P. & S., 109 I. C. C. 713, 716.

(b) Order of the commission of December 14, 1925, approving rules and instructions for the inspection and testing of locomotives propelled by power other than steam power in accordance with the locomotive-inspection act, as amended, applies to (a) electric railways subject to the interstate commerce act and which are not street, suburban, or interurban railways, and (b) street, suburban, and interurban electric railways operated as part of general railroad systems of transportation. Rules for Testing Other than Steam Power Locomotives, 122 I. C. C. 414.

(c) Every carrier by railroad subject to the interstate commerce act and which is not in strictness a street, suburban, or interurban electric railway, is subject to the locomotive-inspection act, as amended. And even though it is a street, suburban, or interurban electric railway, if it is operated as a part of a general railroad system of transportation, such electric railway is also within scope of the locomotive-inspection act, as amended. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 422.

(d) Eelctric railways which have developed into railways which are more than interurbans, and which do not fall fairly within the expression "street, suburban, and interurban electric railways" as used in the locomotive-inspection act, are not excluded from the scope of that act, as amended. This view is in harmony with the body of this statute and the provisions and scope of various other laws enacted for the same purpose. Rules for Testing other than Steam Power Locomotives., 122 I. C. C. 414, 424, 425.

(e) It is unnecessary for the commission to determine whether electric lines upon which no locomotives are used are subject to the locomotive-inspection act, as amended. Rules for testing other than Steam Power Locomotives., 122 I. C. C. 414, 426.

(f) Certain electric lines found not properly classed as street, suburban, or interurban electric railways. Accordingly, such carriers are subject to the locomotive-inspection act, as amended. Rules for testing other than Steam Power Locomotives., 122 I. C. C. 414, 428.

(g) If state statute affecting electrification of railroad conflicts with lawful act of Congress already taken, the act of Congress prevails. Staten Island Rapid Transit Ry. Co. v. Public Service Commission of State of New York, 16 Fed. (2d) 313.

(h) Order directing steam railroads to remove discrimination against electric railroad, without designating manner of removal, HELD not invalid as a requirement that steam roads establish through routes or joint rates, or allow common use of terminals, without finding of public necessity or convenience necessary under Interstate Commerce Act, § 1, par. 21, section 3, par. 4, and section 15, pars. 3, 4, as amended by Transportation Act, 1920, §§ 402, 405, 418. Chicago, I. & L. Ry. Co. v. United States, 46 Sup. Ct. 226.

(i) Interstate Commerce Commission's order to remove discrimination of steam railroads against electric railroad, which in practical effect, was a requirement that they interchange traffic, with result that electric road would get part of steam roads' business, HELD not invalid, as taking of property in violation of due process clause. Chicago, I. & L. Ry. Co. v. United States, 46 Sup. Ct. 226.

(j) Finding of Interstate Commerce Commission that electric railroad, discriminated against, was engaged in general transportation of freight, HELD conclusive in action to set aside order directing removal of discrimination, wherein evidence heard by Commission was not introduced. Chicago, I. & L. Ry. Co. v. United States, 46 Sup. Ct. 226.

(k) Interstate Commerce Commission's order to remove discrimination between steam railroads and electric railroad, entered at instance of electric railroad, is valid, under Interstate Commerce Act, § 15, as amended by Transportation

Act 1920, § 418, without finding that electric road was engaged in general transportation of freight. Chicago, I. & L. Ry. Co. v. United States, 46 Sup. Ct. 226.

II. THRU RATES WITH STEAM ROADS.

See Through Routes and Joint Rates.

(a) Complaint of Spokane & Eastern Ry. & Power Co., and Inland Empire R. R., electric lines, alleging that their divisions of joint rates on traffic interchanged between them and connecting steam roads are unreasonable, inequitable, and unduly prejudicial, dismissed. The record, based largely if not wholly, upon financial needs, fails to disclose evidence regarding relative expense of freight and passenger transportation on the electric lines and steam roads respectively, the electric roads have failed to make two of their immediate connections parties to proceeding, and record is inadequate in other important respects to justify findings upon which to base a satisfactory divisional adjustment. Spokane & Eastern Ry. v. S. P. & S., 109 I. C. C. 713.

(b) Proposed elimination of Salt Lake & Utah R. R. an electric line as an intermediate carrier in routing of eastbound and westbound transcontinental traffic, found justified and not unreasonable or otherwise unlawful. Such route is artificial, can draw traffic only through the most vigorous and expensive solicitation methods, and no advantage to anyone other than intermediate line would result. On the other hand, such participation is a positive disadvantage to other carriers and transcontinental shippers, and results in needless delays and considerable added expense of operation. While such intermediate line is in a weak financial condition public interest will not be served by solving its financial problems at sacrifice of efficiency and economy of operation. Restrictions in Routing over S. L. & U., 115 I. C. C. 357.

(c) Upon further consideration, finding in former report, 115 I. C. C. 357, that proposed elimination of Salt Lake & Utah R. R., an electric line, as an intermediate participating carrier in the routing of eastbound and westbound transcontinental traffic was not unreasonable or otherwise unlawful, affirmed. The inclusion of the Salt Lake & Utah in transcontinental routes can benefit no one but that line, and can add nothing to transportation facilities. It will result, rather, in inefficient and uneconomical operation, upon which the commission is unwilling to place its stamp of approval. Restrictions in Routing over S. L. & U., 122 I. C. C. 208.

(d) Certain carriers found to be street, suburban, or interurban electric railways not operated as part of general railroad system of transportation and accordingly not within scope of the locomotive-inspection act, as amended. Rules for testing other than Steam Power Locomotives, 122 I. C. C. 414, 425, 426.

(e) Alleged lack of reciprocity and other matters of dissimilarity between steam and electric railroads HELD not, as a matter of law, circumstances negativing discrimination in refusal of steam roads to establish through routes, joint rates, and interchange switching service. Chicago, I. & L. Ry. Co. v. United States 46 Sup. Ct. 226.

IV. RATES, TRANSFERS AND DIVISIONS.

See Transfer; Divisions.

(a) Complainant, Kaw Valley, is an electrically operated common carrier extending from Lawrence, Kas., to Kansas City, and alleged that the maintenance by defendants of rates of 2.5c plus $10 per car for sand, from Grinter and Sirridge, Kans., on its line, to destinations on the Clay County Ry., in Kansas City, while maintaining a rate of 2.5c to other destinations in Kansas City is unduly prejudicial. The movement of sand to the waterworks is temporary and when the works are completed no further shipments will be made. It can not be found upon all the facts that the limitation placed upon the 2.5c rate so as to make it apply only when the haul is over not to exceed three lines unduly prefers the competing carriers and sand producing plants and unduly prejudices complainant. The circumstances and conditions surrounding transportation of sand from Grinter and Sirridge to the waterworks are not substantially similar to those surrounding transportation at 2.5c from competing sand producing points to the same destination and from the same points to other destinations within the Kansas City switching limits. HELD, rate attacked not unduly prejudicial, complaint dismissed. Kansas City

K. V. & W. Ry., v. A. T. & S. F. Ry., 120 I. C. C. 258.

(b) Rates on sand from Sirridge and Grinter, Kans., on the Kansas City, Kaw Valley & Western Ry., an electric line, to destinations on the Kansas City, Clay County & St. Joseph Ry., within Kansas City switching limits, found not unduly prejudicial as compared with lower rates contemporaneously maintained from same origin points to other destinations in Kansas City district, and from other sand-producing points in same general territory to destinations on the Clay County. Circumstances and conditions surrounding transportation from Grinter and Sirridge are not substantially similar to those surrounding transportation at lower rates from alleged preferred points, the former embracing a four-line haul necssitating use of two intermediate carriers, whereas from the latter, less than a four-line haul is involved in conjunction with which the use of only one intermediate carrier is necessary. Kansas City, K. V. & W. Ry. v. A., T. & S. F., 120 I. C. C. 258.

V. FACILITIES.

See Facilities and Privileges.

(a) Upon investigation by commission on its own motion into and concerning a certain tariff of Southwest Missouri R. R., an electric line, providing for absorption of drayage charges on ore from the Picher, Okla., district, FOUND: Such tariff is nothing more or less than a statement that out of its published tariff rate the carrier will make to shippers at certain mines, either directly or through the medium of payments to teamsters employed by them, specified rebates varying in amount in inverse ratio with accessibility of such mines to its rails, but that shippers at other mines, including those nearer to as well as farther distant from its rails, will be required to pay full published tariff rate if they tender at same loading tracks like traffic for like transportation. Such tariff clearly results in unjust discrimination under section 2, and provides for application of more than one rate in violation of section 6, of the act. Drayage Absorptions by S. W. M., 113 I. C. C. 179.

EMBARGOES

See Demurrage §3½; Reconsignment §4½; Routing and Misrouting §4¼.

(a) Prior to arrival at original destination shipper requested diversion to embargoed point but was advised that request could not be accomplished without permit. Necessary permit was obtained and shipment was forwarded as requested but at a combination to and from reconsignment point. Tariff permitted reconsignment or diversion to embargoed points where shipments move under permits, and also provided that where car is placed for unloading and is reforwarded without being unloaded published rates to and from point of reconsignment will apply. Carriers assert that permit clause has reference to shipments moving from points of origin under permits and that since shipment here was not so made combination was properly applied. FOUND: Application of permit clause not being so restricted and in absence of showing that shipment was actually placed for unloading at reconsignment point, it was subject to application of a lower through rate. Reparation awarded for overcharges. Prairie Oil & Gas Co. v. M. V., 104 I. C. C. 252.

(b) Where it is necessary to forward shipments over an indirect route on account of an embargo existing over direct route, shippers should not be debarred from reasonable rates over accessible route. Orford Soap Co. v. B. & M. R. R., 107 I. C. C. 338.

(c) Initial carrier refused to accept shipments because of existing embargo of connecting lines and they were held at point of origin. On day embargo was canceled further request was made that shipments be accepted, but carrier again refused, erroneously informing complainant that "connections advise positively no route open." Complainant thereupon forwarded shipments by a route involving a higher rate and additional reconsignment charges. HELD: As no embargo was in effect on date second request was made by shipper, initial line had no valid reason for refusing to accept shipments. Such refusal found unlawful and reparation awarded for addi-

tional reconsignment charges and difference between rate charged and that applicable over alleged embargoed route. Haviland v. A. N., 109 I. C. C. 253.

(d) Refusal of director general, due to an embargo, to reconsign to Syracuse, N. Y., a carload of lumber shipped from Sweetwater, Ala., to Cincinnati, Ohio, necessitating ultimate reconsignment to Detroit, Mich., found to have resulted in collection of reconsignment, demurrage, and storage charges that were unreasonable and inapplicable. Shipment was tendered for transportation without complete routing instructions, and while an embargo did exist over certain routes, others over which no embargo existed were open via which shipment could have moved from Cincinnati to Syracuse, which would have been consistent with routing instructions given. Reparation awarded. Thames v. Director General, 112 I. C. C. 677.

(e) Combination rates and demurrage charges assessed on shipments of lumber originally moving from Eutaw, Ala., to Louisville and Cincinnati, shipment to latter point being reconsigned to Latty, Ohio, and all subsequently reconsigned to Nicetown Station, Philadelphia, found inapplicable. Carriers contended that cars were accepted at Louisville and Latty only as new shipments subject to local rates to and from those points upon theory that shipments could not have been reconsigned because of a tariff rule which prohibited reconsignment to embargoed points. Such rule, however, placed a limitation only on reconsignments "to a station or point of delivery" against which an embargo has been placed and here no embargo was in effect against points above outlined, including Nicetown Station. Moreover, circumstances under which shipments were handled and reshipped did not change their essential character as through reconsigned shipments and lower joint rates were applicable thereon. See also 51 I. C. C. 174; 92 I. C. C. 469. Reparation awarded. Elledge v. Director General, 113 I. C. C. 704.

(f) Coal moving during Federal control was consigned to a car pool and due arrival notices furnished. After expiration of free time shipments were held under constructive placement and demurrage accrued. Thereafter an embargo was placed against consignee, and consignor ordered shipments reconsigned upon ascertaining that they were refused by consignee. Upon contention that failure of carrier to make delivery on or before effective date of the embargo, and acceptance by carrier of other shipments for transportation to consignee after that date without advising complainant of the embargo, constituted railroad error, HELD: Governing tariff made no provision for notice to consignor of refused or unclaimed shipments and no part of the demurrage accrued before complainant had knowledge of the situation. Its position was same as if there had been no embargo. If therefore follows that demurrage did not accrue because of observance of the embargo and thus because of railroad error. Superior Coal Co. v. Director General, 115 I. C. C. 710.

(g) Routing instructions of shipper on lumber moving from Quitman, Ga., to East New York, N. Y., reconsigned to Ozone Park, N. Y., specified "Long Island Delivery." Due to an embargo on delivering line, one of the connecting carriers named in routing instructions changed the waybill to read "South Brooklyn R. R. delivery," and shipment moved forward accordingly. Upon tender of delivery consignee refused shipment, insisting for delivery as shown in bill of lading, and this demand was complied with. HELD: That the carrier inserting unauthorized routing in waybill was guilty of misrouting. Reparation awarded. Underwood Lbr. Corp. v. A. C. L., 120 I. C. C. 175.

(h) Shipment of lumber from Charleston, S. C., to Boston, Mass., moved as routed by shipper. Certain routes were embargoed but not route of movement, and upon request for diversion of shipment to Armory, Mass., complainant was notified that same could not be effected on shipments moving under permits. Shipment moved through to Boston, where demurrage accrued. HELD: As shipment moved via an unembargoed route over which no permit was necessary and delivering carrier at Boston was in possession of diversion instructions prior to arrival of car, a reconsignment charge less than that assessed was applicable and demurrage assessed was illegal due to erroneous detention at Boston. Reparation awarded. National-American Wholesale Lbr. Asso. v. A. C. L., 120 I. C. C. 665.

(i) Lumber consigned to New Haven, Conn., for reconsignment beyond was routed "via Harlem River, N. Y., N. H.

& H." Reconsignment was refused at New Haven because of embargo on shipments via Harlem River for all points on lines of New Haven. Complainants thereupon paid charges up to New Haven and tendered new bills of lading for movement beyond for which local rates were collected. Upon contention that accepting new bills of lading nullified the embargo and, in effect, waived its provisions, HELD: No permits having been issued for movement beyond New Haven, carrier rightfully refused to reconsign to embargoed points. However, as local shipments from New Haven were not embargoed new bills of lading could be accepted upon payment of freight charges to New Haven. In no other way short of waiting until embargo was lifted could shipments have moved out of New Haven without unloading cars. Charges assessed were therefore applicable. Philbrick Co. v. N. Y., N. H. & H., 123 I. C. C. 197.

(j) Complainant consigned shipment to its agent. Carrier's agent recognized consignee as complainant's employee and upon arrival of car wired arrival notice to complainant. Pending disposition of shipment demurrage accrued which complainant contended was inapplicable because of carrier's failure to notify consignee in writing of arrival of car in accordance with demurrage tariff. HELD: Contention is without merit since evidence is conclusive that shipment was consigned to complainant's agent for purpose of evading an embargo. In reality complainant was both consignor and consignee and written notice to complainant instead of its agent whose address was same as complainant's was a substantial compliance with tariff provision respecting notice of arrival. Milne Lbr. Co. v. D., T. & I., 123 I. C. C. 573.

(k) To evade an embargo complainant consigned shipment to its agent. Upon arrival at destination carrier's agent recognized consignee as complainant's employee and wired arrival notice to plainant. Shipment was held as unclaimed and pending its disposition demurrage charges accrued which complainant contended were unlawfully assessed because of carrier's failure to comply with tariff governing furnishing of notice of refused and unclaimed shipments under which consignor is not held liable for demurrage charges between date notice should have been sent and date actually sent. HELD: Contention is without merit. Tariff rule does not require carrier which has given notice to consignee, later to notify the same party as consignor that it has not claimed its own shipment, the law not requiring the performance of a vain act. See 74 I. C. C. 461. Milne Lbr. Co. v. D., T. & I., 123 I. C. C. 573.

(l) Certain destinations were embargoed except as to shipments moving under permits, the embargo notice excepting shipments to various points for final delivery but specifically prohibiting reconsignment therefrom to points against which the embargo was placed. Shipments here were billed without permits to the unembargoed points and forwarded therefrom to the embargoed destinations as reshipments, local rates being charged. Upon contention that by permitting shipment to so move lower joint rates were made applicable and that acceptance of shipments at reshipping points constituted a waiver of the embargo, HELD: Only by use of the reconsigning rule could these movements become through traffic. Here the reconsigning rule was rendered inoperative by provisions of the embargo and charges assessed were therefore applicable. Congdon & Carpenter Co. v. N. Y., N. H. & H., 123 I. C. C. 721.

(m) C. l. rate on shipment of one boiler and parts from Kewanee, Ill., to Wichita Falls, Tex., found applicable. Complainant's evidence failed to support its contention that charges should have been collected on basis of l. c. l. rate. Carrier showed that while at time of movement an embargo was in effect against c. l. shipments of like traffic, complainant obtained a permit for one c. l. shipment and that in accordance with bill of lading and permit shipment was handled as a carload from origin to destination. See also 92 I. C. C. 639. Kinnison Bros. v. Director General, 128 I. C. C. 703.

(n) A lawful embargo is, of course, a legitimate reason for refusing to accept cars for shipment via the embargoed route. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739, 741.

(o) Complainant contracted with shipper for alfalfa meal from Colorado points to be shipped to Dyersurg, Tenn., routed via East St. Louis, Ill., but upon tender of shipments shipper was advised to leave routing open because of the outstanding embargoes and conges-

tion at St. Louis. Shipments were forwarded over cheapest route via Memphis. Upon contention that shipments were misrouted as there was no transit rate applicable via Memphis, and charges to ultimate destinations were in excess of those which would have accrued had shipments moved via East St. Louis, FOUND: Record fails to show that carrier or shipper had information that shipments were to be mixed in transit or that ultimate destination was not Dyersburg. Unrouted bills of lading having been issued and accepted, shipments were not misrouted as carrier was lawfully bound to move them over cheapest route, which was via Memphis. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739.

EMERGENCY RATES

See Evidence §21½.

(a) Because of strike in anthracite fields which brought about a shortage of fuel for household use, an emergency, such as is contemplated by section 15(4) of the act, found to exist, requiring prompt establishment of additional joint rates and through routes on bituminous coal in prepared sizes from certain mining districts in the Virginias and eastern Kentucky, and on semianthracite coal from certain Virginia mines, to points in New England and Middle Atlantic States. Additional through routes, and temporary joint rates in connection therewith, prescribed without prejudice to subsequent consideration of requests for their being made permanent. Transportation of Anthracite Coal, 104 I. C. C. 341.

(b) Rate on crude petroleum from points in Arkansas to Texas City, Tex., for export, found not unreasonable or unduly prejudicial as compared with lower rate to other Gulf ports, which lower rate was subsequently made applicable to Texas City. Rate charged was in substance an emergency rate established to enable an overproduction of crude oil to be used, and its subsequent reduction does not establish that it was unreasonable prior thereto. While complainant was at a disadvantage, during period of movement, as compared with other ports, there is no showing that disadvantage was undue or that it suffered damage. Swiftsure Petroleum Co. v. M. P., 107 I. C. C. 637.

(c) Upon applications of carriers in western district seeking increases in freight rates, generally averaging 5 per cent with exceptions as to certain commodities, predicated on alleged existence of a financial emergency in that district, HELD: No such emergency exists in western trunk-line territory as a whole as would warrant commission in prescribing a general percentage increase in freight rates therein. Record held open for further consideration in connection with proceedings relating to the Hoch-Smith Resolutions (S. J. Res. 107). Revenues in Western District, 113 I. C. C. 3.

(d) Interstate Commerce Act, §1, subd. 15, as added and amended (Comp. St. Ann. Supp. 1923 § 8563), authorizing Commission in case of emergency to suspend rules and establish just and reasonable directions with respect to car service, applies only to unexpected conditions, and does not authorize suspension of rules to meet anticipated conditions, or placing in effect of emergency orders previously condemned as unjust and unreasonable. Berwind-White Coal-Mining Co. v. United States, 9 Fed. (2d.) 429, 430.

EMPLOYERS' LIABILITY ACTS

See Personal Injuries; Safety Appliance Acts.

(a) Foreman of working gang, engaged in carrying lumber for repair of bridge used in interstate commerce, who was injured while attempting to board moving work train on siding, was engaged in "interstate commerce," within the federal Employers' Liability Act. Central R. Co. of N. J. v. Monahan, 11 Fed. (2d) 212.

(b) Private police officer, employed under authority of state law by railroad engaged in both interstate and intrastate commerce and whose function it is to arrest offenders against any lawful authority, state or national, but having nothing to do with transportation, HELD not engaged in interstate commerce, so as to be entitled to recover for injury under Employers' Liability Act, notwithstanding at time of injury he was investigating theft of property which had been moving in interstate commerce. Delaware, L. & W. R. Co. v. Scales, 18 Fed. (2d.) 73.

(c) The Employers' Liability Act covers only persons who, at the time when alleged cause of action arose, were engaged in interstate commerce. Delaware, L. & W. R. Co. v. Scales, 18 Fed. (2d.) 73.

(d) Whether employee was injured in interstate commerce, so as to entitle him to recover under Employers' Liability Act, depends on whether, at time of injury, he was engaged in interstate commerce, or in work so closely connected with interstate transportation as practically to be a part thereof. Delaware. L. & W. R. Co. v. Scales, 18 Fed. (2d.) 73.

(e) State laws, in so far as they cover same field, are superseded by federal Employers' Liability Act. Southwell v. Atlantic Coast Line R. Co., (N. C., 1926) 131 S. E. 670.

(f) In suit for damages under Federal Employers' Liability Act. (45 USCA §§ 51-59 [U. S. Comp. St. §§ 8657-8665]), for death of railroad employee, killed while coupling cars when cut of cars was thrown against such cars, question whether railroad company was negligent in failing to promulgate rules requiring signals or warnings for protection of employees working as decedent was in making up trains HELD for jury. Harris v. Chicago & E. I. Ry. Co., (Ind. 1927) 158 N. E. 636.

(g) In suit for damages, under Federal Employers' Liability Act (45 USCA §§ 51-59 [U. S. Comp. St. §§ 8657-8665]), for death of railroad employee, killed while coupling air hose when cut of cars was thrown against cars on which he was working, question whether railroad company was negligent in failing to have a brakeman at end of cut of cars that was kicked onto track where decedent was working held for jury. Harris v. Chicago & E. I. Ry. Co., (Ind. 1927) 158 N. E. 636.

(h) In action for damages, under federal Employers' Liability Act (45 USCA §§ 51-59 [U. S. Comp. St. §§ 8657-8665]), for death of railroad employee, question whether inspector with whom decedent was working, and who knew of decedent's inexperience in making up cars, was negligent in failing to take steps to protect decedent, where decedent was killed by cut of cars between which decedent was working while coupling air hose, HELD for jury. Harris v. Chicago & E. I. Ry. Co., (Ind. 1927) 158 N. E. 636.

(i) In suit for damages for death of railroad employee, whether decedent, killed while coupling air hose on cars being made up for shipment, while substituted for another workman, services being much more dangerous than his regular work on rip track, had assumed risk of employment, under federal Employers' Liability Act (45 USCA §§ 51-59 [U. S. Comp. St. §§ 8657-8665]), HELD question of fact for jury. Harris v. Chicago & E. I. Ry Co., (Ind. 1927) 158 N. E. 636.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) In situations where rates standing by themselves are lawful and commission is called upon to impose rate

equalization, facts developed of record should leave no doubt that exercise of such power by commission would be not only warranted by law but necessary or appropriate in public interest. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 125.

II. CIRCUMSTANCES AND CONDITIONS.

§2. In General.

See Differentials; Evidence §2, §56; Reasonableness of Rates §12½, §28.

(a) Complainant attacked commodity rate of 99c charged on one tank car of gasoline shipped Feb. 13, 1925, from Peckham, Okla., to Port Arthur, Ont., as unreasonable and, as compared with rates on like traffic by steamers to Port Arthur and rate of 93c from Peckham to Winnipeg, Man., unjustly discriminatory and unduly prejudicial. Car moved Frisco to Kansas City, Mo., C. G. W. to Minnesota Transfer, Minn., Soo Line to Duluth thence D. W. & P., and C. N. to Port Arthur. Charge 49c to Duluth and 50c beyond. There was contemporaneously a combination from Peckham to Winnipeg of 93c, made 43c to St. Paul and 50c beyond. Port Arthur and Fort William are on Lake Superior. The competition met by shippers at Winnipeg from these points is due to the fact that oil is shipped by tank steamers on the lake, which is the same competition that the D. W. & P. and C. N. meet on shipments from Duluth to Port Arthur. Competition between the carriers and the equalizing of commercial advantages between neighboring points of destinations appear to have been the controlling elements in establishing petroleum rates to the northwest. HELD. rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Northwestern Oil Co. v. St. L. S. F. Ry., 112 I. C. C. 488.

(b) Complainant attacked commodity rates charged on cast iron pipe and fittings, carloads, two years prior to Oct. 18, 1924, from Anniston, Ala., Atlanta, Ga., Chattanooga, Tenn., and other points in those states and from Charlotte, N. C., to Wichita, Kans., as unreasonable, unjustly discriminatory and unduly prejudicial. Wichita is on south central Kansas served by six steam lines and one electric line. Birmingham or Chattanooga rates may be taken as typical. HELD: Rates attacked not unreasonable but unduly prejudicial to Wichita and unduly preferential of Oklahoma points and Kansas City to the extent they exceed the rates to Enid, Okla; the undue prejudice should be removed in such a manner that the rates to Wichita will not exceed the rates to Kansas City by more than the amount of the difference between the present rates to Enid and Kansas City, reparation denied. Wichita Chamber of Commerce v. A. & V. Ry., 112 I. C. C. 569.

(c) Complainant attacked commodity rates charged on zinc ore, carloads, shipped between Feb. 14, 1923, and Jan. 24, 1925, from points on the lines of defendants, Northeast Oklahoma and Miami Mineral Belt R. R., in Kansas and Oklahoma to Van Buren, Ark., as unjustly discriminatory and unduly prejudicial in favor of its competitors operating zinc smelters at East St. Louis and other points in Illinois and Indiana. Van Buren is on both the M. P., and Frisco. From the territory of origin it is intermediate to, and about 11 miles less distant than, South Fort Smith, Ark., by the Frisco and about the same distance as South Fort Smith via the M. P. The average distance from the shipping points under consideration on these two roads to the junction points is 6 miles, and the average total distance to Van Buren is 194 miles. Charged 3.5c to junctions and 7.5c beyond. During this period the same rates applied to South Fort Smith, but to the smelting points east of the Mississippi the rates were 18c to East St. Louis, 21.5c to Peoria, Ill., and 24.5c to Chicago, of which 3c represented the portion of the revenue accruing to the short lines for the movements to the junction points. HELD: Rates attacked not unduly prejudicial or unjustly discriminatory, reparation denied, complaint dismissed. Falcon Zinc Co. v. Northeast Oklahoma R. R., 113 I. C. C. 265.

(d) The duty of a carrier to equalize treatment among shippers extends only to those whom it is bound to serve. Winding Gulf Colliery Co. v. C. & O., 115 I. C. C. 113, 116; Ragland Coal Co. v. V. Ry., 115 I. C. C. 147, 150.

(e) Rates which are designed to effect market equalization necessarily disregard distance to some extent. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 752.

(f) Upon further hearing in 95 I. C. C. 539, FOUND: That record does not permit prescription of maximum or mini-

mum reasonable rates on ex-lake grain from Buffalo to New York, Philadelphia, Baltimore, and Boston, for export, since present rates have not been shown to be unreasonable or otherwise unlawful, but if such rates were to be prescribed, evidence warrants conclusion that line-haul rates to water-front elevators at New York, Philadelphia, and Baltimore should be identical and that maintenance of same rates to water-front elevators at Boston would not be unlawful. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 211, 216.

(g) In equalizing rates a percentage difference in distance is preferable to a fixed mileage difference for all distances. Galveston Commercial Asso. v. G. H. & S. A., 128 I. C. C. 349, 388.

§3. Commercial Advantages and Disabilities.

See Blanket Rates §7; Differentials §5, §6, §7; Discrimination §4, §5, Evidence §2; Express Companies §19; Interstate Commerce Commission; Reasonableness of Rates §12½.

(a) It is not purpose of interstate commerce act that commission should attempt to equalize fortunes, opportunities, or abilities and disregard transportation conditions, Diffenbaugh Case, 222 U. S. 42, 46; but this principle does not foreclose commission from considering probable effects which would follow prescribing of relationships in rates proposed by certain shippers and opposed by their competitors. See 78 I. C. C. 549, 552. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 124.

(b) While commercial conditions are factors to be considered in determining lawful rates, they should not be given such importance as completely to outweigh factors more directly related to transportation, such as cost and value of service. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 134.

(c) Proposed adjustment of rates on lumber and related articles from south Pacific coast origin groups to Canadian points, involving advances and reductions, and designed for purpose of equalizing those rates with north Pacific coast points, found not justified as a whole. Carriers long maintained equal rates from this general territory but parity was disrupted when rates from north Pacific coast points were revised without concurrent revision from south Pacific coast points. While circumstances warranting higher rates from north Pacific coast points on one kind of lumber than on other kinds are not necessarily controlling as to rates from south Pacifi ccoast points, reductions proposed will restore former equalization, no reason appearing why the disparity should be continued or why equal rates should not obtain. The evidence, however, does not support a finding that change proposed in the minima, restriction proposed in the lumber list, or cancellation of transshipment of proportional rates is warranted. Lumber and Related Articles, 107 I. C. C. 57.

(d) Carriers may voluntarily equalize commercial or geographic disadvantages in many instances in which commission could not require such equalization. See 222 U. S. 42. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 121.

(e) Contention that since carriers have equalized rates to Gulf ports on cotton fabrics, bagging and ties, soap, and other commodities, they should be required to do so as to cottonseed cake and meal, not sustained. No competition was shown between commodities instanced and cottonseed cake and meal, undue prejudice alleged being against one port to advantage of another in rates on same commodities, i. e., cake and meal, which issue does not include undue prejudice as between various commodities. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 121.

(f) Class rate on window glass moving rail and water from Jeannette, Pa., to Jacksonville, Fla., found not unreasonable, discriminatory, or unduly prejudicial as compared with rail-and-water commodity rates from the same origin point to Savannah, Ga. Allegations of complaint rests solely upon fact that on certain other commodities the two ports are accorded same rates. However, no showing was made that any of the commodities upon which rate parity is maintained compete with window glass, or that assessment of a class rate on window glass and a commodity rate on a competing commodity results in undue prejudice. Towers Hardware Co. v. P. R. R., 109 I. C. C. 651.

(g) Rates on fuel and crude oil from Smackover, Ark., to Lincoln, Nebr., found unreasonable to extent it exceeded lower

rate contemporaneously in effect to Omaha, Nebr., and Council Bluffs, Iowa, which lower rate was subsequently established to Lincoln. Lincoln is usually accorded same rates on oil from Smackover as Omaha and related points, this relationship being recognized in 36 I. C. C. 109. Lincoln Traction Co. v. M. P., 109 I. C. C. 653.

(h) Proposed increased rates on plaster board, wall plaster, stucco, and plaster blocks, in straight or mixed carloads, from Los Angeles and Seattle, to Utah common points, for purpose of placing Los Angeles and Seattle on a more nearly equal basis, found not justified. Rate comparisons submitted by carriers, unaccompanied by a showing of similarity of transportation conditions found to be of little probative value. On other hand, protestants instanced a number of rates from eastern points to destinations in western territory which have recently been reduced and contend that present rates should be reduced instead of increased. Plaster Board to Utah Common Points, 112 I. C. C. 3.

(i) Proposed increased translake rate on salt from Ludington and Manistee, Mich., to Chicago, Ill., and intermediate points, applicable over car-ferry route of the Pere Marquette to Milwaukee, and the C., M. & St. P., beyond, found justified. In Salt Cases of 1923, 92 I. C. C. 388, commission fixed minimum translake rate 1 cent under all-rail rates. The Pere Marquette has its own rails from Ludington and Manistee to Chicago, but the differential in favor of translake route attracts all the traffic and in order to secure the entire haul it desires to maintain same rate over both routes. In the general cases carriers were specifically authorized to apply all-rail rate over translake route and the commission sees no reason for changing finding made therein to effect that a translake rate equal to all-rail rate is justified. Salt from Ludington Group, 112 I. C. C. 255.

(j) Relationship of fuel-oil rates from southern California to Arizona with those from the mid-continent field to the same destinations found not unduly prejudicial, with exception of rates from Galveston and other Texas points to Douglas and Bisbee, Ariz. If rates from California and mid-continent fields into Arizona were constructed strictly according to relative distances, as California would have them, the only logical result would be to deprive mid-continent producers from competing in this territory, provided the price of fuel oil in the two fields is anywhere near same. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350.

(k) Upon further consideration, original report, 96 I. C. C. 485, modified and rates on gasoline from Tulsa and grouped points in Oklahoma to destinations in Indiana found unreasonable and unduly prejudicial as compared with rates from same origin points to Chicago and other Illinois destinations. In view of substantial similarity of transportation conditions in Indiana and Illinois, there is no warrant for maintenance of higher rates to points in western Indiana than to Chicago and other Illinois points taking same rates. Concurrently, rates on fuel oil and other products taking same rates from same origins to same destinations found unreasonable to extent they exceeded 80 per cent of the contemporaneous rates on gasoline. Reasonable and nonprejudicial rates prescribed for future. Indiana State Chamber of Commerce v. A., T. & S. F., 112 I. C. C. 481.

(l) Rates on soap from complainant's pier at foot of Sussex Street, Jersey City, N. J., within lighterage limits of greater New York, to various New England destinations, found not unreasonable or unduly prejudicial as compared with lower rates from freight stations, piers, and shipping points on Manhattan Island and Brooklyn, N. Y. A finding of undue prejudice would require a showing of substantial similarity of transportation conditions not here shown, in addition to a competitive relationship, and while cost of transporting complainant's shipments is greater by substantial amounts than cost of transporting those from Manhattan and Brooklyn, the present differences between assailed rates and those from Manhattan and Brooklyn are not shown to be greater than differences in transportation conditions warrant. Colgate & Co. v. N. Y. C., 112 I. C. C. 573.

(m) Rates on prepared roofing, asphalt shingles, roofing and building paper, and certain other related articles, from various producing points in c. f. a., Buffalo-Pittsburgh, and trunk-line territories to southern territory, and from points in trunk-line territory to Virginia and West Virginia, found unreasonable and unduly prejudicial to extent they

exceed rates determined on basis of those prescribed in Southern Class Rate Investigation, 109 I. C. C. 300. Reasonable and nonprejudicial rates and relationships prescribed for the future. Standard Paint Co. v. Director General, 112 I. C. C. 589.

(n) Complainant attacked rates charged on egg case material carloads from Caruthersville, Mo., to Illinois, Indiana, Iowa, Wisconsin, Michigan, Minnesota, Missouri, North Dakota, South Dakota, Nebraska, and Kansas, as unjust and unreasonable and unduly prejudicial as compared with rates from Cairo, Ill., Karnak, Ill., Illmo, Mo., and Memphis, Tenn. Caruthersville is on the Mississippi river, 220 miles south of St. Louis, Mo. It is served directly by the Frisco and Cotton Belt in connection with the Deering Southwestern. The competing points are also on the Mississippi, their distances from St. Louis being as follows: Memphis 306 miles, Cairo 147 miles. Illmo 138 miles. Applicable rates are generally those on lumber. HELD, rates attacked on lumber, egg case material, box lumber and shooks, in carloads, from Caruthersville to Iowa, South Dakota and Minnesota and points in Illinois and Wisconsin on the east bank of the Mississippi river served by the Burlington unjust and unreasonable and unduly prejudicial to extent rates exceed those from Cairo by more than 5c; to Wisconsin except those mentioned to extent they exceed rates from Cairo by more than 7c and to Illinois except those mentioned to extent they exceed intrastate rates from Cairo by more than 8c, to Kansas and Nebraska not unreasonable or otherwise unlawful, reparation awarded. Dillman Egg Case Co. v. A. T. & S. F. Ry., 113 I. C. C. 447.

(o) Complainant attacked commodity rates charged on eggs, carloads, from Kansas, Nebraska, Oklahoma and Missouri to Laredo, Tex., since Aug. 30, 1922 as unjust, unreasonable and, as compared with rates maintained from the same points of origin to Houston, San Antonio, Corpus Christi, and other destinations in Texas common point territory unduly prejudicial. Laredo is a Rio Grande crossing and the gateway through which complainants shipments move into and out of Mexico by rail. It is served principally by the I. & G. N., and T. M., and, for rate making purposes, is located in what is known as Texas differential territory. Eggs are rated third class in western classification, but generally move on commodity rates from the origin territory here considered to Texas common points. Shipments of eggs to Laredo and Mexico are transported in refrigerator cars. They can not be otherwise transported safely particularly during the season when Mexico imports its eggs. Much of this equipment returns north empty. A distance scale of rates to Texas differential territory which would be just and reasonable to shippers and carriers alike could not be determined from and is not warranted by the present record. The record does not support a finding that Laredo is entitled to a rate adjustment different from that now accorded to other points in differential territory. Third class differentials on eggs apply generally to such other points and they are higher in many instances than to Laredo. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Sames Moore & Co. v. A. T. & S. F. Ry., 113 I. C. C. 501.

(p) Complainant attacked commodity rate of 83.5c charged on butter, eggs and dressed poultry, in straight or mixed carloads, from Benson, Minn., to Milwaukee, Wis., and Chicago, Ill., on traffic having final destination at those points, and the same rate to Chicago charged as a factor of the through combination rates on similar traffic destined to eastern points between April 15, 1922 and Dec. 5, 1923 as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments originated at Benson a local point on the G. N., and moved over that line to St. Paul and various connections beyond. The rate to both Chicago and Milwaukee was a joint commodity rate of 83.5c which in every instance was also used as a factor to Chicago on shipments destined east of there. Effective Dec. 6, 1923 it was reduced to 77c. Butter, eggs and dressed poultry are rated third class in the western and official classifications. The rate attacked compares favorably with the rates from other points on the G. N., where such forceful competition did not exist and with rates from other producing points in this general territory. Apparently the adjustment of Dec. 6, 1923 is satisfactory to complainant and has removed any undue prejudice which may have existed in the relation of the rate from Benson with those from Granite Falls and Marshall.

Complainant has not proved any damage as a result of undue prejudice and has not sustained the allegation of unjust discrimination. HELD, rate attacked not unreasonable, complaint dismissed. Benson Produce Co. v. G. N. Ry., 113 I. C. C. 541.

(q) Complainant attacked rates on pulpboard, not corrugated or indented, carloads, from Hartsville, S. C., to destinations in trunk line, New England, and Buffalo Pittsburgh territories as unduly prejudicial to Hartsville and unduly preferential of Gordon, Ga., and Roanoke Rapids, N. C. Hartsville is on the A. C. L., and S. A. L. Gordon is on the C. of Ga., Roanoke Rapids on the S. A. L., and Canton on the Southern. The connecting lines from the northern gateways to destinations in the territories named are generally the same whether the traffic originates at Hartsville or at the other points named. Defendants proposed to remove the undue prejudice by publishing from Hartsville the same rates as now apply on wrapping paper from that point. The effect of the proposed adjustment would be to reduce the rates from Hartsville to such an extent that they will also be lower than the rates from Gordon, and to narrow the existing spread between the rates from Hartsville and from Roanoke Rapids. HELD, rates unduly prejudicial, carriers to publish rates on basis suggested by them from Hartsville and Canton, namely, the wrapping paper rates. Sonoco Products Co. v. A. C. L. R. R., 113.I. C. C. 553.

(r) Complainant attacked combination rates charged on peaches and grapes, carloads, from California to Hibbing, South Hibbing, Ely, Aurora, Virginia, Eveleth, Chisholm, and Gilbert, Minn., two years prior to Jan. 22, 1925 as unreasonable. Charged combination on Duluth, Minn., composed of $1.73 to Duluth and third class beyond. Contention of complainant is based upon Va. Ch. of Com. v. A. T. & S. F. Ry., 92 I. C. C. 732 wherein the Commission prescribed the same rates to Virginia, Minn., as to Duluth. Defendants are willing to establish the rate of $1.73 to all points. HELD, rates attacked unreasonable to extent they exceed the rate to Duluth, reparation awarded. Hansen Peterson Co. v. A. T. & S. F. Ry., 113 I. C. C. 575.

(s) Complainant attacked commodity rates on coke, carloads, from Appalachia, Stonega and other producing points in Virginia and from Birmingham, Ala., and Chattanooga, Tenn., to California as unreasonable, unduly prejudicial and in violation of section four. In 104 I. C. C. 483, division 3 found that the rates on coke, carloads, from Chattanooga to Pacific coast terminals were not unreasonable or unjustly discriminatory, but were unduly prejudicial to the extent they exceeded the rates from Birmingham. HELD, rates attacked not unreasonable or unduly prejudicial from Appalachia, Stonega and other Virginia points, and from Birmingham but rate from Chattanooga not unreasonable but unduly prejudicial as stated in 104 I. C. C. 483 which undue prejudice has since been removed, complaint dismissed. Romann & Bush Pig Iron & Coke Co. v. I. R. R. Co., 113 I. C. C. 622.

(t) In 102 I. C. C. 641, the Commission found rates on iron and steel articles, carloads and less carloads, from Birmingham, Ala., to Nashville, Tenn., were not unreasonable or unduly prejudicial except that the carload rate was unduly prejudicial to Nashville to the advantage of Chattanooga and Knoxville, Tenn., to extent it exceeded 3c more than the rate from Birmingham to Chattanooga and 4c less than from Birmingham to Knoxville. Defendants filed a petition for modification of report and order because the parties have since agreed to the establishment of a rate of 24c from Birmingham to Nashville, 205 miles, under a compromise scale which would result in a rate of 20c to Chattanooga, 143 miles, and 28c to Knoxville, 254 miles. HELD, an order will be issued modifying the order heretofore entered permitting the establishment of the proposed relationship of rates on or before Nov. 1, 1926. Traffic Bureau of Nashville v. L. & N. R. R., 113 I. C. C. 673.

(u) Complainant attacked commodity rates charged on barytes carloads from Cartersville, Ga., to Pennsylvania, New York and Delaware, as unreasonable, unjustly discriminatory and unduly prejudicial as compared with rates from Sweetwater, Tenn., to the same destinations. Sweetwater is on the main line of the Southern between Chattanooga and Knoxville, Tenn. Cartersville is served by the N. C. & St. L., L. & N. and S. A. L. 47 miles north of Atlanta. For sometime prior to June

25, 1925 rates from Sweetwater and Cartersville to the same destinations, except Hazard, were the same. Early in 1925 shippers at Sweetwater complained that the maintenance of the same rates from Cartersville placed shippers at Sweetwater at a disadvantage in competing with shippers at Cartersville. On June 25, 1925 tariffs reducing the rates from Sweetwater 50c per long ton without making a like reduction in the rates from Cartersville, became effective. Complainant introduced no evidence of probative value bearing upon the reasonableness of the rates attacked. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Thompson Weinman & Co. v. A. C. Ry., 118 I. C. C. 21.

(v) Complainant attacked combination rate of 69c composed of 27.5c to East St. Louis, Ill., and 41.5c beyond charged on tank cars of gasoline and naptha shipped since March 22, 1923 from Beckett, Okmulgee, Bristow, Tulsa, and Wilson, Okla., to Blue Creek, W. Va., as unreasonable to extent they exceeded the rates to Charleston, W. Va. Blue Creek is 13 miles northeast of Charleston on the B. & O. Charleston is recognized by defendants as one of the western termini of eastern trunk line territory and a dividing point between central and trunk line territories. On traffic between that point and points in central territory the general basis of rates applicable in that territory applies. The evidence is directed against the rate of 41.5c from East St. Louis to Blue Creek as compared with 28.5c to Charleston. A spread of 15c is warranted Blue Creek over Charleston. HELD, rates attacked unreasonable to extent they exceed 57.5c, reparation awarded. Transcontinental Oil Co. v. B. & O. R. R., 118 I. C. C. 518.

(w) Complainant attacked commodity rates on sand, in carloads, from Lawrence, Kans., to points east of Kansas City, Mo., as unreasonable and unduly prejudicial as compared with rates from Turner, Muncie, Grinter, Sirridge and Armourdale, Kans., the latter points being within the switching limits of Kansas City. Plant at Lawrence is on the south side of Kaw river on the Santa Fe 41 miles from Kansas City. Rates from Lawrence to destinations within a radius of 150 miles east of Kansas City are combinations of local rate to and from Kansas City subject to combination rule. The average distance from all the same plants is 5.8 miles and rates from all of the preferred points to the destination territory are the same as the rates from Kansas City. Lawrence is at a disadvantage of 50c. HELD, rates attacked from Lawrence to points within a radius of 150 miles east of Kansas City unreasonable and unduly prejudicial to extent they exceed by more than 20c per ton the rate from Turner, Muncie, Grinter, Sirridge and Armourdale, Kans., Jackson v. A. T. & S. F. Ry., 118 I. C. C. 547.

(x) Complainant attacked commodity rate of 4c charged on sand, in carloads, from Lawrence, Kans., to destinations in the Kansas City, Mo., switching district as unreasonable and unduly prejudicial. Lawrence is 41 miles west of Kansas City. A rate of 2.5c applies from other sand producing points with the Kansas City switching district. The record is persuasive that a difference of 30c per ton is too high for the difference in distance. HELD, rate attacked unreasonable and unduly prejudicial to extent it exceeds by more than 1c the rate from points within the Kansas City district. Jackman and Jackman v. A. T. & S. F. Ry., 118 I. C. C. 560.

(y) Complainant attacked commodity rates charged on sand and gravel, carloads, from Illinois and Wisconsin producing points to Chicago, Ill., as unreasonable and unduly prejudicial, also that failure and refusal of the Milwaukee to absorb the switching charges on this traffic of the Northwestern and North Shore at Elgin, Ill., and Racine, Wis., is unduly prejudicial. Carriers proposed certain increases in the rates on sand, gravel and crushed stone within the Chicago district. Group rates have for many years applied to Chicago and Chicago rate points from Milwaukee and Northwestern points in Zones I and II the latter zone taking a differential of 5c over the former. An arbitrary has usually been added to the single line rates for connecting line delivery. An increase of 5c is made in the rate from Zone I and Zone II on the Northwestern and Milwaukee, somewhat greater increases from other points in Zone I, increases of 1 and 6c in the single line rates, and 12 and 17c in the connecting line rates from Indiana producing points and corresponding increases in the connecting line rates from Illinois Zones II

and III. The single line rates under Zones 420, as a whole, and from complainants plants in particular, are relatively lower than the rates on these commodities to other destinations and appear to give ample consideration to the great volume in which these commodities move to the Chicago market. The lower the differential between the respective zones or districts the less the consideration given to differences in distance and the more closely the adjustment approaches a strictly group basis. The 65c and 70c rates, as in the case of the nearer distant points in any group or differential adjustment, are higher, distance considered, than the rates from the farther distant points but whether considered alone or as a part of a differential adjustment, compare favorably, transportation conditions considered, with other rates of record on the same and other commodities. These connecting line rates of 95, 100 and 105c usually represent a 30c arbitrary over the single line rates. It appears that any higher arbitrary will confine the shipments largely to single line deliveries. The rates on stone within the district have never borne any differential or percentage relationship to the rates from Zone I on the Northwestern and Milwaukee. Comparatively little sand and gravel originates within the district. There is no competitive or transportation reason for grouping Zone I with the Chicago district, either by increasing the rates within the district to the basis proposed by defendants or by reducing the rates from Zone I to the basis proposed by complainants. The rates on slag from Joliet to the district should be maintained on the same level as the rates on sand, gravel and crushed stone, and rates on sand, gravel, crushed stone and slag within the district should be increased at this time to the same level as on other commodities. The transportation and commercial competition which governs the rates and differentials on sand, gravel and crushed stone to the Chicago district are not shown to exist with respect to the movement of these commodities to any points in Wisconsin. The fact that the Milwaukee absorbs the switching charges of the Northwestern and North Shore on certain other commodities does not warrant a finding of undue prejudice. HELD, rates attacked not found unreasonable, rates within the district proposed not justified, connecting line arbitrary to be 20c instead of 30c, complaint dismissed. Chicago Gravel Co. v. A. T. & S. F. Ry., 118 I. C. C. 633.

(z) The Commission can not regulate rates for the purpose of equalizing cost of production or manufacture and primarily it is not its concern to equalize market competition. American Cedar Mfrs. Asso. v. N. Y. C. R. R., 118 I. C. C. 721, 723.

(aa) The duty of a carrier to equalize treatment among shippers extends only to those whom it is bound to serve. Winding Gulf Colliery Co. v. C. & O., 115 I. C. C. 113, 116; Ragland Coal Co. v. V. Ry., 115 I. C. C. 147, 150.

(bb) Complainant attacked rates charged on butter, eggs and dressed poultry, carloads and less carloads, from North Dakota, South Dakota, Nebraska, and Minnesota to Duluth, Minn., as unreasonable, and unduly discriminatory and unduly preferential of Chicago, and that the practice of defendants of publishing rates including refrigeration charges on such traffic and according special concentration and storage arrangements as unjustly prejudicial. The territory of origin involved embraces all of North Dakota and South Dakota, that part of Nebraska on and north of the main line of the U. P. from Omaha west, and that part of Minnesota north and west of the Omaha from Sioux City, Ia. to St. Paul. Third class rates are generally applicable from points on the N. P. to both Duluth and Chicago. Carload commodity rates have been established, however, from certain points of origin. Less than carload rates on butter to Chicago are maintained but to Duluth they move at second class rate. Commodity rates are published to Chicago from many stations on the Milwaukee. Rates to Duluth carload and less carload are on class basis, and less carload rates to Chicago are on the class basis. Northwestern maintains carload commodity rates from South Dakota west of the river and Nebraska west of Fremont and Lincoln. to both Chicago and Duluth. Dairy products are now transported almost exclusively in refrigerator cars. Butter and eggs are precooled before loading and loss and damage claims amount to little. The through rate to eastern points is not involved in this proceeding which concerns only the rates from the origin territory to Chicago on the one hand and to Duluth on the other. In arriving at a decision, however, the Commission

can not ignore the fact that these rates are but factors in the through combination rate to eastern destinations where the bulk of the shipments move. There is no doubt that Duluth is subjected to undue prejudice, especially in view of the commodity rates which are maintained to Chicago from certain points and which are denied Duluth from the same localities. The Commission believes that these rates on dairy products should be revised to the end that these two great gateways, Chicago and Duluth, will in the future stand on a fixed relationship one to the other; and it believes also that an adjustment should so be made as to obviate in the future the charge of discrimination and undue prejudice alleged by one shipping point against another. The Commission sees no reason why Chicago and Duluth should not be accorded like treatment as to the concentration privileges. HELD, rates attacked to Duluth which do not move beyond by lake or lake and rail unreasonable to extent they are more than 90% of third class rates prescribed in 98 I. C. C. 691; less carloads not more than 90% of second class rates prescribed in 98 I. C. C. 691; to Chicago 80% of third class and 80% second class respectively. HELD, further, on dairy products to Duluth destined beyond, unreasonable to extent they exceed 80% of third class rates and to Chicago 70% of the third class rates. Defendants should remove the undue prejudice by cancellation of concentration privileges to Chicago or establish the same concentration privilege to Duluth. Duluth Chamber of Commerce v. C. & N. W. Ry., 120 I. C. C. 683.

(cc) In the fixing of rates in the past on washed gravel, crushed stone, slag, sand, clay gravel, and unwashed gravel, the commission has not recognized existence of difference in transportation characteristics, or in any other facts entitled to consideration in the fixing of rates, such as to warrant a different basis of rates on some as distinguished from others. Where scales have been prescribed in any territory they have been rated the same. Rates on Chert, Clay, Sand, and Gravel, 122 I. C. C. 133, 163.

(dd) Proposed revised rates on granite, marble, and stone, from New England and New York to Wisconsin, Minnesota, and Michigan destinations, designed to correct error in tariff publication; to narrow, simplify, and clarify various tariff descriptions; and to equalize through rates so they will reflect the full Chicago combination basis, found justified on such commodities when carved, lettered, polished, or traced, but not justified when not so finished. Eastern manufacturers can now underbid protestants, and under rates found not justified this handicap would be aggravated as it would then be cheaper to manufacture in the East and ship the finished product. Moreover, Chicago is an accepted basing point for making rates from New England to territory west of Chicago, and carriers offered no justification for resulting situations under which joint rates would exceed the lowest available combinations that would apply if no joint rates were published. Granite, Marble, and Stone from Eastern Points, 122 I. C. C. 319.

(ee) Rates on cotton from Corinth, Miss., to Monroe, Ga., found not unreasonable or otherwise unlawful as compared with those from Memphis, to which Corinth is intermediate; from New Orleans to Monroe and other Georgia destinations; or with rate subsequently established. Rates from Memphis and New Orleans were depressed and in 89 I. C. C. 47, it was found that rates on cotton to the Southeast departed in many instances from provisions of fourth section. Moreover, comparisons of rates assailed with those from other origins to Monroe for similar distances indicate that rate from Corinth was properly adjusted with relation to general level of rates from other Mississippi points intermediate to various river crossings, and from points in interior Tennessee and Alabama. Manget Bros. Co. v. G. R. R., 123 I. C. C. 532.

(ff) Respondents proposed to readjust, by increases and reductions, the rates on pig iron, in carloads, between points in central territory for application on interstate and intrastate movements. Pig iron is a low grade, heavy loading commodity, usually moved in open top equipment or almost any type of car available, with practically no loss in transit. It requires no expedited service. For a period of 35 years or longer, it has been the practice of carriers serving central territory to maintain rates on pig iron between points in that territory and from Mississippi river and Illinois producing points to destinations in central territory, based upon competitive and commercial con-

ditions. The rates as covered by the suspended schedules preserve the origin and destination groups which have existed for many years. Distance is given much consideration in the proposed adjustment, but commercial and competitive conditions and existing relationships are the controlling factors. D. T. & I. publishes a rate of $1 between Detroit and Toledo while competing carriers serving those points publish a rate of $1.39. It is not proposed to change the rate over the Ironton, but the suspended rate proposed by the other carriers between these points is $1.40. This rate for a distance of about 60 miles is substantially on the same level as the rates between other points in central territory for similar distances. HELD, there is no indication that the present rate of $1 between Toledo and Detroit is burdensome upon other traffic. Undue prejudice can not be found. The W. & L. E. proposed a rate from Cleveland to Detroit 25c below the level of the general structure. The record does not show that this rate would be less than reasonable, nor that it would result in undue prejudice. Present rate between Detroit and Cleveland, 166 miles is $3.02. Under the proposed adjustment the rate from Detroit to Cleveland would be $2.75 over all lines and from Cleveland to Detroit it would remain $3.02 over all lines except the W. & L. E., which proposes $2.75. HELD, respondents to establish a rate of $2.75 between these points over all lines now publishing the rate of $3.02. HELD, the proposed rate of $2.15 from the Chicago district would be unduly prejudicial to St. Joseph, Benton Harbor and Bridgman, and unduly preferential to Michigan City and must be canceled. HELD, proposed rate of $2.40 from the Chicago district to Goshen, North Manchester, Huntington and Wabash, Ind., would be unduly preferential of Chicago and unduly prejudicial to Toledo, and must be canceled. HELD, proposed increased rate of $2.90 from Toledo to Logansport, Ind., not justified. Rates on pig iron between points in central territory are not constructed upon any scientific basis. They have been established from time to time to keep pace with the growth of the pig iron industry. The Commission is convinced that the proposed adjustment, while not all that might be desired, is an improvement over that now existing. The approval of the Commission with the exceptions hereinbefore noted, is without prejudice to different conclusions which may be reached in other proceedings both upon the level and the relationship of these rates. Pig iron in central territory, 126 I. C. C. 111.

(gg) Complainants operating mines in the Pittsburgh district of Pennspylvania and in the Ohio No. 8 and Cambridge districts in Ohio, alleged that the rates on bituminous coal, carloads, from those districts to lower Lake Erie ports for transshipment by vessel to destinations beyond were unjust and unreasonable per se, relatively unreasonable and unduly prejudicial as compared with the rates in effect on like traffic from other districts in the Appalachian region. Complainants in the Fairmont district alleged that the rate on bituminous coal, carloads, therefrom to the above ports for transshipment by vessel beyond was unreasonable and unduly prejudicial as compared with the rates from the Pittsburgh, Ohio No. 8 and Cambridge districts, the Crooksville and Shawnee districts of southern Ohio and the Connellsville district of southwestern Pennsylvania. Original report in Lake Cargo Coal Rates, 1925, 101 I. C. C. 513 decided July 16, 1925. Coal destined to Lake Erie ports for transshipment by vessel to points beyond is known as "lake cargo" coal, as distinguished from both so called commercial coal destined to the lake cities proper and not transshipped by vessel, and bunker coal used as vessel fuel. Most of it moves to those ports only during the season of open navigation on the Great Lakes, ordinarily from the latter part of April to the latter part of November. The rates thereon apply from the mines to the raised or hump tracks beyond the classification yards at the Lake Erie ports. From these tracks the loaded cars are dropped by gravity to dumping machines on the docks. A separate tariff charge for transferring the coal from cars to vessels is not in issue. The rates on lake cargo coal are treated as in the nature of proportional rates to the ports for part of a through movement to cross lake destinations. They include no terminal delivery to consignees at the ports. The local rates on socalled commercial coal include such delivery. For this and other reasons as, for example, concentrated movement at times when commercial coal is not moving heavily, rates on lake cargo coal always have been lower than the local rates on commercial coal. Lake cargo coal moves by

water to various lake and river ports in the United States and in Canada, east, north, and northwest from the port of transshipment, by far the greater part to Lake Superior and Lake Michigan docks, whence it is distributed by rail throughout the year. Approximately one half of the lake cargo coal so moving to the head of the lakes is used by northwestern railroads as railroad fuel, and the remainder is distributed in the region south and southwest of Lake Superior and west of Lake Michigan for domestic, steam gas and other purposes. The transportation from the mine to the port being interstate or foreign in character it is subject to the jurisdiction of the Commission under the general provisions of section 1, irrespective of the mode of transportation beyond the port. The present rates from the Pittsburgh, Ohio, No. 8, Cambridge and Fairmont districts to all of the ports reached by them are $1.66, $1.63, $1.63 and $1.81. The straight average distances to all the lake ports to which the attacked rates apply are 178 miles from the Pittsburgh district, including mines on the P. & W. Va. from which the district rate over routes embracing the B. & O. was established since the original hearings herein, 165 miles from Ohio No. 8, and 172 miles from the Cambridge districts. The road haul service on the different lines varies, but the conditions are not all in favor of or against the product of any particular district. Generally speaking, the movement from the southern districts is down grade to the Ohio river, up grade from the river, and finally down grade to the ports. The terminal service at the several ports with respect to lake cargo coal from the various districts is not substantially dissimilar. Lake cargo coal is available for handling in trains of large size. Weather conditions during the period of movement of this traffic generally are such as not to impede operations. Commercial coal moves throughout the year but in greatest volume during the winter months when operations usually are more difficult and expensive than in the summer. The rate on local commercial coal from Ohio No. 8 to Cleveland is $1.74, of which an average of $1.63 or the equivalent of the rate attacked from this district to Cleveland, accrued to the line haul carriers on the shipments following the absorption of switching charges thereon on the basis of a weighted average charge of 11c. On that basis, it would appear that, although the rate attacked is less than the rate on local commercial coal from this particular district to Cleveland, defendants derive, on an average, no more revenue under the later rate than under the rate attacked. Complainants have instanced no rate or set of rates on coal which are lower for similar distances than the rates which they enjoy, but it is clear that the rates from the southern districts are relatively much lower, distance considered, and these rates on lake cargo coal appear to be surrounded by more favorable circumstances and conditions than any other coal rates which have been brought to the attention of the Commission. Differentials generally are made to fit particular situations, and the circumstances and conditions may vary in different cases, but the Commission may not disregard differentials prescribed in other cases or voluntarily established for comparable distances, especially those from the same origin territory to other destinations. Under the issues before the Commission it can only determine whether the rates attacked from the complaining districts are just, reasonable, and free from undue prejudice. It is no part of its duty to canvass and compare wage scales and other expenses and incidents of industrial operation, or the social and economic conditions stressed with the view of adjusting the rate structure to them. FAIRMONT DISTRICT COMPLAINT. Rate from this district to the lake ports is $1.81 or 12c over Pittsburgh. Their product is said to be similar to the Pittsburgh and Ohio No. 8 coals and suitable for the lake cargo trade. Its movement, except for lake transshipment is mainly eastward. The differentials in the rates on lake cargo coal from the Fairmont district over Pittsburgh and to Ohio districts should be greater rather than less than the present differentials. CONCLUSIONS. Upon the more complete record now before the Commission, it is of the opinion that the rates on the same class of traffic from other districts in the same region shipping a large amount of lake cargo coal are entitled to more weight in passing upon the reasonableness of the rates attacked than any other rate comparisons, although it takes into consideration that such rates from the southern districts may not be reasonable maxima in all instances. The cost studies of complainant are sufficient to show that

the costs warrant a substantial reduction in the rates from the complaining districts in Ohio and Pennsylvania. It cannot be denied that the increases have been proportionately greater in the rates from the complaining districts than in those from the southern districts, and in fact proportionately greater than in the class and commodity rates generally in the same territory. It is true that the Commission has approved the manner of increasing these rates, and it has held that such increases were not proof that the resulting rates were unreasonable, but this does not prevent it from according relief from rates so increased where the facts otherwise justify it. HELD, rates attacked are unreasonable to the extent they exceed $1.46 per ton from the Pittsburgh district and $1.43 from the Ohio No. 8 and Cambridge districts. The Commission does not regard the present relationships between the rates from the complaining Pittsburgh-Ohio districts and the southern districts as proper, but the reductions required in the rates from the Pittsburgh and Ohio districts will go far toward removing the alleged undue prejudice to those districts. It is expected, however, that the carriers will increase the differentials between the above mentioned districts and the southern districts by the amount of the reduction in the rates from the former, subject to what is said below regarding the rates from the Fairmont district. The record is not sufficiently developed to warrant specific findings with respect to the relationships between the rates from the complaining Pittsburgh and Ohio districts and other districts in Ohio, Pennsylvania and Maryland which ship lake cargo coal, but the carriers should be prepared to justify any change in the present differentials between those districts with the exception of the differential from Connellsville over Pittsburgh, which is now 40% of the differential from Fairmont over Pittsburgh and might properly be increased to the same percentage of the differential from Fairmont over Pittsburgh that is established pursuant to this decision. Under the issues now presented, it is unnecessary for the Commission to consider whether the rates from the southern districts are lower than reasonable minima, but it is of the opinion that the carriers would not be justified in reducing the present rates from those districts. This does not apply to the rates from the Fairmont district, which might be reduced to $1.71 without creating too small a differential over those from the Pittsburgh and Ohio districts. The Commission does not, however, find the rates from the Fairmont district unreasonable or unduly prejudicial as alleged. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309.

(hh) Complainant attacked commodity rates on sand and gravel, carloads, from Muscatine, Ia., to destinations in central and western Illinois, as unreasonable, unjustly discriminatory and unduly prejudicial as compared with rates on crushed stone from Buffalo and Linwood, Ia., to same destinations. The rates on sand and gravel from Muscatine are considerably higher than those on crushed stone from Buffalo and Linwood, the latter being prescribed in Dolese Bros. Co., v. A. T. & S. F. Ry., 89 I. C. C. 110. Formerly the rates on all these commodities from all producing points mentioned were equal. Sand and gravel compete with crushed stone for road building purposes, and any substantial difference in rates is a matter of great importance to producers. Complainants traffic requires hauls only 18 or 20 miles longer than does the traffic from Buffalo and Linwood. Rates were voluntarily established on the Rock Island 10c over those from Buffalo and Linwood. HELD, rates for future unreasonable to extent they exceed by more than 10c per ton the rates on crushed stone from Buffalo and Linwood. Automatic Gravel Products Co. v. C. R. I. & P. Ry., 126 I. C. C. 487.

(ii) Proposal of the L. & N. R. R. to increase its single-line rates on forest products from Decatur, Ala., and related points to Nashville, Tenn., in order to place Decatur on same rate basis as Florence and Sheffield, Ala., found not justified. While proposed rates are low as compared with joint-line rates from points on other lines for comparable distances, are not high as compared with rates to Ohio River cities, and compare favorably with those prescribed in 104 I. C. C. 15 for joint-line hauls of comparable distance, such rates are higher than the distance scale of single-line rates on lumber prescribed for application between Meridian, Miss., and points on the Southern, Alabama Great Southern, and Mobile & Ohio railroads. Forest Products from Decatur, 126 I. C. C. 252.

(jj) Upon a consideration of unusually favorable circumstances and conditions surrounding movement of lake-cargo coal; the relatively lower rates from southern districts; the decided change in relative tonnage shipped from Pittsburgh and Ohio districts and the southern districts, respectively; the present depressed condition of coal-mining industry in Pittsburgh and Ohio districts; the changed conditions since decision regarding those rates issued in 101 I. C. C. 513; and fact that cost of the service warrants a substantial rate reduction, HELD: That bituminous coal rates from mines in Pennsylvania, Ohio, and West Virginia in the Pittsburgh, Ohio, No. 8, and Cambridge districts to lower Lake Erie ports for transshipment by vessels are unreasonable but not unduly prejudicial. Rates on like traffic from mines in the Fairmont district found not unreasonable or unduly prejudiical. Reasonable rates prescribed for future and former eport, 101 I. C. C. 513, modified in part. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309.

(kk) Carriers may voluntarily equalize commercial or geographical disadvantages in many instances in which the commission could not require such equalization. See 222 U. S. 42. Gum Motor Co. v. A., T. & S. F., 128 I. C. C. 61, 62.

(ll) Complainant attacked commodity rate charged of 5c on 68 cars of crushed stone and chatts moving from Webb City and Oronogo Jct. Mo., to Arcadia, Crawford County, Kas., between Oct. 5, 1922, and April 3, 1923, as unreasonable to extent it exceeded 4c effective May 8, 1923. Distances are 45.2 and 48.9 miles. In Crawford County Commissioners v. St. L. S. F. Ry., 93 I. C. C. 502, the Commission prescribed a rate of 4c on broken stone or chatts from Webb City, Oronogo and Joplin, Mo., to destinations on the M. P. in Crawford County for distances between 48 and 60 miles from Joplin. Oronogo and Oronogo Jct. are 0.5 miles apart on defendants line. HELD, rate attacked unreasonable to extent it exceeded 4c, reparation awarded. Ziegler Bros. v. St. L. S. F. Ry., 128 I. C. C. 257.

(mm) In equalizing rates a percentage difference in distance is preferable to a fixed mileage difference for all distances. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 388.

(nn) Upon further hearing, present rates on crushed stone from Buffalo and Linwood, Iowa, to points in northern Illinois, found in many instances not in accord with findings in original report, 89 I. C. C. 110, wherein reasonable and nonprejudicial rates were prescribed to 10 so-called key points and carriers were left to work out a schedule of properly related rates to all other destinations. As intention of original report was to prescribe rates that would eliminate disparity in rates from Iowa quarries and not to sanction blanketing of key-point rates all the way back to Buffalo and Linwood or to avoid further misunderstanding, carriers will be expected to publish rates in accordance with rates prescribed to points shown in appendix hereto, and to points not named in appendix, rate to nearest point named therein by shortest workable route. Such rates are in accord with original finding and will be reasonable for the future. Dolese Bros. Co. v. A., T. & S. F., 128 I. C. C. 471.

(oo) Commission can not readjust rates merely in order to equalize market competition. Virginia Pig Iron Asso. v. C. & O., 128 I. C. C. 737, 740.

(pp) Respondents proposed to increase their present rate of 17c on potatoes, in carloads, from Kansas City, Mo., to Coffeyville, Kas., to 21c. Proposed rate is class C. While the proposed rate is on a lower level than the rate prescribed in Consolidated Southwestern Cases 123 I. C. C. 203, it is materially higher than the rates maintained by respondents to other points in Kansas with which Coffeyville dealers must compete, and which should be properly related. HELD, proposed schedules not justified. Potatoes from Kansas City, 129 I. C. C. 458.

(qq) In the original report, Midcontinent Oil Rates, 1925, 112 I. C. C. 421, the Commission considered the general adjustment of rates on petroleum products from the southwestern producing and refining territory, to destinations in western trunk line territory and in Illinois, the northern peninsula of Michigan, and a portion of northwestern Indiana, and prescribed an adjustment of reasonable and nonprejudicial rates or bases of rates for the future. Upon further consideration and in light of the additional evidence presented, the Commission is of the opinion that the keenly competitive situation as between the refiners in northern Oklahoma and those in central Kansas, and the approximately equal average distances from these two districts, warrant a parity of rates therefrom to

the destination territory here under consideration. HELD, the rates in issue on gasoline, and other socalled refined oils now taking the same rates, in carloads, are unduly prejudicial as between the origin groups, and that rates related one to another as between the respective origin groups in the amounts set forth, and which do not exceed the rates therein set forth or rates made upon the bases therein set forth, will be for the future just, reasonable and nonprejudicial for application on this traffic from and to the groups or points shown: from group 3 to St. Louis, Mo., 31.5c, Keokuk, Ia. 33c, Peoria, Ill., 35.5c, Davenport, Ia., 35.5c, Chicago, Ill., 38.5c, Milwaukee, Wis., 41.5c. Differentials under group 3 from group 1 to St. Louis 8c, Davenport 7c. From group 2 to St. Louis, and other points named 2c. Midcontinent Oil Rates 1925, 132 I. C. C. 103.

§4. Competition.

(1). In General.

See Competition.

(a) It is a familiar principle that each community is entitled to the benefits arising from its natural advantages. But another principle, equally well settled, is that a carrier may meet competition so long as it is not guilty of undue prejudice, does not charge rates which are so low as to burden other traffic, and does not contravene the declared policy of Congress to foster and preserve in full vigor both rail and water transportation. Galveston Commercial Asso. v G. H. & S. A. Ry., 128 I. C. C. 349, 379.

§4. (4) Water Competition.

See Evidence §14 (5); Water Competition.

(a) Proposed increases in class rates between Washington and Oregon points, on the one hand, and Columbia River basin points, on the other, to conform to the general rate adjustment in Washington and Oregon, and in purported compliance with commission's findings in 113 I. C. C. 38, found justified. Pursuant to findings in 21 I. C. C. 640, interstate distributive class rates were established generally in Washington and Oregon, but because of potential, if not actual, water competition on the Columbia River, no advance was made in rates between points involved in this proceeding, which rates have long been depressed. Increases proposed place these rates on the distributive scale basis which for similar distances are the same as, or less than, scale of class rates prescribed in 74 I. C. C. 207 for application in same general territory. Class Rates Between Oregon and Washington, 128 I. C. C. 108.

§4 (5) Market Competition.

See Market Competition.

(a) Equalization of prices of goods in foreign markets can not be accepted as a guide for determining a proper rate adjustment for rail movements in this country, or whether certain interests are given an unfair advantage by maintenance of export rates. Export Rates on Wheat and Products, 107 I. C. C. 276, 285, 286.

(b) In situations where rates standing by themselves are unlawful and commission is called upon to impose rate equalization, facts developed of record should leave no doubt that exercise of such power by commission would be not only warranted by law but necessary or appropriate in public interest. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 125.

(c) Complainant attacked rates on soap, carloads, from Jersey City, N. J., to destinations in New England territory as unjust, unreasonable, unjustly discriminatory and unduly prejudicial. Commission is asked to prescribe rates that do not exceed the rates from Manhattan and Brooklyn, N. Y. Complainant's factory in Jersey City is within the free lighterage limits of New York Harbor, opposite the lower end of Manhattan Island, served by the Pennsylvania. Rates attacked except to Boston and intermediate points are the fifth class rates. Rate to Boston is 90% of fifth. Defendants state that fifth class rates apply generally on soap throughout official territory. The shipper or receiver of lighterage freight obtains, generally speaking, all the service that a shipper of freight through the pier station does, and in addition, a service involving a further handling of the freight to and from the lighters and the use of lighters to move it. Generally speaking, where shipper or consignee is located on the water front, the lighterage rate saves him the cost of cartage to or from the rail stations. This complainant trucks its freight two blocks to its private pier. On short haul traffic there is usually a difference between the light-

erage rates and the terminal rates; and while on long haul traffic the difference diminishes as the distance increases, the point where the difference vanishes is far from uniform. The hauls here are not long, the maximum distance being 262 miles. The cost of transporting complainant's shipments under the attacked rates is undoubtedly greater by substantial amounts than the cost of transporting its competitors' shipments from Manhattan and Brooklyn to the same destinations. HELD: Rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Colgate & Company v. N. Y. C. R. R., 112 I. C. C. 573.

(d) Applicable combination rates on muriate of potash from Salduro, Utah, to Chicago Heights, Ill., a group D point, found not unreasonable as compared with lower rates contemporaneously in effect to St. Louis, Mo., a group E point. Complainant showed that same rates applied to both groups on a number of commodities and that prior to and subsequent to movement equal rates applied to both groups on potash. Carriers, on the other hand, contend that rates established were depressed and were made to meet competition with imported fertilizer materials from Atlantic ports and showed that on a number of commodities the rates between Salt Lake City and Chicago are higher than those to or from St. Louis. Armour Fertilizer Works v. W. P. R. R., 115 I. C. C. 684.

(e) Rates which are designed to effect market equalization necessarily disregard distance to some extent. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 752.

(f) Complainant alleged that rates on lumber and box shooks, carloads, from McNary and Flagstaff, Ariz., to California destinations were and are unjust, unreasonable and unduly prejudicial as compared with rates on like commodities from El Paso, Tex., Albuquerque, N. M., and California and Oregon. Flagstaff is on the Santa Fe 57 miles east of Ashfork, Ariz., McNary is at the southern terminus of the Apache Ry., a line 72 miles long, which connects with the Santa Fe at Holbrook, Ariz., 91 miles east of Flagstaff. Present rates from Flagstaff are 47.5c to Niland for a distance of 515 miles, 51c for distance of 520 to 556 miles to main line destinations, and 55c to branch line destinations. The rates from McNary to Niland for 678 miles, 65c to main line destinations for distances of 683 to 716 miles, and 69c to branch line destinations for distances of 691 to 699 miles. The rates from McNary are made by adding to the local rate of 12c of the Apache Ry. from McNary to Holbrook the rate from Holbrook to destination. The rate from El Paso to the destination territory is 40c to main line points for distances of 629 to 666 miles and to branch line points 42c for distances of 641 to 649 miles. The rates attacked are on a higher level than are the rates from the same points of origin to destinations in California over lines other than the S. P., and are on a higher level than rates from lumber producing points in California to destinations in that state. HELD, rates attacked to main line and branch line points in the Imperial Valley unreasonable to extent they exceed 44.5c from Flagstaff and 49.5c from McNary, reparation awarded. Cady Lumber Co. v. Apache Ry., 120 I. C. C. 593.

(g) In 73 I. C. C. 161 the commission found not unreasonable rates on coal from inner and outer crescents to points within the Chicago switching district. Rehearing was had, and second decision rendered in 89 I. C. C. 137. Defendants complied with both decisions by reducing substantially rates to points within and without the Chicago district which were found not unreasonable but unduly prejudicial. The Chicago switching district extends from Ivanhoe, Ind., on the southeast to Des Plaines, Ill., on the northwest, a distance of about 40 miles, and averages about 12 miles in width. The affected area covers the northern part of the Chicago switching district and the delivering carriers chiefly concerned are the C. & N. W., C., M. & St. P., Soo Line, C. G. W., and C. B. & Q. The first or southern zone should comprise all of that part of the former differential area lying south of the line of Irving Park Blvd. and that the second or northern zone should embrace all points in the district north of the line of Irving Park Blvd. with the exception of Weber and Greenwood St. On bituminous coal a zone should be established coextensive with the second anthracite zone. HELD, previous findings affirmed as to the reasonableness of the rates, but under section 3 hard coal to southern zone should be 10 cents over Chicago rate, northern zone, except Weber and Greenwood St., 20 cents over, and on bituminous coal northern zone 10 cents over. In No. 12668 complainant attacked the rate

charged on carloads of bituminous coal during federal control from mines in central and southern Illinois to Edgebrook and Morton Grove, Ill., as unreasonable and unjustly discriminatory. HELD, rates not unreasonable but only one factor should be added to the combination to arrive at the proper rate, reparation awarded. Chicago Coal Merchants Asso. v. Director General, 123 I. C. C. 169.

(h) Complainant attacked fifth class rates of 36.5 cents and 41.5 cents charged on tablets and papeteries, in carloads, from East Hartford, Conn., to Baltimore, Md., and Washington, D. C., as unreasonable and unduly prejudicial to extent they exceeded 30 cents and 36.5 cents from Holyoke, Mass., to Baltimore and Washington. East Hartford is 2.7 miles east of Hartford. Both articles are rated fifth class. HELD, rates attacked not unreasonable but for future will be unreasonable and unduly prejudicial to extent they exceeded the rates from Holyoke, Mass., reparation denied. Taylor Atkins Paper Co. v. N. Y., N. H. & H. R. R., 123 I. C. C. 583.

(i) Complainant attacked commodity rate of 38.5 cents charged on lumber, carloads, from Nashville, Tenn., to Toronto, Ont., as unreasonable, unduly preferential of Chattanooga, Tenn. For years rates on lumber from Nashville and Chattanooga to central territory have been made combination on the Ohio River. The present through rates from Nashville and Chattanooga to Toronto are 4 and 10.5c, respectively, less than the lowest combination on the Ohio River. The rates on lumber from Nashville and Chattanooga to points in Canada are in most instances the same. The rates to Buffalo, N. Y., and Hamilton, Ont., are the same from both cities. Numerous other points to which the rates are the same are shown of record. Toronto and points taking the same rate are practically the only departures from the long established practice of making the rates from the two points the same. HELD, rate attacked not unreasonable but unduly prejudicial to the extent it exceeds the rates from Chattanooga. Farris Hardwood Lumber Co. v. L. & N. R. R., 123 I. C. C. 587.

(j) Complainants assail carload rates on natural gasoline from Ranger, Breckenridge, and South Bend, Tex., to various destinations in official and southern territories, as unreasonable to extent they were in excess of the rates from Electra, Iowa Park, Burkburnett, Fort Worth, and Wichita Falls, Tex., and other points in the Burkburnett group and unduly prejudicial as compared with the rates on gasoline from points in the Houston-Galveston-Beaumont group in south Texas and from Shreveport and other Louisiana points taking the same rates. Complainant alleged that the carload rates on the same commodity from Carroll and Mine 11, Tex., also in the Ranger group, to the same destination territory, are unreasonable and unduly prejudicial, to extent they exceed rates from the Burkburnett group. The through rates from this territory to the east are made on the combinations of proportionals to and from the Mississippi River or other gateways. The tariffs do not contain routing instructions and the lowest combination on any gateway is the applicable through rate over all routes. In most instances the through rates from the Ranger group are higher than those from the Burkburnett group, the difference being 1, 2 and 3.5 cents. In a few instances where the rates from both groups were made on St. Louis, Mo., the through rates are the same, Ranger having the same proportional as Burkburnett to that gateway. The attacked rates can not be found unreasonable, except to Brunswick. Although the record throws doubt upon the propriety of the relative adjustment as between the Ranger and Burkburnett groups to certain destinations, particularly where the rates make through Vicksburg, it seems impracticable to attempt to deal with these situations in advance of disposition of the general investigation. In the meantime there is no apparent necessity for requiring the establishment of joint rates. Furthermore, although the principal basis of complaint is the relationship between the assailed rates from the Burkburnett group, violation of section 3 is not alleged, but only in respect of the rates from south Texas and from the Shreveport district. HELD, assailed rates not unreasonable or otherwise unlawful, except that the through rate to Brunswick unreasonable to extent it may exceed 58.5 cents, reparation awarded. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707.

(k) Commission can not readjust rates merely in order to equalize market

competition. Virginia Pig Iron Asso. v. C. & O., 128 I. C. C. 737, 740.

III. EFFECT OF EQUALIZATION.

§8. **Adjustment of Related Rates.**

See Relative Rates.

(a) In Galveston Commercial Asso. v. G. H. & S. A. Ry., 128 I. C. C. 349 the Commission prescribed rate relationships between Galveston and other Texas ports on the one hand, and New Orleans, La., on the other, in respect of certain traffic in import, export or coastwise movement from and to points in southern Kansas, Arkansas, Oklahoma and Texas. It is apparent that the publication of higher rates on export, import, or coastwise traffic than on domestic traffic from and to the same points would precipitate a rate situation which it is desirable to avoid. HELD, the Commission shall interpose no objections to compliance with the orders in these cases with respect of import, export and coastwise traffic without observing the southwestern rates as maxthe rates so published in accordance with ima, provided that a further revision in the above quoted requirement in the report on further hearing be made concurrently with the revision of the domestic rates in compliance with the Consolidated Southwestern cases. Galveston Commercial Asso. v. G. H. & S. A. Ry., 132 I. C. C. 95.

I. BURDEN OF PROOF.

§1. In General.

See Advanced Rates §3; Blanket Rates §16; Burden of Proof; Crimes §25; Discrimination §14; Long and Short Hauls §12 (1); Loss and Damage §15; Routing and Misrouting §8; Through Routes and Joint Rates §15; Undercharges §5; Weights and Weighing IV.

(a) Mere statements of opinion that certain rates are believed to be compensatory are as insufficient as similar statements would be that certain rates, challenged as unreasonable, are regarded as reasonable. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 584.

(b) In an issue, provable by a preponderance of the evidence, as between two parties, one of whom alleges an affirmative which it establishes by the best obtainable evidence and the other of whom introduces no evidence but rests its case solely upon the alleged insufficiency of its adversary's showing, the doubt, if there be a doubt, must be resolved in favor of the former. Wertheim Coal & Coke Co. v. L. V. R. R., 112 I. C. C. 513, 518.

(c) Where a statute of limitations is of general application the burden of showing that it does not apply to a particular case is usually on the party who denies the bar of the statute. 17 Ruling Case Law, 1004. Krauss Bros. Lbr. Co. v. Director General, 112 I. C. C. 117, 118.

(d) Proposed restriction to transcontinental routing of the application of the transcontinental Deming, N. Mex., rates as maxima on grain and related articles from defined territories to all destinations in Texas found not justified. Carriers merely referred to inconsistent routing provisions, their history and results, and some of the out-of-line hauls which are or may be made under present tariffs, but did not seriously attempt to justify reasonableness of resulting rates. While they should be permitted, even encouraged, to eliminate wasteful transportation, in seeking, as here, to disrupt a rate adjustment of long standing they must show that resulting rates will be reasonable, and will not result in other violations of the act. This burden carriers have failed to sustain. Grain and Related Articles, 113 I. C. C. 195.

(e) While a traffic test which furnishes evidence as to the level of existing rates on a particular class of traffic is entitled to weight in arriving at maximum reasonable rates it is not controlling. Fertilizers between Southern Points, 113 I. C. C. 389, 419, 420.

(f) Rates on fiber furniture, l. c. l., from Columbia, S. C., to points in southern classification territory, found not unjustly discriminatory or unduly prejudicial. Other than general statement to effect that complainants meet competition in the sale of their product with manufacturers at Winston-Salem and Siler City, N. C., there was no showing as to extent of competition met from those points. Mere reference to lower rates to common points of destination is not sufficient to establish undue preference and prejudice. South Carolina Penitentiary v. A. & R. R. R., 113 I. C. C. 584.

(g) The statutory burden rests upon defendants to establish the reasonableness of rates increased since Jan. 1, 1910. American Door & Mfg. Co. v. B. & O. R. R., 122 I. C. C. 471, 472.

(h) There is no statutory burden upon carriers to prove character of a commodity where question in issue is legality of rates under section 6 of the act. Fraser v. A. C. L., 122 I. C. C. 520, 526.

(i) Defendant urged that complainant has failed to establish the unreasonableness of that rate. The burden is on defendant to establish the reasonableness of that rate. Chicago Carton Co. v. N. Y. C. R. R., 126 I. C. C. 457, 459.

(j) It is not a defense to say that revision of rates assailed will necessitate revisions in rates from or to other points and on other products, for correction of one unlawful rate adjustment can not be defeated simply because it may necessitate changes in other rates. Southwestenr Millers' Leagus v. A. T. & S. F., 126 I. C. C. 23, 30.

(k) The burden of establishing the reasonableness of a rate charged rests upon carriers. Chicago Carton Co. v. N. Y. C., 126 I. C. C. 457, 459.

(l) As a prerequisite to the commission's approval of rates under section 1 of the act it is only necessary for carriers to show, as it is in all suspension proceedings where the commission approves rate changes, that rates are with-

in the limits of reasonableness, i. e., not more that reasonable maxima nor less than reasonable minima. Federated Metals Corp. v. C. R. R. Co. of N. J., 126 I. C. C. 703, 709.

(m) Burden of proof is upon complainant to show that rates charged were inapplicable. Nebraska Bridge Supply & Lumber Co. v. A. G. S., 128 I. C. C. 94, 96.

(n) Violation of section 1 is alleged, and the burden rests upon defendants to justify the reasonableness of the rates attacked. Michigan Bean Co. v. D. G. H. & M. Ry., 128 I. C. C. 207, 209.

(o) The burden is upon defendants to justify the reasonableness of rates increased since Jan. 1, 1910. Republic Creosoting Co. v. A. G. S. R., 128 I. C. C. 547, 550.

(p) The burden is upon the carriers to establish the reasonableness of the rate attacked. Bakeries Service Corp. v. B. &. M. R. R., 128 I. C. C. 695, 696.

(q) Under the act, section 15, paragraph (7), as amended, the burden of proof to show that the proposed rates are just and reasonable is upon respondents, and this is especially true where, as here, the commodities affected are the products of agriculture. Fruits and vegetables between Pacific coast states, 129 I. C. C. 569, 570.

II. CIRCUMSTANCES AND CONDITIONS OF PROBATIVE VALUE.

§1½. In General.

See Advanced Rates§18; Blanket Rates §18; Divisions §7; Equalization of Rates II; Long and Short Hauls §12; Procedure Before Commission VII, VIII; Reasonableness of Rates II; Reparation III.

(a) Rates proposed by carriers must be shown to be not only reasonable but otherwise lawful. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35, 47.

(b) Unreasonably high rates may not be maintained in order to control routing of traffic. Arbogast & Bastian Co. v. L. V., 107 I. C. C. 105, 108.

(c) Revenues are derived, not from rates alone, but from traffic. Hunter Bros. Mercantile Co. v. Am. Ry. Exp. Co., 107 I. C. C. 313, 318.

(d) Carriers may accord rates which commission may not require, and their doing so does not of necessity afford a criterion for testing propriety of their refusal to accord similar treatment to other commodities, under other conditions, or in other territories. See 23 I. C. C. 432, 437. Western Paper Makers' Chem. Co. v. A. A. R. R. Co., 109 I. C. C. 133, 137.

(e) Shippers, in opposing a proposed revision in rates or an individual commodity, estimated the annual increase in revenue which would be produced thereby, and introduced evidence to show increased prosperity of carriers with a view to showing that they were not in need of this additional revenue. HELD: Such evidence is of little or no force in determining the propriety of rate level on an individual commodity. See 263 U. S. 456, 482. Bananas from Gulf Ports, 109 I. C. C. 211, 219.

(f) To require cotton produced in a vast area to move long distances in an uncompressed condition constitutes wasteful transportation not in the interest of economical operation, it being general practice throughout the Cotton Belt to permit or require concentration and compression at first convenient compressing point en route to destination in line of movement for traffic. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(g) The commission has repeatedly condemned carriers for adjusting their rates and practices so as to impede or stifle movement of commodities in any given direction. See 96 I. C. C. 359, 362, and cases there cited. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(h) Where a carrier introduces evidence entirely beyond scope of the proceeding, in an endeavor to establish that certain statements in a report of commission were incorrect, such evidence can not be considered where objected to by complainant. Northern W. Va. Coal Asso. v. P. R. R., 109 I. C. C. 604, 608.

(i) Mere fact that application of a shipper for a specific rate on a specific commodity was not made in advance of a movement is no justification for charging an unreasonable rate. Tamms Silica Co. v. C. & N. W., 109 I. C. C. 618, 620.

(j) Railroad facilities of the country have proved capable of handling increased traffic without appreciable car shortages and with greater expedition

and reliability than in previous years. Revenues in Western District, 113 I. C. C. 3, 20.

(k) Commission's decision involving rates on a particular class of traffic can not properly be predicated solely upon an attempt to average existing rates and maintain revenues of carriers. It is commission's duty to determine what are maximum reasonable rates and to prescribe such rates, whether the effect be to increase or reduce carrier's earnings. Fertilizers between Southern Points, 113 I. C. C. 389, 419.

(l) Based upon sound economic grounds fertilizer is a commodity which should be leniently treated in distributing the burden of freight transportation. The need for continued progress in use of this commodity is so great and degree of its use is so dependent upon financial considerations that all burdens associated with its use should be made as light as possible. Fertilizers between Southern Points, 113 I. C. C. 389, 421.

(m) The act contemplates that carriers shall receive just and reasonable compensation for transportation service rendered by them. It does not contemplate that they shall participate in transportation without any charge, and it certainly does not permit or require such transportation at less than no charge. Such a result is wholly repugnant to the letter and spirit of the law, and when it is sought to be accomplished it is to be condemned. The commission's power under the law is ample to deal with cases of this kind and commission would be derelict in its duty if it did not intervene to prevent unwarranted dissipation of carrier revenue regardless of where the responsibility lies. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597, 605.

(n) An isolated shipment of limestone rock from Margerum Ala., to Dallas, Tex., to be used for street paving, moved to Memphis, Tenn., at commodity rate applicable on broken stone, and at commodity rate applicable on paving stone, rough quarried, beyond. Upon contention that broken or crushed stone rate should have applied over entire route, using scale prescribed in 77 I. C. C. 473, HELD: Scale basis sought was not prescribed to apply to Texas common points and its extension to that territory from New Orleans on paving and roofing materials was denied in 102 I. C. C. 31, being found too low for application between those points. Moreover as class rates are ordinarily assessed on sporadic movements, charges collected under commodity rates in instant case were not unreasonable. Florence Chamber of Commerce v. S. Ry., 118 I. C. C. 7.

(o) No matter how numerous the territories are to which shippers have access, they are entitled to ship their products to any market at nonprejudicial rates. See 98 I. C. C. 488. Clinchfield Coal Corp. v. C., C. & O., 118 I. C. C. 79, 81.

(p) Piecemeal revision of rates is not desirable except in unusual circumstances. Horses and Mules from Chicago, 120 I. C. C. 607, 610.

(q) Any advantage in rates enjoyed by one manufacturer over others greater than warranted by distance and transportation conditions results in undue commercial advantage to the favored manufacturer and wrongfully restricts the profits or trade of the other manufacturers subject to relatively higher rates. Consolidated Southwestern Cases, 123 I. C. C. 203, 318.

(r) The propriety of departing from a uniform scale of rates applicable throughout a wide territory can not depend upon whether particular movements are switching or road-haul service. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337, 346.

(s) In arriving at the rates on cement prescribed in Western Cement Rates, 48 I. C. C. 201; 52 I. C. C. 225; 69 I. C. C. 644; and the related rates prescribed in various other cases, the commission has not been controlled by the general level of rates on other commodities, whether switching or line haul, but rates prescribed have been made with special regard to the conditions surrounding transportation and marketing of that particular commodity with the view to establishing, and securing the maintenance of, general levels of rates in and between the several scale territories not only reasonable per se as applied to that commodity but under which the rates from competing producing points are related to each other with close regard to distance. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337, 347.

(t) While it is of importance to consuming public that access be had to the

greatest possible number of mines, especially in times of emergency, where distances over a number of routes are unduly circuitous, fairness demands that such routes be disregarded in determining upon a basis for fixing reasonable rates for application over routes which are not unduly circuitous. Anthracite Coal Investigation, 122 I. C. C. 527, 535.

(u) Carriers participating in circuitous routes under similar circumstances and conditions may reasonably expect to charge higher rates than over the short route, but extent of such circuity which would justify a difference in rates may depend upon methods of construction. Where grouping is extensively employed at both origin and destination, and where reasons of sound public policy exist for treating rates and routes collectively rather than individually, substantial differences in distance over routes whose use public convenience and necessity require may reasonably be disregarded; but fact that rates are to be applicable over such routes must be given due weight in fixing their level. Anthracite Coal Investigation, 122 I. C. C. 527, 536.

(v) It is the commission's duty to prescribe maximum reasonable rates and to remove any existing undue prejudice and preference of which complaint is made. It is not the commission's province to require circuitous or more expensive routes to meet rates of shorter or less expensive routes. However, in fixing rates by any route, the commission may give consideration to the rates of other routes and attempt to devise an adjustment which on the whole will provide reasonable rates and at same time, as nearly as may be, permit various routes to engage in the traffic where they so desire. Consolidated Southwestern Cases, 123 I. C. C. 203, 374.

(w) A rate from one point to another does not contemplate movement beyond destination and back again. Arnold & Co. v. S. Ry., 126 I. C. C. 141, 143.

(x) Circumstances and conditions under which freight rates on perishables were established between Boston and Chicago and conditions affecting divisions of such rates are substantially different from those affecting establishment of rates on milk for application within New England territory, and, aside possibly from some incidental features in connection with so-called fast-freight service, the services are not comparable. Furthermore, divisions from perishable-freight traffic received by some of the New England roads do not afford a sound basis upon which to judge reasonableness of rates on milk throughout New England. Milk and Cream Between New England Points, 126 I. C. C. 38, 63.

(y) Rates on pig iron between points in c. f. a. territory are not constructed upon any scientific basis, but have been established from time to time to keep pace with growth of pig-iron industry. Pig Iron in C. F. A. Territory, 126 I. C. C. 111, 124.

(z) Rates in general are ordinarily lower between Memphis and the Southeast than between Ohio River cities and the same territory. Fruits and Vegetables to Memphis, 126 I. C. C. 226, 228.

(aa) Protestants objected to consideration of certain testimony in original record on ground that it was "relevant, competent, and material" only to intrastate rates and that that portion pertaining to interstate rates was not segregatedand again offered atsecond hearing, asserting that they were thus deprived of such testimony and were left in ignorance of evidence to be considered. HELD: Even if testimony received at original hearing should not properly be considered in determination of interstate rates, counsel making objection did not demand segregation of that testimony prior to rendition of previous report and at last oral argument stated that he did not even then move to strike such testimony. Moreover, commission's attention is not directed to any testimony which is not relevant and material to issues involved. Lignite coal from North Dakota, 126 I. C. C. 243, 245.

(bb) Contention that rates on grain and products from origin points on specified lines in Idaho, Montana, Oregon, Utah, Wyoming, and Colorado, to destinations in California and the Pacific Northwest, higher than contemporaneous rates for like distances from Montana points of origin to same destinations, result in undue prejudice and preference, not sustained. Record is not convincing that transportation conditions are as favorable from origin territory here involved to the north Pacific coast as from the lower rated Montana points.

Moreover, low rates from Montana points were established to meet competition with Canadian lines and record does not warrant a finding that competition at north Pacific coast markets between shippers in origin territory involved and Montana shippers is as severe as that at same markets between Montana and Canadian shippers. Ogden Grain Exchange v. A. E. R. R. Co., 126 I. C. C. 255, 270, 271, 281.

(cc) It is no part of commission's duty to canvass and compare social and economic conditions surrounding a particular industry with a view to adjusting rate structure to them. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 359.

(dd) Mere admission of matter which, under rules of evidence applicable to judicial proceedings, would be deemed incompetent, does not invalidate order of Interstate Commerce Commission. Western Paper Makers' Chemical Co. v. United States, 46 Sup. Ct. 500.

(ee) Invoices alone are not sufficient to establish the character of the commodity or determine the rates applicable. Glarner & Co. v. Southern Ry., 129 I. C. C. 75, 76.

(ff) In view of the Interstate Commerce Act prescribed rate may consist of variety of elements, such as character of the commodity to be transported, distance of carriage, privileges and facilities accorded, and rules and regulations accompanying tariff, or imposed by the commission and in order to find the rate all elements which produce it must be taken into account. Lothrop v. Spokane, P. & S. Ry. Co., 10 Fed. (2d.) 225.

§2. Advance of Location.

See Blanket Rates §7; Discrimination §9; Equalization of Rates §3; Reasonableness of Rates §19.

(a) Other things being equal, a city with a maximum of efficient railroad service has advantages over one with restricted service, no matter how efficient that restricted service may be. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 228.

(b) While shippers are entitled to benefits of their location, shippers at other points may not be denied the right of access to markets at rates that are reasonable and free from undue prejudice and preference. Western Indiana Gravel Co. v. N. Y., C. & St. L., 109 I. C. C. 727, 730.

(c) Rates on grain from points in northern Illinois and southern Wisconsin on certain lines of the Illinois Central and C., B. & Q. railroads to Chicago, Ill., district, and on feed in reverse direction, found not unreasonable or unduly prejudicial as compared with rates on those commodities from same origin points to other Illinois, Missouri, Indiana, Kentucky, and Ohio destinations. Disadvantage of Chicago district is primarily one of location, shippers there located seeking to market feed against the flow of the ingredients, in competition with manufacturers shipping with it. Moreover, rates assailed are for most part local rates, and under circumstances of this case their reasonableness may not be tested by comparisons with proportional rates, and fact that local rates on feed lower than on grain are maintained to a few points is not convincing that same basis should be extended to all points. Chicago Board of Trade v. C., B. & Q., 113 I. C. C. 295.

(d) In seeking a location for a jobbing house or factory one of the first things considered is the freight-rate situation. Consolidated Southwestern Cases, 123 I. C. C. 203, 211.

§3. Agreed Facts, Admissions and Agreements.

See Reparation §17.

(a) Burden is with carriers to make and promulgate their rates and charges. Lothrop v. Spokane, P. & S. Ry. Co. 10 Fed. (2d.) 225. Same v. Oregon-Washiington R. & Nav. Co. 10 Fed (2d.) 225. Same v. Southern Pac. Co., 10 Fed. (2d.) 225.

§4. Averages.

See Blanket Rates §15½ (j) (r).

(a) While reasonableness of any given rate can not be measured solely by comparing its earnings with average earnings on all traffic, comparisons of this kind are not entirely without significance in a case where commission is called upon to determine proper rating on an article for application throughout a widespread region. Nat'l. Council of Furniture Assos. v. A. A., 112 I. C. C. 289, 297.

(b) Commission's decision involving

rates on a particular class of traffic can not properly be predicated solely upon an attempt to average existing rates and maintain revenues of carriers. It is commission's duty to determine what are maximum reasonable rates and to prescribe such rates, whether the effect be to increase or reduce carriers' earnings. Fertilizers between Southern Points, 113 I. C. C. 389, 419.

(c) For obvious reasons, the average earnings of all carriers, based as it is on an average short haul and embracing local as well as proportional traffic, can not be used as a measure for proportional rates proposed. Grain and grain products, 115 I. C. C. 153, 162.

(d) The Commission has frequently commented upon the fallacy of attempting to measure the reasonableness of rates on particular commodities by comparing the earnings on such commodities with the earnings on all traffic. Cotton linters from Southwest, 118 I. C. C. 419, 430.

(e) In many cases in which rates have been attacked as unreasonably high the Commission has called attention to the impracticability and impropriety of measuring rates on low grade traffic by a comparison of ton mile earnings thereunder with the average earnings on all traffic. Ex lake Iron ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(f) If the Commission were to accept the theory that rates on all low grade commodities should be reduced solely if and because they produced a higher revenue than the average of all freight such a reduction would result in a lowering of the average which, in turn would require a further reduction in the rates on the low grade commodities, and this theory could be extended ad infinitum. Conversely, to hold that rates are unreasonably low because they afford ton mile earnings less than those on all traffic would lead to similar circle of increases. The Commission has also had occasion to point out in previous cases that car mile and train mile statistics are in general criteria of greater significance than ton mile figures in judging the reasonableness of rates on heavy, low grade commodities moving in large volume. Ex lake iron ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(g) If the commission accepted the theory that rates on all low-grade commodities should be reduced solely if and because they produced a higher revenue than average of all freight, such a reduction would result in a lowering of the average which, in turn, would require a further reduction in rates on the low-grade commodities, and this theory could be extended ad infinitum. Conversely, to hold that rates are unreasonably low because they afford ton-mile earnings less than those on all traffic would lead to similar cycle of increases. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(hi) The commission knows of no fairer method of comparing distances than average short-line distances. Fox Paper Co. v. A., T. & S. F., 122 I. C. C. 399, 403.

(j) The reasonableness of group rates must be judged by average conditions. Aberdeen Commercial Club v. C. P. R. R., 126 I. C. C. 498, 506.

(k) The average earnings and hauls on all traffic and on "other ores and concentrates" include those accruing to individual lines from divisions of joint rates for through movements. The Commission has repeatedly said that such comparisons are of little value in considering the reasonableness of joint rates on a particular commodity between particular points. United Zinc Smelting Corp. v. B. & O. R. R., 126 I. C. C. 677, 686.

(l) No satisfactory conclusion can be formed as to the reasonableness of the charges on these shipments by comparing them with the average charge on all freight. Brownell & Field Co. v. N. Y. N. H. & H. R. R., 132 I. C. C. 599, 601.

§5. Basing-Point System.

See Basing Points and Lines.

(a) In referring to the contention that combination rates should be charged on interline traffic such a distinction between single line and interline movements is inconsistent with, and would be destructive of, the principle of a transportation system well co-ordinated nationally which now prevades the act. Any thorough going application of the combination rate theory would fill the country with barriers against the free movement of commerce and create artificial advantages for certain communities and artificial disadvantages for many more. Oklahoma Millers League v. A. & M. R. R., 128 I. C. C. 523, 529.

(b) A complicated situation exists

along the border line between any two rate territories subject to rate levels as different as those that exist in case of class rates in official and southern territories. However, there must be a border line somewhere. Generally speaking, the Ohio River is the natural boundary between the two territories and should be the boundary determining the application of official and southern classifications. Southern Class Rate Investigation, 128 I. C. C. 567, 585.

§8. Car-mile or Train-mile Revenue.

See Classification §5 (b); Reasonableness of Rates §6.

(a) Car-mile revenue is often employed as a basis for comparison of c. l. rates, but is obviously improper for comparison of l. c. l. shipments which move at a flat charge to scattered destinations in small individual lots or parcels. Newspapers in Baggage Cars, 104 I. C. C. 527, 532.

(b) Determination of reasonableness or unreasonableness of rates is not a matter of mathematical computation, but involves exercise of an informed judgment. It can scarcely be said with any degree of accuracy that comparison of car-mile earnings under rates on one commodity computed on same weight is lacking in probative value. There is no fixed scale of progression or regression with changing distances for earnings per mile. Furniture from Southern Points, 112 I. C. C. 302, 309.

(c) Both ton mile and car earnings are significant and entitled to consideration in rate comparisons. Fertilizers between Southern Points, 113 I. C. C. 389, 402.

(d) Owing to differences in bulk and weight there must of necessity be marked variations in the revenue per car produced by articles in the same and other classes, and a disparity either way is not conclusive of the propriety of an adjustment. El Paso Compress & Fumigation Co. v. M. P. R. R., 115 I. C. C. 166, 167.

(e) The fact that car earnings under the rate attacked exceed those on certain other unrelated commodities does not of itself tend to show unreasonableness. United Paperboard Co. v. C. & E. R. R., 120 I. C. C. 27, 30.

(fg) Car-mile and train-mile statistics are in general criteria of greater significance than ton-mile figures in judging reasonableness of rates on heavy, low-grade commodities moving in large volume. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(h) Operating costs do not increase in proportion with increase in car loading, as increase in cost on this account is in fact relatively small. While both ton-mile and car-mile yields merit consideration in determining reasonableness of rates, the latter are of more significance in case of heavy-loading commodities. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 505.

(i) The average car-mile earnings of all Class I railroads in Texas for 1921 were 40.27 cents, which would be 36.244 cents, if reduced 10 per cent under general reduction of 1922. Oklahoma Portland Cement Co. v. D. &. R. G. W., 128 I. C. C. 63, 81.

(j) Average freight revenue per loaded-car mile of all c. l. and l. c. l. traffic handled by Class I railroads during 1923 was 31 cents in the eastern district and 25 cents in the southern district. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445, 451.

(k) Both the commission and the courts have repeatedly referred to a flexible limit of judgment in reaching a conclusion as to the reasonableness of a rate or a schedule of rates. Otherwise stated, there is a zone of reasonableness within which any rate is just and reasonable to the carrier as well as just, fair and reasonable to the shipper that utilizes the carriers services. Calif. Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, 34.

§10. Combinations to Fix Rates.

(a) Having regard for difference in structure of freight and express classifications, commission can not predicate a condemnation of freight rate for light and bulky articles solely upon a showing that express rates are lower between some points. Parlor Frame Mfrs. Asso. v. A. A. R. R., 118 I. C. C. 154, 155.

§11. Comparison of Classifications or Rate Territories.

See Classification; Comparative Rates.

(a) Due chiefly to difference in traffic density, a higher rate level prevails generally in the Southwest than in c. f. a. territory. West Coast Lumbermen's Asso. v. A. & S., 104 I. C. C. 695, 699.

(b) The commission can not assent to a proposition that a rate level in official classification territory lower than in southern and western territories can properly be offset by establishment of higher classification ratings in lower-rated territory. Classification of Radio Sets and Talking Machines, 107 I. C. C. 175, 177.

(c) Transportation conditions in c. f. a. territory are dissimilar to and more favorable than those in southern territory. Knoxville Iron Co. v. L. & N. R. R., 107 I. C. C. 627, 631.

(d) The rates from midcontinental fields to northern Nebraska, South Dakota and northern Minnesota, lying west of a line extending from Duluth, Minn., through Sioux Falls, are relatively higher than those to the remainder of western trunk line territory. The traffic and other conditions therein have been recognized in the past as warranting a somewhat higher level of rates than obtains in other portions of western trunk line territory. Midcontinent oil rates, 1925, 112 I. C. C. 421, 447.

(e) The level of rates generally in the east is lower than in western trunk line territory, due to the more favorable transportation conditions. Midcontinent oil rates 1925, 112 I. C. C. 421, 457.

(fg) Local and joint class rates between points in Arizona, on the one hand, and points in California, New Mexico, and El Paso, Tex., on the other hand, found unreasonable. Rates assailed are materially higher than those prescribed in 21 I. C. C. 640, and 74 I. C. C. 207, for application in the Pacific Northwest and at present in effect throughout the northern half of the Mountain-Pacific group. Operating and transportation conditions in territory here under consideration compare favorably with those in much of the territory in which the lower rates apply. Temporary scale of distance rates prescribed which will accord the Pacific Southwest substantially same scale of rates as now applies in the Pacific Northwest. Arizona Corp. Commission v. A. E., 113 I. C. C. 52.

(h) As to certain commodities, rates in Southeast are as a whole on a lower level than rates in Southwest. Fletcher-Wilson Coffee Co. v. L. & N., 113 I. C. C. 319, 321.

(i) More favorable transportation conditions and greater traffic density north of the Ohio river warrant a lower level of rates in that territory than in the south. Fertilizers between Southern Points, 113 I. C. C. 389, 398.

(j) Sixth class is relatively a much lower class in central than in southern territory, and the class rates are better adapted in the former than in the latter to the movement of carload traffic in volume. Fertilizers in Southern Territory, 113 I. C. C. 389, 400.

(k) It has been generally recognized for years that transportation conditions in the southeast do not warrant any higher basis of rates than in the southwest, and rates in the southeast are in many cases lower than in the southwest. Fertilizer materials between southern points, 113 I. C. C. 389, 403.

(l) A careful study of the statistics while showing in some instances marked differences in individual items, leads to the conclusion that, considering all the figures together, a uniform scale of rates could with propriety be applied throughout southern Missouri, Oklahoma, Arkansas, Louisiana and common point territory in Texas. The evidence indicates that Arkansas and Oklahoma and southern Missouri are a homogeneous rate region and that transportation conditions would seem to dictate in general the observance therein of a uniform distance scale. Oklahoma Traffic Asso. v. A. G. S. Ry., 113 I. C. C. 635, 641.

(m) Intervener introduced an exhibit showing that for the year 1923 freight operating expenses in the southern district were lower than in the western or eastern district. Such a showing can hardly determine the proper measure of a rate on a single kind of commodity. Sterchi Bros. v. G. N. Ry., 113 I. C. C. 665, 666.

(n) Commission has recognized that usually transportation conditions in the southwest warrant a somewhat higher basis of rates than in the southeast, and that fact may be judicially noticed. United Fig & Date Co. v. A. C. L. R. R., 115 I. C. C. 643, 645.

(o) The transportation conditions in western Louisiana, Arkansas and southern Missouri are substantially the same. Description of Missouri group B territory, 118 I. C. C. 119, 120.

(p) Rates maintained or prescribed

for application in or to the Mississippi valley can not be used as a gauge for reasonable maximum rates in or to the southeast. Bradley & Woertz v. I. C. R. R., 118 I. C. C. 233, 235.

(q) As is quite commonly known, the general level of class and many commodity rates in the south, mainly because of the comparatively light traffic density, is considerably higher than in the territory north of the Ohio and Potomac rivers. Utah-Idaho Sugar Co. v. C. R. I. & P. Ry., 118 I. C. C. 256, 258.

(r) The Commission has previously recognized that the level of the rates in Mississippi valley territory is lower than in southeastern territory. Florence Chamber of Commerce v. A. T. & S. F. Ry., 118 I. C. C. 710, 712.

(s) Transportation conditions in the southeast do not warrant any higher basis of rates than in the southwest, and in many instances the rates are lower in the southeast than in the southwest. Capital Grain & Feed Co. v. I. C. R. R., 118 I. C. C. 732, 746.

(tuv) Operating conditions on line of the Southern Pacific from Los Angeles, Calif., to Curtiss, Ariz., are more favorable than those on the Southern Pacific from California points to Utah common points via Roseville, Calif. Severe weather conditions are encountered along latter routes, whereas weather conditions do not interfere with train operations on line from Los Angeles to Curtiss. Apache Powder Co. v. A., T. & S. F., 118 I. C. C. 457, 461.

(w) Transportation conditions throughout southern Missouri, Oklahoma, Arkansas, western Louisiana, and common-point territory in Texas are substantially similar. Import Iron and Steel from Gulf Ports, 118 I. C. C. 482, 487.

(x) Texas differential territory is recognized as a territory of comparatively light traffic density in which carriers require a higher level of rates than in Texas common-point territory to the east thereof. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 5.

(y) Rates from more sparsely settled and less well developed western portions of the Dakotas may properly be higher, relatively, than rates from the eastern portions. Grain and Products, 122 I. C. C. 235, 267.

(z) There is not now any sound reason why interterritorial shipments that cross the Mississippi or Ohio rivers should pay materially higher rates than intraterritorial shipments which do not cross one of those boundary lines. See 118 I. C. C. 601. Fox Paper Co. v. A., T. & S. F., 122 I. C. C. 399, 402.

(aa) Rates prescribed to the Mississippi Valley were not designed as standards of reasonable maximum rates but primarily to bring rates in harmony with fourth section, and at same time return to carriers substantially the same revenue as earned under adjustment theretofore maintained. Florence Chamber of Commerce v. I. C., 122 I. C. C. 653, 657, 658.

(bb) Rates west of the Mississippi River should be somewhat higher than east of the river. Crescent Bed Co. v. C., R. I. & P., 123 I. C. C. 41, 46.

(cc) Montana coal rates, as a rule, are on a somewhat lower level than those in other western States. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 105.

(dd) In so far as practicable, all rates, intrastate and interstate, should contribute in fair proportion to revenues of carriers. Therefore, in a general territory where traffic and operating conditions are substantially similar, the rates for given distances should be substantially same. Consolidated Southwestern Cases 123 I. C. C. 203, 211.

(ee) Transportation conditions throughout Southwest found to be substantially similar and not greatly less favorable than in Kansas, Nebraska, or southern Missouri. Consolidated Southwestern Cases, 123 I. C. C. 203, 215, 217.

(ff) In numerous cases commission has recognized that rates in the Southwest may properly be somewhat higher than in southern territory. Consolidated Southwestern Cases, 123 I. C. C. 203, 382.

(gg) All-rail class and commodity rates on various articles should be on same level throughout to Southwest and designated portions of Kansas-Missouri territory; and on standard-rail lines a single scale of first-class distance rates should be used as basis for maximum reasonable interstate rates within those areas. Consolidated Southwestern Cases, 123 I. C. C. 203, 382, 385, 386.

(hh) Transportation and traffic conditions in Texas differential territory

and in northwestern Oklahoma warrant higher rates than in Texas common-point territory or remainder of the Southwest. Consolidated Southwestern Cases, 123 I. C. C. 203, 389.

(ii) Rates in Florida are generally on a somewhat higher level than in other portions of the Southeast. Luten Bridge Co. v. A. C. L., 123 I. C. C. 612, 614.

(jj) Rates within the Southeast are generally higher than elsewhere in the country. See 112 I. C. C. 421. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 715.

(kk) Eastern and central Texas and Oklahoma are much alike as regards topography, railroad grades and curves, and climatic conditions, and railroad operating conditions are not of themselves sufficiently dissimilar to warrant a substantial difference in rate levels. See also 123 I. C. C. 203. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 70.

(ll) While the average traffic density is somewhat less in Texas as a whole than in Oklahoma and Kansas, such difference is not sufficient to warrant a level of rates on cement from the Kansas gas belt and Ada to points in eastern and central Texas substantially higher than in eastern Oklahoma. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 70, 71.

(mm) The transportation conditions throughout the southwest, embracing Arkansas, Oklahoma, Louisiana west of the Mississippi river, and Texas common point territory, and in western Kansas are substantially similar and not much less favorable than in Nebraska or in the remainder of Kansas Missouri territory, which embraces Kansas and southern Missouri. Oklahoma Portland Cement Co. v. D. & R. G. W. Ry., 128 I. C. C. 63, 74.

(nn) Rates in southwestern territory may properly be somewhat higher than rates for comparable distances in southern territory. Sugar between Louisiana and Texas Points, 128 I. C. C. 309, 316.

(oo) It is generally understood that comparatively little carload freight moves under class rates in southwestern territory. Boren Stewart Co. v. G. C. & S. F. Ry., 128 I. C. C. 493, 494.

(pp) While showing in some instances marked differences in individual lines, considering all the figures together, a uniform scale of rates could with propriety be applied throughout southern Missouri, Oklahoma, Arkansas, Louisiana and common point territory in Texas. Oklahoma Millers League v. A. & M. R. R., 128 I. C. C. 523, 535.

(qq) Recognition must be given to more favorable transportation conditions and lower class-rate level in official territory as compared with those in southern territory. Rates over routes partly through official territory lower than rates for same distances wholly within southern territory are not necessarily unduly prejudicial or preferential. Southern Class Rate Investigation, 128 I. C. C. 567, 575.

(rr) Where two territories in which rate levels and classifications vary widely, lie contiguous for long distances no plan of through rates can avoid some anomalous situations. Groups constitute a practical way of avoiding many of the difficulties and where this method is impracticable without undue sacrifice of revenue, the situation may be met, either by appropriate fourth-section relief or by establishment of rates over certain of the higher rated routes that conform to the fourth section but do not in all cases meet the rates of lower-rated routes to and from relatively unimportant competitive points. Southern Class Rate Investigation 128 I. C. C. 567, 577.

(ss) In the ordinary situation little is gained by comparing rating of a commodity in one classification with rating for same commodity in another classification when rating in neither classification has been fixed by us. However, the correctness of the principle of classification uniformity is well established. That principle presumes that if ratings on any given commodity in two classifications, as official and southern, are on the proper basis, the ratings will be substantially the same. If they are different there is presumptive error in one or both classifications. Kalamazoo Vegetable Parchment Co. v. C., K. & S., 128 I. C. C. 675 681.

(tt) Transportation conditions throughout southern Missouri, Arkansas, Louisiana west of the Mississippi river, Oklahoma and Texas common point territory warrant the same level of rates. Leggett & Platt Mfg. Co. v. A. T. & S. F. Ry., 129 I. C. C. 219, 222.

(uu) Generally, rates in official classification territory are on a lower basis

than in southern territory, or from southern territory to official territory. The reverse is true, however, on some of the heavy moving commodities. Jackson v. M. C. Ry., 129 I. C. C. 235, 239.

(vv) Transportation conditions in Illinois are not materially different from those in the territory east of the Illinois-Indiana state line, and a lower level of rates in Illinois than in central territory generally is not justified. Soap and soap powder, 129 I. C. C. 392, 394.

(ww) The rates shown are substantially higher than the rates which respondents seek to cancel, but western territory is generally higher rated than central territory. Straw to Indiana and Ohio, 132 I. C. C. 85, 87.

(xx) In southeastern territory the general level of rates is higher than in either central or trunk line territories. Tidal Western Oil Corp. v. M. K. T. R. R., 132 I. C. C. 681, 683.

§12. Comparison or Character of Commodity.

See Advanced Rates §5 (3); Classification §3½, §17, §18; Comparative Rates; Reasonableness of Rates §7½.

(a) Rates on whisky in glass, in barrels or boxes, found not unreasonable as compared with rates on drugs, medicines, and chemicals, which do not require special policing and protection accorded shipments of whiskey transportation of which under present conditions is a source of annoyance and unusual expense to carriers. Green v. A., T. & S. F., 104 I. C. C. 24.

(b) Meats, cured, and hides, green-salted: Rates on cured meats, packed, and green-salted hides from Chicago and other c. f. a. packing points, including Mississippi River points, St. Louis to Dubuque, to destinations in trunk-line and New England territories, found not unreasonable or unduly prejudicial in relation to contemporaneous rates on hogs and sheep in double-deck cars, or on cattle from and to same points. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 135.

(c) Meats, dried, dry-salted, smoked, and pickled: Rates on, loose, from Chicago and various other packing points to destinations in trunk-line territory east of Buffalo-Pittsburgh line and to New England territory found unjust and unreasonable for future to extent they exceed contemporaneous rates on cured meats and packing-house products packed, from and to same points. Reasonable rates prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 136, 137.

(d) Sulphuric acid: Rates on, found not unreasonable as compared with rates on coal-tar pitch, caustic potash, coal tar, lignin liquor, and lignin pitch. Royster Guano Co. v. M. C., 104 I. C. C. 151.

(e) Rates on broom handles found unreasonable to extent they exceeded rates 1.5 cents over those contemporaneously maintained on lumber. Reasonable rates prescribed for future and reparation awarded. Deshler Broom Factory v. A., T. & S. F., 104 I. C. C. 183.

(f) Zinc skimmings, dross and ashes: Rates on zinc skimmings, zinc sal-ammoniac skimmings, and zinc dross and ashes, found not unreasonable as compared with rates on spelter, zinc ore, and various other commodities. Falcon Zinc Co. v. M. P., 104 I. C. C. 267.

(g) Rates on empty tight wooden barrels and kegs from St. Louis to Los Angeles found not unreasonable. Carmile earnings do not compare unfavorably with those under rates on numerous articles. Empty wooden barrels and kegs are light articles and generally move under class rates, and fact that carriers in certain territories have seen fit, under exceptions to classification, to apply lower bases to encourage movement can not be taken as a measure of reasonable rates. Cocoa-Cola Co. v. A., T. & S. F., 104 I. C. C. 377.

(h) Rosin is desirable traffic. It is not injured by water and may be transported in inferior box-car equipment. The loading is comparatively heavy and damage claims are rare. Vera Chemical Co. v. A. C., 104 I. C. C. 408, 411.

(i) Rate on leather, split, found not unreasonable as compared with rates on various other kinds of leather. Griess-Pfleger Tanning Co. v. E., J. & E., 104 I. C. C. 464.

(j) Rates on wooden bull-wheel arms, cants, and pins, found unreasonable to extent they exceeded contemporaneous rates on lumber, it not being shown that rates on latter are below general level of lumber rates in immediate territory. See also 59 I. C. C. 751 and other cases cited. Reasonable rate prescribed for future and reparation awarded. Marion Ma-

chine, Foundry & Supply Co. v. P. R. R., 104 I. C. C. 471.

(k) Rates on unfermented grape juice, in bulk, in barrels, found unreasonable and unduly prejudicial to extent they exceed rates contemporaneously in effect on same commodity, in glass, in boxes. Reasonable rates prescribed and reparation awarded. Joseph v. O.-W. R. R. & N. Co., 104 I. C. C. 477.

(l) Following 74 I. C. C. 567, rates on stucco mix, magnesium chloride, and crushed-rock dash, articles constituting a complete commodity, viz., magnesite stucco, and shipped in separate packages in same car, found unreasonable to extent they exceeded lower rate on "stucco" commodities here shipped falling within that general description. Reasonable rate prescribed for future and reparation awarded. Rocbond Co. v. A., T. & S. F., 104 I. C. C. 517.

(m) Internal-combustion engines and related commodities: Rates on, found not unreasonable as compared with rates on valves and other pipe fittings, oil-well supplies, agricultural implements, and other similar commodities. Lone Star Gas Co. v. A., T. & S. F., 104 I. C. C. 623.

(n) Rates on sand and gravel from points in western Pennsylvania to destinations in Ohio, West Virginia, and New York, found unreasonable and unduly prejudicial to extent they exceed rates contemporaneously maintained on slag and crushed stone. Reasonable and nonprejudicial scale of distance rates prescribed for future. Penn. Sand & Gravel Prod. Asso. v. B. &. O., 104 I. C. C. 717.

(o) Rates on flaxseed from South Dakota points to Minneapolis, Duluth, Chicago, Milwaukee, Des Moines, Omaha, and Kansas City, found unreasonable to extent they exceed contemporaneous wheat rates from and to same points by more than 12 per cent.Reasonable rates prescribed for future. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35.

(p) Limestone, agricultural: Rates applicable on crushed stone, assessed on agricultural limestone from Buffalo, Iowa, to Illinois destinations, in absence of specific rates on latter commodity, found unreasonable to extent they exceeded subsequently-established specific joint commodity rates on agricultural limestone having value for purposes of soil treatment only. Reparation awarded. Dolese Bros. Co. v. C., R. I. & P., 107 I. C. C. 127.

(q) Pulp wood: Applicable rate on sporadic shipments of pulp wood found unreasonable as compared with, and to extent it exceeded, rate on wood pulp, the manufactured product of pulp wood. Reparation awarded. Watab Paper Co. v. N. P., 107 I. C. C. 131.

(r) Gasoline and kerosene: Rates on, from Gates to Port Arthur, Tex., for export, found not unreasonable as compared with rates on various other commodities for same distance in same territory. Texas Co. v. T. & P. Ry., 107 I. C. C. 147.

(s) Lamp globes, glass, lettered: Class rates applicable on, in boxes, l. c. l., found unreasonable to extent they exceeded lower contemporaneous commodity rate on unlettered glass lamp globes and other commodities. Reasonable rates prescribed for future and reparation awarded. Boyle-Dayton Co. v. A., T. & S. F., 107 I. C. C. 151.

(t) Fabricated-steel tank material: Rates on, found unreasonable to extent they exceeded lower contemporaneous rate on structural iron and steel, fabricated or unfabricated. Reasonable rates prescribed for future and reparation awarded. Parkersburg Rig & Reel Co. v. C. & N. W., 107 I. C. C. 187.

(u) Rates on rig-iron outfits found unreasonable to extent they exceeded 85 per cent of rates contemporaneously in effect on oil-well outfits and supplies. Reasonable rates prescribed for future and reparation awarded. Parkersburg Rig & Reel Co. v. C. & N. W., 107 I. C. C. 187.

(v) Rates on rough granite found unreasonable to extent they exceeded lower contemporaneous rates on dressed granite, which lower rates were extended to cover rough granite subsequent to movements here involved. Reparation awarded. Bourgoin & Co. v. C., B. & Q., 107 I. C. C. 376.

(w) Rate on common brick made of a composition of clay and shale found unreasonable to extent it exceeded rate on same commodity made from low-grade clay only. Reliance Brick Co. v. M., K. & T., 107 I. C. C. 381.

(x) Rates on bristol board and printing paper found unreasonable to extent they exceeded lower contemporaneous rate on binder's board, box board, and

pulp board. Express Publishing Co. v. A. S., 107 I. C. C. 528.

(y) Rates on tallow and grease, inedible, found not unreasonable as compared with rates on lard, lard compounds, cottonseed oil, and other commodities. Hopfenmaier v. B. & O., 107 I. C. C. 577.

(z) No convincing reason found why rates on vegetables, generally, from producing districts in South Carolina to interstate destinations, should be made with relation to rates on potatoes, except perhaps as a matter of convenience. Vegetable rates in Mississippi Valley are not constructed upon any fixed relationship to rates on potatoes, and while in 43 I. C. C. 291, commission approved certain rates on fruits and vegetables which were made over the rates on potatoes, it is not committed to this doctrine for general application. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 615.

(aa) Contention that rates on cabbage from South Carolina producing districts to interstate destinations are unreasonable to extent they exceeded contemporaneous rates on potatoes, not sustained, carriers showing that rates on potatoes from South Carolina are maintained upon a low basis and to accord such a rate basis would result in a low level of cabbage rates from South Carolina. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 615, 618.

(bb) Following 89 I. C. C. 437, rate on cabbage found unreasonable to extent it exceeded rate on onions and potatoes. Reparation awarded. Harmon v. A., T. & S. F., 109 I. C. C. 90.

(cc) Rates assessed on Boxes, Hallock, in crates, and box material, in mixed carloads, found unreasonable to extent they exceeded rates on box material. Reparation awarded. Crystal Springs Mfg. Co. v. I. C., 109 I. C. C. 177.

(dd) While bananas are a food staple that moves regularly in large volume, they receive a large amount of superior service and their transportation is attended by various items of expense which are not present at all, or at least to as great an extent, in connection with ordinary freight. Bananas from Gulf Ports, 109 I. C. C. 211, 221.

(ee) Cranes, road wheel: Rate on, found unreasonable to extent it exceeded rate on machinery and machines. Reparation awarded. Valley Paving & Construction Co. v. E. R., 109 I. C. C. 255.

(ff) Copper is a desirable commodity from a transportation standpoint in that it may be loaded to maximum carrying capacity of cars, is transported in any kind of a box car that can be locked and sealed, and moves in large volume throughout the year. The only risk assumed by carriers in its transportation is that of theft, claims for loss and damage having been negligible in amount. Brass, Bronze, and Copper Articles, 109 I. C. C. 351, 358.

(gg) Rates on cans, iron, steel, tin, and galvanized found not unreasonable or otherwise unlawful as compared with rates on iron powder kegs or cans, fiber and wooden pails, furniture, brooms, and other metal and wooden containers. Gille Mfg. Co. v. K. C. S., 109 I. C. C. 408.

(hh) Rate on mowers, lawn, found unreasonable to extent it exceeded rate on agricultural implements. Reparation awarded. Rich Steel Products Co. v. S. P., 109 I. C. C. 465.

(ii) Rate on core sand from Provincetown, Mass., to Norwich, Conn., found unreasonable as compared with lower rates on common or building sand and numerous other low-grade commodities, such as crushed stone, brick, and ice, for comparable distances. Reparation awarded and maximum reasonable rate prescribed for future. Richmond Radiator Co. v. N. Y., N. H. & H., 109 I. C. C. 497.

(jj) Rate on granite, monumental, found not unreasonable or otherwise unlawful as compared with lower rates on building or paving stone, rough or dressed, not carved, lettered, polished, or traced. These two classes of stone are not shown to be competitive, and the comparisons are not persuasive since unsupported by evidence concerning the relative transportation characteristics of the kinds of stone on which they apply and of monumental granite. Olson v. M., St. P. & S. S. M., 109 I. C. C. 526.

(kk) Rates on beans, soya, found not unreasonable as compared with lower rates on wheat, which lower rates were subsequently established on soya beans. Chicago Hts. Mfrs. Asso. v. B. & O., 109 I. C. C. 545.

(ll) Rate on nitrate of soda found unreasonable to extent it exceeded lower rate on fertilizer and other commodities taking fertilizer rates. Reparation

awarded. Armour Fertilizer Works v. N. O., T. & M., 109 I. C. C. 549.

(mm) Fact that two commodities are similar does not of itself afford a sufficient basis for finding that same rate should be applied on both. Dolese Bros. Co. v. C., R. I. & P., 109 I. C. C. 561, 564.

(nn) The dressed-poultry movement in November and December is very desirable traffic because it provides a return movement in refrigerator cars which during those months are used as baggage cars and sent westward loaded. Those are months of heavy demand for baggage cars and light demand for refrigerator cars. Nat'l. Poultry, Butter & Egg Asso. v. Am. Ry. Exp. Co., 109 I. C. C. 565, 568.

(oo) A considerably greater number of cars are required for transporting uncompressed cotton than compressed and relative expenses per unit of uncompressed cotton is materially greater than that of compressed cotton. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(pp) To require cotton produced in a vast area to move long distances in an uncompressed condition constitutes wasteful transportation not in the interest of economical operation, it being general practice throughout the Cotton Belt to permit or require concentration and compression at first convenient compressing point en route to destination in line of movement for traffic. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(qq) Livestock rates yield car-mile earnings lower than on most other commodities. This is true generally throughout the country. American Nat'l Live Stock Asso. v. O.-W. R. R. & N. Co., 109 I. C. C. 621, 629.

(rr) Rate on brick, fire, found unreasonable as compared with lower rates on silica blocks. General Refractories Co. v. E. J. & E., 109 I. C. C. 635.

(ss) Interstate rate on fire brick from Joliet, Ill., to Gary and Indiana Harbor, Ind., and South Chicago, Ill., found unreasonable as compared with lower rates on silica blocks and numerous other commodities, and to extent it exceeded a rate based on maximum scale for like distances prescribed in General Brick case, 68 I. C. C. 213. Reasonable maximum rate for future prescribed. General Refractories Co. v. E. J. & E., 109 I. C. C. 635.

(tt) Fact that lower rates apply on spices than on pyrethrum flowers can not be considered a violation of either section 2 or 3 of the act. These commodities are not like kinds of traffic and there is no competition between them. Nor does it follow that a violation of either of these sections exists because rate adjustment permits eastern grinders to secure pyrethrum flowers from the Orient at lower delivered prices via Atlantic ports than those paid by grinders in the Midwest on shipments through Pacific coast ports. Winona Asso. of Commerce v. C., R. I. & P., 109 I. C. C. 648, 649.

(uu) Rates on candle pitch found not unreasonable as compared with rates on roofing, paving, and fuel pitch. Armstrong Cork Co. v. P. R. R., 109 I. C. C. 655, 656.

(vv) Rate on broom and mop handles, without metal attachments, in the rough, or in the white but not further finished, and not primed, shellacked, varnished, painted, treated, or waxed, found unreasonable to extent it exceeded rate on lumber; and rate on dowel pins and curtain poles, in same unfinished state, to extent it exceeded 15 per cent higher than lumber rate. Reasonable rates prescribed for future and reparation awarded. Lumberton Broom & Mop Handle Factory v. N. O. & N. E., 109 I. C. C. 659.

(ww) Rates on canned goods from Illinois freight association territory to certain west-bank Mississippi River points in that territory found not unreasonable as compared with rates on cereal beverages in Illinois territory, or with cereal-beverages rates and canned-goods rates in western trunk-line and c. f. a. territories, except to extent they exceeded fifth class. Transportation conditions in Illinois are not shown to be more favorable than in c. f. a. territory and prescription of rates lower than fifth class would be based not on transportation conditions but on existence of commodity rates voluntarily established by carriers to meet competitive conditions, and which they regard as too low. Burlington Shippers' Asso. v. A., T. & S. F., 109 I. C. C. 694.

(xx) Rates on canned goods found not unreasonable as compared with rates on cereal beverages. Record failed to show circumstances surrounding establishment and maintenance of cereal beverage rates, nor is it established that there is any direct competition between

these two commodities. Burlington Shippers' Asso. v. A., T. & S. F., 109 I. C. C. 694, 699.

(yy) Fact that rates on numerous noncompeting commodities compare favorably with those on a specific commodity for like distances can not be accepted as justification for maintaining through rates in excess of aggregates of intermediate rates. Green Lbr. Co. v. A. A. R. R., 109 I. C. C. 710, 711.

(zz) Rates on oil, linseed, found unreasonable and unduly prejudicial to extent they exceeded rates on cottonseed, copra, soya-bean, and analogous vegetable oils. Reasonable rate for future prescribed and reparation awarded. Glidden Co. v. I. C., 109 I. C. C. 721.

(3a) Tin plate scrap is a refuse of little intrinsic value and it can move only under a rate relatively low as compared with articles usually classed as junk. Metal & Thermit Corp. v. C. R. R. of N. J., 112 I. C. C. 523, 525.

(3b) Rate comparisons unaccompanied by a showing of similarity of transportation conditions are of little probative value. Plaster Board to Utah Common Points, 112 I. C. C. 3, 4.

(3c) Comparisons of rates on one commodity with those on other commodities not analogous are of little probative effect in determining reasonable rates. Graham Co. v. C., R. I. & P., 112 I. C. C. 51, 53.

(3d) Class rates on asphalt found unreasonable in past as compared with lower commodity rates applying on cement and petroleum road oil, and to extent they exceeded lower rate subsequently established. Present rate found not unreasonable since transportation, commercial, and other qualities of the three commodities are not so similar as to warrant prescription of same rates for all of them, or a fixed relationship between them. Reparation awarded. Warren Brothers Co. v. S. P., 112 I. C. C. 87.

(3e) Comparisons based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice. Bos Sand Co. v. A. T. & S. F, 112 I. C. C. 121, 123.

(3f) Following Hires Condensed Milk Co., 38 I. C. C. 441, and other cited cases, rates on canned evaporated milk found unreasonable to extent they exceeded rates contemporaneously maintained on other canned goods. Basis of reasonable rates for the future prescribed and reparation awarded. Pet Milk Co. v. P. R. R., 112 I. C. C. 155.

(3g) Fifth-class rate on red oil found not unreasonable as compared with sixth-class rates under exception to classification on inedible stearine, tallow, grease and other soap stock. While red oil compares favorably from a transportation standpoint with certain other articles used in manufacture of soap, the commission is not prepared to say that failure to accord red oil by exception the same rating as these other articles results in unreasonableness. Williams Co. v. C. N. E., 112 I. C. C. 158.

(3h) Rates on fish oil found unreasonable for future but not in the past as compared with lower rates on vegetable oils. Procter & Gamble Mfg. Co. v. B. & O., 112 I. C. C. 177.

(3i) A showing which contrasts the actual loading of one commodity against the minimum c. l. weights of others is of little probative force in measuring the reasonableness of rates. Procter & Gamble Mfg. Co. v. B. & O., 112 I. C. C. 177, 182.

(3j) Rates on camp outfits found unreasonable to extent they exceeded those contemporaneously maintained on contractors' outfits there being no dissimilarity in the transportation service rendered these two classes of commodities. Measure of reasonable maximum rates prescribed for future and reparation awarded. Standard Pipe Line Co. v. T. & P., 112 I. C. C. 186.

(3k) Rates on cigar-box lumber found not unreasonable as compared with rates on lumber and various lumber articles, including box shooks. Rates assailed produce low ton-mile and car-mile earnings, and while earnings on shipments in question were shown to be slightly higher than those under comparable lumber rates instanced by complainant, that fact alone does not demonstrate that rates assailed were or are unreasonable. Eggerss-O'Flyng Co. v. A. G. S., 112 I. C. C. 218.

(3l) Fact that earnings on a specific commodity were slightly higher than those under rates on a comparable commodity does not, in and of itself, demon-

strate that higher rates were or are unreasonable. Eggerss-O'Flyng Co. v. A. G. S., 112 I. C. C. 218, 219.

(3m) While reasonableness of any given rate can not be measured solely by comparing its earnings with average earnings on all traffic, comparisons of this kind are not entirely without significance in a case where commission is called upon to determine proper rating on an article for application throughout a widespread region. Nat'l Council of Furniture Assos. v. A. A., 112 I. C. C. 289, 297.

(3n) Mere fact that two rates reflect varying general changes does not conclusively establish that each is on a proper level and fact that rates on one commodity may not be on a proper level does not prove that rates on other commodities which reflect same general changes also are not on a proper level. Furniture from Southern Points, 112 I. C. C. 302, 309.

(3o) Refined-oil rate assessed on petroleum refined-oil distillate having a specific gravity in excess of 36°, from Casper, Wyo., to Sioux City, Iowa, found not unreasonable. While the oil here shipped is much lower in value than that of various commodities on which refined-oil rates apply, such as kerosene and gasoline, rate charged compares favorably with those on low-grade oils from Casper and Tulsa, Okla., to various destinations for comparable distances, and with rates found reasonable by commission in other cases. Sioux City Gas & Elec. Co. v. C., B. & Q., 112 I. C. C. 344.

(3p) Third-class rates on wine in bulk in barrels, and in tank cars, found not unreasonable, as compared with fourth-class rates on nonalcoholic fruit juices and flavoring sirups, or with rates on numerous other commodities. Garrett & Co. v. N. Y. C., 112 I. C. C. 519.

(3q) Less-than-carload commodity rate assessed on candy found not unreasonable as compared with lower c. l. rate contemporaneously maintained on chocolate, carpets and rugs, drugs, medicines, perfumery, toilet preparations and chemicals. Comparisons submitted are of little probative force in absence of evidence as to comparative transportation and other conditions, and while carriers subsequently established such lower rate on confectionery unreasonableness of the l. c. l. rate is not established, nor it is admitted, by subsequent reduction. Bunte Bros. v. C. & N. W., 112 I. C. C. 557.

(3r) In the absence of evidence as to comparative transportation and other conditions, rate comparisons of different commodities are of little probative force in measuring reasonableness of rates on a particular commodity. Bunte Bros. v. C. & N. W., 112 I. C. C. 557, 558.

(3s) Rates on worn-out autotruck rims with solid rubber tires attached found unreasonable and unduly prejudicial to extent they exceed the rates on scrap iron. Reasonable and nonprejudicial rates prescribed for the future. Ames & Co. v. N. Y., N. H. & H., 112 I. C. C. 624.

(3t) The commission has recognized greater transportation hazards of flaxseed and that shipments of flaxseed in bulk require a higher class of equipment than that required for transportation of grain. See 25 I. C. C. 337; 85 I. C. C. 217. Kellogg & Sons v. D., L. & W., 112 I. C. C. 629, 635.

(3u) Rates on single carloads of timbers, poles, or piling found unreasonable to extent they exceeded the contemporaneous rates on fir lumber, in single carloads. Transportation conditions incident to carriage of the former are no different from those encountered in movement of the latter and the hazard and expense of transportation in the one case is no greater than in the other. Reparation awarded. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661.

(3v) Rates on canned meats found unreasonable as compared with rates on other canned goods. Reparation awarded. Armour & Co. v. L. & N., 112 I. C. C. 695.

(3w) When considering rates on generic articles, such as canned goods, which move generally through the land, exact tonnage of one kind of canned goods which may move within a given period from one point to one destination is not controlling. Armour & Co. v. L. & N., 112 I. C. C. 695, 696.

(3x) Rate on wooden insulator pins found unreasonable to extent it exceeded rate contemporaneously applicable on lumber. Reparation awarded. Joslyn Mfg. & Supply Co. v. C. & E. I., 112 I. C. C. 743.

(3y) The difference in spread in class rates on common salt and medicated livestock salt applied to commodity rates on common salt does not of itself fix the measure of a proper commodity rate on medicated salt. Yakima Grocery Co. v. O.-W. R. R. & N. Co., 112 I. C. C. 751, 753.

(3z) Carriers compared rate on sirup from Montgomery, Ala., to Tampa, Fla., with those on canned goods, soap, and other articles for purpose of showing that rates on sirup are reasonable, arguing that comparison with canned goods is especially apt since sirup is packed in tins, and is worth more than a carload of canned goods. HELD, comparisons are insufficient to overcome the presumption of unreasonableness arising from fact that the rate on sirup exceeds the aggregate of intermediates, and is out of line as compared with rates on that commodity from Memphis, Nashville, and New Orleans, to same destination. Alabama-Georgia Syrup Co. v. A. C. L., 113 I. C. C. 283, 284, 285.

(4a) Upon contention that theater chairs compete with portable chairs, church furniture, and wood benches, and that an increase in the minimum on theater chairs would be unduly prejudicial to the latter, HELD: This competition, which is limited, should not be controlling in determination of a reasonable minimum on theater chairs. Theater Chairs to Southwestern Destinations, 113 I. C. C. 313, 318.

(4b) Rates on uncompressed cotton linters from points in Texas, Louisiana west of the Mississippi River, Oklahoma, and Arkansas, to numerous destinations in United States and Canada, found not unreasonable or otherwise unlawful as compared with rates on cotton, any quantity, cottonseed-hull fiber, and cotton motes. Complainants' position in assuming that any-quantity rates on cotton are proper basis for l. c. l. shipments only is untenable for that commodity generally moves in the Southwest on any-quantity rates. Carriers have regarded cotton motes and other mill waste as similar in transportation characteristics to hull fiber rather than to linters and record is not convincing to the contrary. Moreover, no specific attack is made on rates from and to particular points except those from a point located on the Kansas City, Mexico & Orient, a weak line whose rates are subject to special consideration. Burton-Dixie Corp. v. A. T. & S. F., 113 I. C. C. 384.

(4c) Upon investigation by commission on its own motion into and concerning the general basis of rates on fertilizer and fertilizer materials in southern territory, FOUND: That in view of characteristics of this traffic it is reasonably entitled to a relatively low basis of rates. Maximum reasonable rates based on a distance scale prescribed for uniform application over standard lines, and certain so-called short or weak lines accorded arbitraries or a percentage over such prescribed standard line rates. Fertilizers between Southern Points, 113 I. C. C. 389.

(4d) There are manifest limitations to the doctrine that burden of rail transportation should be distributed among the various kinds of freight with some regard for economic needs of country. It may be conceded that commission has no power to fix rates upon any kind of freight which will fail to produce some margin over operating cost. Moreover, the fact that certain carriers are largely dependent upon a particular form of traffic and have little opportunity to recoup a deficiency in profit upon such traffic by recourse to higher rates upon other kinds must be taken into consideration. Fertilizers between Southern Points, 113 I. C. C. 389, 420.

(4e) The terms newsprint paper and printing paper describe separate and distinct articles, and they are readily distinguishable. Great Northern Paper Co. v. B. & A. R. R., 113 I. C. C. 463, 464.

(4f) Rates on certain alloys of lead, viz., babbitt, solder, terne, and type metal which have lead as a base in composition with tin, antimony, or other metals in varying proportions, from Newark, N. J., to Buffalo, Pittsburgh, Chicago, and other destinations in Illinois, Indiana, Ohio, Pennsylvania, New York, Kentucky, and Tennessee, found unreasonable to extend they exceeded sixth-class. While no substantial movement of these commodities has been shown which would warrant establishment of commodity rates thereon, the present rates on these alloys are clearly out of line with rates found reasonable by commission on copper, brass, bronze, lead, antimonial lead, and tin. Reasonable rates prescribed for future and reparation awarded. Federated Metal

Corp. v. C. R. R. Co. of N. J., 113 I. C. C. 487.

(4g) Double first-class rate on l. c. l. shipments of cash or document boxes found unreasonable to extent they exceeded rates contemporaneously applicable on actresses make-up boxes and various other iron, steel, and tin boxes n. o. i. b. n., rated first class and with which cash or document boxes come into active competition. Carriers subsequently established first-class rates and while a finding of unreasonableness can not be presumed from the voluntary reduction considering the elements of bulk, weight, value, and expense of handling, cash or document boxes which bear a close analogy to other boxes taking first-class rates, were entitled to move at similar rates. Reparation awarded. Horder's v. C. A. T. Co. of U. S., 113 I. C. C. 520.

(4h) Rates on linseed oil from Minneapolis, Minn., to Dallas, Tex., found unreasonable to extent they exceeded rates based on distance scale prescribed in 98 I. C. C. 183 for application on cottonseed oil. Reasonable rates prescribed for future and reparation awarded. Deforest Co. v. A., T. & S. F., 113 I. C. C. 591.

(4i) In an endeavor to show unlawfulness in the rates on imported matting, matting rugs, and various straw goods, shipper introduced evidence showing that on berry and fruit baskets, cereal products, green coffee, flax tow, flax fiber, and petroleum, rates from Pacific coast are the same to southeastern territory as to destinations in c. f. a. territory. HELD: Such comparison is of little or no probative value, it not being shown to what extent, if any, commodities here under consideration come into competition with commodities instanced. Sterchi Bros. v. G. N., 113 I. C. C. 665, 666.

(4j) Rates on derricks, iron and steel equal to those on oil-well outfits and supplies, found not unreasonable as compared with lower rates on structural iron and steel and iron and steel pipe. Derricks are not sufficiently analogous to structural iron and steel or iron and steel pipe, to warrant according same rates to both. The oil-well outfits and supplies' list includes many articles, of varying value and weights, all of which are given like rates to permit mixing, and even if derricks are of lower value than some commodities in that list, that fact alone is not a compelling reason for according lower rates on derricks. Carter Oil Co. v. A., T. & S. F., 113 I. C. C. 757.

(4k) Viewed from the standpoint of quantum alone, the ore rates are undeniably among the lowest rates in the country in comparison with those on other low grade commodities, but such comparisons are of little value here because of transportation conditions peculiar to the ore traffic. Chicago Gravel Co. v. A. T. & S. F. Ry., 118 I. C. C. 633, 644.

(4l) Rates on barrels, telescoped, found not unreasonable as compared with rates on lumber. Telescoped barrels, although made largely of wood, have passed far beyond the lumber stage of manufacture, and uses and transportation characteristics of the two commodities are dissimilar. Moreover, considerations of carrier and market competition together with regularity and volume of movement which are of prime importance in fixing lumber rates enter only slightly and then in a different manner into the determination of rates on telescoped barrels. For these reasons rates on telescoped barrels should not be the same as, or definitely related to, the lumber rates. Hollingshead Co. v. A. A. R. R. 115 I. C. C. 95.

(4m) Rate on natural ice found not unreasonable as compared with rates on brick, common brick, manure and other commodities. Rawlings v. C., B. & Q., 115 I. C. C. 103.

(4n) Upon contention that a reasonable basis of rates for dried fruits would be lower than the class C level applicable on fresh fruits because dried fruits are rated lower than most fresh fruits in western classification, and transportation characteristics, such as heavier loading and less susceptibility to loss and damage, together with the fact that dried fruits do not require expedited service, all favor that commodity. HELD, these elements would have weight if commodities were more nearly comparable, but it is common knowledge that the value of dried fruits is much in excess of that of fresh fruits and class C rates are obviously too low to apply on a commodity as valuable as dried fruits. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313, 317, 318.

(4o) Box board is a low-grade commodity made from scrap paper, comparable with wood-pulp board. Both com-

modities are used for similar purposes, are included under same general headings and given same rating in consolidated classification and exceptions thereto, and from a transportation standpoint are practically identical. Lynchburg Chamber of Commerce v. B. & O., 115 I. C. C. 465, 466.

(4p) Third-class rate on cabinets charged on servidor doors, a patented article with double panels enclosing a narrow compartment to permit delivery or removal of clothes and other articles from hotel rooms without an employee having to enter the room, found illegal, and lower commodity rate on ordinary doors, found applicable. Servidor doors compete with ordinary doors, and while they constitute a combination article having characteristics of both doors and cabinets and might reasonably take higher rates than common doors, their primary purpose and use continues to be that of a door. Here commodity rate on doors was not restricted to certain types or qualities of doors and it therefore applied on servidor doors which are of higher value, possess features not common to ordinary doors, and presumably not contemplated when commodity rate on doors was published. Reparation awarded. Servidor Co. v. C., M. & St. P., 118 I. C. C. 49.

(4q) Following Midland Linseed Products Co., 68 I. C. C. 522, rates on linseed oil, found unreasonable to extent they exceeded those contemporaneously in effect on cottonseed oil. Reasonable rates for future prescribed and reparation awarded. Glidden Co. v. C. R. R. Co. of N. J., 118 I. C. C. 59.

(4r) Rates on stone, rough or sawed, not further finished, from Bedford district in southern Indiana to Wichita, Kans., found not unreasonable or unduly prejudicial as compared with rates on dressed and other kinds of stone, brick, or cement. Cuthbert Cut Stone Co. v. St. L.-S. F., 118 I. C. C. 69.

(4s) Bedford stone is unique in character and very desirable, carriers regarding it somewhat as a luxury. The traffic is increasing materially in volume year by year. It is shipped freely throughout the country, apparently regardless of freight charges, and notwithstanding the many sources of stone and other building materials nearer points of consumption. Cuthbert Cut Stone Co. v. St. L.-S. F., 118 I. C. C. 69, 76.

(4t) Rates on wood pulp from Reedsport, Oreg., to Camas, Wash., found not unreasonable as compared with rates contemporaneously maintained on fuelwood. Pulp wood is more valuable and loads heavier than fuel-wood, is also a commercial commodity and should bear its share of costs entering into manufacture of paper, while fuel-wood is a waste commodity on which rates are made low in order to permit of its movement in competition with other fuel, particularly in the territory considered where it moves in large volume. Moreover, rate assailed is a joint rate applying not generally for average conditions but between specific points where transportation conditions are unfavorable and extremely costly. Crown Williamette Paper Co. v. S. P. Co., 118 I. C. C. 95.

(4u) Rates on hay from points in South Dakota to destinations in Iowa, Nebraska, Illinois, Wisconsin, and Minnesota should be higher than on wheat. Hay is less valuable and moves in less desirable equipment, but loading is much lighter, and it yields much less revenue per car than wheat, even with a higher rate. South Dakota R. R. Commrs. v. C. & N. W., 118 I. C. C. 139, 150.

(4v) Rates on pipe, riveted steel, found unreasonable as compared with rates on numerous iron and steel articles and various other commodities, and to extent they exceeded rates contemporaneously in effect on wrought-iron or steel pipe, welded or seamless, including pier tubing. Former report 92 I. C. C. 692 reversed and reparation awarded. Duluth Boiler Works v. A., T. & S. F., 118 I. C. C. 161.

(4w) The line of demarcation separating commodities should not be controlled by mechanical processes but by actual differences in grades. See also 77 I. C. C. 727. Cotton Linters from Southwest, 118 I. C. C. 419, 425, 426.

(4x) The transportation characteristics of linters and hull fiber and shavings differ in several respects from those of cotton. The former almost always move in uncompressed form in carloads at carload rates, are loaded and unloaded by shippers, and do not usually require transit, whereas cotton while moving in compressed form in carloads from concentration points moves at any-quantity rates, is loaded and unloaded by or at expense of carriers, and almost always requires transit. Cotton Linters from Southwest, 118 I. C. C. 419, 429.

(4y) Rates on such commodities as potatoes, melons, plaster, mattresses, and furniture are not comparable with linters and cottonseed-hull fiber and shavings in measuring reasonableness of rates on latter. Cotton Linters from Southwest, 118 I. C. C. 419, 429, 430.

(4z) Rate on sawdust, equal to the rates on lumber, found unreasonable as compared with rates on various commodities of higher value. Reasonable rate prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 118 I. C. C. 457.

(5a) Crushed stone costs considerably more to produce than sand or gravel, but on account of its transportation and competitive characteristics is generally accorded same rate. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633, 637.

(5b) Rates on envelopes, in straight carloads from West Carrollton, Ohio, and Waukegan, Ill., to Wichita, Kans., found unreasonable to extent they exceeded 150 per cent of contemporaneous rates on newsprint paper from and to same points, minimum 40,000 pounds. Reasonable rate prescribed for future and reparation awarded. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(5c) The character of the article shipped, but not the use to which it is put determines the rate applicable. Menasha Woodenware Co. v. D. S. S. & A. Ry., 120 I. C. C. 415, 416.

(5d) Fact that there is a difference in rates as between two commodities which ordinarily take same rates is not of itself sufficient to prove the higher rates unreasonable. Jackson Traffic Bureau v. I. C., 120 I. C. C. 33, 34.

(5e) First class l. c. l. rating in official, western and southern classifications on dust cloths, found not unreasonable or unduly prejudicial as compared with lower second-class rating on dust mops. The dust cloths are pieces of cotton cloth cut to size and saturated with paraffine oil and are primarily intended for dusting automobiles, furniture and the like, whereas, dust mops are used principally if not exclusively on floors The two articles are, therefore, not directly in competition, and even though competition does exist between them, ratings thereon need not be same if their classification characteristics are substantially different. The record here shows that dust cloths have a substantially greater value per pound than mops. Auto Supplies Mfg. Co. v. A., T. & S. F., 120 I. C. C. 40.

(5f) Rate on core sand found unreasonable as compared with rates on other low-grade commodities such as common sand, crushed stone, gravel, and ice. Reasonable rate prescribed for future and reparation awarded. Smith Co. v. N. Y., N. H. & H., 120 I. C. C. 43.

(5g) Upon further hearing, former report 98 I. C. C. 331, modified in part, and ratings and rates on coconut stearine in boxes or barrels found unreasonable to extent they exceed third class l. c. l., and fifth class, c. l., minimum 30,000 pounds, and unduly prejudicial to extent they exceed ratings and rates contemporaneously applicable on palm-kernel, palm, and mixed stearines, in bags, boxes, or barrels. Reasonable ratings and rates prescribed for future and reparation denied. Best Foods v. C. R. R. Co. of N. J., 120 I. C. C. 169.

(5h) Rates on broom and mop handles, dowels, and curtain poles, not further finished than sawed, turned to shape, planed or sand belted, found unreasonable and unduly prejudicial to extent they exceeded rates contemporaneously in effect on lumber by more than 15 per cent; and rates on same articles when shellacked, painted, or varnished, found unreasonable and unduly prejudicial to extent they exceeded by more than 3 cents per 100 pounds rates found reasonable herein when not shellacked, painted or varnished. See 52 I. C. C. 598, 616 and other cited cases. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Lumberton Broom & Mop Handle Factory v. G. & S. I., 120 I. C. C. 233.

(5i) Rates on chairs, in the white, k. d., found not unreasonable as compared with rates on refrigerators, bedsteads, kitchen safes, and other comparable commodities. Complainant failed to show volume of movement of commodities with which comparison is made and since volume of movement is one of the elements which must be considered, comparisons submitted are of little probative value. Memphis Furniture & Mfg. Co. v. L. & N., 120 I. C. C. 269.

(5j) Rate on basket tops, found unreasonable to extent it exceeded rate contemporaneously maintained on lumber. Reasonable rate prescribed for future and reparation awarded. Liberty Cooperage & Lbr. Co. v. N. Y., C. & St. L., 120 I. C. C. 271.

(5k) Rates on iron or steel barrels or drums, used as containers in shipping mineral water, from Detroit, Mich., and Sharon, Pa., to Hot Springs, Ark., found not unreasonable as compared with lower rates from same origin points to destinations in southwestern Arkansas and in Louisiana on iron oil barrels, with lower rates on wooden barrels and on furniture from and to same points, or with lower rates established subsequent to movement. Rates to Hot Springs compare favorably with those to certain other Arkansas points, iron or steel barrels or drums yield less earnings than do several other commodities of heavier loading, movement is light, and subsequently established rates were in the nature of a general readjustment involving both increases and reductions. Mountain Valley Springs Co. v. C., R. I., & P., 120 I. C. C. 313.

(5l) First-class l. c. l. rate on hams, beef, fresh-salted, found unreasonable to extent it exceeded rate one class lower than l. c. l. rate on fresh meats. See 85 I. C. C. 725. Application of a rate reasonable for fresh meats to meats partially cured by salting is unreasonable in view of protection against deterioration afforded by the salting process. Guggenheim Bros. v. B. & O., 120 I. C. C. 340.

(5m) Class rates on meters, water, l. c. l., from Boston, Mass., to Pacific coast points, found not unreasonable as compared with lower commodity rates on numerous articles on which the risk, weight, density, and value per pound are less favorable to carriers than complainant's product, or with commodity rates established subsequent to movement. The commodities with which comparisons are made are shown to be water-compelled rates and present commodity rates on meters were established for same reason. Hersey Mfg. Co. v. B. & A., 120 I. C. C. 413.

(5n) Upon reargument, original report 104 I. C. C. 104 reversed, and through rates on cured meats and hides from certain packing points west of Mississippi River to destinations in trunkline and New England territories found not unreasonable or unduly prejudicial in relation to existing rates on hogs and sheep in double-deck cars, and on cattle, from and to same points. Morrell & Co. v. N. Y. C., 120 I. C. C. 537, 539, 540.

(5o) Rate on pins and brackets, wooden insulators, found unreasonable to extent it exceeded rate contemporaneously in effect on lumber. Reasonable rate prescribed for future and reparation awarded. Peninsular Teleph. Co. v. S. Ry., 120 I. C. C. 669.

(5p) Line-haul rate, plus switching charge on crushed stone from points on Chicago, North Shore & Milwaukee Ry., within the Racine, Wis., switching limits, to Chicago and other Illinois points, found not unreasonable as compared with rates on other articles moving between numerous points in same territory for comparable distances, or with rates on gravel from Fontana, Wis., a similarly situated short-line point, to Chicago. Carriers show that sand and gravel rates are depressed due to competitive conditions, and cite decisions in which higher rates have been prescribed in various sections of the country. Assailed rates do not appear unreasonable, and also apply from a group including North Milwaukee and Waukesha, Wis., competing points, to Chicago. Moreover, in 118 I. C. C. 633, present rate from Racine to Chicago, which does not include absorption of switching charges, was found not unreasonable. Racine Crushed Stone Co. v. C., M. & St. P., 120 I. C. C. 717.

(5q) Class rates on compo-board, found not unreasonable as compared with lower commodity rates contemporaneously in effect on wall board, box board, fiber board, and pulp board. Fact that the lower commodity rates were subsequently extended to include Compo-board does not of itself indicate that class rates previously applicable were unreasonable. Disbrow & Co. v. Director General, 120 I. C. C. 720.

(5r) Fact that commodity rates on fiber board, pulp wood, and wall board have been extended to include Compo-board does not of itself indicate that class rates previously applicable on latter commodity were unreasonable. Disbrow & Co. v. Director General, 120 I. C. C. 720, 721.

(5s) The commission has no special qualifications as an official body to de-

termine from samples whether a certain shipment consists of linters or shavings. Where, as here, a violation of section 6 is alleged it has concurrent jurisdiction with the courts, and the mode of proof does not differ in essence from that in court. The usual method of proving the character of a commodity or article is to introduce the commodity or article itself, or an agreed sample thereof, and, where the decision involves an intricate analysis, to adduce competent evidence by expert witnesses. Fraser v. A. C. L. R. R., 122 I. C. C. 520, 525.

(5t) The transportation characteristics of linseed oil are similar to cottonseed and other vegetable oils, and the carload rates on those analogous oils should be the same. Fredonia Linseed Oil Works Co. v. A., T. & S. F. Ry., 123 I. C. C. 153, 156.

(5u) In the fixing of rates in the past on washed gravel, crushed stone, slag, sand, clay gravel, and unwashed gravel, the commission has not recognized existence of a difference in transportation characteristics, or in any other facts entitled to consideration in the fixing of rates, such as to warrant a different basis of rates on some as distinguished from others. Where scales have been prescribed in any territory they have been rated the same. Rates on Chert, Clay, Sand, and Gravel, 122 I. C. C. 133, 163.

(5v) Invoices alone do not satisfactorily establish the character of a commodity shipped, when that is in issue, or determine the rate applicable, as the inherent character of an article is not changed or affected by manner in which it is invoiced. Concrete evidence, however, such as samples of the shipments are helpful. Fraser v. A. C. L., 122 I. C. C. 520, 522, 524.

(5w) The commission has no special qualifications as an official body to determine the character of commodities from samples. However, where a violation of section 6 is alleged, it has concurrent jurisdiction with the courts, and mode of proof does not differ in essence from that in court. Usual method of proving the character of a commodity or article is to introduce the commodity or article itself, or an agreed sample thereof, and, where the decision involves an intricate analysis, to adduce competent evidence by expert witnesses. Fraser v. A. C. L., 122 I. C. C. 520, 525.

(5x) Rates on live poultry higher than rates on dressed poultry between same points found not unjustly discriminatory or unduly prejudicial to live-poultry shippers and unduly preferential of dressed-poultry shippers. Live and dressed poultry are not analogous from a transportation standpoint and conditions surrounding their shipment are not substantially similar. Consolidated Southwestern Cases, 123 I. C. C. 203, 256, 260.

(5y) Fertilizer, because of its beneficial effect on the land and its very immediate and great effect on traffic, should be kept on as low a level of rates as transportation conditions will warrant. Consolidated Southwestern Cases, 123 I. C. C. 203, 269.

(5z) Rates on nitrate of soda in the Southwest may well be somewhat higher than those on other fertilizer. Consolidated Southwestern Cases, 123 I. C. C. 203, 269.

(6a) In general proceedings, where rates on practically all articles other than a few so-called basic commodities are in issue, commission should, in fixing level of rates on any one article, have reasonable regard for relative transportation conditions of the respective articles and prescribe rates on each commodity fairly related to those prescribed on others with similar characteristics. Consolidated Southwestern Cases, 123 I. C. C. 203, 304.

(6b) Due to the disparity in distances, as well as failure to show a movement under the rates applicable on the analogous commodities the comparison has little value. Humble Oil & Refining Co. v. B. S. L. & W. Ry., 126 I. C. C. 717, 720.

(6c) Transportation characteristics of pig iron can not be similar to those of such low-priced commodities as ashes, cinders, and scrap iron. Pig iron in C. F. A. Territory, 126 I. C. C. 111, 120.

(6d) Nitrate of soda is desirable traffic as it moves in large volume, loads heavily, and no special service is required in its handling. Owing to its susceptibility to damage by water it is shipped in box cars, and as it is an oxidizing material, the commission's regulations for transportation of explosives require it to be shipped under a yellow label. Nitrate of

soda is imported from Chile and its principal use is as fertilizer or fertilizer ingredient, although it is also used to a considerable extent in manufacture of explosives and for other purposes. When used as fertilizer it may be applied direct to the soil or mixed with other substances as an ingredient of prepared fertilizer. Egyptian Powder Co. v. I. C., 126 I. C. C. 293, 295.

(6e) The transportation characteristics and use of muriate of potash, sulphate of potash, and kainit are similar to those of nitrate of soda. Egyptian Powder Co. v. I. C. R. R., 126 I. C. C. 293, 296.

(6f) Except for fact that uncompressed cotton is compressed by and at expense of carriers, the circumstances surrounding its movement and that of compressed cotton are identical. Manget Bros. Co. v. A. C. R. R., 126 I. C. C. 403.

(6g) The fact that two articles may resemble each other in respect of material, appearance, process of manufacture, value, and other characteristics, their only difference being the uses to which they are put, while not sufficient to make them the same, may afford a basis for a finding of unreasonableness or undue prejudice. Chicago Carton Co. v. N. Y. C., 126 I. C. C. 457, 458.

(6h) Wood pulp is desirable traffic. It loads heavily, moves in regular volume, and is not susceptible to damage in transit. Hamersley Mfg. Co. v. E. R. R. Co., 126 I. C. C. 491, 492.

(6i) Fleshings consist of refuse of tanneries in the form of pieces of flesh and waste scraped from hides. It is a low-grade commodity used in making glue, being preserved for shipment by a milk-of-lime treatment and, as shipped, consists of approximately 80 per cent water and 20 per cent solid matter. It is not easily damaged and may be transported in either box cars or open-top equipment. Keystone Glue Co. v. S. Ry. Co., 126 I. C. C. 507, 508.

(6j) Zinc ore is desirable traffic from a transportation standpoint, as it moves throughout the year and loads to capacity of cars used, and claims for loss are negligible. It is usually shipped in box cars but, not being subject to damage by elements, may be transported in open-top cars in time of car shortage. United Zinc Smelting Corp. v. B. & O., 126 I. C. C. 677, 678.

(6k) Rates on solder and certain other alloys of lead, including terne metal, found not unreasonable but unduly prejudicial to extent they exceeded lower rates contemporaneously maintained on tin. Undue prejudice ordered removed and reparation denied. Former decision in 92 I. C. C. 319, and 113 I. C. C. 487, modified. Federated Metals Corp. v. C. R. R. Co. of N. J., 126 I. C. C. 703.

(6l) The commission has consistently prescribed same rates on sand, gravel, and crushed stone. Washington Building Co. v. B. & O., 128 I. C. C. 9, 19.

(6m) Second-class rate applicable on games or toys n. o. i. b. n., and assessed on domestic mah-jongg sets from San Francisco and Paraffin, Calif., to Chicago, found applicable, but unreasonable as compared with lower commodity rate contemporaneously in effect on toys, and to extent it exceeded lower commodity rate applicable in opposite direction, to which basis rates assailed were subsequently reduced. Reparation awarded. Paraffie Companies v. S. P. 128 I. C. C. 421.

(6n) China clay is a low-grade commodity used as a filler in the manufacture of paper and is of much lower value than newsprint or other kinds of paper. Newton Falls Paper Co. v. R. Co., 128 I. C. C. 563.

(6o) A raw material is generally accorded a lower rate than the finished product. Colbert Limerock Asphalt Co. v. A. C. R. R., 129 I. C. C. 177, 183.

(6p) It is proper that the rates on fuel oil should be lower than those on gasoline. Haydite Co. v. A. T. & S. F. Ry., 132 I. C. C. 134.

(6q) If the characteristics of fuel oil warrant lower rates thereon than on gasoline, as they do, there is no valid reason why the differential or minimum difference under the gasoline rates should not bear a uniform relationship to the volume of such rates; otherwise, and as at present, the rates on fuel oil may be relatively too low for short hauls and relatively too high for long hauls. Haydite Co. v. A. T. & S. F. Ry., 132 I. C. C. 132, 138.

(6r) Upon sound economic grounds fertilizer is a commodity which should be leniently treated in distributing the burden of freight transportation. Rauh & Sons Fertilizer Co. v. A. C. & Y. Ry., 132 I. C. C. 287, 290.

(6s) Grapes and other deciduous

fruits are close enough in their transportation characteristics to bear a comparable relation as a classification matter. Calif. Growers & Shippers' Protective League v. S. P., 129 I. C. C. 25, 57.

(6t) Invoices alone are not sufficient to establish character of commodity shipped or determine rates applicable. Glarner & Co. v. S. Ry., 129 I. C. C. 75, 76.

(6u) The carload minimum is a part of the rate. Therefore, where minima differ exhibits introduced for comparison should plainly indicate the fact. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107,, 116.

(6v) Sixth-class rates on blocks, last, from Gaylord, Mich., to New York City, Brockton, Mass., and Philadelphia, found unreasonable as compared with lower contemporaneous rates on lumber published to apply on wooden last blocks between points in New England, trunk-line, and c. f. a. territories: and to extent they exceed rates contemporaneously in effect on lumber. In 52 I. C. C. 598, 620, lumber rates were recommended for application on wooden last blocks as well as on various other wooden articles in practically the same stage of manufacture. Reasonable rates prescribed for future and reparation awarded. Jackson v. M. C., 129 I. C. C. 235.

(6w) Mere fact a rate under attack appears out of line with other rates to which it is ordinarily closely related does not necessarily prove that it has been unreasonable in the past. It may be that the comparative rates are too low. But in determining a reasonable level for the future, relationship which the different commodities should bear to each other may properly be given consideration. Jackson v. M. C., 129 I. C. C. 235, 240.

(6x) Rates on canned goods including canned milk from points in Illinois Freight Association and c. f. a. territories to Memphis, New Orleans and other Mississippi Valley points, found not unreasonable as compared with rates on axle grease, fruits and vegetables, and other commodities between same and to various other Mississippi Valley points. Rates assailed are fairly aligned with those to the rest of the South, Southwest, and Southeast; are considerably lower than those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203; and record affords no basis for a disturbance of present adjustment or change in relationship between points in destination territory. National Canners Asso. v. B. & O., 129 I. C. C. 269.

(6y) Rate on beans, soy, soja or soya, found unreasonable as compared with rate on wheat, corn, and rye, flax and millet seed, sorghum seed, cottonseed, cottonseed cake and meal. See 77 I. C. C. 473; 98 I. C. C. 183, 213, 265. Binding-Stephens Seed Co. v. A., T. & S. F., 129 I. C. C. 291, 292, 293.

(6z) Fourth-class rate on cans, empty tin, found unreasonable as compared with lower commodity rates contemporaneously in effect on enamel ware, tinware, snuff boxes, tobacco boxes, and tobacco boxes and box shapes, made of tin, were not shown to be more desirable traffic than tin cans, and a higher rate on latter commodity found unwarranted. Metal Package Corp. v. B. & O., 129 I. C. C. 301.

(7a) Transportation characteristics of coal tar and liquid asphalt are similar and those commodities compete to some extent with each other. Continental Roofing Mfg. Co. v. G. & S. I., 129 I. C. C. 313, 316.

(7b) Fact that commodities introduced for comparison are more hazardous to handle than commodity involved, does not warrant disturbance of rate basis generally applicable on that commodity. General Sprayer Co. v. A., B. & A., 129 I. C. C. 318, 320.

(7c) Rates on common unglazed doors from points in Oregon to destinations in trunk-line and New England territories found unreasonable to extent they exceeded 115 per cent of rates on lumber found reasonable in 78 I. C. C. 495, 513, between same points on same commodity. Reparation awarded. M. & M. Wood Working Co. v. O.-W. R. & N., 129 I. C. C. 329.

(7d) Rates on acids, muriatic, sulphuric, and nitric, found not unreasonable as compared with rates contemporaneously in effect on other acids. Bruce & Co. v. C. & N. W., 129 I. C. C. 435, 437.

(7e) Finding in original report, 104 I C. C. 66, that proposed rates on fruits and vegetables between points in California and Oregon, Washington, Idaho, Utah, and Montana, involving both increases and reductions, had not been justified, affirmed. Circumstances and conditions under which commission prescribed or found not unreasonable higher rates on like traffic are too dissimilar in too many important respects to entitle such comparisons to much weight and evidence does not indicate that present rates are depressed by real or potential water competition or that they are not remunerative. Fruits and Vegetables Between Pacific Coast States, 129 I. C. C. 569.

(7f) Rough quarried granite is shipped in condition in which it comes from the quarry, except that it is broken into rough rectangular pieces which are loaded indiscriminately into box cars, without protection, being handled at destination in same manner as ordinary brick. Plymouth Quarries v. N. Y., N. H. & H., 129 I. C. C. 621.

(7g) Fifth-class rate on benzol found unreasonable as compared with lower commodity rate contemporaneously in effect on gasoline. In 78 I. C. C. 12 and 78 I. C. C. 353 it was found that rates on benzol should not exceed those on gasoline. Reparation awarded Caldwell & Taylor v. C., R. I. & G., 129 I. C. C. 626.

(7h) Rates on beets and carrots with clipped tops in straight or mixed carloads, from points in lower Rio Grande Valley of Texas to destinations east of Mississippi River and north of Ohio unreasonable as compared with rates be- River, found not unduly prejudicial but tween the same and various other points for comparable distances, and to extent that factors or arbitaries east of Mississippi River exceeded rates contemporaneously applicable on same commodities "without tops." Reasonable rates prescribed for future and reparation awarded. Carfiel & Morris v. N. Y. C., 129 I. C. C. 658.

(7i) In attempting to justify lower rates on "beets, with clipped tops," complainants compare rates thereon with lower rates on cabbage and potatoes. FOUND: It has been generally recognized that potatoes should take rates lower than those on other vegetables, and in absence of information tending to show that transportation characteristics of cabbage and beets are such as to demand any relationship in rates, contemporaneous rates on cabbage do not afford a reliable guide. Carfiel & Morris v. N. Y. C., 129 I. C. C. 658, 661.

(7j) Rates on school books from Chicago to Oklahoma City, Okla., and Dallas, Tex., found not unreasonable, discriminatory, unduly prejudicial, or otherwise unlawful as compared with lower rates on paper articles, including school blanks or forms and school copy books. Complainant contends that as schoolbooks are approved by State educational authorities, and follow a prescribed form they should take lower rates applicable on school blanks or forms. However, schoolbooks in question can not be termed forms. Moreover, rates assailed are lower than third-class rates on books n. o. i. b. n. between same points. Wheeler Publishing Co. v. A., T. & S. F., 129 I. C. C. 672.

(7k) While no higher rates on grain than on products thereof is extraordinary and commission has frequently prescribed same rates on both commodities, mere showing that rates thereon differ is not conclusive that higher rates on grain are unreasonable, as it may indicate that rates on the products are too low. Indianapolis Board of Trade v. B. & O., 129 I. C. C. 675, 680.

(7l) Fourth-class rates on baking powder found not unreasonable or otherwise unlawful. Complainant contends that rate assailed was unreasonable to extent it exceeded fifth-class rate subsequently established following decision in 112 I. C. C. 645, in which fourth-class rating was found unreasonable to extent it exceeded fifth class, and as it was a party to that complaint it now seeks reparaation on shipments which moved during the two years previous to date lower rate was established. However, in 20 I. C. C. 43, it was found that subsequent reduction of a rate is not of itself sufficient to justify an award of reparation. Moreover, no reparation was sought in first cited case and Rule III (s) of Rules of Practice provides that reparation will not be awarded upon a complaint in which it is not specifically

prayed for or upon a new complaint by same complainant based upon finding in original proceeding. Royal Distributing Co. Inc. v. B. & O.,129 I. C. C. 749.

§13. Comparison of Rates.

(1) In General.

See Infra §47; Advanced Rates §5 (3), §8½; Blanket Rates §18; Branch Lines §2; Classification IV, §17, §20; Comparative Rates; Discrimination; Rail-and-Water Rates; Reasonableness of Rates §7½, §28; Relative Rates; Through Routes and Joint Rates §13½, §15.

(a) Gross-weight comparisons offered in an attempt to show arithmetically relative revenues under rates on livestock and on fresh and cured meats, based upon average loadings and including average weight of classes of equipment generally employed, together with estimated allowances for cars returned empty, can not be employed as an exact yardstick in making freight rates, since too many other factors must be taken into consideration, for example, gross-weight comparisons completely ignore differences in value of the article compared. Morrell & Co. v N. Y. C., 104 I. C. C. 104, 115, 116.

(b) Where shipments move to first billed destination and are thence reconsigned to new destination and rates are applied on two separate movements, comparisons with rates for continuous line hauls are of little value. Fess v. C., H. & G. L., 104 I. C. C. 262.

(c) In an endeavor to show unreasonableness in rates on newspapers in baggage cars publishers offered extensive studies of revenue from newspapers with revenue derived from the Government for carriage of closed-pouch mail. FOUND: Incidents of this traffic in handling and in methods of computing charges are so different from any other traffic that any comparison with rates for railway-mail service are valueless. Newspapers in Baggage Cars, 104 I. C. C. 527, 536, 537.

(d) Mere comparisons of the rates and earnings on one commodity with the rates and earnings on other commodities for the purpose of showing the reasonableness of rates is not convincing without a showing that such rates are comparable in other respects. Ballman-Cummings Furniture Co. v. C. & E. I. Ry. Co., 109 I. C. C. 413, 415.

(e) Rate comparisons which fail to show volume of movement, value of commodities with which comparisons are made, similarity of transportation conditions, and other pertinent traffic information are of little probative value in determining reasonableness of rates on a particular commodity. Dolese Bros. v. v. C., R. I. & P., 109 I. C. C. 561, 563.

(f) From the standpoint of percentages of the corresponding first class rates, fifth class in the southern classification is the substantial equivalent of the fourth class in the official and class A in western. Tennessee Electric Power Co. v. L. & N. R. R., 112 I. C. C. 491, 493.

(g) Comparisons are of little probative force in the absence of evidence as to comparative transportation and other conditions. Bunte Bros. v. C. & N. W. Ry., 112 I. C. C. 557, 558.

(h) Rate comparisons unaccompanied by a showing of similarity of transportation conditions are of little probative value. Plaster Board to Utah Common Points, 112 I. C. C. 3, 4.

(i) Comparisons based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice. Bos Sand Co. v. A., T. & S. F., 112 I. C. C. 121, 123.

(j) Mere comparisons of rates without a showing of the conditions under which such rates were established or the volume of movement thereunder, are of slight probative value in determining the reasonableness of rates. Anderson Taylor Co. v. A. T. & S. F. Ry., 115 I. C. C. 313, 318.

(k) Mere comparisons of rates without a showing of conditions under which such rates were established or volume of movement thereunder, are of slight probative value in determining reasonableness of rates. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313, 318.

(l) Rate on sand, silica, from points in the Ottawa district in Illinois to Sandusky, Ohio, found not unreasonable as compared with those for various distances on iron ore and other heavy-loading commodities. Frohman Chemical Co. v. B. & O., 115 I. C. C. 322.

(m) Commodity rates on iron and steel pull and sucker rods from Marion, Ind., to Oklahoma and Texas destinations found not unreasonable. Complainant compared assailed rates with lower rates on iron and steel articles to and from same points and contended that they should not exceed those on general run of iron and steel articles, particularly bar and structural iron and steel. However, rates under attack are lower than commodity rates on oil-well supplies, compare favorably, distance considered, with those on same commodity from St. Louis, Toledo, and Pittsburgh to Oklahoma and Texas destinations, and with rates approved by commission in cases heretofore decided. Marion Machine F. & S. Co. v. C., C., C. & St. L., 115 I. C. C. 327.

(n) Mere rate comparisons without a showing of movement or conditions under which rates were established are of little probative value in determining reasonableness of rates on a particular commodity. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 546.

(o) Rates on ingots, brass, found unreasonable as compared with those on copper ingots. Federated Metals Corp. v. P. R. R., 115 I. C. C. 719.

(p) Comparisons based upon distance alone, are insufficient to establish unreasonableness of rates. See 64 I. C. C. 78. Crerar Clinch Coal Co. v. A. A. R. R., 118 I C. C. 171, 174.

(q) Ratings on paper cups, c. l. and l. c. l., in official, southern, and western classifications and class rates governed thereby found unreasonable as compared with ratings on various other paper articles, glass tumblers, wooden bowls, and fiber-board berry baskets with covers detached. Reasonable ratings and rates prescribed for future and reparation awarded. Public Service Cup Co. v. A. C. L., 118 I. C. C. 697.

(r) It is seldom, if ever, that a rate can be found unreasonable without comparison with the rates to other points. One of the best tests of reasonableness of a rate is by comparison with the rates on like traffic in the same territory. The act recognizes no distinction between relative unreasonableness and intrinsic or absolute unreasonableness. Sioux City Chamber of Commerce v. C. B. & Q. Ry., 120 I. C. C. 7, 14.

(s) Comparisons of inbound and outbound rates are not very helpful where only the inbound or the outbound rates are in issue. Anthony Produce Co. v. B. & A. R. R., 120 I. C. C. 224, 226.

(t) Comparisons of rates alone are of practically no value. Allaire Woodward & Co. v. A. T. & S. F. Ry., 120 I. C. C. 249, 250.

(u) Complainants comparisons of the rate attacked with rates within or to other territories are unaccompanied by a showing of any movement at those rates or of the conditions influencing their establishment It is well settled that such comparisons are of little probative value. Hamm Co. v. B. & O. R. R., 120 I. C. C. 345, 350.

(v) The most helpful evidence in determining the reasonableness of rates are comparisons of the rates on like traffic, moving under like circumstances and in the same territory. McLeod v. T. & P. Ry., 120 I. C. C. 550, 553.

(w) Complainants comparisons are lacking in probative value. They compare the rates in a great number of instances with dissimilar traffic and on similar traffic in different territories. In other instances they compare the earnings under the rates charged on the shipments herein considered, with those of the carriers in the western territory. Comparisons of this nature are not helpful in determining the reasonableness of the rates herein considered. McLeod v. T. & P. Ry., 120 I. C. C. 550, 553.

(xy) Comparisons of inbound and outbound rates are not very helpful in establishing unreasonableness or undue prejudice where only the inbound or outbound rates are in issue. Anthony Produce Co. v. B. & A., 120 I. C. C. 224, 227.

(z) Comparisons of rates alone, without showing value of commodity, volume of movement, or other transportation characteristics, are of practically no value in measuring reasonableness of rates. Allaire, Woodward & Co. v. A., T. & S. F., 120 I. C. C. 249, 250.

(aa) Rate comparisons unaccompanied by a showing of volume of movement or conditions influencing their establishment are of little probative value in measuring reasonableness of particular rates. Hamm Co. v. B. & O., 120 I. C. C. 345, 350.

(bb) Rate comparisons unaccompanied by a showing of value or com-

modity, volume of movement, or other conditions influencing their establishment are of little probative value in measuring the reasonableness of particular rates. Allaire, Woodward & Co. v. A., T. & S. F., 120 I. C. C. 249, 250; Vegetables from Virginia, 120 I. C. C. 319, 323; Hamm Co. v. B. & O., 120 I. C. C. 345, 350; Vera Chemical Co. v. A. C., 120 I. C. C. 434, 437.

(cc) Comparisons of rates, without showing volume of movement and transportation characteristics of commodities compared, are without probative value in measuring reasonableness of rates. Vera Chemical Co. v. A. C., 120 I. C. C. 434, 437.

(ddee) In order to be used as a basis for a finding of unreasonableness comparisons need the support of data respecting traffic, transportation and other pertinent conditions and considerations. Pelham Phosphate Co. v. A. C. L. R. R., 122 I. C. C. 509, 512.

(ff) Bare comparisons of rates on a particular commodity moving in one direction with rates on unrelated commodities moving in opposite direction, without any showing of the various elements affecting their establishment, fall far short of establishing unlawfulness of the rates in effect on the particular commodity. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 6.

(gg) Rates on grain from points in Indiana on the Chicago, Indianapolis & Louisville Ry. to Chicago, when reshipped over lake or lake-and-rail lines, found not unreasonable or otherwise unlawful because lower than rates on similar traffic from same origin points to Indianapolis. Complainant contended that assailed rates are unduly low as a result of which traffic is diverted by way of Chicago instead of moving by way of Indianapolis. However, local rates to Chicago are upon a much higher level than rates assailed and evidence of shippers is to effect that the bulk of their grain moves to interior destinations and Ohio River markets and that greater quantities of grain are shipped to Indianapolis than to Chicago, the latter market being desirable principally for off-grade grain. Indianapolis Board of Trade v. C., I. & L., 122 I. C. C. 289.

(hh) The commission has consistently refused to condemn rates on grain merely because they are the same as, or are, in fact, the combination of the primary grain markets. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 716.

(ii) Comparison of rates based upon distance alone have little probative value when rates compared are group rates, in the establishment of which the element of distance must to an extent be subordinated to other considerations. Cherry Co. v. C., M. & St. P., 123 I. C. C. 59, 61.

(jj) The maintenance of a higher rate to one point than to others to which it is closely related does not necessarily indicate that the higher rate is unreasonable. Consolidated Rendering Co. v. N. Y., N. H. & H., 123 I. C. C. 98, 100.

(kk) Fact that earnings under rates assailed are slightly higher than those under similar rates for shorter distances, is not persuasive that they are excessive. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 714.

(ll) A mere comparison of rates and earnings without other supporting data is not helpful. Federated Metals Corp. v. Pennsylvania R. R., 126 I. C. C. 144, 146.

(mm) For determining the reasonableness or unreasonableness of rates applied to given shipments, the earnings and distances over the routes actually traversed constitute a better measure than do computations based on short line distances without regard for routes of movement. United Zinc Smelting Corp. v. B. & O. R. R., 126 I. C. C. 677, 690.

(nn) Comparisons of average earnings and hauls on all traffic and on a particular commodity are of little value in considering the reasonableness of joint rates on such particular commodity between particular points. United Zinc Smelting Corp. v. B. & O., 126 I. C. C. 677, 686.

(oo) The Commission has frequently found that the mere showing of rates to a point higher than to a more distant point over the same route does not prove that the former are unreasonable. Memphis Freight Bureau v. A. G. S. R. R., 128 I. C. C. 445, 462.

(pp) The projection of short haul rates for comparison with those for longer hauls, regardless of the method used, is not a satisfactory test of reasonableness. Calif. Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, 39.

(qq) Comparisons with rates on freight traffic are not of material value in determining rates on cream in baggage car service, for the reason that the two classes of service are not comparable. Beatrice Creamery Co. v. C. M. & St. P. Ry., 129 I. C. C. 375, 382.

(rr) Comparisons based merely upon differences in distance do not constitute sufficient justification for a finding of unreasonableness. Chicago Heights Mfrs. Asso. v. C. G. T. T. R. R., 132 I. C. C. 43, 45.

(ss) Defendants assert that the rates from East Helena and Murray are materially depressed, and this shows that those from Bradley are relatively on a still lower basis. It is undisputed that the rates are, at least, not unreasonably high, but this fact alone does not sustain defendants contention. Bunker Hill & Sullivan Co. v. O. W. R. R. & N., 132 I. C. C. 266, 271.

(tt) Fact that commodities introduced for comparison are more hazardous to handle than commodity involved does not warrant disturbance of rate basis generally applicable on that commodity. General Sprayer Co. v. A., B. & A., 129 I. C. C. 318, 320.

(uu) Combinations of single-line interstate distance rates on cream, in 10-gallon cans, in baggage cars in passenger and mixed-train service, from certain points in North Dakota and South Dakota to Aberdeen, S. Dak., found not unduly prejudicial but unreasonable as compared with rates under the Beatrice, C. F. A., and Kirschbaum scales prescribed in 15 I. C. C. 109; 46 I. C. C. 601; and 100 I. C. C. 28, respectively, and to extent they exceeded distance rates herein prescribed, with addition of drayage charges as herein provided Reasonable rates prescribed for future and reparation awarded. Beatrice Creamery Co. v. C., M. & St. P., 129 I. C. C. 375.

(vv) Proposed revision of rates on lime between points in southern territory for purpose of removing fourth-section departures; of eliminating inequalities between producers; and of providing a uniform basis of rates to apply between points in the South, found justified. Proposed rates are same as or lower than those on lime prescribed in 85 I. C. C. 341. and other cited cases between points in c. f. a. territory and between various other points, and comparison with rates on brick, wall plaster, lumber, and various other commodities indicates that proposed rates are on a low level and produce relatively low car-mile earnings. Respondents directed to publish rates between other points in southern territory indicated, to become effective contemporaneously with those herein found justified. Lime Between Southern Points, 129 I. C. C. 635.

§13 (1½). Comparison of Commodity and Class Rates.

See Class Rates; Commodity Rates.

(a) Fifth-class rates on hoofs and horns, animal, used in making such articles as combs, buttons, machete handles, and pipe bits, found not unreasonable as compared with lower sixth-class rates on hoofs used in manufacture of gelatine and glue, on horns, horn waste, hoofs, and hoof waste suitable only for fertilizer, and on bone used in manufacture of such articles as combs and buttons. As to last-named commodity the record does not show percentage of total tonnage of bones that can be used in manufacturing products other than fertilizer, the average loading of bones, or a comparison of prices at which horns, hoofs, and bones are sold to consuming manufacturers. Tomkins-Summer Co. v. B. & O., 115 I. C. C. 24.

(b) Sixth-class rate on sand, refuse, found unreasonable as compared with lower rates contemporaneously in effect on various other commodities. Reasonable rate prescribed for future and reparation awarded. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(c) By a commodity rate being higher than a class rate is an abnormality we do not wish to be understood as holding that the presumption of unreasonableness is by any means conclusive, but what we do say is that such an adjustment is abnormal and on its face unreasonable, and requires substantial evidence to justify it. A mere recital of its continued existence is not sufficient. Gay Sullivan & Co. v. A. G. S. R. R., 122 I. C. C. 201, 203.

(d) Class rates as they now exist are frequently not accurate indicia of general rate levels or transportation conditions of different sections of the country. Ok-

lahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 75.

(e) A number of articles are rated as high as or higher than scrapbrass or scrapcopper but move at commodity rates lower than the class rates under consideration. That fact, alone, is insufficient to justify the establishment of commodity rates on scrap brass or scrap copper. Atlas Iron & Metal Co. v. A. T. & S. F. Ry., 132 I. C. C. 299, 301.

§13 (2). Divisions and Joint Rates.

See Divisions; Local Rates and Combinations; Through Routes and Joint Rates.

(a) While divisions ordinarily afford little basis for determining reasonable maximum rates, they may properly be given more weight in determination of a reasonable minimum rate in nature of a proportional rate. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 80.

(b) The use of comparisons of divisions in determining the reasonableness of the joint rate attacked is of little or no probative value, for, such comparisons, without evidence of the circumstances and conditions surrounding the traffic, are not controlling. The divisions of a joint rate are not, generally speaking, of value as a test of the reasonableness of the rate. Farrell Foundry & Machine Co. v. A. B. & A. Ry., 123 I. C. C. 127, 130.

(c) The Commission has often found that divisions of a joint rate are not ordinarily a sound test of the reasonableness of rates. American Grain & Hay Co. v. I. C. R. R., 129 I. C. C. 225, 229.

§13 (3). Division and Local Rates.

See Divisions; Local Rates and Combinations.

(a) Although local rates are not necessarily controlling in determining the measure of proportional rates from and to the same points, they are not without probative value. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 334.

§13 (4). Import or Export and Domestic Rates.

See Export Rates and Facilities; Import Traffic.

(a) Export rates yielding very low earnings can not be accepted as the proper measure of reasonable domestic rates. Chestnutt & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 713.

(b) Export rates yielding ton-mile earnings as low as 6.12 and 7.4 mills for hauls of 1,591 and 1,793 miles, respectively, can not be accepted as proper measure of reasonable domestic rates. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 713.

§13 (5). Proportional and Local Rates.

See Local Rates and Combinations; Proportional Rates.

(a) Conditions surrounding proportional and local rates are dissimilar. Nooney & Co. v. P. R. R., 112 I. C. C. 35, 36.

(b) Although local rates are not necessarily controlling in determining measure of proportional rates from and to same points, they are not without probative value. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 334.

§13(6). State and Interstate Rates.

See Advanced Rates §5 (7¼); Discrimination §8 (6); Equalization of Rates §5; Routing and Misrouting §4¼; State Rates and Regulation.

(a) Rate on coal from docks in Menominee, Mich., to complainant's paper mill in Marinette, Wis., found not unreasonable or unduly prejudicial. The service is regarded as a line-haul movement, rather than a switching service, and rate applicable compares favorably with intrastate rates on like traffic in various States for corresponding distances. Marinette & Menominee Paper Co. v. C. & N. W., 107 I. C. C. 21, 26, 28.

(b) Rates on crate and box material from Bainbridge and Brunswick, Ga., to destinations in Florida on Florida East Coast Ry. found not unreasonable as compared with lower intrastate rates on like traffic in Florida for comparable distances. Elberta Crate Co. v. A. C. L., 107 I. C. C. 499.

(c) Rates on crate and box material from Bainbridge and Brunswick, Ga., to destinations in Florida on Florida East Coast Ry., found unduly prejudicial to complainants and unduly preferential of their competitors shipping intrastate in Florida to extent that the factors from Jacksonville exceed rates contemporaneously maintained on like traffic for equal distances moving intrastate from points

in Florida to same destination. Elberta Crate Co. v. A. C. L., 107 I. C. C. 499.

(d) Interstate rates should not be made too high on assumption that intrastate rates may be too low. Southern Class Rate Investigation, 109 I. C. C. 300, 304.

(e) Intrastate rates were neither prescribed nor approved by the commission but are maintained under state authority and can not be regarded as controlling in determining the measure of the interstate rates or the relationship of the interstate and intrastate rates. Iola Cement Mills Traffic Asso. v. A., T. & S. F. Ry., 122 I. C. C. 337, 345.

(f) In so far as practicable, all rates, intrastate and interstate, should contribute in fair proportion to revenues of carriers. Therefore, in a general territory where traffic and operating conditions are substantially similar rates for given distances should be substantially the same. Consolidated Southwestern Cases, 123 I. C. C. 203, 211.

(g) Class and commodity rates on various articles between Oklahoma and designated portions of Kansas and Missouri, in their relations to relatively lower intrastate rates within those portions of Kansas and Missouri, found to result in undue prejudice and preference and in unjust discrimination against interstate commerce. Consolidated Southwestern Cases, 123 I. C. C. 203, 350, 351.

(h) Rates on crushed stone from Thornton, Ill., to destinations in northern Indiana and southwestern Michigan found unreasonable as compared with contemporaneous intrastate rates from various Michigan competing points; with those to other Illinois destinations for comparable distances; and with lower rates to Elkhart, Ind., and Niles, Mich., points less distant than Kalamazoo, Mich. As rates beyond Elkhart and Niles rise abruptly traffic from Thornton to farther distant territory is practically excluded. However, while Illinois and Michigan intrastate rates are generally lower than corresponding interstate rates, they should be properly aligned with corresponding interstate rates to Niles and Elkhart, and less distant Indiana destinations. Reasonable basis of rates prescribed for future. Brownell Improvement Co. v. B. & O. C. T., 126 I. C. C. 414.

§13(7). Rail and Water Rates.

See Rail and Water Rates.

(a) Although the commission has used a ratio of water miles to rail miles for purpose of comparing rail-and-water and all-rail rates, before this is done careful analysis should be made of conditions surrounding transportation of different lines. Under rail-and-water rates traffic must be unloaded from the ship and reloaded into cars; and cost of operating ship is practically same whether it carries full cargo or no cargo, and much depends upon ability of ship to obtain a proper load and return cargo. Moreover, transportation conditions in connection with both rail hauls and water hauls change from time to time. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155, 161.

(b) The mere fact that there has been a considerable movement of a commodity by water from and to certain points is no proof that all-rail rates on same commodity from and to same points were or are depressed or subnormal. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661, 674.

§14. Competition.

(1) In General.

See Advanced Rates §5 (7); Competition; Discrimination §8 (3).

(a) While commercial conditions and carrier competition are factors to be considered in determining lawful rates, they should not be given such importance as completely to outweigh factors more directly related to transportation, such as cost and value of service. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 134.

(b) Within recognizable limits, carrier competition makes for adequacy of service at reasonable rates, but duplication of service by reason of duplicated plant and duplicated labor costs may result to disadvantage of carriers and shippers alike. Denver & Rio Grande Investigation, 113 I. C. C. 75, 156.

(c) A rate deflected by competition is manifestly no measure of a reasonable maximum basis. Benson Produce Co. v. G. N., 113 I. C. C. 541, 547.

(d) A carrier may properly initiate rates to meet competitive conditions so long as such rates are lawful. Grain and grain products, 115 I. C. C. 153, 164.

(ef) Where a carrier elects to meet

commercial or carrier competition, in doing so, it must not cause undue prejudice. See 43 I. C. C. 458, 465. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 592.

(g) Healthy competition is no less important between ports than between rail or water carriers. There is, however, a limit beyond which disregard by rail carriers of geographical advantages of one port in favor of another will impair rather than promote healthy competition between the ports. There is ground for believing that a policy of port equalization, if carried beyond reasonable limits, has the effect of strengthening unduly, at expense of others, those ports which by reason of natural or acquired advantages have attained commanding positions in export and import trade. Such a policy also encourages waste in rail transportation. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 369.

(h) Rail carriers' actual water competition on local rail traffic is the cost to shipper of marine insurance, plus expense to reach the dock at point or origin, local steamer rate, and expense of making delivery at destination. Pacific Coast Fourth Section Applications, 129 I. C. C. 3, 15.

(i) Under the law as construed by the commission all-rail rates "can be no lower than necessary to meet existing competition." Pacific Coast Fourth-Section Applications, 129 I. C. C. 3, 18.

(j) Finding in original report, 104 I. C. C. 66, that proposed rates on fruits and vegetables between points in California and Oregon, Washington, Idaho, Utah, and Montana, involving both increases and reductions, had not been justified, affirmed. Circumstances and conditions under which commission prescribed or found not unreasonable higher rates on like traffic are too dissimilar in too many important respects to entitle such comparisons to much weight and evidence does not indicate that present rates are depressed by real or potential water competition or that they are not remunerative. Fruits and Vegetables Between Pacific Coast States, 129 I. C. C. 569.

§14 (2½). Pipe Line Competition.

See Pipe Lines.

(a) Based upon light traffic density and unfavorable operating and financial conditions, joint distance commodity rate assessed on petroleum crude oil from Texon, Tex., to Texas City, Tex., for coastwise movement, found not unreasonable because it exceeded lower rate subsequently established, such lower rate being literally forced upon carrier to meet pipe-line competition. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736.

§14 (3). Railroad Competition.

See Discrimination §8 (3); Equalization of Rates §4 (2); Long and Short Hauls §9; Railroad Competition; Reasonableness of Rates §8 (2).

(a) While carrier competition is a factor to be considered in determining lawful rates, it should not be given such importance as to completely outweigh factors more directly related to transportation, such as cost and value of service. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 134.

(b) Absence of carrier competition does not warrant maintenance of rates upon an unduly high level. Was-Cott Corp. v. K., G. J. & E., 109 I. C. C. 468, 470.

(c) Where a carrier elects to meet commercial or carrier competition, in doing so, it must not cause undue prejudice. See 43 I. C. C. 458, 465. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 592.

§14 (5). Water Competition.

See Discrimination §8 (5); Equalization of Rates §4 (4); Long and Short Hauls §10; Reasonableness of Rates §8 (4).

(a) A rate established by rail lines from the Atlantic to the Pacific coast to meet water competition might well be near the border line of confiscation for that movement and still be unreasonable as a maximum when applied to a small proportion of total movement. Associated Oil Co. v. A. E. R. R., 112 I. C. C. 350, 360.

(b) It is not commission's province to require carriers to meet rates of water carriers by maintenance of rates lower than reasonable maxima. Consolidated Southwestern Cases, 123 I. C. C. 203, 319.

(c) The policy declared by Congress in section 500 of the transportation act,

1920, is to foster and preserve in full vigor both rail and water transportation. Traffic between trunk-line territory and Texas ports and points contiguous thereto is naturally tributary to ocean lines and to permit rail carriers from St. Louis, Chicago, Pittsburgh, Cleveland, and other points to maintain rates so low as to deprive such water carriers of the traffic naturally theirs is not in accord with the spirit of section 500. Consolidated Southwestern Cases, 123 I. C. C. 203, 341.

(d) Although ordinarily carriers are not obligated to meet water competition, nevertheless they may not create an unduly prejudicial situation by meeting it at one point and failing to meet it at a competing point. Bunker Hill & Sullivan Co. v. O. W. R. R. & N., 132 I. C. C. 266, 271.

(e) While in 249 U. S. 557, Supreme Court declared the specific purpose of section 4 (2) is to insure and preserve water competition and to prevent competition that kills, the only fair construction to be placed upon that portion of the act is that it is not applicable except in those cases where rates have been increased after water competition has been eliminated. Woodstock Lbr. Co. v. B. & A., 129 I. C. C. 255, 257.

§15½. Cost Computations.

See Infra §17; Weights and Weighing II.

(a) Complainant objected to figures of carriers purporting to show cost of performing lighterage service as being incomplete, lacking in detail, and of such character as to leave not only a wide margin of possible error, but a wide opportunity for difference of opinion. HELD: While cost figures without the details upon which those figures are based are open to serious criticism, the lack of detail goes to weight to be given cost study and not to its relevancy. Motion to strike the study from record denied. Colgate & Co. v. N. Y. C., 112 I. C. C. 573, 578.

(b) A cost study is ordinarily little more than a very rough indication, and, even if unusually comprehensive and exact, it should not be the sole basis for fixing rates. The value of the service to the shipper and many practical considerations may be of equal or greater importance. Switching at St. Louis and East St. Louis, 120 I. C. C. 216, 220.

(cd) Car-foot-mile formula for determining relative costs for transportation of milk is not, in its present form, adaptable to freight service. Character of milk traffic, expedited service given it, regularity of movement, with loaded cans in one direction and empty cans in return movement, constituting practically a "shuttle service," and other features, make it more nearly comparable with passenger-train service, and exclusion of operations and expenses of freight service and limitations of cost study to passenger-train service, including passenger proper, express, mail, and milk, is not improper. Milk and Cream Between New England Points, 126 I. C. C. 38, 48.

(e) Theory that milk is an auxiliary service and might properly be charged only with out-of-pocket cost, with no charge for any portion of expenses which would be incurred whether milk services were rendered or not, found not tenable. The same theory might apply with equal force to mail or express and would result, if followed, in one or more "auxiliary" services becoming unduly preferred in so far as rates are concerned. See 74 I. C. C. 48, 71. Milk and Cream Between New England Points, 126 I. C. C. 38, 60.

(f) While it is true that car-foot-mile does not constitute an ideal single unit of measure for apportionment of a number of individual accounts carrying expenses common to different services, nevertheless it remains the best basis immediately available for apportioning common expenses that is practicable and at same time reasonably fair and equitable. Although results are not regarded as furnishing precise and accurate ascertainments of relative costs, they are entitled to considerable weight. Milk and Cream Between New England Points, 126 I. C. C. 38, 60.

(g) Cost figures are at best only estimates and are not at times of sufficient accuracy or certainty to warrant their use in determining reasonableness of rates. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 658.

(h) Cost studies based on the average cost of handling all traffic can not be accepted as showing cost of tonnage of a particular commodity or class of commodities Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 52.

§17. Cost of Operation.

See Infra §18; Supra §15½; Advanced Rates §7 (2), §10, §11; Division §3; Reasonableness of Rates §9; Transportation §14.

(a) Maintenance charges of the great Northern Ry. Co., for the year 1924, found not a safe standard of normal charges for other roads. Revenues in western District, 113 I. C. C. 3, 22.

(b) A showing that for a particular year the freight operating expenses in southern district were lower than in western or eastern district can hardly determine proper measure of a rate on a single commodity. Sterchi Bros. v. G. N., 113 I. C. C. 665, 666.

(c) Cost of transportation per mile by water is comparatively high for short distances and very small for long distances. See 24 I. C. C. 570. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

§18. Cost of Service.

See Supra § 17; Advanced Rates §7 (2); Hoch-Smith Resolution (bb); Reasonableness of Rates §9, §19.

(a) It is extremely difficult, if not impossible, to ascertain accurately the cost of transporting a particular kind of traffic for a certain distance. Sugar from Key West, 112 I. C. C. 347, 348.

(b) Value of a commodity and cost of service should be given important consideration but they are by no means controlling factors in determining proper rates on individual commodities. The public interest requires that value of service, or what the traffic can reasonably bear, be also given important consideration. Frohman Chemical Co. v. B. & O., 115 I. C. C. 322, 323.

(c) The value of a cost study showing average cost per unit of switching obviously depends upon selection of a test period representative as to number of cars handled, a careful count of actual number switched, and proper assignment and apportionment of expense to switching service involved. Rates of P. & P. U. Ry., 115 I. C. C. 469, 487.

(d) Ton-mile earnings over a road traversing a mountainous territory where operating conditions are unusual and difficult may well be somewhat higher than earnings for a haul over level country. Cameron, Joyce & Schneider v. D. & R. G. W., 120 I. C. C. 129, 130.

(e) The ratio in favor of water transportation as compared with rail transportation increases with length of water haul, but what the ratio may be in case of long hauls between the costs through Panama Canal is purely speculative. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

(f) The rapid growth of traffic in dairy products from mid-western States, its present volume, its importance to the producer, and its necessity to the consumer, are considerations which should place the cost of movement at a minimum fixed with due regard to revenue of carriers. Duluth Chamber of Commerce v. C. & N. W., 120 I. C. C. 683, 692.

(g) It is recognized that operating costs do not increase in proportion with increase in car loading and that the increase in cost is in fact relatively small. Both ton mile and car mile yields merit consideration, but the latter of more significance in the case of heavy loading commodities. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 505.

(h) The rates and charges of a railroad can not be based entirely on the cost for each particular character of service rendered. If such was the case, the passenger with baggage would pay more than the passenger without baggage, and the rates to large industrial centers would vary dependent upon the character of terminal service employed, including connecting line switching. Cost of service is an important element, but not the only or necessarily the controlling one by which to measure a rate or charge for a particular service. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 702.

(ij) Generally speaking, terminal services are relatively more expensive in connection with water service than with rail service. On other hand, what may be termed line-haul expenses of ocean carriers are relatively low for long hauls. Consolidated Southwestern Cases, 123 I. C. C. 203, 370.

(k) Freight rates combine two factors of cost—(1) terminal cost and (2) line-haul cost. The first remains constant, whatever the length of haul, but it is a generally accepted theory that latter is somewhat higher for shorter than

for longer hauls. Consolidated Southwestern Cases, 123 I. C. C. 203, 385.

(l) Operating costs do not increase in proportion with increase in car loading, as increase in cost on this account is in fact relatively small. While both ton-mile and car-mile yields merit consideration in determining reasonableness of rates, the latter are of more significance in case of heavy-loading commodities. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 505.

(m) Rates and charges of a railroad can not be based entirely on cost for each particular character of service rendered. If such were the case, the passenger with baggage would pay more than the passenger without baggage, and rates to large industrial centers would vary dependent upon character of terminal service employed, including connecting switching. Cost of service is an important element but not the only or necessarily the controlling one by which to measure a rate or charge for a particular service. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 702.

(n) While the Commission might not require a reduction in the rates attacked merely because the costs warrant it, that fact is of importance in considering whether the rates may be reduced to relate them more fairly to those from the southern districts. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 363.

(o) Theory that milk is an auxiliary service and might properly be charged only with out-of-pocket cost, with no charge for any portion of expenses which would be incurred whether milk services were rendered or not, found not tenable. The same theory might apply with equal force to mail or express and would result, if followed, in one or more "auxiliary" services becoming unduly preferred in so far as rates are concerned. See 74 I. C. C. 48, 71. Mil and Cream Between New England Points, 126 I. C. C. 38, 60.

§20. Distance of Haul.

See Blanket Rates §9; §15½ (a) (h) (i) (j) (k); Bridges and Tolls; Car Ferry; Differentials; Distance Rates; Evidence §58; Reasonableness of Rates §10, §36; Through Routes and Joint Rates §6.

(a) Carriers are left free to ignore differences in distance so long as they do not unduly prefer one port or locality or maintain rates so low as to burden other traffic. See 95 I. C. C. 539. But an order from commission requiring them to ignore such differences is a different thing. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 125.

(b) Fact that carriers have entirely disregarded element of distance in fixing rates on a specific commodity to various points does not necessarily show unreasonableness in rates. Adams & Kelly Co. v. A., T. & S. F., 109 I. C. C. 241, 243, 244.

(c) Distances over short tariff routes have a closer relation to the actual distances traversed in the movement of the traffic than do the strict short line distances, and the Commission is of the opinion that averages based on the former method may be fairly used for comparative purposes. Midcontinent Oil rates 1925. 112 I. C. C. 421, 439.

(d) Rate on sand from Michigan City, Ind., to points on connecting lines in Chicago, Ill., switching district, found not unreasonable or unduly prejudicial as compared with lower rates from Dune Park, Aetna, Millers, and Gary, Ind., and other near-by competing producing points. The comparisons, based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice, the differential between Michigan City and alleged preferred points is less than that prescribed by commission between the inner and outer zones, Michigan City having been found to be properly included in the higher 52-mile scale, whereas alleged preferred points are in the lower 35-mile scale, indicating that alleged preferred points are entitled to advantage of their location. Furthermore, certain of these points are not served by same carriers serving Michigan City. Bos Sand Co. v. A., T. & S. F., 112 I. C. C. 121.

(e) The unnecessary hauling of traffic over unduly circuitous routes at same rates that are applicable over direct routes result in wasteful transportation. Brick and Clay Products in the South, 113 I. C. C. 380, 381, 382.

(f) Distance is not the only factor to be considered either in making of a rate by a carrier or in commission's determination of what would be a reasonable basis. Benson Produce Co. v. G. N., 113 I. C. C. 541, 546, 547.

(g) The present rates on milk and cream in the west and northwest are about 10% below those in central territory which are based on the scale prescribed in 46 I. C. C. 601. The average haul in central territory was found to be considerably less than 50 miles. Milk and cream in northwest, 115 I. C. C. 77, 80.

(h) Fact that rates applicable under one distance scale in a particular section of territory are higher than rates under a similar scale applicable in contiguous territory does not establish unreasonableness of higher rates where both scales apply over extensive areas in which traffic, operating and transportation conditions vary. Wichita Chamber of Commerce v. Am. Exp. Co., 115 I. C. C. 729, 731.

(i) Rates on wrought-iron or steel pipe and fittings between points in Texas and points in Oklahoma found unreasonable to extent they exceeded rates for like distances computed under scale prescribed on iron and steel pipe in Memphis-Southwestern Investigation, 77 I. C. C. 473. Reasonable rates prescribed and reparation awarded. Lone Star Gas Co. v. C., R. I. & G., 118 I. C. C. 717.

(j) Rates which are designed to effect market equalization necessarily disregard distance to some extent. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 752.

(k) Carriers are left free to ignore differences in distances for competitive or other reasons so long as they do not unduly prefer one port or locality or maintain rates so low as to burden other traffic. But an order from the commission requiring them to ignore such differences is quite a different thing. Iron and Steel Fabricated in Transit, 120 I. C. C. 325, 327.

(l) Distance is not necessarily a controlling factor in switching costs, the time consumed in rendering service being of more importance. Switching at St. Louis and East St. Louis, 120 I. C. C. 216, 222.

(m) Distance is an important consideration in determining proper rate relationship between territories where there is no material difference in transportation conditions. Como Chemical Co. v. A., T. & S. F., 120 I. C. C. 517, 519.

(n) Comparison of rates based upon distance alone have little probative value when rates compared are group rates, in the establishment of which the element of distance must to an extent be subordinated to other considerations. Cherry Co. v. C., M. & St. P., 123 I. C. C. 59, 61.

(o) Upon further consideration, the Nashville, Chattanooga & St. Louis Ry., authorized to use 50 miles as the constructive mileage in determining rates on fertilizers over its route via Hobb's Island and Gunters Landing, Ala. In 100 I. C. C. 513, a similar constructive mileage was authorized for application between these points and no reason appears why same exception should not be made in this case. Original report, 113 I. C. C. 389. Fertilizers Between Southern Points, 123 I. C. C. 193, 194, 195.

(p) Distances computed over shortest routes over which carload traffic can be moved without transfer of lading required to be used in computing rates under distance scales prescribed or approved for application in the Southwest. Consolidated Southwestern Cases, 123 I. C. C. 203, 384.

(q) Fact that earnings under rates assailed are slightly higher than those under similar rates for shorter distances, is not persuasive that they are excessive. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 714.

(r) Ordinarily rates for greater distances do not increase in ratio of added distance. For Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 327.

(s) Commission can not accede to view that distance is not one of the most important factors which should be considered in determining whether or not port adjustments are unlawful. However, it is by no means the only factor. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 387.

(t) The unnecessary hauling of traffic over unduly circuitous routes at the same rates that are applicable over direct routes results in wasteful transportation. Western Cement Rates, 132 I. C. C. 273, 278.

(u) While in 48 I. C. C. 201, commission observed that "under present rate systems rates seem more nearly proportional to square root of the distance than to distance itself," this statement

must be taken with qualification, as functions of the parabolic curve thus described tend toward a condition, as distance increases, where added mileage does not carry any increment in the rate at all. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 38.

(v) Fact that spread between rates to more distant destinations increases instead of decreases in accordance with the general principle may be offset by fact that a higher level of rates is justified in a territory of relatively low traffic density. National Canners Asso. v. B. & O., 129 I. C. C. 269, 278.

§22. Equipment Furnished.

See Infra §48½; Cars and Car Supply; Classification §12⅞; Minimums; Reasonableness of Rates §13; Refrigeration §4¼.

(a) Characteristics surrounding transportation of newspapers in baggage cars are so varied as to weights and revenue per shipments, length of hauls, volume of tonnage, and methods of handling and diffusion, that it is impractical to attempt to determine reasonableness of a flat charge by allocations of costs of transportation. Newspapers in Baggage Cars, 104 I. C. C. 527, 533.

(b) Baggage-car service for newspapers is different from any other freight or passenger service rendered by railroads in several important characteristics, and for this reason many ordinary tests used in determining reasonable rates for transportation services, such as comparisons with rates on other commodities for corresponding distances, can not be employed. Newspapers in Baggage Cars, 104 I. C. C. 527, 537.

(c) The empty-car movement occasioned by livestock traffic in comparison with loaded-car mileage is relatively high as compared with box, refrigerator, coal, flat, and tank cars. American Nat'l. Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 616.

(d) In the transportation of dolomite to glass industries, box cars are necessary as dirt and cinders from locomotives render it unfit for use as a flux. Ordinary dirt or dust, aside from cinders, does not affect such use, nor is dolomite damaged by dampness as is fluxing lime. Dolomite and Fluxing Stone, 128 I. C. C. 23, 24.

§22¼. Erroneous Rate.

See Advanced Rates §5 (6); Erroneous Rates.

(a) Carriers over a long period of time erred in not collecting applicable rates and complainant urged that this long-continued practice raises a presumption that basis upon which rates were collected, was and is reasonable. HELD: A practice based on an error, however long maintained, raises no presumption whatsoever. Berninghaus Co. v. C. & N. W., 109 I. C. C. 104, 106.

§22½. Expert Evidence.

See Tariffs §18 (a).

§25½. Hearsay Evidence.

(a) No consideration accorded statements contained in letters not sworn to, such evidence being considered as hearsay. Knight-Luttrell Iron Co. v. S. A. L., 120 I. C. C. 580, 581.

§29. Long Continuance of Voluntary Rate.

See Infra §43, §68; Advanced Rates §5 (4); Express Companies §22; Reasonableness of Rates §16, §16½, §25.

(a) The commission has frequently found that a prima facie presumption of reasonableness attaches to a rate long voluntarily maintained. But the continuance of a given rate is not conclusive evidence of the reasonableness of that rate. Tunnell Co. v. P. R. R., 120 I. C. C. 425, 427.

(b) The long continuance of a rate or rate basis is entitled to consideration. However, the primary question here is whether the assailed rates, in whatever manner constructed, are reasonable and free from unlawfulness. Acme Brick Co. v. A. & V. Ry., 128 I. C. C. 715, 719.

§30. Low Rate in Opposite Direction.

See Comparative Rates; Discrimination §11; Reasonableness of Rates §27¾.

(a) Contention that rates on cabbage from South Carolina producing districts to northern destinations are un-

reasonable as compared with southbound vegetable rates, not sustained. Vegetables which move at southbound rates are mainly northern-grown hardy winter vegetables substantially different in character and move under much less exacting transportation conditions. Moreover, the southbound rates have been influenced by competition of eastern and western vegetables as well as by competition with boat lines bringing such vegetables to south Atlantic ports for distribution into the interior. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 615, 618.

(b) Rate charged on washing powder from San Diego, Calif., to Cleveland, Ohio, found not unreasonable as compared with lower rate contemporaneously maintained in reverse direction, which lower rate was subsequently established eastbound. Citrus Soap Co. v. B. & O., 109 I. C. C. 63.

(c) Reduction in rate in one direction does not necessarily require similar treatment in reverse direction, and failure to make such change immediately does not constitute grounds for awarding reparation without specific proof of damage. Citrus Soap Co. v. B. & O., 109 I. C. C. 63, 65.

(d) Westbound rate on lawn mowers from Battle Creek, Mich., to Los Angeles, Calif., found not a fair measure of a reasonable maximum rate on like traffic moving eastbound between same points. Rich Steel Products Co. v. S. P. Co., 109 I. C. C. 465, 467.

(e) The fact that a rate is higher in one direction between the same points than it is in the reverse direction does not of itself establish unreasonableness of the higher rate. Garrett & Co. v. N. Y. C. R. R., 112 I. C. C. 519, 521.

(f) The fact that a rate is higher in one direction between the same points than it is in the reverse direction does not of itself prove that the higher rate is unreasonable. Colgate & Co. v. N. Y. C. R. R., 112 I. C. C. 573, 576.

(gh) Difference in transportation conditions in opposite directions may justify a difference in rates. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313, 319.

(i) Transportation conditions east of Mississippi are more favorable than those west and justify a lower level of rates. Teague Hardware Co. v. C., B. & Q., 118 I. C. C. 221, 225, 226.

(j) Rate on wrought-iron pipe from Bowling Green, Ky., to Florence, Ala., found unreasonable to extent it exceeded a lower rate contemporaneously in effect in reverse direction. Reasonable rate for future prescribed and reparation awarded. Nashville Machine & Supply Co. v. L. & N., 118 I. C. C. 577.

(k) Bare comparisons of rates on a particular commodity moving in one direction with rates on unrelated commodities moving in opposite direction, without any showing of the various elements affecting their establishment, fall far short of establishing unlawfulness of the rates in effect on the particular commodity. Peyton Packing Co. v. A. & S., 122 I. C. C. 3, 6.

(l) Fact that rates in one direction exceed rates in opposite direction does not demonstrate unreasonableness of the higher rates. See 51 I. C. C. 23, 24. Stanley Lbr. Co. v. A. & V., 122 I. C. C. 506, 508.

(m) On further hearing, original report 98 I. C. C. 352, prescribing reasonable and nonprejudicial rates for interstate transportation of fresh meats and packing-house products, from Duluth, to St. Paul, Minn., affirmed. Transportation conditions being substantially same in both directions, there is a clear discrimination in charging lower rates from St. Paul to Duluth than from Duluth to St. Paul, and under circumstances, it is impossible to conclude that Duluth packing plant suffers no injury because of this discriminatory freight-rate situation, or that its competitive position would not be improved if such discrimination were removed. It is an unfair situation for which no justification has been offered and should be corrected. Duluth Chamber of Commerce v. C., St. P., M. & O., 122 I. C. C. 739.

(n) Findings in original report, 95 I. C. C. 104, reversed in part and rates on scrap brass and scrap copper from New York rate points to Pittsburgh, East Liberty, and Meadville, Pa., found unreasonable to extent they exceeded rates contemporaneously in effect in the opposit direction between specified dates. Reparation awarded. Union Smelting & Refining Co. v. C. R. R. of N. J., 128 I. C. C. 129.

(o) Rate on linseed oil from Chicago, Ill., to Milwaukee, Wis., found not unreasonable or otherwise unlawful as compared with rates contemporaneously in ef-

fect in the opposite direction. Lower rate is necessary to enable Milwaukee manufacturers to compete in the Chicago market with manufacturers located at Minneapolis and Chicago. Rate assailed is lower than those to other Illinois points for comparable distances and is the same as rate applicable on cottonseed, corn, and soya-bean oils to Milwaukee. American Linseed Co. v. C., M. & St. P., 128 I. C. C. 163.

(p) Shipments of linseed oil from Chicago to Milwaukee moved in box cars in direction of prevailing empty-car movement. Upon contention that rate on such traffic should be lower than rate applicable on linseed oil in opposite direction, which is shipped largely in tank cars, with empty-return movement, HELD, Heavier loading of tank cars than of box cars minimizes any advantage to carrier which it might derive through utilization of cars which would otherwise move empty. American Linseed Co. v. C., M. & St. P., 128 I. C. C. 163, 165.

(q) Difference in transportation conditions may justify a higher rate in one direction than in the opposite direction, provided the higher rate is not intrinsically unreasonable. See 92 I. C. C. 671. American Linseed Co. v. C., M., & St. P., 128 I. C. C. 163, 166.

(r) Second-class rate applicable on games or toys n. o. i. b. n. and assessed on domestic mah-jongg sets from San Fransico and Paraffin, Calif., to Chicago, found applicable, but unreasonable as compared with lower commodity rate contemporaneously in effect on toys, and to extent it exceeded lower commodity rate applicable in opposite direction, to which basis rates assailed were subsequently reduced. Reparation awarded. Paraffine Companies v. S. P. 128 I. C. C. 421.

(s) Rates on furniture from Memphis, Tenn., to points in c. f. a., Buffalo-Pittsburgh, and southern territories found unduly prejudicial to extent that rates from Memphis to competing points in said territories exceed rates contemporaneously maintained in the reverse direction; and unduly preferential of competing points in southern territory to extent that relations of rates to common destinations in said territories are less favorable to Memphis than those which would result from establishment of rates from Memphis and southern territory competing points made on bases of rates herein found reasonable. Nonprejudicial bases of rates prescribed for future. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445.

(t) The fact that the rate in one direction exceeds the rate between the same points in the opposite direction does not in itself demonstrate that the higher rate is unreasonable. Montello Granite Co. v. M. St. P. & S. S. M. Ry., 129 I. C. C. 427, 428.

(u) Carriers should be permitted to establish rates on commodities produced in their territory which will meet market competition without being compelled to maintain the same level of rates in the opposite direction. Morse Dry Dock & Repair Co. v. A. C. L. R. R., 132 I. C. C. 351, 353.

(v) Fifth-class rate on soy, soja, or soya beans from Bloomington, Ill., to Fort Smith, Ark., found unreasonable as compared with lower rate contemporaneously in effect from Norfolk, Va., to Atlanta, Ga., and Athens, Tenn., for similar distances; and to extent it exceeded lower rate subsequently established in reverse direction. Class rates are the same in both directions, and carriers failed to show why rate assailed should exceed that in reverse direction. Reparation awarded and reasonable rate for future prescribed. Binding-Stephens Seed Co. v. A., T. & S. F., 129 I. C. C. 291.

§31. Manufactured Product.

See Classification §10, §11, IV; Reasonableness of Rates §17.

(a) Raw Materials and Finished Products: Differences in value, and in value of services, are important elements in determining rates on finished or manufactured articles in relation to those on raw material or product from which they are derived. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 116.

(b) Raw materials and Finished Products: Applicable rate on sporadic shipments of pulp wood found unreasonable as compared with, and to extent it exceeded, rate on wood pulp, the manufactured product of pulp wood. Reparation awarded. Watab Paper Co. v. N. P. Ry., 107 I. C. C. 131.

(c) Rates dependent upon the method in manufacturing a commodity rather than on nature of the commodity are unlawful. Cotton Linters from Southwest, 118 I. C. C. 419, 434, 435.

(d) It does not necessarily follow that rates on raw material are unreasonable because they are higher than rates on the finished product. Hammersley Mfg. Co. v. E. R. R. Co. 126 I. C. C. 491, 493.

(ef) Broom handles were assessed commodity rate applicable on finished handles. Contemporaneously a lower rate applied on "handles, in rough, sawed or turned to shape, not further finished" which complainant contended was applicable. Carrier, however, urged that after the handles are turned to shape they are not in marketable condition until they are either tumbled or sanded which they contend is a "further finishing" process preventing application of rate sought. HELD: Since evidence adduced does not clearly show condition of handles when shipped it is insufficient to warrant a finding that rate charged was inapplicable. Nat'l. Broom Co. v. A., T. & S. F., 128 I. C. C. 98, 99.

(g) Although it is true that a manufactured article would ordinarily be rated higher than the material from which it is made, the comparatively small number of classes into which all commodities must be grouped in the classification places an important limitation upon the application of that principle. Eggerss-O'Flyng Co. v. C. & N. W., 128 I. C. C. 644, 649.

(h) Raw materials are generally accorded lower rates than the products. Kawneer Co. v. C. & N. W. Ry., 132 I. C. C. 643, 644.

(i) Raw material is generally accorded a lower rate than the finished product. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177, 183.

§32. Market Competition.

See Equalization of Rates §4 (5), §6; Express Companies §19; Long and Short Hauls §8; Market Competition.

(a) Fact that element of primary market competition does not exist to as great an extent on one commodity as on another does not justify rates based upon "what the traffic will bear" without regard to other transportation conditions. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35, 43.

(b) Equalization of prices of goods in foreign markets can not be accepted as a guide for determining a proper rate adjustment for rail movements in this country, or whether certain interests are given an unfair advantage by maintenance of export rates. Export Rates on Wheat and Products, 107 I. C. C. 276, 285, 286.

(c) Where a locality or community is endeavoring to build up a market and in doing so is confronted by competition and the intrenched influence of other long-established markets in same general territory, elaborate evidence is not required to show that such locality or community is entitled to relief under the act if the rates are improperly related. See also 61 I. C. C. 226, 233; 64 I. C. C. 485, 489. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C. 501, 512.

(d) Under methods generally followed in marketing cotton the crops of many growers, composed usually of different grades and staples, are concentrated at one point so that enough bales can be accumulated to fill orders for the several grades and staples. Concentration points thus serve as markets for the cotton growers. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 581, 582.

(e) It is the province of carriers to conduct commerce in channels demanded by the public. Public interest is not conserved by shutting out, through denial of a necessary transportation service, an important agricultural product from markets which it can reach over routes requiring less service than that over other routes primarily because one of the carriers on whose lines traffic orginates does not reach those markets over routes which would give it a long haul. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 587.

(f) The reasonableness of a rate does not necessarily depend upon the ability of shippers profitably to market their product under it. Rawlings v. C. B. & Q. R. R., 115 I. C. C. 103, 104.

(g) The grain and milling industry is highly competitive and a difference of a few cents per 100 pounds, or even less, between competitors is frequently more than can be absorbed by competitors suffering the disadvantage. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 596.

(h) Where a certain commodity is shipped by two plants located in the same

vicinity and one of those plants has the benefit of a lower freight rate than the other, an attempt on the part of the plant having the higher rate to increase the selling price to the extent of the difference in rates would result, in many instances, in failure to secure the business. The prices for the raw materials and the cost of manufacturing may be exactly the same to each, but the plant having the higher rate is handicapped to that extent. Hollingshead Co. v. Director General, 120 I. C. C. 55, 57.

(i) Where a certain commodity is shipped by two plants located in same vicinity and one of those plants has the benefit of a lower freight rate than the other, an attempt on part of plant having the higher rate to increase selling price to extent of the difference in rates would result, in many instances, in failure to secure the business. The prices for raw materials and cost of manufacturing may be exactly same to each, but plant having the higher rate is handicapped to that extent. Hollingshead Co. v. Director General, 120 I. C. C. 55, 57.

(j) For competitive reasons it is highlv desirable that rate paid by a retail dealer located on one route be as nearly as may be the same as rate paid by a dealer located on another route at same point. Anthracite Coal Investigation, 122 I. C. C. 527, 536.

(k) Those who propose a system of rates, the avowed purpose of which is to promote long distance competition, confuse an economic problem with a transportation problem. Primarily it is not the concern of the Commission to equalize market competition. A shipper who comes to the Commission with a proposition of this character urging that the difference in freight rate against him is what keeps him out of an important market near which a competitor is situated implies to a greater or less extent that the difference in freight rates represents the amount of his handicap. But freight is only one of the factors in a shippers selling price. Among the cost factors figures by a shipper in laying down his product at a certain destination, fundamental and most important are his costs of production, including his costs of raw material and labor, and all of the elements which combined make up the cost of the finished product at his plant. These are secrets, perhaps the most closely guarded in the shippers business. Oklahoma Portland Cement Co. v. D. & R. G. W. Ry., 128 I. C. C. 63, 77.

(l) Competition between cement manufacturers is exceedingly keen throughout the country and any basis of rates from one producing point that is relatively lower than from another in territory where transportation conditions justify the same scale, unduly prefers one to the undue prejudice of the other. Experience has demonstrated that the most equitable and satisfactory method of removing preference and prejudice ordinarily present in rate adjustments on cement created through rivalry of producing points and carriers, is establishment of distance scales, thereby according each point of production the advantage of its location. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 81, 82.

(m) Healthy competition is no less important between ports than between rail or water carriers. There is, however, a limit beyond which disregard by rail carriers of geographical advantages of one port in favor of another will impair rather than promote healthy competition between the ports. There is ground for believing that a policy of port equalization, if carried beyond reasonable limits, has the effect of strengthening unduly, at expense of others, those ports which by reason of natural or acquired advantages have attained commanding positions in export and import trade. Such a policy also encourages waste in rail transportation. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 369.

(n) Receivers of coal by the rail-and-water route from Pennsylvania anthracite fields fix selling price of anthracite at Boston and the determinative factor in that selling price is the rail-and-water rate. Chadwick Coal Yard Co. v. N. Y., N. H. & H., 129 I. C. C. 165, 172.

§34¼. Mixed Shipments.

See Classification §7.

(a) Mixed vegetables from industries on the Santa Fe and Pacific Electric railways at Los Angeles, Calif., destined to Salt Lake City and Ogden, Utah, are subjected to switching charges at Los Angeles, while on shipments originating beyond Los Angeles switching charges are absorbed and the Los Angeles rate assessed. Upon complaint alleging un-

reasonableness, HELD: It is practice of carriers in the West to absorb switching charges only on competitive business. Traffic originating beyond Los Angeles constitutes competitive business whereas the traffic here involved is not competitive. Frank Produce Co. v. Director General, 118 I. C. C. 88.

§36. Need for Revenue.

See Infra §50, §51, §58; Advanced Rates §5 (4); Reasonableness of Rates §20, §30, §36.

(a) It is well established that the unfavorable financial condition of a carrier is not a justification for the continuance of an unreasonable rate on a particular commodity. Smith Co. v. N. Y., N. H. & H. Ry., 120 I. C. C. 43, 45.

§40½. Origin Of Traffic.

See Advanced Rates §5 (8); Through Routes and Joint Rates §9.

(a) Shippers are entitled to move their products to any market at reasonable and nonprejudicial rates and commission has repeatedly condemned action of carriers in adjusting rates so as to impede or stifle movement of commodities in any given direction. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84, 87.

(b) Fact that commodities consumed along a carrier's line can be supplied from origins on other parts of its system neither affords justification for, nor establishes reasonableness of, proposed increased rates from points located off the system. Grain and Products, 115 I. C. C. 615, 616.

(c) A finding by commission in a proceeding dealing with rate level on a particular commodity as a whole from points of origin covering a wide territory may not be considered as controlling in determining the reasonableness of rates from a particular origin point. Colgate & Co. v. P. R. R., 118 I. C. C. 243, 245.

(d) It has been long settled that no carrier has the right to so adjust rates on its own lines as unduly prejudice shippers on other lines, or to deprive such shippers of reasonable and just rates, merely through a desire to serve shippers on its own lines. White Eagle Oil & Refining Co. v. A., T. & S. F. Ry., 122 I. C. C. 223, 224.

(e) A carrier originating traffic or receiving it from its connections should be allowed to carry it as far as it can before delivering it to a connecting line, if public interest does not suffer thereby. See 81 I. C. C. 272, and other cited cases. Routing on Cotton, 129 I. C. C. 387, 391.

§42¼. Paper Rates.

See Advanced Rates §5 (4);§5 (7½); Reasonableness of Rates §24.

(a) A shipper may rightfully assail, and commission may properly condemn, unreasonable or otherwise unlawful rates regardless of their present use. Nebraska State Ry. Comm. v. A. & W., 113 I. C. C. 467, 469.

(b) Carriers showed that no shipments of commodity in issue moved from and to points involved since establishment of lower rate, and contended that such shipments constituted a sporadic movement, citing cases wherein commission declined to award reparation on such movements. HELD: Cases cited do not support that finding here. Every shipper is entitled to a reasonable rate on his traffic, and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided on its merits. See 100 I. C. C. 411. Davies & Thomas Co. v. C. R. R. Co. of N. J., 128 I. C. C. 241, 242.

§43. Past Rates.

See Supra §29; Advanced Rates §5 (4); Reasonableness of Rates §25.

(a) Rates on wheat bran, in straight and in mixed carloads with grain and products, from points in western and southwestern States to points in Louisiana, Texas, and New Mexico, during statutory period immediately preceding filing of complaint, found not unreasonable, discriminatory, or unduly prejudicial as compared with rates on similar feeds in same general territory. In 101 I. C. C. 14 rates were found unreasonable and unduly prejudicial for future only, but there relationship and not rates themselves were fixed. While carrier's practice of charging higher rates on bran than on other commodities during reparation period may well be found to have been unreasonably and unduly prejudicial, that would not mean that amounts of the individual rates charged were intrinsically too great for services rendered.

Robinson Milling Co. v. A. & S, 109 I. C. C. 595.

(b) Rates on zinc concentrates from points in the Joplin, Mo.-Miami, Okla., ore field to distinations in Illinois, Indiana, Ohio, West Virgina, and Pennsylvania found not unreasonable or otherwise unlawful. Such rates do not appear excessive as compared with those prescribed are approved as reasonable maxima in 61 I. C. C. 92 and other cases, and are subnormal in since that they are as low or lower than rates in effect prior to the general increase of 1920, whereas freight rates generally are from 12.5 to 26 per cent higher than rates in effect prior to that date. Moreover, record shows a large increase in value of concentrates since removal of the general increase, demand for zinc is rapidly increasing, and the Joplin-Miami field is the only large source of supply. United Zinc Smelting Corp. v. B. & O., 126 I. C. C. 677.

§43½a. Physical valuation.

See Physical Valuation

(a) Conceding that a tentative valuation of a carrier's property is without probative effect in any judicial proceeding where value of the property is in issue, HELD: That tentative valuations made by same body following identical metods in each case are an aid in checking the relative statis of property investment account of carriers. New England Divisions, 126 I. C. C. 579, 621.

§44¼. Prior Decision of Commission.

See Advanced Rates §14¾; Blanket Rates §4; Panama Canal Act; Previous Decisions of Commission; Through Routes and Joint Rates.

(a) Rates on grain and products from points in Washington and Oregon south of Snake River to Portland, Seattle, Tacoma, and other north Pacific ports, established as a result of commission's decision in Inland Empire Shippers League, 59 I. C. C. 321, found not unreasonable or unduly prejudicial. While competition from Puget Sound ports for purchase of wheat in the basin south of Snake River has been to a large extent destroyed, Portland enjoying a virtual monopoly of wheat from that territory, only by continuance of present differential in favor of Portland can that point be accorded benefits to which it is entitled by reason of its natural advantages. Walla Walla County Farm Bureau v. N. P., 107 I. C. C. 110.

(b) Rates on cottonseed between points in Oklahoma and Texas found unreasonable to extent they exceeded rates contemporaneously applicable for like distances between Shreveport, La., and Texas points under distance scale prescribed in Oklahoma Corp. Comm., 98 I. C. C. 183. Reparation awarded. Altus Cotton Oil Mill v. A., T. & S. F., 109 I. C. C. 92.

(c) Rates on lumber from points in Washington, Oregon, Idaho, Montana, and British Columbia, to Lincoln and Omaha, Nebr., and other points in Nebraska, Kansas, Missouri, Iowa, and South Dakota, found not unreasonable during period when such rates were on basis higher than to Twin Cities. These rates were formerly on a parity, the equalization being disrupted by application of general reductions required in Reduced Rates, 1922, 68 I. C. C. 676, which rate parity carriers subsequently restored. Rates assailed, however, are shown to compare favorably with rates from the Northwest to various points for substantially equal or greater distances. Adams & Kelly Co. v. A., T. & S. F., 109 I. C. C. 241.

(d) Bran, wheat: Rates on, in straight and in mixed carloads with grain and products, during statutory period immediately preceding filing of complaint, found not unreasonable, discriminatory, or unduly prejudicial as compared with rates on similar feeds in same general territory. In 101 I. C. C. 14, rates were found unreasonable and unduly prejudicial for future only, but there relationship and not rates themselves were fixed. While carrier's practice of charging higher rates on bran than on other commodities during reparation period may well be found to have been unreasonable and unduly prejudicial, that would not mean that amounts of the individual rates charged were intrinsically too great for services rendered. Robinson Milling Co. v. A. & S., 109 I. C. C. 595.

(e) Carrier presented in evidence a prior report of commission for purpose of establishing that certain rates were not unduly prejudicial. HELD: Present case must be disposed of upon conditions shown to have existed during period covered by complaint, and since former case related to a different period it was not

given consideration. Northern W. Va. Coal Asso. v. P. R. R., 109 I. C. C. 604, 608.

(f) Upon oral argument, former report, 95 I. C. C. 430, wherein rates on animal manure from Perth and Lovelock, Nev.,to eastbound transcontinental groups B to J, inclusive, and M, were found unreasonable, and reasonable rates based on the Calivada scale prescribed in 73 I. C. C. 496, and 91 I. C. C. 228, were prescribed for future to Groups F to J, inclusive, and M, affirmed. The Calivada scale rates are not on a depressed scale as compared with distance rates prescribed on fertilizer in the Southwest in Memphis-Southwestern Investigation, 77 I. C. C. 473. Minimum distance, scale of progression, minimum weights, and other considerations applicable to the two scales are different, much of the haul at rates herein prescribed is performed under transportation conditions at least no less favorable than those obtaining in the Southwest, and ton-mile earnings under rates prescribed decrease as distance increases. Pacific Manure and Fertilizer Co. v. A. & R. R. R., 109 I. C. C. 615.

(g) Following Midland Linseed Products Co., 68 I. C. C. 522, rates on linseed oil found unreasonable to extent they exceeded those contemporaneously in effect on cottonseed oil. Reasonable rates for future prescribed and reparation awarded. Glidden Co. v. C. R. R. Co of N. J., 118 I. C. C. 59.

(h) A finding by commission in a proceeding dealing with rate level on a particular commodity as a whole from points of origin covering a wide territory may not be considered as controlling in determining the reasonableness of rates from a particular origin point. Colgate & Co. v. P. R. R., 118 I. C. C. 243, 245.

(i) Proposed revision, including increases and reductions, in rates between points in southern Missouri, eastern Oklahoma, Arkansas, and Louisiana, and from points in this territory to Mississippi River crossings and Memphis, in purported conformity with distance scale of rates prescribed in Memphis Southwestern Investigation, 77 I. C. C. 473, and 98 I. C. C. 654, found not justified. While rates prescribed in above case were fixed as reasonable maxima, present lower adjustment on fruits and vegetables was not disapproved therein. Moreover, schedules as proposed would result in undue prejudice to Memphis in favor of St. Louis, in addition to creating fourth-section violations. Fruits and Vegetables, 120 I. C. C. 395.

(j) A finding of the commission made many years ago and designed primarily to place certain points upon a proper relationship, should not be accepted ipso facto as proving intrinsic unreasonableness in same rates subsequently attacked for sole purpose of reparation. Marshall and Jefferson v. T. & P., 120 I. C. C. 455, 458.

(k) Upon reargument, original report 104 I. C. C. 104, reversed, and through rates on cured meats and hides from certain packing points west of Mississippi River to destinations in trunkline and New England territories found not unreasonable or unduly prejudicial in relation to existing rates on hogs and sheep in double-deck cars, and on cattle, from and to same points. Morrell & Co. v. N. Y. C., 120 I. C. C. 537, 539, 540.

(l) Rates on lubricating-oil stock from Chaison, Tex., to Eldorado and Topeka, Kans., found unreasonable to extent they exceed rates constructed in accordance with oil rates prescribed in 112 I. C. C. 421, from Texas points to destinations in western trunk-line territory. However, as findings in that case were designed to effect proper relations rather than to establish maximum reasonable rates, they do not afford a proper measure of reasonableness in the past and record herein establishes no adequate basis for reparation. Reasonable rates prescribed for future. Petroleum Oils Corp. v. A., T. & S. F., 120 I. C. C. 614.

(m) Complaint filed during pendency of a similar proceeding alleged that class E rate on clam shells from Dixon, Ill., to Fort Madison, Ia., was unreasonable, unduly prejudicial, and in violation of long-and-short-haul clause of section 4 of the act. The decision being adverse to its contentions, complainant now asks in effect that it be set aside on strength of its evidence in instant case. Evidence introduced here being similar to that presented in former case, wherein the class E rate was found not unreasonable, no good cause is shown for what would be tantamount to reversal of finding previously made after consideration of a more complete record. Accordingly, rate assailed found not unreasonable or other-

wise unlawful. Mississippi Pearl Button Co. v. I. C., 120 I. C. C. 647.

(n) Original report, finding that rates "are and for the future will be unreasonable," was reopened upon petition of carriers. Thereafter, complainants were permitted to amend their complaint with an allegation of damages. Report on further hearing reiterated the original finding and in addition awarded reparation. Upon contention that wording of commission's reports did not cover unreasonableness in past, HELD: While the word "were" was omitted from finding of unreasonableness in report awarding reparation, the question of past unreasonableness entered into the proceeding when amended complaint was filed. Evidence, upon which original report, later affirmed, was made, being presented some months prior to beginning of reparation period, and second report making provision for proof in affidavit form as to shipments moving subsequent to date of second hearing, shows inconsistency of any attempt to construe the finding as operative only on and after date of decision in second report. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723.

(o) In 93 I. C. C. 65, the commission found that the rates attacked on crude oil from Irvine and Beattyville, Ky., to Blue Island, Ill., a point within the Chicago switching district, were unreasonable and awarded reparation, reversing the findings in 59 I. C. C. 689, in which report the complaint was dismissed. The average distance from the eastern Kentucky fields to Blue Island does not differ greatly from the specific distances from Irvine and Beattyville. It is understood that in publishing the rates in compliance with the order, the defendants included the 14 points named in the readjustment. HELD, reparation awarded. Barnett Oil & Gas Co. v. Director General, 122 I. C. C. 651.

(p) In arriving at the rates on cement prescribed in Western Cement Rates, 48 I. C. C. 201; 52 I. C. C. 225; 69 I. C. C. 644; and the related rates prescribed in various other cases, the commission has not been controlled by the general level of rates on other commodities, whether switching or line haul, but rates prescribed have been made with special regard to the conditions surrounding transportation and marketing of that particular commodity with the view to establishing, and securing the maintenance of, general levels of rates in and between the several scale territories not only reasonable per se as applied to that commodity but under which rates from competing producing points are related to each other with close regard to distance. Iola Cement Mills Traffic Asso. v. A., T. & S. F., 122 I. C. C. 337, 347.

(q) Rates on coal from Thompson, Utah, to destinations in Utah, Nevada, and California west of Castle Gate, Utah, during Federal control, found not unreasonable as compared with those from Castle Gate, and Rock Springs, Wyo., to same destinations, and from Montana points for comparable distances, except to destinations on Nevada Northern, Western Pacific, and Los Angeles & Salt Lake. The more favorable transportation conditions from Rock Springs was recognized in 89 I. C. C. 666, which tends to offset somewhat longer average distances from Castle Gate or Thompson; a differential of 10 cents in favor of Castle Gate can not be considered an unreasonable charge for the 94-mile haul from Thompson, and Montana coal rates are on a somewhat lower level than those in other western States. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101.

(r) Following 95 I. C. C. 181; 107 I. C. C. 182, rates on rig irons in straight car-loads should be about 15 per cent lower than the rates on oil-well supplies. Consolidated Southwestern Cases, 123 I. C. C. 203, 331.

(s) In support of its request for lower rating complainant relies upon fact that such rating is now in force over a considerable portion of territory involved having been established following a previous case. FOUND: That case was a suspension proceeding in which respondents' proposal to increase rates was found justified. However, it does not follow from that finding that rating assailed is unreasonable. Kalamazoo Vegetable Parchment Co. v. C. K. & S. 128 I. C. C. 675, 680.

(t) The basis for the action of the Commission in a particular case must, of course, be provided by the record therein. Western Texas Chamber of Commerce v. H. & T. C. Ry., 129 I. C. C. 546, 555.

§44½. Public Interest.

See Advanced Rates §14; Blanket

Rates §4; Panama Canal Act; Through Routes and Joint Rates II.

(a) It is the province of carriers to conduct commerce in channels demanded by the public. Public interest is not conserved by shutting out, through denial of a necessary transportation service, an important agricultural product from markets which it can reach over routes requiring less service than that over other routes primarily because one of the carriers on whose lines traffic originates which would give it a long haul. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 587.

(b) The public interest will not be served by solving a carrier's financial problem at sacrifice of efficiency and economy of operation. Restrictions in Routing over S. L. & U., 115 I. C. C. 357, 369.

§47. Rate Via Competing Route.

See Equalization of Rates §4 (2); Reasonableness of Rates §27½, §27¾; Reparation §11; Routing and Misrouting §4½, §5, §5½; Through Routes and Joint Rates §15½.

(a) Rate charged on sand from Petersburg, Va., to Bunyon, N. C., found unreasonable to extent it exceeded lower contemporaneous rate on like traffic over a route other than route of movement, which lower rate was subsequently established over route of movement. Reparation awarded. Raleigh Chamber of Commerce v. N. S., 109 I. C. C. 52.

(b) A shipper is not to be denied a reasonable rate merely because he could have secured a lower rate by the use of another route. Hodgson Davis Grain Co. v. C. B. & Q. R. R., 113 I. C. C. 234, 236.

(c) Existence of lower rates over other available routes does not of itself warrant a condemnation of rate charged over a specific route of movement. Zaring & Co. v. N. Y. C., 112 I. C. C. 621, 622.

(d) Reference to lower rates to common points of destination is not sufficient to establish undue preference and prejudice. South Carolina Penitentiary v. A. & R. Ry., 113 I. C. C. 584, 586.

(e) Fact that a certain rate is in effect between two points over one route is not of itself proof of unreasonableness of a higher rate over some other route especially where one route is substantially longer than the other. Gentile Bros. Co. v. S. Ry., 113 I. C. C. 670, 672.

(f) Accidents by which shipments move via either of two intermediate points, because like specific class rates are applicable over both routes, should not alone determine the measure of reasonable rates over two lines of same carrier between same points, where no differences in transportation conditions are shown, where difference in distance is slight, and where a lower combination is sometimes figured over the shorter route and sometimes over the longer route. Firestone Tire & Rubber Co. v. Director General, 113 I. C. C. 751, 755.

(g) The existence of a lower rate over routes other than a particular route of movement is not of itself sufficient to establish the unreasonableness of the rate charged. Traffic Bureau, Chamber of Commerce v. Georgia R. R., 115 I. C. C. 419, 420.

(h) The mere showing of the existence of lower rates over other routes, and comparisons based upon distance alone, are insufficient to establish the unreasonableness of the rate charged. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 174.

(i) The fact that there was a lower rate over a competing line is not of itself proof that the rate charged was unreasonable, and the fact that after the shipment moved the rate was reduced to the level of the rate via the competing line raises no presumption that the former rate was unreasonable. Richfield Oil Co. v. A. T. & S. F. Ry., 118 I. C. C. 214, 215.

(jk) Although no presumption of unreasonableness attaches to a rate over a particular route because a lower rate applies over another route, a shipper is not to be denied a reasonable rate merely because he could have secured it by designating another route. Deere Plow Co. v. St. L., S. F. Ry., 120 I. C. C. 67, 68.

(l) Rate on bags, burlap, from Jersey City to Baltimore, found unreasonable to extent it exceeded lower rate contemporaneously in effect on burlap bagging from New York to Baltimore. Reparation awarded. Riegel Sack Co. v. C. R. R. Co. of N. J., 120 I. C. C. 405.

(m) The commission has repeatedly found that the existence of a lower rate over a competing route does not of itself

establish the unreasonableness of the rate charged. Newsome Feed & Grain Co. v. P. & L. E. R. R., 122 I. C. C. 329, 330.

(n) The fact that a lower rate was applicable over another route does not deprive a shipper of a reasonable rate over the route of movement. Spencer Co. v. A., T. & S. F. Ry., 122 I. C. C. 689, 690.

(o) No presumption of unreasonableness attaches to a joint through rate applicable over a particular route because of the fact that the intermediate rates via another route make a lower charge. Bell Bros. v. A. C. L. R. R., 123 I. C. C. 683, 684.

(p) Carriers participating in circuitous routes under similar circumstances and conditons may reasonably expect to charge higher rates than over the short route, but extent of such circuity which would justify a difference in rates may depend upon methods of construction. Where grouping is extensively employed at both origin and destination, and where reasons of sound public policy exist for treating rates and routes collectively rather than individually, substantial differences in distance over routes whose use public convenience and necessity require may reasonably be disregarded; but fact that rates are to be applicable over all such routes must be given due weight in fixing their level. Anthracite Coal Investigation, 122 I. C. C. 527, 536.

(q) Rate via route of movement can not be condemned merely because it was higher than the rate applicable over other routes. Dreer v. L. A. & S. L. R. R., 126 I. C. C. 130, 132.

(r) A shipper is not to be denied a reasonable rate merely because he could have secured a lower rate by the use of another route. California Packing Corp. v. S. P. Co., 128 I. C. C. 631, 632.

§47b. Rate Territories.

(a) Where transportation conditions throughout an extensive territory are substantially the same, commission is not disposed to allow rates on a particular commodity from limited section to control general basis of rates applicable throughout that territory in absence of a clear showing that such rates are too high. Harbauer Co. v. A. A. R. R., 115 I. C. C. 30, 32.

(b) The commission has in many cases recognized that usually transportation conditions in the Southwest warrant a somewhat higher basis of rates than in the Southeast, and that fact may be judicially noticed. United Fig and Date Co. v. A. C. L., 115 I. C. C. 643, 645.

(c) Fact that rates applicable under one distance scale in a particular section of territory are higher than rates under a similar scale applicable in contiguous territory does not establish unreasonableness of higher rates where both scales apply over extensive areas in which traffic, operating, and transportation conditions vary. Wichita Chamber of Commerce v. Am. Exp. Co., 115 I. C. C. 729, 731.

(d) Rates from Mississippi Valley to the Southeast are generally on a lower level than rates to the Southwest. Jackson Traffic Bureau v. A. & V., 118 I. C. C. 217, 219.

(e) Transportation conditions east of Mississippi are more favorable than those west and justify a lower level of rates. Teague Hardware Co. v. C., B. & Q., 118 I. C. C. 221, 225, 226.

(f) Generally speaking, rates in c. f. a. territory are on a lower basis than those in the southwest and the latter are on a lower basis than those in the Southeast. White Provision Co. v. A., B. & A., 118 I. C. C. 601, 603.

(g) The level of rates in Mississippi Valley territory is lower than in southeastern territory. See 87 I. C. C. 547. Florence Chamber of Commerce v. A., T. & S. F., 118 I. C. C. 710, 712.

(h) Traffic conditions are largely the same within Texas, Louisiana and Arkansas. Texas Co. v. K. C. S., 118 I. C. C. 713, 715.

(i) Transportation conditions in the Southeast do not warrant any higher basis of rates than in the Southwest. Capital Grain & Feed Co. v. I. C., 118 I. C. C. 732, 746.

(j) Transportation conditions throughout southern Missouri, Arkansas, western Louisiana, Oklahoma and Texas common point territory are so similar as to warrant substantially the same level of rates. Salt between Western and Southwestern Points, 120 I. C. C. 91, 108.

(k) The general level of rates is, and properly should be, higher in western trunk line territory than in central terri-

tory. Mayfield Chamber of Commerce v. A. & W. Ry., 120 I. C. C. 137, 140.

(l) In many cases the commission has found that traffic conditions east of the Missouri River justify a relatively lower level of rates. Anthony Produce Co. v. B. & A. R. R., 120 I. C. C. 224, 228.

(m) The commission has recognized that the rate level was and properly should be lower east than west of the Twin Cities and lower south of Sioux City than north and west of that point. Duluth Chamber of Commerce v. C. & N. W. Ry., 120 I. C. C. 683, 693.

(nop) The general rate level in territory west of Mississippi River is somewhat higher than in territory immediately east thereof. Russellville Compress Co. v. G., M. & N., 120 I. C. C. 481, 485.

(q) The general level of rates in the southwest is higher than in the southeast. Florence Chamber of Commerce v. L. & N. R. R., 122 I. C. C. 367, 369.

(r) A uniform scale of rates could with propriety be applied throughout Missouri, Oklahoma, Arkansas, Louisiana and common point territory in Texas. Standard Pipe Line Co. v. T. & P. Ry., 122 I. C. C. 463, 465.

(s) Arkansas and Oklahoma are a homogeneous rate region and transportation conditions would seem to indicate in general the observance therein of a uniform distance scale. Parkersburg Rig & Reel Co. v. C. R. I. & P. Ry., 123 I. C. C. 79, 84.

(t) A uniform scale of rates can with propriety be applied throughout southern Missouri, Oklahoma, Arkansas, Louisiana and common point territory in Texas. Consolidated Southwestern Cases, 123 I. C. C. 203, 217.

(u) In numerous previous cases the commission has recognized that rates in the southwest may properly be somewhat higher than in southern territory. Consolidated Southwestern Cases, 123 I. C. C. 203, 382.

(v) Trend of recent decisions has clearly been against combination rates between territories. See 100 I. C. C. 513, 663. Rates on combination basis over the Mississippi River have been condemned in 81 I. C. C. 33, 39; 102 I. C. C. 540, and other cited cases. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523, 529, 530.

(w) Rates in the Southwest are on a higher level than those in the Southeast. Virginia Cellulose Co. v. N. & W., 129 I. C. C. 297, 299.

(x) Transportation conditions in Illinois are not materially different from those in the territory east of the Illinois-Indiana State line, and lower level of rates in Illinois than in c. f. a. territory generally is not justified. Soap and Soap Powder, 129 I. C. C. 392, 394.

(y) Heavier traffic density as well as competition between numerous carriers between the Missiouri and Mississippi Rivers have resulted in a generally lower basis of rates in that territory than west of the Missouri River. The effect which these influences has had upon the rate structure between the rivers and how it has affected rates from territory west of Missouri River are related in 14 I. C. C. 299 and other cited cases. Boston Wool Trade Asso. v. A., T. & S. F., 129 I. C. C. 681, 687.

§48½. Repair of Equipment.

See Cars and Car Supply §32⅓.

(a) Upon investigation by commission on its own motion, FOUND: That leasing of respondent's marine repair yard and floating equipment to a private concern; compensation paid such concern for lightering, towing, and shifting, including the furnishing of free coal for such transfer of its freight in New York Harbor; and expenditures under contracts with a private concern in violation of the Clayton Act, the officers of which concern are directly associated with respondent corporation, were not only in conflict with "honest, efficient, and economical management and reasonable expenditures for maintenance" and repugnant to sound business methods, but were also not in the interest of efficient and economical management as required by section 15a of the act. Construction and Repair of Railway Equipment, 128 I. C. C. 323.

§50. Return on Investment.

See Supra §36; Infra §51; Advanced Rates §6.

(a) Data pertaining to financial condition of carriers or an attempt to show that they are not earning a fair return affords neither justification of, nor excuse for, an existing improper rate basis on a particular commodity. South Dako-

ta R. R. Commrs. v. C. & N. W., 107 I. C. C. 35, 47.

(b) In readjusting an extensive rate structure over a vast classification territory the commission is under no obligation to maintain revenues at precisely their existing level, but its obligation is to prescribe rates which are reasonable and otherwise lawful. However, should a situation arise for any reason under which carriers are not earning a fair return prescribed by section 15a of the act, provisions of that section may be invoked. Southern Class Rate Investigation, 109 I. C. C. 300, 307.

§51. Revenue of Road.

See Supra §36, §50; Advanced Rates §5 (4), §6 (6), §7 (7), §15; Express Companies §24; Reasonableness of Rates §11, §30, §36; Through Routes and Joint Rates §13a (c).

(a) Data pertaining to financial condition of carriers or an attempt to show that they are not earning a fair return affords neither justification of, nor excuse for, an existing improper rate basis on a particular commodity. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35, 47.

(b) Based principally upon its weak financial condition and inability under present divisions to earn sufficient revenue to pay cost of operation, taxes, and a fair return on investment, and taking into consideration relative cost of service, fact that carrier is wholly an originating and delivering line, amounts of revenue required to pay operating expenses, taxes, and a fair return, and importance to the public of the transportation services afforded, existing divisions of joint interstate rates accorded the Minnesota Western R. R. found unreasonable and inequitable. Reasonable and equitable divisions prescribed. Minnesota Western R. R. v. A., T. & S. F., 109 I. C. C. 127.

(c) When other methods of increasing earnings or reducing operating costs have been examined without discovering required relief for a weak road it becomes necessary to consider preventing needed revenue from passing to more prosperous connections. Minnesota Western R. R. v. A., T. & S. F., 109 I. C. C. 127, 131.

(d) Shippers, in opposing a proposed revision in rates on an individual commodity, estimated the annual increase in revenue which would be produced thereby, and introduced evidence to show increased prosperity of carriers with a view to showing that they were not in need of this additional revenue. HELD: Such evidence is of little or no force in determining the propriety of rate level on an individual commodity. See 263 U. S. 456, 482. Bananas from Gulf Ports, 109 I. C. C. 211, 219.

(e) The unfavorable financial condition of a carrier is not justification for continuance of unreasonable rates on a particular commodity. Richmond Radiator Co. v. N. Y., N. H. & H., 109 I. C. C. 497, 500.

(f) For many years prior to 1918 the commission has regarded 5 mills per ton mile as approaching the minimum limit of revenue for carload freight traffic. Ex Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(g) The Commission is not unmindful of the requirement of the law that the carriers in the respective groups are collectively entitled to a rate basis which will yield as nearly as may be a reasonable return on their aggregate value. Lignite coal from North Dakota, 126 I. C. C. 243, 248.

(h) The fact that the defendants may be prosperous, as complainant contends, and that sand and gravel constitute a large part of the traffic transported over their lines, does not prove that complainant paid unreasonable charges on its shipment. The prosperity of a carrier is the result of many causes. Were the Commission to consider the earnings of the defendant carriers in passing on the measure of the rates on a single commodity between two points on their lines, there could be no uniformity in rates. In fact, rates between the same points would vary with the routes between those points. Roquemore Gravel Co. v. A. & W. O. R. R., 126 I. C. C. 575, 577.

(i) Fact that a carrier may be prosperous and that a particular commodity constitutes a large part of its traffic does not prove that rates on that commodity are unreasonable, as prosperity of a carrier is the result of many causes. If all earnings of a carrier were considered in passing on the measure of the rates on a single commodity between two points on its line, there could be no uniformity of rates. In fact, rates between the same points would vary with

the routes between those points. Roquemore Gravel Co. v. A. & W. P., 126 I. C. C. 575, 577.

(j) In attempting to rebut a reduction in rates the St. Louis, Brownsville and Mexico Ry. urged that its financial condition and traffic density in the Southwest does not permit of any reduction in rates. HELD: In 81 I. C. C. 703, similar data was introduced and commented upon to effect that, from standpoint of operating and financial conditions, this road compares favorably not only with other roads in differential territory but with many roads in common-point territory. Leonard, Crosset & Riley v. A., T. & S. F., 128 I. C. C. 225, 229.

(k) Unfavorable financial condition of carriers transporting traffic of every description is no justification for the maintenance of unreasonable rates on a particular commodity. Lehigh Portland Cement Co. v. B. F. & I. F. Ry., 132 I. C. C. 3, 12.

§52. Risk of Loss or Damage.

See Infra §61; Classification §9, §16; Reasonableness of Rates §32.

(a) The commission has recognized the greater transportation hazard of flaxseed and that shipments of flaxseed in bulk require a higher class of equipment than that required for the transportation of grain. Kellogg & Sons v. D. L. & W. R. R., 112 I. C. C. 629, 635.

(b) The commission has recognized greater transportation hazards of flaxseed and that shipments of flaxseed in bulk require a higher class of equipment than that required for transportation of grain. See 25 I. C. C. 337; 85 I. C. C. 217. Kellogg & Sons v. D., L. & W., 112 I. C. C. 629, 635.

(c) Factory cost of an article without addition of any profit, can not properly be compared with sales prices of other commodities in which a profit is included, regardless of basis upon which claims are filed against carriers for goods lost or damaged in transit, for it is well established that where an article which has been shipped for sale is lost or damaged in transit by carrier, the latter is liable not only for cost of production but also for reasonable and normal profits of the sale of which the vendor has been deprived. See 13 Fed. (2d) 459. Burroughs Adding Machine Co. v. M. C., 120 I. C. C. 19, 20.

(d) Loss and damage claims paid by c. f. a. territory lines on furniture are higher, tonnage considered, than on any other commodity except possibly fresh fruits and vegetables. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445, 451.

(e) Furniture is bulky, fragile, and susceptible to damage in transportation. It is a high grade commodity which, generally speaking, should move on class rates in less than carload quantities. Memphis Freight Bureau v. A. G. S. R. R., 128 I. C. C. 445, 456.

§55. Standard of Lines.

See Infra §56; Advanced Rates §15; Reasonableness of Rates.

(a) Expenses of one particular short line should not govern as to maximum expenses of another particular short line, unless some definite showing as to similarity of conditions is in evidence, but where a number of comparable short lnes have been selected with particular care such comparisons are of probative value. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 424, 425.

(b) Based principally upon its weak financial condition and inability under present divisions to earn sufficient revenue to pay cost of operation, taxes, and a fair return on investment, and taking into consideration relative cost of service, fact that carrier is wholly an originating and delivering line, amounts of revenue required to pay operating expenses, taxes, and a fair return, and importance to the public of the transportation service afforded, existing divisions of joint interstate rates accorded the Minnesota Western R. R. found unreasonable and inequitable. Reasonable and equitable divisions prescribed. Minnesota Western R. R. v. A., T. & S. F., 109 I. C. C. 127.

(c) When other methods of increasing earnings or reducing operating costs have been examined without discovering required relief for a weak road it becomes necessary to consider preventing needed revenue from passing to more prosperous conections. Minnesota Western R. R. v. A., T. & S. F., 109 I. C. C. 127, 131.

(d) Rates on crude mine-run fire clay from St. Louis and Clayton, Mo., to South Fort Smith and Van Buren, Ark., found unreasonable as compared with

rates prescribed for similar distances in Memphis Southwestern Investigation, 77 I. C. C. 473, and to extent they exceeded 16 cents on shipment moving over the Ft. Smith & Western and on other shipments 14 cents for single-line and 14.5 cents for joint-line hauls. The Ft. Smith & Western, designated as a weak line in cited case is shown to be in poor financial condition with an annual operation loss and participates in traffic under a rate of 12 cents in order to compete for this traffic despite the low earnings thereunder. Reparation awarded. Athletic Mining & Smelting Co. v. F. S. & W., 112 I. C. C. 497.

(e) Carrier in defending reasonableness of petroleum rates to destinations on the Missouri & North Arkansas Ry., stressed the poor financial condition of above-named road. HELD: That rate herein found reasonable as maximum includes the usual arbitrary for that carrier because of its poor financial status. Bear State Oil Co. v. A., T. & S. F., 120 I. C. C. 301, 303, 304.

(f) Sixth-class rate on textile machinery from Tallassee, Ala., located on the Birmingham & S. E. Ry., to Natchez, Miss., found not unreasonable as compared with lower rate prescribed for like distances in Southern Class Rate Investigation, 100 I. C. C. 513. In cited case the Birmingham & S. E. was designated as a weak line entitled to special-rate treatment, and it was found that joint rates between weak and standard lines should be somewhat higher than that prescribed for latter. The general class-rate revision can not properly be used as measure of reasonableness on shipments moving prior thereto. Moreover, general practice in southern territory is to apply to through movements the local rates of short lines to junction points plus standard-line rates beyond. The rate here charged compares favorably with numerous rates applicable from points in Alabama, Mississippi, and Tennessee for comparable distances, involving joint-line hauls, including one "relief" line. Cotton Mills Products Co. v. A. & V., 120 I. C. C. 473.

§56. Standard of Rates.

See Supra §55; Advanced Rates §15; Branch Lines §4; Discrimination §5, II; Reasonableness of Rates §32.

(a) Rates that may lawfully be required must in principle be high enough to cover all of the cost that may fairly be allocated to the service plus at least some margin of profit. See 236 U. S. 585; 236 U. S. 605. But is has always been recognized that the burden of transportation may reasonably be adjusted with some regard to the value of service, in other words, that the higher-grade, more valuable commodities may be required to pay a greater margin of profit than those that are of lower grade and less value. The substance of the Hoch-Smith resolution is that agricultural products affected by depression shall in this respect be included in the class of most favored commodities, to such extent, at least, as may be "compatible with the maintenance of adequate transportation service." Grain and Products, 122 I. C. C. 235, 264.

§57½. System Line Haul.

See Branch Lines §2, §3.

(a) Following 91 I. C. C. 299, and other cited cases, the Washington & Vandemere and Atlantic Coast Line railroads found to be carriers under same management and control. Entire capital stock of the Vandemere is owned by the Coast Line, and while operated separately, they have same tariff-publishing and other officials. Raleigh Freight Traffic Bureau v. A. C. L., 107 I. C. C. 156, 158, 159.

(b) For purpose of rate making, movements over two or more carriers under common ownership or control are treated generally as single-line rather than joint-line hauls. Raleigh Chamber of Commerce v. N. S., 109 I. C. C. 52, 54.

(c) Winston-Salem Southbound Ry., found not to be a separately operated railroad within meaning of commission's order entered in 56 I. C. C. 1. In defining the term "separately operated" the commission did not limit it to physical operation but it was given a broader meaning to include administration of the affairs of the carrier as well. The Winston-Salem has not a separate administrative organization and hence does not come within the classification of roads for which higher rates of mail pay were established. Railway-Mail Pay, 123 I. C. C. 33.

(d) Evidence of ownership by one carrier of shares of capital stock of another carrier, or of a majority of such shares, does not in and of itself warrant a finding that both carriers are under

common management and control. See 87 I. C. C. 654. Bragg & Millsaps Co. v. A. & W. P., 128 I. C. C. 238, 239.

(e) The Spokane, Portland & Seattle is considered a part of the Northern Pacific & Great Northern, for rate-making purposes. See 19 I. C. C. 265, 283. West Coast Lumbermen's Asso. v. C., M. & St. P., 129 I. C. C. 363, 364.

(f) Muscle Shoals, Birmingham & Pensacola Ry. is now a part of the St. Louis-San Francisco, a strong system, and need for special treatment, accorded in 100 I. C. C. 513, no longer exists and since it participates in traffic to Mobile and Pensacola may be held responsible for the undue prejudice to Mobile. Mobile Chamber of Commerce v. M. S., B. & P., 129 I. C. C. 419, 421, 422.

§58. Ton-mile Revenue.

See Supra §20, §36; Advanced Rates §18 (1); Comparative Rates; Evidence §13 (1) (a), §20; Reasonableness of Rates §36.

(a) Ton-mile earnings of 10.2 mills does not seem unduly low on such low-grade commodity as animal manure. Pacific Manure & Fertilizer Co. v. A. & R. R. R., 109 I. C. C. 615, 616.

(b) Ton mile earnings afford a better criterion in comparing the rates as between light loading and heavy loading commodities yet the earnings per car and per car mile are not entirely without probative force in considering rate structures in the present state of the law. Benson Produce Co. v. G. N. Ry., 113 I. C. C. 541, 546.

(c) Earnings of 5 mills per ton per mile prior to 1918 approaches the minimum limit of revenue for carload freight traffic. Romann & Bush Pig Iron & Coke Co. v. I. R. R., 113 I. C. C. 622, 623.

(de) The ton mile earnings are greater for the longer than for the shorter haul, but this is quite generally the case where the rate for the longer haul is made on or approaches the combination of locals. Cuthbert Stone Co. v. St. L. S. F. Ry., 118 I. C. C. 69, 74.

(f) That ton-mile earnings should decrease as distance increases is a generally recognized principle of rate making, but it may be offset by the principle that a higher level of rates is justified in a territory of relatively low traffic density. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99, 101, 102.

(g) Ton-mile earnings yielded by coal rates found reasonable by commission in a proceeding wherein the relationship was controlling factor, can not be accepted as criteria for coal rates in general. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286, 287.

(h) The average ton-mile earnings for Class I railroads of the United States in 1924 was 11.16 mills. Lynchburg Chamber of Commerce v. P. R. R., 118 I. C. C. 11, 12.

(i) In many cases in which rates have been assailed as unreasonably high commission has called attention to the impracticability and impropriety of measuring rates on low-grade traffic by a comparison of ton-mile earnings thereunder with average earnings on all traffic. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 81.

(j) Ton-mile earnings over a road traversing a mountainous territory where operating conditions are unusual and difficult, may well be somewhat higher than earnings for a haul over level country. Cameron, Joyce & Schneider v. D. & R. G. W., 120 I. C. C. 129, 130.

(k) Gross ton mile revenues reflect both the load and the relation of the load to the weight of the equipment used, and when these are qualified with reference to the empty haul incident to a particular variety of traffic, the Commission has a number of factors which make such comparisons more instructive than those based alone on the revenue per net ton mile. American National Livestock Asso. v. A. T. & S. F. Ry., 122 I. C. C. 609, 618.

(l) It is a generally well recognized principle of rate making that the rate per ton mile should decrease as distance increases. Freight rates combine two factors of cost—(1) terminal cost and (2) line haul cost. The first remains constant, whatever the length of haul. It is a generally accepted theory that the latter is somewhat higher for the shorter hauls than for the longer. Consolidated Southwestern Cases, 123 I. C. C. 203, 385.

(m) Commission condemned as unreasonably low a rate yielding 4.6 mills per ton mile for a haul of about 1,000

miles, and stated that for many years prior to 1918 it had regarded 5 mills per ton mile as approaching the minimum limit of revenue for carload freight. Ex Lake iron ore from Chicago to Granite City, 123 I. C. C. 503, 504.

(n) The Commission has recognized the infirmity of ton mile yields as a test of the profitableness of rates. There could be no better illustration than this of the fallacy of placing reliance upon ton mile earnings as a basis for rate making. As the Commission has heretofore found in many cases a much fairer basis is that found in the earnings per car mile and per train mile. Much of the profitable freight carried by the railroads and perhaps it might be made broader and it could be truthfully said that most of the freight which pays the carriers the best is that which yields the lowest rate per ton mile. This arises out of many facts which the traffic manager takes into consideration, the volume of the traffic, the heavy load per car, and the regularity of movement. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 505.

(opqr) Operating costs do not increase in proportion with increase in car loading, as increase in cost on this accounts is in fact relatively small. While both ton-mile and car-mile yields merit consideration in determining reasonableness of rates, the latter are of more significance in case of heavy-loading commodities. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 505.

(s) On short-haul traffic the ton-mile test has, as a rule, little evidential value. See 30 I. C. C. 71, 78. Car or car-mile revenues, particularly on heavy-loading commodities, are a more satisfactory test. Luten Bridge Co. v. A. C. L., 123 I. C. C. 612, 615.

(t) Usual rule is that ton-mile earnings decrease as distance increases, but rate of decrease generally is relatively small where long distances are involved. Chestnut & Smith Corp. v. A. & R. R., 123 I. C. C. 707, 714.

(u) Both ton mile and car mile earnings are entitled to consideration in rate comparisons. Memphis Freight Bureau v. A. G. S. R. R., 128 I. C. C. 445, 456.

§60½. Use of Commodity.

See Classification §10.

(a) The principal distinction between pressure pipe and pier tubing is the dissimilar use to which each is put, an element which is not controlling in the fixing of rates. Duluth Boiler Works v. A. T. & S. F. Ry., 118 I. C. C. 161, 163.

(b) Use to which an article is put does not alone determine its essential character or charges which may be legally exacted for its transportation, but it tends to distinguish its qualities from other closely analogous articles. McEwing & Thomas Co. v. C. & E. I., 118 I. C. C. 211, 213.

§61. Value of Commodity.

See Supra §31; Advanced Rates §18 (4), §18 (5); Classification §9, §10, §11, §17; Discrimination §5; Reasonableness of Rates. §30; Released Rates.

(a) Differences in value, and in value of services, are important elements in determining rates on finished or manufactured articles in relation to those on raw material or product from which they are derived. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 116.

(b) Copper is a high-priced, valuable commodity which, on the basis of long-established and well recognized principles of rate making, should bear a rate corresponding to its proper place in a classification of commodities. Brass, Bronze, and Copper Articles, 109 I. C. C. 351, 366.

(c) Sand, gravel, and crushed stone are among the lowest-graded commodities known to commerce. They do not and can not move great distances; therefore the freight rates have an important bearing on securing and developing markets. Western Indiana Gravel Co. v. N. Y., C. & St. L., 109 I. C. C. 727, 728, 729.

(d) The commission regards lime suitable for chemical or building purposes and lime having no value for such purposes, such as agricultural and fluxing lime, as different commodities. Therefore, a segregation of high-grade and low-grade lime should be made, but it should follow line of value rather than of physical appearance. Eastern Lime Mfrs. Traffic Bureau v. A. & B. B., 112 I. C. C. 7, 15.

(e) Refined-oil rate assessed on petroleum refined-oil distillate having a specific gravity in excess of 36° found to have been legally assessed. While the oil here shipped is much lower in value than that of various commodities

on which refined-oil rates apply, such as kerosene and gasoline, the tariffs did not define the various kinds of oil; an oil trade publication presented in evidence shows specific gravity of gas oil in various sections of the country to be not over 36° in practically every instance; and a ruling of the western classification committee provided that petroleum oil with a specific gravity in excess of 36° should be rated as refined oil. Sioux City Gas & Elec. Co. v. C., B. & Q., 112 I. C. C. 344.

(f) The oil-well outfits and supplies list includes many articles, of varying values and weights, which are given like rates to permit mixing. Fact that derricks are of lower value than some other commodities taking same rates, is not, in and of itself, a compelling reason for according them lower rates. Carter Oil Co. v. A., T. & S. F., 113 I. C. C. 757, 759.

(gh) Value of commodity should be given important consideration but is by no means a controlling factor in determining proper rates on individual commodities. Frohman Chemical Co. v. B. & O., 115 I. C. C. 322, 323.

(i) Value is an essential factor in determining the reasonableness of a rate, but is only one of the elements to be considered. Southern Mirror Co. v. S. Ry., 115 I. C. C. 590, 594.

(j) Factory cost of an article without addition of any profit can not properly be compared with sales prices of other commodities in which a profit is included, regardless of basis upon which claims are filed against carriers for goods lost or damaged in transit, for it is well established that where an article which has been shipped for sale is lost or damaged in transit by carrier, the latter is liable not only for cost of production but also for reasonable and normal profits of the sale of which the vendor has been deprived. See 13 Fed. (2d) 459. Burroughs Adding Machine Co. v. M. C., 120 I. C. C. 19, 20.

(k) Spelter is usually sold on the St. Louis, Mo., basis. Federated Metals Corp. v. P. R. R., 120 I. C. C. 181.

(l) Gravel is one of the lowest grade commodities known to commerce. Luten Bridge Co. v. A. C. L. R. R., 123 I. C. C. 612, 614.

(m) Carriers urge that printed paper because of its higher value should invariably be rated higher than unprinted paper of the same kind. However, if value is the sole consideration it seems rather obvious that such a rule strictly applied would result in many improper ratings because of difference in values of unprinted paper. Therefore, it can neither be said that printed paper should always be rated higher than the same paper unprinted nor that printed and unprinted paper should always be rated the same. Kalamazoo Vegetable Parchment Co. v. C., K. & S., 128 I. C. C. 675, 679.

(n) In fixing commodity rates slight differences between two articles in respect of their value, weight density, or other factors necessary to be considered, may be reflected in rate differences as narrow as may be desired; but in compiling a freight classification all articles, both in carloads and less, must be grouped into from 8 to 12 classes, and it is therefore manifest that commodities with somewhat different classification characteristics must often be assigned the same rating. Kalamazoo Vegetable Parchment Co. v. C., K. & S., 128 I. C. C. 675, 678, 679.

(o) Crushed stone and related articles are the lowest-grade commodities known to commerce. Because of their low value, the keen competition between them, fact that they do not move great distances, and because they may be procured almost anywhere, rates must of necessity be the lowest possible rates which will move the traffic at a profit. However, value of limestone is from two to three times that of ordinary crushed stone, and in consequence it is able to stand a greater share of the transportation burden. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177, 184.

(p) Sugar is a heavily loading commodity whose transportation is not attended by any special difficulties, but its value is such that freight rates play comparatively small part in ultimate cost to consumer. It may, therefore, reasonably pay relatively high rates compared with many low-grade commodities. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591, 598.

§62. Value of Service.

See Supra §45; Advanced Rates §6 (6); Reasonableness of Rates §39.

(a) Proposed revision of rates on fruits and vegetables between points in California and Oregon, Washington, Idaho, Utah, and Montana, resulting in both increases and reductions, former predominating, found not justified. While some of present rates, because of active water competition, may be lower than they might otherwise be, earnings produced do not show that they are unremunerative, and economic condition of deciduous-fruit industry is such that it can ill afford an increase in rates. Moreover, proposed revision was published without giving interested shippers a public hearing at which they might have had an opportunity to express their views. Fruits and Vegetables Between Pacific Coast States, 104 I. C. C. 66.

(b) Differences in value, and in value of services, are important elements in determining rates on finished or manufactured articles in relation to those on raw material or product from which they are derived. Morrell & Co., v. N. Y. C., 104 I. C. C. 104, 116.

(c) Fact that element of primary market competition does not exist to as great an extent on one commodity as on another does not justify rates based upon "what the traffic will bear" without regard to other transportation conditions. South Dakota R. R. Comm. v. C. & N. W., 107 I. C. C. 35, 43.

(d) Iron and steel traffic is able to bear a higher freight rate than may be applied to many low-grade commodities. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 48.

(e) In considering the reasonableness of rates the economic condition of any industry may be relevant as it bears on the value of the service to the industry, and as it may permanently or for a long period of time affect the ability of that industry to pay the rates attacked, but taken by itself it can not be accepted as controlling. Revenues in western district, 113 I. C. C. 3, 30.

(f) There are manifest limitations to the doctrine that burden of rail transportation should be distributed among the various kinds of freight with some regard for economic needs of the country. It may be conceded that commission has no power to fix rates upon any kind of freight which will fail to produce some margin over operating cost. Moreover the fact that certain carriers are largely dependent upon a particular form of traffic and have little opportunity to recoup a deficiency in profit upon such traffic by recourse to higher rates upon other kinds must be taken into consideration. Fertilizers between Southern Points, 113 I. C. C. 389, 420.

(g) Doctrine that burden of rail transportation should be distributed among the various kinds of freight with some regard for economic needs of the country has always had recognition, in one way or another, in the rate structure. The familiar principle of "charging what the traffic will bear," or, as some prefer to put it, of "not charging what the traffic will not bear," has had that result in some degree. The principle which has been quite generally recognized in public regulation, that the value as well as the cost of service is a factor entering into the determination of just and reasonable rates, has had a similar result. In another form the same thought seems to be predominant in the Hoch-Smith resolution. But the inevitable result of such a distribution of transportation burden must be that some kinds of traffic, under just and reasonable rates, will earn materially less for carriers than others. Fertilizers between Southern Points, 113 I. C. C. 389, 420.

(h) Complainant contends that the value of the commodity and the cost of the service should be given important consideration. They should, but these things are by no means controlling factors in determining proper rates on individual commodities. The public interest requires that the value of the service, or what the traffic can reasonably bear, be also given consideration. Silica sand is apparently shipped wherever it is needed, regardless of the freight rate. It goes to all sections of the country. The volume of the movement is heavy, and there is nothing to indicate that the traffic does not move freely. Frohman Chemical Co. v. B. & O. R. R., 115 I. C. C. 322, 323.

(i) The public interest requires that value of service, or what the traffic can reasonably bear, be given important consideration in determining proper rates on individual commodities. Frohman Chemical Co. v. B. & O., 115 I. C. C. 322, 323.

(j) Fertilizer, because of its beneficial effect on the land and its very immediate and great effect on traffic, should be kept on as low a level of

rates as transportation conditions will warrant. Consolidated Southwestern Cases, 123 I. C. C. 203, 269.

(k) The carriers also lay much stress upon the fact that cement has apparently moved freely under the existing rates. While, however, the circumstance that rates impede freedom of movement tends to show that they are unreasonable, as being in excess of the value of the service, it does not follow that rates which permit freedom of movement are necessarily reasonable. If this were true "what the traffic will bear" would be the standard of reasonableness. Southern Cement Rates, 132 I. C. C. 427, 446.

(l) If rates are such as to discourage any effort to compete, the lack of movement is no indication of their unreasonableness. To so find would be tantamount to saying that a rate is reasonable because it is prohibitive. Colorado Portland Cement Co. v. A. T. & S. F. Ry., 132 I. C. C. 671, 676.

(m) Sugar is a heavily loading commodity whose transportation is not attended by any special difficulties, but its value is such that freight rates play comparatively small part in ultimate cost to consumer. It may, therefore, reasonably pay relatively high rates compared with many low-grade commodities. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591, 598.

§63. Volume of Traffic.

See Advanced Rates §5 (1½); §18 (3); Classification §1 (d), §4, §5; Commodity Rates §1 (b), §5 (m); Reasonableness of Rates §40.

(a) Fourth-class rate on flexible split leather from Waukegan, Ill., to Natick, Mass., found not unreasonable. In official, southern, and western classifications various kinds of leather, including flexible splits, are and have been for many years rated fourth class. While complainant instances commodity rates on leather to Boston and several other New England destinations from numerous States to show that exceptions to class basis have been made, and estimated that volume of its shipments will continue in future as in past at about one carload a week, it failed to show how that movement compares in volume with movement of leather generally under fourth-class rates. Griess-Pfleger Tanning Co. v. E., J. & E., 104 I. C. C. 464.

(b) Volume of movement is an important and not infrequently a determinative element in establishment of commodity rate, and when a request for such a rate from a particular point is predicated upon existence of a commodity rate from another point volume of movement from both points should be made known. Griess-Pfleger Tanning Co. v. E., J. & E., 104 I. C. C. 464, 466.

(c) While volume of movement is an important element to be considered in arriving at a reasonable rate, an excessive rate can not be justified merely on account of fact that movements thereunder are infrequent. Orford Soap Co. v. B. & M. R. R., 107 I. C. C. 338, 339.

(d) Volume of movement, present, or prospective, is one of the controlling factors in establishment of commodity rates. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 135.

(e) Volume of traffic between points in official classification territory found not to warrant establishment of rates on returned empty iron or steel drums on other than class basis. On the contrary, class basis appears peculiarly appropriate for this traffic, involving as it does, shipments from numerous points scattered throughout this territory but with no considerable volume from any point. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 136, 137, 138.

(f) While volume of movement is an important element to be considered in arriving at a reasonable rate, an excessive rate can not be justified merely on account of fact that movements thereunder are infrequent. Barr & Dougherty v. G. N., 109 I. C. C. 487, 489.

(g) Volume of movement is an important and not infrequently a determinative element in the establishment of a commodity rate. Chicago Hts. Mfrs. Asso. v. V. & O. R. R. Co., 109 I. C. C. 545, 547.

(h) Fertilizer is a low grade traffic, subject to no great risk in transit and requiring no special service for its transportation in the sense that special service is generally understood. Its free movement and use is an auxiliary tending to produce and furnish a larger volume of traffic and thus promote the prosperity of carriers and their patrons, so that considering both commercial and transportation conditions, it is entitled to comparatively low rates. Fertilizers

between Southern points, 113 I. C. C. 389, 420.

(i) In determining just and reasonable rates consideration must be given to density of traffic and yield of carriers in a sparsely populated section of the country, as well as to share of transportation charges borne by a particular commodity when compared with other commodities. Sames Moore & Co. v. A., T. & S. F., 113 I. C. C. 501, 506.

(j) That ton-mile earnings should decrease as distance increases is a generally recognized principle of rate making, but it may be offset by the principle that a higher level of rates is justified in a territory of relatively low traffic density. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99, 101, 102.

(k) Fact that but relatively few shipments of a commodity move between certain points is not sufficient grounds to deny shippers reasonable rates. Dame Furniture Co. v. C., N. O. & T. P., 115 I. C. C. 566, 568.

(lm) Upon contention of shipper that evidence tending to prove that traffic under proposed reduced rates will move in trainloads should be given no weight because it is the commission's policy not to permit establishment of rates applicable only to trainloads, HELD: Principle referred to does not apply to a case which deals with rates per carload. However, fact that traffic to which carload rate will apply will in all probability move in trainload quantities is pertinent in considering whether rate will burden other traffic. Ex-Lake Iron Ore from Chicago & Granite City, 120 I. C. C. 75, 81.

(n) Volume of movement is one of the elements which must be considered in comparing rates on analogous commodities, and failure to show such volume renders reference to such rates of little probative value in measuring reasonableness of rates. Memphis Furniture & Mfg. Co. v. L. & N., 120 I. C. C. 267, 269.

(o) It would be manifestly undesirable and impracticable, even were it in harmony with the act, to prescribe rates dependent upon the density of traffic on particular lines. Rather, the average conditions in each part of the country should prevail. Consolidated Southwestern Cases, 123 I. C. C. 203, 381.

(p) Fact that a shipper's plant is small and does not ship in large volume, as compared with plants of its competitors, is not convincing of unreasonableness of rates from smaller plant. If a shipper finds it difficult to meet competition of manufacturers at other points because of relatively higher freight rates from its plant, that in itself may be one of the contributing causes which prevent growth and enlargement of its plant. Fredonia Linseed Oil Works Co. v. A., T. & S. F., 123 I. C. C. 153, 156.

(q) It would be manifestly undesirable and impracticable, even were it in harmony with the act, to prescribe rates dependent upon density of traffic on particular lines. Rather, average conditions in each part of the country should prevail. Consolidated Southwestern Cases, 123 I. C. C. 203, 381.

(r) Fact that a specific form of traffic to which a carload rate will apply, will in all probability move largely in train-load quantities, is pertinent in considering whether rate thereon will cause gain or loss to carrier. See 22 I. C. C. 604 and other cited cases. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 507.

(s) Although no further shipments are in contemplation, a shipper is entitled to have its traffic moved at a rate that is not unreasonable. Okmulgee County Commissioners v. M. K. T. Ry., 126 I. C. C. 1, 3.

(t) While the average traffic density is somewhat less in Texas as a whole than in Oklahoma and Kansas, such difference is not sufficient to warrant a level of rates on cement from the Kansas gas belt and Ada to points in eastern and central Texas substantially higher than in eastern Oklahoma. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 70, 71.

(u) Volume of movement is an important factor in testing the reasonableness of a rate. Calif. Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, 41.

(v) While volume of movement is an important element to be considered in arriving at a reasonable rate an excessive rate can not be justified merely on account of the fact that the movement thereunder is light. Every shipper is entitled to a reasonable rate on his traffic and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided upon its merits. Curtiss Aeroplane &

Motor Co., v. Pennsylvania R. R., 129 I. C. C. 174, 176.

(w) Volume of movement is not determinative of the right to a carload rating. Assuming a proper relation between carload and less than carload rates, the establishment of carload ratings whenever carload quantities are offered will meet the needs of new and growing lines of industry without discrimination. Nor, to entitle a commodity to carload rating must it be shown that increased movement in carload quantities would result. The movement in carloads result in economy of transportation facilities, and is therefore greatly to be desired in the interests of the public as well as of the carriers. A narrow spread between the carload and less than carload rates tends to the waste of transportation facilities without adequate compensating advantages to the general public and is not to be encouraged. Any quantity rates reduce the spread to nothing. Western Shade Cloth Co. v. A. & W. P. Ry., 132 I. C. C. 118, 121.

(x) Light or irregular movement will not ordinarily justify the collection of a higher basis of rates than that which generally applies on the same or comparable traffic moving in the same direction in the same general territory. Of course, in the absence of undue prejudice or preference, such a rule or principle could not be applied where the rates offered in comparison are not reasonable maximum rates. Armour & Co. v. N. P. Ry., 132 I. C. C. 123, 124.

(y) An isolated movement is entitled to a reasonable rate. MacBeth Evans Glass Co. v. P. R. R. Co., 132 I. C. C. 129, 131.

(z) Volume of movement is an element to be considered in arriving at a reasonable rate, but an excessive rate can not be justified merely because the movements thereunder are infrequent Eldorado Refining Co. v. A. T. & S. F. Ry., 132 I. C. C. 612, 614.

(aa) Deciduous-fruit shipments comprise the largest single item of transcontinental tonnage, as well as the greatest portion of the transcontinental movement of perishable traffic. California ships more plums and cherries than the remainder of the United States, but by far the heaviest movement from the State is of grapes. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 27.

(bb) Movement of bananas from the Gulf ports to Pacific Coast States is substantial, but is not comparable with movement of deciduous fruits from California to the East. Calif. Growers' & Shippers' Protective League v. S. P. 129 I. C. C., 25, 27, 37.

§64. Voluntary or Subsequent Reduction of Rate.

See Absorption of Charges §2; Advanced Rates §8 (2); Commodity Rates §4; Reasonableness of Rates §32½; Reparation §12, §16.

(a) Fact that a rate was subsequently reduced in compliance with decisions of commission embracing general readjustments, involving both increases and reductions, does not of itself demonstrate unreasonableness of higher rates. Commission declines to give retroactive effect to such rates as a basis for an award of reparation. Cairo Cotton Oil Mill v. M. & O., 107 I. C. C. 299.

(b) Class D rate on manganese ore from Phillipsburg, Mont., to Portland, Oreg., found unreasonable to extent it exceeded lower commodity rate contemporaneous in effect to Tacoma, Wash., and subsequently established to Portland. Complainant was promised lower rate, but it could not be made available for these shipments because of delays incident to formality of tariff publications, complainant being required to move its traffic before such lower rate could be made effective. Reparation awarded. Humphreys v. Director General, 109 I. C. C. 157.

(c) Voluntary reductions do not prove that rates are unreasonable. Adams & Kelly Co. v. A., T. & S. F., 109 I. C. C. 241, 244.

(d) The voluntary reduction of a rate is not of itself sufficient to establish the unreasonableness of the former rate, and in the absence of proof of damage the fact that the carriers have charged a higher rate to an intermediate point than to a more distant point is not sufficient to entitle a shipper to an award of reparation for violation of section 4. Dees v. M. & O. R. R., 112 I. C. C. 397, 398.

(e) The unreasonableness of a rate is not established nor is it admitted by a

subsequent reduction. Bunte Bros. v. C. & N. W. Ry., 112 I. C. C. 557, 558.

(f) The subsequent reduction of a rate does not of itself establish unreasonableness. Dow Chemical Co. v. P. M. Ry., 112 I. C. C. 559, 560.

(g) The voluntary reduction of a rate by a carrier does not in itself constitute sufficient proof of the unreasonableness of the former rate. Alexandria Refining Co. v. M. P. R. R., 112 I. C. C. 613, 614.

(h) An offer of carriers to reduce a rate does not of itself establish that rates in effect were or are unreasonable. Standard Pipe Line Co. v. T. & P., 112 I. C. C. 186, 187.

(i) Where carriers voluntarily reduce a rate they do not thereby admit that rate formerly in effect was unreasonable. Bunte Bros. v. C. & N. W., 112 I. C. C. 557, 558.

(j) The voluntary reduction of a rate is not of itself evidence of the unreasonableness of the rate so reduced. Sames Moore & Co. v. A. T. & S. F. Ry., 113 I. C. C. 501, 507.

(k) Voluntary reduction of a rate does not show that the prior rate was unreasonable. Kay County Gas Co. v. G. C. & S. F. Ry., 115 I. C. C. 736, 737.

(l) The subsequent reduction of the rates attacked does not, of itself, carry the presumption that the rates assessed were unreasonable. Crook Son & Co. v. N. Y. C. R. R., 118 I. C. C. 512, 514.

(mn) Fact that rates on same commodity to two different destinations are not contemporaneously reduced does not alone render rate not reduced unreasonable or otherwise unlawful. Bailey v. O. S. L., 115 I. C. C. 745, 747.

(o) Class A rate applicable on a sporadic shipment of coffin material from Jackson, Miss., to New Orleans, La., found not unreasonable as compared with lower rate from Maryville, Tenn., to same destination, or with commodity rate established from Jackson subsequent to movement. The subsequently established rate was accorded with expectation of a regular movement which never developed, whereas it is shown that there is a free movement under the rate from Maryville. Considering the sporadic character of shipment here involved, coupled with a lack of evidence to indicate that coffin stock is improperly classified, the commission does not consider class A rate as unduly high. Jackson Traffic Bureau v. I. C., 118 I. C. C. 515.

(p) Complainant attacked rate charged on two cars of eggs shipped March 23, 1923, from Brownwood and Killeen, Tex., stopped in transit at Lampasas and Temple, Tex., to complete loading, and forwarded to Philadelphia as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved G. C. & S. F. to Purcell, Okla., Santa Fe to Oklahoma City, M. K. T. to St. Louis, Mo., and B. & O., and connections to Philadelphia, 1,978 miles from Killeen and 2,085 from Brownwood. Charged $3.435. A rate of $2.205 was in effect from Killeen and Brownwood to Philadelphia over routes ranging in length from 1,875 miles to 2,247 miles, but was inapplicable over the route of movement because of routing restrictions. Effective July 9, 1925, in compliance with 96 I. C. C. 19, rates of $2 from Killeen and $2.01 from Brownwood to Philadelphia were established. HELD, rate attacked unreasonable to extent it exceeded $2.205, reparation awarded. Sheaffer & Marvel v. B. & O. R. R., 120 I. C. C. 673.

(q) Mere fact that rates charged reflect voluntary reductions is not sufficient in and of itself to indicate that prior rates were unreasonable. Jackson Traffic Bureau v. I. C., 120 I. C. C. 33, 36.

(r) The subsequent reduction of a rate or the disruption in a rate adjustment caused by general increases approved by the commission afford no basis for an award of reparation or finding of unreasonableness. Central Pennsylvania Lbr. Co. v. S. & N. Y., 120 I. C. C. 239, 240.

(s) The voluntary reduction of a rate is not proof that the prior rate was unreasonable. Riegel Sack Co. v. C. R. R. of N. J., 122 I. C. C. 78, 80.

(t) The Commission has said repeatedly that the voluntary reduction of a rate creates no presumption that the former rate was unreasonable. Newark Call Printing & Publishing Co. v. C. R. R. of N. J., 126 I. C. C. 569, 571.

(u) Upon contention that subsequent reduction of a rate is not indicative of the unreasonableness of the prior rate, HELD: While this contention is ordinarily correct it can not be sustained where rates assailed are higher than those on analogous articles which are higher rated, sold at higher prices, and

no more desirable from a transportation stand-point. Chicago Granatine Mfg. Co. v. I. C. R. R., 126 I. C. C. 572.

(v) The Commission has frequently found that the reduction of rates does not of itself justify the conclusion that the preexisting rates were unreasonable or afford a basis for reparation. Carriers may voluntarily equalize commercial or geographical disadvantages in many instances in which the Commission could not require such equalization. Gum Motor Co. v. A. T. & S. F. Ry., 128 I. C. C. 61, 62.

(w) The voluntary reduction of a rate is not of itself sufficient to justify an award of reparation on shipments moving prior to the reduction. Peaslee Gaulbert Co. v. C. & A. R. R., 128 I. C. C. 103, 104.

(x) The Commission has repeatedly stated that the subsequent reduction of a rate is not of itself sufficient to show that the prior rate was unreasonable. National Show Case Co. v. S. A. L. Ry., 128 I. C. C. 193, 197.

(y) The reduction of a rate does not prove that the rate formerly charged was unreasonable. Vickers Petroleum Co. v. M. P. R. R., 128 I. C. C. 205, 206.

(z) It is well settled that the subsequent reduction of a rate does not prove that the rate previously assessed was unreasonable. United States Potters Asso. v. A. C. & Y. Ry., 128 I. C. C. 249, 254.

(aa) The subsequent reduction of a rate does not, in itself establish the unreasonableness of the former rate. Bruce & Co. v. C. & N. W. Ry., 129 I. C. C. 435, 437.

(bb) The subsequent reduction in the rate is a fact which may be considered along with other proof. Cline & Bernheim v. C. & N. W. Ry., 132 I. C. C. 311, 312.

§64½. Wages.

See Reasonableness of Rates §40½.

(a) It is no part of commission's duty to canvas and compare wage scales of a particular industry with a view to adjusting the rate structure to them. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 359.

§64⅞a. Water Mileage.

(a) Owing to difficulty of ascertaining accurate ratio of water miles to rail miles, it is difficult to compare ocean-rail rates with all-rail rates. Consolidated Southwestern Cases, 123 I. C. C. 203, 289, 290.

(b) There appears to be no generally accepted ratio of water to rail miles but carriers have frequently estimated the comparatively short water distances from north Atlantic to south Atlantic ports on basis of approximately 2.5 statute water miles to 1 rail mile. In 81 I. C. C. 312, in considering the ocean distance from New York to Galveston, the commission adopted a ratio of 3 miles of water haul to 1 mile of rail haul, and in an earlier case, 24 I. C. C. 570, a ratio of 6 to 1 was used between same points. Consolidated Southwestern Cases, 123 I. C. C. 203, 369.

(c) It is generally accepted that where water hauls are long the ratio of water miles to rail miles may properly be greater than where hauls are comparatively short. Consolidated Southwestern Cases, 123 I. C. C. 203, 370.

§65. Weight or Bulk of Shipment.

See Classification §4, §11½; Reasonableness of Rates §41; Weights and Weighing.

(a) Empty wooden barrels and kegs are light articles and generally move under class rates. Coco-Cola Co. v. A., T. & S. F., 104 I. C. C. 377, 379.

(b) Livestock loads lighter than almost all other kinds of carload traffic that move in substantial volume. American Nat'l. Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 617.

(c) Fact that a specific form of traffic to which a carload rate will apply, will in all probability move largely in trainload quantities, is pertinent in considering whether rate thereon will cause gain or loss to carriers. See 22 I. C. C. 604 and other cited cases. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 507.

§66. Widespread Rate Adjustment.

See Advanced Rates §5 (2), §5 (7¼); Blanket Rates VIII, §20; Differentials; Discrimination §13; Equalization of Rates §8; Reasonableness of Rates §16, §28; Relative Rates; Reparation §12.

(a) Proposed revision of rates on fruits and vegetables between points in

California and Oregon, Washington, Idaho, Utah, and Montana, resulting in both increases and reductions, former predominating, found not justified. While some of present rates, because of active water competition, may be lower than they might otherwise be, earnings produced do not show that they are unremunerative, and economic condition of deciduous-fruit industry is such that it can ill afford an increase in rates. Moreover, proposed revision was published without giving interested shippers a public hearing at which they might have had an opportunity to express their views. Fruits and Vegetables between Pacific Coast States. 104 I. C. C. 66.

(b) Proposal to readjust interstate rates on flaxseed from Minnesota, South Dakota, and certain North Dakota points to western trunk-line destinations, resulting in both increases and decreases, and establishment of a different level of rates from specified points in the Dakotas than applies from other North Dakota points, found not justified. Proposed rates are admitted by all parties concerned to be unduly prejudicial to South Dakota shippers. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35.

(c) Proposed adjustment of rates on lumber and related articles from south Pacific coast origin groups to Canadian points, involving advances and reductions and designed for purpose of equalizing those rates with north Pacific coast points, found not justified as a whole. Carriers long maintained equal rates from this general territory but parity was disrupted when rates from north Pacific coast points were revised without concurrent revision from south Pacific coast points. While circumstances warranting higher rates from north Pacific coast points on one kind of lumber than on other kinds are not necessarily controlling as to rates from south Pacific Coast points, reductions proposed will restore former equalization, no reason appearing why the disparity should be continued or why equal rates should not obtain. The evidence, however, does not support a finding that change proposed in the minima, restriction proposed in the lumber list, or cancellation of transshipments or proportional rates is warranted. Lumber and Related Articles, 107 I. C. C. 57.

(d) Fact that similar adjustments may be necessary at other points is no ground for denying a reduction in rates between specific points where such reductions are shown by evidence of record as proper. Chicago Fire Brick Co. v. A. & W., 107 I. C. C. 399, 406.

(e) Proposed revision of rates on bananas from Gulf Ports to southeastern and Carolina territory found justified, except as to increased c. l. rates. A careful consideration of the record convinces commission that banana rates from such ports to the Ohio River, in so far as they apply over lines proposing increases, are upon less than a maximum reasonable basis. Rates proposed, however, are subject to criticism, for the elimination of which a distance scale of rates is herein suggested. Bananas from Gulf Ports, 109 I. C. C. 211.

(f) In readjusting an extensive rate structure over a vast classification territory the commission is under no obligation to maintain revenues at precisely their existing level, but its obligation is to prescribe rates which are reasonable and otherwise lawful. However, should a situation arise for any reason under which carriers are not earning fair return prescribed by section 15a of the act, provisions of that section may be invoked. Southern Class Rate Investigation, 109 I. C. C. 300, 307.

(g) Carriers should be permitted, even encouraged, to eliminate wasteful transportation, but in seeking to disrupt a rate adjustment of long standing they must show that the resulting rates will be reasonable, and will not result in other violations of the act. Grain and related articles, 113 I. C. C. 195, 199.

(h) Fact that additional adjustments may be necessary is no ground for denying relief shown by a record as proper. French Battery & Carbon Co. v. C. &. N. W., 112 I. C. C. 128, 131.

(i) Fact that reductions in rates from specific points would necessitate a readjustment of rates in contiguous territory is not sufficient reason for denying reasonable rates between points covered by a complaint. Arizona Corporation Commission v. A. E., 113 I. C. C. 52, 64.

(j) Carriers should be permitted, even encouraged, to eliminate wasteful transportation, but in seeking to disrupt a rate adjustment of long standing they must show that resulting rates will be reasonable, and will not result in other violations of the act. Grain and

Related Articles, 113 I. C. C. 195, 199.

(k) Although the Commission has repeatedly said that the prospect of other and resulting reductions will not deter it from reducing an unreasonable rate the fact remains that a showing that widespread and consistent changes, all downward, in rates to surrounding territory would follow the reduction of a rate to a single point tends to make it appear that the rates to the single point are on a normal and comparable level. El Dorado Refining Co. v. A. T. & S. F. Ry., 118 I. C. C. 51, 54.

(l) Taking into consideration the gradual change in conditions surrounding transportation and marketing of peanuts over a number of years and gradual downward revision of rate structure to meet those conditions, with apparently no dissatisfaction with general rate adjustment on part of those in the industry, FOUND: That it does not follow because commission's judgment and that of carriers as to what will be reasonable rates for the future differ, in relatively small degree, that rates found reasonable for future would have been maximum reasonable rates for a period extending back two years prior to filing of a complaint. Accordingly, and in the light of commission's findings in 20 I. C. C. 43, 50, rates on this commodity in the past found unreasonable only back to date of filing of complaint, and not for the full two-year period prior thereto. United Fig & Date Co. v. A. C. L., 115 I. C. C. 643, 648, 649.

(m) Prospect of other and resulting reductions will not deter commission from reducing an unreasonable rate, but a showing that widespread and consistent changes, all downward, in rates to surrounding territory would follow reduction of a rate to a single point, tends to make it appear that rates to the single point are on a normal and comparable level. El Dorado Refining Co. v. A., T. & S. F., 118 I. C. C. 51, 54, 55.

(n) Fact that a reduction in rates to a particular point will result in it being necessary to make corresponding reductions at other points in same general territory affords no ground for withholding from the particular point a proper adjustment of rates. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 753. Birmingham Traffic Bureau v. St. L., S. F., 118 I. C. C. 756, 760.

(o) It is not unusual for a general adjustment in rates to include increases as well as reductions in rates, but fact that spread in the rates resulting from the adjustment is not the same as formerly existed does not demonstrate that rates are unreasonable. New Jersey Lumbermen's Committee v. A. C. L., 120 I. C. C. 329, 334.

(p) Rates resulting from a general readjustment involving both increases and reductions may not properly be used as a measure of a reasonable rate for shipments moving prior thereto. Cotton Mills Products Co. v. A. & V., 120 I. C. C. 473, 474.

(q) The revision of the Mississippi cotton rates was part of a general readjustment. The mere fact that one incident of this readjustment was the reduction of the rate from one city does not prove that the former rate was unreasonable. Manget Bros. Co. v. Georgia R. R., 123 I. C. C. 532, 534.

(r) In changing from a system of rate making which has prevailed for many years to a new method, it is reasonable that consideration should be given, particularly in case of commodities moving in volume at relatively low rates, to the effect which an abrupt and radical change in rate level might have upon carrier revenues. Rates on Chert, Clay, Sand, and Gravel, 122 I. C. C. 133, 161.

(s) Where future rates are prescribed by the commission and such rates result in a widespread readjustment of rates of long standing, a reasonable time must elapse between the date of the decision and the date when rates established pursuant thereto become effective. In such cases reparation on shipments moving between the date of the decision and the effective date of the order will be denied. Van Dyke Motor Co. v. M. P., 122 I. C. C. 411, 412.

(t) Proper readjustment of rates on grain and products from Birmingham, Chattanooga, and Knoxville, to South Atlantic ports and certain intermediate points, to same basis as existing commodity rates from Nashville, found not justified. Grain rates from Birmingham are generally lower than from Nashville and carriers may not undermine this adjustment solely for purpose of removing fourth-section departures created by an

attempt to establish interstate class rates in accordance with distance scale of class rates prescribed by Georgia Railroad Commission between Georgia points, for to do so would unduly prejudice Birmingham and its milling interests, especially in view of its shorter haul to the ports. Grain and Products to Southeast, 123 I. C. C. 569.

(u) Neither is it a defense to say that revision of the rates attacked will necessitate revisions in the rates from or to other points and on other grain and grain products. It is well settled that the correction of one unlawful rate adjustment can not be defeated simply because it may necessitate changes in other rates. Southwestern Millers League v. A. T. & S. F. Ry., 126 I. C. C. 23, 30.

V. STARE DECISIS.

§69. In General.

See Cars and Car Supply §35; Previous Decisions of Commission; Procedure Before Commission §17; Reasonableness of Rates §26½; Reparation §13.

(a) Ton-mile earnings yielded by coal rates found reasonable by commission in a proceeding wherein the relationship was controlling factor, can not be accepted as criteria for coal rates in general. Fentress Coal Co. v. T. C. Ry., 115 I. C. C. 286, 287.

(b) When a given situation has been fully considered and deliberately passed upon, that decision ought not to be disregarded and the question kept open indefinitely unless good cause is shown for the adoption of a different course. Mississippi Pearl Button Co. v. I. C. R. R., 120 I. C. C. 647, 648.

(c) Complaint filed during pendency of a similar proceeding, alleged that class E rate on clam shells from Dixon, Ill., to Fort Madison, Iowa, was unreasonable, unduly prejudicial, and in violation of long-and-short-haul clause of section 4 of the act. The decision being adverse to its contentions, complainant now asks in effect that it be set aside on strength of its evidence in instant case. Evidence introduced here being similar to that presented in former case, wherein the class E rate was found not unreasonable, no good cause is shown for what would be tantamount to a reversal of finding previously made after consideration of a more complete record. Accordingly, rate assailed found not unreasonable or otherwise unlawful. Mississippi Pearl Button Co. v. I. C., 120 I. C. C. 647.

(d) Upon contention that a mere citation of a decision of commission in another proceeding is insufficient to warrant conclusion that similar rates brought in issue in a new case were unreasonable, HELD: When a given situation has been fully considered, and deliberately passed upon by commission, that decision ought not to be disregarded and the question kept open indefinitely unless good cause is shown for adoption of a different course. Accordingly, shippers may rely upon findings in former cases dealing with same subject. American Door & Mfg. Co. v. B. & O., 122 I. C. C. 471.

(e) The commission is not bound by any rule of stare decisis, although when a matter has been once fully considered and decided it should be regarded as settled unless it appears from new facts presented that commission was wrong. See 23 I. C. C. 684. International Paper Co. v. B. & M., 128 I. C. C. 466, 470.

(f) Conclusions reached on facts and conditions as developed on individual records do not necessarily constitute precedents against granting of relief if same rates were subsequently assailed with an adequate showing of changed and different conditions of fact, or in basic law applicable. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 43, 44.

(g) Motion for further hearing on ground of two alleged errors in original report, 63 I. C. C. 6, viz, statement that departures from aggregate-of-intermediates provision were protected by applications heard but not determined, and statement that rates found unreasonable appeared not unduly high, denied. Question of whether departures were protected by applications was **res adjudicata** not because of commission's decision but that of Supreme Court in 269 U. S. 1. Even if question had not been **res adjudicata** and commission concluded that departures were not protected, complainants would not be entitled to reparation for violation of fourth section, since there was no proof that they suffered any special damage, and no such proof was submitted at further hearing. Hudson Mule Co. v. L. & N., 129 I. C. C. 365, 368, 369.

EX-LAKE RATES

(a) Ex lake rates are in the nature of proportional rates and are made lower than the local rates because they apply to portions of much longer total hauls. Ex Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 78.

(b) Proposed reduced rate on ex-lake iron ore from Chicago to Granite City, Ill., found justified. Carriers showed that they carry a large volume of coal from mines near Granite City to Chicago with a practically complete empty-return movement due to present rate proving too high to attract the ore traffic. The rate proposed, which is not less than a reasonable minimum, will enable a furnace at Granite City to share in ore movement by lake and enable it to increase its output in competition with rival plants located in Chicago district and elsewhere. Rail carriers will not be deprived of any important traffic and the extremely low all-rail rates now in effect offset the probability of a rate war. Moreover, the rail-lake-and-rail route to Granite City is a natural one possessed of marked economic advantages, and its increased utilization seems clearly in public interest. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75.

(c) Fact that ex-lake differentials are constructed on quite a different basis from all-rail differentials negatives the idea that there is any close competition between the two. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 208.

(d) Upon further hearing in 95 I. C. C. 539 carriers attempt to justice ex-lake differentials on grain and products from Buffalo to New York and Boston for export, over those Baltimore and Philadelphia, contending that most ex-lake comes from c. f. a. territory, that there are all-rail routes through Buffalo reflecting the full differential and that mere substitution of ake for rail movement should not deprive Baltimore and Philadelphia of their differentials. HELD: Record indicates that most ex-lake grain is not domestic but Canadian, and the differential adjustment of ex-lake grain rates to north Atlantic ports is an exception to general rule with respect to export rates from Buffalo, since both export class and commodity traffic moves therefrom to Boston, New York, Philadelphia, and Baltimore on identical rates. Maritime Asso. Boston Chamber of Commerce v. A. A. R. R. 126 I. C. C. 199, 208, 211.

(e) Upon further hearing in 95 I. C. C. 539, FOUND: That record does not permit prescription of maximum or minimum reasonable rates on ex-lake grain from Buffalo to New York, Philadelphia, Baltimore, and Boston, for export, since present rates have not been shown to be unreasonable or otherwise unlawful, but if such rates were to be prescribed, evidence warrants conclusion that line-haul rates to water-front elevators at New York, Philadelphia, and Baltimore should be identical, and that maintenance of same rates to water-front elevators at Boston would not be unlawful. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 211, 216.

EXCLUSIVE CONTRACTS

See Special Contracts; Stock Yard Companies.

(a) Railroad company, so long as it thereby affords reasonable accommodation to public and violates no constitutional or statutory provisions, may grant exclusive privilege to one taxi-cab company to solicit patronage on railroad station grounds. Canary Taxicab Co., v. Terminal Ry. Ass'n of St. Louis, (Mo., 1927) 294 S. W. 88.

(b) Term "facilities," as used in Const. art. 12, § 23, and Rev. St. 1919, §§ 9975, 9985, relating to discrimination in charges or facilities in transportation, includes only such as are employed in transportation and which railroad company undertakes or is compelled to furnish in its capacity as common carrier. Canary Taxicab Co., v. Terminal Ry. Ass'n of St. Louis, (Mo., 1927) 294 S. W. 88.

EXPEDITED SERVICE

See Advanced Rates §2½ (h), §3 (a), §11½ (c) (d), §17 (nn); Baggage Car Service; Live Stock Shipments; Special Rates and Services.

(a) Characteristics surrounding transportation of newspapers in baggage cars are so varied as to weight and revenue per shipment, length of hauls, volume of tonnage, and methods of handling and diffusion, that it is impracticable to attempt to determine reasonableness of a flat charge by allocation of costs of

transportation. Newspapers in Baggage Cars, 104 I. C. C. 527, 533.

(b) The usual service required for milk and cream in baggage cars is so unlike that accorded newspapers in same kind of equipment, as to make a comparison of rates charged for two kinds of services lacking in probative value. Newspapers in Baggage Cars, 104 I. C. C. 527, 536.

(c) Request that baggage-car service and rates be prescribed on l. c. l. shipments of cream from Essex, N. Y., to Fair Haven, Vt., and Springfield, Mass., denied. The express service, is adequate and carriers should not be required to furnish baggage-car service, which would impose an additional expense upon them and more or less interfere with other baggage-car service. State of New York v. Am. Ry. Exp. Co., 109 I. C. C. 20, 24.

(d) Proposed increased distance rates on cream, and on milk, cream, and buttermilk, transported by railroads on passenger trains in the territory embracing points in Montana, North Dakota, Minnesota, and other northwestern States, found not justified. Such increases are designed as a revenue measure, in interest of uniformity, and to remove any existing discrimination between interstate and intrastate traffic. Competition in territory involved is keen between butter manufacturers who draw their cream mainly from distant points and local creamers who receive their cream from near-by points. Any substantial rate increase, if borne by the butter manufacturers, woud be detrimental to them and indirectly to farmers producing the cream. Moreover, under the Hoch-Smith resolution the commission is required to give particular consideration to establishment of a rate structure under which agricultural products shall freely move. Milk and Cream in Northwest, 115 I. C. C. 77.

(e) Proposed increased rates on cream and related articles, moving in baggage cars on passenger trains, between points on the C. & E. I., by cancelling present rates based on the so-called Beatrice scale, and putting into effect rates based on distance scale prescribed in 46 I. C. C. 601, for application generally in c. f. a. territory, found justified. Although a few carriers have voluntarily published cream rates lower than the c. f. a. scale, that is the basis of rates prevalent in this territory on interstate shipments and there is nothing of record to justify requiring carrier to maintain lower rates over its line than those found reasonable for application over other roads in this territory. Cream and Related Articles, 115 I. C. C. 447.

(f) Car-foot-mile formula for determining relative costs for transportation of milk is not, in its present form, adaptable to freight service. Character of milk traffic, expedited service given it, regularity of movement, with loaded cans in one direction and empty cans in return movement, constituting practically a "shuttle service," and other features, make it more nearly comparable with passenger-train service, and exclusion of operation expenses of freight service and limitation of cost study to passenger-train service, including passenger proper, express, mail, and milk, is not improper. Milk and Cream Between New England Points, 126 I. C. C. 38, 48.

(g) Theory that milk is an auxiliary service and might properly be charged only with out-of-pocket cost, with no charge for any portion of expenses which would be incurred whether milk services were rendered or not, found not tenable. The same theory might apply with equal force to mail or express and would result, if followed, in one or more "auxiliary" services becoming unduly preferred in so far as rates are concerned. See 74 I. C. C. 48, 71. Milk and Cream Between New England Points, 126 I. C. C. 38, 60.

(h) Combinations of single-line interstate distance rates on cream, in 10-gallon cans, in baggage cars in passenger and mixed-train service, from certain points in North Dakota and South Dakota, to Aberdeen, S. Dak., found not unduly prejudicial but unreasonable as compared with rates under the Beatrice, C. F. A.. and Kirschbaum scales prescribed in 15 I. C. C. 109; 46 I. C. C. 601; and 100 I. C. C. 28, respectively, and to extent they exceeded distance rates herein prescribed, with addition of drayage charges as herein provided. Reasonable rates prescribed for future and reparation awarded. Beatice Creamery Co. v. C., M. & St. P., 129 I. C. C. 375.

EXPLOSIVES AND DANGEROUS ARTICLES

See Class Rates §2 (a); Demurrage §2½.

(a) Rates on high explosives, c. l. and l. c. l., from Gibbstown and Thompson's Point, N. J., to Norton, Va., Powder, W. Va., and other stations in Virginias, found unreasonable to extent they exceeded first-class and double first-class, respectively, contemporaneously applicable from and to same points. Usual basis of rates on high explosives in this territory is first class c. l., and double first-class l. c. l., that basis having been prescribed as reasonable maximum in 35 I. C. C. 77 and 64 I. C. C. 10. Reparation awarded. Du Pont De Nemours & Co. v. W. J. & S., 104 I. C. C. 249.

(b) Complainant attacked commodity rate of $3 charged on 11 cars of high explosives from June 14 to Dec. 18, 1922 from Herpoco and Nitro, Calif., to Tonopah, Nev., as unjust and unreasonable to extent it exceeded first class rate of $2.60. Three which originated at Herpoco moved Santa Fe to Ludlow, Calif., T. &. T. to Beatty, Nev., B. G., to Goldfield, Nev., T. &. G.., beyond 761 miles. One from Nitro moved S. P., to Bay Point, thence over route described, 765 miles, the others over S. P., to Mina, Nev., R. &. G., beyond, 465 miles. Western classification provides no rating on high explosives, but refers to tariffs of individual lines. Prior to Jan. 30, 1922 high explosives from San Francisco Bay points to Tonopah took the first class rate, under an exception to the classification or a commodity rate the same in amount, $3.75. In order to meet parcel post competition on less carload traffic, the carriers, on that date, reduced the class rates to Tonopah from San Francisco and points taking the same rates, the first class rate becoming $2.60. They did not make this rate applicable on high explosives but published a commodity rate of $3. HELD: Rate attacked not unjust or unreasonable, complaint dismissed Stewart & Co. v. A. T. & S. F. Ry., 113 I. C. C. 275.

(c) Commodity rate on high explosives from Herpoco and Nitro, Calif., to Tonopah, Nev., found not unreasonable because in excess of class rate contemporaneously in effect. These rates were established for purpose of meeting parcel-post competition and were found not unreasonable in the Goldfield Cases, 34 I. C. C. 360 after a consideration of the unusual operating and transportation conditions, among other things, existing in this part of the country. Evidence submitted by complainant here does not justify what in effect would be a reversal of the commission's findings in the cited case. Stewart & Co. v. A., T. & S. F., 113 I. C. C. 275.

(d) Storage charges assessed on private cars of gasoline under storage rule providing for assessment of charges on dangerous articles requiring "inflammable" placards, held on railroad premises in excess of free time, found inapplicable. Under the rule the term "railroad premises" included private tracks constructed, maintained, or operated under written agreement, located inside carrier's right-of-way, yard, and terminals, reserving to carrier right of use. Here, tracks were constructed under contract, but were used exclusively as plant facilities, and could be used by carrier only when such use did not interfere with complainant's business. Moreover, in 66 I. C. C. 58, interpretation of term "railroad premises" made the written agreement the controlling factor rather than right of use. Complainant's tracks therefore could not under any circumstances be considered as railroad premises. Refund of charges directed. Kelly Oil Co. v. M.-K.-T., 123 I. C. C. 517.

(e) Special service is incident to the transportation of explosives between any two points. Du Pont De Nemours & Co. v. B. & O., 128 I. C. C. 705.

(f) Complainant attacked first class rates charged on black powder carloads minimum 20,000 pounds from Oriental Siding, Fairchance, Pa., to destinations on the Western Maryland as unreasonable and unjustly discriminatory and unduly prejudicial as compared with the second class rates charged from Youngstown, O., to the same destinations. Fairchance is on the B. & O. about 37 miles southeast of Jacobs Creek, Pa., a point on the border line between trunk line and central territories. First class rates are applicable while from Youngstown and Quaker Falls, Pa., to the same destinations second class rates apply. Specific-commodity rates lower than second class are in effect from the Atlantic seaboard to western trunk line termini and destinations in central territory. Practically all movements of black powder between points in trunk line territory and from trunk line to central territory, other than those shown, are on the first class basis. From Fairchance to destinations common to the B. & O. and W. M. the class rate level is the same. Special service is incident to the transportation of ex-

plosives between any two points. There appears to be no justification for maintaining a higher rating from Fairchance than from Youngstown. HELD, rates attacked not unreasonable but rates from Fairchance unduly prejudicial to extent they exceed rates second class basis from Youngstown, reparation denied. Du Pont de Nemours & Co. v. B. & O. R. R., 128 I. C. C. 705.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission; Through Routes and Joint Rates §3.

(a) The commission has jurisdiction over intrastate rates on shipments movings from one point within a State to a port within same State for export. Thomas Traffic v. L. A. & S. L., 120 I. C. C. 671.

§2. Establishment and Construction.

(a) Upon contention that transshipment rates can not be justified as export rates, nor as proportional rates, since rates by water from the ports are not filed with the commission. FOUND: Under provisions of paragraph 13 (c) of section 6 of the act, commission is authorized to prescribe proportional rates to ports applicable to traffic moving beyond by water, and such rates may differ from corresponding local rates. They are not restricted to cases where rates beyond by water are filed with commission. Washington Coal Producers Asso. v. U. P., 129 I. C. C. 499, 500.

III. DISCRIMINATION.

See Discrimination.

§4. In General.

(a) Rates on steel tanks, k. d., from South Chicago, Ill., Indiana Harbor, Ind., and Youngstown, Ohio, to Galveston, Tex., for export to Mexico, fabricated in transit at Iola, Kans., found not unreasonable due to lower export rates between same origin and destination points with fabrication in transit at Kansas City, such lower through rates being subsequently established through Iola. Earnings under rates assailed are materially lower than those under numerous rates on same and analogous commodities from other iron and steel producing points for comparable distances, many of which were approved or prescribed by commission. United Iron Works v. Director General, 104 I. C. C. 449.

(b) Rates on gasoline and kerosene, from Gates to Port Arthur, Tex., for export, found not unreasonable as compared with rates on other commodities for similar distances in same territory, or with lower rates subsequently established over route of movement. in response to request made prior to shipments in issue. Texas Co. v. T. & P., 107 I. C. C. 147.

(c) Rate on crude petroleum from points in Arkansas to Texas City, Tex., for export, found not unreasonable or unduly prejudicial as compared with lower rate to other Gulf Ports, which lower rate was subsequently made applicable to Texas City. Rate charged

was in substance an emergency rate established to enable an overproduction of crude oil to be used, and its subsequent reduction does not establish that it was unreasonable prior thereto. Swiftsure Petroleum Co. v. M. P. 107 I. C. C. 637.

(d) Galveston, Tex.: Rates on cottonseed and vegetable cake and meal from points in Texas to, for export, differentially higher than rates on same commodities to Houston and other Gulf ports, found not unduly prejudicial to Galveston or unduly preferential of Houston and such other ports in their relation to distance scale of rates prescribed in Oklahoma case, 98 I. C. C. 183. Galveston Commercial Asso. v. A. & S. 109 I. C. C. 114.

(e) Respondents proposed to reduce the rates on car trucks without journal bearings, carloads, from central and trunk line territories to the Atlantic seaboard for export. Car trucks for export are generally assembled, at point of shipment in order that they may be as nearly complete as possible when delivered, and also because in that state they can be more conveniently and economically shipped by vessel. Present rate on car trucks without journal bearings from the Pittsburgh district to New York and points within the lighterage limits for export or domestic use, is fifth class rate of 34 c, proposed rate 25.5 c. HELD, proposed rate not unreasonable but the establishment of such rate, while maintaining a rate in excess of 7c, from Athenia and Lodi to New York unduly preferential. HELD, schedules not justified without prejudice to filing tariffs in accordance with the opinion. Car Trucks to Atlantic Seaboard, 112 I. C. C. 583.

(f) On the question of requiring the establishment of export rates lower than domestic rates for similar movements, the Commission said there is nothing inherent in export traffic that entitles it as such to take lower rates than domestic traffic. The fact that defendants, of their own volition, accord export rates lower than domestic rates on iron and steel articles and grain to New York is not unduly prejudicial to complainant. There is an important distinction between the voluntary act of a carrier in granting export rates lower than the domestic rates and an order from the Commission requiring such a difference to be observed. The former may freely be done so long as no violation of the act results, but the Commission may not require a difference in rates on the two classes of traffic unless there is a substantial variation in the service performed. Knight & Kennett v. L. & N. R. R., 115 I. C. C. 732, 735.

(g) Rates on petroleum and products in export and coastwise movement from southern Kansas, Oklahoma, and Texas to Galveston and other Texas ports taking same rates, and on grain and products from southern Kansas, same as to New Orleans and other Louisiana ports, found not unduly prejudicial, but like rates on various other commodities found unduly prejudicial to Texas ports, with certain exceptions. While parity of rates results in substantially greater service for same rate to Louisiana ports than to Texas ports between interior points from which the short-line distance to New Orleans exceeds that to Galveston by more than 25 per cent, it does not result in substantial injury except as designated. Findings in original report reversed in some respects and modified in others, and nonprejudicial basis of rates prescribed for future. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349.

(h) Suspended schedules filed in purported compliance with findings in original report 100 I. C. C. 110, wherein relationships between rates on certain commodities in export, import, and coastwise movement from points in Kansas, Oklahoma, and Texas to Galveston and New Orleans and ports taking same rates, were found unduly prejudicial and ordered removed by establishment of differentials prescribed, found not justified, without prejudice to filing of new schedules conforming with findings herein. Galveston Commercial Asso. v. G., H. & S. A. 128 I. C. C. 349, 392, 393.

(i) Rates on petroleum and products in export and coastwise movement from refining point in north-central Texas to New Orleans and Galveston and points taking same rates found not unreasonable as compared with those from extensive groups in various portions of Southwest for domestic and foreign consumption, nor unduly prejudicial as compared with those from Shreveport-El Dorado groups in northern Louisiana and southern Arkansas. Earnings under rates assailed are considerably below those under rates for similar distances from mid-continent groups to western trunk-line and Illinois destinations found

reasonable in 112 I. C. C. 421, and a reduction in rates from any one important group under present extensively grouped and highly competitive adjustment should be made cautiously and only for strongest reasons. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 393, 396.

(j) Complainant alleged that the rate of $5.25 per ton on modified mine run bituminous coal, in carloads, from the Castle Gate group of mines in Utah to Albina, East Portland and St. Johns, Ore., and Tacoma and Seattle, Wash., when for transshipment by water to Alaska, Hawaii or foreign countries, is unreasonably low and results in undue prejudice. The rate assailed applies only from points on the Utah Ry., a defendant. In Western Coal Rates, 80 I. C. C. 383, 89 I. C. C. 666, a rate of $6.80 on bituminous coal, all sizes, from the Castle Gate district to points north of Portland, such as Seattle was approved. To Portland and points grouped therewith, rates of $5.90, $5.40 and $5.15 on lump, nut, and slack, respectively, were approved. These are the present rates for local delivery. The rate assailed became effective June 25, 1925. The carriers originating the traffic from the mines in Washington are not defendants, do not serve the mines in Utah, and do not join in the rate assailed. Substantially all of complainants traffic moves through Seattle; and from the showing made it does not appear that any undue prejudice exists by reason of the transshipment rate to the other ports. HELD, rate assailed not unreasonably low or otherwise unlawful, complaint dismissed. Washington Coal Producers Asso. v. U. P. Ry., 129 I. C. C. 499.

§4a. Port Differentials.

See Port Differentials.

(a) Rates on cottonseed and vegetable cake and meal from points in Texas to Galveston, for export, differentially higher than rates on same commodities to Houston and other Gulf ports, found not unduly prejudicial to Galveston or unduly preferential of Houston and such other ports in their relation to distance scale of rates prescribed in Oklahoma case, 98 I. C. C. 183. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114.

(aa) Upon contention of carrier that rail rates on export and coastwise traffic are in essence proportional rates, constituting merely factor of aggregate through rates between interior points and foreign or coastwise destinations beyond, and that in determining matter of port equalization consideration should be given to both water and rail factors entering into these aggregates, FOUND: Similar contention advanced in 73 I. C. C. 384 was found without merit. Equalization of port rates on basis advocated would require consideration, in every instance of port relationship, of water rates not on file with commission and over which, except on coastwise traffic under certain circumstances, it has no jurisdiction. This does not mean, however, that because a port is not the origin or destination of traffic passing through it, such port is not entitled to consideration in countenancing greater disregard of distance in import, export, or coastwise rates than in corresponding domestic rates. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 379, 380.

(b) Complainant alleged that the rates, rules, regulations, and practices applicable to the transportation of cotton and cotton linters for export or coastwise movement from western Tennessee, western Kentucky, Mississippi, Arkansas, Missouri and Oklahoma via rail and barge routes to New Orleans, La., unduly prefer that port and subject Mobile, Ala., to undue prejudice and disadvantage. The points of origin are those from which the all rail export and coastwise rates on cotton and cotton linters are the same to both New Orleans and Mobile. Through routes and joint rail and barge rates, the same as those in effect from the same points to New Orleans by way of Memphis, Tenn., or Vicksburg, Miss., are asked on those commodities for export or coastwise movement from the points referred to by rail to upper Warrior river ports served by the barge line, and thence by water to Mobile. Rail and barge rates are now generally in effect from the origin territory west of the Mississippi river to New Orleans through Memphis. Complainants prayer would require an additional rail haul of 219 miles from Memphis to Cordova before the traffic would reach the barge line. The haul of the barge line from Cordova to Mobile is 439 miles as compared with the barge haul from Memphis to New Orleans of 746 miles. The all rail rate from Memphis is 76.5c to both ports, for distances of 394 miles to New Orleans and 385 miles to Mobile. The barge rate from

Memphis is 65c to both New Orleans and Mobile. At the time of the hearing a rail and barge rate of 65c also applied from Memphis to Mobile over the Frisco to Cordova and barge beyond. This rate has since been increased to 66c. At the time of the hearing no cotton had moved over the 65c rate to Mobile via either route. The barge line was not represented at the hearing, and no shippers appeared in support of the additional through routes and joint rates asked by complainant. There is nothing upon this record to indicate that there would be any movement under such rates from points west of the Mississippi river if they were established. HELD, assailed rates not unduly prejudicial. Mobile Chamber of Commerce v. A. & V. Ry., 129 I. C. C. 103.

IV. TARIFFS AND CONSTRUCTION.

See Tariffs.

§5. In General.

(a) Following 104 I. C. C. 48, domestic rate assessed on a shipment of coiled-steel wire rods moving on a domestic bill of lading from Acme, Ill., to San Francisco, intended for export and actually exported to China, found applicable. While a lower export rate was contemporaneously in effect, complainant failed to comply with all regulations and tariff requirements governing reservation of steamer space and prepayment or guaranteeing of transportation charges. American Trading Co. v. Director General, 115 I. C. C. 223.

(b) Complainant attacked export class A rate of $1.16 charged on rolling mill rolls on Jan. 24, 1925 from Joliet, Ill., to Laredo, Tex., for export to Mexico City, Mex., as inapplicable and unreasonable. Shipments moved C. & A., M. P., T. & P. and I. G. N. Contemporaneously there was published a commodity rate of 91c on machinery, carloads, as classified under designation of machinery and machines in western classification. Rolling mill rolls are specifically listed in the classification under the heading "rolls." HELD, rate attacked applicable, complaint dismissed. Brennan & Corrigan v. C. & A. R. R., 128 I. C. C. 643.

(c) Export class A rate was assessed on rolling-mill rolls. Upon contention that as rolling mills consist of housing, tables, and rolls, they are machines, and that rolling-mill rolls are machine parts and should take lower rate applicable on machine parts n. o. i. b. n., under the heading "Machinery and Machines," FOUND: Contention is untenable because rolling-mill rolls are specifically listed in the classification under the heading "Rolls." Rate assessed was therefore applicable. Brennan & Corrigan, Inc., v. C. & A., 128 I. C. C. 643.

(d) Where schedule of rates filed with Interstate Commerce Commission, applying from points within state to seaport, were general in terms, including all shipments between those points, and expressly excluding shipments made in intrastate commerce, shipments made from such ports for export, not being intrastate shipments, were subject to the general rates on file. Chandler v. Pennsylvania R. Co., 11 Fed. (2d) 39.

V. REASONABLENESS.

§6. In General.

See Advanced Rates §17 (c); Emergency Rates (b).

(a) Export shipments moved to a port, under necessary permits calling for reservation of vessel space, on domestic bills of lading which indicated final foreign destination and which were marked "for export." Charges were assessed at domestic rate, while tariff provided a lower export rate conditioned upon all charges being fully prepaid or guaranteed. It was not shown that ocean charges were fully prepaid or guaranteed, and for some reason complaint failed to exchange original domestic bills of lading for export bills as provided by tariff. FOUND: Since shipments did not comply with all tariff requirements, domestic rate assessed was applicable, and not unreasonable or otherwise unlawful. The rule relating to performance of transportation service under published tariffs was a part thereof and could not be waived. See Davis v. Henderson 266 U. S. 92, followed and applied in 95 I. C. C. 603. Dill-Crossett v. Director General, 104 I. C. C. 48.

(b) Charges assessed at Philadelphia for loading and unloading of export, import, and intercoastal traffic and rules, and regulations whereby such charges are absorbed by carriers when rail rate exceeds a fixed minimum, which arrangement is designed to place Philadelphia on a parity with Baltimore and on a substantial parity with New York, found not unreasonable or otherwise unlawful. Preponderance of traffic moves through port at fixed minimum rail rates or rates

in excess thereof, and traffic may move through various ports under substantially similar terms, with result that the port situation is in harmony in so far as handling charges are concerned. Philadelphia Commercial Traffic Managers v. B. & O., 104 I. C. C. 173.

(c) Rates on gasoline and kerosene, from Gates to Port Arthur, Tex., for export, found not unreasonable as compared with rates on other commodities for similar distances in same territory, or with lower rate subsequently established over route of movement in response to request made prior to shipments in issue. Texas Co. v. T. & P. 107 I. C. C. 147.

(d) Grain and products: Proposed cancellation of export rates on, from western Montana points to Seattle and other north Pacific coast ports, leaving in effect higher domestic rates, found not justified. The maintenance of export rates has been of great benefit to the Montana producer, and since export basis is open to millers in western Montana as well as on the Pacific coast, there can be no undue prejudice as between them if transit provisions of the tariff are properly applied. Export Rates on Wheat and Products, 107 I. C. C. 276.

(e) Domestic rates on grain and products from points in Montana to destinations in California, Oregon, Washington, Nebraska, Missouri, Iowa, Minnesota, Wisconsin, and Illinois, found not unreasonable or otherwise unlawful as compared with lower export rates from Montana to north Pacific coast ports for equal distances. Export Rates on Wheat and products, 107 I. C. C. 276.

(f) Contention that maintenance of export rates under which certain millers are afforded opportunity of utilizing grain originating at interior points for export, thereby releasing their local high-quality hard wheat for use in domestic markets, creates discrimination against millers who are unable to avail themselves of same privilege, not sustained. Contention is not based on any illegality connected with use of export rates, and while prejudice might be created as alleged, such prejudice can not be held in itself to be undue within meaning of the act. Export Rates on Wheat and Products 107 I. C. C. 276, 285.

(g) Equalization of prices of goods in foreign markets can not be accepted as a guide for determining whether certain interests in this country are given an unfair advantage by maintenance of export rates. Export Rates on Wheat and Products, 107 I. C. C. 276, 285, 286.

(h) Reasonable domestic rates do not necessarily afford exact measure for reasonable maximum export rates. See 13 I. C. C. 87, and 162 U. S. 197. Export Rates on Wheat and Products, 107 I. C. C. 276, 289.

(i) Upon contention that the commission may not require carriers to maintain rates on export traffic lower than reasonable domestic rates, HELD: Contention presupposes existence of that similarity of conditions affecting export and domestic traffic which carriers stated at orginal hearing did not exist. The burden of showing such similarity is upon carriers. They have not shown it, or even attempted to show it, and the testimony upon that subject is to the contrary. Export Rates on Wheat and Products, 107 I. C. C. 276, 289.

(j) Texas City, Tex.: Rate on crude petroleum from points in Arkansas to, for export, found not unreasonable as compared with lower rate to other Gulf ports, which lower rate was subsequently made applicable to Texas City. Movements to Texas City involved a longer haul and rate charged was not unreasonable when consideration is given to car mile revenues and fact that it was in substance an emergency rate established to enable an overproduction of crude oil to be used. Moreover, subsequent reduction does not establish that rate formerly in effect was unreasonable. Swiftsure Petroleum Co. v. M. P. 107 I. C. C. 637.

(k) Respondents proposed to increase the rates on export cotton to New Orleans, La., from $1.06 to $1.195 from stations Texico, N. M., to Corral, N. M. and from $1.065 to $1.195 from stations Hatch and Rincon, N. M., to Berino, N. M., inclusive. All of the origin points are local to the Santa Fe, first named group on respondents line south from Clovis to Pecos, Tex., and the others, except Hatch on its line south from Belen, N. M., to El Paso, Tex. Hatch is on the Silver City, N. M., branch of respondent, 5 miles west of Rincon. The first export joint rate from Roswell to New Orleans $1.325 became effective Oct. 18, 1920. Prior to that date the rate was the combination on Houston, which takes the same rate as Galveston, Tex. The rate of $1.325 was applicable

on both export and domestic shipments. On July 1, 1922 this rate was reduced 10% to $1.195. Effective May 1, 1923 a tariff note provided for the application to New Orleans, for export, of the rate contemporaneously applicable to Galveston for export, thereby making inapplicable the domestic rate of $1.195 to New Orleans and making applicable an export rate of $1.06. The proposal here is to eliminate that tariff note in its application to the origin stations here in issue, and to make the domestic rate of $1.195 apply also for export, ship side delivery. The situation from Rincon is substantially the same as that from Roswell. Respondent has its own line from Roswell and Rincon to Galveston, which is substantially shorter than the joint route in which it participates to New Orleans. So far as this record shows its rate to Galveston is not unreasonably high, and it must be presumed to be reasonable. No provision of the act requires respondent to participate in a joint rate to New Orleans on the same basis as its own local rate to Galveston. reasonable for the shorter haul. HELD, proposed schedules justified. Cotton from New Mexico, 112 I. C. C. 712.

(l) Proposal to increase to the domestic rate basis the rates on export cotton from certain New Mexico points on the A., T. & S. F. Ry., to New Orleans, La., found justified. The Santa Fe has its own line from these origin points to Galveston which is substantially shorter than a joint route in which it participates to New Orleans. Its rate to Galveston is not unreasonably high and must be presumed to be reasonable. Moreover, no provision of the act requires that carrier to participate in a joint rate to New Orleans on same basis as its own local rate to Galveston, reasonable for the short haul, nor can New Orleans be said to be unduly prejudiced by the Santa Fe voluntarily maintaining rates from New Mexico points on a basis the same as, or lower than, from Oklahoma, inasmuch as it maintains this equalization of origin points on shipments to New Orleans as well as to Galveston. Cotton from New Mexico, 112 I. C. C. 712.

(m) Complainant attacked commodity rate of 90c, minimum 80,000 pounds on carload of steel wire rods shipped June 24, 1918 from Acme, Ill., to San Francisco, Calif., for export as illegal and unreasonable. Shipment was forwarded on a domestic bill of lading consigned to order of Liberty Steel Products Co., San Francisco, notify American Trading Co., charged domestic rate of 90c. The shipment was intended for export to Shanghai, China as shown by the billing, and was in fact exported to that destination. At the time of shipment there was in effect a rate of 40c on steel wire rods when for export. It appears that complainant originally contracted for space on the Steamship Siberia Maru scheduled to sail July 15, 1918; that the permit issued in connection with this reservation called for a shipment of 50 tons of wire rods in coils to be shipped from New York between May 16 and 31, 1918; that a second reservation was apparently not made until after the car had reached Denver, Colo., or on or about July 9, 1918 which reservation was for steamship Shinyo Maru 2, scheduled to sail Aug. 14, 1918. The shipment arrived at San Francisco on or about July 22, 1918. The record is not clear whether or not the S. P. was justified in refusing to issue the export bill of lading. The other requirements seem not to have been fully complied with, applicable rate charged, not unreasonable or otherwise unlawful, complaint dismissed. American Trading Co. v. Director General, 115 I. C. C. 223.

(n) Complainant attacked combination rates charged on cattle and hogs, carloads, shipped between Nov. 29, 1920 and May 19, 1921 from National Stock Yards, East St. Louis, Ill., and from Louisville, Ky., to Key West, Fla., for export to Havana, Cuba, as unreasonable to extent that the factors to Jacksonville, Fla., exceeded the rates to Jacksonville, ship side, for export to Havana. Seven of the shipments were billed to Jacksonville under complainants instructions and subsequently rebilled to Key West over the F. E. C. The other shipments were billed through to Havana. All moved from points of origin over the L. & N. either through Nashville, Tenn., or Montgomery, Ala., and beyond those junctions they moved over different routes to Jacksonville, thence F. E. C. to Key West. The average distance from Louisville to Jacksonville over routes traversed was 862 miles. Distance from East St. Louis to Jacksonville is 992 miles. There were no joint rates in effect to Key West. Domestic rates were published to Jacksonville from East St. Louis and Louisville as

$213.50 and $169. From Jacksonville to Key West there was published a proportional rate of $84.50. During the entire period of this complaint the tariffs naming the factors up to Jacksonville made reference to the combination rule. HELD, rate attacked not unreasonable, complaint dismissed. Knight & Kennett v. L. & N. R. R., 115 I. C. C. 732.

(o) Proposed reduced proportional rates on grain and products from Kansas City, Mo., to Beaumont and Port Arthur, Tex., and New Orleans, La., and points taking New Orleans rates, for export, designed solely to augment traffic on line of Kansas City Southern Ry., found not justified. While proposed rates do not seem violative of either section 1 or 3 of the act, applying the usual standards, approval of the schedules will inevitably lead to a disruption of grain-rate structure, have marked effects upon distribution and marketing, the extent of which commission can not adequately foresee, and must of necessity impair the revenues of carriers and their ability to render satisfactory service. See also 69 I. C. C. 589, 611. Grain and Products, 115 I. C. C. 153.

(p) Combination rate based on Los Angeles, Calif., charged on petroleum refined oil from O'Donnell Spur, Calif., to Willmington, Calif., for export, found not unreasonable as compared with rates contemporaneously in effect on same commodity from and to various points in same general territory. Complainant contended that as each factor of a combination rate is designed to cover a local movement and two terminal services, and as there were but two terminal services on its shipments, through rate should be less than combination rate assessed. Carrier, however, showed that each factor of the combination charged was depressed by actual or potential truck, pipe-line, and rail competition, which made it impracticable to establish a through rate lower than the sum of locals. Thomas Traffic Co. v. L. A. & S. L., 120 I. C. C. 671.

(pa) Export rates yielding ton-mile earnings as low as 6.12 and 7.4 mills for hauls of 1,591 and 1,793 miles respectively, can not be accepted as proper measure of reasonable domestic rates. Chestnut & Smith Corp. v. A. & R. R. R., 123 I. C. C. 707, 713.

(q) Complainant attacked all rail, lake rail and rail lake and rail class and commodity rates on export and import traffic between Boston, Mass., and differential territory as unreasonable, unduly prejudicial to Boston and unduly preferential of Baltimore and Philadelphia. Previous decision in 95 I. C. C. 539. The establishment of joint rates from western territory to the Atlantic ports, suggested in the former report, may be regarded as eliminated from the case. Complainants agree with all other parties that the present method of constructing grain rates from western points of origin to the Atlantic ports is the best that has been devised better for the producers, the markets and the railroads than any method that has preceded. A different conclusion can not be reached on this record. Viewed either from the standpoint of history or that of the inherent nature of the traffic moving thereon, the ex-lake grain rates can not be considered an integral part of the system of port differentials as a whole or of the McGraham percentage adjustment. This conclusion is confirmed by the fact that port differentials do not exist in the case of the export class rates and many of the export commodity rates from Buffalo. If the Commission were to prescribe maximum or minimum reasonable export rates on ex-lake grain from Buffalo, it would in either case prescribe identical rates to New York, Philadelphia and Baltimore, confining such rates to the service ending with the spotting of the car at the water front elevator and requiring any further terminal service to be covered by a special charge or charges. It would further find that the same rate might lawfully be established and maintained to Boston. The record amply justifies such conclusion. But it has not been shown that the present rates are higher than maximum reasonable rates or lower than minimum reasonable rates, nor does the record enable it to determine what the maximum and minimum limits of reasonableness would be. The conclusion is inevitable that the present rates are not unlawful. HELD, rates attacked not unjust, unreasonable or unduly preferential or prejudicial, complaint dismissed. Maritime Asso. Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199.

(r) Complainant alleged that the rates charged on steel rails, angle bars, and similar articles, in carloads, shipped between June 15 and July 15, 1923 from O. N. Jct., near Palatka, Fla., to Jacksonville and Key West, Fla., for export

to Cuba, were unjust and unreasonable, discriminatory and prejudicial to the extent that they exceeded the rate from Palatka to Jacksonville and Key West to Cuba. O. N. Jct., is a point on the A. C. L., 1.6 miles west of Palatka and about 62 miles from Jacksonville. Francis, Fla., is the next station beyond O. N. Jct., and is about 5.3 miles from Palatka. Under an intermediate clause in the tariff O. N. Jct., takes the Francis rate. Applicable class M rate of $2.14 was charged on the shipment to Jacksonville and a combination rate of $5.40 to Key West, made up of class M rate of $1.80 to Palatka plus $3.60 beyond. From the record it appears that O. N. Jct. was beyond the limits of Palatka and that accordingly the applicable rates were charged. HELD, rates attacked unreasonable to extent the rate from O. N. Jct., exceeded $1.80 to Jacksonville and $3.93 per ton to Key West, reparation awarded. Hyman Michaels Co. v. A. C. L. R. R., 126 I. C. C. 547.

(s) Complainant attacked commodity rates charged on petroleum and its products, in carloads, from Hearne, Tex., to Baytown, Tex., for export, and for coast wise movement to destinations in the United States have been since Nov. 15, 1923 and are unreasonable, unjustly discriminatory and unduly prejudicial. Hearne is on the extreme southern rim of the north central Texas group. Baytown is on the Houston Ship Channel 17 miles by the channel route and 60 miles by rail south of Houston. Prior to the completion of the refinery at Hearne, complainant sought the establishment of a rate of 20.5c on refined petroleum from that point to Baytown, for export and coast wise movement. The rate sought was established, with which complainant expressed no dissatisfaction during the entire period the refinery was in operation. Defendants do not participate in the 15c rate from Shreveport to Louisiana ports, and Baytown they only form part of the route. The average distance from all points in the north central Texas group to Texas ports is 357 miles, and to Louisiana and Texas ports, 410 miles, as compared with 171 miles and 237 miles, respectively from Hearne. In establishing petroleum rates, both northbound to domestic territory and southbound to the ports, the grouping of origin and destination territories has been practiced for a number of years. Such groupings have been influenced almost entirely by the keen competition existing between refiners and producers, and the existence of pipe line and carrier competition. It follows, therefore, that distance as a factor in making petroleum rates has been largely disregarded, but if for comparative purposes ton mile earnings are considered material the average distance from the group is the only fair measure upon which such earnings should be computed. The north central Texas group of origins on export and coastwise petroleum traffic in which origin group Hearne is located, is no departure from the customary practice of grouping origins in connection with petroleum rates. Apparently complainant is willing to enjoy the advantages of group rates from the farther distant points, while requesting that from the less distant points distance be considered as the controlling factor in establishing rates. Conditions and circumstances peculiar to the transportation of petroleum oil and its products are so unique as to force the carriers to abandon most of the customarily employed elements or factors in establishing rates. Pipe line competition among refiners and producers and water competition are the elements chiefly responsible not only for subnormal or depressed rates, but have combined to force the forming of large groups of origins and destinations. HELD, rates attacked not unreasonable or unduly prejudicial, complaint dismissed. Humble Oil & Refining Co. v. B. S. L. & W. Ry., 126 I. C. C. 717.

(t) Upon further hearing in 95 I. C. C. 539, all-rail rates on grain and products from Illinois, Wisconsin, Minnesota, the Dakotas, Montana, Iowa, Nebraska, Kansas, Arkansas, and Oklahoma, to Boston and New York, for export, found not unreasonable or otherwise unlawful as compared with lower contemporaneous rates to Philadelphia and Baltimore. Complainants agree with all other parties that present method of constructing rates from western points to Atlantic ports is best that has been devised. Moreover, as larger portion of export grain now moves through Philadelphia and Baltimore, to require carriers to establish equal reshipping rates from primary markets on grain originating in Northwestern States, in accordance with recommendation in former report, would undoubtedly complicate the grain-rate

structure, and might create some difficulties in handling grain at primary markets. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199.

(u) Upon further hearing in 95 I. C. C. 539, carriers attempt to justify ex-lake differentials on grain and products from Buffalo to New York and Boston for export, over those to Baltimore and Philadelphia, contending that most ex-lake grain comes from c. f. a. territory, that there are all-rail routes through Buffalo reflecting the full differential, and that mere substitution of lake for rail movement should not deprive Baltimore and Philadelphia of their differentials. HELD: Record indicates that most ex-lake grain is not domestic but Canadian, and the differential adjustment of ex-lake grain rates to north Atlantic ports is an exception to general rule with respect to export rates from Buffalo, since both export class and commodity traffic moves therefrom to Boston, New York, Philadelphia, and Baltimore on identical rates. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 208, 211.

(v) It is desirable to confine line-haul rates to the ports strictly to service ending with spotting of cars and requiring all further terminal service to be covered by a special charge or charges. Such a plan would preserve to each port such advantages as inhere in facilities for convenient and economical loading of vessels and would also facilitate such comparison of special terminal services and charges therefor as may be deemed advisable in future. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 213.

(w) Upon further hearing in 95 I. C. C. 539, FOUND: That record does not permit precription of maximum or minimum reasonable rates on ex-lake grain from Buffalo to New York, Philadelphia, Baltimore and Boston, for export since present rates have not been shown to be unreasonable or otherwise unlawful, but if such rates were to be prescribed, evidence warrants conclusion that line-haul rates to water-front elevators at New York, Philadelphia, and Baltimore should be identical, and that maintenance of same rates to water-front elevators at Boston would not be unlawful. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 211, 216.

(x) Rates charged on steel rails, angle bars, and similar articles from O. N. Junction, Fla., a point situated beyond the switching limits of Palatka, Fla., to Jacksonville and Key West, Fla., for export to Cuba, found unreasonable to extent they exceeded rates maintained for comparable distances between other points in Florida. Reparation awarded. Hyman-Michaels Co. v. A. C. L. R. R., 126 I. C. C. 547.

(y) Rates on refined petroleum from Hearne, located on extreme southern rim of north-central Texas group, to Baytown, Tex., for export and for coastwise movement to points in the United States, found not unreasonable or unduly prejudicial as compared with rates from Shreveport, La. Carriers participating in rates from Shreveport do not participate in rates from Hearne, therefore the record does not sustain a finding of undue prejudice. Moreover, construction of the refinery at Hearne was a mistake of judgment resulting in financial loss for which complainant seeks reimbursement at carriers' expense. It can not be successfully argued that complainant did not know the group adjustment in the territory in which it operated, and the fact that it requested establishment of a rate from Hearne the same as applied from north-central Texas group, is prima facie evidence that it considered that point as being located in that group. Humble Oil & Rfg. Co. v. B., S. L. & W. Ry., 126 I. C. C. 717.

(z) Rate on gasoline from Potwin, Kans., to Westwego and St. Rose, La., for export, found not unreasonable as compared with lower rate contemporaneously in effect to same points from Arkansas City, and other Kansas producing points, and subsequently established from Potwin. Reduction of a rate does not prove that rate formerly charged was unreasonable. See 107 I. C. C. 147. Vickers Petroleum Co. v. M. P., 128 I. C. C. 205.

(aa) Complainant attacked commodity rate charged on 49 cars of gasoline shipped between Feb. 28 and March 18, 1924 from Potwin, Kan., to Westwego and St. Rose, La., for export, as unreasonable. Potwin is local to the M. P. Shipments moved over M. P. to destinations, Westwego, 957 miles, and to St. Rose over that line to Memphis, Tenn.,

thence Y. M. V. 1,036 miles. Charged 24.5c. A rate of 22c was in effect to the same points over the Frisco from Arkansas City, Kas., to Westwego, 985 miles, and to St. Rose, 1,007 miles. The rate of 22c was subsequently established from Potwin. HELD, rate attacked not unreasonable, complaint dismissed. Vickers Petroleum Co. v. M. P. R. R., 128 I. C. C. 205.

(bb) Upon contention of carrier that rail rates on export and coastwise traffic are in essence proportional rates, constituting merely factors of aggregate through rates between interior points and foreign or coastwise destinations beyond, and that in determining matter of port equalization consideration should be given to both water and rail factors entering into these aggregates, FOUND: Similar contention advanced in 73 I. C. C. 384 was found without merit. Equalization of port rates on basis advocated would require consideration, in every instance of port relationship, of water rates not on file with commission and over which, except on coastwise traffic under certain circumstances, it has no jurisdiction. This does not mean, however, that because a port is not the origin or destination of traffic passing through it, such port is not entitled to consideration in countenancing greater disregard of distance in import, export, or coastwise rates than in corresponding domestic rates. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 379, 380.

(cc) Rates on petroleum and products in export and coastwise movement from refining points in north-central Texas to New Orleans and Galveston and points taking same rates found not unreasonable as compared with those from extensive groups in various portions of Southwest for domestic and foreign consumption, nor unduly prejudicial as compared with those from Shreveport-El Dorado groups in northern Louisiana and southern Arkansas. Earnings under rates assailed are considerably below those under rates for similar distances from mid-continent groups to western trunkline and Illinois destinations found reasonable in 112 I. C. C. 421, and a reduction in rates from any one important group under present extensively grouped and highly competitive adjustment should be made cautiously and only for strongest reasons. Galveston Commercial Asso. v. G. H. & S. A., 128 I. C. C. 349, 393, 396.

(dd) Complainant alleged commodity rates on lumber, logs, crossties, piling and staves, carloads, from stations on the Muscle Shoals Ry. to Mobile, Ala., for export and coastwise movement, were and are unreasonable and unduly prejudicial. Muscle Shoals Ry. extends from Kimbrough, Ala., to Pensacola, Fla., 143 miles, connecting with the Southern at Kimbrough and L. & N. at Atmore, Ala., and Pensacola. Traffic from stations on the Muscle Shoals to Mobile is a joint line movement via Atmore, thence L. & N., distances from points of origin to Atmore range from 3 to 89 miles. Distance Atmore to Mobile 45 miles. Distances to Pensacola are in each instance 9 miles greater than to Mobile. There are no joint export or coastwise rates in effect on forest products from the points of origin to Mobile, being combinations on Atmore. The intrastate rates on these commodities are joint rates and are lower than the rates applicable on traffic for export or coastwise movement. Effective Jan. 5, 1925 Muscle Shoals published proportional rates on logs of 6c from Kimbrough, Stokes and Pekin, Ala., and 5.5c from all other stations on its lines to Atmore, Ala., applicable on shipments destined to Mobile, for export. These proportional rates, added to the L. & N. local rate of 4.5c from Atmore to Mobile, produced through combination rates of 10 and 10.5c. HELD, rates assailed unreasonable to extent they exceeded domestic rates on lumber, crossties and staves, and on logs unreasonable to extent they exceeded rates established Jan. 5, 1925, reparation awarded. Mobile Chamber of Commerce v. M. S. B. & P. Ry., 129 I. C. C. 419.

(ee) Complainant alleged commodity rate of 37.5c minimum 80,000 pounds charged on numerous carloads of colemanite from Lovell, Nev., San Pedro and Wilmington, Calif., for export, were and are unreasonable. Shipments moved L. A. & S. L., 371 and 370 miles. Colemanite is the raw material from which borax is made and has a market value of $25 a ton at Lovell. It is packed in sacks and does not contaminate the cars used, of which over 80% are refrigerator. These cars are furnished at defendants convenience and would generally move empty to the west coast if not loaded by complainant. Little risk of damage or loss is incurred. The shipments were exported to Europe and there sold in competition with colemanite from South Amer-

ica. HELD, rate assailed was, is, and will be unreasonable to extent it exceeded 25c, reparation awarded. West End Chemical Co. v. L. A. & S. L. R. R., 132 I. C. C. 686.

(ff) Complainant alleged export rates charged on 10 cars of mine props shipped from Caro, Milepost 134, Lacy and Mayotown, Tex., to Beaumont, Tex., for export between March 28 and April 11, 1924 were unreasonable and unduly prejudicial. Shipments were charged export lumber rates of 13.5c from Caro and Lacy and 12c from Milepost 134 and Mayotown. Intrastate rates were 8.5c from Caro and Mayotown and 8c from Milepost 134 and Lacy. Mine props are short lengths of pine wood with bark removed and cut to proper lengths. Their value is somewhat less than that of lumber. HELD, rates assailed unreasonable to extent they exceeded 12c from Caro, and 11c from Lacy and Milepost 134, reparation awarded; 12c from Mayotown not unreasonable. Tilford Hunt Lumber Co. v. H. E. & W. T. Ry., 132 I. C. C. 751.

(gg) Rates on cotton and linters for export or coastwise movement from points west of Mississippi River to Mobile, Ala., by rail to Alabama ports on Warrior River and barge beyond, found not unduly prejudicial as compared with rail-and-barge rates contemporaneously in effect from same points to New Orleans via Memphis, Tenn., or Vicksburg, Miss. Evidence submitted fails to show similar transportation costs over route sought via Cordova, Ala., or that traffic would move over that route if established. However, certain carriers have agreed and will be expected to publish rail-and-barge rates from western Tennessee, western Kentucky, and Mississippi through Cordova, or some other Warrior River port to Mobile, based on principles laid down in 77 I. C. C. 317; 100 I. C. C. 491. Mobile Chamber of Commerce v. A. & V., 129 I. C. C. 103.

(hh) Proposed increased proportional rates on grain and products inbound to Kansas City, Mo.-Kans., and Wichita, Kans., destined to Gulf ports for export, applicable only when movement beyond Kansas City or Wichita is over certain routes, found not justified. Previously rates over all lines consisted of locals to Kansas City plus standard proportionals beyond, but to meet lower through one-factor rates established by respondents, other lines published varying proportional rates beyond Kansas City. Contention that respondents are entitled to long haul on traffic which they originate, and that through routes do not exist over their lines in connectitn with varying proportional rates, not sustained, since implied arrangements are sufficient to constitute all these routes through routes. Moreover, mere desire to retain long haul is not sufficient to justify rates proposed. Grain and Products, 129 I. C. C. 261.

(ii) Export and coastwise rates on lumber, crossties, and staves, from points on Muscle Shoals, Birmingham & Pensacola Ry. to Mobile, Ala.; found unreasonable to extent they exceeded or may exceed domestic rates on same commodities to and from same points and prejudicial to extent they exceeded the contemporaneous export or coastwise rates on same commodities to Pensacola; coastwise rates on logs and export rates on logs, prior to January 5, 1925, found unreasonable to extent they exceeded export rates on logs established January 5, 1925; and prejudicial to extent they exceeded the contemporaneous export or coastwise rates on logs to Pensacola. Reasonable and nonprejudicial basis prescribed for future. Mobile Chamber of Commerce v. M. S., B. & P., 129 I. C. C. 419.

(jj) Upon contention that transshipment rates can not be justified as export rates, nor as proportional rates, since rates by water from the ports are not filed with the commission. FOUND: Under provisions of paragraph 13 (c) of section 6 of the act, commission is authorized to prescribe proportional rates to ports applicable to traffic moving beyond by water, and such rates may differ from corresponding local rates. They are not restricted to cases where rates beyond by water are filed with commission. Washington Coal Producers Asso. v. U. P., 129 I. C. C. 499, 500.

VI. STORAGE, DEMURRAGE, AND SPECIAL CHARGES.

§7. In General.

See Demurrage; Special Rates and Services; Storage.

(a) Charges assessed at Philadelphia for loading and unloading of export, import and intercoastal traffic, and rules

and regulations whereby such charges, are absorbed by carriers when rail rate exceeds a fixed minimum, which arrangement is designed to place Philadelphia on a parity with Baltimore and on a substantial parity with New York, found not unreasonable or otherwise unlawful. Preponderance of traffic moves through port at fixed minimum rail rates or rates in excess thereof, and traffic may move through various ports under substantially similar terms, with result that the port situation is in harmony in so far as handling charges are concerned. Philadelphia Commercial Traffic Managers v. B. & O., 104 I. C. C. 173.

(b) Refusal of carriers to permit blending in transit of petroleum products at interior Texas refining points while permitting such blending in transit at Texas and Louisiana port refineries under appropriate tariff rule, found not unduly prejudicial. Although the rule is designated at blending-in-transit provision nd is applicable to shipments in transit to an export or coastwise destination, shipment upon which it applies has in fact reached its destination, so far as rail carrier is concerned, upon delivery to coastal refiners. While blending rule is necessary in order to insure protection of export or coastwise rate, which protection appears proper because service performed in delivering to storage tank at ports is no greater than when delivered direct to vessels, such a transit arrangement at interior points would involve two separate and distinct movements, there is no necessity therefor such as exists at the ports, and it would in effect require carriers to perform inbound haul without charge. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 396, 398.

(c) Demurrage rules and charges applicable to shipments of cotton to Galveston, Tex., assessed under uniform demurrage code, found not unreasonable or otherwise unlawful as compared with lower charges on certain cotton traffic to New Orleans, nor with lower charges on shipments to Galveston moving on local bills of lading marked for export or coastwise movement under special demurrage rules. None of carriers participating in New Orleans tariff are defendants herein, and since complainants are unable to comply with provisions of special demurrage tariff, rules complained of can not be condemned because different rules are in force on traffic definitely destined for further water movement at time of arrival. Merchants & Planters Co. v. G., H. & H., 129 I. C. C. 477.

(d) Demurrage charges were assessed under demurrage code on cotton moving on domestic bills of lading. Contemporanously more free time and a lower demurrage charge applied to shipments on local bills of lading marked for export or coastwise movement, or provided consignee within 48 hours after arrival gave notice that traffic was intended for export or coastwise movement. Contention made that lower demurrage rates should have applied since water shipments were made known to carriers through their inspection bureau which secured this information from steamship offices for another purpose, but this fact found not sufficient to constitute a compliance with rules governing export or coastwise movement. Rates charged were therefore applicable. Merchants & Planters Co. v. G., H. & H., 129 I. C. C. 477, 478, 479.

(e) Differences between demurrage rules on domestic and export traffic have long been recognized as proper. Merchants & Planters Co. v. G., H. & H., 129 I. C. C. 477.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) The Commission recognizes the binding force of contracts reserving to rail carriers the right to carry on their business over their own rails and pointed out that to extend to the express companies rights with regard to traffic which were not contemplated by their contracts is not within power of the Commission. Hanford Produce Co. v. Amer. Ry. Ex. Co., 113 I. C. C. 523, 526.

(b) Upon contention of rail carrier that express shipments of fruit and vegetables from Pacific Northwest move from Jersey City to New York City piers by freight and that inasmuch as it does not hold itself out as an express carrier the commission is without authority to require it, over protest, to participate with the Express Company in a joint rate on express shipments, FOUND: This does not follow, particularly in a situation of this character. Section 3 (15) of the act empowers the commission, when it shall be deemed necessary or desirable in the public interest, to require establishment of through routes and point rates; and joint service and rates by an express company and a common carrier by railroad are not excepted. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 659.

(c) Contention of carrier that commission can not require it to establish an express terminal at Piers 20 and 21, New York, which have been regarded as its freight terminal, not sustained. Evidence does not show that handling of express shipments through auction conducted on the piers differs in any respect from handling of freight shipments. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 660.

II. FACILITIES.

See Facilities and Privileges.

§1¾. In General.

(a) The commission has heretofore considered the effect of various contractual provisions and has found that it is without authority to extend to defendant any rights with regard to traffic which were not contemplated by the contracts as executed. It is true that the railroads are primarily responsible for the proper transportation of all commodities offered to them and for the furnishing of adequate services. If the requirements of the traffic demand more expeditious service, it is the duty of the railroad either to furnish such reasonable service itself or to delegate that duty to an express company. Allen Co. v. B. C. & A. Ry., 122 I. C. C. 351, 356.

(b) Contention of carrier that commission can not require it to establish an express terminal at Piers 20 and 21, New York, which have been regarded as its freight terminal, not sustained. Evidence does not show that handling of express shipments through auction conducted on the piers differs in any respect from handling of freight shipments. American Fruit & Vegetable Shippers Assn. v. American Ry. Express Co., 128 I. C. C. 651, 660.

§6b. Baggage Car Service.

See Baggage Car Service.

(a) Complainants alleged that interstate rates exacted by defendants on milk and cream by express and by railroad in baggage cars in passenger train service are unreasonable, unduly prejudicial and unjustly discriminatory in violation of sections 1, 3 and 13 of the act. Territory involved North Pacific coast and intermountain territory. With a few exceptions the rates in question, in both the express and the railroad service, are based upon distance scales, the disparities in and between which, more particularly between the rates applicable to the short haul and to the long haul traffic, are the primary occasion for the complaint. No exclusive milk or cream trains are operated in the inter-mountain and Pacific coast regions, and but few cars are used exclusively for transporting cream. For the most part the commodity is transported in express or baggage cars with other traffic usually carried therein. At some of the larger points the carriers maintain special milk docks and provide special employees to handle milk and cream. Cream is a highly perishable commodity, moves daily in about the same volume, requires prompt handling at terminals, and is transported in passenger trains. It is produced in rural communities and shipped mostly from the smaller stations, and for its receipt and delivery the trains which carry it must make frequent stops. The Commission can concede no force to complainants contention that, inasmuch as cream is handled on through and local trains which carry express and baggage cars and are manned by crews which would be necessary in any event, the cream traffic should be considered as so much "surplus transportation" and therefore, as the Commission understands it, be accorded lower rates than would otherwise be prescribed. The traffic is within the contemplation of the Hoch Smith resolution, but the Commission can make no finding condemnatory of the rates assailed without the aid of competent evidence. Complainants case is virtually rested upon the diversity of the scales and the general testimony concerning competitive buying, leaving to mere inference any resulting undue prejudice to or unjust discrimination against its interstate commerce. Conspicuously is there lacking the basis for a corrective finding concerning the various interstate-intrastate relationships. There also is not found in the record such evidence of similarity of operating and traffic conditions in connection with shipments of cream as would afford a secure foundation for an order requiring an establishment of uniform interstate scale throughout the territory in question, particularly a scale to the level of which the alleged preferential intrastate rates should be brought. HELD, rates assailed not unreasonable or shown to be otherwise in violation of the act, complaints dismissed. Mutual Creamery Co. v. American Railway Express Co., 132 I. C. C. 208.

§7½a. Refrigeration.

See Refrigeration.

(a) Complainant attacked freight charges assessed by the defendants for the hauling of ice in bunkers from the ice plant to the loading point of perishable commodities and that the charges for refrigeration or icing protection collected by the American Railway Express Company, defendant, on perishable produce,

in carloads, shipped in refrigerator cars by express from points in Delaware, Maryland, and Virginia to destinations in United States east of the Mississippi and north of the Ohio and Potomac Rivers and in Canada are collected without tariff authority, and therefore are inapplicable and also unjust, unreasonable and unduly prejudicial. Generally speaking, ice is not available at points in the peninsula from which perishable produce is shipped, so that it is necessary to procure ice elsewhere and transport it to the loading point of the produce. Sometimes this is done by the shippers themselves or by truckmen in their employ, but more frequently the ice is frequently furnished and placed in the bunkers of refrigerator cars by large icing plants at such points as Salisbury, Md., and moved as freight by the rail carriers to the point of loading of the perishable produce. The instant case deals with shipments initially iced in this manner. In these instances the express shippers, such as the complainants in this case, are accustomed to furnish a written order for an iced refrigerator car to defendants agent at the point of loading of the perishable produce. The agent communicates this order to a route agent of defendant, who arranges with the rail carrier to furnish the car and with an ice company to furnish the initial icing. The ice company places the ice in the bunkers and ships it as freight to the point where the car is desired. Bills of lading covering this bunker ice are signed by the ice company and name as consignee the person ordering the car. The consignee pays the freight charges direct to the rail carrier, takes possession of the car, and loads it for forwarding by express. The ice company renders consignee a bill for the initial icing, which he pays directly to it. When the loaded car goes forward defendant arranges for the necessary reicing en route, pays the charges of the ice companies for the ice furnished for reicing and includes such amounts as advances in the charges which it collects at destination. It has already been noted that complainants settle directly with the ice company for the cost of the initial icing and with the rail carrier for transporting the ice in the bunkers from the ice plant to the points of loading of the perishable commodity, and that the charges for reicing which were collected by defendants upon these shipments are merely to cover reimbursement to defendant for advances to ice companies for ice furnished by them for shippers account. The regulation of the charges made by these private concerns for ice either initially or subsequently furnished is not within the jurisdiction of the commission. HELD, freight charges assailed for transportation of bunker ice not unlawful. Present rules 21 b and 22 b of Express Company governing diversion and reconsignment, respectively, of carload shipments from the Delaware-Maryland-Virginia peninsula to the destinations covered by this report are unreasonable in so far as they provide that orders for such diversion or reconsignment when given by shippers must be filed with the agent of the Express company at point of origin. Provisions of rule 16 j and l not unreasonable or otherwise unlawful. Allen & Co. v. B. C. & A. Ry., 122 I. C. C. 351.

(aa) Freight charges assessed by rail carriers for hauling ice in bunkers of express refrigerator cars from an ice plant to point of loading perishable produce for express shipment, found properly collected and not unlawful. Complainant contended that since it did not make out or authorize bills of lading, charges were illegally assessed; that carriers' tariff does not provide similar charge for ice in bunkers antecedent to movement of perishable produce by freight; and that charges were therefore unduly prejudicial to express shippers. However, carriers' failure to publish special rates for ice in bunkers can not impair the validity of customary rates which are published to apply on ice moving in any equipment. Moreover, fact that rules governing express refrigeration are not so favorable as freight-service rules does not constitute undue prejudice in view of difference in service afforded. Allen & Co. v. B., C. & A., 122 I. C. C. 351.

(b) Complainant contended that charges of American Ry. Express Co., for initial icing and for re-icing perishable produce for shipment by express are unreasonable and unduly prejudicial as compared with lower charges for ice provided in freight tariffs for icing and re-icing similar shipments. HELD: Charges for furnishing ice in connection with refrigeration or icing protection of shipments here in issue accrue for benefit of private ice companies over which the commission has no jurisdiction. Allen & Co. v. B., C. & A., 122 I. C. C. 351, 354.

(c) Express company's classification rule provides that when its refrigerator cars are not available, shipments will be accepted only when cars are furnished by shippers or railroad company and that such cars will be handled in trains designated by rail carriers. Upon contention that this provision restricts the number of express refrigerator cars available for shipments from territory in issue, HELD: Commission is without authority to extend to express company any rights not contemplated by its contracts with rail carriers. See 74 I. C. C. 427. While railroads are primarily responsible for transportation of all commodities offered to them, for the furnishing of adequate service, and if requirements demand more expeditious service, to furnish such reasonable service or delegate that duty to an express company, see 83 I. C. C. 160, 163, here the traffic by election of shippers was offered to express company and not to the railroads. Allen & Co. v. B., C. & A., 122 I. C. C. 351, 356, 357.

(d) Complainant contended that express company failed or refused to furnish information to shippers relative to icing and re-icing charges on express shipments, and showed in certain cases that expense bills rendered at destination were not properly itemized. HELD: While consignee is entitled to this information as a matter of right, there is no provision of law which obligates the express company to furnish it to a party other than the one paying express charges. Allen & Co. v. B., C. & A., 122 I. C. C. 351, 358.

IV. RATES.

§10. Reasonableness in General.

See Reasonableness of Rates.

(a) Proposal of American Ry. Express Co. to cancel express commodity rates, now named by block numbers, on fruits and vegetables between Mountain-Pacific and eastern and c. f. a. territories, and to establish specific rates from points from which past shipments have been made, found not justified. Proposed change is designed solely in interest of economy in publishing and distributing tariffs by eliminating necessity of filing copies at stations from which there is no likelihood of movement. However, tariffs now in effect are small as compared with those which would supersede them, and should many supplements become necessary, the aggregate printing would soon exceed present tariffs and entail even greater printing and distribution costs than present arrangement. Moreover, change would materially restrict application of rates, especially as to destinations. Express Rates on Fruits and Vegetables, 104 I. C. C. 739.

(b) Express rates, rules, and practices carried in express money classification and applicable to transportation of gold and silver coin, and bullion, paper currency, and securities, from, to, and between interstate points, found not unreasonable, discriminatory, or unduly prejudicial as compared with those carried in express freight classification and applicable to other valuable articles. The methods of handling money and merchandise are so dissimilar, due to necessary protection against loss or theft accorded former, that it is difficult to conceive that transportation charges thereon should be same on packages of equal weight. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4.

(c) Contention that rule of express classification under which gold and silver coin and bullion, paper currency, and securities are denied transportation at rates named therein unless value is declared by shipper and marked upon package, violates section 20 (11) of the act, such rates being released-value rates not authorized by commission, not sustained. Rule merely requires that shipper indicate actual value, which indication determines applicable rate. There is no provision for declared or agreed value limiting liability, nor does shipper have privilege of declaring a lesser value in consideration of a lower rate. Moreover, released rates and actual-value rates may be fairly and effectively differentiated and actual-value rates are not within prohibition of section 20 (11). See 100 I. C. C. 471. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 6.

(d) Express rates, rules, and practices, carried in express money classification and applicable to transportation of gold and silver coin and bullion, paper currency, and securities, found not unreasonable, discriminatory, or unduly prejudicial as compared with those applicable to transportation of same commodities by registered United States mail. Registered-mail charges do not afford a fair comparison with express rates because the Post Office Department is not required to produce return on

capital invested, but has been, and is, operated at a deficit. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 13.

(e) Express companies do not regard money, bullion, and securities as desirable traffic, and prefer that these articles be handled by other agencies. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 17.

(f) Upon complaint seeking establishment of released express rates on gold and silver coin and bullion, paper currency, and securities from, to, and between interstate points. FOUND: If such rates were established, it would still be necessary to provide same protective service against loss and theft at present accorded this traffic because some shipments would be made on basis of full valuation. Moreover, taking into account shipments that would be made at released rates, revenue would be far less than cost of maintaining service, and the handling of money in this manner would tend to lessen care now given by employees to prevent loss of packages through negligence or robbery. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 17.

(g) Colorado Points: Express rates on fresh fruits and vegetables from Farmington district in New Mexico to destinations in Colorado found not unreasonable as compared with express commodity rates on like traffic for corresponding distances between various interstate points in same general territory and with intrastate rates from points in Western Slope district of Colorado to same destinations. Hunter Bros. Mercantile Co. v. Am. Ry. Ex. Co., 107 I. C. C. 313.

(h) Express distance rates on l. c. l. shipments of cream in 10-gallon cans from Essex, N. Y., to Fair Haven, Vt., and Springfield, Mass., found not unreasonable in past but unreasonable for future. Reasonable rates prescribed and reparation denied. State of New York v. Am. Ry. Exp. Co., 109 I. C. C. 20.

(i) Request that baggage-car service and rates be prescribed on l. c. l. shipments of cream from Essex, N. Y., to Fair Haven, Vt., and Springfield, Mass., denied. The express service is adequate and carriers should not be required to furnish baggage-car service, which would impose an additional expense upon them and more or less interfere with other baggage-car service. State of New York v. Am. Ry. Exp. Co., 109 I. C. C. 20, 24.

(j) Present interstate commodity express rates on dressed poultry and dead rabbits, in straight and mixed carloads, and/or dressed poultry and/or dead rabbits in mixed carloads with butter, and/or eggs found unreasonable for future to extent that they may respectively exceed rates in effect on October 12, 1920. Nat'l. Poultry, Butter & Egg Asso. v. Am. Ry. Exp. Co., 109 I. C. C. 565.

(k) Second class express rate on milk and cream, l. c. l. from Fredericksburg, Va., to Rocky Mount, N. C., found unreasonable as compared with rates for greater distances contemporaneously in effect in c. f. a., and in same general territory, and to extent it exceeded lower rate subsequently established. Reparation awarded. Sirles v. Am. Ry. Exp. Co., 113 I. C. C. 736.

(l) Complainant attacked express rates charged on less carloads of milk and cream made prior to May 27, and April 30, 1924, from Fredericksburg, Va., to Rocky Mount, N. C., as unreasonable. Shipments were handled by R. F. & P., to Richmond, Va., and A. C. L. beyond, 186.5 miles, applicable rate second class $1.57. Effective May 27, and April 30, 1924, rate was reduced to 82.5c on milk and cream the basis to which reparation is sought. HELD, rate attacked unreasonable to extent it exceeded 82.5c reparation awarded. Sirles v. Amer. Ry. Express, 113 I. C. C. 736.

(m) Complainant attacked second class express rate charged on two cars of milk, in 10 gallon cans, shipped on Jan. 3, and 9, 1924, from Mason, Mich., to Chicago, Ill., as unreasonable and inapplicable. Shipment moved by express over M. C. in baggage cars charged $1.35, which rate is claimed unreasonable to extent it exceeded rate of 52c published by M. C. It appears that the express service performed was identical to that which the rail line ordinarily performs in baggage service on passenger trains under the commodity rate of 52c. HELD, rate applicable but unreasonable to extent it exceeded 52c, reparation awarded. Bowman Dairy Co. v. Am. Ry. Ex. Co., 118 I. C. C. 529.

(n) Distance express rates on milk and cream under the intermountain scale from New Mexico points to Wichita, Kans., found not unreasonable as com-

pared with rates from Texas points to same destination applicable under the Beatrice scale. Both scales apply over extensive territories in which traffic, operating and transportation conditions vary, and therefore, unreasonableness of one scale in a particular section is not established by a showing that it is higher than the other scale in contiguous territory. Wichita Chamber of Commerce v. Am. Exp. Co., 115 I. C. C. 729.

(o) Under existing system of express rates practically all articles except food products are charged first-class rates regardless of their bulk. Parlor Frame Mfrs. Asso. v. A. A. R. R., 118 I. C. C. 154, 155.

(p) Second-class express rate on milk in 10-gallon cans in baggage cars from Mason, Mich., to Chicago, Ill., found unreasonable to extent it exceeded lower mileage commodity rate contemporaneously maintained by the rail carrier over same route, express movement embracing identically the same service as performed by the rail line in baggage service on passenger trains. See 74 I. C. C. 763 and other cited cases. Reparation awarded. Bowman Dairy Co. v. Am. Ry. Exp., 118 I. C. C. 529.

(q) Aggregate of express rate to Jersey City, N. J., plus Erie Railroad's floatage charge beyond, applicable to shipments of fruits and vegetables n. o. s., from points in California, Washington, Oregon, and Idaho to Piers 20 and 21, New York, found unreasonable as compared with lower rates contemporaneously in effect to various Atlantic coast destinations and to extent it exceeded rate found reasonable in original report 81 I. C. C. 87, from California points. Rates from the Northwest and California were formerly the same, as floatage charges on shipments from both origin points were absorbed by the express company, and record does not justify increases resulting from cancellation of such absorptions. Reasonable rate prescribed for future and reparation awarded. Finding in original report above cited, affirmed. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651.

(r) Fruits and vegetables, n.o.s. carloads, shipped by express from California, Washington, Oregon and Idaho to Erie Railroad Piers 20 and 21, North River, New York, N. Y., are transported by rail to Jersey City, N. J., and thence floated by defendant Erie, across the North river to the piers. For a considerable period prior to Feb. 28, 1921 the Express company absorbed all or part of the Eries charge out of the express rate to Jersey City and also permitted consignees to take delivery of their shipments of Piers 20 and 21. Effective on that date the absorption was canceled and consignees were thereafter required to accept delivery of their shipments from defendant at Jersey City, and take out new bills of lading at that point covering the Eries service across the river to Piers 20 and 21. Original report, American Fruit & Vegetable Shippers Asso. v. Amer. Ry. Exp. Co., 81 I. C. C. 87. HELD, rates charged for the through movement of express shipments of fruits and vegetables, n.o.s. in carloads from California to Piers 20 and 21, unreasonable to extent they exceeded $4.28 prior to June 21, 1924 and $3.83 subsequent thereto. Aggregate rate charged from Washington, Oregon and Idaho unreasonable to extent they exceeded $4.28 prior to June 21, 1924 and $3.83 subsequent; reparation awarded. American Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651.

§11. Specific Rates.

(2) Rates Based on Value.

See Comparative Rates; Released Rates.

(a) Contention that rule of express classification under which gold and silver coin and bullion, paper currency, and securities are denied transportation at rates named therein unless value is declared by shipped and marked upon package, violates section 20 (11) of the act, such rates being released-value rates not authorized by commission, not sustained. Rule merely requires that shipper indicate actual value, which indication determines applicable rate. There is no provision for declared or agreed value limiting liability, nor does shipper have privilege of declaring a lesser value in consideration of a lower rate. Moreover, released rates and actual-value rates may be fairly and effectively differentiated and actual-value rates are not within prohibition of section 20 (11). See I. C. C. 471. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 6.

(b) Upon complaint seeking estab-

lishment of released express rates on gold and silver coin and bullion, paper currency, and securities from, to, and between interstate points. FOUND: If such rates were established it would still be necessary to provide same protective service against loss and theft at present accorded this traffic, because some shipments would be made on basis of full valuation. Moreover, taking into account shipments that would be made at released rates, revenues would be far less than cost of maintaining service, and the handling of money in this manner would tend to lessen care now given by employees to prevent loss of packages through negligence or robbery. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 17.

§11(4). Block or Distance System.

(a) Express distance rates on l. c. l. shipments of cream in 10-gallon cans from Essex, N. Y., to Fair Haven, Vt., and Springfield, Mass., found not unreasonable in past, but unreasonable for future. Reasonable rates prescribed and reparation denied. State of New York v. Am. Ry. Exp. Co., 109 I. C. C. 20.

§11. (5) Live Stock.

See Live Stock Shipments.

(a) Rules governing free transportation of attendants with race horses, polo mounts, and show horses, in carloads, moving by express, found unreasonable to extent they accord transportation to fewer attendants than therein prescribed based on kind and number of horses per car. Express Company's proposal to restrict number of attendants to two per car in all instances, found not justified. Record indicates that race horses being nervous, temperamental, and highly susceptible to disease, require a greater number of attendants per car than either polo or show horses which are more tractable and of more even temperment. Moreover, as record shows that two and one attendants per aisle respectively are usually sent with and are necessary for proper care of race horses and other horses, this number should be transported without charge in addition to minimum rates per car. Reasonable rules prescribed for future. Horse Asso. of America v. Amer. Ry. Exp. Co., 126 I. C. C. 103.

§11a. Classification.

See Classification.

(a) Charge for return by express of empty canvas-jacket ice-cream containers, found unreasonable as compared with charge on ice-cream containers, in tubs, and to extent it exceeded return charge, including delivery service, on 10-gallon milk cans with which empty ice-cream cans in canvas jackets are fairly comparable in both weight and size. Average weight of a can of ice cream in canvas jacket is considerably less than when shipped in the tub container, requires less service than the old-style tub, and charge for its return should be somewhat less. Reasonable charge prescribed for future. Nat'l. Asso. Ice Cream Mfrs. v. Express Co., 128 I. C. C. 143.

(b) Complainant alleged that the charge of 16c for the interstate transportation by express of returned empty canvas jacket ice cream containers is unreasonable and discriminatory. Average weight 23 pounds. The uniform rate on returned ice cream containers, not exceeding 5 gallon capacity, is 16c, effective Sept. 10, 1918. For many years prior to that date the charge was 15c. When the rate on returned ice cream containers was established some 30 years ago, it applied almost exclusively to cans in tub containers which weighed about 45 pounds. As compared with the tub container the Commission believes that the charge for returning the canvas jacket container should be somewhat less. There is in effect a return charge of 15c, including delivery service, on 10 gallon milk cans weighing 23 pounds. HELD, charge of 16c unreasonable to extent it exceeds 15c. National Association Ice Cream Mfrs. v. Express Co., 128 I. C. C. 143.

(c) Complainant alleged that failure of American Railway Express Company and Southeastern Express Company to classify ice cream mix as condensed milk and to receive and transport interstate express shipments of this commodity on the same rates, rules, and regulations as other forms of condensed milk is discriminatory and results in the assessment of unjust, and unreasonable charges; that the failure of some defendant railroads to receive ice cream mix in baggage service is discriminatory. At present the second class rate is assessed on ice cream mix moving by express. Over railroads permitting shipments of ice cream mix to be moved in baggage cars, the same

commodity rates as apply on cream and condensed milk are generally charged. Some railroads refuse to accept ice cream mix for shipment in this manner and there are apparently no interline baggage shipments of this article. The evidence indicates that, so far as it extends, complainant is satisfied with the baggage car service wherever supplied by the rail lines, and that, except for what it considers unreasonably high rates, complainants would be satisfied with the facilities and service of the express companies for the socalled interline movements of this commodity. It seems fairly established that the product known commercially as ice cream mix has a well defined significance in trade, although there may be slight variations in the amounts of the various ingredients; and that its transportation and commercial characteristics so closely resemble those of the several varieties of skimmed milk and cream as to render any different treatment of the commodities both unreasonable and discriminatory. HELD, rates assailed on ice cream mix by express unreasonable and unjustly discriminatory to extent they exceeded express rates on condensed milk from and to the same points. Railroad defendants to apply same rates and service in baggage cars of ice cream mix as on condensed milk. Natl. Assn. of Ice Cream Mfrs. v. Amer. Ry. Exp., 132 I. C. C. 377.

VI. TARIFFS.

See Released Rates; Tariffs.

§13. Construction.

(a) Express shipments of fruits and vegetables, n. o. s., from Washington and Oregon points to New York City, assessed rates under tariff providing that "rates to Brooklyn and New York City, when routed via New Jersey Terminals do not include drayage service in Brooklyn or New York City except as provided," and subsequently changed to read "do not include drayage service in Brooklyn or New York City," plus terminal charge for floating across North River to piers, found overcharged. Tariff held out a rate to New York City; provision last quoted that rate did not include drayage within New York City can not be interpreted as requiring acceptance of delivery at Jersey City of shipments destined to New York City; and there was no tariff authority for exaction of the terminal charge. Refund of overcharges directed. Amer. Fruit & Veg. Shippers Assn. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 656, 657.

§16¾. Reconsignment.

See Reconsignment.

(a) Rules of American Ry. Express Co., governing reconsignment and diversion, as applied to shipments of perishable produce from the Delaware-Maryland-Virginia peninsula, to various destinations in United States and Canada, found unreasonable in so far as they provide that such orders when given by shippers must be filed with express company's agent " at points of origin." If the objectionable restrictions are eliminated it is difficult to see in what respect a satisfactory bond of indemnity would not be sufficient protection against possible liability. Allen & Co. v. B., C. & A., 122 I. C. C. 351, 357, 358.

X. RULES AND REGULATIONS.

§29. In General.

See Through Routes and Joint Rates.

(a) Contention that rule of express classification under which gold and silver coin and bullion, paper currency, and securities are denied transportation at rates named therein unless value is declared by shipper and marked upon package, violates section 20 (11) of the act, such rates being released-value rates not authorized by commission, not sustained. Rule merely requires that shipper indicate actual value, which indication determines applicable rate. There is no provision for declared or agreed value limiting liability, nor does shipper have privilege of declaring a lessser value in consideration of a lower rate. Moreover, released rates and actual-value rates may be fairly and effectively differentiated and actual-value rates are not within prohibition of section 20 (11). See 100 I. C. C. 471. N. Y. Federal Reserve Bank v. Am. Ry. Exp. Co., 107 I. C. C. 4, 6.

XI. THROUGH ROUTES AND JOINT RATES.

See Through Routes and Joint Rates.

§36. In General.

(a) Practice of Express Company of requiring consignees to accept delivery at Jersey City, N. J., of shipments of

fruits and vegetables, n. o. s., from points in Washington, Oregon, and Idaho, destined to Piers 20 and 21, New York, resulting from cancellation of absorption of Erie Railroad's floatage charges from Jersey City to the piers, found unreasonable as compared with through routes and service previously in effect, and with finding in 81 I. C. C. 87. Through route and service to piers ordered restored. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C.651.

(b) Aggregate of express rate to Jersey City, N. J. plus Erie Railroad's floatage charge beyond, applicable to shipments of fruits and vegetables, n. o. s., from points in California, Washington, Oregon, and Idaho to Piers 20 and 21, New York, found unreasonable as compared with lower rates contemporaneously in effect to various Atlantic coast destinations and to extent it exceeded rate found reasonable in original report, 81 I. C. C. 87, from California points. Rates from the Northwest and California were formerly the same, as floatage charges on shipments from both origin points were absorbed by the express company, and record does not justify increases resulting from cancellation of such absorptions. Reasonable rate prescribed for future and reparation awarded. Finding in original report above cited, affirmed. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651.

(c) Upon contention of rail carrier that express shipments of fruits and vegetables from Pacific Northwest move from Jersey City to New York piers by freight and that inasmuch as it does not hold itself out as an express carrier the commission is without authority to require it, over protest, to participate with the Express Company in a joint rate on express shipments. FOUND: This does not follow, particularly in a situation of this character. Section 3 (15) of the act empowers the commission, when it shall be deemed necessary or desirable in the public interest, to require establishment of through routes and joint rates; and joint service and rates by an express company and a common carrier by railroad are not excepted. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651, 659.

§37½. **Minimums.**

See Minimums.

(a) Estimated billing weights used in assessing charges on shipments of ice cream by express, and rates and charges resulting therefrom, found not unreasonable or unjustly discriminatory. Upon contention that a new style tub adopted by ice cream shippers is of less cubic capacity and of less weight when packed for shipment than old-style tub upon which present estimated billing weight was established, it was agreed by parties that a joint weighing test be made. Certified reports thereof show that average gross weight of shipments in new-style 5-gallon tubs exceeds that of the old-style, and that actual average gross weight of all shipments in 5-gallon tubs is greater than that upon which present estimated billing weight is based. Nat'l. Asso. of Ice Cream Mfrs. v. Amer. Ry. Exp. Co., 107 I. C. C. 267.

XIV. RELATION TO RAILROADS.

§40. **In General.**

(a) The principle is well settled that the rights and duties of the rail carriers and express companies are determined by the terms of their respective contracts, the terms of which the Commission is not authorized to change. National Asso. of Ice Cream Mfrs. v. Amer. Ry. Express Co., 132 I. C. C. 377, 383.

I. JURISDICTION OF COMMISSION.

See Interstate Commerce Commission I; Jurisdiction of Commission.

§1. In General.

(a) Upon contention that interchange of traffic situation at York, Pa., does not constitute a "practice," and that if undue prejudice is found an alternative order is only order legally permissable, since section 15 (1) of the act is procedural and does not enlarge duties or obligations of carriers. HELD: Section 15 (1) is adjective law as distinguished from substantive law, and while it casts no additional duties on carriers, it gives commission authority to deal with violations of substantive law. Considering definition of word "practice," and fact that arrangement at York is referred to as such in proceedings before commission and the courts, the situation discloses a practice "relating to or connected with receiving, storing, and delivery of property," and commission is empowered to determine and prescribe manner in which violations of the act in connection with such situation shall be removed. York Mfrs. Asso. v. P. R. R., 107 I. C. C. 219, 231, 232.

(b) Upon contention of carrier that it can not be required to establish transit arrangements at a point on its line applicable in connection with traffic originating on its rails on the ground that to do so would deprive it of the long haul in violation of section 15 (4) of the act. HELD, that section merely prohibits commission from requiring establishment of joint through routes and rates which will have the effect of short hauling carriers under circumstances there set forth. But where, as here, the situation is simply whether or not transit shall be permitted at a point on its rails in connection with through rates and routes already in effect, this is clearly a situation not covered by section 15 (4). Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(c) The commission has power under section 1 of the act to require establishment of transit, 257 U. S. 247, 257, but has exercised that power rarely, its policy having been generally not to require the establishment of transit arrangements unless to remove unjust discrimination or undue prejudice. See 87 I. C. C. 425, 435. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 332, 333.

(d) Commission can not fix freight rates or transit charges so as to preserve a fixed relationship between through charges by all-rail and rail-lake-rail routes. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 67.

(e) The Commission clearly has power, under section 1 of the act to regulate commerce, as amended, to determine whether, in a particular case, a transit privilege should be granted or should be withdrawn. Transit arrangement on lumber, 129 I. C. C. 518, 520.

II. CARRIER'S DUTY TO FURNISH OR PERMIT.

See Allowances §10; Bills of Lading II; Branch Lines IV; Cars and Car Supply IV, V; Express Companies §1¾; Lighterage V; Reconsignment §3½; Refrigeration II; Terminal Facilities II, §3; Through Routes and Joint Rates VII; Transportation II.

§2. In general.

(a) In general the difficulties, abuses and errors to be encountered by carriers in the performance of the stop off service are not materially different from those met in the performance of their duties in connection with the general practice of milling grain in transit, the reconsignment of carload traffic and other transit services, generally recognized as commercial necessities. Ohio Farm Bureau Federation v. N. & W. Ry., 120 I. C. C. 305, 307.

(b) Connecting lines can not dictate to the road that alone serves the transit point the manner in which joint rates through that point shall be applied in conjunction with the transit arrangements, so long as they are not deprived of their long haul. Transit arrangement on lumber, 129 I. C. C. 518, 520.

(c) Under the rules of the commission governing the making, filing, and publishing of tariffs, privileges like creosoting in transit are treated as a matter local to the railroad on which transit point is situated. Whether the privilege shall be granted or withheld is determined by the local carrier. If granted, the local carrier determines the conditions; and these are set forth in the local tariff. Although a joint through route with joint rates is established by concurrent action of several carriers, the transit privilege may thus be granted by a carrier without the consent of, and without consulting, connecting carriers. Transit arrangement on lumber, 129 I. C. C. 518, 520.

(d) Connecting lines can not dictate to the road which serves the transit point the manner in which joint rates through that point shall be applied in conjunction with the transit arrangements, so long as they are not deprived of their long haul. Transit privileges on lumber, 132 I. C. C. 53, 55.

§3. Compression.

See Compress Companies and Charges.

(a) Numerous investigations made by the commission with respect to cotton rates and concentration arrangements throughout the South and Southwest bear out fact that concentration is a commercial necessity and that little cotton can or does move from particular origins to particular destinations when no adequate concentration and compressing in transit arrangements are in effect at commercially convenient points. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 572, 585, 586.

(b) Any-quantity rates on cotton from stations south of Montgomery, Ala., concentrated and compressed at that point and reshipped to Mobile, Pensacola, and New Orleans, found not unreasonable under section 1 of the act. The transit service, voluntarily established by carriers, embraces a back haul from transit point, thus entailing a situation deprecated by the commission in former cases. While transit on cotton has been so long in effect and so widely accorded as to become practically an inherent incident in the transportation of that commodity, that fact does not lessen the application to it of the general observations that transit arrangements represent a departure from ordinary transportation service, involving as it does two separate and distinct local movements to and from the transit point with all the accompanying physical handling and the keeping of necessary records in connection therewith. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325.

(c) On cotton moving to Montgomery, Ala., for concentration and compression and reshipment beyond, the interstate inbound locals were higher than intra-

state local rates, the matter of which rate should be used not being covered by tariff provision. Contention that lower intrastate rates were legally applicable on shipments originating at stations south of Montgomery, concentrated and compressed at that point and reshipped to Mobile, Pensacola, and New Orleans, not sustained following Conf. Ruling adopted March 15, 1921, wherein the rule is laid down that where interstate, proportional, or reshipping rates are named on shipments originating beyond reshipping or transit points, such rates are applicable only in case inbound charges are based on inbound interstate rates. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 326, 327.

(d) Proposed increased rates on cotton, cotton linters, and regins, in any quantity, from stations south of Montgomery and Selma, Ala., concentrated and compressed at those points and reshipped to Mobile, Pensacola, and New Orleans, found not justified. The transit arrangement at Montgomery and Selma is of many years' standing, is a commercial necessity in handling the business, and should not be lightly disturbed. While necessity for back hauls may be regarded as a disability due to location of these transit points and may properly be reflected in some difference in rate as compared with points from which no back hauls are necessary, the disturbance of relations to extent that would be produced by proposed rates is not warranted and would result in undue prejudice to points from which increases are proposed. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 333, 335.

(e) Carriers are not obliged to compress cotton in transit and whenever they do not elect to do so the shipper must assume that burden, if compression is desired. Cotton from Tennessee River Landings, 120 I. C. C. 51, 52, 53.

(f) Concentration arrangements on dairy products in effect in South Dakota and Nebraska on traffic moving to Chicago, while denying similar transit arrangements on like traffic moving to Duluth, found unduly preferential of former and unduly prejudicial to latter-named point. Undue prejudice ordered removed. Duluth Chamber of Commerce v. C. & N. W., 120 I. C. C. 683.

(g) In 98 I. C. C. 619 division 4 had under consideration defendants failure to absorb out of the applicable rates the entire compress charge on various shipments of cotton originating at and forwarded from Jonesboro, Pine Prairie, and Mamon, points on the Rock Island in Louisiana, compressed at Alexandria, La., and reshipped over the T. & P., to New Orleans. Division 4 found that the compression of these shipments was not at the expense of the carrier, and that as the outbound shipments were not delivered to the Rock Island in accordance with the applicable tariff provision, but were reshipped over the T. & P., the movements were separate and distinct transactions, on which the local rates were properly applied. On further hearing complainant developed the fact that after the cotton was compressed the Compress company took out Rock Island bills of lading and tendered the compressed cotton to the Rock Island for reshipment to New Orleans; that the bills of lading were executed by the Rock Island agent at New Orleans; that after the bills of lading were signed necessary equipment was ordered by that carrier and placed at the compress; and that the cotton was loaded under Rock Island supervision and sent out by it over the T. & P. rails. These shipments were entitled to the protection of the through rates. HELD, through rates less the published allowance for compression were applicable on complainants shipments, reparation awarded. Haas & Co. v. Director General, 123 I. C. C. 121.

(h) In original report, 98 I. C. C. 619, failure of carriers to absorb out of applicable rates the entire compress charge on cotton originating at and forwarded from Jonesboro, Pine Prairie, and Mamou, La., compressed at Alexandria, and reshipped to New Orleans, was not found unreasonable it being shown that compression was not " at the expense of the carrier" as provided by tariff. Upon further hearing, original report reversed as under terms of the tariff carrier extended to shipper the protection of the through rate, not only in event that compression was "by and at the expense of the carrier," but also when, as here after compression, it was redelivered to originating carrier, irrespective of whether compression was done by the carrier or some other agency. In either instance carrier would obtain entire haul from point of origin to destination, and transportation facil-

ities accorded would be identical. Reparation awarded. Haas & Co. v. Director General, 123 I. C. C. 121.

(i) Upon contention of port interests that as many interior shippers of cotton are stockholders in interior compress companies, profit from carriers' compression allowance gives them an unreasonable and unlawful advantage over port shippers and compress companies, and that such companies render service to interior shippers either free or at less than reasonable charges, HELD: Since selection of compress point rests entirely with carriers, shippers whether stockholders or not can secure no favor or advantage not accorded any other shipper. If they direct carriers to compress their cotton at a point beyond the first compress point in route, they must not only bear compression charge but are assessed a higher rate on the uncompressed cotton. Prior report 77 I. C. C. 388; 100 I. C. C. 159. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 700, 701.

(j) Port interests argue that it would be less expensive for carriers to transport cotton uncompressed than to bear cost of compression en route where hauls are 325 miles and less. HELD: As carriers do not know final destination of cotton when first offered for transportation, and as cost of movement of flat cotton increases with distance, it would be less economical for carriers to move it past interior compresses to port facilities for compression if it is to be forwarded to some other port for export or to eastern consuming points. See 46 I. C. C. 451. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 705.

(k) Complainant alleged that defendants have violated section 6 of the act by failing to pay the compression charges on cotton from points in North Carolina and South Carolina to destinations in Georgia and Alabama compressed at Augusta, Ga. During May, June and July 1925 complainants shipped, consigned to themselves on through bills of lading from points on the A. C. L. in North Carolina to Georgia and Alabama, 1,283 bales of cotton. A part or all of each shipment originated beyond the billing points and was warehoused in transit in noncompress warehouses at the billing points. Each bill of lading contained routing instructions and, on the same line therewith, the following notation: "Via Augusta Warehouse & Compress Company for compression." Augusta was the first compress point in the direct route of movement. When the shipments reached the plant of that company the agent of the A. C. L. at Augusta notified the compress that his company would not pay the cost of compression. The compress than took the matter up with complainants, with the result that the cotton was compressed and the cost of compression, $953.22, paid by complainants. Complainants contend that the A. C. L. exercised its privilege of compressing reserved to it by the tariff. The tariff shows that when the carriers exercise their privilege to compress at origin or in transit cotton delivered to them uncompressed, the cost of compression is included in the rate, but that when cotton for compression at a compress directly intermediate between point of origin and destination the cost of the compression will be at shippers expense. The only rates published in the tariff containing note 6 are those captioned, but merely because they are made subject to the carriers option to compress does not render them inapplicable on uncompressed shipments on which the carriers do not exercise their option. The fact that the agents issued through bills of lading and accepted prepayment of freight charges on the basis of the joint rates from the original points of shipment to the final destinations, does not afford a basis for finding that the applicable rates included the cost of compression. The record clearly shows that defendants did not exercise their privilege to compress. There is nothing in the applicable tariffs which requires the carriers to notify shippers when they desire to exercise their privilege to compress. It is true that when a shipment is delivered to the carrier for transportation to a designated point, there is no certainty that the railroad will or will not exercise its privilege to compress. This is unavoidably so because the condition of car supply and other elements that influence the carrier in the exercise of its option will not be known to the shipper in all instances. HELD, defendants failure to pay compression charges at Augusta, Ga., not unlawful, complaint dismissed. McFadden & Bros. Agency v. A. & R. R. R., 126 I. C. C. 519.

(l) The compression is not a transportation service for the shipper. No obligation rests upon the carrier to perform the service or to pay for it if it is performed by shippers. The rates apply

on uncompressed cotton with the understanding that if, for the carriers own purpose, namely, to economize transportation and car space, it sees fit to compress the cotton en route to destination it is authorized so to do at its own expense. McFadden & Bros., Agency v. A. & R. R. R., 126 I. C. C. 519, 523.

(m) Fact that carriers' agent issued through bills of lading from origin points to final destinations covering shipments of cotton, and accepted prepayment of freight charges on basis of joint rates in violation of tariff authority which provided for assessing local rates to transit points and through rates beyond, does not afford a basis for finding that applicable rates included cost of compression in transit. McFadden & Bros. Agency v. A. & R. R. R., 126 I. C. C. 519, 522.

(n) Upon contention that because carriers' agents executed bills of lading which showed that cotton had been compressed, and because they did not signify to complainants that they desired to handle cotton flat or uncompressed from compress point to final destinations, they must be considered as having exercised their privilege of compressing in transit and should therefore bear cost thereof, HELD: Contention is without merit. Nothing in tariff requires carriers to notify shippers when they desire to exercise their privilege to compress. Certainly they can not be considered as having exercised their privilege to compress because they exercised through bills of lading which showed that cotton previously had been compressed. McFadden & Bros. Agency v. A. & R. R. R., 126 I. C. C. 519, 522, 523.

(o) Complainant alleged that defendants refusal to publish and apply rules, regulations and rates on cotton, any quantity, shipped uncompressed to be compressed by and at carriers expense, from points of origin on the Santa Fe in southeastern New Mexico, Carlsbad to Corral, incl., destined to Texas Gulf ports and beyond, and moving Santa Fe to Pecos, thence T. & P. Sweetwater, Tex., and Santa Fe with option of concentration at Pecos is unreasonable; and that the present handling of such cotton over the Santa Fe system route via Clovis, N. M., and Sweetwater, with option of concentration at Roswell, N. M., results in delay and wasteful transportation. The traffic is cotton moving (a) on local bills of lading from country stations to compress points for concentration, which includes fumigating, marketing, storing, grading, assembling grades, conditioning, and marketing, before shipment; and (b) on through bills of lading from country stations to final destinations to be compressed in transit. Although there is some division among the shippers of the Pecos valley as to the necessity, desirability, and advantage of joint rates via Pecos and the T. & P. the evidence indicates that the weight of opinion is opposed to the establishment of such rates because of the probable effect it would have upon the industries and the carrier service in the valley. The Santa Fe's branch through the valley is the only rail line in southeastern New Mexico. Shippers along its entire length from Clovis to Pecos would be affected by the logical consequences of the change here sought. Industries in the valley are dependent upon that line for their progress and perhaps for their existence. Anything tending to bring about a reduction in the service over it, such as the lessening of the already light traffic density, would be detrimental to the best interests of the people of the valley. The evidence falls far short of establishing that the joint rates and concentration at Pecos sought are "necessary or desirable in the public interest". Neither does the evidence show that the route over the Santa Fe system is unreasonably long as compared with that via Pecos and the T. & P. or that movement over the former results in wasteful transportation. HELD, rates ruled not unreasonable, complaint dismissed. Smith Wilson & Co., v. A. T. & S. F. Ry., 129 I. C. C. 65.

(p) Complainant alleged that rates on uncompressed cotton from certain points in Mississippi and Tennessee to New Orleans and defendants practice of refusing to accept the shipments subject to the carriers privilege of compressing in transit were unreasonable, illegal and unduly prejudicial. The origin points involved are north of Newton, Miss., on the G. M. & N. and affiliated lines. These carriers do not serve New Orleans and the cotton reached its destination over their connections. The rates charged were first class, ranging from $1.285 to $1.455, which are claimed to be unreasonable to extent they exceeded the commodity rates from and to

the same points on compressed cotton, which were 76.5c, except from Jackson, Tenn., and a few nearby points, where the rate was 81c. On Sept. 12, 1927 these rates were made applicable on compressed cotton and also on uncompressed cotton, subject to the carriers right to compress in transit. The rates on the basis of which reparation is sought are substantially equal to those which applied to Gulf ports from points in Mississippi and Tennessee on lines of carriers other than defendants. Particularly I. C., M. & O. and others, including Mississippi class B carriers. They compare favorably with the rates made on the basis of a scale having rather general application in the southeast on cotton shipped uncompressed subject to the carriers privilege of compressing. HELD, rates assailed unreasonable to extent they exceeded rates on compressed cotton from and to the same points, reparation awarded. New Orleans Joint Traffic Bureau v. G. M. & N. R. R., 132 I. C. C. 586.

§4. Concentration.

See Concentrating Rates and Privileges.

(a) Considering, among other things, the direction of Congress in the Hoch-Smith resolution, Senate Resolution 107, failure of carriers to provide concentration and warehousing arrangements on cotton at Montgomery, Ala., found to constitute an unreasonable practice and to result in unreasonable rates and charges. Such arrangements are necessary and desirable in the public interest; their establishment at joint rates over direct routes has become common, due to voluntary act of carrier in recognition of peculiar circumstances surrounding marketing and handling of this traffic; and any shipper not accorded joint rates is at a substantial disadvantage which will confine his opportunities of sale to limited areas. Moreover, the general practice throughout the Cotton Belt is to permit such arrangements at first convenient compressing point en route to destination, and to require cotton produced in areas here involved to move long distances in an uncompressed condition constitutes wasteful transportation not in the interest of economical operation. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579.

(b) Under methods generally followed in marketing cotton the crops of many growers, composed usually of different grades and staples, are concentrated at one point so that enough bales can be accumulated to fill orders for the several grades and staples. Concentration points thus serve as markets for the cotton growers. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 581, 582.

(c) Concentration and compression are of benefit to carriers in the saving of equipment, movement into concentration ports being largely in l. c. l. lots and from the concentration points in carloads, compressed cotton occupying substantially less space than uncompressed cotton. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 582.

(d) If cotton originating on the L. & N. south and west of Montgomery is prohibited from moving to southeastern and Carolina destinations and forced to move via the Ohio River to the East or to Gulf ports for export, that carrier will receive a longer haul than if turned over to its connections at Montgomery. Upon contention that under above circumstances the L. & N. can not be required to establish concentration and warehousing arrangements at Montgomery on cotton originating on its line and destined to points in the Southeast and the Carolinas on ground that to do so would deprive it of long haul in violation of section 15 (4) of the act. FOUND: Situation presented is clearly not covered by provisions of the act relied upon. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(e) Numerous investigations made by the commission with respect to cotton rates and concentration arrangements throughout the South and Southwest bear out the fact that concentration is a commercial necessity and that little cotton can or does move from particular origins to particular destinations when no adequate concentration and compressing in transit arrangements are in effect at commercially convenient points. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 585, 586.

(f) To require cotton produced in a vast area to move long distances in an uncompressed condition constitutes wasteful transportation not in the interest of economical operation, it being general practice throughout the Cotton Belt to permit or require concentration and compression at first convenient compressing point en route to destination in

line of movement for traffic. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(g) Failure of carriers to establish transit arrangements at Montgomery, Ala., under which cotton originating at points on and west of the L. & N. between Decatur and Mobile, Ala., may be concentrated and stored and thence reshipped to South Atlantic ports and to southeastern and Carolina points, and via South Atlantic ports to New England mill points, while contemporaneously maintaining such arrangements at Atlanta, Ga., found not to result in undue prejudice. Originating carriers are not parties to the tariff under which transit is authorized at Atlanta, and mere fact that they participate as originating lines in joint rates in connection with which transit at Atlanta is allowed does not make them guilty of undue prejudice against Montgomery. See 257 U. S. 247. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 585, 587.

(h) On cotton moving from stations south of Montgomery, Ala., there concentrated and compressed and reshipped to Mobile, Pensacola, and New Orleans, locals to Montgomery and reshipping rates therefrom were assessed. Local factor published combination rule which provides a specific method for constructing through rates made on combination, but at no time were reshipping rates from Montgomery subject to a similar rule. HELD: Following principle laid down in 62 I. C. C. 643; 73 I. C. C. 551, reference to the rule in tariff containing one factor of combination, necessitated protection of a through rate arrived at by use of the rule in connection with both factors. Applicable rates were therefore those constructed in accordance with the rule. Former report 112 I. C. C. 325 reversed and refund of overcharges directed. Montgomery Cotton Exchange v. L. & N., 118 I. C. C. 157.

(i) Concentration arrangements on dairy products in effect in South Dakota and Nebraska on traffic moving to Chicago, while denying similar transit arrangements on like traffic moving to Duluth, found unduly preferential of former and unduly prejudicial to latter-named point. Undue prejudice ordered removed. Duluth Chamber of Commerce v. C. & N. W., 120 I. C. C. 683.

(j) Tariffs authorize one free stop in transit for concentration which may be taken either at interior points or at the port, but an additional charge for a second stop is made. Upon contention of warehouses located back from the water front at the ports that unless they are given a second free concentration they will be at a disadvantage as compared with warehouses located on the water front in handling cotton previously concentrated in transit at interior points, HELD: Advantage which water front facility has in handling cotton is a natural one derived from its location, and record will not support a conclusion that this advantage should be neutralized by granting second free concentration in transit at the port. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 695, 696.

(k) Concentration in transit, like compression in transit, reduces rather than increases carriers' expenses of transportation. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 702.

(l) Upon contention that because carriers' agents executed through bills of lading covering shipments of cotton, routed by shipper, carrying notation "Via Augusta Warehouse & Compress Company for compression," and showing prepaid charges on basis of joint rates from original to final destination, carriers thereby exercised their privilege of compressing reserved to them by tariff, and that compression charges assesed were inapplicable, HELD: Contention is without merit. Tariffs shows that when carriers exercise their privilege to compress, at origin or in transit, cotton delivered to them uncompressed, cost of compression is included in rate, but where, as here shippers direct stoppage of uncompressed cotton for compression at a compress point directly intermediate between point of origin and destination, cost of compression will be at shippers' expense. Fact that rates are made subject to carriers' option to compress does not render them inapplicable on uncompressed shipments on which carriers do not exercise their option. McFadden & Bros. Agency v. A. & R. R. R., 126 I. C. C. 519.

§7. Back Haul.

See Back Haul.

(a) Aggregate of inbound and outbound rates on rough rice from points in Louisiana to Lake Charles, reshipped as clean rice and products to various interstate destinations, where back-haul service was in excess of 40 miles, found not

unreasonable or otherwise unlawful. While a 200-mile free back-haul service under milling-in-transit arrangements was in effect at certain points in Texas during period of movement, and similar back-haul provision was established at Lake Charles after shipments in question moved, the peculiar character of evidence presented in 69 I. C. C. 508, which justified commission in requiring establishment of a 40-mile free back haul is not present in the instant case to justify as reasonable the establishment of a greater free back-haul service. Lake Charles Rice Milling Co. v. L. W., 109 I. C. C. 195.

(b) Although carriers may under certain conditions voluntarily establish a free back haul in connection with transit, commission will not under ordinary circumstances require them to do so, unless to remove undue prejudice. See 15 I. C. C. 138. Furthermore, a back haul is contrary to purpose of transit and generally should be permitted only to meet unusual situations. See 31 I. C. C. 150. Lake Charles Rice Milling Co. v. L. W., 109 I. C. C. 195, 196.

(c) Out-of-route charges collected on grain shipped from Ossian and Helmer, Ind., to Jonesville, Mich., there milled in transit and reshipped to other Michigan points, found illegal. Neither tariff publishing the joint through rates with provisions for milling in transit nor transit tariff carried any restrictions as to routing, and term "out-of-route" as carried in transit tariff is not defined. Rates between any given points, where no restrictions are made as to routing, apply over all routes of carriers parties to the tariff naming rates, where such routes are circuitous or not, if there be no back haul. Likewise transit arrangements applicable in connection with such rates, where no special restriction as to transit is contained in the tariff, are coextensive with routes over which the rates apply, provided routes are not employed which necessitate a back haul. Refund of overcharge directed. Jonesville Milling Co. v. N. Y. C., 109 I. C. C. 601.

(d) The commission has deprecated the establishment of transit involving back hauls. See 31 I. C. C. 150, 153, and other cited cases. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 333.

(e) The commission has approved the assessment of out of line or back haul charges which are reasonable for the services rendered and not unduly prejudicial to the traffic affected. The carrier may for competitive reasons waive the maintenance of such charges if the traffic favored is not thereby unduly preferred, but they are not required to do so. Iron and Steel Fabricated in Transit, 120 I. C. C. 325, 327.

(f) Charge for out-of-line hauls of iron and steel articles fabricated in transit at Tulsa, Okla., proposed by the A., T. & S. F., when movement into Tulsa is via its line and outbound product is destined to points on its rails, the Gulf, Colorado & Santa Fe, or Pan Handle & Santa Fe, in Kansas, Oklahoma, Texas, or New Mexico, found justified. Proposed charge is at present in effect in connection with fabrication of iron and steel articles at various points in Kansas, Oklahoma, and Texas, for out-of-line hauls for comparable distances. Moreover, commission has approved out-of-line or back-haul charges which are reasonable for services rendered and not unduly prejudicial to the traffic affected. The out-of-line charge here proposed will not subject iron and steel traffic to a disadvantage that is undue. Iron and Steel Fabricated in Transit, 120 I. C. C. 325.

(g) Carriers may, for competitive reasons, waive maintenance of out-of-line or back-haul charges if the traffic favored is not thereby unduly preferred, but they are not required to do so. Iron and Steel Fabricated in Transit, 120 I. C. C. 325, 327.

(h) Charges on wheat from points west of Kansas City, Mo., milled in transit at Marshall, Mo., and the product, flour, forwarded to Oklahoma City, Okla., found inapplicable. Here, the movement involved a back haul through Kansas City, and charges assessed were based upon those published for out-of-direct-line routes. Tariff provision, however, related solely to charges where out-of-line haul exceeded 150 miles, such charges not to be based on the round trip but only for distance from point of origin to transit point. Distances from origin points to Marshall being less than 150 miles, charges assessed were therefore inapplicable. Applicable charges found to be those in effect via an unrestricted route through St. Louis. Victor Milling Co. v. M. P., 120 I. C. C. 335.

§7½. False Floors, Insulation, Bedding and Dunnage.

See Dunnage.

(a) Complainant alleged that the charges collected on several hundred cars of lumber shipped on and after Oct. 20, 1913, from North Carolina on the Black Mountain Ry., a short line connecting with C. C. & O. at Kona, N. C., to destinations in other states, were unreasonable, unduly prejudicial, and in excess of those legally applicable in that a dunnage allowance of 500 pounds provided for by the tariffs was not made. Complainant's evidence is incomplete and unsatisfactory. Defendants should ascertain whether dunnage was in fact used and no allowance made therefor in respect of the 21 shipments covered by freight bills submitted at the hearing, and any overcharges so disclosed should be forthwith refunded, with interest. HELD, complaint dismissed. Parry & Co. v. B. M. Ry., 118 I. C. C. 193.

(b) Charges for slatting stock cars for movement of watermelons from Texas points to St. Louis, Mo., found unreasonable, discriminatory and unduly prejudicial. In 78 I. C. C. 732, the commission found that assessment of similar charges was unreasonable and discriminatory but carriers failed to publish tariffs giving effect to conclusions reached in cited case until after shipments here involved had moved. Reparation awarded. Bernstein-Nehmen & Co. v. G., C. & S. F., 115 I. C. C. 691.

(c) Respondents proposed new rules, regulations and charges to govern the bedding of livestock cars at points in Central Freight Association and western trunk line territories which will be referred to as central and western rules. The proposed rules, particularly in central territory, materially increase the charges for bedding. The central rules require that cars must be bedded with certain specific kinds and amounts of materials, which in the carriers opinion will be sufficient to enable the animals to retain their footing. Under these rules, shippers may order more bedding than the rules say must be provided, but at additional charges. HELD, proposed suspended schedules not justified, subject to filing of schedules containing new rules as hereinafter set forth. The following rules, regulations and charges are found reasonable to govern the bedding of cars to be loaded with livestock in central and western trunk line territories: 1. Except as otherwise provided in these rules, the floors of cars into which livestock is to be loaded must be bedded with sand, hay, straw, or like suitable material: (a) when livestock is handled exclusively in switch movement, bedding will not be required where unbedded cars are ordered by the shipper in writing. (b) Cars to be loaded with hogs, sheep, or goats must not be bedded with cinders. 2. The shipper may order bedding in such amounts as he desires up to 1 inch of sand or two bales of hay or straw for each deck. If orders for specified amounts of bedding are not received from the shipper, the floors of cars into which livestock is to be loaded will be bedded by the carrier with one half inch of sand, or two bales of hay or straw per deck. 3. The charges for the materials and service designated in rule 2 will be as follows (a) When shipper furnishes the material and places it in the car, no charge. (b) When carrier furnishes the material and the shipper places it in the car, the charges for the material will be as follows: For single deck car $0.75, for double deck car $1.00. (c) When carrier furnishes the material and places it in the car, the charge will be as follows: For single deck car $1.00, for double deck car $1.50. 4. When the shipper desires bedding and orders material in writing from the carrier in excess of the quantities specified in the first sentence of rule 2, it will be furnished and placed in the car at additional cost, as follows, and must be paid for by the shipper, consignee, or owner: (a) When carrier furnishes the material and the shipper places it in the car: for each additional inch of sand or less, for single deck car $0.75, for double deck car $1.00, for each additional bale of hay or straw 0.50. (b) When carrier furnishes the material and places it in the car: For each additional inch of sand or less, for single deck car $1.00, for double deck car $1.50, for each additional bale of hay or straw $0.75. 5. (a) When a double deck car is ordered by the shipper, but the carrier at its convenience furnishes two single deck cars, the charge for bedding furnished will be the same as for the kind of car ordered. (b) When a single deck car is ordered by the shipper but the carrier at its convenience furnishes a double deck car, the both decks are

bedded and loaded, the charges applicable to a double deck car will apply. 6. When livestock is transferred en route at carriers convenience, sand, hay, straw, or material of a similar nature will be provided by the carrier and placed in the car, without charge. 7. When livestock is stopped in transit at the request of shipper, consignee, or owner, for the purpose of trying an intermediate market, to comply with quarantine regulations, or for grazing in transit and a newly bedded car is furnished, the provisions of rules 1, 2, 3 (a), 3 (c), and rules 4 and 5 will apply, except that when stopped in compliance with state or federal law for feed, water, or rest, no charge will be made. 8. When the shipper orders in writing an unbedded car for livestock handled exclusively in switch movement or when the carrier furnishes a car containing old bedding, and places no new bedding therein, no charge will be made. 9. (a) Charges for bedding when not paid by the shipper must be entered on livestock contract and waybilled as bedding charge. (b) When bedding in excess of the maximum amount specified in rule 2 is ordered, notation of the amount ordered must be entered on the waybill. 10. Nothing in these rules shall be construed as relieving a carrier from such liability as may rest upon it for actual loss, damage, or injury caused by it through failure to furnish suitably bedded cars. Bedding charges for livestock, 128 I. C. C. 167.

(d) Proposed rule governing the furnishing of suitable cars free of debris, oil spots, protruding nails, etc., for loading flour and other grain products, found justified. While protest is made against respondents' failure or refusal to provide in tariffs for weather-stripping cars around doors or furnishing material therefor, nearly all freight cars require weather-stripping when lading is grain products in sacks or cartons but carriers generally neither do weather-stripping nor furnish material therefor. Although common carriers must furnish suitable equipment for safe transportation, special safeguards desired by shipper should be furnished by him. See 14 I. C. C. 154 and other cited cases. Moreover, in 26 I. C. C. 245, carriers were not required to line and pad cars for flour movements and while that case dealt with protection on inside of car while instant case deals with protection on outside, principle is the same. Suitable Cars for Loading Flour, 128 I. C. C. 442.

§9½. Milling, Mixing and Elevation.

(a) The f. o. b. rates are local rates applying on both grain and products from the lake ports and do not include elevation or other services incident to transfer of lading from lake vessels to cars. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 64.

§10. Loading, Unloading, Delivering, Insulating, Bracing, etc.

See Absorption of Charges §1 (a); Classification §13; Evidence §65; Express Companies §2; Facilities and Privileges §14; Loading and Unloading; Transportation §10.

(a) Denial by a common carrier subject to the act of the delivery lawfully designated in the bill of lading or reconsignment instructions in respect of shipments moving in interstate commerce is a matter which may change, affect, or determine the value of the service rendered to the complainant as consignee, and as such is within the jurisdiction of the Commission. Berger v. Pennsylvania R. R., 115 I. C. C. 697, 698.

(b) Charges for slatting stock cars for movement of watermelons from Texas points to St. Louis, Mo., found unreasonable, discriminatory and unduly prejudicial. In 78 I. C. C. 732, the commission found that assessment of similar charges was unreasonable and discriminatory but carriers failed to publish tariffs giving effect to conclusions reached in cited case until after shipments here involved had moved. Reparation awarded. Bernstein-Nehmen & Co. v. G., C. & S. F., 115 I. C. C. 691.

(c) Where special preparation is required to fit the car for the shipment of a particular commodity, the task of special preparation ordinarily devolves upon the shipper, and the reason for this is that the shipper can as a rule in case of carload freight where the loading is done by him and where the car is put into his possession for that purpose perform this work more economically and to better advantage than the carrier. The treatment which must be given these cars, namely the lining and the bedding, is not permanent. At the end of the

journey it must be removed and disposed of. The preparation must, therefore, as a practical matter be made at the station where the shipment occurs. Omaha Grain Exchange v. C. B. & Q. R. R., 120 I. C. C. 59, 62.

(d) Upon complaint that carriers, in respect of cars furnished at Omaha for loading flour and other grain products, in sacks, refuse to sweep cars, draw protruding nails, pad projections liable to tear sacks, and strip doors with waterproof paper, while contemporaneously performing those services in connection with like traffic at Kansas City, FOUND: (1) That carriers should furnish cars in good repair, free from contaminating materials and reasonably free from protruding nails and rough projections which might tear sacks, and (2) that performance of additional services in preparation of cars at Kansas City without charge in addition to line-haul rate, while contemporaneously refusing to perform like services at Omaha, is and for the future will be unduly prejudicial. Omaha Grain Exchange v. C., B. & Q., 120 I. C. C. 59.

(e) Complainant, Minnesota-Atlantic Transit Co., alleged that the practice of defendants of unloading cars at their own docks and refusing contemporaneously to perform the same service at the MacDougall dock is unreasonable under paragraph 4 of section 1, unjustly discriminatory under section 2, and unduly preferential of the Great Lakes Transit Co., and unduly prejudicial to complainant under section 3. What it really desires is to be granted additional compensation by defendants of 65 cents per ton for the unloading service which complainant itself performs, and which it desires to continue to perform. Dedendants unload freight for complainant, the same as they do for the Great Lakes Co., when it is routed over their docks. Complainant alleged no undue prejudice in respect of shipments over both lake lines handled over defendants docks. The Great Lakes Co. leases one of defendants docks, paying as rental 6% on a valuation of $75,000. The adequacy of this rental complainant does not question. At this leased dock defendants perform no unloading service. The same is true at private docks when no interchange with rail lines is made. Nor will any of the defendants unload a car which is, for the convenience of a shipper or steamship line, switched to its dock from another line haul carrier into Duluth. Complainant does not allege that defendants dock facilities are inadequate at Duluth. There seems to be no justification and no provision of law, however, for requiring defendants to unload and load freight at the MacDougall dock merely because they perform that service at their own docks, and so long as they do not discriminate between private docks. HELD, defendants were not guilty of any of the violations of law alleged, complaint dismissed. Minnesota-Atlantic Transit Co. v. C., St. P., M. & O. Ry., 123 I. C. C. 485.

(f) In Rates on Cotton to Gulf Ports, 100 I. C. C. 159, the commission found that the existing adjustment of rates on cotton from Oklahoma, Arkansas, Louisiana and Texas to the Texas ports, under which the ship side rates, exclusive of wharfage charges, are from the three states first mentioned 3 cents and from Texas 3.5 cents per 100 pounds higher than the city delivery rates, was unduly prejudicial to warehouses and compresses located at interior points and back from the water front at the ports and unduly preferential of warehouses and compresses located on the water front. The commission ordered the carriers to remove this prejudice and preference by establishing equal rates, exclusive of wharfage, for all deliveries within the usual switching limits of the Texas ports, which would include deliveries at back from the water front and water front warehouses and compresses and deliveries at the wharves and piers. Ship side rates should be made by adding wharfage charges to the rates so equalized. HELD, the relationships should be maintained, except that the ship side rates should exceed the city delivery rates to both New Orleans and the Texas ports but not to exceed 2 cents per 100 pounds. HELD, for the purposes of this case, a fair and reasonable basis for equalizing the city delivery and ship side rates will be to increase the city delivery rates 1 cent per 100 pounds and reduce the ship side rates, exclusive of wharf or pier terminal charges equivalent to 2 cents per 100 pounds, to the basis of the increased city delivery rates. This basis of equalization should be applied from all the states covered by the investigation to both the Texas and Louisiana ports, except that this finding should not be construed as condemning the practice of

the lines serving New Orleans of maintaining that port on a parity with Galveston and Houston in the matter of export rates on cotton from Oklahoma and northern Texas. The tariffs of respondents authorize one free stop in transit for concentration and this may be taken at an interior point or at the port. If a second stopping in transit for concentration takes place a charge of 3.5 cents per 100 pounds is assessed. The advantage which the water front facility has in the handling of this class of cotton is a natural one, derived from its location, and the present will not support a conclusion that this advantage should be neutralized by granting second free concentration in transit at the port. The commission referred to the fact that in order to conserve cars for line haul movements, and as an aid in preventing terminal congestion during periods of heavy traffic, respondents make allowances to shippers who, in lieu of switching, dray their cotton from the uptown warehouses and compresses to ship side, and said that it saw no reason for disturbing that practice. The allowances are made only on cotton which respondents are under obligation to transport to ship side under transit arrangements. The commission sees no reason for condemning reasonable allowances for drayage from the uptown facilities under the circumstances, such drayage being a substitute for rail transportation. But such allowances must not be more than reasonable, considering the benefit to respondents flowing from such substitute service, and must not be used as a cloak for unlawful practices to shippers furnishing such substitute service. But upon cotton delivered to ship side from and by water front warehouses or compresses over adjacent wharves or piers operated as a part of, or in conjunction with, such warehouses or compresses, a different condition exists. The hand or electric trucking, or movement by overhead trolley, from the part of the water front facility known as the warehouse or compress to that part known as the wharf is not a substitute for rail transportation, but is an intraplant movement just the same as the handling of cotton from the interior of an uptown warehouse to the railroad car or dray is an intraplant movement. No allowance may lawfully be made for these intraplant movements. The carriers in this territory, with few exceptions, authorize one concentration in transit without charge The services rendered by the carriers in the concentration of cotton are generally the same as on other traffic accorded transit. Concentration in transit, like compression in transit, unquestionably reduces rather than increases the carriers expenses of transportation. When concentration takes place at a compression point, there are scarcely any transportation services rendered by the carriers in addition to those rendered in connection with stopping cotton for compression. Interior concentration is an important factor in regulating the even flow of traffic, and may be likened somewhat to a series of reservoirs in supplying an even flow of water for the irrigation or other purposes. Without interior concentration, the cotton crop would have to be shipped during the gathering season, which is also the grain moving season, and the resultant car shortage in the interior and congestion at the ports, particularly as the mixed shipment platforms, might seriously disrupt transportation and general business activities throughout the entire cotton producing section. It does not appear that the giving of free first concentration has operated to the preference or prejudice of any shipper or concentrator of cotton. The record is clear, however, that since the so-called two rate plan was established, the percentage of cotton concentrated at interior points of the total handled at such points has steadily decreased, and that certain interior merchants, some of whom have interests, through stock ownership, in interior compress companies, have discontinued concentrating their cotton at points where such compress companies operate facilities and now concentrate it at the ports where they can take advantage of the lower city delivery rates under which they obtain water front delivery. In view of the small and varying amounts of cotton compressed for the carriers by certain interior compresses, there is little doubt but that, were it not for the fact that such compresses are able to obtain some revenue from concentration, their compress charges would be substantially higher than the allowances now made by the carriers. The record is clear that the cost of compression varies with the amount of cotton compressed, and this, to a great extent, accounts for the fact that the port facilities are able

to compress cotton for about 60 cents per bale while the interior facilities charge about 90 cents per bale. While the record is not specific as to all the elements of cost of compression at the port facilities, it appears that at least some of such facilities have not included in such costs anything for unloading the cotton from cars and reloading it in cars. This is an important item of cost in the operation of the interior compresses. HELD, carriers are justified in giving one concentration in transit on cotton without charge and that such concentration without charge does not unduly prefer or unjustly discriminate against any shipper or class of shippers or any compress or warehouse company. HELD, further, that the present allowance for compressing cotton in transit is not shown to be unreasonably high or unjustly discriminatory against or unduly preferential of any shipper or class of shippers or any compress or warehouse company. Rates on Cotton to Gulf Ports, 123 I. C. C. 685.

(g) Proposed cancellation of arrangement for stopping to partially unload interstate shipments of cranberries at points in Texas, found justified. Charges on such shipments are based upon original weight of load, subject to minimum weight and rate from point of origin to final destination, plus per-car stoppage charge. Therefore, in instances where rates from origin to stop-off point and to final destination are the same, carriers receive nothing for additional haul from stop-off point to final destination regardless of its length, except stoppage charge. Moreover, where distance from stop-off point to final destination is short and quantity which goes to final destination is small, carriers furnish two c. l. services for what are c. l. shipments to stop-off points and l. c. l. shipments beyond. Stop-over Transit Privilege, 122 I. C. C. 479.

(h) Complainant alleged that the charge of $2.70 per car assessed by defendants, in addition to the joint through rates, when coal is unloaded on team tracks at Ivanhoe, Norwood, and East Norwood, O., was and is unreasonable, unduly prejudicial, and in violation of the fourth section. Defendants are the C. & O., L. & N., N. & W. and Pennsylvania. The charge assailed represents a charge published by the Pennsylvania for the use of its team tracks and applies only at stations on the Lebanon district. Joint through rates apply over defendants lines from mines in Kentucky, Tennessee, and West Virginia to stations on the Pennsylvania within the switching district. The rates as published include delivery on all private tracks, and on team tracks at practically all main line points, but when delivery is taken on team tracks at stations on the Lebanon division the charge assailed is added to the rate. Defendants offered no evidence tending to show that conditions at Norwood and East Norwood are such as would warrant a different practice at those points than at main line points. No sound reason has been advanced why all stations within the Cincinnati switching district where the team tracks of the Pennsylvania are used should not be treated on the same basis. No substantial difference in service is shown to exist. HELD, practice of defendants of adding a team tracks charge to the joint rates on coal from points on defendants lines to Norwood and East Norwood when no similar charge is added for team track deliveries at other stations on the Pennsylvania within the Cincinnati switching district was, is, and for the future will be, unduly prejudicial, reparation denied. Cincinnati Coal Co., v. C. & O. Ry., 132 I. C. C. 97.

§10a. Policing.

(a) Policing charge assessed on shipments of denatured and wood alcohol at Chicago, Ill., designed to cover cost of protection against pilferage, found not applicable, since tariff rule in effect at time of shipment only provided for assessment of such charge on "intoxicating liquors (including alcohol.)" Reparation awarded. U. S. Industrial Alcohol Co. v. C. & N. W., 118 I. C. C. 674.

(b) Policing charge of $25 per car on shipments of ethyl alcohol, designed to cover cost of protection against pilferage, found not unreasonable. Carriers showed that pilferage of intoxicating liquors has greatly increased since national prohibition act became effective and that cost of furnishing protection now necessary for this commodity has radically changed; also that cost of furnishing this protection frequently exceeds transportation charges received. Moreover, in numerous cases commission has approved separately stated charges for special service rendered by carriers. See 61 I. C. C. 680 and other cited cases.

U. S. Industrial Alcohol Co. v. C. & N. W., 118 I. C. C. 674.

§10½. Protective Service.

See Heater Car Service; Protective Service.

(a) Complainant alleged charges for reicing two cars of vegetables at Potomac Yard, Va., were unreasonable and inapplicable. Complainants contend that charges apply under rule 225 C only when the shipper, owner or consignee orders the car stopped at a point intermediate to the final destination or held at the original or a diverted destination. They urge that Potomac Yard is not a point intermediate to the final destination, but that it was the destination of the shipments and that the shipments were not held at Potomac Yard on the order of complainants within the meaning of the rule. No notice of a change in the destination of either shipment was received by the carriers agent prior to the arrival of the shipments. It was therefore necessary for defendants to hold the cars for instructions. The rule clearly applies to cars held at the original destination and later forwarded. Carriers are required to furnish refrigeration service to shippers at a reasonable cost. Where shipments are billed for diversion cars are often detained at the billed destination and additional protective service is required until forwarding instructions are received. It is not unreasonable to make an additional charge for that service, and carriers are justified in providing reasonable rules for the application of such charges. Complainants could have avoided the charges complained of by billing the shipments through to final destination or by furnishing diversion orders prior to the arrival of the cars at Potomac Yard. HELD, reicing charges were applicable and not unreasonable, complaint dismissed. Dought v. A. C. L. R. R., 123 I. C. C. 522.

§11¾. Sacking and Slatting.

(a) Complainant attacked charge of $5 per car for slatting 39 stock cars for the transportation of watermelons from points in Texas to St. Louis, Mo., as unreasonable, unjustly discriminatory and unduly prejudicial. They also allege that they were overcharged $1.525 per car on 10 of the above shipments upon which freight charges were computed without allowance for the weight of the slatting material. On 29 of the shipments an allowance of 250 pounds per car, to cover the weight of slatting, was deducted from the net weight. On the remaining 10 cars no such allowances were made. Watermelons are perishable freight and well ventilated equipment is required for their transportation. For this purpose slatted stock cars are suitable and are largely used. In unslatted cars the melons frequently rot and are discolored by the elements, and are also subject to mutilation from the outside. Complainants ordered slatted stock cars for the movement of their freight, but as stock cars are not ordinarily slatted, this work was performed by defendants, for which a charge of $5 per car was assessed in addition to the applicable commodity rate. In 78 I. C. C. 732, the Commission said that the maintenance and collection by the respondents, among whom were these defendants, of a charge for slatting stock cars when furnished for the transportation of watermelons in carloads from points in Texas to points in other states were unreasonable and unjustly discriminatory. HELD, charge for slatting the cars unreasonable and assessment of additional charges on 10 of the cars for transportation of slatting material was without tariff authority, reparation awarded. Bernstein-Nehmen & Co. v. G. C. S. F. Ry., 115 I. C. C. 691.

§12½. Spotting and Special Services.

See Allowances §8 (5); Special Rates and Services; Spotting; Storage; Terminal Facilities §5 (b).

(a) The holding of cars at a place in a plant where loading is impossible is not spotting cars for loading, but if the plant requires empties to be placed in this manner for its convenience the additional move is a plant service. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 432.

(b) Complainant attacked charges assessed for spotting services at its plant, performed by them. In 60 I. C. C. 523 and 73 I. C. C. 100, commission found reparation should be awarded. Although the exact cost to complainants of performing the spotting service has not been established, the evidence is sufficient to enable the commission to determine reasonable charges or allowances as maxima to be paid by the Belt for that service. HELD: Following were reasonable al-

lowances for that service: $1.48 per car from Dec. 9 to Dec. 31, 1917, and $1.85 per car from March 1 to 26, 1920. Reparation awarded. United Chemical & Organic Products Co. v. Director General, 112 I. C. C. 687.

(c) Hand or electric trucking of cotton, or movement by overhead trolley from warehouse or compress to the wharf, is not a substitute for rail transportation but is an intraplant movement just the same as the handling of commodities from the interior of a warehouse to the railroad car or dray; and no allowance may lawfully be made therefor. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 696, 697.

§14. Storing, Grading and Resacking.

See Supra §10; Storage.

(a) Failure of carriers to provide storage in transit on iron and steel pipe and fittings shipped from points east of the Mississippi River to destinations in Kansas, Oklahoma, Texas, Louisiana, and Arkansas, while according transit on various other commodities, found not unreasonable or unduly prejudicial. Arrangements in effect on other commodities are not shown to unduly prejudice complainant in any manner, such other commodities being mostly articles of food which could not be used by complainant in place of those here considered. Moreover, the commission ordinarily will not require establishment of transit except to remove unjust discrimination or undue prejudice and carriers do not now provide storage in transit on these commodities at other points between the pipe producing and consuming fields and no compelling commercial necessity or general demand for its establishment has been shown. Western Petroleum Refiners Asso. v. St. L.-S. F. Ry., 113 I. C. C. 716.

(b) Complainant alleged that the rates on rosin, in carloads, from Alabama, Georgia, Louisiana and Mississippi to Ivorydale, Cincinnati, O., there graded and stored, and reshipped to Hamilton, Ont., Can., were unreasonable, and that the failure to provide transit arrangements on rosin at Ivorydale in connection with the through rates to Hamilton were unreasonable, unduly prejudicial and in violation of section four. Original report 112 I. C. C. 381. A joint rate of 42c applies on rosin, carloads, to Hamilton from the Gulf ports and points directly intermediate thereto. The L. & N. allows grading and storage in transit at Latonia and Central Covington, Ky., under this through rate. These Kentucky points are across the Ohio river from Cincinnati. On rosin graded and stored at Ivorydale, within the switching limits of Cincinnati, and reforwarded to Hamilton, the applicable rate is the combination of the rates to and from Cincinnati. This results in higher charges in the aggregate on rosin graded and stored at Ivorydale than on rosin graded and stored at Latonia or Central Covington. In this and other instances of record greater compensation in the aggregate is charged for the transportation of like property for a shorter than for a longer distance over the same route in the same direction, the shorter being included within the longer distance. This is in contravention of section four of the act. This is so notwithstanding that the 42c rate and the factor of the combination rate from Cincinnati to Hamilton are joint rates from points within the United States to a point in Canada. HELD, defendants will be expected promptly to remove the fourth section violations that exist. Procter & Gamble Co., v. A. & V. R. R. 129 I. C. C. 385.

§15. Transit.

See Infra §18, §19, §20; Supra §10; Advanced Rates §8½a (c), §17 (e); Bills of Lading §4; Cars and Car Supply §11; Compress Companies and Charges; Concentrating Rates and Privileges; Dressing In Transit; Export Rates and Facilities §7 (b); Facilities and Privileges §1 (b) (c) (d); Panama Canal Act; Penalty Charges; Routing and Misrouting §8½; Stoppage-In-Transit; Storage; Through Routes and Joint Rates §18, §19, §20; Transfer; Transit; Yardage.

(a) Proposed transit charge at points in Florida, Kentucky, and Ohio on rosin and turpentine originating in Southeast and reforwarded to destinations on or beyond Ohio River, found not justified in so far as it conflicts with charges under diversion and reconsignment tariff. Rates here in issue were generally prescribed or approved by commission without contemplation of transit, and evidence in justification of proposed charge

centers about additional service required on shipments handled through storage yards or warehouses. However, as published, it would apply for all services embraced in definition of transit, including those on shipments which transit tariff now provides will be handled at through rates plus diversion or reconsignment charges. Transit Privilege on Rosin, 104 I. C. C. 437.

(b) Fabrication: Rates on steel tanks, k. d., from South Chicago, Ill., Indiana Harbor, Ind., and Youngstown, Ohio, to Galveston, Tex., for export to Mexico, fabricated in transit at Iola, Kans., found not unreasonable due to lower export rates between same origin and destination points with fabrication in transit at Kansas City, such lower through rates being subsequently established through Iola. Earnings under rates assailed are materially lower than those under numerous rates on same and analogous commodities from other iron and steel producing points for comparable distances, many of which were approved or prescribed by commission. United Iron Works v. Director General, 104 I. C. C. 449.

(c) Transit privileges rest upon the fiction that incoming and outgoing transportation services, which are in fact distinct, constitute a continuous shipment of identical articles from point of origin to final destination. See 257 U. S. 247. The commission has consistently applied same principle in its decisions dealing with transit. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 613.

(d) Proposed reduction in time limit for storage in transit of tea, matting, grass, matting and grass articles, and rattan furniture, at Minnesota Transfer, Minneapolis, St. Paul, and Duluth, Minn., from 18 to 12 months, found justified, except on tea. Established trade practices require a minimum storage of 18 months on tea, importers requiring benefit of such a time limit at mid-western points in order to be able to distribute therefrom in competition with importers at New York and Boston who can store tea indefinitely at ports of entry. Moreover, 18-month limit has not been abused and no reason appears for depriving transcontinental carriers of opportunity to compete for this traffic. Conference ruling of July 25, 1913, affirmed. Storage in Transit on import Traffic, 104 I. C. C. 755.

(e) A line which participates in a joint trade is not guilty of undue prejudice in failing to accord transit service at a point on its line merely because another carrier party to same joint rate does accord transit service. See 257 U. S. 247. Federal Products Co. v. I. C. R. R., 107 I. C. C. 271, 275.

(f) Knowledge, on part of carrier's agent, of shipper's intention to store commodity in transit does not relieve shipper from strict compliance with transit rules. Nor does ignorance of tariff provisions excuse shipper from noncompliance with such provisions. See 62 I. C. C. 110; 242 U. S. 448. While shipper is not presumed to know with what representative of carrier he is to record freight bills in order to secure through rates on shipments accorded transit privileges, if he desires transit it is his duty to make inquiry of carrier and thus inform himself. Beatrice Creamery Co. v. C., B. & Q., 107 I. C. C. 568, 570.

(g) Granting by carriers of a transit arrangement at Sioux City, Iowa, whereby livestock originating at stations north and west of that city and billed through to stations on and east of Mississippi River, may be stopped and unloaded at that point for purposes of testing the market without additional charge, while denying a similar arrangement at Sioux Falls, S. Dak., found unduly preferential of the former and prejudicial to the latter. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C. 501, 513.

(h) Tariff provision restricting application of joint rates and providing local or combination rates on iron and steel articles shipped from Pennsylvania and Ohio points, fabricated in transit at Parkersburg, W. Va., and reshipped to Kentucky points and to New Orleans, for export, found unreasonable and unduly prejudicial to extent they exceeded contemporaneous joint rates plus prevailing transit charges. Transit arrangements on joint rates tend to avoid maladjustments, and connecting lines can not dictate to the road that alone serves transit point the manner in which joint rates through that point shall be applied in conjunction with transit arrangements as long as they are not deprived of their long haul, especially where, as here, they perform no greater service on shipments fabricated in transit than they do on shipments not so handled. Reasonable and nonprejudicial rates prescribed and reparation awarded. Parkersburg Rig

& Reel Co. v. B. & O., 109 I. C. C. 569.

(i) Transit arrangements on joint rates tend to avoid maladjustments. Connecting lines can not dictate to the road that alone serves transit point the manner in which joint rates through that point shall be applied in conjunction with transit arrangements as long as they are not deprived of their long haul, especially where they perform no greater service on shipments accorded transit than they do on shipments not so handled. See 83 I. C. C. 18 and other cited cases. Parkersburg Rig & Reel Co. v. B. & O., 109 I. C. C. 569, 575.

(j) The fabrication in transit of iron and steel articles is common and has been in effect in different territories for many years. Its convenience to the fabricator of these products makes it practically a commercial necessity. Parkersburg Rig & Reel Co. v. B. & O., 109 I. C. C. 569, 575.

(k) Upon contention of carrier that it can not be required to establish transit arrangements at a point on its line aplicable in connection with traffic originating on its rails on the ground that to do so would deprive it of the long haul in violation of section 15 (4) of the act. HELD: That section merely prohibits commission from requiring establishment of joint through routes and rates which will have the effect of short hauling carriers under circumstances there set forth. But where, as here, the situation is simply whether or not transit shall be permitted at a point on its rails in connection with through rates and routes already in effect, this is clearly a situation not covered by section 15 (4). Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(l) There is nothing to prevent carriers performing a movement into a transit point from being adequately compensated for all expenses in connection with such service through a proper apportionment of through charges in division between respective carriers forming through route. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(m) If cotton originating on the L. &. N. south and west of Montgomery is prohibited from moving to southeastern and Carolina destinations and forced to move via the Ohio River to the East or to Gulf ports for export, that carrier will receive a longer haul than if turned over to its connections at Montgomery. Upon contention that under above circumstances the L. & N. can not be required to establish concentration and warehousing arrangements at Montgomery on cotton originating on its line and destined to points in the Southeast and the Carolinas on ground that to do so would deprive it of long haul in violation of section 15 (4) of the act. FOUND: Situation presented is clearly not covered by provision of the act relied upon. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 584.

(n) Failure of carriers to establish transit arrangements at Montgomery, Ala., under which cotton originating at points on and west of the L. & N. between Decatur and Mobile, Ala., may be concentrated and stored and thence reshipped to south Atlantic ports and to southeastern and Carolina points, and via South Atlantic ports to New England mill points, while contemporaneously maintaining such arrangements at Atlanta, Ga., found not to result in undue prejudice. Originating carriers are not parties to the tariff under which transit is authorized at Atlanta, and mere fact that they participate as originating lines in joint rates in connection with which transit at Atlanta is allowed does not make them guilty of undue prejudice against Montgomery. See 257 U. S. 247. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 585, 587.

(opq) Respondent, Burlington, proposed to withdraw transit arrangements at Denver, Colo., at joint rates on grain and grain products originating on connecting lines, particularly in Nebraska, to destinations in California and other western states, when such traffic is received by respondent at Missouri River junctions, by making the joint rates subject to this rule: will not apply in connection with commodities that have had a previous transit at the Missouri River. The proposed schedules would not restrict the transit arrangement either at the Missouri River or at Denver except that transit would not be permitted at both points under the joint rates. Neither is there a transit limitation proposed at Denver on grain which originates at points on respondent's line in Nebraska and pays inbound rates to Omaha equal to those from points on the U. P. Situations of this character should be met by provisions for increasing revenues to a reasonable level for existing services rather than by curtailment of such ser-

vices. Transit privileges on grain, 113 I. C. C. 374.

(r) On cotton moving to Montgomery, Ala., for concentration and compression and reshipment beyond, the interstate inbound locals were higher than intrastate local rates, the matter of which rate should be used not being covered by tariff provision. Contention that lower intrastate rates were legally applicable on shipments originating at stations south of Montgomery, concentrated and compressed at that point and reshipped to Mobile, Pensacola, and New Orleans, not sustained following Conf. Ruling adopted March 15, 1921, wherein the rule is laid down that where interstate, proportional, or reshipping rates are named on shipments originating beyond reshipping or transit points such rates are applicable only in case inbound charges are based on inbound interstate rates. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 326, 327.

(s) Where a transit arrangement is voluntarily established for benefit of a particular community and is of marked advantage to that point, and represents one of the few exceptions to the general practice of carriers to decline to permit transit where back hauls are necessitated, and attempt to obtain a lower basis than that ostensibly provided for application in connection with the transit arrangement should be closely scrutinized, and commission should not permit such a result unless it is clearly necessitated under a reasonable construction of the terms of the tariffs. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 329.

(t) Transit arrangements represent a departure from ordinary transportation service, under which shippers are accorded a more favorable basis of rates than would obtain if inbound and outbound movements were treated as separate shipments. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 329.

(u) Local rates into transit point were made subject to tariff carrying the combination rule "except as otherwise indicated," and transit tariff provided that transit service would be available when "the lawful tariff rate to the transit point has been paid thereon." Upon contention that on cotton moving to Montgomery, for concentration and compression and reshipment beyond, the through charges based on local rates to Montgomery and reshipping rates beyond were subject to combination rule, HELD: Since payment of the lawful inbound rate was a condition precedent to transit service and use of reshipping rate outbound, the full combination of the two was basis for through charges to be used in connection with transit arrangement. This basis for construction combinations was sufficiently "otherwise indicated" within meaning of the exception to render combination rule inoperative. Montgomery Cotton Exchange v. L. & N., 112 I. C. C. 325, 327, 329.

(v) Transit is necessarily founded on the assumption that two separate and distinct local movements to and from transit point constitute an interrupted through movement. Notwithstanding the assumption on which it is based, the fact remains that it involves two distinct movements and two separate and complete terminal services at transit point, with all the accompanying physical handling and keeping of the necessary records in connection therewith. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 332.

(w) The commission has deprecated establishment of transit involving back hauls. See 31 I. C. C. 150, 153, and other cited cases. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 333.

(x) The commission has power under section 1 of the act to require establishment of transit, 257, U. S. 247, 257, but has exercised that power rarely, its policy having been generally not to require the establishment of transit arrangements unless to remove unjust discrimination or undue prejudice. See 87 I. C. C. 425, 435. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 332, 333.

(y) Rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, and failure of carriers to provide transit arrangements thereon at Ivorydale (Cincinnati), Ohio, found not unreasonable, unduly prejudicial, or otherwise unlawful as compared with rates to Buffalo, N. Y. Ordinarily commission does not require establishment of transit arrangements except to remove unjust discrimination or undue prejudice, neither of which is here shown. Moreover, present rates on this traffic resulted from relatively low rates established following the decision in

Naval Stores from Southern Points, 87 I. C. C. 740, and 89 I. C. C. 634, and there is nothing of record to show that rate factors to or beyond either Cincinnati or Buffalo are unreasonable. Procter & Gamble Co. v. A. & V., 112 I. C. C. 381.

(z) Ordinarily the commission does not require establishment of transit arrangements except to remove unjust discrimination or undue prejudice. Procter & Gamble Co. v. A. & V., 112 I. C. C. 381, 385.

(aa) Transit is optional, and when charges made by the use of transit are higher than charges at full local rate from transit station to final destination the shipper can elect to pay lower charges. Lindsley Bros. v. G. N. Ry., 113 I. C. C. 166, 167.

(bb) The commission has repeatedly criticized policing arrangements which are dependent on knowledge or information a carrier's agent received through investigation, and has consistently held that tariffs authorizing transit services and arrangements which do not contain clear and definite policing provisions to insure collection of correct charges are in violation of section 6 of the act. Drayage Absorptions by S. W. M., 113 I. C. C. 179, 182.

(cc) Proposal of C., B. & Q. to withdraw transit arrangements at Denver, Colo., on grain and products originating on connecting lines, when previous transit has been accorded at Missouri River junctions and traffic is delivered to it for transportation to far western States under joint rates, found not justified. Under present divisional arrangements inbound carriers to river junctions retain their full locals, whereas for movement therefrom to Denver the Burlington is required to perform transportation at a deficit. Record affords no convincing reasons why revenue on traffic accorded a through status by virtue of transit arrangements should not be divided in same way as that on through traffic moving without interruption. Moreover, Missouri River and Nebraska grain markets have long enjoyed present arrangements, curtailment of transit would seriously affect their interests, and situations of character here disclosed should be met by increasing revenues to a reasonable level for existing services rather than by curtailment of services. Transit Privileges on Grain, 113 I. C. C. 374.

(dd) Complainant attacked commodity rates on carloads of rough stone and stone sawed on four sides or less shipped during the two years prior to July 1, 1924 from Bedford, Bloomington, and Clear Creek, Ind., Carthage and Phoenix, Mo., and Silverdale, Kas., to Tulsa, Okla., as unreasonable and unduly prejudicial. Prior to Oct. 25, 1924 the rate on rough or dressed stone, in carloads, from Bedford, to Tulsa, was 44c, at which time, because of a combination rate to Oklahoma City, Okla., based on Little Rock, Ark., it was reduced to 41.5c and made applicable to a large blanket destination territory. The rates from Carthage, Phoenix and Silverdale to Tulsa are 11c, 12c and 13.5c, respectively. A transit service whereby the through rate might be used from Bedford through Tulsa to ultimate destination would doubtless be an advantage to complainants, but transit on stone is not a general practice and is not granted by defendants. HELD, rates attacked from Bedford, Bloomington and Clear Creek to Tulsa unreasonable to extent they exceeded 37.5c on dressed stone and 35.5c on rough stone, reparation awarded. Consolidated Cut Stone Co. v. A. T. & S. F. Ry., 113 I. C. C. 480.

(ee) Refusal of carriers to accord transit on rough stone shipped from various points to Tulsa, Okla., there dressed and reshipped to destinations in Kansas, Arkansas, western Louisiana, and Texas, found not unlawful as compared with transit services accorded competitors in Texas on like traffic moving between points in latter named State. These transit services intrastate in Texas were established primarily to move a Texas stone which is suitable for use in Texas climate and are not shown to result in unjust discrimination against complainant. While a transit service whereby through rates might be used from the Bedford district through Tulsa to ultimate destination would doubtless be an advantage to complainants, transit on stone is not a general practice and it is not commission's policy to require carrier's to extend transit service to new points or to additional commodities except to remove violations of the act. Consolidated Cut Stone Co. v. A., T. & S. F., 113 I. C. C. 480.

(ff) It is not the policy of the Commission to require carriers to extend

transit service to new points or to additional commodities except to remove violations of the act. Consolidated Cut Stone Co. v. A. T. & S. F. Ry., 113 I. C. C. 480, 485.

(gg) Complainant attacked commodity rates charged from point on the C. & E. I., to Louisville, Ky., applying through Indianapolis, Ind., on grain and grain products, carloads, destined to points in the southeast, and the transit arrangements applying in connection therewith at Indianapolis as unreasonable, unjustly discriminatory and unduly prejudicial. Rates attacked are joint rates applying over the C. & E. I., as far as Terre Haute, Ind., or junctions north thereof and thence Big Four or Pennsylvania through Indianapolis. They are the same on traffic going beyond Louisville as on traffic destined to Louisville proper. There are no proportional rates over these routes lower than the locals. Under existing rates transit is accorded at Indianapolis. There is no evidence that these arrangements are unreasonable or otherwise unlawful as used in connection with existing rates. Evansville was formerly the gateway on this traffic, but under the proportional rates the C. & E. I., by delivering the traffic to the Southern at Princeton, avoids hauling it all the way to Evansville, and the Southern, by receiving it at Princeton, saves some of the expense which would be incurred by it in hauling the traffic from Evansville. There is no sufficient showing here of the need for such proportional rates through Indianapolis. From some points the routes through Indianapolis are more direct, but in no instance can the routes through Princeton be said to be unduly circuitous. HELD, rates and transit arrangements not unreasonable or otherwise unlawful complaint dismissed. Indianapolis Board of Trade v. L. & N. Ry., 113 I. C. C. 508.

(hh) Rates on grain and products from C. & E. I. R. R. stations, through Indianapolis, to Louisville, on the traffic destined to southeastern points, and transit arrangements in connection therewith at Indianapolis, found not unreasonable or otherwise unlawful as compared with lower proportionals over same carrier to Princeton, Ind., and thence in connection with the Southern Ry., beyond. The proportionals are part of an equalization scheme whereby Louisville and Evansville, as gateways, are kept on a parity, were established primarily in interest of economical operation, and do not constitute a proper measure for rates through Indianapolis. Their cancellation would not benefit Indianapolis interests, whereas their publication through that point would deprive the C. & E. I. of its long haul, which, in absence of a convincing showing of public interest and necessity, should not be required. Moreover, carriers show that rates assailed are low as compared with those from same origin points to destinations in Ohio and Michigan for similar distances. Indianapolis Board of Trade v. L. & N., 113 I. C. C. 508.

(ii) Failure of carriers to provide storage in transit on iron and steel pipe and fittings shipped from points east of the Mississippi River to destinations in Kansas, Oklahoma, Texas, Louisiana, and Arkansas, while according transit on various other commodities, found not unreasonable or unduly prejudicial. Arrangements in effect on other commodities are not shown to unduly prejudice complainant in any manner, such other commodities being mostly articles of food which could not be used by complainant in place of those here considered. Moreover, the commission ordinarily will not require establishment of transit except to remove unjust discrimination or undue prejudice and carriers do not now provide storage in transit on these commodities at other points between the pipe producing and consuming fields and no compelling commercial necessity or general demand for its establishment has been shown. Western Petroleum Refiners Asso. v. St. L.-S. F. Ry., 113 I. C. C. 716.

(jj) Ordinarily commission will not require establishment of transit except to remove unjust discrimination or undue prejudice. Western Petroleum Refiners Asso. v. St. L.-S. F., 113 I. C. C. 716, 719.

(kk) Respondent, Frisco, proposed to cancel from its tariff governing transit at Kansas City, Mo, reference to the UP tariff publishing joint rates on grain and grain products, carloads, from certain points in Kansas on the UP to Pittsburgh, Kas., Joplin and Springfield, Mo., and Fort Smith, Ark., and intermediate points on the Frisco. The joint rates described are subject to the Frisco tariff governing transit at Kansas City. The latter specifically refers

to the UP tariff containing the joint rates. It is that reference which is sought to be canceled, thereby withdrawing any transit at Kansas City on the Frisco under such joint rates. No justification has been offered for any increased rates which would result from the proposed cancellation, other than that the Frisco would receive little or no revenue for its hauls beyond Kansas City under its erroneous interpretation of its Kansas City transit tariff. Its local wheat rates beyond Kansas City, lawfully applicable on wheat milled into flour at Kansas City when subject to its transit tariff greatly exceed its divisions of the joint flour rates. HELD, schedules not justified. Transit on grain and grain products, 115 I. C. C. 621.

(ll) Complainant attacked practice of defendants in according to intrastate traffic in Missouri the privilege of stopping shipments of grain and grain products in transit for partial unloading and the withholding of such privilege from complainants shipments subjected the complainant and interstate commerce to unjust and unreasonable rates. Defendants admit that discrimination and prejudice exists and do not deny that it is unjust and unreasonable. The stopping in transit privilege to partly unload or load is in effect in western trunk line territory on various commodities but not on grain and grain products. HELD, Missouri tariff rule reasonable rule for application on interstate traffic. Southwestern Milling Co. v. A. T. & S. F. Ry., 118 I. C. C. 61.

(mmnn) Complainant alleges that its members mill grain in transit from Minnesota, North Dakota and South Dakota to points in western trunk line, central trunk line and other territories in competition with millers located at Duluth, Minneapolis and Superior that on this grain milled in transit at complainants mills defendants make certain charges for the transit service in addition to the line haul rates, whereas no additional charge for transit is assessed at other milling points. Respondents proposed to make certain charges in addition to the line haul rates on grain from Minnesota, Montana, North Dakota and South Dakota when milled or otherwise treated in transit at points west of Minneapolis. The interior millers are seeking the elimination of the transit charge at their mills so that they will be on a parity over all routes with mills at Minneapolis, Duluth and points south and east thereof. At interior mills directly intermediate to final destination the transit charge for milling is generally 1.5c, but at certain milling points the charge is 2.5c, dependent upon the origin of the grain or the destination of the products. The all rail rates to Chicago on grain from the origin territory here considered are generally made up of the local rates to Minneapolis or Duluth and proportional rates of 13c on wheat and 11.5c on coarse grains beyond. Evidence shows that the average cost to defendants of rendering the transit services at interior mills is at least 2.5c per 100 pounds. There is no indication upon this record that a charge of 2.5c would be unreasonable per se for this transit service. The Commission has said several times that when practicable rates through important grain markets should break into definitely known inbound and outbound components and these rates to Chicago and points east thereof may not be condemned simply because they are the same as the Minneapolis combination. The G. N. and N. P. can not be held guilty of undue prejudice because their connections at their eastern terminals elect to grant free transit while they make a charge therefor at points on their lines west of those terminals. This is not true of the Milwaukee which serves points in the territories east and west of the Twin Cities. HELD, suspended schedules proposing to restore transit charges at points on the G. N. and N. P. justified, but proposal of Milwaukee and Soo line, unduly prejudicial in that they propose to charge for transit west of Minneapolis and not south and east thereof. Minnesota Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585.

(oo) Proposal of St. L.-S. F. Ry., to cancel from its tariff governing transit at Kansas City, Mo.-Kans., reference to the Union Pacific tariff publishing joint rates on grain and products from certain points in Kansas on latter carrier's line to Pittsburg, Kans., Joplin and Springfield, Mo., and Ft. Smith, Ark., and intermediate points on the Frisco, found not justified. Proposed cancellation is outgrowth of a dispute between the two carriers as to correct interpretation of transit tariff. If suspended schedules are permitted to become effective, the Kansas City combination rates will apply, which are substantially higher

than present joint rates. However, no justification was offered for any increased rates, other than that the Frisco would receive little or no revenue for its hauls beyond Kansas City under its erroneous interpretation of its transit tariff. Transit on Grain and Products, 115 I. C. C. 621.

(pp) Milling-in-transit rates on alfalfa meal from points in Idaho to Memphis, Tenn., found not unreasonable or unduly prejudicial as compared with lower rates from Colorado points to same destination. Earnings under rates attacked compare favorably, distance considered, with those from Colorado points and are considerably lower than those on other agricultural products from and to same and other points. Fact that rate assailed was not contemporaneously reduced with corresponding rate to St. Louis, does not alone establish unreasonableness or unlawfulness of rate to Memphis. Bailey v. O. S. L., 115 I. C. C. 745.

(qq) Tariff rule published in compliance with a legislative enactment of the State of Missouri under which c. l. shipments of grain and products moving intrastate from Kansas City and St. Joseph, Mo., to other points in Missouri are permitted to be stopped in transit for purpose of partly unloading found reasonable for interstate application on shipments from Kansas City, Kans., to points in Missouri, and failure of carriers to apply said tariff rule to such interstate shipments found unduly prejudicial. Removal of undue prejudice ordered. Southwestern Milling Co. v. A., T. & S. F., 118 I. C. C. 61.

(rr) Upon further hearing, transit rules, regulations, and practices in their application to cottonseed meal shipped from Arkansas, the Mississippi Valley, and the Southeast to Lancaster and York, Pa., there manufactured into mixed feed, and the mixed feed shipped to destinations in New England and trunk-line territories and to points in Maryland, Virginia, and the Carolinas, found unreasonable and unduly prejudicial to extent they exceeded transit rules, regulations, and practices in effect in c. f. a. territory. Reparation awarded and reasonable rates prescribed for future. Former reports 87 I. C. C. 285; 85 I. C. C. 578. Eshelman & Sons v. Director General, 118 I. C. C. 441.

(ss) Transit charges at points on the Great Northern and Northern Pacific railroads in addition to rates on grain and products from Minnesota and the Dakotas, and products shipped to Chicago, Milwaukee, St. Louis, and points east thereof, found not unreasonable or unduly prejudicial. While free transit is accorded by lines east of Minneapolis the prejudice here alleged can not be removed by the Great Northern or Northern Pacific's own action. Grain moving into Minneapolis over either of these carriers moves on local rate to that point, which carries with it delivery to consignee and after grain is delivered the service of the inbound carrier is ended. However, if grain or products therefrom is later shipped to Chicago it moves at a proportional rate over which inbound lines have no control. In respect of situations of this kind the above-named carriers can not be held guilty of undue prejudice. See 257 U. S. 247. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585.

(tt) Proposed restoration of transit charges at points on the Great Northern and Northern Pacific railroads west of Minneapolis on grain from Montana, the Dakotas, and Minnesota, and products shipped to Chicago, Milwaukee, St. Louis, and points east thereof, found justified. Proposed additional transit charges at points west of Minneapolis on the C., M. & St. P. Ry., while similar transit services are performed by that carrier on grain from same origin territory and products thereof shipped to same destination territory without additional charge at points on its lines east or south of Minneapolis, and which would result in undue prejudice found not justified. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585.

(uu) Transit charges at points on the Soo Line in addition to rates on grain and products from Minnesota and the Dakotas, and products shipped to Chicago, Milwaukee, St. Louis, and points east thereof, found not unreasonable, but unduly prejudicial in favor of competitors at other points on its lines west, east and south of Minneapolis or Duluth accorded such services free. While policy of the Soo Line both east and west of the Twin Cities is said to be dictated largely by policy of its competitors, where a carrier elects to meet commercial or carrier competition it must not cause undue prejudice. See 43 I. C. C. 458, 465. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585.

(vv) Proposed additional transit charges at points west of Minneapolis on the C., M. & St. P. Ry., on grain from Montana, the Dakotas, and Minnesota, and products thereof shipped to Chicago, Milwaukee, St. Louis, and points east thereof, while similar services are performed by that carrier on grain from same origin territory and products thereof shipped to same destination territory without additional charge at points on its lines east or south of Minneapolis, found not justified, since undue prejudice would result against persons located at points west of Minneapolis and undue preference would be accorded competitors at points east or south of that point. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585.

(ww) A transit privilege is something offered to shipper in addition to transportation service for which a reasonable charge may properly be made. See 98 I. C. C. 679, 684. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 594

(xx) Santa Fe, respondent, proposed to eliminate a portion of a rule for the fabrication in transit of iron and steel articles at Tulsa, Okla. It is proposed to remove any exception against the application of the 5 cents out of line charge on iron and steel articles handled in the manner outlined in the rule. Prior to June 28, 1926 the M. K. T. maintained rules under which iron and steel moving over its rails could be fabricated in transit at Tulsa and shipped via Kansas City to destinations on the Santa Fe in Texas and New Mexico without charge for out of line service. At the same time respondents charge for the out of line haul of like traffic over its line via Tulsa was 5 cents. This charge was withdrawn, effective July 1, 1926, for the purpose of meeting the competition of the M. K. T. The latter line published a charge of 15 cents, effective June 28, 1926, for out of line service on shipments destined to Kansas City or to points beyond, and respondent thereupon published a rule providing for a 5 cents charge. It does not appear that the proposed charge for the out of line haul of iron and steel articles over the line of respondent via Tulsa would subject such traffic to a disadvantage that is undue. HELD, schedule justified. Iron and Steel Fabricated in Transit, 120 I. C. C. 325.

(yy) A shipment is entitled to transit service only when it meets the conditions attached to such service. Victor Milling Co. v. M. P. R. R., 120 I. C. C. 335, 338.

(zz-3b) Transit arrangements, in their most common form, are susceptible of defense only upon the theory that the inbound and outbound movements are in fact parts of a single continuous transaction. While the freight is delayed at the transit point the shipment is merely suspended temporarily, the present intention of the shipper being to forward the goods to their ultimate destination. Once let it be said that the inbound and outbound movements are separate and distinct and the impropriety of applying any rates other than the regularly established locals would be self-evident. Sioux City Livestock Exchange v. C. & N. W. Ry., 122 I. C. C. 177, 185.

(3c) Complainant alleged that transit rules at Jackson, Miss., in connection with the proportional rates on grain from primary markets on the Mississippi River and west thereof are unduly prejudicial in that they do not permit the same mixtures as are permitted at competitive points such as Meridian, Miss., and Memphis, Tenn.; that the rates on grain from said primary markets to points on the G. & S. I., are unreasonable and in violation of the fourth section; and that the failure of defendants to provide rules whereby grain from said primary markets may be shipped to Jackson, there manufactured into feed, and the feed reshipped to the southeast over the A. & V. to Meridian and connecting lines beyond to points on the G. M. & N., and to points on the L. & N., via Gulfport, Miss., is unreasonable and unduly prejudicial. Since the hearing the I. C. has revised its transit rules at Jackson so as to permit the feed mixtures sought by complainant. By fourth section order 7026, of Nov. 30, 1917 the Ship Island was and is permitted to meet the rates of its trunk line competitors at junction points and to maintain higher rates to intermediate points. It is manifest that as the relief granted the Ship Island because of financial necessities is no longer justified in respect of commodity rates, and the latter should be adjusted at the same time the class rates are. It appears that Jackson is now given transit to all of southeastern territory to which the I. C. has working arrangements via Jackson, and that the failure to accord it transit on traffic to Birmingham and points south thereof is

due to the unwillingness of the Southern system lines to forego the long haul for a much shorter haul in connection with a more circuitous route. The I. C. is willing to establish transit at Jackson under joint rates from the primary markets to points on the G. M. & N., but the latter is not, as it desires to retain the long haul via its northern junctions. It does not serve Jackson and accordingly has not the same incentive to participate in joint rates with transit at Jackson as it has to participate in joint rates over the same route with transit at Laurel. The I. C. is willing to accord transit at Jackson on traffic to points on the L. & N., but the latter is unwilling to join in a more favorable basis with transit at Jackson than now applies via New Orleans with transit at that point. The latter rates are 4 cents over the rates to New Orleans. HELD, rates attacked to points on the Ship Island not unreasonable or otherwise unlawful; that failure of defendants to accord transit at Jackson on grain and grain products destined to points on the G. M. & N., and to points in the southeast which it is not now accorded is not unreasonable or otherwise unlawful and that the failure of defendants to accord transit at Jackson on grain and grain products destined to points on the L. & N., extending from New Orleans to Mobile and moving over the I. C., to Jackson and the Ship Island beyond to Gulfport is unreasonable and unduly prejudicial. Jackson Traffic Bureau v. A. & V. Ry., 122 I. C. C. 387.

(3d) Complainant alleged transit charge of 1.25 cents maintained at points in New York in connection with the so-called f. o. b. rates on grain and grain products from Erie, Pa., and Buffalo and Oswego, N. Y., to eastern destinations and defendants failure to permit transit in conection with the so-called at and east rates on grain from those ports to the same destinations were unreasonable and unduly prejudicial. The so-called f. o. b. rates are the local rates from and to lake ports and do not include elevation or other services incident to the transfer of the lading from the lake vessels to the cars. They apply both on grain and grain products. The so-called at and east rates are proportional rates from the lake ports. They apply only on grain which is moved to the lake ports by water and include a charge of 1 cent a bushel for elevation and transfer of the lading to the cars. Under the f. o. b. rates milling in transit is permitted at points in trunk line territory including those at which complainants are located, at a charge of 1.25 cents. Transit is not permitted under the at and east rates, as such rates do not apply on grain products and the transit rules provide that on grain milled in transit the rate on grain products shall apply from the point of origin of the grain to the destination of the products. Under the all rates on grain products from central and western territories, transit is accorded at mills in central territory and at complainants mills at a charge of 0.5 cents. Transit is also accorded at mills in central territory and at complainants mills under the ex-lake rates on grain products from central territory ports at a charge of 0.5 cents. Generally at all points in western territory no transit charge is assessed. The all rail rates on grain products from central and western territories and the ex-lake rates on grain products from central territory ports are 0.5 cents higher than the corresponding rates on grain. The record herein affords no ground for a conclusion different than 33 I. C. C. 133 on defendants failure to permit milling in transit under the at and east rates on grain. In the same case the commission found the 1.25 cent charge not unreasonable. Commission believes that the complainant's position is sound and that as the differing transit charges are for the same transit services at the same points by the same carriers, unjust discrimination under section 2 of the act exists. Different transit charges are assessed dependent wholly upon whether the traffic comes to trunk line territory all rail or over the lakes. If over the lakes, the charge of 1.25 cents applies, if all rail, it is 0.5 cents. It is clear that the different transit charges at the same milling points are unduly prejudicial to the ex-lake traffic and unduly preferential of the all rail traffic. HELD, defendants failure to accord transit under the at and east rates on grain from Erie, Buffalo and Oswego not unreasonable, unjustly discriminatory or unduly prejudicial. Transit charge of 1.25 cents not unreasonable but unduly prejudicial and unjustly discriminatory and should be removed by establishing the same charge on ex-lake grain as all rail grain, reparation denied. Birkett Mills v. D. L. & W. R. R., 123 I. C. C. 63.

(3e) A transit charge is a local charge for which the carrier establishing it is alone responsible. Birkett Mills v. D. L. & W. R. R., 123 I. C. C. 63, 65.

(3f) While defendants may, for competitive reasons, establish a lower transit charge on particular traffic than they otherwise would, they may not lawfully do so if they thereby unduly prejudice other traffic. Birkett Mills v. D. L. & W. R. R., 123 I. C. C. 63, 66.

(3g) Manifestly the commission can not fix freight rates or transit charges so as to preserve a fixed relationship between the through charges by all rail and rail-lake-rail routes. Birkett Mills v. D. L. & W. R. R., 123 I. C. C. 63, 67.

(3h) Maintenance by the C. B. & Q. R. R. of transit arrangements whereby livestock originating at stations on its line west of Sioux City, Iowa, and billed through to destinations beyond Missouri River markets my be stopped in transit at Omaha, for purpose of testing the market, while denying a similar arrangement at Soiux City, found unduly prejudicial. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177.

(3i) Collection of reconsignment charges in addition to rates to and from Sioux City, Iowa, or Omaha, Nebr., on livestock originating north and west of Sioux City, stopped in transit to try the market, and subsequently reforwarded to destinations beyond, either by original shipper or by a different owner, found unreasonable. A change in ownership alone does not justify application of combination of locals instead of through rate. In 89 I. C. C. 236 and other cases, the commission found that assessment in addition to the rates to and from original destination, of any reconsignment charge was unreasonable. Moreover, reconsignment rules for general application providing for a change in name of consignor were approved in the Reconsignment Case, 47 I. C. C. 590, and there is no reason for granting the privilege of a change in ownership under the reconsignment rules and withholding it under the transit arrangements. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177.

(3j) The responsibility for transit arrangements rests solely with the carrier on whose lines they apply. Sioux City Live Stock Exchange v. C. & N. W., 122 I. C. C. 177, 186.

(3k) Failure of carriers to permit milling in transit at Jackson, Miss., on grain and products from Mississippi River gateways and points west thereof to destinations on the Gulf, Mobile & Northern and in the Southeast, found not unreasonable or otherwise unlawful. While Illinois Central is willing to establish transit at Jackson under joint rates from origin points to destinations on the Gulf, latter is not, as it is more desirous of participating in rates with transit at points on its own lines involving longer hauls. However, failure to accord transit at Jackson on shipments destined to points on the L. & N., extending from New Orleans to Mobile and moving over Illinois Central to Jackson and Ship Island beyond to Gulfport, is unreasonable and unduly prejudicial in that transit is accorded other competitive points for similar hauls. Jackson Traffic Bureau v. A. & V., 122 I. C. C. 387.

(3l) Combination rates assessed on structural iron and steel from Indiana Harbor, Ind., to Casper, Wyo., fabricated in transit at Muskogee, Okla., found overcharged. Contemporaneously a lower joint rate was in effect from Chicago to same destination. Rates from Indiana Harbor are the same as rates from Chicago and transit tariff provided for application of joint rates from points of origin to destinations wherever applicable via the transit point. Refund of overcharges directed. Tulsa Rig, Reel & Mfg. Co. v. M.-K.-T. R. R., 122 I. C. C. 405, 406.

(3m) Stopping to partially unload interstate shipments of cranberries at points in Texas is, at least so far as this commodity is concerned, peculiar to Texas, applying nowhere else in the Southwest, or possibly in the United States. Stop-over Transit Privilege, 122 I. C. C. 479, 481.

(3n) Refusal of Southern Pacific Co. to permit creosoting or storage in transit at Oakland, Calif., on red-cedar poles and piling, originating in Oregon and Washington, destined to points on its line in California, while maintaining such arrangements at Springfield and East Milwaukee, Oreg., found not unreasonable or unduly prejudicial. Record indicates a dissimilarity of conditions at Oakland as compared with the Oregon points. Latter are directly intermediate to destinations on carriers's line, whereas route through Oakland necessitates

an additional road haul and switching movement. Moreover, establishment of transit at Oakland would give complainant an advantage over its Oregon competitors because receipt of a large volume of poles and piling by steamer would enable it to use its transit credits to greater advantage than would be possible if all shipments came in by rail. Baxter & Co. v. S. P., 122 I. C. C. 498.

(3o) The universal application of transit privileges in connection with rates on grain has resulted from the policy of equalizing various mills, whether located near points of production or in consuming territories. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 706.

(3p) Transit charge maintained at New York points in trunk-line territory on ex-lake traffic, in connection with so-called f. o. b. rates on grain and products from Erie, Pa., and Buffalo and Oswego, N. Y., to eastern destinations, found not unreasonable, but unjustly discriminatory and unduly prejudicial in favor of millers, dealers, and elevator companies handling ex-lake grain from c. f. a. territory ports and of all-rail grain traffic from points in c. f. a. and trunk-line territories. Birkett Mills v. D., L. & W., 123 I. C. C. 63.

(3q) Failure of carriers to permit transit under at-and-east rates on grain and products from Erie, Pa., and Buffalo and Oswego, N. Y., to eastern destinations, found not unreasonable, discriminatory, or unduly prejudicial. In 33 I. C. C. 133, the commission found it not unreasonable to refuse to permit transit under these rates, and record herein affords no ground for a different conclusion. Birkett Mills v. D., L. & W., 123 I. C. C. 63.

(3r) A transit charge is a local charge for which carrier establishing it is alone responsible. See 257 U. S. 247. Different transit charges for same service at same points by same carriers, constitute unjust discrimination under section 2 of the act. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 65.

(3s) While carriers may, for competitive reasons, establish a lower transit charge on particular traffic than they otherwise would, they may not lawfully do so if they thereby unduly prejudice other traffic. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 66.

(3t) Commission can not fix freight rates or transit charges so as to preserve a fixed relationship between through charges by all-rail and rail-lake-rail routes. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 67.

(3u) Charges assessed on wheat, reforwarded under proportional rates from Kansas City, Mo., to various interstate destinations and accorded transit at Leavenworth, Kans., and Sweet Springs, Mo., found applicable and not unreasonable or otherwise unlawful. Under transit tariff, proportional rates applied with transit at points in direct line of shipment, but since movement to Leavenworth necessitated an out-of-line haul, transit at that point and Sweet Springs was not authorized. Moreover, in 91 I. C. C. 58; 100 I. C. C. 303, contention that carrier's tariff authorized protection of proportional rates from Kansas City with transit at Leavenworth and Sweet Springs was not sustained, and record in instant case does not warrant a different conclusion. Moore Lawless Grain Co. v. M. P., 123 I. C. C. 647.

(3v) Tariffs authorize one free stop in transit for concentration which may be taken either at interior points or at the port, but an additional charge for a second stop is made. Upon contention of warehouses located back from the water front at the ports that unless they are given a second free concentration they will be at a disadvantage as compared with warehouses located on the water front in handling cotton previously concentrated in transit at interior points, HELD: Advantage which water-front facility has in handling cotton is a natural one derived from its location, and record will not support a conclusion that this advantage should be neutralized by granting second free concentration in transit at the port. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 695, 696.

(3w) Respondent, Louisville & Nashville, proposed certain restrictions of its recently established transit arrangement involving at Nashville, Tenn., on interstate shipments of mixed feed. Blackstrap molasses is shipped from New Orleans, La., Mobile, Ala., and Pensacola, Fla., to Nashville, and there used in the manufacture of feeds which are distributed to various southeastern destinations. Under respondents present transit arrangement through rates from destination is applied on the weight of the grain product ingredients in the feed,

and the through rate on feeds from New Orleans, Mobile, or Pensacola to final destination is applied on the weight of the molasses in the feed, regardless of any out of line or back hauls. Respondent sought to modify the arrangement in several respects, but protest is made only against that which would cancel the present arrangement on traffic to Florida destinations, leaving in effect the local rate to Nashville on the blackstrap and the mixed feed rate beyond on the weight added to the mixture by the use of the molasses. The record contains no evidence that the proposed restricted transit arrangement, if it goes into effect, would be unduly prejudicial to Jacksonville or Florida interests. Respondent is not a party to the present transit arrangement at Memphis, and it is not clear that any undue prejudice to Nashville would result, or how any could result, if the suspended schedules became operative. HELD, proposed schedules justified. Transit on mixed feed at Nashville, Tenn., 126 I. C. C. 283.

(3x) Respondents proposed to cancel certain exceptions to rule authorizing milling or manufacturing in transit arrangements on lumber and articles taking lumber rates from north Pacific coast territory to destinations in western trunk line, southwestern, central and eastern trunk line territories. All of the tariffs also contain the socalled omnibus clause making the rates subject to such transit arrangements and charges as are published by individual lines parties to those tariffs and lawfully on file with the Commission. If the proposed cancellation were permitted the transit schedule would still remain in effect in the northwest by virtue of the omnibus clause shown in the tariffs carrying the transportation rates but would open the way to permit western trunk line carriers, for example, to publish transit arrangements on this traffic in western trunk line territory. The cancellation of the restrictive schedule as proposed, would not result directly in granting a transit arrangement whereby doors and sash in which protestants are interested, could be manufactured in transit in western trunk line territory, but with this tariff restriction eliminated the western trunk line carriers would be free to establish transit arrangements now prohibited by the restrictive clause under consideration. The record fails to show that any increases would result from the proposed schedules. The protest is mainly lodged against the way being opened to permit eastern competitors to apply to the carriers for a transit arrangement. The record does not disclose that any undue prejudice would result from the proposed schedules. If other transit schedules are subsequently filed by individual carriers parties to the transcontinental tariffs which may result in undue prejudice protestants interests may be amply protected by filing protests or making the issue the subject of a formal complaint. HELD, schedules justified. Transit privileges on lumber, 126 I. C. C. 285.

(3y) Respondents proposed to withdraw certain transit arrangements on lumber and articles taking lumber rates, in carloads, at Terre Haute, Ind., on the St. Paul, on traffic originating on the B. & N. W., G. M. & N., J. & E., M. & W., M. E. R. R., and T. C. The only carrier named in the order is the St. Paul, which publishes the tariff, but the real parties in interest are the originating carriers. The G. M. & N. assumed the burden. At present the tariff provides that lumber, ties, piling, poles, paving blocks and timber, in carloads, may be stopped at Terre Haute for the purpose of preservatively treating, or first cutting into shape, treating, and then forwarding to final destination, on the basis of the through rate and minimum applicable from point of origin to final destination, plus a transit charge of $3.60 per car. Protestants only objection to the proposed cancellation grows out of a contract into which it had entered with the St. Paul to furnish that carrier with crossties for company use. At the time of hearing none of the ties which protestant expected to originate on the lines of the G. M. & N. had moved, because of difficulty in procuring them, and protestant was unable to say when it would be able to fulfill the contract. Protestant admitted that, except for the contract, no protest against the proposed schedules would have been made. The suspension is requested only until such time as protestant is able to make delivery of the ties under the contract. Shipments originating at points on respondents line and creosoted at Mobile, Louisville and Meridian may be shipped through to destination under the joint rate, where applicable, plus a transit charge of 2.5c per 100 pounds. The possible imposition of a temporary burden upon a single shipper by the pro-

posed cancellation is not such a circumstance as will overcome the justification advanced by respondent for the withdrawal of the transit arrangement. In any event, whatever hardship may result to protestant is due primarily to its contract requiring creosoting at Terre Haute only. A modification of its terms is clearly beyond the scope of the authority of the Commission. HELD, proposed schedules justified. Transit privileges on lumber and ties, 126 I. C. C. 433.

(3z) Proposed restricted transit arrangement at Nashville, Tenn., on blackstrap molasses content of shipments of mixed feed, so as not to apply on shipments to Florida destinations, found justified. Under present arrangement molasses moves from New Orleans, Mobile, or Pensacola; is mixed at Nashville with grain ingredients, and the product shipped to Jacksonville, the molasses content moving from New Orleans to Jacksonville over a "hair-pin" route at the through rate which would apply on the feed over a direct route. While a similar arrangement is maintained at Memphis on shipments moving to Florida destination which protestants urge will make competition at Nashville difficult, record contains no evidence that proposed arrangement would be unduly prejudicial to Florida interests or to Nashville as respondent is not a party to arrangements at Memphis. Transit on Mixed Feed at Nashville, 126 I. C. C. 283.

(4a) Proposed cancellation of certain exceptions to the rule authorizing milling or manufacturing in transit arrangements on lumber and articles taking lumber rates from north Pacific coast territory to destinations in western trunk-line, southwestern, c. f. a., and eastern trunk-line territories, found justified. Shippers of north Pacific coast lumber must meet competition of lumber from California, and the proposed schedules will clarify the transit rules and open the way so the transit rules may be established to enable north Pacific coast lumber to reach eastern destinations under same advantages of transit as is accorded lumber from California. Transit Privileges on Lumber, 126 I. C. C. 285.

(4b) Proposed cancellation of transit arrangement at Terre Haute, Ind., on lumber and ties originating on the Gulf, Mobile & Northern and certain of its short-line connections and the Tennessee Central R. R., found justified. Protestant's objection is based upon ground that its contract for crossties with the C., M. & St. P. calls for creosoting at Terre Haute and that withdrawal of transit arrangement before fulfillment of the contract will subject it to hardship. Respondent showed, however, that transit was established without its consent and that to permit it at less charge than obtains on their own lines would result in injury to creosoting plants directly served by them. Record indicates that other plants are conveniently situated to take care of protestant. Moreover, imposition of a temporary burden upon a single shipper does not overcome justification advanced for withdrawal of the arrangement. Whatever hardship may result to protestant is due primarily to its contract, a modification of which is beyond scope of commission's authority. Transit Privilege on Lumber, 126 I. C. C. 433.

(4c) Failure of C. & N. W. and Illinois Central railroads to join with other carriers in according transit on grain at Chicago on basis of through by-product rates from west-bank Mississippi River points in Iowa and Missouri and from points in Illinois where such rates in effect, found not unreasonable or otherwise unlawful in comparison with rates charged competitors located at points from which one-factor through rates on grain products or by-products apply, or with the combination basis of grain rates to Chicago plus grain-products rates beyond. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(4d) Grain from west-bank Mississippi River points and from Illinois, mixed into feed at Chicago, and product forwarded to c. f. a. destinations was assessed grain rates to Chicago and proportional or reshipping grain-products rates beyond. Tariff provided that when shipment originated at point from which no joint through rate to final destination applied via the transit point, rates would be the reshipping or proportional rates, except when commodity consisted of grain, in which event rate on outbound shipment would be that applicable to grain products. Here through grain-products rates but no through by-products rates were published. HELD: Words "no joint through rate" refer to grain products. If carriers intended that the rule refer to through-grain rates, tariff should have been so worded.

Accordingly through one-factor rates on grain products from origins to final destinations, in effect when the grain originated, were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(4e) Shipments of grain from westbank Mississippi River points and from Illinois, mixed into feed at Chicago, and products forwarded to c. f. a. destinations, were assessed grain rates to Chicago and proportional or reshipping rates on grain products beyond. Tariff provided that "through rates on commodity forwarded from transit station" will be applied from origin to ultimate destination on shipments originating on specified lines. HELD: Since shipments here involved originated on lines named, the one-factor through rates on by-products were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(4f) Complainant attacked rates charged on six cars of lumber from Roach and Springdale, Fla., and Scott, Ga., to Harrison and Jersey City, N. J., and Great Works, Me., based on the Norfolk, Va., combination as reasonable. In McClave & Son v. A. C. L. R. R., 100 I. C. C. 405 the Commission found the rates attacked unreasonable and awarded reparation. Roach and Springdale are on the L. O. P. & G., Scott is on the C. of Ga. The shipments were accorded transit at Portsmouth, Va., by the A. C. L. at the joint rates from points of origin to final destination plus a transit charge of $2.50 per car. It was subsequently discovered that the transit tariff was applicable only to shipments originating on the A. C. L., and additional charges were collected at the Norfolk combination. Lower combinations existed, based on Live Oak, Fla., from Roach and Springdale, and on Savannah, Ga., from Scott and the rates charged were found unreasonable to extent they exceeded such combinations, plus a transit charge. HELD, rates applicable unreasonable to extent indicated, plus a transit charge of $2.50 per car for stoppage at Portsmouth, Va., reparation awarded. McClave & Son v. A. C. L. R. R. 128 I. C. C. 1.

(4g) Shipment of oats from Porum, Okla., to Oakland, Calif., there stored and subsequently reconsigned to McCloud, Calif., found to have been improperly billed from the transit point and charges not collected in accordance with complainant's instructions, thereby depriving him of a portion of inbound rate provided by tariff. Tariff rule provided that if dealer desires consignee to pay rate from transit point to destination refund of proportion of charges to transit point would be made. Carrier's agent at Oakland was instructed to collect charges from consignee at McCloud on basis of full local rate from Oakland to McCloud. Instead charges were collected on basis of division of the through rate from Porum to McCloud, which was contrary to instructions and served to defeat the rule. Reparation awarded. Albers Bros. Milling Co. v. A. T. & S. F., 128 I. C. C. 53.

(4h) Refusal of carriers to permit blending in transit of petroleum products at interior Texas refining points while permitting such blending in transit at Texas and Louisiana port refineries under appropriate tariff rule, found not unduly prejudicial. Although the rule is designated as blending-in-transit provision and is applicable to shipments in transit to an export or coastwise destination, shipment upon which it applies has in fact reached its destination, so far as rail carrier is concerned, upon delivery to coastal refiner. While blending rule is necessary in order to insure protection of export or coastwise rate, which protection appears proper because service performed in delivering to storage tank at ports is no greater than when delivered direct to vessels, such a transit arrangement at interior points would involve two separate and distinct movements, there is no necessity therefor such as exists at the ports, and it would in effect require carriers to perform inbound haul without charge. Galveston Commercial Asso. v. G., H. & S. A. 128 I. C. C. 349, 396, 398.

(4i) Grading of transit charges dependent upon length of inbound haul and time allowed in connection with transit service, found unreasonable as applied to milling of lumber into match blocks at Spokane, Wash. While transit charges varying according to length of haul to transit point appear to be not uncommon in Pacific Northwest in connection with lumber traffic, there would seem to be little justification for maintenance of such charges in instant case, although record is insufficient for determination of reasonable flat transit charge. Carriers, however, do not op-

pose extension of period of transit service in view of circumstances surrounding the curing of lumber essential in manufacture of matches. Reasonable period of transit prescribed for future and carriers directed to establish reasonable flat transit charges. Federal Match Corp. v. G. N., 128 I. C. C. 415.

(4j) Charges for transit are presumably assessed to cover the extra cost to the carrier permitting the transit arrangement, including the expense of clerical hire, delay to cars, policing, etc., and where no out of line haul is involved the general practice is to assess a flat charge. Federal Match Corp. v. G. N. Ry., 128 I. C. C. 415, 418.

(4k) Complainant alleged that rates charged on cottonseed cake and meal, in carloads, from southwest and Mississippi valley to destinations in central, trunk line and New England territories were unreasonable and unduly prejudicial; that the transit rules applied at York and Lancaster, Pa., were unreasonable and unduly prejudicial and that the transit rules at Buffalo, N. Y., are unreasonable and unduly prejudicial. Under the present transit rules at Buffalo, established effective Oct. 30, 1925 which are similar to those applicable at Chicago, the rate on the meal is assessed from point of origin to final destination. Rates are sought for the future from points in the southwest and the Mississippi valley to destinations in the central territory, and reasonable transit rules at Lancaster and York. Complainants are not seeking rates for the future from Texas common points to trunk line and New England destinations, because joint rates were published, effective Sept. 26, 1924, but reparation is sought to the basis of the rates then established which are the same as were the joint rates to the socalled basing points in effect during the period of movement. The socalled Chicago transit rule was published for application at York and Lancaster effective Jan. 2, 1927, in purported compliance with Eshelman & Sons v. Director General, 118 I. C. C. 441. HELD, reparation awarded based on transit rules and rates established in pursuance to Eshelman & Sons, supra, reparation awarded. American Feed Mfrs. Asso. v. A. & S. Ry., 129 I. C. C. 157.

(4l) Complainant alleged that failure and refusal of defendants to establish a smelting in transit arrangement at East Helena, Mont., on lead ore and concentrates, in carloads, shipped from Bradley and Kellogg to Chicago, Ill., and the other eastern destinations, subjects it to payment of rates which were and are unduly prejudicial. East Helena is on the N. P., Kellogg and Bradley on the O. W. R. R. & N., about 11 and 13 miles, west of Wallace, Ida., its junction with the N. P. Kellogg is 270 miles west of East Helena. N. P. published a tariff August 1, 1922, permitting smelting in transit at East Helena on ores originating at all points in the Couer d Alene districts on its own rails and at Bradley, Kellogg-Wardner and Osborne on the O. R. & N. The rates on smelter products were at that time blanketed from all points in the Couer d Alene district to the east and to East Helena. Effective August 31, 1922, N. P. eliminated all origin points on the O. W. R. R. & N. To be undue in violation of section 3, preference and prejudice must result in injury to the prejudiced party. Here it is not shown that complainant would ship ore to the smelter at East Helena even if the provisions of the smelting in transit tariff were extended to Kellogg and Bradley, as origin smelting points. Nor is it shown that complainant would in any way be benefited if the preference and prejudice were removed by the withdrawal of the smelting in transit arrangement from the origin points on the N. P. HELD, no unjust discrimination or undue prejudice, complaint dismissed. Bunker Hill & Sullivan Mining & Concentrating Co. v. N. P. Ry., 129 I. C. C. 242.

(4m) Respondents proposed to withdraw certain transit arrangements on lumber, in carloads, at points on the Wabash, on traffic originating on the rails of the B. & N. W., G. M. & N., the J. & E., M. & W., and Miss. Export. At present the tariff provides that lumber, paving blocks, piling, poles, posts, ties and timber may be stopped at points on the Wabash for the purpose of preservatively treating or first cutting into shape and then treating, and forwarding to final destination on the basis of the through rate and minimum applicable from point of origin to final destination, or to transit point, whichever is higher, plus a transit charge of $1.80 per car. If the transit rate is withdrawn, combinations of rates to and beyond the transit point will apply which are consider-

ably higher than the present joint rates. The existence of the transit arrangements at points on the line of respondent is evidence tending to show that the withdrawal of similar arrangements at points where protestants plants are located would be unreasonable. HELD, schedules not justified. Transit arrangement on lumber, 129 I. C. C. 518.

(4n) Respondent, Burlington, proposed to cancel certain transit arrangements at Chicago, Ill., on lumber and related articles, in carloads when the traffic originates on or moves over the M. O., Frisco, St. L. S. W. or Southern. Rules permitting the transit of lumber at Chicago without restriction against movement from or over the lines of the four carriers named have been maintained by respondent since 1921. If the suspended schedules are permitted to become effective the transit arrangement will not be available on the basis of joint rates for shipments moving over the lines of the four carriers named, and increased rates based on combination will result. Respondent asserts that the four carriers named therein declined to join in joint rates and divisions to destinations beyond the transit point. Respondent admits that the sole question presented is one of divisions and states that it seeks relief from the performance of a substantial transportation service for little or no revenue. If respondent and its connections are unable to agree upon their divisions of the joint rates they may petition the Commission to determine that issue in an appropriate proceeding. HELD, suspended schedules not justified. Restriction of transit on lumber, 129 I. C. C. 669.

(4o) Complainant alleged that rates on grain and grain products in carloads from Indiana and Illinois to Indianapolis, Ind., and through Indianapolis to Louisville, Ky., and points in eastern trunk line and New England territories, including western termini of eastern trunk lines and points taking the same rates based thereon are unreasonable, discriminatory and unduly prejudicial. Nonprejudicial joint rates with transit at points beyond the rails of the Wabash are sought. Points of origin are on the Wabash Shadeland, Ind., to Cerro Gordo, Ill., inclusive including the branches extending to Covington, Ind., and Champaign, Ill., and Reddick, Ill., to Effingham and Altamont, Ill., inclusive. From points on the Wabash to and via Indianapolis sixth class rates apply on grain, which are substantially higher than either the commodity rates to and via that point from cross country and other competitive points on other lines or the commodity rates applicable from points on the Wabash, to the east via Chicago, Toledo, O., and other junctions with eastern lines, and to Louisville via East St. Louis, Ill., and the L. & N. and Southern or in connection with the B. & O. also via Lafayette, Ind., and C. I. & L. Commodity rates lower than the rates on grain apply on grain products from certain Wabash stations to Indianapolis and to Louisville via Indianapolis. It is not here evident that the absence of joint rates, through Indianapolis, restricts shippers located on the Wabash in disposing of their grain at eastern markets, or that the available routes to those points are unreasonably long. The Commission is not convinced that there has been such a showing of public interest as to warrant requiring the Wabash to short haul itself on grain through Indianapolis to the territory here involved or that this record justifies a finding that the rates assailed are unduly prejudicial. While the Commission has in many cases prescribed rates on grain the same as on grain products, the showing here made that the rates differ on the two commodities may indicate that the rates on the grain products are too low just as much as that the rates on grain are too high. HELD, complaint dismissed. Indianapolis Board of Trade v. B. & O. R. R., 129 I. C. C. 675.

(4p) Complainant alleged that rates on scrap copper and copper alloys, carloads, from official territory to Pittsburgh, Pa., and rates on copper ingots from Pittsburgh to destinations in official territory are unreasonable and unduly prejudicial. Complainants grievance is with respect to the transit arrangements which are accorded by the B. & O. and Pennsylvania to complainants competitor, at Baltimore, Md. Although there are general statements in the record to the effect that "cake" copper moves to Baltimore for refining in transit, there is no evidence that this copper originates in any of the states named in the complaint that are "west of Pittsburgh" or "south and west of Baltimore". There is no evidence,

therefore, that complainants competitor at Baltimore has been given an unreasonable or undue advantage over complainant by reason of the refining in transit arrangements that are in effect at that point. The law does not permit the Commission to make such an inference, and the burden of proof is upon complainant. HELD, rates assailed not unreasonable or otherwise unlawful, and refining in transit at Baltimore while refusing to provide refining in transit at Pittsburgh on carload shipments of copper similarly destined is not shown in this record to be unreasonable or unduly prejudicial, complaint dismissed. Federated Metals Corp. v. Pennsylvania R. R., 132 I. C. C. 14.

(4q) Respondent, Burlington, proposed to withdraw certain transit arrangements on lumber, in carloads, at East St. Louis, Galesburg, Granite City, Madison, and Metropolis, Ill., on traffic originating on the N. O. G. N. If the transit arrangements are withdrawn, combinations of rates to and beyond the transit points, which are higher than the present joint through rates, will apply. HELD, suspended schedules not justified. Transit privileges on lumber, 132 I. C. C. 53.

(4r) Complainant alleged that the transit charges collected on middlings and peanut hull meal, in carloads, shipped between May 1, 1923, and April 30, 1925 from Indiana, Maryland, Ohio, Pennsylvania and West Virginia and cleaned in transit at Pittsburgh, Pa., were unreasonable, unjustly discriminatory and unduly prejudicial. The record shows that middlings and peanut hull meal are used by tin mills in official territory as an absorbent or palm oil from the polished surface of new tin. Prior to August 15, 1921 after having been used for this purpose, these articles were considered waste material. On that date, responsive to shippers request, defendants established a charge of 2c for stopping shipments of these commodities in transit at complainants plant in Pittsburgh, where they were cleaned of metal fragments and then reshipped to destinations in official territory as feed for livestock. On May 1, 1925 the charge was reduced to 0.5c, minimum $3.60. HELD, the assailed charge unreasonable to extent it exceeded 0.5c, minimum $3.60 reparation awarded. Newsome Feed & Grain Co., v. Pennsylvania R. R., 132 I. C. C. 743.

(4s) Failure to provide for stopping in transit to partially unload shipments of Portland cement and wall plaster, in straight or mixed carloads, from Hanover and Trident, Mont., to western and central portions of North Dakota and South Dakota while contemporaneously according this privilege to competitors at Steelton, Duluth, and Minneapolis, Minn., Mason City, Iowa, and Piedmont and Black Hawk, S. Dak., found unduly prejudicial. No order entered by carriers expected to provide for transit privilege in revising rates in accordance with findings herein. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 118, 119.

(4t) Following 118 I. C. C. 441, transit rules, regulations, and practices as applied to shipments of cottonseed cake and meal from points in the Southwest and Mississippi Valley to York and Lancaster, Pa., and Buffalo, N. Y., there mixed into feed and the feed forwarded to c. f. a., trunk-line, and New England destinations, found unreasonable and unduly prejudicial to extent that charges thereunder exceeded those which would have accrued from application of transit rules contemporaneously in effect at Chicago and subsequently published in above-cited case for application at York and Lancaster. Reparation awarded. American Feed Mfrs. Asso. v. A. & S., 129 I. C. C. 157.

(4u) Failure of Illinois Central to maintain the same through rates via Memphis, Tenn., with transit arrangements thereat as it contemporaneously maintains via East St. Louis and Cairo, Ill., with transit at those points, on grain and products from points in Iowa, Illinois, Minnesota, and Wisconsin to destinations on its lines in Arkansas and Texas south of Brinkley, Ark., found unduly prejudicial. Distances and rates via the three markets are substantially the same from Omaha, Nebr., and various other points. Undue prejudice ordered removed. American Grain and Hay Co. v. I. C., 129 I. C. C. 225.

(4v) Failure and refusal of Northern Pacific to establish smelting-in-transit arrangement at East Helena, Mont., on lead, ore and concentrates from Kellogg and Bradley, Idaho, on O.-W. R. & N.

lines, to eastern destinations, while contemporaneously maintaining such transit arrangements on ore from other points on its own lines in same district, found not discriminatory or unduly prejudicial. Complainant is desirous of smelting all ores it can obtain at its own plant at Bradley and it is therefore not likely that it would ship ore to East Helena smelter even if transit tariff were extended to Kellogg and Bradley. Nor is it shown that it would be benefited if preference and prejudice were removed by withdrawal of transit arrangements from other points in the district. Bunker Hill & Sullivan M. & C. Co. v. N. P., 129 I. C. C. 242.

(4w) Proposed withdrawal of transit arrangements at points on Wabash Railway, thus allowing higher combinations of rates to and from transit point to become effective on lumber from points on Gulf, Mobile & Northern and its short-line connections, found not justified. Since carrier maintains transit privileges at other points on its lines withdrawal of similar arrangements at points where protestants' plants are located would be unreasonable. Transit Arrangement on Lumber, 129 I. C. C. 518.

(4x) Proposed cancellation by the C., B. & Q., of transit arrangements at Chicago. Ill., on lumber and related articles originating on or moving over the Missouri Pacific; St. Louis-San Francisco; St. Louis Southwestern; **or Southern,** and destined beyond Chicago, found not justified. Respondents attempted to justify proposed cancellation only by comparison of divisions, and commission has consistently held that disagreements among participating carriers over division of joint rates furnishes no justification for increased rates. Moreover, transit arrangements here considered have been used by shippers for a number of years and are similar to arrangements extended at Chicago by other lines. Restriction of Transit on Lumber, 129 I. C. C. 669.

§15a. Stoppage in Transit.

See Stoppage-In-Transit.

(a) Upon further consideration, elimination of arrangement for stopping to partially unload interstate shipments of cranberries at points in Texas, found not justified. While respondents urged that to haul a partially loaded car from stop-off point to final destinations was a waste of transportation and that stop-off charge was not sufficient to take care of additional service rendered, it is obvious that where part of the load has been removed, less service would be performed beyond the stop-off point to final destination than on through shipments. Moreover, stop charge appears sufficient to cover additional services rendered and the transit service is highly beneficial to protestants in the sale and distribution of cranberries and yet is not unduly burdensome to respondents. Previous report 122 I. C. C. 479, reversed. Stop-Over in Transit Privilege, 128 I. C. C. 425.

(b) In Stop-over in transit on cranberries at points in Texas, 122 I. C. C. 479, division 3 found that the respondents had justified their proposal to cancel the arrangement under which interstate carload shipments of cranberries were stopped at Texas points for partial unloading. Charges on shipments stopped to partially unload were computed on the weight of the original load, subject to the minimum, at the rate from point or origin to final destination plus $6.30 for each stop. Only three stops were permitted and they could be made only at points directly intermediate from shipping point to final destination. There was no restriction as to the quantity of cranberries which was to be unloaded at any stop off point or to be sent to final destination. The record is not clear as to the additional service performed on traffic stopped to partially unload, but it is obvious that where part of the load has been removed, the respondents would perform less service beyond the stop off point to final destination than they would on shipments moving through the same stop off point to the same final destination without being partially unloaded. For this lesser service beyond the stop off point the carriers would receive the same rate as where no stop is made, plus $6.30 for each stop. While stopping to partially unload, no doubt, requires additional service of the respondents, it is fair to assume, in the absence of a showing to the contrary, that the stop charge is sufficient to cover those services. HELD, schedules not justified. Stop over in transit on cranberries in Texas, 128 I. C. C. 425.

§15½. Transshipment and Transfer.

See Transfer.

(a) The transfer of l. c. l. freight from car to car is not confined to joint-line hauls. It also happens in many single-line hauls and is frequently performed at special transfer stations designed for the purpose as an aid to the economical and expeditious handling of freight. Southern Class Rate Investigation, 113 I. C. C. 200, 205.

(b) Practice whereby east-side lines require west-side lines to bear expense of transferring across the river from East St. Louis, Ill., to St. Louis, Mo., interstate westbound freight moving under combination rates which are same on St. Louis as on East St. Louis, found unreasonable. Usual practice among rail carriers throughout the country is to divide switching expenses when services of an intermediate carrier are utilized in effecting an interchange of traffic, the switching charges being absorbed by carrier that delivers traffic to its connection. Moreover, there is a generally recognized obligation on part of all carriers on through traffic to make delivery on rails of connections, either direct or by bearing charges of intermediate switching line. Reasonable practice prescribed for future and reparation denied. C.. R. I. & P. v. B. & O., 113 I. C. C. 681.

(c) Rates on anthracite silt from Scranton and other Pennsylvania mines to Buffalo, N. Y., and Erie, Pa., for transshipment by lake to interstate destinations, found unreasonable. Washed silt is of extremely low value at the mines and although used to some extent for other purposes, it has value as a domestic fuel only when manufactured into briquets. Furthermore, transshipment rates which contemplate a movement beyond ports may reasonably be somewhat lower than those applicable on local traffic. Reasonable rate prescribed for future and reparation awarded. Stott Briquet Co. v. P. R. R., 113 I. C. C. 693.

(d) Rates on coal from Clinchfield, Dante, and Clinchco, Va., to Toledo and Toledo Dock, Ohio, for transshipment by vessel, found unduly prejudicial to extent rate from Clinchco exceeds rate contemporaneously maintained on lake-cargo coal from Big Sandy district to same destinations, and those from Dante and Clinchfield exceed a differential of 15 cents over the Clinchco rate. Nonprejudicial rate relationship prescribed for future. Clinchfield Coal Corp. v. C., C. & O., 118 I. C. C. 79.

(e) Upon a consideration of unusually favorable circumstances and conditions surrounding movement of lake-cargo coal; the relatively lower rates from southern districts; the decided change in relative tonnage shipped from Pittsburgh and Ohio districts and the southern districts, respectively; the present depressed condition of coal-mining industry in Pittsburgh and Ohio districts; the changed conditions since decision regarding those rates issued in 101 I. C. C. 513; and fact that cost of the service warrants a substantial rate reduction, HELD: That bituminous-coal rates from mines in Pennsylvania, Ohio, and West Virginia, in the Pittsburgh, Ohio No. 8, and Cambridge districts to lower Lake Erie ports for transshipment by vessel are unreasonable but not unduly prejudicial. Rates on like traffic from mines in the Fairmont district of West Virginia found not unreasonable or unduly prejudicial. Reasonable rates prescribed for future and former report, 101 I. C. C. 513, modified in part. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309.

(f) Upon contention that commission has no jurisdiction over rates on traffic moving to Lake Erie ports for transshipment by vessel, upon theory that because of lack of control over the water carriers which handle traffic beyond the ports commission has no authority to deal with or prescribe proportional rates on traffic over which it does not have jurisdiction for the entire movement from point of original shipment to point of ultimate destination, HELD: Where transportation to the port is interstate or foreign in character, it is subject to commission's jurisdiction under general provisions of section 1 of the act, irrespective of the mode of transportation beyond the port. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 313, 314.

(g) Rate on bituminous coal from mines in Clearfield, Meyersdale, and Cumberland-Piedmont districts of Pennsylvania, Maryland, and West Virginia, to Black Tom Pier, Jersey City, N. J., found not unreasonable but unduly prejudicial, except as maintained by the Pennsylvania, to extent it exceeded lower transshipment rates contemporaneously in effect to its competitors oper-

ating from piers on both sides of complainant. While latter is clearly at a rate disadvantage it does not follow that transshipment rate is reasonable maximum or that rate assailed is more than reasonable maximum. However, same rate to complainant applicable under substantially similar transportation circumstances and conditions can not be withheld merely because volume of business handled does not overtax piers on which its competitors operate, for complainant is entitled to share in the business on an equal basis. Undue prejudice ordered removed. Harbor Coaling Corp. v. B. & O., 128 I. C. C. 747.

§16. Wharfage and Dockage.

See Dockage; Wharfage.

(a) Proposed reduced charge for handling, storage, and wharfage of imported fertilizer and fertilizer materials at Pensacola, Fla., and Mobile, Ala., in order to meet charge on potash salts at Pensacola and on all fertilizer materials at Gulfpost, Miss., found not justified. While the situation presents a maladjustment injurious to Mobile commission can not permit its partial correction even for a temporary period by establishment of a charge which record clearly shows to be below a reasonable minimum. Handling, Storage, and Wharfage of Fertilizer, 109 I. C. C. 609.

III. PUBLICATION AND TARIFFS.

§16¾. In General.

See Tariffs.

(a) Knowledge, on part of carrier's agent, of shippers' intention to store commodity in transit does not relieve shipper from strict compliance with transit rules. Nor does ignorance of tariff provisions excuse a shipper from noncompliance with such provisions. See 62 I. C. C. 110; 242 U. S. 448. While shipper is not presumed to know with what representative of carrier he is to record freight bills in order to secure through rates of shipment accorded transit privileges, if he desires transit it is his duty to make inquiry of carrier and thus inform himself. Beatrice Creamery Co. v. C., B. & Q., 107 I. C. C. 568, 570.

(b) Commission has repeatedly criticized policing arrangements which are dependent on knowledge or information a carrier's agent received through investigation, and has consistently held that tariffs authorizing transit services and arrangements which do not contain clear and definite policing provisions to insure collection of correct charges are in violation of section 6 of the act. Drayage Absorptions by S. W. M., 113 I. C. C. 179, 182.

(c) Complainant alleged that the rates charged on carloads of wheat from Kansas City, accorded transit at Leavenworth, Kans., and Sweet Springs, Mo., and product forwarded to Bald Knob, Searcy, Helena, and Forrest City, Ark., New Orleans, La., Charleston, Mo., Philadelphia, Pa., and New York, were unreasonable and unduly prejudicial. Grain shipped to Kansas City moves out to the destinations here considered under proportional rates. The points at which transit was accorded are on the M. P., and under its transit tariff proportional rates applied with transit at points in direct line of shipment. Two stops in transit were allowed. Leavenworth is 26 miles northwest of Kansas City so that there was an out of line haul of 52 miles through the latter point. Charged proportional rate of 4 cents from Kansas City to Leavenworth plus the proportional rates from Leavenworth to final destination. HELD, governing tariffs did not authorize transit at Leavenworth and Sweet Springs on grain from beyond, and applicable rates not unreasonable or otherwise unlawful, complaint dismissed. Moore-Lawless Grain Co. v. M. P. R. R., 123 I. C. C. 647.

(d) Circulars issued by inspection bureaus to inspectors for purpose of assisting them in determining proper ratings to be applied, not being incorporated in tariffs or on file with commission, found to have no legal status or effect in so far as they might be used in any manner to change rates applicable on a particular commodity or commodities. Fraser v. A. C. L., 122 I. C. C. 520, 523.

(e) Where a carrier elects to perform service of gathering coal from mines located on private or plant-facility tracks, it should publish tariffs to cover such service, section 1 (3) of the act providing that "the term 'transportation' shall include * * * all services in connection with receipt * * * of property transported," and section 6 providing that no carrier shall engage in transportation as defined in the act unless rates, fares, and charges shall have been

filed and published. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 123.

(f) Complainant alleged violation of section 6 in that on a carload of oats from Porum, Okla., to McCloud, Calif., stored in transit at Oakland, defendants failed to collect charges from the consignee at the local rate from Oakland to McCloud thereby depriving complainant of a refund authorized by the applicable tariff. Shipment arrived at Oakland over the Santa Fe and was placed in storage. Charged 67c to Oakland. Shipment reconsigned Oct., 21, 1922 to McCloud, moving Santa Fe and S. P. to Sisson and McCloud River R. R. beyond. Complainant gave instructions to the agent of the Santa Fe at Oakland for collection of charges from the consignee at McCloud on basis of rate from Oakland to McCloud. Applicable interstate rate from Oakland to McCloud was 29.5c. Had complainants instructions been complied with, the charges would have been $177, complainant to be refunded $132. Defendant Santa Fe admitted that complainant is entitled to refund if the delivering carrier will collect charges upon basis of 29.5c. But it is the Santa Fe that held out in its tariff that refund would be made in the difference between the local rate and the 7.5c actually collected. HELD, reparation awarded to $132. Albers Bros. Milling Co., v. A. T. & S. F. Ry., 128 I. C. C. 53.

(g) Complainant alleged that charges collected on 15 cars of alfalfa meal from Colorado to Dyersburg, Tenn., during Jan., Feb. and March, 1920, were unreasonable, and that it was overcharged on outbound shipments of mixed feeds from Dyersburg to various destinations. The case only involves misrouting and tariff interpretation. Those shipments which moved during Jan. and Feb., 1920, are barred by the statute of limitations in so far as the allegation of misrouting is concerned inasmuch as the complaint was not filed within one year after the termination of federal control. The record is void of proof that either the shippers or defendants had any information that these shipments were to be milled or mixed in transit or that Dyersburg was other than the ultimate destination. Neither does it satisfactorily establish that the agents of the initial line unlawfully refused to issue bills of lading with the routing desired, the evidence merely indicating that the shipper requested routing via East St. Louis, and that the carrier suggested that the routing be left open. The carrier having issued and the shipper having accepted unrouted bills of lading the carrier was lawfully bound to move the shipments over the lowest rated route, which in this case was via Memphis, the rate to Dyersburg via that route being 2c lower than the rate through East St. Louis. The term "transit ingredients" as used in the tariff comprehends only such shipments of alfalfa meal as may be transited under the provisions of the tariff, and that complainants shipments do not come within this category. HELD, complaint dismissed. Dyersburg Milling Co., v. Director General, 129 I. C. C. 739.

§17. Obligation to Publish.

See Tariffs §4.

(a) Complainant alleges demurrage, reconsignment, and so-called back haul charges collected by defendants on 127 cars of bituminous coal shipped between April 4 and 19, 1918, from Chandler, O., to Akron, O., and subsequently reconsigned to Cleveland and Lorain, O., as unjust and unreasonable. These shipments made during the period of federal control were part of a larger number shipped on account of a contract between complainant and the Philadelphia Rubber Works, Akron. The cars were forwarded by the P. & W. Va., being billed from its Smithfield, O., agency because it has no agent at Chandler. They were consigned to "Coal Shippers Terminal Pool Association, Pool No. 141, account of Philadelphia Rubber Works, Akron, O.," and routed by the shipper "W. & L. E." The shipments moved over the P. & W. Va., W. & L. E., to Mogadore, O., and thence A. C. & Y., to destination 95.6 miles. It was developed at the hearing that the reconsignment charges of $615 were collected without lawful authority. The A. C. & Y., had no tariff provision for such a charge at that time. Demurrage charges not unreasonable, reconsignment charges should be refunded, reparation awarded. Superior Coal Co. v. Director General, 115 I. C. C. 710.

(b) Where a carrier elects to perform service of gathering coal from mines located on private or plant-facility tracks it should publish tariffs to cover

such service, section 1 (3) of the act providing that "the term 'transportation' shall include * * * all services in connection with receipt * * * of property transported," and section 6 providing that no carrier shall engage in transportation as defined in the act unless rates, fares, and charges shall have been filed and published. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 113.

§18. Reshipping Under Through Rate.

See Absorption of Charges §1½ (a); Proportional Rates; Through Routes and Joint Rates §18, §19, §20.

(a) Shipments of apples moved to transit point, were stored, and later reshipped to ultimate destinations. Charges were collected at rates applicable to and from transit point while lower through rates contemporaneously applied from points of origin to final destinations conditioned upon inbound freight bills being recorded with carrier within a specified time after storage, which shipper failed to do. FOUND: Rates assessed were applicable and not unreasonable. Beatrice Creamery Co. v. C., B. & Q., 107 I. C. C. 568.

(b) Aggregate of inbound and outbound rates on rough rice from points in Louisiana to Lake Charles, reshipped as clean rice and products to various interstate destinations, where back-haul service was in excess of 40 miles, found not unreasonable or otherwise unlawful. While a 200-mile free back-haul service under milling-in-transit arrangements was in effect at certain points in Texas during period of movement, and similar back-haul provision was established at Lake Charles after shipments in question moved, the peculiar character of evidence presented in 69 I. C. C. 508, which justified commission in requiring establishment of a 40-mile free back haul is not present in the instant case to justify as reasonable the establishment of a greater free back-haul service. Lake Charles Rice Milling Co. v. L. W., 109 I. C. C. 195.

(c) Complainant attacked commodity rates charged on rosin, carloads, shipped since Feb. 1, 1923, from Alabama, Florida, Georgia, Louisiana and Mississippi to Cincinnati, O., there graded and stored and reshipped to Hamilton, Ont., Canada, as unreasonable, and that failure of defendants to provide transit arrangement on rosin at Ivorydale (Cincinnati) in connection with the through rates to Hamilton as unjust, unreasonable, unduly prejudicial and in violation of section 4. Hamilton is 60 miles northwest of Buffalo, N. Y., on the T. H. & B., C. P., and C. N. From July 1, 1922, to Aug. 20, 1924, a joint commodity rate of 41c applied on rosin from the Gulf and south Atlantic ports to Buffalo, N. Y. The same rate applied from the Gulf ports to Hamilton, but from the south Atlantic ports to Hamilton a combination rate of 55.5c applied, composed of a commodity rate of 27c to Cincinnati and sixth class of 28.5c beyond. From interior points in the Mississippi Valley and the southeast the rates were also combinations of commodity rates to Cincinnati and the sixth class rate beyond, and were higher than the rates from the ports. In 87 I. C. C. 740 and 89 I. C. C. 634 the commission prescribed rates on naval stores from southeast and Mississippi Valley to this territory and rates became 33c to Cincinnati and 42c to Buffalo. The latter rate was not made applicable to Hamilton except from the Gulf ports. On shipments graded and stored at Ivorydale and reshipped to Hamilton rates were those to and from Cincinnati, except that since Aug. 20, 1924, the Southern system had allowed transit under the through rates on shipments brought to Cincinnati by it. Rates attacked have been combinations of the rates to and from Buffalo since Aug. 20, 1924. The rates to Buffalo are relatively low. The 15.5c rate beyond Buffalo is for transportation mostly in Canada. This record does not warrant a finding that the rates to Buffalo should be less than 42c on traffic destined to Hamilton or that the rate of 15.5c beyond is unreasonable on traffic from these origin points. Even if undue prejudice were shown the commission could only require the United States lines to withdraw from participation in the preferred rates. This could only result in increased rates to Hamilton and would afford complainant no relief. HELD: Rates attacked and defendant's failure to provide transit at Cincinnati not unreasonable, unduly prejudicial or otherwise unlawful, complaint dismissed. Procter & Gamble Co. v. A. & V. R. R., 112 I. C. C. 381.

(d) Complainant attacked combination rate charged on a car of poles shipped from Minneapolis, Minn., to Zwingle, Ia., on June 25, 1924, originally shipped from Colville, Wash., was unjust, unreasonable, unjustly discrimi-

natory and unduly prejudicial. Two cars of poles were shipped from Colville to Minneapolis over G. N., on Dec. 29, 1923, and were stored at Minneapolis. On June 25, 1924, complainant shipped a car of poles, from Minneapolis to Zwingle over C. M. & St. P. The bill of lading bore the endorsement "these poles take proportional rate. Surrendered herewith tonnage as per the attached." Attached was a tonnage credit from the Western Weighing Bureau, representing the shipment of poles from Colville, and opposite the printed term "transit operation or proportional" was inserted the word "proportional." Transit is optional, and when the charges made by the use of transit are higher than the charges at the full local rate from transit station to final destination the shipper can elect to pay the lower charges. In this case it elected to take advantage of transit and therefore the rates attacked were applicable. C. M. & St. P. published a proportional rate of 15.5c from Minneapolis to Zwingle on poles, but it applied only on continuous shipments over routes over which no joint rates were in effect. The same carrier also published a rate of 15.5c from Minnesota Transfer and Cologne, Minn., to Zwingle on poles originally shipped from points west of the Montana-Dakota state line and unloaded and stored at Minnesota Transfer or Cologne and reshipped from those points within a year from the date of the freight bill covering the inbound shipment. When defendants learned of the situation at Minneapolis, they made the proportional rate of 15.5c applicable in the same manner. HELD: Rate attacked of 18.5c not unreasonable but unduly prejudicial to extent it exceeded 15.5c, reparation denied, complaint dismissed. Lindsley Bros. Co. v. G. N. Ry., 113 I. C. C. 166.

(e) Complainant attacked combination charge assessed on a double carload of structural steel, which originated at Chicago, Ill., and, after fabrication in transit at Red Oak, Ia., was shipped about Aug. 3, 1923, to Bloomfield, Neb., as unjust and unreasonable and inapplicable to extent it exceeded 65.5c plus a fabrication charge of 2c. On May 15, May 26 and June 26, 1923, the structural steel embraced in this shipment was moved from Chicago by the Burlington to Red Oak, where the local rate, 37c, was paid thereon. After fabrication in transit it was billed out to Bloomfield at 75,000 pounds, and at Bloomfield a joint rate of 65.5c from Chicago to Bloomfield plus 2c for fabrication in transit, less 37c already paid at Red Oak, was collected. Effective during the period covered by this transportation there was a local, joint, and proportional freight tariff issued under C. & N. W. I. C. C. 9040. This tariff was issued by and for the Northwestern and was participated in by the Burlington, C. St. P. M. & O. and other carriers. It carried joint rates between Chicago and other points of origin and stations on the Omaha and on other lines in Nebraska and other states. On Page 162 of this tariff, in item 285 a specific commodity rate of 65.5c was published to apply from Chicago to Bloomfield on iron and steel articles as described on page 37. These tariffs would apply, on the facts shown in this case, had the shipments originated at a station, team track or industry served by the Burlington, and had they been switched by the Burlington to the Northwestern for a line haul outbound from Chicago toward either Red Oak or Bloomfield. But Red Oak is a local station on the Burlington line, and Northwestern tariff names no rates at all to that point. These shipments did not move to Bloomfield direct, but only after transit at Red Oak. Chicago, as served by the Burlington, is not named therein. Rates named in this tariff apply from Chicago only when the line haul is by the Northwestern. Only through rate was 69c now claimed by defendants. HELD: 69c rate not unjust or unreasonable, complaint dismissesd. Western Bridge & Construction Co. v. C. B. & Q. R. R., 113 I. C. C. 192.

(f) On cotton moving to Montgomery, Ala., for concentration and compression and reshipment beyond, the interstate inbound locals were higher than intrastate local rates, the matter of which rate should be used not being covered by tariff provision. Contention that lower intrastate rates were legally applicable on shipments originating at stations south of Montgomery, concentrated and compressed at that point and reshipped to Mobile, Pensacola, and New Orleans, not sustained following Conf. Ruling, adopted March 15, 1921, wherein the rule is laid down that where interstate, proportional, or reshipping rates are named on shipments originating beyond reshipping or transit points, such rates are applicable only in case inbound charges are based on inbound

interstate rates. Montgomery Cotton Exch. v. L. & N., 112 I. C. C. 325, 326, 327.

(g) Local rates into transit point were made subject to tariff carrying the combination rule "except as otherwise indicated," and transit tariff provided that transit service would be available when "the lawful tariff rate to the transit point has been paid thereon." Upon contention that on cotton moving to Montgomery, for concentration and compression and reshipment beyond, the through charges based on local rates to Montgomery and reshipping rates beyond were subject to combination rule, HELD: Since payment of the lawful inbound rate was a condition precedent to transit service and use of reshipping rate outbound, the full combination of the two was basis for through charges to be used in connection with transit arrangement. This basis for construction combinations was sufficiently "otherwise indicated" within meaning of the exception to render combination rule inoperative. Montgomery Cotton Exchange v. L. & N., 112 I. C. C. 325, 327, 329.

(h) Combination rates to and from Newton, Miss., collected on shipments of cotton delivered to initial carrier for transportation in compressed bales at Philadelphia, Miss., for movement to Columbus, Aragon, and Social Circle, Ga., found inapplicable. Lower combination applied over routes of movement based on Meridian, Miss., tariff carrying the local Philadelphia-Meridian rate providing for its application on "cotton in bales" whether delivered to carrier compressed, uncompressed, or with carrier's privilege of compression. Factors beyond Meridian applied on cotton, carrier's privilege of compression, and as this was the original character of the shipments this rate was applicable beyond Meridian via routes of movement. Reparation awarded. Threefoot Bros. & Co. v. G., M. & N., 112 I. C. C. 657.

(i) Rates charged on one car of poles originally shipped from Colville, Wash., to Minneapolis, Minn., there stored and subsequently reforwarded to Zwingle, Iowa, found not unreasonable, discriminatory, or unduly prejudicial; except that the local rate from Minneapolis to Zwingle was unduly prejudicial to extent it exceeded a lower proportional contemporaneously in effect on similar traffic shipped from territory west of the Montana-Dakota State line to Minnesota Transfer and Cologne, Minn., for storage and reforwarding to the same ultimate destination. Lindsley Bros. Co. v. G. N. Ry., 113 I. C. C. 166.

(j) B. & O., respondent, proposed to make certain charges, in addition to the through rate and transit charge, for out of line hauls on iron and steel articles fabricated in transit at Parkersburg, Va. Parkersburg is on the Ohio river division of respondents line between Wheeling and Kenova, W. Va., at the intersection of the main line from Cincinnati, O., to Cumberland, Md. Respondents present tariff authorizes the stopping in transit of iron and steel articles at Parkersburg, Huntington, Point Pleasant, and Wheeling, W. Va., Akron, Barberton, Canton, Martins Ferry, Massillon, Newton Falls, O., for the purposes usually included in the term "fabrication" and reforwarding in an unfinished state, knocked down, to points of destination in the same direction to which through rates are in effect from original point of shipment to final destination. The present tariff carries no provision for additional charges to be assessed for out of line or excess hauls to and from the transit point in instances where the transit point is not on the direct line between points of origin and destination. The iron and steel articles entering into transit at Parkersburg originate at points in Pennsylvania and Ohio in what is known as the Pittsburgh district, and adjacent territory, all within central territory. Generally speaking, rates applying on these articles between points in central territory are not restricted as to routing so that a shipment originating at Pittsburgh, destined to Cincinnati, for example, may be transited at Wheeling, at the through rate from Pitsburgh to final destination plus a transit charge of 3c, and there is no provision preventing its movement through Parkersburg. On a similar shipment transited at Parkersburg, protestant would, under the proposed schedules, be compelled to pay, in addition to the through rate and transit charge, an out of line haul charge of 4c, although the Parkersburg route is less than 10% less than the direct route. It does not appear that carriers in central territory publish any charges for out of line service in connection with fabrication in transit on their lines. While as a general rule the assessment

of charges for out of line excess hauls is proper, and consistent with the principle that carriers should be compensated for services rendered, respondents proposal to apply the charges hereinbefore stated on iron and steel articles fabricated in transit at Parkersburg while waiving such charges at other fabricating points on its lines, and from which points in many instances like articles may be reshipped via Parkersburg to final destination under open routes in the tariffs, would result in undue prejudice to Parkersburg and its traffic. HELD, suspended schedules not justified. Transit on iron and steel, 115 I. C. C. 381.

(k) Complainant alleged illegal charges were collected on 13 cars of barley shipped from South Dakota to Minneapolis, Minn., during federal control and reconsigned to Milwaukee, Wis. Charged at varying rates ranging from 10.5c to 21.5c to Minneapolis and 12.5c to Milwaukee. Concurrently joint commodity rates were in effect, varying from 10 to 30.5c from the original shipping points to Milwaukee, which applied only via Winona, Minn., and Wyeville, Wis., via the shortest available route. Shipments did not move through the points specified and the joint rates would not have been applicable on through shipments via Minneapolis. Effective Feb. 28, 1919, subsequent to these movements the transit tariff was amended so as to apply through rates on similar shipments stopped but not unloaded at Minneapolis, but this amendment can not be applied retroactively and the statute has barred considerations of any questions other than those raised under section 6. HELD, charges attacked not illegal, complaint dismissed. Zimmerman v. Director General, 115 I. C. C. 407.

(l) Complainant attacked rates charged on compressed cotton which moved from Opelousas and Bunkie, La., between Nov. 1, 1922 and May 1, 1924 and from Jan. 6, 1923 to May 1, 1924 to destinations in New England and New York as unjust, unreasonable and unduly prejudicial as compared with rates from Shreveport, La., and other Louisiana points of origin. These shipments moved from Opelousas and from Bunkie upon through bills of lading via the rail, water and rail route through the ports of New Orleans and New York. Rates applied on cotton, compressed, any quantity. The tariffs were subject to rule 77. In these tariffs lower rates were published from Alexandria, La., than from Opelousas, the latter on movements to New Orleans being intermediate. Effective Nov. 19, 1924 rates were published from Opelousas on the Alexandria basis to Boston but not to the interior points. Bunkie is a local point on the T. & P., 31 miles east of Alexandria and between the latter point and New Orleans. HELD, rates attacked from Opelousas and Bunkie unreasonable to extent they exceeded the rates from Alexandria, reparation awarded. Magnet Bros. Co. v. A. C. R. R. Co., 118 I. C. C. 85.

(m) Complainant attacked through rates charged and rules and practices applicable on shipments of cottonseed meal and cake from Mississippi valley and the southeast to Lancaster and York, Pa., there manufactured into mixed feed under a transit arrangement, and shipped to destinations in New England and trunk line territories as unreasonable, unduly prejudicial and in violation of the fourth section. Territory of origin is Tennessee, Mississippi, Alabama and Arkansas. Destination territory, in addition to New England states, includes New York, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, North Carolina and South Carolina. Since the shipment from the transit point in the instant proceedings was in every case mixed feed, defendants under the tariff assessed the mixed feed rate from point of origin to final destination. As no commodity rates on mixed feed were or are published from the origin territory, the joint class D rates were charged on the through movement. The record shows that the commodity which actually moves for the greater part of the distance is cottonseed meal; and defendants by their transit rules move voluntarily accorded the cottonseed meal basis to Chicago, Peoria, Milwaukee, and Hammond, competing points. Mixed feed and cottonseed meal compete with each other as animal food. They load about the same, the cottonseed meal being the heavier, are subject to the same carload minima, are of about the same value, and require substantially the substantially similar equipment and service. HELD, complainants should have been

charged the contemporaneous commodity rates on grain or grain products from point of origin or rate basing point to final destination, depending on which commodity moved inbound to the transit point. If both grain and grain products moved inbound in the same shipments, the grain products rate would apply. Past shipments should be adjusted on this basis. HELD, transit rule attacked unreasonable and defendants should establish the same rule as now applicable in central territory, reparation awarded. Eshelman & Sons v. Director General, 118 I. C. C. 441.

(n) Upon contention that inbound rates on logs to mills should be lower than outbound rates on the manufactured articles, because of revenue derived by carriers on outbound products. HELD: This is not necessarily correct as circumstances surrounding inbound movement may warrant a higher rate. See also 89 I. C. C. 47. Liberty Cooperage & Lbr. Co. v. P. R. R., 118 I. C. C. 505, 506.

(o) It would be manifestly impossible to adjust inbound and outbound rates from and to all market points so that combination of rates to any destination would be same through all markets. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 753.

(p) Complainant attacked rates charged on structural and merchant steel, in carloads, shipped since April 17, 1923, from St. Louis, Mo., Chicago, Ill., Indiana Harbor, Ind., Bethlehem, Pa., and points taking same rates to Casper, Illco and Salt Creek, Wyo., when fabricated at Muskogee, Okla., as unreasonable and illegal. Shipments moved over various routes into St. Louis, thence M. K. T., for fabrication. From Muskogee the shipments again moved over M. K. T., some via Wichita Falls and others via Fort Worth, Ft. W. & D. C., C. & S., to Wendover, Wyo., C., B. & Q., to Casper and Illco and N. & S., beyond destined to Salt Creek. Some shipments were delivered to the C. & N. W., at Orin, Wyo. There were no joint rates from origin to destination and combinations were assessed. Transit charges were assessed of 2 cents. The transit tariff provided for application of the joint rate from points of origin to destinations wherever applicable via the transit points. Distance over route of movement through Wichita Falls gateway from St. Louis to Casper was 1,818 miles and over direct routes 1,045 miles. In other words, the distances over the route of movement from St. Louis were about 80% greater than the distances over the direct routes. On shipments originating at Chicago the percentage of circuity is much greater. When the shipments moved there were joint rates from these points of origin to Casper and Illco in connection with the Burlington and Northwestern with the local factor of the N. & S. added, to Salt Creek. These rates were restricted to apply over the Burlington and Northwestern direct, or in connection with these lines at Missouri River crossings, and were not applicable via Muskogee. The rates from Bethlehem over the direct routes were constructed on the St. Louis combination. There were also in effect joint rates from all points of origin to Great Falls, Mont., and Spokane, Wash. The tariff publishing the rates to Great Falls was restricted to apply to destinations in Montana, and also to destinations in Wyoming "when specifically provided in individual rate items." No rates were published therein as applying to Casper, Illco or Salt Creek nor were there points listed in the tariff. There are specific rates to Casper and Illco although not applicable over the route of movement of these shipments, in view of which the Great Falls rate can not be applied to these destinations. Salt Creek is on an independent short line, is not intermediate to Great Falls, and consequently is not subject to the intermediate application rule. Complainant directed the movement of the shipments over routes that were extremely circuitous, involving an out of line haul of 800 miles or more. If the shipments had been forwarded over the direct routes lower rates could have been secured and wasteful transportation been avoided. HELD, rates from Indiana Harbor unlawful to extent they exceeded rates from Chicago; rates from other points of origin not unreasonable, complaint dismissed. Tulsa Rig, Reel & Mfg. Co. v. M. K. T. R. R., 122 I. C. C. 405.

(q) Complainant attacked commodity rate charged on two cars of flour forwarded Nov. 26, 1921 and Jan. 6, 1922 from Anthony, Kans., to Denver, Colo., as unduly prejudicial. Flour was milled in transit at Anthony from wheat originating at Hunnewell, Kans. Entire movement was over Santa Fe, charged

44.5 cents from Hunnewell to Denver. Complainant shows that a rate of 42 cents was contemporaneously applicable on flour, carloads, to Denver from Missouri River territory and southeastern and northern Kansas. Subsequent to the movement the 44.5 cent rate charged and the 42 cent rate instanced were reduced to 36 cents. Aside from the foregoing no evidence of probative value was introduced bearing upon the question of undue prejudice. HELD, rates attacked not unduly prejudicial, complaint dismissed. Kansas Flour Mills Co. v. A., T. & S. F. Ry., 123 I. C. C. 19.

(r) Commodity rate to Denver, Colo., on flour milled in transit at Anthony, from wheat originating at Hunnewell, Kans., found not unduly prejudicial. Aside from the showing of lower rates from other points of origin in Missouri territory and subsequent reduction, no evidence was adduced by complainant. Preference and prejudice under section 3 of the act, to be undue and unlawful, must be such that it is a source of advantage to the party alleged to be favored and disadvantage to the other party, and a competitive relation between the parties must ordinarily exist. Kansas Flous Mills Co. v. A. T. & S. F., 123 I. C. C. 19.

(s) In original report, 98 I. C. C. 619, the assessment of inbound and outbound rates on shipments of cotton from Jonesboro, Pine Prairie, and Mamou, La., compressed at Alexandria, La., and reshipped to New Orleans, was found proper because shipments were not redelivered for outbound movement after compression to same carrier performing the inbound haul in accordance with applicable tariff. Upon further hearing, it being shown that such shipments were so delivered, original report reversed and through rates, less published allowance for compression, found applicable. Reparation awarded. Haas & Co. v. Director General, 123 I. C. C. 121.

(t) Rates on anthracite coal from Lehigh, Schuylkill, and Wyoming regions in Pennsylvania, to complainant's siding within corporate limits of Providence, R. I., found inapplicable. Charges were collected based on rate to Auburn, R. I., a point intermediate to Providence. However, as tariffs did not define the switching limits of Providence or indicate that the Auburn rate applied on shipments delivered on complainant's siding the logical interpretation of tariffs was that the Providence rate applied to all points within corporate limits of that city and was therefore applicable to complainant's shipment. See 63 I. C. C. 392; 73 I. C. C. 143. Refund of overcharges directed. City Coal Co. v. N. Y., N. H. & H., 123 I. C. C. 609.

(u) Charges assessed on wheat, reforwarded under proportional rates from Kansas City, Mo., to various interstate destinations and accorded transit at Leavenworth, Kans., and Sweet Springs, Mo., found applicable and not unreasonable or otherwise unlawful. Under transit tariff, proportional rates applied with transit at points in direct line of shipment, but since movement to Leavenworth necessitated an out-of-line haul, transit at that point and Sweet Springs was not authorized. Moreover, in 91 I. C. C. 58; 100 I. C. C. 303, contention that carrier's tariff authorized protection of proportional rates from Kansas City with transit at Leavenworth and Sweet Springs was not sustained, and record in instant case does not warrant a different conclusion. Moore Lawless Grain Co. v. M. P., 123 I. C. C. 647.

(v) Rates on sulphur from Bryanmound, Tex., refined in transit at Freeport, Tex., thence reforwarded to Fresno, Livny, and Los Angeles, Calif., found unreasonable to extent they exceeded lower rates prescribed in 74 I. C. C. 641, for application on sulphur from Bryanmound and origin points in same general territory to south Pacific coast points when accorded transit at Lake Charles, La. and Texarkana, which rates were subsequently made applicable on traffic accorded transit at Freeport. Reparation awarded. Stauffer Chemical Co. v. H. & B. V., 123 I. C. C. 657.

(w) Complainant alleged that the combination rates charged on numerous cars of grain shipped since Jan. 24, 1923 from west bank Mississippi river points in Iowa and Missouri and from points in Illinois accorded transit at Chicago, and the product forwarded to destinations in central territory were and are unreasonable, unduly prejudicial and unduly preferential. Complainants shipments of grain by-products, consisted mostly of poultry feed and some mixed livestock feed, manufactured by it at Chicago from grain chiefly corn. Fully 99% of this poultry feed is made from the various kinds of grain taking the grain rates, and the remainder from nontransit articles such as sunflower seed, millet seed and

peas. On these inbound and outbound shipments combination rates are charged, made up of the rates on grain to Chicago, and the reshipping or proportional rates on grain products beyond. The Boyd tariff contains a specific statement that "the through rates named in tariff on the commodity forwarded from the transit station" will be applied from points of origin to ultimate destination. It seems to be the practice of western carriers to provide in their tariffs for application of through rates on grain products or by-products where there are no through rates on grain. HELD, failure of C. & N. W. and I. C. to join with the other defendants in according transit at Chicago on the basis of the through by-products rates from points where such rates were in effect did not and does not result in charges which were or are unreasonable or otherwise unlawful. HELD, combination rates attacked on shipments originating at points on the lines of defendants named in the item in the Boyd tariff, from which points one factor through rates on by-products on were in effect, were not applicable; and that the applicable rates on those shipments were the one factor through rates from points of origin to final destination on by-products in effect when the shipment of grain originated. HELD, combination rates attacked not applicable, applicable rates were and are the one factor rates on grain products in effect from the points of origin to the final destinations, effective when shipments of grain originated. Complaint dismissed, defendants to refund overcharges. Arcady Farms Milling Co. v. A. C. & Y. Ry., 126 I. C. C. 449.

(x) Failure of C. & N. W. and Illinois Central railroads to join with other carriers in according transit on grain at Chicago on basis of through by-product rates from west-bank Mississippi River points in Iowa and Missouri and from points in Illinois where such rates were in effect, found not unreasonable or otherwise unlawful in comparison with rates charged competitors located at points from which one-factor through rates on grain products or by-products apply, or with the combination basis of grain rates to Chicago plus grain-products rates beyond. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(y) Grain from west-bank Mississippi River points and from Illinois, mixed into feed at Chicago, and product forwarded to c. f. a. destinations was assessed grain rates to Chicago and proportional or reshipping grain-products rates beyond. Tariff provided that when shipment originated at point from which no joint through rate to final destination applied via the transit point, rates would be the reshipping or proportional rates, except when commodity consisted of grain, in which event rate on out-bound shipment would be that applicable to grain products. Here through grain-products rates but no through by-products rates were published. HELD: Words "no joint through rate" refer to grain products. If carriers intended that the rule refer to through grain rates, tariff should have been so worded. Accordingly through one-factor rates on grain products from origins to final destinations, in effect when the grain originated, were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(z) Shipments of grain from west-bank Mississippi River points and from Illinois, mixed into feed at Chicago, and products forwarded to c. f. a. destinations, were assessed grain rates to Chicago and proportional or reshipping rates on grain products beyond. Tariff provided that "through rates on commodity forwarded from transit station" will be applied from origin to ultimate destination on shipments originating on specified lines. HELD: Since shipments here involved originated on lines named, the one-factor through rates on by-products were applicable. Refund of overcharges directed. Arcady Farms Milling Co. v. A., C. & Y. Ry., 126 I. C. C. 449.

(aa) Fact that carriers' agents issued through bills of lading from origin points to final destinations covering shipments of cotton, and accepted prepayment of freight charges on basis of joint rates in violation of tariff authority which provided for assessing local rates to transit points and through rates beyond, does not afford a basis for finding that applicable rates included cost of compression in transit. McFadden & Bros. Agency v. A. & R. R. R., 126 I. C. C. 519, 522.

(bb) Shipment of oats from Porum, Okla., to Oakland, Calif., there stored and subsequently reconsigned to McCloud, Calif., found to have been improperly billed from the transit point and charges not collected in accordance with complainant's instructions, thereby depriving him of a portion of inbound

rate provided by tariff. Tariff rule provided that if dealer desired consignee to pay rate from transit point to destination, refund of proportion of charges to transit point would be made. Carrier's agent at Oakland was instructed to collect charges from consignee at McCloud on basis of full local rate from Oakland to McCloud. Instead charges were collected on basis of division of the through rate from Porum to McCloud, which was contrary to instructions and served to defeat the rule. Reparation awarded. Albers Bros. Milling Co., v. A., T. & S. F., 128 I. C. C. 53.

(cc) Complainant assailed combination rates charged on beans, carloads, from Clifford, Pigeon, Owendale, Cass City, and Bad Axe, Mich., to Fenton, Mich., there picked and reshipped to various interstate destinations, as unreasonable. Inbound shipments to Fenton moved between Dec. 1922 and Feb. 1924, from stations on the P. O. & N. and D. & H. Charges were assessed on most of the shipments upon the basis of 50% of the local rates to the transit point, Fenton, and the through rates from original shipping points to final destinations. These shipments were overcharged, defendants only contending that the proper basis would have been 50% of the inbound local rates plus the rates from Fenton to final destinations. A finding of unreasonableness can not be made upon the evidence in this case. HELD, charges applicable on basis of 50% of the rates from the original points of shipment to Fenton plus rate on the outbound article from Fenton to the final destinations, refunds ordered, complaint dismissed. Michigan Bean Co., v. D. G. T. & M. Ry., 128 I. C. C. 207.

(dd) Rates on beans, shipped from certain Michigan points to Fenton, Mich., for picking-in-transit, and reshipped to various destinations found not unreasonable, but inapplicable. Applicable transit tariff provided under Rule 4 (a) that if transit point was on direct route, through rates from origin to destination would apply, but under Rule 4 (b) that if transit point was not on direct line, "thereby involving an out-of-route or back-haul movement," charges would be computed on basis of 50 per cent of inbound rate plus outbound rate from transit point to final destination. Fenton was not on direct route as thus defined in tariff, although routes were otherwise unrestricted, and item 4 (b) was applicable. Charges having been erroneously collected on basis of through rates plus 50 per cent of local inbound, refund directed. Michigan Bean Co. v. D., G. H. & M., 128 I. C. C. 207.

(ee) Complainant attacked charges collected on a car of apples shipped June 29, 1925 from Wenatchee, Wash., billed to New York, N. Y. and diverted in transit to Philadelphia, Pa., as inapplicable and unreasonable. A portion of the shipment originated at Wagnersburg, Wash., on Dec. 6, 1924, and moved to Wenatchee where it was stored in transit until June 29, 1925. On that date this portion together with the balance was shipped from Wenatchee to New York. Orders were given to divert the shipment to Philadelphia for B. & O. delivery first at Chicago, Ill., and then at several Ohio points, and if diversion was not effected at Ohio points to divert to the same destination at Jersey City, N. J. Shipment moved to Jersey City and was switched by the Staten Island Rapid Transit to the Reading, which line delivered it at Philadelphia to the B. & O. for movement to Pier 22. Complainant contends that the charge of $72.97 assessed for the movement beyond Jersey City was inapplicable, because the joint commodity rate of $1.50 applied from Wagnersburg to final destination. There was no provision in the applicable tariffs that would have prevented routing of shipment through Jersey City if originally consigned to Philadelphia, and the $1.50 rate would have been applicable. This route was available and, with the meaning of the tariff, the movement from Jersey City to Philadelphia over the lines of parties to the transcontinental tariff is not an out of route movement. HELD, complainant was overcharged $110.17, to be refunded, complaint dismissed. Northwestern Fruit Exchange v. G. N. Ry., 128 I. C. C. 538.

(ff) Charges collected on caterpillar tractors and parts from Stockton, Calif., to Dallas, Tex., based on rate from Stockton to Dallas, plus reconsignment charge at San Antonio and stop-over charge at Houston, where shipment was partially unloaded, found inapplicable. While governing tariff authorized reconsignment at San Antonio, it did not authorize stop-over at Houston, and

movement therefrom must be treated as a reshipment. Refund of overcharges directed. Holt Co., of Texas v. S. P. 128 I. C. C. 555.

(gg) Upon reconsideration, maintenance of combination rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, accorded transit at Ivorydale (Cincinnati), Ohio, higher than joint rates from more distant points over the same route, in the same direction, the shorter being included within the longer distance, when shipments are accorded transit at Latonia or Central Covington, Ky., found to contravene the long-and-short-haul provision of section 4 of the act. See 35 I. C. C. 27, and other cited cases. Moreover, such rates contravene the fourth section notwithstanding fact that such rates are joint rates from points within United States to Canadian destinations. See Conf. Ruling 447; 66 I. C. C. 627, and other cited cases. Former report 112 I. C. C. 381. Procter & Gamble Co. v. A. & V., 129 I. C. C. 385.

(hh) Connecting lines can not dictate to the road that alone serves the transit point the manner in which joint rates through that point shall be applied in conjunction with the transit arrangements, so long as they are not deprived of their long haul. See 83 I. C. C. 18; 83 I. C. C. 60. Transit Arrangement on Lumber, 129 I. C. C. 518, 520.

(ii) Alfalfa meal from Colorado to Dyersburg, Tenn., moved under combination rates via Memphis. Via East St. Louis, factor from that point to Dyersburg accorded transit on alfalfa meal mixed into feed at Dyersburg, except where outbound shipment consisted of more than 30 per cent nontransit materials when local rates would apply to entire shipment. No transit was accorded via Memphis. Upon contention that, as tariff specified alfalfa meal as a "transit ingredient," that regardless of how it reached Dyersburg it should not be considered in computing the 30 per cent of nontransit material in ascertaining whether remainder of outbound shipment is entitled to transit privileges. FOUND: Term "transit ingredient" comprehends only such shipments as may be transited under tariff provisions, and since nontransit material exceeded 30 per cent, meal moving via Memphis was nontransit material. Dyersburg Milling Co. v. Director General, 129 I. C. C. 739.

§19. Retroactive Application.

See Reconsignment.

(a) Reconsignment arrangements can not be applied retroactively. See 83 I. C. C. 388. Providence Fruit & Produce Exchange v. B. & M., 115 I. C. C. 135, 136.

(b) Transit provisions of tariff can not be applied retroactively. Zimmerman v. Director General, 115 I. C. C. 407, 408.

(c) Ordinarily the Commission does not sanction the retroactive application of transit privileges, except upon a showing of unreasonableness or of damage arising out of undue prejudice or discrimination. But this rule does not necessarily govern cases where the nonapplication of an existing transit arrangement arises from some restriction in connection with the line haul rates. In such cases the Commission has frequently found the applicable combinations of rates on transit points unreasonable to the extent that they exceeded lower bases contemporaneously in effect on other traffic or subsequently established. Decker & Sons Co. v. C. & N. W. Ry., 126 I. C. C. 551, 553.

(d) Ordinarily the retroactive application of transit privileges is not sanctioned by the commission except upon showing of unreasonableness or of damage arising out of undue prejudice or discrimination. See 39 I. C. C. 337. But this rule does not necessarily govern cases where the nonapplication of an existing transit arrangement arises from some restriction in connection with the line-haul rates. In such cases commission has found the applicable combinations of rates on transit points unreasonable to extent they exceeded lower bases contemporaneously in effect on other traffic or subsequently established. Decker & Sons v. C. & N. W. Ry., 126 I. C. C. 551, 553.

§20. Substitution of Tonnage.

See Substitution of Tonnage.

(a) Complainant alleged that the ratio of 3 pounds of logs inbound to 1 pound outbound of lumber manufactured from the logs, and the local rates on logs, in carloads, to Dreyfus, Miss., resulting from the application of that ratio were unreasonable and unduly prejudicial. Dreyfus is 2.5 miles from

Hattiesburg, Miss., and is served by the Miss. Cent. and G. & S. I. Defendant maintains an arrangement at mills on its line under which for each pound of lumber shipped outbound over its line during the year in which the logs are received, 3 pounds of logs inbound over its line are given the benefit of a transit rate to the mill which is lower than the local rate. The tariff publishing that arrangement contains a provision that where a shipper gives a satisfactory bond he may pay the transit rate in the first distance. In the absence of a bond the local rate must be paid, in which event the defendant refunds the difference between that rate and the transit rate on logs entitled to the latter. Complainant had furnished the necessary bond and paid the transit rate on its shipments. No evidence was presented in support of the allegation of undue prejudice and none was presented as to the reasonableness of the local rates to Dreyfus. HELD, ratio attacked and rates not unreasonable or unduly prejudicial as applied to interstate commerce, complaint dismissed. Brookhaven Lumber & Mfg. Co. v. M. C. R. R., 132 I. C. C. 241.

IV. DISCRIMINATION.

See Supra §15; Discrimination; Passenger Fares and Facilities III, §9.

§21. In General.

(a) Through charges on blackstrap molasses from New Orleans and points taking same rates to Cincinnati, there converted into denatured alcohol, and reshipped as such to interstate destinations, found not unduly prejudicial or otherwise unlawful as compared with through rates contemporaneously maintained from same points to and from Pekin, Ill. Transit arrangements are maintained at Pekin but not at Cincinnati, and since carrier which serves Pekin does not serve Cincinnati it is powerless to remove alleged undue prejudice by establishment of a similar arrangement at latter point. Federal Products Co. v. I. C. R. R., 107 I. C. C. 271.

(b) A line which participates in a joint rate is not guilty of undue prejudice in failing to accord transit service at a point on its line merely because another carrier party to same joint rate does accord transit service. See 257 U. S. 247. Federal Products Co. v. I. C. R. R., 107 I. C. C. 271, 275.

(c) It is proper to find a violation of the second or third section of the act where trunk lines unlawfully discriminate in their practices toward different industries, but an adverse finding under section 1 should not rest upon an artificial ground. Pressed Steel Car Co. v. Director General, 109 I. C. C. 75, 78.

(d) A carrier can not be charged with undue prejudice because of conditions not within its control. Transit Privileges on Grain, 113 I. C. C. 374.

(e) Following 88 I. C. C. 99, refusal of carriers to accord north Pacific terminal rates on grain and products from points in transcontinental Groups F and G and other points east of Pasco and Spokane, Wash., to destinations north of Centralia, to and including Seattle, Tacoma, and Everett, Wash., with milling and cleaning in transit at Portland, Oreg., while according such arrangements at Puget Sound milling points on shipments from said points of origin destined to Portland, found unduly prejudicial to Portand and preferential of competitors on Puget Sound. Crown Mills v. N. P. Ry., 115 I. C. C. 15.

(f) Proposed charges, in addition to through rate and transit charge, for out-of-line hauls on iron and steel articles fabricated in transit at Parkersburg, W. Va., found not justified. While, as a general rule, the assessment of charges for out-of-line or excess hauls is proper and consistent with principle that carriers should be compensated for services rendered, proposal to apply additional charges at Parkersburg, while waiving such charges at other fabricating points on lines of carrier, from which points, in many instances, like articles may be reshipped via Parkersburg to final destination under open routes in tariffs, would result in undue prejudice to Parkersburg. Transit on Iron and Steel, 115 I. C. C. 381.

(g) Maintenance of penalty charge for out-of-line haul on grain from points on A., T. & S. F., milled in transit at Dallas, Tex., and destined to points north or west of Fort Worth, while failing to exact such charges on similar traffic at Fort Worth, found not unreasonable or unduly prejudicial. The out-of-line haul when traffic moves through Dallas is substantially greater than distance through Fort Worth, the penalty charge here as-

sailed not being shown unreasonable for extra service performed. Moreover, failure of other carriers to maintain similar penalty charges at Dallas does not establish unlawfulness of those here assailed. Pearlstone Mill & Elevator Co. v. A., T. & S. F., 115 I. C. C. 551.

(h) Upon investigation by the commission on its own motion, FOUND: That through use of its right of way, tracks, and other facilities, in furnishing transportation and car service to the Bromide Crushed Rock Co., and refusing similar service and enjoyment of these or similar facilities to Dolese Bros., upon request, both these companies being located in vicinity of Bromide, Okla., the Kansas, Oklahoma & Gulf Ry. Co., subjects latter company to undue prejudice and gives to former an undue preference, in violation of section 3 of the act. Service on K., O. & G. Ry., 118 I. C. C. 412.

(i) Finding of undue prejudice can not be made merely because a point served by one carrier does not receive the same transit privileges as another point served by other and different carriers; nor can it be said that existence of transit at a point on a direct route and absence of transit at another point on a circuitous route results in undue prejudice to the latter point. Jackson Traffic Bureau v. A. & V., 122 I. C. C. 387, 390, 391.

(j) Transit charge maintained at New York points in trunk-line territory on ex-lake traffic, in connection with so-called f. o. b. rates on grain and products from Erie, Pa., and Buffalo and Oswego, N. Y., to eastern destinations, found not unreasonable, but unjustly discriminatory and unduly prejudicial in favor of millers, dealers, and elevator companies handling ex-lake grain from c. f. a. territory ports and of all-rail grain traffic from points in c. f. a. and trunk-line territories. Birkett Mills v. D., L. & W., 123 I. C. C. 63.

(k) A transit charge is a local charge for which carrier establishing it is alone responsible. See 257 U. S. 247. Different transit charges for same service at same points by same carriers, constitute unjust discrimination under section 2 of the act. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 65.

(l) Refusal of carriers to pay interest on complainant's investment in a privately owned or plant-facility track does not constitute a violation of the act. No such interest is paid to owners of other private lines in same district, and fact that carriers have purchased and now own certain branch lines which formerly had a similar status is not sufficient to bring this phase of the complaint within the purview of the laws administered by commission. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 113.

(m) Upon rehearing, relationship between interstate rates on cotton for city deliveries and ship-side deliveries at Texas and Louisiana ports, found unduly preferential of warehouses and compresses located on the water front at such ports, and shippers using such facilities, and unduly prejudicial to warehouses and compresses located at interior points and back from the water front at the ports, and shippers using such facilities. Basis for equalizing city-delivery and ship-side rates prescribed. Prior reports 77 I. C. C. 388; 100 I. C. C. 159. Rates on Cotton to Gulf Ports, 123 I. C. C. 685.

(n) Refusal of carriers to permit blending in transit of petroleum products at interior Texas refining points while permitting such blending in transit at Texas and Louisiana port refineries under appropriate tariff rule, found not unduly prejudicial. Although the rule is designated as blending-in-transit provision and is applicable to shipments in transit to an export of coastwise destination, shipment upon which it applies has in fact reached its destination, so far as rail carrier is concerned, upon delivery to coastal refiner. While blending rule is necessary in order to insure protection of export or coastwise rate, which protection appears proper because service preformed in delivering to storage tank at ports is no greater than when delivered direct to vessels, such a transit arrangement at interior point would involve two separate and distinct movements, there is no necessity therefor such as exists at the ports, and it would in effect require carriers to perform inbound haul without charge. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 396, 398.

(o) In justifying its rates carrier contended that in order to reach its own pier it must use tracks of another line and in return for that user is required to maintain transshipment rates

to piers on that line not accorded to piers on another line. FOUND: While this explains it does not excuse difference in treatment, because preference and prejudice as between deliveries to piers on both lines under like and similar circumstances of transportation are not rendered the less "undue" in so far as a complainant's right to equality of treatment is concerned, by proof of fact that with one of those lines there exists a contractual relation or condition of barter and trade which is absent as to the other. See 272 U. S. 658, 664, 665. Harbor Coaling Corp. v. B. & O., 128 I. C. C. 747, 750, 751.

(p) Complainant alleged commodity rates on lead smelter products, in carloads, shipped since March 15, 1924, from Bradley and Kellogg, Ida., to Atlantic seaboard territory are unduly prejudicial. Complainants shipments consist of refined lead in marketable form, whereas from the other lead smelters the product, in the form of lead bullion, must be shipped elsewhere for refining before it can be marketed. In the making of rates defendants do not distinguish between the products of the smelter and those of the refinery. Nor is it customary to make any distinction between the various metals composing the list of smelter prdoucts, viz., copper, lead and zinc. Competition in the marketing of smelter products is exceedingly keen, the difference of a fraction of a cent per pound frequently being sufficient to divert a sale. HELD, the maintenance of rates on lead smelter products, in carloads, from Bradley and Kellogg to Atlantic seaboard territory higher than those applied on similar products from East Helena, Mont., and Utah lead smelting points to the same territory unduly perferentialy of East Helena and Utah smelting points and unduly prejudicial to Bradley and Kellogg, reparation denied. Bunker Hill & Sullivan Co. v. O. W. R. R. & N., 132 I. C. C. 266.

(q) Combination rates on cottonseed cake and meal from points in the Southwest and Mississippi Valley to York and Lancaster, Pa., and Buffalo, N. Y., there mixed in transit and product feed forwarded to trunk-line and New England destinations, found unreasonable and unduly prejudicial to extent they exceeded the contemporaneous joint rates from same origin territory to basing points with which destinations named are usually grouped. While rates assailed to c. f. a. destinations are not on proper basis record is inadequate to make finding as to their reasonableness, partly due to fact that no basing points have been established in connection with cake and meal to that territory and further that existing joint commodity rates were published to destinations to which there was a known movement. Reparation awarded. American Feed Mfrs. Asso. v. A. &. S., 129 I. C. C. 157.

(r) Following 118 I. C. C. 441, transit rules, regulations, and practices as applied to shipments of cottonseed cake and meal from points in the Southwest and Mississippi Valley to York and Lancaster, Pa., and Buffalo, N. Y., there mixed into feed and the feed forwarded to c. f. a., trunk-line, and New England destinations found unreasonable and unduly prejudicial to extent that charges thereunder exceeded those which would have accrued from application of transit rules contemporaneously in effect at Chicago and subsequently published in above-cited case for application at York and Lancaster. Reparation awarded. American Feed Mfrs. Asso. v. A. & S., 129 I. C. C. 157.

VI. CHARGES.

See Reasonableness of Rates.

§23. In General.

(a) Complainant alleged a policing charge of $25 per car and assessed on two cars of nonbeverage alcohol and 23 cars of denatured and wood alcohol shipped from various points to Chicago between July 31 and Nov. 25, 1922 were unreasonable. A charge of $25 was published to apply at point of origin and a charge in the same amount at point of destination, applicable to shipments of intoxicating liquors and alcohol, other than denatured and wood alcohol, on the rails of defendant. Defendant concedes that the charge as published in that tariff was not at any time applicable on denatured and wood alcohol. This leaves for consideration the question of the reasonableness of the charge as applied on ethyl alcohol. Application of the charge has been justified. HELD, charge attacked not applicable on denatured and wood alcohol, reparation awarded. Charge on ethyl alcohol not unreasonable. U. S. Industrial Alcohol v. C. & N. W. Ry., 118 I. C. C. 674.

FERRY CARS AND CHARGES

See Allowanes §12 (2) (a); Trap Cars.

(a) A town cannot grant an exclusive franchise to operate a ferry from such town to point in other state, in view of effect on interstate commerce. McNeely v. Mayor and Board of Aldermen of Town of Vidalia, 6 Fed. (2d) 21.

(b) Where ferry operator had used certain point within town as landing place for more than 20 years and had acquired riparian rights under the state law, the town could not exclude his right to use of such frontage for such purpose by granting to another the right to operate ferry at such point with restriction on the right of the others to approach nearer than 150 feet thereto. McNeely v. Mayor and Board of Aldermen of Town of Vidalia, 6 Fed. (2d) 21.

(c) While a town has the right ordinarily to police its river front and to adopt such regulations as are in accord with safety in assigning landing places for those engaged in operation of interstate ferries, it has not the right to discriminate and put a ferry operator out of business. McNeely v. Mayor and Board of Aldermen of Town of Vidalia, 6 Fed. (2d) 21.

(d) Ordinarily, municipal corporation within boundaries of which ferries are to operate have power to fix a status for the continued operation of ferries, and courts should not interfere with the exercise of such power except in cases of unfair discrimination or abuse of power. McNeely v. Mayor and Board of Aldermen of Town of Vidalia, 6 Fed. (2d) 21.

(e) Ferry operator, who had used certain frontage as landing place for more than 20 years and had acquired riparian rights therein, HELD entitled to relief against action of town in granting exclusive right to use such particular frontage for such purpose to other operator despite exhorbitant charges previously exacted from public. McNeely v. Mayor and Board of Aldermen of Town of Vidalia, 6 Fed. (2d) 21, 22.

(f) Village ordinance, exacting license fee for operation of ferry across river from one state to another on penalty of prosecution and fine for failure to procure license, HELD invalid as putting unreasonable burden on interstate commerce, in violation of commerce clause of federal constitution. Scott v. Village of Thebes, Ill., 17 Fed. (2d) 410.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) Fact that a State commission has declared in a proceeding commenced subsequent to termination of so-called guaranty period following Federal control that certain intrastate rates collected during that period were unreasonable, and that commission is asked merely to approve that finding, does not enlarge limited jurisdiction conferred upon it by section 208 (a) of the transportation act, 1920, to review rates reduced by State commissions prior to termination of guaranty period, since commission's direct jurisdiction over reductions in intrastate rates was limited to action taken prior to such period. Under no provisions of transportation act or of interstate commerce act is commission given authority to review and approve a finding of

a State commission made subsequent to said period, and to order award of reparation based thereon. Armour & Co. v. G. N., 104 I. C. C. 34, 36.

(b) The provision in section 15a directing commission to initiate, modify, establish, or adjust rates so that carriers may earn a fair return, does not relieve carriers from the primary duty of initiating rates. That function belongs to management and not to regulation. It is the right and duty of carriers to take steps necessary to correct improper rate relations as they may be found to exist, and to supply revenue deficiences by initiating suitable rates. Revenues in Western District, 113 I. C. C. 3, 38.

(c) Under the Interstate Commerce Act, §5, pars. 2, 8, and Transportation Act 1920, §§407, 408, Interstate Commerce Commission alone has power preliminarily to authorize leases of railroad lines between railroads engaged in interstate commerce, and, until it has acted on application or such a lease, courts are without jurisdiction to determine the issues thus presented to Commission. State of Louisiana v. Morgan's Loiusiana & T. R. & S. S. Co., 18 Fed. (2d) 645. Same v. Franklin & A. Ry. Co., 18 Fed. (2d) 645. Same v. Lake Charles & N. R. Co., 18 Fed. (2d) 645. State of Louisiana v. Louisiana Western R. Co., 18 Fed. (2d) 645.

(d) A state court has no jurisdiction of suit to restrain one railway from building certain road and another from acquiring it where Interstate Commerce Commission authorized such acts, state court being without jurisdiction to entertain suits to annul orders of Commission, even though they are permissive and not mandatory. People v. Illinois Cent. R. Co., (Ill., 1927) 155 N. E. 841.

III. EXTENSION, ACQUISITION, OR CONSOLIDATION.

See Consolidation of Carriers.

§3. In General.

(a) Interstate Commerce Act, § 1, pars. 18, 21, as amended by Transportation Act 1920, § 402 (U. S. Comp. St. § 8563), prohibiting railroad carriers subject to the act from extending their lines or constructing new lines without first obtaining certificate of public convenience and necessity from Interstate Commerce Commission, and relating to car service facilities, HELD not to affect right of Transit Commission to order elimination of grade crossings for safety of public under Railroad Law N. Y. §§ 91 (as amended by Laws N. Y. 1921, c. 698, § 2), 94, 95, Const. N. Y. art. 7, § 14, and Laws N. Y. 1926, c. 510, §§ 1, 3. Bay St. Crossing of Staten Island Rapid Transit Ry. Co. 221 N. Y. S. 129. Bilair Road Crossing of Staten Island Rapid Transit Ry. Co. 221 N. Y. S. 129.

(b) Congress' power to regulate interstate commerce, given by Const. U. S. art. 1, § 8, cl. 3, extends to rates, issuance of securities, control of one railroad by another and construction and extension of new lines, and under it franchises may be granted to railroad additional to those enjoyed under charter. People v. Illinois Cent. R. Co., (Ill., 1927) 155 N. E. 841.

(c) Railroads may build and acquire road running between points in two states after Interstate Commerce Commission found that public convenience and necessity required it, without seeking further authority, in view of Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.). People v. Illinois Cent. R. Co., (Ill., 1927) 155 N. E. 841.

(d) Carrier does not admit new tracks constitute extension by applying for certificate of public convenience and necessity. Texas & P. Ry. Co. v. Gulf, C. & S. F. Ry. Co., 46 Sup. Ct. 263.

(e) Party in interest, opposed to railroad's construction of new tracks, is not authorized to initiate proceedings before Interstate Commerce Commission concerning project. Texas & P. Ry. Co. v. Gulf, C. & S. F. Ry. Co., 46 Sup. Ct. 263.

(f) Railroad, protesting to both state and federal commission on learning of competing railroad's construction of an alleged extension without the certificate of public convenience and necessity required by Transportation Act Feb. 28, 1920, §402, par. 18 (Comp. St. Ann. Supp. 1923, § 8563), and which later before construction contract was let, instituted injunction suit under paragraph 20, HELD not guilty of laches, barring relief. Texas & P. Ry. Co. v. Gulf, C. & S. F. Ry. Co., 46 Sup. Ct. 263.

(g) Railroad line 7½ miles long, built from point on main line to serve an industrial district already adequately served, but not theretofore reached by lines of that company, HELD an "exten-

sion" of its line, within Transportation Act Feb. 28, 1920, § 402, par. 18 (Comp. St. Ann. Supp. 1923, § 8563), construction of which without a certificate of public convenience was prohibited, rather than an industrial track, within paragraph 22, though service to be rendered was that ordinarily rendered by industrial or spur tracks. Texas & P. Ry. Co. v. Gulf, C. & S. F. Ry. Co., 46 Sup. Ct. 263.

IV. ABANDONMENT OF SERVICE.

§4. In General.

(a) Upon investigation by commission on its own motion into and concerning a proposal of the Northern Pacific Ry. Co., to discontinue daily mixed-train service on a branch line extending between Beach, N. Dak., and Ollie, Mont., and to establish in lieu thereof a triweekly service, HELD: That the commission has authority to regulate supply of trains for transportation of property; that revenues derived from the line are not sufficient to defray expense of present service; and that the proposed curtailment in service will result in substantial savings, will furnish adequate service to the communities served, and can be made effective without impairing service rendered to an extent that will be unjust or unreasonable. Train Service on Northern Pacific, 112 I. C. C. 191.

(b) Where a railroad can show that its life is dependent upon a particular source of traffic and that it must be abandoned once that source is exhausted, and that such exhaustion can be predicated with a reasonable degree of accuracy, then entire property of that railroad may be classed as depreciable. Depreciation due to this particular factor, however, should be handled through a special amortization account rather than through the depreciation reserve, and equipment which is movable, and upon abandonment of a particular railroad can be used elsewhere, should be excluded from this treatment. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 366, 367.

(c) Under Interstate Commerce Act § 1, par. 18-20, as amended by Transportation act 1920, § 402 (Comp. St. Ann. Supp. 1923, §8563), authority to issue certificate authorizing abandonment of branch line located wholly within state is not conditioned on a finding that operation will prejudice interstate or foreign commerce, or that railroad will be prevented from earning fair return on its properties as a whole, or that entire intrastate business in state involved will not earn a fair return on property used therein; sole test being whether abandonment is consistent with public necessity and convenience. State of Colorado v. United States, 46 Sup. Ct. 452.

(d) Under Interstate Commerce Act, § 1, pars. 18-20, as amended by Transportation Act 1920, § 402 (Comp. St. Ann. Supp. 1923, § 8563), Interstate Commerce Commission has power to authorize railroad chartered by a state and engaged in both interstate and intrastate commerce to abandon a branch line located wholly within state, which cannot be operated, except at loss. State of Colorado v. United States, 46 Sup. Ct. 452.

V. STOCKS AND CAPITAL ISSUES.

§5. In General.

(a) Unquestionably railroad stockholders should give close attention and study to all questions of management of policy for which their ratification is asked, but even in such matters they must, of necessity, place great reliance in the judgement of their elected officials who are in closer touch with the railroad's problems. Denver & Rio Grande Investigation, 113 I. C. C. 75, 157.

(b) Unfair treatment of railroad in the conduct of its affairs by majority stockholder held not shown in minority stockholder's action, either by agreement against increase of stock before payment of secured debt, or by having it join in guaranty of third company's bonds, or in division of business. Continental Securities Co. v. Michigan Central R. Co., 16 Fed. (2d) 378.

VI. GOVERNMENT GUARANTY AND RECAPTURE.

See Interstate Commerce Commission §9½.

§6. In General.

(a) Upon contention that commission is without jurisdiction to require an adjustment of divisions on past shipments because one-half of the carrier's excess income for some years having been recaptured under section 15a, the earnings on value of railway property held for and used in service of transportation for those years have been "established

by law;" and that excess earnings for other years are being held in abeyance to be recovered by and paid to proper authority whenever net railway operating incomes based upon value of property, have been finally determined. FOUND: Contentions are not well founded, recapture payments having been the result of tentative computations based upon carrier's figures and not upon a finding by commission. Divisions Received by B. R. R. & C. Co., 104 I. C. C. 415, 434.

(b) The act specifically provides that rate of return determined by commission to be fair "shall be uniform for all rate groups or territories which may be designated by the commission." Paragraph (3) of section 15a. Before the commission changes its findings as to the fair rate of return, general announcement should be given of the intention to consider that subject at hearings. Revenues in Western District, 113 I. C. C. 3, 19.

(c) If carriers in certain portions of any rate group designated under section 15a of the act are in a more prosperous condition than those in remainder, this fact may be considered in determining relative levels in different portions of same rate group. Revenues in Western District, 113 I. C. C. 3, 27.

(d) The commission is required under section 15a of the act only to adjust rates by groups to produce as nearly as may be a fair return for carriers as a whole in such rate groups. But it is evident that the principal purpose of that section was to afford the public adequate transportation service, and this end would clearly not be as adequately served by general increases throughout such a large rate group as the western district, applying alike to weak and strong lines, as by increases confined so far as possible to areas where rates appear to be on the lowest level and where the weakest roads are located. Revenues in Western District, 113 I. C. C. 3, 29, 30.

(e) The need for depreciation accounting is emphasized by provisions of section 15a of the act relative to recapture by the Government of excess income and by existing situation with respect to public regulation of both steam railroad and telephone companies. Telephone and Railroad Depreciation Charges, 118 I. C. C. 295, 318, 319.

(f) "Transportation Act, § 208 (a) being U. S. Comp. St. Ann. Supp. 1923, § 10071¼d, providing that all rates in effect February 29, 1920, on lines of carriers subject to the Interstate Commerce Act, shall continue in force and effect until changed by state or federal authority, respectively; prior to September 1, 1920, no such rate * * * shall be reduced, * * * unless such reduction is approved by the Interstate Commerce Commission —does not require prior conditional approval by Interstate Commerce Commission to enable the Corporation Commission to entertain a complaint of an intrastate rate during the six months' guaranty period ending September 1, 1920, but the federal commission acts as a reviewing body on the determination by the state commission, and must approve it to make it effective." Missouri, K. & T. Ry. Co. v. Dewey Portland Cement Co., (Okla., 1925) 242 Pac. 257.

(g) Section 208(a) of the Transportation Act (U. S. Comp. St. Ann. Supp. 1923, § 10071¼d) gives the state authority to propose or initiate a reduced rate on intrastate shipments during the guaranty period, but all such changes before becoming effective are subject to review by the Interstate Commerce Commission, and, unless the same are approved by such commission, are invalid. Missouri, K. & T. Ry. Co. v. Dewey Portland Cement Co., (Okla., 1925) 242 Pac. 257.

(h) The act of Congress of February 28, 1920, known as Transportation Act 1920, created a "guaranty period" of six months from February 29th, during which time the states were prohibited by commission orders, or other legislative methods, from changing or affecting any "rates, fares and charges," "classifications, regulations and practices," or determining "the value of the service rendered" by any carrier subject to the Interstate Commerce Act, except with the approval of the Interstate Commerce Commission. But this prohibition did not preclude the exercise of judicial power by the state in determining which of two effective rates was applicable during the "guaranty period" for a particular service within the state. St. Louis & S. F. Ry. Co. v. State, (Okla., 1926) 244 Pac. 440.

§7. Return on Investment.

(a) The act specifically provides that rate of return determined by commission

to be fair "shall be uniform for all rate groups or territories which may be designated by the commission." Paragraph (3) of section 15a. Before the commission changes its finding as to the fair rate of return, general announcement should be given of the intention to consider that subject at hearings. Revenues in Western District, 113 I. C. C. 3, 19.

(b) Speaking generally, rate groups under section 15a should be designated having two tests in mind, (a) the practicability of determining the rate of return of the carriers constituting the group, and (b) the suitability of the territory for grouping for rate-making purposes. Revenues in Western District, 113 I. C. C. 3, 26.

(c) The commission is required under section 15a of the act only to adjust rates by rate groups to produce as nearly as may be a fair return for carriers as a whole in such rate groups. But it is evident that the principal purpose of that section was to afford the public adequate transportation service, and this end would clearly not be as adequately served by general increases throughout such a large rate group as the western district applying alike to weak and strong lines, as by increases confined so far as possible to areas where rates appear to be on the level and where the weakest roads are located. Revenues in Western District, 113 I. C. C. 3, 29, 30.

(d) Rates of return on capital investment based on current selling values of land and improvements cannot be compared with rates of return on book value or some smaller value used in stating railroad net earnings. Revenues in Western District, 113 I. C. C. 3, 33.

(e) The provision in section 15a directing commission to initiate, modify, establish, or adjust rates so that carriers may earn a fair return, does not relieve carriers from the primary duty of initiating rates. That function belongs to management and not to regulation. It is the right and duty of carriers to take steps necessary to correct improper rate relations as they may be found to exist, and to supply revenue deficiences by initiating suitable rates. Revenues in Western District, 113 I. C. C. 3, 38.

(f) A showing that one carrier is earning less than what the commission has fixed under section 15a of the act as a fair return to carriers as a whole with which it is grouped for rate-making purposes, is entitled to little or no weight in determining propriety of the rate level on two commodities. Various Commodities between New England Points, 113 I. C. C. 44, 47.

VII. PHYSICAL VALUATION.

See Physical Valuation.

§8. In General.

(a) In its reproduction estimates the commission applies unit prices based on a 5-year, and in some cases, 10-year span, ending June 30, 1914. Lake Superior & Ishpeming Ry., 116 I. C. C. 1, 8.

(b) Under paragraph (1) of section 19a of the act the commission is required to receive and consider evidence in support of protests before its tentative valuations are made final, but the act does not contemplate that the commission should require evidence in support of its tentative conclusions, and certainly not prior to submission by a protestant of evidence tending to show that its conclusions are erroneous. Delaware & Hudson Co., 116 I. C. C. 611, 613.

(c) Relying upon decision in 266 U. S. 438, carriers contended that the burden of proof and proceeding with evidence on protest to a tentative valuation is upon the commission. HELD: Hearing on protest is a proceeding preliminary to issuance of a final valuation, and is for purpose of affording protestants opportunity to bring to commission's attention facts or circumstances which they deem warrant a modification of the tentative valuation. Parties to valuation cases are permitted to inspect, in advance of hearings, the preliminary data upon which conclusions in tentative valuations are founded, but which on account of their bulk are not embraced in the tentative report, and are thus afforded a fair and reasonable opportunity to prepare themselves to point out at hearings any errors which may exist. Tentative valuations represent the commission's tentative conclusions and are subject to modification upon proper proof of error by carriers or other interested parties. Delaware & Hudson Co., 116 I. C. C. 611, 612, 613.

(d) Under Interstate Commerce Act, § 19a, as added by Act March 1, 1913, and amended by Act June 7, 1922 (Comp. St. Ann. Supp. 1923, § 8591), providing for valuation by Interstate Commerce

Commission of property of carriers as of June 30, 1914, and in view of section 15a, par. 4, as added by Act Feb. 28 1920, § 422 (Comp. St. Ann. Supp. 1923, § 8583a), declaring that for "rate-making purposes" Commission shall give due consideration to all elements of value recognized by the law of the land, Commission errs when, in making valuation, it proceeds on theory that railroad property has more than one kind of value, and where from Commission's report and final valuation, made after considering new evidence introduced in suit to set aside a prior valuation and certified to it by court, as required by statute, it is obvious that it has given no effect to such evidence, but has arrived at a valuation greatly less than true actual value of property, injunction should issue against enforcement of order. Los Angeles & S. L. R. Co. v. United States, (Interstate Commerce Commission Intervenors), 8 Fed. (2d) 747.

VIII. FINANCIAL OPERATION.

§9. In General.

(a) On July 11, 1921 the commission instituted on its own motion a proceeding of inquiry and investigation into and concerning the history, financial operations, accounts, and practices of the Western Pacific Ry. Co., Denver & Rio Grande R. R. Co., Western Pacific Railroad Co., and Denver & Rio Grande Western Ry Co., their respective relations with one another, and any and all other matters pertaining thereto. The proceeding was for the purpose of determining the manner and method in which the business of these companies had or was being conducted, with a view to the making of a report and such order or orders as might be proper in connection with their accounts and practices and the issuance by them of securities. The record discloses no evidence that the insolvencies of the W. P., and New Denver were brought about for the personal profit of the officials of those companies or of the bankers. Such co-operation as was given to the trustee by the New Denver in the California proceeding for the foreclosure of the W. P., mortgage was obviously induced by its desire to avoid adjudication of its own contract obligations in that suit. Furthermore the prior foreclosure of W. P. properties was necessary to and a part of the defense that was to be offered in the New York suit in avoidance of the New Denver's contract obligations. This investigation has not disclosed any ground which the New Denver could have pleaded with any probability of success in avoidance of its contract obligations other than those urged by its counsel in the New York damage suit. The essential facts developed by the investigation may be summarized as follows: The New Denver, successor to the Denver Companies, was committed by its officials to an undertaking beyond its financial strength; the resulting demands over a period of years exhausted its financial and physical vitality; facing insolvency, it made determined and prolonged, but unsuccessful, attempts through negotiations with its creditors and in court proceedings to evade the obligations to which it had been committed. In so far as the commission is concerned with the efforts of New Denver officials to relieve their company of its contract obligations, it may be definitely stated that these efforts were clearly directed toward the protection of the interests of the company's security holders. In fact, the only moral justification for the various means used by these officials in their attempt to free the company from its obligations is that, in the positions of trust occupied by them with relation to such security holders, they deemed it their duty to use all means available to avert the company's pending disaster. The initial action by which the New Denver was committed to an unsound speculation, undertaken to provide a Pacific coast outlet for a large railroad system of which the New Denver was a minor unit, is the action for which the company's officials may be justly criticized. That committment caused the diversion to the support of another railroad of many millions of dollars which normally would have been used for the improvement of the New Denver's own service and for the maintenance of a sound financial position. Deprived of an efficient and modern railroad service, the agricultural and industrial growth of the country tributary to New Denver lines was retarded, and entire communities were thereby subjected to heavy losses. Finally the obligations under that commitment brought about the New Denver's insolvency and the resulting enormous losses to its security holders. Without in any way intending to minimize the losses to the communities served by the New Denver caused by the inadequate service furnished them, it must be emphasized that the chief sufferers from

the speculative undertaking to which the New Denver was committed are its security holders. Each step taken by the trustee to enforce the rights of Western Pacific first mortgage bondholders, whether taken against the Western Pacific, whose stock was chiefly owned by the New Denver, or taken directly against the New Denver, tended to deplete the assets of the New Denver. The fact that these disastrous happenings are directly attributable to a single inequitable and economically wrong committment forcefully illustrates the need which existed for the above mentioned new provisions of the interstate commerce act directed to the curtailment of opportunities for the making of such wasteful committments. Denver & Rio Grande Investigation, 113 I. C. C. 75.

(b) Investigation instituted by commission on its own motion into and concerning the history, financial operations, accounts, and practices of the Western Pacific Ry. Co., Denver & Rio Grande R. R. Co., Western Pacific R. R. Co., and the Denver & Rio Grande Western Ry. Co., and their respective relations with one another, for purpose of determining the manner and method in which the business of these companies had been or was being conducted, with a view to the making of findings as might be proper in connection with their accounts and practices and the issuance by them of securities. Denver & Rio Grande Investigation, 113 I. C. C. 75.

(c) Unquestionably railroad stockholders should give close attention and study to all questions of management of policy for which their ratification is asked, but even in such matters they must, of necessity, place great reliance in the judgement of their elected officials who are in close touch with the railroad's problems. Denver & Rio Grande Investigation, 113 I. C. C. 75, 157.

(d) The opportunities for bringing about inequitable situations formerly possible within a railroad system controlled through interlocking directorates have been materially lessened by new provisions of the interstate commerce act under which same individual may not be an officer or director of more than one railroad without commission's consent and whereby railroads are required to obtain commission's authority before undertaking construction or acquisition of additional lines and before issuing securities or assuming obligation in respect of securities of other corporations or persons. Denver & Rio Grande Investigation, 113 I. C. C. 75, 158.

IX. ACTIONS AT LAW.

See Actions at Law.

§10. In General.

(a) Suit to enjoin enforcement and set aside in part order of Interstate Commerce Commission authorizing abandonment of operation in intrastate traffic is appropriate remedy. State of Colorado v. United States, 46 Sup. Ct. 452.

FLOATAGE

See Car Ferry; Lighterage; Towage.

(a) In Hulsey Bessent Co., v. Pennsylvania R. R., 112 I. C. C. 317, Commission found rates on potatoes, carloads, to Jacksonville, Fla., unreasonable to extent they exceeded 63c, plus 4.5c per package, from Capeville, Va., and 63c from Pocomoke, Md., and certain points in Virginia and awarded reparation. In Nooney & Co., v. Pennsylvania R. R., 115 I. C. C. 547, Commission found the minimum of 36,000 pounds, applicable on potatoes, not unreasonable, unjustly discriminatory or unduly prejudicial and that the rates were and would be unreasonable to extent they exceeded 55c, and awarded reparation. The transportation of all the shipments involved a 36 mile float service from Cape Charles to Norfolk across Chesapeake Bay and Hampton Roads. HELD, on reconsideration rates assailed were, are, and for future will be unreasonable to extent they exceed 55c per 100 pounds plus 4.5c per package from Capeville and 55c from the other origin points, reparation awarded. Nooney & Co. v. Pennsylvania R. R., 132 I. C. C. 405.

I. CONTROL AND REGULATION.

See Control and Regulatoin.

§½. In General.

(a) Act Pa. July 17, 1919 (P. L. 1003), freight is made from foreign country into United States, payments thereon are controlled by law of place where contract is to be performed, and any question with relation to character of money in which payments are to be made, if not specified must be in currency of country where contract is to be fulfilled, regardless of fact that contract was entered into in foreign country. New York & Pennsylvania Co. v. Davis, Director General of Railroads, 8 Fed. (2d) 662.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Contention that commission is without jurisdiction over shipments of commodities arriving from foreign ports and stored at ports of entry to await shipment to interior points located within same State as port of entry on ground that transportation is intrastate, not sustained. Temporary storage at ports does not divest such traffic of its foreign character acquired at time it begins its journey from foreign port, and movement to port of entry is only a step in its transportation to interior destinations. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155, 156.

(b) Commission has no jurisdiction over transportation of shipments moving in bond from points in adjacent foreign countries through United States to foreign destinations or Porto Rico. Fernandez & Co. v. S. P., 104 I. C. C. 193.

(c) Jurisdiction of Interstate Commerce Commission over transportation to and from a foreign country is limited to that part of the shipment which takes place in the United States. New York & Pennsylvania Co. v. Davis, Director General of Railroads, 8 Fed. (2d) 662.

(d) Commission is without power to prescribe reasonable rates for future on shipments originating in a foreign country. Duplex Printing Press Co., v. B. C. E. 128 I. C. C. 692, 693.

(e) Under Transportation Act 1920, § 400(2), carrier must file with the Interstate Commerce Commission schedule of rates covering transportation in commerce with foreign countries as well as between several states. Chandler v. Pennsylvania R. Co., 11 Fed. (2d) 39.

§2. Determination of Status.

See Common Carrier.

(a) Act Pa. July 1, 1919 (P. L. 1003), as amended by Act May 20, 1921 (P. L. 997; Pa. St. Supp. 1924, § 20197), requiring license to sell steamship tickets or orders for transportation to or from foreign countries, HELD invalid, as constituting a direct burden on foreign commerce, as applying to agent of steamship companies authorized to sell tickets and transportation orders on steamships operating between United States and Europe. Di Santo v. Commonwealth of Pennsylvania, 47 Sup. Ct. 267.

(b) State law, which by necessary operation directly interferes with or burdens foreign commerce, is a prohibited regulation, and invalid regardless of purpose for which it was passed. Di Santo v. Commonwealth of Pennsylvania, 47 Sup. Ct. 267.

(c) Business conducted in United States of soliciting passengers and selling steamship tickets and orders for passage between the United States and Europe constitutes a well-recognized part of "foreign commerce." Di Santo v. Commonwealth of Pennsylvania, 47 Sup. Ct. 267.

FREE TIME

See Demurrage §12, §15.

FREE TRANSPORTATION

See Caretakers; Crimes III; Express Companies §5; Passenger Fares and Facilities §12; Personal Injuries; Reduced Rates; Transportation §5½.

FREIGHT CHARGES

See Credit Account; Demurrage VI; Export Rates and Facilities; Overcharges; Sale of Freight; Special Rates and Services (c); Transportation §4; Undercharges.

(a) Shipment originated on nonfederally controlled line and moved to point on a line under Federal control, illegal charges being collected by director general who forwarded voucher covering his portion of overcharges to initial carrier, who failed to refund them to shipper. Contention by director general that payment of the voucher to initial carrier was payment to complainant inasmuch as complainant, by letter, conferred authority upon initial carrier to act as its agent, not accepted. Having filed an overcharge claim with initial line, the letter in question is considered only as a statement of basis of settlement which was then acceptable to complainant. Bowers & Co. v. Director General, 107 I. C. C. 305, 307.

(b) It is delivering carrier's duty to collect applicable rates on prepaid shipments and to correct any errors that may have been made by agent of initial carrier in billing or in collection by it of prepaid charges. See 25 I. C. C. 442, 475; Conf. Ruling 16, 156, and 314. Continental File Corp. v. Director General, 109 I. C. C. 403, 404.

(c) Under section 2 of the act payment can not be made for a service not obligatory on the part of the carrier as a necessary part of the carriage or transportation service. Drayage absorptions of S. W. M. R. R., 113 I. C. C. 179, 184.

(d) Arrangement whereby shipper does not pay definite and stated charges to carriers for transportation services rendered, but such compensation is received by carriers under terms of contracts covering rental of track materials, found contrary to principles of the act. See also 12 I. C. C. 503. Service on K., O. & G. Ry., 118 I. C. C. 412, 415.

(e) Complainant paid and bore freight charges as such, and if the rates were unreasonable, no further proof of damage is necessary. Caruso Rinella, Battaglia Co. v. N. S. R. R., 126 I. C. C. 555, 560.

(f) Carrier's refusal to accept shipment of watermelons for transportation, charges collect, found not discriminatory or otherwise unlawful. Governing tariff specified that watermelons would be accepted freight "collect" only where carriers were protected by surety bond guaranteeing payment of freight charges. Complainant's telegram and certain bills of lading covering similar shipments from another point, were only evidence offered by shipper as authority to ship on complainant's bond and agent considered this insufficient authority to cover shipment tendered. Moreover, determination of what constitutes sufficient evidence of authority must necessarily be left to discretion of agents, and it was not an abuse of such discretion to refuse to accept the telegram as general authority to ship on complainant's bond. Edgerton & Beers v. A. C. L., 126 I. C. C. 422.

(g) Carriers have the right to demand prepayment of freight charges. Edgerton & Beers v. A. C. L., 126 I. C. C. 422, 423.

(h) Shipper at time of shipping may protect himself against liability by providing that consignee or owner pay the freight. St. Louis-San Francisco Ry. Co. v. Republic Box Co., 12 Fed. (2d.) 441.

(i) In any case warranting court in finding that railroad looked to consignee, and not shipper, for payment of freight, it is competent for court to hold either that shipper is not liable at all, or is liable only secondarily and in event of adequate proof that proper steps have been taken against consignee in vain. St. Louis-San Francisco Ry. Co. v. Republic Box Co., 12 Fed. (2d) 441.

(j) Where bill of lading provided that owner or consignee should pay freight, and railroad company had on delivery collected freight from consignee, shipper is not liable to railroad company for difference between rate charged and higher legal rate. St. Louis-San Francisco Ry. Co. v. Republic Box Co., 12 Fed. (2d) 441.

(k) Railroad company HELD entitled to recover freight from the owner of a shipment not received by the consignee, though no formal notice was sent to defendant, because the shipment was billed by another and defendant's address was not shown by the bill of lading, but it otherwise obtained knowledge of the situation. Gulf, C. & S. F. Ry. Co. v. Beatty Brokerage Co., 13 Fed. (2d) 951.

(l) Railroad, which delivered sugar shipment to warehouse company, to whom consignor had indorsed and delivered shipper's order bill of lading, reciting that charges had been prepaid, can collect unpaid charges from warehouse company, since by accepting such

shipment it became liable for carrier's lawful charges, in view of Interstate Commerce Act (Comp. St. § 8563 et seq.). Chicago, R. I. & P. Ry. Co. v. Central Warehouse Co., 14 Fed. (2d) 123.

(m) Action for freight on carload shipments, not instituted for approximately three years, HELD barred by limitations. Houston & T. C. R. v. Lee County Produce Co., 14 Fed. (2d) 145.

(n) Carrier, accepting shipment of eggs on which freight was to be paid by purchaser presenting assigned bill of lading, HELD not entitled, after permission of shipment by purchaser, and failure to collect freight of ultimate consignee, to recover freight of original shipper. Houston & T. C. R. v. Lee Produce Co., 14 Fed. (2d) 145.

(o) Railroad, which in violation of Interstate Commerce Act, § 1, subd. 3 (Comp. St. § 8563), continued to collect freight at rates which Interstate Commerce Commission had declared were unjust and unreasonable, HELD to hold the portion of such freight unlawfully exacted as trustee ex maleficio for shippers, nor were such rates validated by their continued publication, required by section 6 (Comp. St. § 8569). Spiller v. St. Louis & S. F. R. Co., 14 Fed (2d) 284.

(p) Railroad's cause of action for recovery of overpayment on refunding freight overcharge HELD to have accured on date of such refund, and not on date of delivery of shipment, and action therefor may be maintained under Interstate Commerce Act, § 16, par. 3, as amended by Act June 7, 1924 (Comp. St. § 8584), within three years thereafter, since obligation to repay did not arise out of contract for transportation, but out of implied contract for repayment thereof. Michigan Cent. R. Co. v. I. M. Partridge Lumber Co., 17 Fed. (2d) 657.

(q) In action to recover transportation and storage charges on refused merchandise, defenses and counterclaim, alleging that carrier unreasonably allowed charges to accumulate in excessive amount, HELD to present no issue; carrier being under no duty to sue for its charges or to enfore its lien, in absence of allegations showing that failure to sell goods until after expiration of year was unreasonable, or that defendant did not know property was being held by carrier subject to storage charges, or of other allegations excusing defendant from protecting its property. Erie R. Co. v. F. Kieser & Son Co., 215 N. Y. S. 576, 577.

(r) Carrier's right to recover transportation and storage charges depends on whether charges correspond with schedules filed with Interstate Commerce Commission. Erie R. Co. v. F. Kieser & Son Co., 215 N. Y. S. 576.

(s) Where complaint alleged that consignee failed to pay freight as required by bill of lading, consignee's answer admitting allegations of complaint, except that it denied knowledge or information sufficient to form belief as to whether part of freight was paid, and admitting that consignee had not paid it, HELD to raise no issues, and complaint in connection with admissions of answer made prima facie case for plaintiff, entitling it to judgment on pleadings. Transmarine Corporation v. Delaware & Hudson Co., 216 N. Y. S. 623.

(t) Consignee's acceptance of goods under bills of lading requiring payment of freight on delivery implies promise by consignee to pay freight, and no agreement between consignor and consignee, of which carrier has no knowledge, is binding on carrier, and carrier is not bound to inform consignee of consignor's failure to pay freight. Transmarine Corporation v. Delaware & Hudson Co., 216 N. Y. S. 623, 624.

(u) Defendant took from the railway company, at Oswego, nine carloads of lambs which had been shipped from California. He declined to pay the freight charges on the excuse that his private contract with the consignor provided that the latter would pay the carrier's charges. Later, out of affected consideration for the plaintiff, whose position as the railway station agent was imperiled by the noncollection of the freight charges, defendant affected a compromise and settlement with plaintiff whereby each agreed to and did contribute one-half of the amount due the railway company. HELD, the compromise and settlement were void, and the plaintiff, having satisfied the railway company's charges in full, is entitled to reimbursement from defendant. Farrar v. Perkins, (Kan., 1926) 251 Pac. 440.

(v) One who accepts a shipment of property from a railway carrier in assumption of ownership and of right thereto cannot escape the responsibilities

of a consignee merely because he was not so designated in the bills of lading or because of the want of a bill of lading altogether. Farrar v. Perkins, (Kan., 1926) 251 Pac. 440.

(w) Section 424 of the federal Transportation Act of February 28, 1920 (U. S. Comp. St. Ann. Supp. 1923, § 8584), providing that all actions at law by carriers for recovery of their charges shall be begun within three years from the time the cause of action accrues, and not after, is retroactive, in that it applies to all suits at law by such carriers, the cause of action of which accrued less than three years before the act became effective; provided always that the time remaining for the action on the claim is a reasonable time. New York Cent. R. Co. v. Wheeling Can Co., (W. Va., 1925) 130 S. E. 288.

(x) In action by carrier against shipper to recover freight charges which consignee failed to pay, question whether express contract existed by which consignor was exonerated from paying freight charges HELD for jury. Davis, Director General of Railroads v. Ford, (N. C. 1927) 137 S. E. 328.

(y) Stipulation in bill of lading that goods are to be delivered to consignee, "he or they paying freight," does not release consignor from liability where consignee fails to pay freight charges, in absence of stipulation amounting to express agreement by which consignor is to be exonerated. Davis, Director General of Railroads v. Ford, (N. C., 1927) 137 S. E. 328.

(z) One who receives from a carrier an interstate shipment on a uniform bill of lading, freight collect, assigned to and held by him, becomes liable for the carrier's lawful charges, known or unknown, supposed to be paid or otherwise, and is not relieved from liability because of an erroneous representation by the carrier's employee that the charges have been prepaid. Norfolk & W. Ry., Co., v. Williamson Grocery Co., (W. Va., 1927) 138 S. E. 102.

(aa) Action by interstate carrier to recover difference between published schedule of rates filed with interstate commerce commission and rates provided for in contract of shipment, such scheduled rates forming part of contract of shipment by operation of law, is an action founded on contract in writing, governed by five-year statute of limitations (Crawford & Moses' Dig. § 6955), and not by three-year statute of limitations (section 6950). Missouri Pac. R. Co., v. Pfeiffer Stone Co., (Ark., 1924) 266 S. W. 82.

(bb) Stipulations in bill of lading that goods are to be delivered to consignee, "he paying freight," or any similar provision, are for benefit of carrier, and delivery to consignee without collection of freight will not release consignor from liability therefor, in absence of special stipulation to contrary. Missouri Pac. R. Co., v. Pfeiffer Stone Co., (Ark., 1924) 266 S. W. 82.

(cc) Carrier, contracting with shipper to transport goods, has right to look to consignor for payment of freight, and may waive its lien on goods by delivering them to consignee, and still hold consignor liable on contract of shipment. Missouri Pac. R. Co., v. Pfeiffer Stone Co., (Ark., 1924) 266 S. W. 82.

(dd) Consignee, who accepts goods, or expressly or impliedly contracts to do so, is liable for freightage, if contract between parties so provides. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1926) 288 S. W. 73.

(ee) Consignor, rather than consignee, is primarily liable for freightage. Chicago, B. & Q. R. Co. v. Evans, (Mo., 1926) 288 S. W. 73.

(ff) Consignee, who is owner of goods, and has directed transportation, is liable for freightage. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1926) 288 S. W. 73.

(gg) Buyer and consignee of potatoes to be shipped f. o. b. seller's station HELD not party to contract of shipment, so as to be liable for freightage, where bill of lading showed such contract was with consignor. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1926) 288 S. W. 73.

(hh) Existence of relationship of carrier and consignee creates no liability of consignee to pay freightage, in absence of agreement, express or implied. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1926) 288 S. W. 73, 74.

(ii) In action by carrier against consignee for freight charges, admission of letter from plaintiff's servant to consignor showing belief that only consignor was liable for such freight HELD not re-

versible error, where trial was to court. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1927) 288 S. W. 73, 74.

(jj) That seller prevailed in action against buyer for purchase price of potatoes to be shipped f. o. b. seller's station, some of which buyer refused to accept, HELD not to preclude finding, in action by carrier against buyer for freight, that title did not pass till buyer accepted goods. Chicago, B. & Q. R. Co., v. Evans, 1926) 288 S. W. 73, 74.

(kk) Ownership of property shipped is not test of liability for freightage. Chicago, B. & Q. R. Co., v. Evans, (Mo., 1926) 288 S. W. 73, 74.

(ll) Although ordinarily consignor of goods has primary obligation to pay the freight charges, the parties may agree that the consignee will be looked to for payment of freight, and it is permissible to so contract. Gulf, M. & N. R. Co., v. Riverside Brick & Mfg. Co., (Miss., 1926) 107 So. 193.

(mm) In action by delivering railroad to recover transportation charges on interstate shipment finding that railroad and consignor intended that consignee rather than consignor should be liable for transportation charges would be warranted if consignor had no interest in subject matter of shipment, but was merely employed to load it, and acted as agent of the consignee, and it was intended that consignor should not be liable for charges and receiving railroad knew facts. T. S. Faulk & Co. v. Chicago, I. & L. Ry. Co., (Ala., 1926) 111 So. 196.

(nn) Where shipment is interstate, recourse must be had to Interstate Commerce Act (U. S. Comp. St. § 8563 et seq.), and the decisions of the federal Supreme Court construing it, in order to determine whether consignor is liable for transportation charges. T. S. Faulk & Co. v. Chicago, I. & L. Ry. Co., (Ala., 1926) 111 So. 196.

(oo) In action by railroad to recover transportation charges on an interstate shipment, whether the shipment was delivered to the railroad by the defendant or by agent of the consignee HELD a question for the jury. T. S. Faulk & Co., v. Chicago, I. & L. Ry. Co., (Ala., 1926) 111 So. 196.

(pp) In action by railroad to recover transportation charges on interstate shipment, whether consignor had any interest in subject-matter of shipment and whether he was merely employed to load it and acted as agent of consignee HELD questions for the jury. T. S. Faulk & Co. v. Chicago, I. & L. Ry. Co., (Ala., 1926) 111 So. 196.

(qq) In action by railroad to recover transportation charges on interstate shipment, whether consignor and consignee intended that consignor should not be liable for charges HELD questions for the jury. T. S. Faulk & Co., v. Chicago, I. & L. Ry Co., (Ala., 1926) 111 So. 196.

(rr) In action by delivering railroad to recover transportation charges on interstate shipment, whether receiving railroad knew, if facts, that consignor had no interest in subject-matter of shipment and acted as agent of consignee and intended that consignor should not be liable for the charges HELD questions for the jury. T. S. Faulk & Co. v. Chicago, I. & L. Ry. Co. (Ala., 1926) 111 So. 196.

(ss) Actions by carriers against government, for payment for transportation services, commenced more than three years after enactment of Transportation Act Feb. 28, 1920 (Comp. St. Ann. Supp. 1923, § 10071¼ et seq.), but within six years from time cause of action accrued, HELD not barred by section 16, par. 3, of Interstate Commerce Act, as amended by Act. Feb. 28, 1920 (Comp. St. Ann. Supp. 1923, § 8584), or by Act June 7, 1924 (Comp. St. Supp. 1925, § 8584.) United States v. St. Louis, S. H. & T. Ry. Co., Same v. Wabash R. Co., 46 Sup. Ct. 182.

(tt) That compensation for transportation service comprises two items, one designated rental, does not make it illegal as matter of law. J. C. Famechon Co. v. Northern Pac., 11 Fed. (2d.) 312.

(uu) In action by railroad to recover transportation charges on an interstate shipment brought against defendant as consignor, whether bill of lading was properly made out and whether railroad agent was authorized to sign defendant's name to it held questions for the jury. T. S. Faulk & Co. v. Chicago, I. & L. Ry. Co., (Ala., 1926) 111 So. 196.

FROZEN SHIPMENTS

See Demurrage §19.

GAS AND ELECTRIC COMPANIES

See Interstate Commerce.

(a) A foreign corporation engaged in interstate commerce supplies gas to a distributing company within the state which it controls, even though it is engaged in interstate commerce, and subject to local state regulation of rates. Gallatin Natural Gas Co. v. Public Service Commission, (Mont., 1927) 256 Pac. 373.

(b) Provision in oil and gas lease, requiring lessee to deliver to credit of lessor in pipe line one-eighth of oil produced and saved, HELD a reservation of title in lessor, and not a mere covenant to pay rent in kind, as affecting lessor's right to recover against lessee's vendee for conversion. Shreveport-El Dorado Pipe Line Co., Inc., v. Bennett, (Ark., 1927) 290 S. W. 929.

(c) Where part of gas in pipe line was moving in interstate and part in intrastate commerce, state court's finding that there was sufficient gas moving in intrastate commerce to enable gas company owning it to comply with order of state Public Service Commission HELD not to interfere with or affect interstate commerce. People's Natural Gas Co., v. Public Service Commission of Pennsylvania, 46 Sup. Ct. 371.

(d) Natural gas, produced in Pennsylvania and piped to consumers within that state, moves in intrastate commerce only, though in pipe line it is commingled with a definitely known quantity of gas moving in interstate commerce. People's Natural Gas Co. v. Public Service Commission of Pennsylvania, 46 Sup. Ct. 371.

(e) Natural gas, continuously moving in pipe line from West Virginia to consumers in Pennsylvania, is in interstate commerce throughout such movement, though custody and title to it changes at state boundary, where it passes through meter. People's Natural Gas Co. v. Public Service Commission of Pennsylvania, 46 Sup. Ct. 371.

(f) Courts of District of Columbia have no jurisdiction of proceeding by consumers of gas purchased from Maryland company an alleged subsidiary of company within District of Columbia, from which it obtained its whole supply of gas, to compel public utilities commission of District to fix reasonable rates on gas supplied to Maryland company, since commission itself has no jurisdiction to establish rates on gas sold outside District; such matter being one of interstate commerce, in view of Interstate Commerce Act, § 1. Galloway v. Bell, 11 Fed. (2d.) 558.

(g) Transmission of gas by pipe line from one state to another, or from District of Columbia to a state, being interstate commerce, it is beyond power of state to impose any burden thereon. Galloway v. Bell, 11 Fed. (2d.) 558.

GOVERNMENT CONTROL

See Advanced Rates §7 (9); Evidence §25.

(a) Under Federal Control Act, § 10 (Comp. St. 1918, Comp. St. Ann. Supp. 1919, § 3115¾j), and General Order 50-A, the federal agent appointed, under Transportation Act 1920, § 206(a), being Comp. St. Ann. Supp. 1923, § 10071¼cc, is not liable for negligent operation generally, as operator of all railroads, regardless of relation of various lines to one another, but only with reference to the particular transportation system out of whose operations the liability in question arose. Davis, Agent, etc., v. Alexander, 46 Sup. Ct. 34.

GOVERNMENT GUARANTY

See Finance Dockets VI, §6; Interstate Commerce Commission §9½.

GOVERNMENT MATERIAL

See Reduced Rates §4.

GRADE CROSSINGS

(a) Under Interstate Commerce Act, § 15a, par. 5, as added by Transportation Act 1920, §422 (U. S. Comp. St. § 8583a), federal government's interest in railroad's net revenues in excess of 6 per cent. of value of railroad's property, which is payable to Interstate Commerce Commission, is merely that of trustee thereof, and is in no way affected by state requirements for elimination of grade crossings. Bay St. Crossing of Staten Island Rapid Transit Ry. Co. 221 N. Y. S. 129. Belair Road Crossing of Staten

Island Rapid Transit Ry. Co., 221 N. Y. S. 129.

(b) Order of Transit Commission, requiring railroad to eliminate grade crossings under Railroad Law N. Y. §§ 91 (as amended by laws 1921, c. 698, § 2), 94, 95, Const. N. Y. art. 7, § 14, and laws, N. Y. 1926, c. 510, §§ 1, 3, HELD not invalid as interfering with powers of Interstate Commerce Commission under Interstate Commerce Act, § 20a, as added by Transportation Act. 1920, § 439 (U. S. Comp. St. 8592a), prohibiting railroads subject to the act from issuing securities without first obtaining authority from Interstate Commerce Commission. Bay St. Crossing of Staten Island Rapid Transit Ry. Co., 221 N. Y. S. 129. Belair Road Crossing of Staten Island Rapid Transit Ry. Co., 221 N. Y. S. 129.

(c) Transportation Act (U. S. Comp. St. Ann. Supp. 1923, § 10071¼ et seq.) does not expressly or by implication give Interstate Commerce Commission power to eliminate grade crossings nor prohibit state authorities from so doing. State Wabash Ry. Co., v. Public Service Commission, (Mo., 1924) 267 S. W. 102, 103.

(d) Interstate Commerce Act, §20a (as added by Transportation Act [U. S. Comp. St. Ann. Supp. 1923, § 8592a]), preventing interstate carriers from issuing securities or extending their lines without approval of the Interstate Commerce Commission, HELD inapplicable in proceedings to compel railroad separation of grade crossing where it was not alleged nor did evidence show that expense thereof was so great as to require an issue of securities by railroads affected, or that their main lines would be required to be extended. State Wabash Ry. Co., v. Public Service Commission, (Mo., 1924) 267 S. W. 102, 103.

(e) Expenses of installing interlocking device at railroad grade crossing is not imposed by Rev. St. 1911, art. 6702, solely upon company whose line was last built, notwithstanding reference in that article to such railroad company by singular number, which, under article 5502, must be construed to include the plural. International-Great Northern R. Co., v. Railroad Commission of Texas, (Tex., 1926) 281 S. W. 1084.

(f) Although state may not regulate interstate commerce, or unduly burden it, requiring installation and operation of interlocking devices at railroad grade crossings is reasonable exercise of police power, for protection of public and railroad employes, and right is not ousted by Interstate Commerce Act, § 26, as added by Transportation Act. Feb. 28, 1920, § 441 (U. S. Comp. St. Ann. Supp. 1923, § 859 b), nor any act of Interstate Commerce Commission pursuant to its enforcement. International-Great Northern R. Co. v. Railroad Commission of Texas, (Tex., 1926) 281 S. W. 1084.

GRADED RATES

See Blanket Rates §9; Distance Rates.

GRAIN FUTURES

(a) Grain Futures Act (Comp. St. Ann. §§ 8747 4/5 to 8747 4/5), passed in pursuance of commerce power of Congress, HELD to supersede and displace statutes conflicting therewith. Chamber of Commerce of Minneapolis v. Federal Trade Commission, 13 Fed. (2d) 673.

HAWAII

(a) Respondent, Hawaii Consolidated Ry., operates a single track railroad on the island of Hawaii. It proposed to increase all class and commodity rates and switching charges 15% except that no change was proposed in the present commodity rates on sugar cane, and on breakwater rock moving to Kuhio Bay Terminal, and in the present class and commodity rates applicable to shipments moving between Hilo, Waiakea, or Kuhio Bay and Wainaky and Honolii. It also proposed to increase the loading and unloading charges on sugar moving under carload rates, from 35c to 59c per ton, when unloaded from its cars to warehouse and reloaded from warehouse to lighters, or shipside at Kuhio wharf, and to increase all passenger fares 10%. Respondent is the only common carrier railroad which serves the island of Hawaii. A return of 6% will constitute a fair return on the value of the property devoted to public service. HELD, fair value of respondents property devoted to common carrier purposes, including materials and supplies and working capital, may be taken as about $6,000,000. HELD, proposed increases in class and commodity rates justified. Necessity of increase in loading and unloading charges on sugar moving under carload rates, for handling at Kuhio wharf, has

been established, but amount of increase not justified. Carrier to file tariffs increasing the charge of 5c per ton. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489.

(b) Proposal of the Hawaii Consolidated Ry., Ltd., on the island of Hawaii, to increase loading and unloading charges on sugar, from 35 to 50 cents per net ton when unloaded from cars to warehouse and reloaded from warehouse to lighters, or ship's side at Kuhio wharf, found not justified. Kuhio wharf is a Government-owned structure, portions of which are leased by the carrier. The carrier has no money invested therein but collects from those making use of these facilities amounts sufficient to pay all expenses incident to service performed. However, it is entitled to a fair profit for its services and a study of expenses attached thereto indicates that an increase of 5 cents per net ton is ample for this purpose. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489.

(c) Upon a consideration of revenues and expenses as compared with its value, proposed increase of 15 per cent in class and commodity rates between points on the Hawaii Consolidated Ry., Ltd., on the island of Hawaii, found justified. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489.

(d) The Territory of Hawaii does not come within provisions of paragraph (3) of section 15a of the act. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489, 492.

(e) The financial and economic conditions existing in the Hawaiian Islands are somewhat different from those existing on the mainland. Public utilities in the islands have for some years past been granted a return of 8 or 9 per cent upon fair value of their property devoted to public service. There are essential differences between a public utility and a common carrier such as a railroad, so that returns on the two classes of property are not necessarily to be the same. Accordingly, a return of 6 per cent found to constitute a fair return on value of property of the Hawaii Consolidated Ry., devoted to public service, for rate-making purposes. Rates on Hawaii Consolidated Ry., 118 I. C. C. 489, 492.

(f) Abandonment by carriers of alternative application clause of tariffs pending suit HELD not implied admission that such clause made tariff on shipments to Hawaiian Islands applicable to other shipments. Southern Pac. Co., v. Lathrop, 15 Fed. (2d) 486. Spokane P. & S. Ry. Co. v. Same, 15 Fed. (2d) 486. Oregon-Washington R. & Nav. Co. v. Same, 15 Fed. (2d) 486.

(g) Section of tariff relating to goods shipped to Hawaiian Islands, and containing alternative application clause to effect that lower rate of any section should be applied, HELD not applicable to domestic shipments. Southern Pac. Co. v. Lathrop, 15 Fed. (2d) 486. Spokane P. & S. Ry. Co. v. Same, 15 Fed. (2d) 486. Oregon-Washington R. and Nav. Co. v. Same, 15 Fed. (2d) 486.

(h) Where each section of tariff provided that lower rate in any other section should apply, though title of one section provided it should only apply to traffic consigned through to Hawaiian Islands, held, that such section had alternative operation with previous sections, where rates covered transportation to seaboard only. Lothrop v. Spokane, P. & S. Ry. Co., 10 Fed. (2d.) 225. Same v. Oregon-Washington R. & Nav. Co., 10 Fed. (2d.) 225. Same v. Southern Pac. Co., 10 Fed. (2d.) 225.

HEATER SERVICE

See Cars and Car Supply §9½; Demurrage §5½; Facilities and Privileges §9⅛; Protective Service; Special Rates and Services.

(a) Complainant attacked as unreasonable two rules in perishable protective tariff I. C. C. 1, in their application to shipments of potatoes from and to W. T. L., and c. f. a. territory. One of the rules provides no instructions for manipulation of side door will be accepted. The other rule complained of governs the assessment of heater charges on refrigerator cars held at intermediate points for reconsignment. Complainant seeks the establishment of a rule which would make it mandatory upon the carriers to see to it that the side doors are to be closed at an outside temperature of 34 degrees above zero and opened not less than two feet and be securely blocked, cleated, or otherwise fastened at a temperature of 38 degrees above zero. It is clear from the record that up to Oct. 15, shipments of potatoes in box cars generally should and do leave points of origin with the doors open. Generally speaking the movement is to milder climes. Com-

plainant concedes that there would be comparately few cars on which there should be any actual service of changing the position of the doors. After Oct. 15, the protective service against cold is inaugurated. In the final analysis the only point which could be reasonably urged in support of complainants proposed rule would be that greater protection to the lading might possibly result. But if the defendants prefer to run the risk, if any, entailed by refraining from manipulating the doors in transit and expressly disavow any attempt to evade their common law liability in so doing, it is not seen how the present rule could result in ultimate damage. HELD, rule providing for the carriers refusal to accept instructions as to the manipulation of side doors of box cars, containing shipments of potatoes, in transit is not unreasonable. The $2 per 24 hour charge or fraction thereof becomes applicable at hold points immediately upon arrival of the car at such point and runs until the car is released by shippers orders. Shippers may avoid imposition of the charge either by placing reconsigning instructions prior to the arrival of the cars at the hold points or by availing themselves of the shippers protective service. The evidence lacks that degree of conviction which should appear before the Commission attempts to disrupt a uniform and widespread practice. HELD, heater charge attacked unreasonable, complaint dismissed. Northern Potato Traffic Asso. v. B. & O. R. R., 113 I. C. C. 511.

HOCH-SMITH RESOLUTION

See Advanced Rates §17 (kk); Facilities and Privileges §4 (a); Live Stock Shipments.

(a) Considering among other things, the direction of Congress in the Hoch-Smith resolution, Senate Resolution 107, failure of carriers to provide concentration and warehousing arrangements on cotton at Montgomery, Ala., found to constitute an unreasonable practice. Such arrangements are necessary and desirable in the public interest; their establishment at joint rates over direct routes has become common, due to voluntary act of characters in recognition of peculiar circumstances surrounding marketing and handling of this traffic; and any shipper not accorded joint rates is at a substantial disadvantage which will confine his opportunities of sale to limited areas. Moreover, the general practice throughout the Cotton Belt is to permit such arrangements at first convenient compressing point en route to destination, and to require cotton produced in area here involved to move long distances in an uncompressed condition constitutes wasteful transportation not in the interest of economical operation. Montgomery Cotton Exchange v. A. S. L., 109 I. C. C. 579.

(b) Consideration given to the Hoch-Smith resolution, Senate Joint Resolution 107, in finding that failure of carriers to provide concentration and compression arrangements on cotton at Montgomery, Ala., constituted an unreasonable practice. Montgomery Cotton Exchange v. S. A. L., 109 I. C. C. 579, 586.

(c) By joint resolution of the Congress, being Public Resolution No. 46, 68th Congress, approved Jan. 30, 1925, usually referred to as the Hoch-Smith Resolution, the commission was authorized and directed to make a thorough investigation of the rate structure of common carriers subject to the act. Pursuant to that resolution the commission instituted on March 12, 1925, upon its own motion a general investigation of the character contemplated by the resolution, No. 17000, Rate Structure Investigation. Subsequent to the issuance of the order in 17000, petitions seeking an increase in revenues were filed with the commission on behalf of the principal common carriers by steam railroad in the western district, comprising the western group and the mountain-Pacific group as defined in Ex Parte 74, Increased Rates, 1920, 58 I. C. C. 220. In 68 I. C. C. 676, 734, the commission found that on and after March 1, 1922, a fair return upon the aggregate value of the railway property of the carriers defined in section 15a of the act, determined as therein provided, would be 5.75% of such aggregate property value as a uniform percentage for all rate groups or territories designated by the commission. By supplemental petition filed Nov. 19, 1925, and docketed as Ex Parte 87 Sub. No. 1, Western Trunk Line Class Rates, an increase in revenue is sought by means of an upward revision and readjustment of the class rates in western trunk line territory. That supplemental petition will be heard and disposed of separately. Respondents are negotiating with shipper in the territory in question with a view to possible agreement upon a mutually satisfactory basis

of rates. Both shippers and carriers for this reason have indicated to the commission that they do not desire hearing before fall. It is provided by the resolution that the commission shall prescribe on products of agriculture so affected by depression, including livestock, the lowest possible lawful rates. It is contended, therefore, that the present rates thereon may not be increased unless they are found to be confiscatory. While confiscatory rates are unlawful, it does not follow that all rates which escape confiscation are lawful. As the commission construes the resolution, it does not prevent increases of rates on all livestock or on all products of agriculture which are above the point of confiscation. The railroad facilities of the country have proved capable of handling the increased traffic without appreciable car shortages and with greater expedition and reliability than in previous years. While the commission is not prepared to say how many routes should be maintained at the direct line rate, it is evident that reasonable restrictions on routing are desirable in the interest of efficient operation. PASSENGER TRAFFIC SITUATION. The record indicates that the passenger service of the western carriers is not paying as great a rate of return on the property devoted thereto as is the freight service. Whatever is contributed by the passenger business may reduce correspondingly the burden which the freight traffic would otherwise bear. The Commission does not subscribe to the proposition that where freight rates are producing, on the property devoted to freight service, the rate of return which has been fixed as fair, it can as a matter of law authorize no increases in such rates to correct deficiencies in aggegate earnings growing out of the inability of the passenger business to meet its full share of the revenue burden. The freight and the passenger services are both essential and both may be subjected to reasonable rates and charges to produce the fair aggregate return, authorized by the law even though thereby a higher rate of return may be exacted from the one than from the other. The growing use of the private automobile and the autobus and truck, which has come with the improvement of the public highways, has injected a disturbing economic influence into the railroad situation both as to freight and passenger business. Although this influence has been relatively more adverse in the case of passenger traffic, the loss in passenger revenue growing out of this new competition has, to an extent at least, been offset by augmented freight revenues derived from the carriage of materials for and products of automobile manufactories, and in the carriage of fuel and lubricants used in the operation of the automobile. What has been said should not be construed as indicating that the passenger business may be excused from contributing the greatest possible earnings consonant with adequate service and reasonable charges. On the contrary a public duty rests upon the managements of the carriers, individually and collectively, carefully to survey the passenger situation and to exert every legitimate effort to place this branch of their operations on a more compensatory basis. DIVISIONS. While in numerous cases the commission has recognized the rate pro rate basis as an approximate means of dividing rates in accordance with the amount and cost of the service rendered, it is evident that computations made solely on the basis of the respective first class rates are not convincing. Different classifications apply in official and western territories. The rates on the lower classes bear considerably different percentage relationships to first class in the east from those in the west. Much traffic between official and western territories moves on combinations of local or proportional factors to and from Chicago or Mississippi river gateways. Divisions between eastern and western roads affect traffic moving on combination rates little if at all. Many facts essential to the determination of divisions of joint rates between eastern and western carriers are not in this record. Obviously a conclusion that the divisions between the eastern and western roads were unfair to the latter should be made upon a proper record, with all the parties actively before the Commission, and upon a consideration of all the matters which the law requires to be taken into account. CREATION OF NEW GROUPS. Speaking generally, rate groups under section 15a should be designated having two tests in mind, (a) the practicability of determining the rate of return of the carriers constituting the group and (b) the suitability of the territory for grouping for rate making purposes. To a considerable extent the proposed southwestern group is a homogenous group from a rate construction standpoint, but the designation of such a

group would add materially to the difficulties of ascertaining group returns in the western district. The proposed mountain-Pacific-southern group meets neither of these tests. RATES IN WESTERN TRUNK LINE TERRITORY. Although average ton-mile earnings fall far short of constituting an exact measure of the relative levels of rates in different territories, being affected by various other factors, including the character of the traffic handled, the average length of haul, and divisions between carriers, the evidence of record tends to show that rates in western trunk line territory generally are on a materially lower level than rates in other sections of western territory, including the southwest. Within western trunk line territory itself numerous discrepancies and inconsistencies in both class and commodity rates exist. The level west of the Missouri river and the Twin Cities is materially higher than that in the area east thereof, and many individual rates in each portion of the territory are inconsistent with other rates on the same or competing articles in the same territory. On the record the commission is unable to determine the precise extent to which the rates in western trunk line territory, whether considered as a whole or as comprising only the area east of the Missouri river, are lower than those in the southwest or in the remainder of the western district. It is clear that rate increases in that territory, particularly the portion east of the Missouri river, will tend both to produce a more uniform level of rates throughout the west and to benefit directly many of the weakest carriers in the western district. The commission is required under section 15a only to adjust rates by rate groups to produce as nearly as may be a fair return for carriers as a whole in such groups. But it is evident that the principal purpose of that section was to afford the public adequate transportation service. This end would clearly not be as adequately served by general increases throughout such a large rate group as the western district, applying alike to weak and strong lines, as by increases confined as far as possible to areas where the rates appear to be on the lowest level and where the weakest roads are located. CONDITION OF AGRICULTURE. It is plain from the record that there has been substantial recovery from the postwar depression, but the effects thereof are still in evidence. CONCLUSIONS. As to Ex Parte 87 it is quite clear from the evidence that so far as the major portion of the western district is concerned no financial emergency exists. In this portion the carriers appear to be both financially and physically sound. In the northwestern region and in western trunk line territory the revenues of certain of the important carriers have not yielded 5.75% upon any rate basis than can reasonably be adopted in advance of a final determination of present values for rate making purposes. The least favorable conditions in the district, so far as carrier revenues are concerned, appear to exist in western trunk line territory. It is, however, to be noted that both in the northwestern region and in western trunk line territory, as well as in the western district as a whole, conditions have recently shown an improving tendency. Furthermore, having regard to what has been already said as to the terms of the resolution concerning the inequalities and discriminations in existing freight rate structures, the commission can not find on this record that such an emergency exists in western trunk line territory as would warrant it in prescribing a general percentage increase in freight rates in that territory. While the commission has power to prescribe such changes, it can properly prescribe them only upon clear evidence of urgent necessity. No such evidence is at present before it. The petitions of the carriers in western district and of the security holders with reference to western trunk line territory will therefore be denied. The conclusions are without prejudice to the determination of the issues in No. 17000 and No. 15686 upon the consolidated record. Revenues in western district, 113 I. C. C. 3.

(d) Both section 15a and Hoch-Smith resolution must be given a construction which makes them practicable and workable. Revenues in western district, 113 I. C. C. 3, 11.

(e) Upon a consideration, among other things, of the requirements of the Hoch-Smith Resolution (S. J. Res. 107), application of carriers in the western district for an increase in freight rates, generally averaging 5 per cent, with exceptions as to certain commodities, predicated on the alleged existence of a financial emergency in that district, denied, no such emergency existing in that territory as a whole as would warrant the commission prescribing a general

percentage increase in freight rates therein. Revenues in Western District, 113 I. C. C. 3.

(f) Upon contention that under existing conditions the Hoch-Smith Resolution (S. J. Res. 107) in effect debars commission from granting carriers a general increase in rates pending completion of its investigation instituted under that resolution, HELD: Commission is not debarred by that resolution from affording carriers relief through the medium of a general increase in rates prior to completion of investigation, if need for such action arises upon a clear showing of necessity. Both section 15a and the resolution must be given a construction which makes them practicable and workable. See 261 U. S. 184, 197. Revenues in Western District, 113 I. C. C. 3, 11.

(g) Contention that the Hoch-Smith Resolution (S. J. Res. 107) constitutes a legislative finding that a depression exists in agriculture, which raises an indisputable presumption in all investigations held under its provisions or commenced subsequent thereto that such depression does in fact exist, and that such presumption will remain until commission reports the results of its investigation held under direction and authority of that resolution, or until Congress repeals it, thereby precluding any action for a general increase in rates under paragraph (2) of section 15a of the act, not sustained. Revenues in Western District, 113 I. C. C. 3, 12.

(h) The Hoch-Smith Resolution (S. J. Res. 107) in its first paragraph makes the basic declaration that in adjusting rates commission shall consider conditions which at any given time prevail in the several industries, to the end that commodities may freely move. This declaration is inconsistent with the construction that a depressed condition in agriculture must be conclusively presumed to continue until Congress again speaks. Revenues in Western District, 113 I. C. C. 3, 12.

(i) Upon contention that the Hoch-Smith Resolution (S. J. Res. 107) repeals those portions of section 15a of the act dealing with the fixing of a fair return on property of carriers held for and used in the service of transportation, HELD: The resolution has force and effect of an act of Congress. In it there is no specific repeal of any provision of existing law, and there is no reason for holding that the resolution by implication repealed or suspended the provisions of section 15a. Revenues in Western District, 113 I. C. C. 3, 11, 12.

(j) The Hoch-Smith Resolution (S. J. Res. 107) clearly points out that in making any change in accordance with its provisions, commission shall give due regard "to the maintenance of an adequate system of transportation," and that the fixation of the "lowest possible lawful rates on products of agriculture, including livestock," shall be "compatible with the maintenance of adequate transportation service." These are expressions somewhat similar to those used by the Supreme Court in decisions rendered prior to adoption of the resolution, specifically referring to provisions of section 15a wherein Congress indicated that in determining what would be a fair return consideration should be given, among other things, to transportation needs of the country and necessity of enlarging such facilities in order to provide the people with adequate transportation. See 257 U. S. 563, 585, and other cited cases. Congress could not have intended to repeal or suspend by indirection so important a provision of the law as section 15a. Revenues in Western District, 113 I. C. C. 3, 12.

(k) Last paragraph of the Hoch-Smith Resolution (S. J. Res. 107) "in view of the existing depression in agriculture," directs that with the least practicable delay commission shall make rate changes which will promote the freedom of movement of products of agriculture affected by that depression, including livestock. Language quoted is in nature of a preamble, and resolution indicates that not all products of agriculture, including livestock, may be affected by that depression, and calls for a determination by the commission as to what products are so affected. Revenues in Western District, 113 I. C. C. 3, 12.

(l) The Hoch-Smith Resolution (S. J. Res. 107) directs that the investigation shall be thorough and shall cover entire rate structure of common carriers subject to the act. Such an investigation must inevitably consume a long period of time. To construe the resolution as requiring commission to conclusively presume the existence of depression in connection with all products of agriculture, including all kinds of livestock, and to accord to all such relief as

is contemplated in last paragraph of the resolution would, to extent that some of them are not affected by the depression, constitute undue preference and cast undue burdens and give undue advantage as between various classes and kinds of commodities in violation of second paragraph of the resolution and section 3 of interstate commerce act, and would compel commission to ignore first paragraph of the resolution. Revenues in Western District, 113 I. C. C. 3, 13.

(m) If certain products of agriculture or certain kinds of livestock are not "affected by depression" they do not come within the direction of last paragraph of the Hoch-Smith Resolution (S. J. Res. 107). A primary purpose of that paragraph was that because of the then existing depression in agriculture the products of agriculture affected by that depression should receive expedited consideration. It would not be a reasonable construction of the resolution to hold that it conclusively, presumes existence of depression in all products of agriculture, including livestock, until commission reports the result of its investigation held under direction and authority of said resolution. Revenues in Western District, 113 I. C. C. 3, 13.

(n) Upon contention that since the Hock-Smith Resolution (S. J. Res. 107) provides that commission shall prescribe on products of agriculture affected by depression, including livestock, the lowest possible lawful rates, therefore, the present rates thereon may not be increased unless they are found to be confiscatory, HELD: While confiscatory rates are unlawful, it does not follow that all rates which escape confiscation are unlawful. As the commission construes the resolution, it does not prevent increases of rates on all livestock or on all products of agriculture which are above the point of confiscation. Revenues in Western District, 113 I. C. C. 3, 13.

(o) An index of so-called relative purchasing power is not to be taken as an accurate measure of changes in the farmers' well-being, and an index of wholesale prices of nonagricultural commodities is not necessarily representative of what the farmer purchases. Furthermore, a change in price level itself brings readjustments in consumption and a shifting of activities. Nevertheless, such an index is a convenient way of stating the difference in price trend for farm and other products, and deserves considerable weight in judging of the condition of agriculture. Revenues in Western District, 113 I. C. C. 3, 31.

(p) Doctrine that burden of rail transportation should be distributed among various kinds of freight with some regard for economic needs of the country has always had recognition, in one way or another, in the rate structure. Fertilizers between Southern Points, 113 I. C. C. 389, 420.

(q) The Hoch-Smith resolution, under which the commission is required to give particular consideration to the establishment of a rate structure under which agricultural products shall freely move, given consideration in denying proposed increase in distance rates on cream, and on milk, cream, and buttermilk, transported by railroads on passenger trains in the territory embracing points in Montana, North Dakota, Minnesota, and other northwestern States. Milk and Cream in Northwest, 115 I. C. C. 77.

(r) Certain coal producers testified that many of their mines are closed or operating at less than capacity and urge that under policy of Congress laid down in the Hoch-Smith resolution the commission should consider such contingencies in determining propriety of their rates. FOUND: That in a time of depression in the coal industry it is self-evident that mines producing a less desirable product at a higher cost will first feel effect of depression and be forced to close down or restrict their operations. Indiana State Chamber of Commerce v. A. A. R. R., 115 I. C. C. 650, 656.

(s) In view of evident purpose of the Hoch-Smith resolution the commission is loath to permit any increases in transportation burden placed upon products of agriculture such as grain, except for reasons clear and explicit and where it appears that resulting charges will not be unreasonable. Minnesota-Dakota Transit Millers v. A. A. R. R., 118 I. C. C. 585, 596.

(t) The Hoch-Smith resolution, enjoined upon the commission to fix the lowest possible rates that might lawfully be required, compatible with the maintenance of adequate transportation service. It set no new standard of lawfulness, but said, in effect, that to the extent that there are flexible limits to

discretion of the commission it should fix the lowest rates falling within those limits. In the past the commission has had occasion to consider at times what may be called "out of pocket" cost, but while it has been contended that the carriers might voluntarily, in certain situations, establish rates covering only such cost, it has never been seriously contended that the commission could require this to be done. Rates that the commission may lawfully require must in principle be high enough to cover all the cost that may fairly be allocated to the service plus at least some margin of profit. We say "in principle" because only rarely is definite information available as to such cost, and in practice rates must often be fixed largely by comparison with other rates. Of course, the other sections of the act must also be borne in mind in determining the lowest lawful rates in a particular situation. American National Livestock Asso. v. A., T. & S. F. Ry., 122 I. C. C. 609, 617.

(u) The intent of the Hoch-Smith resolution is that products of agriculture affected by depression shall move at the "lowest possible lawful rates compatible with the maintenance of adequate transportation service." It sets no new standard of lawfulness, but provides, in effect, that to the extent that there are flexible limits to the commission's discretion, it shall require maintenance of the lowest rates falling within those flexible limits. Grain and products, 122 I. C. C. 235, 264.

(v) Rates that may lawfully be required must in principle be high enough to cover all of the cost that may fairly be allocated to the service plus at least some margin of profit. See 236 U. S. 585; 236 U. S. 605. But it has always been recognized that the burden of transportation may reasonably be adjusted with some regard to the value of service; in other words, that the higher grade, more valuable commodities may be required to pay a greater margin of profit than those that are of lower grade and less value. The substance of the Hoch-Smith resolution is that agricultural products affected by depression shall in this respect be included in the class of most favored commodities, to such extent, at least, as may be "compatible with the maintenance of adequate transportation service." Grain and Products, 122 I. C. C. 235, 264.

(w) Contention that Congress, by the Hoch-Smith resolution, has declared the existence of a depression in agriculture, and that therefore that fact is not open to dispute, not sustained. See 113 I. C. C. 3, 12. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 612.

(x) The Hoch-Smith resolution enjoined upon commission to fix the lowest possible rates on livestock that might lawfully be required, compatible with maintenance of adequate transportation service. It set no new standard of lawfulness, but said, in effect, that to the extent that there are flexible limits to commission's discretion it should fix the lowest rates falling within those limits. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 617.

(y) The Commission does not understand that the Hoch-Smith resolution is designed to perpetuate violations of the law or that it can be invoked to justify advantages given tobacco producers of one section over nearby and competing tobacco producers. Unmanufactured tobacco from Kentucky, 126 I. C. C. 93, 96.

(z) In removing undue prejudice involving rates on agricultural products, carriers importuned to take cognizance of principles announced in 113 I. C. C. 3; 122 I. C. C. 235, in construing Hoch-Smith resolution with regard to advancing rates to rectify such inequalities. Southwestern Millers' League v. A., T. & S. F., 126 I. C. C. 23, 33, 34.

(aa) Respondents' contention that milk and cream are not products of agriculture and that provisions of Hoch-Smith resolution do not apply in determining whether proposed increases in rates thereon may be established, not sustained. Milk and cream are agricultural products and come within class of products with which the resolution specifically deals, and in adjusting freight rates in accordance with its provisions "the conditions which at any given time prevail in the several industries to the end that commodities may freely move, and especially the effect upon agricultural products," must be considered and rates for movement of such commodities reduced to lowest lawful level consistent with maintenance of adequate service. Milk and Cream Between New England Points, 126 I. C. C. 38, 68, 69.

(bb) Rates that may lawfully be required under the Hoch-Smith Resolution

must, in principle, be high enough to cover all costs that may fairly be allocated to the service, plus at least some margin of profit. See 236 U. S. 585; 236 U. S. 605. However, it has always been recognized that burden of transportation may reasonably be adjusted with some regard to value of service, in other words, that higher grade, more valuable commodities may be required to pay a greater margin of profit than those of lower grade and less value. Substance of above resolution is that agricultural products affected by depression shall in this respect be included in the class of most favored commodities, to such extent, at least, as may be "compatible with the maintenance of adequate transportation service." See also 122 I. C. C. 235. Milk and Cream Between New England Points., 126 I. C. C. 38, 69.

(cc) The Hoch-Smith resolution is not designed to perpetuate violations of the law nor can it be invoked to justify advantages heretofore enjoyed by producers over their competitors. Unmanufactured Tobacco from Kentucky, 126 I. C. C. 93, 96.

(dd) The commission can not materially reduce carrier revenues from commodities which are able to bear present rates, if relief is to be accorded agriculture and other industries in distress, as contemplated by the Hoch-Smith resolution. United Zinc Smelting Corp. v. B. & O., 126 I. C. C. 677, 695, 696.

(ee) Complainant assailed the carload rate of $1.62 per 100 pounds, minimum 26,000 pounds on fresh deciduous fruits, other than apples, carloads, from California points to destinations in Group J, and rate of $1.73 to the other eastern transcontinental groups A to M, inclusive, as being unreasonable and unduly prejudicial. The instant proceeding presents substantially the same issues as those passed upon by division 1 in Calif. Growers & Shippers Protective League v. S. P. Co., 100 I. C. C. 79. Deciduous fruit shipments comprise the largest single item of transcontinental tonnage, as well as the greatest portion of the transcontinental movement of perishable traffic. California ships more plums and cherries than the remainder of the United States, but by far the heaviest movement from the State is of grapes. The principal originating trunk lines are the S. P., Santa Fe, and Western Pacific. Deciduous fruits usually move in refrigerator cars, must be stopped en route for reicing at various points, and expedited schedules are maintained. A natural disadvantage of the industry is its distance from consuming markets. Not more than 5% of the production of fresh fruits in California is consumed there, and the product must of necessity move to the large consuming territory east of the Missouri river and extending to the Atlantic Seaboard. When prices of fruit are high, growers are not particularly concerned about the level of their rates. This was true in 1920, when both rates and prices were at their peak. But when prices are low, transportation charges become an important item of expense in the production and marketing of fruit. That is the present condition of the industry, and in complainants view the markets must be brought nearer by means of rate reductions. Fluctuations in market price during the season sometimes equal or exceed the freight rate. While undoubtedly overproduction and distributing practices are factors in the situation, the essential fact still remains that the industry is in serious financial straits. Land values have declined to a point where most if not all of the war time inflation has been removed, and while some branches show a profit many more are run at a loss or have been taken over by banks. Complainant has established that this industry, for the past five years, has been undergoing a period of deflation and depression, and that the years 1925 and 1926 were more unfavorable than the year preceding. It does not follow that the earnings on citrus fruit traffic will prevent any readjustment of the deciduous fruit rates if present rates on the latter are not the lowest possible lawful rates compatible with the maintenance of adequate transportation service. Under the Hoch Smith resolution the relative prosperity of an industry over a period of years may be considered as well as its relative adversity. Considering the relative rates on and earnings of the deciduous fruit traffic in the light of the condition of the industry and of the service performed by the carriers, and giving due weight to the cost study presented by defendants, the Commission is of the view that the present rates are in excess of the lowest possible lawful rates. The heavy increase

in the volume of movement, the heavier loading of grapes, coupled with the increase in minimum to 30,000 pounds, and the other matters detailed herein, point to the conclusion that, in the light of the principles that must govern, the present rates are too high. Traffic and transportation conditions with respect to deciduous fruits, but more especially to grapes, have undergone a material change in the past 10 years, and many of these changes have been to the carriers advantage. Defendants have granted a voluntary reduction in rates to the citrus fruit industry, based upon the increase in the carload minimum and on a movement while large is not nearly as large as the transcontinental movement of deciduous fruits. The citrus fruit industry is shown to be in a condition of relative prosperity. The deciduous fruit industry on the other hand is in serious financial straits. This record would support a somewhat greater reduction in the rates on grapes than on deciduous tree fruits. But the growing of grapes is but a part of the basic deciduous fruit industry in California. Grapes and the other deciduous fruits are close enough in their transportation characteristics to bear a comparable relation as a classification matter. HELD, rate assailed of $1.73 unreasonable to extent it exceeds $1.60, rate of $1.60 attacked unreasonable to extent it exceeds $1.50. Calif., Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25.

(ff) The lowest possible lawful rates which the Commission may prescribe under the Hoch Smith resolution or any given agricultural traffic as to which depression has been shown must be somewhere within the zone of reasonableness permitted by the flexible limits of discretion reposed in the Commission, and such rates must be put as near the lowest limit or level of that zone as is compatible with the maintenance of adequate transportation service. Calif., Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, 34.

(gg) In California Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, Commission found unreasonable rates of $1.73 on fresh deciduous fruits from California to transcontinental groups A to M, inclusive, and $1.62 to Group J, and prescribed rates not to exceed $1.60 and $1.50, minimum weight of grapes to be increased from 26,000 to 30,000 pounds. HELD, upon reconsideration, the present rates are unreasonable and the Commission is not convinced that the rates prescribed are below what are necessary to afford complainants the lowest possible lawful rates compatible with the maintenance of adequate transportation service. California Growers & Shippers Protective League v. S. P. Co., 132 I. C. C. 582.

(hh) Rates on fresh deciduous fruits, other than apples, from California to destinations in transcontinental Groups A to M, inclusive, found unreasonable to extent they exceed lowest possible lawful rates compatible with maintenance of adequate transportation service under terms of Hoch-Smith resolution. Record establishes fact that California deciduous-fruit industry has undergone a period of deflation and depression such that economic situation prevailing clearly falls within terms of the resolution. Rates herein prescribed appear to be compatible with terms thereof and necessary to promote freedom of movement of agricultural products affected by the depression. Reasonable rates prescribed for future. Calif. Growers' & Shippers Protective League v. S. P., 129 I. C. C. 25.

(ii) Upon contention that a showing merely of price levels from 1917 to date is insufficient, because it is limited to the decline from war-time peaks, and that such a showing will not enable us to "give due regard to the general and comparative levels in market value * * * as indicated over a reasonable period, of years" as required by the Hoch-Smith resolution. FOUND: While prices were generally inflated during and following the period of the World War, freight rates likewise reached their peak at about the same time. One of grounds of complaint is that freight rates have not changed in face of changed conditions in the industry. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 30, 31.

(jj) Upon carriers' contention that if present rates have been justified under sections 1 and 3 of the act, nothing in the Hoch-Smith resolution or developed of record will provide lawful warrant for reduction thereof. FOUND: The resolution is in effect a direction to com-

mission to give agricultural commodities affected by depression the lowest rates possible without running counter to provisions of the act and carriers' rights under the Constitution. Therefore, the "lowest possible lawful rates" which may be prescribed under the resolution on any given agricultural traffic as to which depression has been shown, must be somewhere within the zone of reasonableness permitted by flexible limits of discretion reposed in commission, and must be put as near the lowest limit or level of that zone as is compatible with maintenance of adequate transportation service. See also 122 I. C. C. 235, 264, and other cited cases. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 32, 34.

(kk) In view of the relatively prosperous condition of the California citrus-fruit industry, rates on citrus fruit do not appear too high as compared with those from Florida to same destinations. However, it does not follow that earnings on former traffic will prevent any readjustment of California deciduous-fruit rates if latter rates are not the lowest possible lowful rates compatible with maintenance of adequate transportation service, as under the Hoch-Smith resolution the relative prosperity of an industry over a period of years may be considered as well as its relative adversity. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 44.

HOLD CHARGES

(a) "Hold Charges" assessed on shipments of lumber at East St. Louis, Ill., found illegal. Applicable tariff provided for assessment of such charges only when cars were held at request of shipper, and carrier here admits that no such advice was received from complainant. Reparation awarded. Milne Lbr. Co. v. B. & O., 113 I. C. C. 739.

(b) Complainant attacked charges collected on four cars of lumber shipped in Sept. 1923 from Arkansas, Texas and Mississippi to Illinois as illegal to extent they included $10.80 assessed for holding the cars at East St. Louis, Ill. Shipments were consigned to complainant at Breese, Ill., a point on defendants line east of East St. Louis. They were stopped in transit by defendant at East St. Louis, from which place complainant reconsigned them, and they moved to final destinations in Illinois. In addition to the applicable rate and demurrage and reconsigning charges a hold charge of $2.70 on each car at East St. Louis was assessed. The applicable tariff provided for assessment of hold charges only when cars were held at request of shipper. Defendant admitted at the hearing that complainant did not request holding of the cars at East St. Louis and that the charges complained of were without tariff authority. HELD, charges illegal to extent they included $10.80 for holding the cars at East St. Louis. Reparation awarded. Milne Lumber Co. v. B. & O. R. R., 113 I. C. C. 739.

I. DETERMINATION OF STATUS.

See Advanced Rates §24 (a); Interstate Commerce I; Rail-And-Water Rates (3d).

§ 1. In General.

(a) Contention that commission is without jurisdiction over shipments of commodities arriving from foreign ports and stored at ports of entry to await shipment to interior points located within same State as port of entry on ground that transportation is intrastate, non sustained. Temporary storage at ports does not divest such traffic of its foreign character acquired at time it begins its journey from foreign port, and movement to port of entry is only a step in its transportation to interior destinations. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155, 156.

(b) Import shipment arrived at East San Pedro, Calif., where it was unloaded from vessel. Complainant, being unable to handle as rapidly as discharged from ship, moved part to San Pedro where it was stored and subsequently forwarded to Los Angeles. No place of business was maintained by complainant at San Pedro or East San Pedro, nor was any of the shipment sold at, or distributed to consumers from, those points. FOUND: Shipment constituted import traffic subject to commission's jurisdiction, the foreign character of commerce not being destroyed by temporary storage at San Pedro, there being a continuing intention that transportation should not end at that point but that a further movement beyond—i. e., to Los Angeles—would follow water transportation. Woodhead Lbr. Co. v. P. E., 104 I. C. C. 751.

(c) There is nothing inherent in import traffic, as such, that entitles it to lower rates than domestic traffic, and commission may not require a difference in rates on the two classes of traffic unless there is a substantial difference in services performed. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705, 709.

(d) Rates on imported burlap bagging delivered to carriers from private warehouses in Savannah, Ga., for movement to Chicago and Milwaukee, found unreasonable to extent they exceeded rates contemporaneously in effect on similar shipments received by initial carrier from ship side, from ship dock, from initial carrier's own warehouse, or from customs warehouse. After shipments moved carrier amended application of its import rates so as to include shipments stored in private warehouses. Reparation awarded. Rockstroh & Co. v. C. of G., 112 I. C. C. 409.

II. REASONABLENESS OF RATES AND DISCRIMINATION.

See Advanced Rates §5 (2) (m) (n) (o), §14¾ (c); Cars and Car Supply §8 (r); Discrimination; Evidence §13 (4); Minimums §7 (v); Reasonableness of Rates; Restricted Rates (c).

§2. In General.

(a) Hudson Falls, N. Y.: Rate on imported wood pulp from Boston to, found not unreasonable or unduly prejudicial as compared with rates from Boston and New York to competing destinations. The Boston-Hudson Falls rate is not out of line with single-line and joint-line rates from New York or with single-line rates from Boston, and compare favor-Ondawa, less distant from Boston to Watertown, Gouverneur, Plattsburg, and Ondawa, N. Y. Moreover, in 102 I. C. C. 109, rate here in issue was found to be reasonable maximum joint rate on similar shipments moving from Boston to Ondawa, less distant than from Boston to Hudson Falls. Union Bag & Paper Corp. v. B. & M., 104 I. C. C. 327.

(b) Applicable sixth-class rate on imported rough-quarried marble blocks from New York to Chicago, applying via standard all-rail routes, found not unjustly discriminatory, unduly prejudicial, or in violation of long-and-short-haul clause of section 4 of the act. While lower commodity rate applies from Roxbury, Vt., and Lowell, Mass., competing points supplying domestic marble, such lower rate is not applicable through New York, being restricted to apply only over differential Canadian routes embracing carriers different than those involved in standard routes. Liquid Carbonic Co. v. E. R. R., 104 I. C. C. 446.

(c) Charges assessed on imported cement from San Pedro to Los Angeles, Calif., found applicable and not unreasonable. A lower rate was contemporaneously in effect on traffic transported on the high seas and received from ocean carriers at San Pedro, among other ports, but its application was definitely limited and did not include East San Pedro, the point at which shipments were received from ocean carriers, but which was not reached by defendant carrier's line. Woodhead Lbr. Co. v. P. E. Ry., 104 I. C. C. 751.

(d) Import shipment arrived at East San Pedro, Calif., where it was unloaded from vessel. Complainant, being unable to handle as rapidly as discharged from ship, moved part to San Pedro where it was stored and subsequently forwarded to Los Angeles. No place of business was maintained by complainant at San Pedro or East San Pedro, nor was any of the shipment sold at, or distributed to consumers from, those points. FOUND: Shipment constituted import traffic subject to commission's jurisdiction, the foreign character of commerce not being destroyed by temporary storage at San Pedro, there being a continuing intention that transportation should not end at that point but that a further movement beyond, i. e., to Los Angeles, would fol-

low water transportation. Woodhead Lbr. Co. v. P. E., 104 I. C. 751.

(e) Proposed reduction in time limit for storage in transit of tea, matting, grass, matting and grass articles, and rattan furniture, at Minnesota Transfer, Minneapolis, St. Paul, and Duluth, Minn., from 18 to 12 months, found justified except on tea. Established trade practices require a minimum storage of 18 months on tea, importers requiring benefit of such a time limit at mid-western points in order to be able to distribute therefrom in competition with importers at New York and Boston who can store tea indefinitely at ports of entry. Moreover, the 18-month limit has not been abused and no reason appears for depriving transcontinental carriers of opportunity to compete for this traffic. Conference Ruling of July 25, 1913, affirmed. Storage in Transit on Import Traffic, 104 I. C. C. 755.

(f) Domestic rates assessed on shipments of tin imported from China and shipped from San Francisco to Chicago, Newark, and New York found unreasonable to extent they exceeded lower import rate established subsequent to movements here involved. Reparation awarded. Mitsui & Co. v. Director General, 107 I. C. C. 469.

(g) Rate on imported wood pulp from Baltimore, Md., to Baltimore, Ohio, found not unreasonable or unduly prejdicial as compared with rates from Gulf ports to destinations in same general territory. Fact that present rate is not 78 per cent of New York-Chicago rate, less the differential from Baltimore, is not evidence that rate in effect is unreasonable or unduly prejudicial. The percentage formula is not a hard and fast rule, but is merely a guide. And further, the practice of not scaling back the New York-Chicago rate to 78 per cent territory is no confined to wood pulp but applies to rates on many commodities. Fairfield Paper Co. v. B. &. O., 109 I. C. C. 514.

(h) Rates on imported pyrethrum flowers from Seattle and Tacoma, Wash., and San Francisco, Calif., to Minneapolis, Minn., there ground and the product shipped to Winona, Minn., found unreasonable as compared with rates on similar traffic moving via Atlantic seaboard, and to extent it exceeded lower import commodity rate subsequently established. Reparation awarded. Winona Asso. of Commerce v. C., R. I. & P., 109 I. C. C. 648.

(i) Domestic rates on imported fertilizer materials, from Charleston, S. C., and Savannah, Ga., to Knoxville, Tenn., found not unreasonable, but unduly prejudicial to extent it exceeded import rate contemporaneously maintained from same points of origin to Chattanooga, Tenn., and other competing points. Reparation denied, due to lack of proof of damage. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705.

(j) Rates on imported fertilizer materials from Charleston, S. C., and Savannah, Ga., to Chattanooga, McCarty, and certain other points found to contravene long-and-short-haul provision of section 4 of the act. These rates were unrestricted as to routing, and shipments could move through Knoxville at a less rate than shippers at Knoxville must pay. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705, 706.

(k) There is nothing inherent in import traffic, as such, that entitles it to lower rates than domestic traffic, and commission may not require a difference in rates on the two classes of traffic, unless there is a substantial difference in services performed. Neither can it consider needs of the shipper as a basis for reasonable rates, nor fact that a rate has been reduced as establishing unreasonableness of the former rate. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705, 709.

(l) Complainant attacked commodity rates charged on three cars of imported burlap bagging in bales, which moved from a private warehouse at Savannah, Ga., in August, 1921, two cars to Milwaukee, Wis., and one to Chicago, Ill., as unjust and unreasonable. Shipments moved over C. of Ga., to Birmingham, Ala., and I. C., to Chicago, two to Milwaukee over C. M. & St. P. Distances were about 1,138 miles to Chicago and 1,223 miles to Milwaukee. Applicable rates 99c to Milwaukee and 97c to Chicago, made up of 55c to New Orleans plus 44c to Milwaukee and 42c to Chicago. On the dates named the C. of G., maintained a rate of 46c from Savannah to Chicago on burlap bagging originating in foreign countries and delivered to it from ship side or dock of the vessel bringing such traffic to the port of Savannah, and on such traffic stored in the possession of the carrier or received by it from customs bonded warehouses. Effective Dec. 15., 1923, the

C. of Ga., amended the application of its import rates to include shipments stored not more than 18 months at Savannah in private warehouses. HELD: Rates attacked unreasonable to extent they exceeded import rates on burlap bagging originating in foreign countries, reparation awarded. Rockstroh & Co. v. C. of Ga. Ry., 112 I. C. C. 409.

(m) Complainant attacked through rate charged on imported burlap, carloads, from New York, N. Y., and Jersey City, N. J., to Omaha, Neb., delivered subsequent to May 7, 1922, as unreasonable. Charged 71.5c prior to July 1, 1922, and 65c thereafter. Complainant contends rate should have been the same as to Kansas City, Mo., which were during the period of movement 64.5c and 58.5c respectively. No import rates are published on any commodity other than burlap from New York and Jersey City to points beyond Chicago, Ill., and the Mississippi River crossings. The location of Omaha and Kansas City with respect to the Gulf ports indicates that the rates to Omaha may properly be higher than to Kansas City. HELD: Rates attacked and present rate not unreasonable, complaint dismissed. Peters Mill Co. v. L. V. R. R., 112 I. C. C. 703.

(n) Complainant attacked rate of 48.5c on imported green coffee, carloads, from New Orleans, La., to Montgomery, Ala., as unreasonable and unduly prejudicial. This commodity loads over 40,000 pounds, is rated fifth class, moves regularly and in large volume and complainant has made no damage claims. In 93 I. C. C. 555 the commission found the rate attacked not unreasonable. In 96 I. C. C. 481 commission found the rate from New Orleans to Chattanooga not unreasonable. Traffic from New Orleans to Cincinnati moves through Chattanooga over the Southern, and traffic from south Atlantic ports to Nashville moves through Atlanta and Chattanooga over N. C. & St. L. Knoxville is intermediate to Cincinnati on traffic from south Atlantic ports. HELD: Rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Fletcher Wilson Coffee Co. v. L. & N. R. R., 113 I. C. C. 319.

(o) Class rate assessed on imported mahogany logs from Greenville Piers, N. J., to Knoxville, Tenn., found unreasonable to extent it exceeded lower contemporaneous commodity rate over a route other than route of movement, which lower rate was subsequently established over route of movement. Reparation awarded. Foreign & Domestic Veneer Co. v. L. & N., 112 I. C. C. 46.

(p) Application for authority to establish a rate on sugar from Key West, Fla., imported from Cuba, to Jacksonville, Fla., lower than to intermediate points, denied. Actual competition with water lines between Cuba and Jacksonville direct does not exist, and, while there is a substantial movement of raw sugar from Cuba to Port Wentworth (Savannah), Ga., the volume of refined sugar shipped to Jacksonville from Port Wentworth, is not shown, nor is it established that competition with that sugar warrants the rate proposed. Sugar from Key West, 112 I. C. C. 347.

(q) Rates on imported burlap bagging delivered to carriers from private warehouses in Savannah, Ga., for movement to Chicago and Milwaukee found unreasonable to extent they exceeded rates contemporaneously in effect on similar shipments received by initial carrier from ship side, from ship dock, from initial carrier's own warehouse, or from customs warehouse. After shipments moved carrier amended application of its import rates so as to include shipments stored in private warehouses. Reparation awarded. Rockstroh & Co. v. C. of G., 112 I. C. C. 409.

(r) Upon further hearing, taking into consideration development of the flaxseed industry in this country, the conditions which have demanded importation of flaxseed from abroad, the early rates on this commodity, comparisons with other rates, and comparative earnings thereunder, finding in American Linseed Co., 91 I. C. C. 663, wherein rates on flaxseed from New York Harbor points to Buffalo, N. Y., were found unreasonable and reparation awarded, affirmed, and converse finding in the Kellogg case, 77 I. C. C. 249, reserved. In addition, similar rates from same origin points to Chicago and Toledo, and from Philadelphia to Toledo found unreasonable and reparation awarded. Spencer Kellogg & Sons v. D., L. & W., 112 I. C. C. 629.

(s) Import rates on burlap from New York and Jersey City to Omaha found not unreasonable as compared with those to Kansas City. Import rates to these two destinations were formerly equal, but owing to maintenance of lower import rates from New Orleans

traffic was being diverted from Atlantic to Gulf ports and to meet this competition Atlantic port lines established rates which reflected basic adjustment of port differentials generally known as the Todd-Knott award of 1907. While domestic rates to Omaha and Kansas City are same, the location of these points with respect to the Gulf ports indicates that the rates to Omaha may properly be higher than to Kansas City. Peters Mill Co. v. L. V., 112 I. C. C. 703.

(t) All-rail and rail-and-water rates on imported tanning extracts and materials from New York and other eastern seaboard points to Buford, Ga., found unreasonable as compared with rates on similar products of domestic manufacture to and from competitive points in same destination territory and to points east and north. Rates on and after date on which carriers established reduced rates on imported products found not unreasonable. Reparation awarded. Bona Allen v. B. & M., 113 I. C. C. 215.

(u) Following Fletcher-Wilson Coffee Co., 93 I. C. C. 555, rates on imported green coffee from New Orleans, La., to Montgomery, Ala., found not unreasonable or unduly prejudicial as compared with rates to various points in Mississippi, Alabama, and Tennessee, and to St. Louis, Louisville, and Chicago. Fletcher-Wilson Coffee Co. v. L. & N., 113 I. C. C. 319.

(v) Complainant attacked rate of $1.80 charged on imported matting, matting rugs, and various straw goods, in carloads, from San Francisco, Calif., and Seattle, Wash., to Knoxville and Chattanooga, Tenn., Atlanta, Ga., and Jacksonville, Fla., as unreasonable and unduly prejudicial to extent it exceeded $1.50 maintained on like traffic to Louisville, Ky., Birmingham, Ala., and other points taking same rates, and in violation of section four. The rate of $1.50 is blanketed to a wide territory embracing, in general, Wisconsin, Iowa, Kansas, Oklahoma and Texas on the west, extending eastwardly through central territory to the Buffalo-Pittsburgh line, and including Ohio river crossings. No southern carrier serving the destination cities, whether it be the L. & N., Southern or another, controls the rates to the other destinations alleged to be preferred. The latter generally are not reached over the lines of the southeastern carriers. Through rates to the destinations alleged to be preferred are controlled by the transcontinental lines in connection with strictly central territory lines. HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Sterchi Bros. v. G. N. Ry., 113 I. C. C. 665.

(w) Rate on imported matting, matting rugs, and various straw goods from Pacific coast points to Knoxville, Chattanooga, Atlanta, and Jacksonville, found not unreasonable or otherwise unlawful as compared with rates contemporaneously maintained on like traffic from same origins to Louisville, Birmingham, and other points taking same rates. Sterchi Bros. v. G. N., 113 I. C. C. 665.

(x) Rates on imported cork waste and cork wood from New York to Baltimore (Highlandtown, Md.), found unreasonable to extent they exceeded lower rate subsequently established which lower rate was contemporaneously in effect during period of movement from same point of origin to Beaver Falls, Pa., a farther distant point, subject to Rule 77 of Tariff Circular 18-A. The establishment of a lower rate to a more distant point subject to Rule 77 is tantamount to an admission that a higher rate to an intermediate point is unreasonable; and when rates are so established shippers at intermediate point have a lawful right to a rate no higher than that to more distant point. Reparation awarded. Crown Cork & Seal Co. v. B. & O., 113 I. C. C. 726.

(y) Complainant attacked rates charged on cars of imported cork waste and cork wood having value for grinding purposes only during 1923 and 1924 from New York to Baltimore and that present rates are unreasonable and as compared with rates from New York to Beaver Falls, Pa., unjustly discriminatory and unduly prejudicial. Distance New York to Baltimore is 185 miles. Fifth class rate of 28.5c is applicable on cork waste and a commodity rate of 31.5c on cork wood having a value for grinding purposes only. From New York to Beaver Falls, about 548 miles, a commodity rate of 31.5c is published on both cork waste and cork wood. HELD, rate of 44c in effect on cork wood prior to Feb. 16, 1924 from New York to Baltimore unreasonable to extent it exceeded 31.5c reparation awarded. Crown Cork & Seal Co. v. B. & O. R. R., 113 I. C. C. 726.

(z) Respondents proposed to cancel an import commodity rate of 41.5c applying on iron and steel articles, carloads, from Texas gulf ports to St. Louis, Mo., and to certain points in Oklahoma. The rate to Oklahoma points, established on March 22, 1926, was published to expire on April 22, 1926. Concurrently therewith respondent proposed to cancel a like rate applicable from those ports, and from other Gulf ports, to Little Rock and Pine Bluff, Ark. It is also proposed, effective May 23, 1926, to increase a similar rate applying on such traffic from New Orleans, La., and other Gulf ports, not including other Texas Gulf ports, to St. Louis to 50c, making it applicable only over routes on and east of the Mississippi river. It is further proposed to restrict the import class rates so that fifth class rates will not apply on iron and steel articles from Texas gulf ports to these destinations. The changes proposed will have the effect of making domestic rates applicable to these destinations on practically all iron and steel articles imported through Gulf ports. The resulting rates from New Orleans to Pine Bluff and Little Rock will be 47 and 48.5c on merchant iron and 52.5c and 53.5c on structural iron, respectively. HELD, proposed increased rate on import iron and steel from New Orleans and other gulf ports, excluding Texas gulf ports, to St. Louis and the restriction in its application over lines east of the Mississippi river, and increased rates proposed from New Orleans to Little Rock and Pine Bluff justified. HELD, further, proposed increased rates from Texas gulf ports to St. Louis, to points in Oklahoma and Kansas and to Little Rock and Pine Bluff and the proposal to restrict the import class rates so that fifth class rates will not apply on iron and steel articles from those ports to the destinations involved not justified. HELD, further, reasonable maximum rates on these commodities from Texas gulf ports to the destinations under consideration will be those in Tables 10 and 11, Appendix 8, of the report in 77 I. C. C. 473. Import iron and steel from Gulf ports, 115 I. C. C. 373.

(aa) Respondents proposed to establish specific rates on import and inbound coastwise shipments of fertilizers from Texas Gulf ports to Shreveport, La., and points in that group. Respondents assert that their principal object at this time is to put all Texas and Louisiana Gulf ports upon a parity with respect to rates on import and inbound coastwise fertilizer traffic moving through such ports to Shreveport. The only justification offered is that the carriers are attempting to carry out what they consider to be the view of the Commission as expressed in a proceeding now pending. HELD, proposed schedules not justified. Fertilizers from Texas ports, 115 I. C. C. 582.

(bb) Complainant seeks reparation on some 107 cars of imported nitrate of soda shipped from points within the lighterage limit of New York to Greensand, N. J., two years prior to December 23, 1924, alleging that 13c was unreasonable, unjustly discriminatory and unduly prejudicial to extent it exceeded the subsequently established rate of 11.5c. The nitrate of soda was imported from South America and unloaded at New York harbor points. It moved in LV lighters at Jersey City and thence over that line to destination, charged fifth class rate of 13c. A commodity rate of 11.5c contemporaneously applied from New York harbor points to Boundbrook, N. J., and made effective to Greensand December 29, 1924. Distance to Greensand is 6 miles greater than to Boundbrook. HELD: Rate attacked not unreasonable, but unduly prejudicial to extent it exceeded rate to Boundbrook, reparation denied. Complaint dismissed. Granton Chemical Co. v. L. V. R. R., 115 I. C. C. 726.

(cc) In 104 I. C. C. 255, the Commission found rates charged on imported rattan furniture, in bundles, shipped from Seattle, Wash., to Cleveland, O., were not illegal and dismissed the complaint. Rates charged $8 per 100 pounds in June, 1922, and $7.20 in November, 1922, were less carload rates. Domestic rates were $5.165 in June and $4.65 in November, 1922. HELD: Rates charged illegal to extent they exceeded the domestic rates and minima, reparation awarded. Bailey Co. v. I. C. R. R., 118 I. C. C. 455.

(dd) In 115 I. C. C. 373, division 3, found that the proposed increased rate on import iron and steel from New Orleans, La., and other Gulf ports excluding Texas Gulf ports, to St. Louis, Mo., and the restriction in its application over lines east of the Mississippi river, and the increased rates proposed from New

Orleans to Little Rock and Pine Bluff, Ark., had been justified, and that the proposed increased rates on import iron and steel from Texas gulf ports to St. Louis, to Oklahoma and Kansas, and to Little Rock and Pine Bluff and the proposal to restrict the import class rates so that the fifth class rates would not apply on iron and steel articles from these ports had not been justified and that reasonable maximum rates on those commodities from Texas gulf ports to the destinations under consideration would be those set forth in tables 10 and 11 of Appendix 8 of 77 I. C. C. 473. This report will deal only with rates from the Texas Gulf ports. Commission is convinced that the present import rates from Texas gulf ports is too low. HELD: Affirmed former findings that the proposed increased rates from Texas Gulf ports to St. Louis, and other territory should not exceed those in 77 I. C. C. 743. Import iron and steel from Gulf ports, 118 I. C. C. 482.

(ee) Complainant attacked rates on imported flint brick and imported flint pebbles, in carloads, from New York, N. Y., and other Atlantic ports of entry to Oregon, Ottawa and Wedron, Ill., as unreasonable and unduly prejudicial. Oregon is on the Burlington 99 miles west of Chicago, Wedron is on the Burlington 74 miles southwest of Chicago and Ottawa on the Burlington and Rock Island 82 miles southwest of Chicago. Flint pebbles and flint brick, carloads, are rated sixth class in official classification, but from the ports and to the destinations here under consideration present standard all rail rate on flint pebbles are to Ottawa and Wedron 42.5c and to Oregon 45c, flint brick 39c and 41.5c. Taking into consideration the values and other transportation characteristics of the commodities here under consideration the present rates on flint brick do not appear unreasonable, but there seems to be no justification for higher rates on flint pebbles than on flint brick. HELD: Rates attacked on imported flint brick not unreasonable or otherwise unlawful but rates attacked on imported flint pebbles unreasonable to extent they exceed rates on flint brick, reparation awarded. National Silica Co. v. W. Ry. Co., 118 I. C. C. 669.

(ff) Combination rates on crude rubber from New York terminals, and on reclaimed rubber from points in c. f. a. territory, to Omaha, Nebr., found not unreasonable or otherwise unlawful as compared with lower import rates from Pacific coast ports to Akron, Ohio, blanketed back to Missouri River. Complainant contended that it was unreasonable to apply blanket rates eastbound while maintaining graded rates westbound. The eastbound blanket rates, however, are shown to be unduly low, having been established by western carriers for purpose of securing some of traffic to Akron which otherwise would move through New York. Moreover, the Mississippi River combination basis of constructing through rates has been in effect for many years, and has in numerous cases received approval of commission. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99.

(gg) Proposed increased rates on imported iron and steel articles from Texas Gulf ports to St. Louis, points in Oklahoma and Kansas, and Little Rock and Pine Bluff, Ark., and proposed restriction of import class rates so that fifth-class rates will not apply on iron and steel artices from those points to destinations involved, designed for purpose of restoring domestic and import rates to the same level, found not justified. Reasonable maximum rates for future prescribed. Import Iron and Steel from Gulf ports, 115 I. C. C. 373.

(hh) Third-class rates on imported plate glass from New York Harbor points to High Point and Winston-Salem, N. C., found unreasonable. Rates assailed were considerably higher than those to same destinations from more distant points and 58 per cent higher than fifth-class rate accorded window glass in all three classifications concerning which the commission said in 21 I. C. C. 113, that if fifth-class rates afford a fair remuneration for carriage of window glass there is no such difference in transportation condition as would warrant a rate of 50 per cent higher on plate glass. Reasonable rates prescribed for future and reparation awarded. Southern Mirror Co. v. S. Ry., 115 I. C. C. 590.

(ii) Fifth-class rate on imported nitrate of soda from New York, N. Y., to Greensand, N. J., found not unreasonable but unduly prejudicial in that it exceeded lower commodity rate contemporaneously in effect to Boundbrook, N. J., a competing point directly intermediate to Greensand, lower rate being established to latter named point subse-

quent to movement. Carrier showed that both assailed and subsequently established rates were subnormal, having been established to meet a depressed, postwar condition of the chemical industry; also that service thereunder entailed an expensive lighterage service in New York Harbor. Damages resulting from undue prejudice not shown with that degree of certainty which would entitle complainant to reparation. Granton Chemical Co. v. L. V., 115 I. C. C. 726.

(jj) Rates on imported flint brick found not unreasonable or otherwise unlawful as compared with those on comparable commodities, values and transportation characteristics considered, but rates on flint pebbles found unreasonable to extent they exceeded those contemporaneously in effect on flint brick. Reasonable rates prescribed for future and reparation awarded. Nat'l. Silica Co. v. W. Ry., 118 I. C. C. 669.

(kk) Complainant attacked commodity rate on 25 cars of imported pyrethrum flowers shipped from Pacific coast to Peoria, Ill., between Dec. 26, 1922 and Oct. 16, 1924 as unreasonable and unduly prejudicial. Charged $1.75. Loss and damage claims are rare. The commodity appears to be desirable traffic and to have yielded substantial earnings, but the record will not support a finding that the rates charged were higher than maximum reasonable rates. HELD, rates charged not unreasonable or unduly prejudicial, complaint dismissed. Allaire Woodward & Co. v. A. T. & S. F. Ry., 120 I. C. C. 249.

(ll) Complainant attacked rate on imported wood pulp, carloads, from Boston, Mass., to Whippany, N. J., since Sept. 1, 1924 as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved B. & M. to Mechanicville, N. Y., D. & H., to Binghamton, N. Y., D. L. & W. to Morristown, N. J., or Erie to Essex Falls, N. J., and M. & E. beyond. Applicable rate 37.5 cents, made up of sixth class of 28.5 cents to Morristown or Essex Falls and 9 cents beyond. A commodity rate of 4 cents was established from Morristown to Whippany effective Aug. 5, 1925 and since that date a combination rate of 32.5 cents has been in effect via Morristown. No rates on wood pulp from Boston have been instanced by either complainant or defendants which are upon a level, distance considered, as high as that of the rate attacked. HELD, rate attacked unreasonable to extent it exceeded 28.5 cents, reparation awarded. United Paperboard Co. v. B. M. R. R., 120 I. C. C. 280.

(mm) Import rates are frequently lower than domestic rates, the former being influenced by considerations which are unrelated to, and have little, if any, bearing upon the reasonableness per se of the domestic rates. Tompkins Summer Co. v. C., M. & St. P. Ry., 120 I. C. C. 677, 678.

(nn) Rate on imported pyrethrum flowers from Pacific coast points to Peoria, Ill., found not unreasonable or otherwise unlawful. Contention was made that manufacturer at Peoria is at a marked disadvantage with competing manufacturers at Baltimore and New York City by reason of ocean rates to those points lower than ocean-and-rail rates to Peoria, but no evidence was offered of actual damage. It was shown that western carriers do not control ocean rates to Atlantic ports and are not responsible under section 3 for any prejudicial situation that may exist. Furthermore, while rate charged appears to have yielded substantial earnings they were no higher than maximum reasonable rates and in 109 I. C. C. 648 the commission awarded reparation on this commodity to basis of rate here assailed. Allaire, Woodward & Co. v. A., T. & S. F., 120 I. C. C. 249.

(oo) Sixth-class rate on imported wood pulp from Boston, Mass., to Whippany, N. J., found unreasonable as compared with lower commodity rates contemporaneously in effect from Boston and other points to various destinations for comparable distances, and with rates found reasonable by commission on this commodity in 101 I. C. C. 171 and other cited cases. Reasonable rate prescribed for future and reparation awarded. United Paperboard Co. v. B. & M., 120 I. C. C. 280.

(pp) Upon contention that domestic rates are unreasonable when compared with lower import rates, HELD: Import rates are frequently lower than domestic rates, the former being influenced by considerations which are unrelated to, and have little, if any, bearing upon, reasonableness per se of domestic rates. See 62 I. C. C. 422. Tomkins-Summer Co. v. C., M. & St. P., 120 I. C. C. 677, 678.

(qq) Complainant attacked rates charged on imported china clay and ball clay, carloads, from Philadelphia, Pa., to New Jersey as unreasonable, unduly prejudicial; that the charge assessed for handling the clays from shipside to cars where the rate is less than 9 cents per 100 pounds was and is unreasonable and unduly prejudicial. These clays are rated sixth class, but commodity rates are generally applicable. Since March 19, 1924 a charge of 50 cents per ton has been assessed by the carriers serving Philadelphia for handling cargoes from ship side to cars. This charge is absorbed by the line haul carrier in all cases where the rate is 9 cents per 100 pounds or more. Where the rate is less than the amounts specified, those amounts are the maximum total charges. Shippers have the option of performing the handling service at their own expense but seldom, if ever, exercise that privilege. In Philadelphia Commercial Traffic Managers v. B. & O. R. R., 104 I. C. C. 173, the 50 cent handling charge when the rail rate was less than 9 cents per 100 pounds, was found not unreasonable or otherwise unlawful. Since August 10, 1925 defendants have provided rates on these clays to central territory on the basis of the standard brick rates. These clays and the domestic clays which take the standard brick rates may not be readily distinguished and rated the same is official classification. HELD, rates attacked since Aug. 10, 1925 unreasonable and unduly prejudicial to extent they exceeded the standard brick rates, reparation awarded; handling charge not unreasonable or otherwise unlawful. Ceramic Traffic Asso. v. P. R. R. Co., 123 I. C. C. 591.

(rr) Charge for handling imported china and ball clay from ship side to cars at Philadelphia, found not unreasonable or unduly prejudicial. Charge is the same as that applicable at Philadelphia on export, import, and intercoastal traffic found reasonable in 104 I. C. C. 173, where it was shown that charge was established for purpose of placing Philadelphia on a substantial parity with Baltimore and New York, and record here does not warrant a modification of that finding. Ceramic Traffic Asso. v. P. R. R., 123 I. C. C. 591.

(ss) Rates on imported china clay and ball clay from Philadelphia, to New Jersey destinations, found unreasonable and unduly prejudicial as compared with rates contemporaneously maintained on like traffic to Beaver Falls and Newcastle, Pa., East Liverpool and Steubenville, Ohio, and Wheeling, W. Va., and to extent they exceeded rates made under trunk-line brick scale prescribed in 68 I. C. C. 213. Aside from fact that better equipment is required, transportation characteristics of ball and china clay compare favorably with those of articles included in uniform brick list. Imported clays are not readily distinguished from domestic clays, which take standard brick rates and are rated the same in official classification. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Ceramic Traffic Asso. v. P. R. R., 123 I. C. C. 591.

(tt) Complainant attacked rates on burlap, carloads, from New York, Philadelphia and Boston to Memphis, Tenn., as unreasonable and unduly prejudicial. In carloads it is rated fourth class in official territory and sixth class in southern territory. Practically all of the burlap used in this country is imported, about 85% from Calcutta, India. New York and New Orleans are the principal ports of entry. Present rates to Memphis are joint sixth class rates subject to the southern classification, and those to St. Louis are joint commodity rates, the domestic all rail rates being equivalent to the sixth class rates subject to the official classification. Defendants propose rates of 63.5c from New York and Philadelphia and 66c from Boston to apply on domestic and import traffic, all rail and water and rail routes. Short line distance to Memphis is about 100 miles greater than to St. Louis. HELD, all rail domestic and import rates of 63.5c from New York and Philadelphia and 66c from Boston just and reasonable, and all rail import rate New York to Memphis unduly prejudicial to extent it exceeds contemporaneous all rail import rate on burlap from New York to St. Louis by more than 12c. Water and rail rates not prescribed. Memphis Freight Bureau v. A. G. S. Ry., 126 I. C. C. 87.

(uu) Complainants alleged that the all rail rates on imported nitrate of soda, carloads, from New Orleans, La., and other Gulf ports, to Pollard, East Alton, Edwards, and East St. Louis, Ill., Grasselli, Ind., Lockland, O., Ashburn, Mo., and Mooar, Ia., also the barge and rail rates on imported nitrate of soda

in carloads from New Orleans and other Gulf ports to Grasselli and Lockland were and are unjust, unreasonable, unjustly discriminatory and unduly prejudicial. This commodity is imported from Chile. Its principal use is as a fertilizer or fertilizer ingredient, but it is also used to a considerable extent in the manufacture of explosives and in smaller quantities for other purposes. Nitrate of soda is desirable traffic as it moves in large volume, loads heavily, and no special service is required in its handling. Owing to its susceptibility to damage by water it is shipped in box cars. As it is an oxidizing material, the regulations for the transportation of explosives and other dangerous articles require that it be shipped under a yellow label. Loss and damage claims are negligible. Defendants proposed to cancel the application of domestic fertilizer and fertilizer material rates on nitrate of soda, in carloads, from Gulf ports to destinations north of the Ohio river, leaving the sixth class rate applicable on domestic shipments of this commodity. Tariffs were suspended and in Nitrate of Soda from Gulf Ports, 85 I. C. C. 586, the Commission found them not justified. There are numerous technical violations of the fourth section. There is no merit in complainants contention that, in the absence of an import commodity rate, domestic commodity rates are applicable on imported nitrate of soda, even though import class rates are maintained, and that, therefore, violations of the fourth section occur at all points on the I. C. except Chicago. The domestic commodity rates apply only in the absence of tariffs naming specific import rates. The import class rates maintained from Gulf ports are specific rates and are applicable when no import commodity rates are published. HELD, rates attacked on imported nitrate of soda, carloads, from New Orleans, Gulfport, Mobile, Pensacola and other Gulf ports were not and are not unjustly discriminatory or unduly prejudicial and rates to Cincinnati and Lockland were not and are not unreasonable, but that to other destinations were, are, and for future will be unreasonable to extent they exceed 31.5c by all rail routes to Pollard, East Alton and East St. Louis, and 35c to Ashburn, Edwards, Grasselli and Hegeswich, and 32.5c by barge and rail routes to Grasselli and Hegeswich. Import rates to East St. Louis and Calumet City unreasonable to extent they exceeded 31.5c and 35c, respectively, but rates attacked on muriate of potash, sulphat of potash and kainit to these destinations not unreasonable. Rates atacked unreasonable to extent they exceed 27c to Cairo, 31.5c to Louisville, and East St. Louis, 35c to Peoria, Springfield and Chicago and 37c to Milwaukee. Rates on muriate of potash, sulphate of potash and kainit, carloads, to Peoria and Springfield unreasonable to extent they exceed 35c, but rates to other destinations not unreasonable, reparation awarded. Egyptian Powder Co. v. I. C. R. R., 126 I. C. C. 293.

(vv) Complainant alleged that the rates on imported wood pulp in rolls and bales, from New York, Hoboken, N. J., Philadelphia, Pa., and Baltimore, Md., to Garfield, N. J., were and are unjust and unreasonable. Similar allegations were made with respect to sixth class rates of 22.5c and 12.5c on like traffic from Baltimore and New York to Passaic-Dundee, N. J. Garfield is a local point on the Erie about 12.5 miles north and west of Jersey City. The wood pulp was imported from Europe. Charged sixth class rates. Wood pulp is desirable traffic. It loads heavily, moves in regular volume, and is not susceptible to damage in transit. HELD, rates attacked from Hoboken, Philadelphia and Baltimore to Garfield are unreasonable to extent they exceed 10.5c, 16.5c, and 20.5c, and from Baltimore to Passaic, 20.5c. From New York to Garfield and Passaic not unreasonable, reparation awarded. Hammersley Mfg. Co. v. E. R. R. Co., 126 I. C. C. 491.

(ww) Import rate on burlap from New York, to Memphis, Tenn., found unduly prejudicial to extent it exceeds the contemporaneous rate to St. Louis by more than 12 cents. Complainant competes with St. Louis in production of burlap bags but because of higher rate to Memphis, purchases of burlap are made through the New Orleans market at a higher price. However, while short-line distance from New York to Memphis is greater than to St. Louis, in 28 I. C. C. 543 it was stated that a 16-cent differential in favor of St. Louis on imported burlap was not warranted, and differential prescribed herein would seem to be sufficient to amply compensate for additional haul as well as make due allowance for different transportation conditions in official and southern territories. Memphis Freight Bureau v. A. G. S. 126 I. C. C. 87.

(xx) Joint sixth-class rates on imported burlap from New York, Philadelphia, and Boston to Memphis, Tenn., found unreasonable as compared with lower domestic commodity rates contemporaneously in effect to St. Louis, Mo., and from New York to points in Illinois, Wisconsin, and Missouri, for comparable distances; and with import rates from Baltimore, Md., to Louisville, Ky., and from Savannah, Ga., to Memphis, Louisville, Cairo, Ill., and Cincinnati, Ohio. As practically all burlap is imported there appears to be no necessity for different domestic and import rates, and lower rates proposed by carriers for application on both domestic and import traffic do not appear to be in excess of maximum reasonable rates. Reasonable rates prescribed for future. Memphis Freight Bureau v. A. G. S. 126 I. C. C. 87.

(yy) Import rates on muriate of potash, sulphate of potash and kainit, from New Orleans and other Gulf ports to destinations in Illinois, Indiana, Ohio, Kentucky, Wisconsin, Iowa, and Missouri, found not unreasonable as compared with domestic rates on same commodity, except to Springfield and Peoria, Ill., and points grouped therewith. Reasonable rates, applicable from ship side at points of origin, prescribed for future and reparation awarded. Egyptian Powder Co. v. I. C. 126 I. C. C. 293.

(zz) Import rates on nitrate of soda from New Orleans and other Gulf ports to points on and north of Ohio River, found not discriminatory or unduly prejudicial, but unreasonable as compared with lower domestic rates contemporaneously in effect and with lower import rates to points south of the river for comparable distances. Reasonable rates to apply from ship side at points of origin prescribed for future and reparation awarded. Egyptian Powder Co. v. I. C. 126 I. C. C. 293.

(3a) Upon contention that combination of domestic commodity rates lower than the import rate is a violation of the aggregate-of-intermediates clause of section 4 of the act, HELD: Contention is without merit, for in applying provisions of the fourth section, rates and fares of the same kind must be compared with one another. See Conf. Ruling 304. Moreover, domestic rates apply only in absence of tariffs naming specific import rates. Egyptian Powder Co. v. I. C., 126 I. C. C. 293, 301.

(3b) Shipments of nitrate of soda from New Orleans, were billed to Edwards, Ill., and moved by carrier to complainant's plant at Olin, Ill., a point six miles farther distant without further orders. At time shipments moved no import class or commodity rates were maintained to Olin and import commodity rates applicable to Edwards were assessed. HELD: As Olin is located in the Peoria, Ill., group to which lower rates on domestic shipments were contemporaneously maintained, and as such rates apply in absence of specific import rates, shipments were overcharged. Refund of overcharges directed. Egyptian Powder Co., v. I. C., 126 I. C. C. 293, 301, 302.

(3c) Water-and-rail rates on imported nitrate of soda from New Orleans and other Gulf ports to Lockland, Ohio, Hegewisch, Ill., and Grasselli, Ind., found not discriminatory or unduly prejudicial, but unreasonable, except to Lockland, as compared with lower domestic water-and-rail rates on fertilizer contemporaneously in effect. Reasonable rates to apply from ship side at points of origin prescribed for future and reparation awarded. Egyptian Powder Co. v. I. C. 126 I. C. C. 293, 302, 303.

(3d) Sixth-class rates on imported wood pulp from New York, N. Y., to Garfield and Passaic-Dundee, N. J., found not unreasonable, but rates from Hoboken, N. J., Philadelphia, Pa., and Baltimore, Md., to Garfield, and from Baltimore to Passaic-Dundee, found unreasonable as compared with lower commodity rates on wood pulp to Piermont and Orangeburgh, N. Y., and Hamburg, N. J., and various destinations in same general territory for comparable distances, and to extent they exceeded rates equal to 90 per cent of sixth class, which basis was found reasonable in 52 I. C. C. 84, for application on woodpulp board, building paper, and roofing paper, in official territory. Reasonable rates prescribed for future and reparation awarded. Hamersley Mfg., Co. v. E. R. R. Co., 126 I. C. C. 491.

(3e) Complainant attacked rates charged on crude clay, in carloads, from Kentucky, Tennessee and Mississippi to destinations in central and trunk line territories as unreasonable, and rates charged on imported china clay and ball clay, carloads from North Atlantic ports to central and trunk line territories were inapplicable and until August 10, 1925 unreasonable to extent

they exceeded rates established on that date from and to the same points. There are three kinds of clay, distinguished by their mode of origin and formation, namely primary kaolin, which is still found in contact with the parent rock, commonly called English china clay; secondary kaolin, which has been washed away from the primary deposits; and the kaolin which has been transported and mixed with organic material and is distinguishable in color from the secondary kaolins, which are of a light or cream color. Complainants in 18058 contend that clay used in the manufacture of pottery is crude clay and should be accorded the rate published on crude clay, common or fire. It does not follow that, because pottery clays can be used in the manufacture of brick, common or fire clay can be used in the manufacture of pottery. The rates under attack are those approved in Kentucky and Tennessee clay, 41 I. C. C. 498, as modified by the subsequent general increases and reduction, and are equivalent to the sum of the rates applicable on clay to and from the Ohio river basing points. Clay used in the manufacture of pottery is found only in restricted areas and is considerably more valuable than common fire clay. The use to which it is put requires that it be transported in clean, tight box cars, whereas common or fire clay, which is not susceptible to deterioration, may be shipped in leaky or open top cars. In 18064 and 18662, import clay, complainants contend that the shipments come within the description "clay, crude or ground (common or fire)". The rates on ball clay and china clay were reduced to that basis on August 10, 1925. China clay and ball clay imported through the north Atlantic ports come from southern England and are not subjected to any manufacturing process before importation. Clean tight box cars are used in transporting the shipments from the ports to the consuming points in order to protect the commodity from freezing and from contamination by foreign substances such as cinders, iron rust, or oil. The distinction between china clay, ball clay, and what is known as "common clay" was recognized by complainants witnesses, who admitted that common crude clay used in the manufacture of common brick can not be used for the manufacture of pottery. Despite such evidence complainants contend that, as china clay and ball clay are crude clays, they should have been charged at the rates on "clay, crude or ground (common or fire)". It is true that pottery clays can be used in the manufacture of brick, but because of their high value they are not ordinarily so used, and can not properly be included as brick clays. HELD, rates attacked not unreasonable, complaints dismissed. United States Potters Asso. v. A. C. & Y. Ry., 128 I. C. C. 249.

(3f) Upon contention that since differentials of New Orleans and other Gulf ports and south Atlantic ports under New York and other north Atlantic ports are now in effect on all European and African import traffic destined to points north of Ohio River, in order to allow Gulf ports to compete on a fair basis because of superior steamship service at north Atlantic ports, that differentials at Texas ports under New Orleans are justified for same reason, FOUND: While such commercial advantages can not be determinative of rate relationships and ordinarily can not be taken into consideration when passing upon question of undue prejudice, they serve to show that advantages of New Orleans are superior to those of Texas ports and that differentials mentioned would not likely cause serious injury to New Orleans. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 368.

(3g) Suspended schedules filed in purported compliance with findings in original report 100 I. C. C. 110, wherein relationship between rates on certain commodities in export, import, and coastwise movement from points in Kansas, Oklahoma, and Texas to Galveston and New Orleans and ports taking same rates, were found unduly prejudicial and ordered removed by establishment of differentials prescribed, found not justified, without prejudice to filing of new schedules conforming with findings herein. Galveston Commercial Asso. v. G., H. & S. A. 128 I. C. C. 349, 392, 393.

(3h) Complainant alleged that rates charged on four cars of imported and domestic mah-jongg sets from San Francisco and Paraffin, Calif., to Chicago, Ill., during Nov. 1923, were unreasonable and illegal. Shipments moved over S. P., U. P. and C. & N. W, charged second class rate of $4.43. Rate in the op-

posite direction was $2.50 commodity rate, which was subsequently established eastbound. HELD, rate attacked on domestic sets unreasonable to extent it exceeded $2.50, rate on import sets inapplicable to extent it exceeded $2.385 the rate on games, n. o. s. reparation awarded. Paraffine Companies v. S. P. Co., 128 I. C. C. 421.

(3i) Sixth-class rate on imported wood pulp from Boston, Mass., to Fort Edward, N. Y., found unerasonable as compared with lower commodity rate contemporaneously in effect; with those to various points in c. f. a. territory for comparable distances; with blanket rates extending from points on the Hudson River to Buffalo and Niagara Falls; and to extent it exceeded distance scale rates on like traffic from Wilmington, Del., to points in New England territory prescribed in 122 I. C. C. 543. Reasonable rates prescribed for future and reparation awarded. International Paper Co. v. B. & M., 128 I. C. C. 466.

(3j) Complainant alleged that rates charged on imported wood pulp in carloads, between March 23, 1923 and July 5, 1924, from Boston, Mass., to Fort Edward, N. Y., as unreasonable. Loss and damage claims are negligible. Wood Pulp is rated sixth class in the governing official classification. Fort Edward is on the D. & H, 55.5 miles north of Troy and 36.5 miles north of Mechanicville, N. Y. Over the short route the distance is 223 miles. B. & A., published a joint commodity rate of 22.5c which was also established by the B. & M, on July 26, 1923. Prior thereto the applicable rate was joint sixth class rate of 28.5c. Effective July 17, 1924, the rate on imported wood pulp was reduced to 21.5c via both routes. HELD, rate attacked unreasonable to extent it exceeded 20.5c, reparation awarded. International Paper Co. v. B. & M. R. R., 128 I. C. C. 466.

(3k) Rate on wood pulp, imported found unreasonable as compared with rate contemporaneously in effect on imported china clay, an analogous commodity. International Paper Co. v. B. & M., 128 I. C. C. 466, 468.

(3l) Complainant attacked rates charged on 36 cars of imported china clay shipped between Oct. 11, 1922, and Sept. 23, 1924, from Philadelphia, Pa., to Newton Falls, N. Y., as unreasonable. They moved over Reading to Newberry Jct., Pa., thence N. Y. C. to destination. Newton Falls is on a branch line of the N. Y. C. 46 miles from Carthage, N. Y. Charged sixth class rate of 30c prior to June 1, 1923 and 30.5c thereafter to Carthage plus sixth class proportional rate of 3c beyond. On April 9, 1925, a commodity rate of 28.5c was established. HELD, rate attacked unreasonable to extent it exceeded 28.5c reparation awarded. Newton Falls Paper Co. v. Reading Co. 128 I. C. C. 563.

(3m) Complainant attacked commodity rates charged on carloads of crushed stone shipped between Jan. 1, 1922 and Nov. 24, 1925, from Security, Md., to Best Gate, Md., and from Martinsburg, W. Va., to destinations in Maryland were unreasonable and unlawful. Security is on the main line of the W. M. 3 miles east of Hagerstown, Md. It is also on a branch line of the B. & O. 3.6 miles from Security Jct., Md., a point 1.5 miles south of Hagerstown. Martinsburg is on the main line of the B. & O. The destinations are on the W. B. & A. Charged on shipments moving over the W. M. at joint sixth class rate of $4.30. Effective Feb. 22, 1926, the B. & O. established a joint rate of $1.40 from Martinsburg and Security to the destinations. HELD, applicable rate over B. & O. $1.10, over W. M. unreasonable to extent it exceeded $1.40, reparation awarded. North American Cement Corp. v. W. M. Ry., 129 I. C. C. 90.

(3n) Complainant alleged that the rates charged on 23 cars of imported burlap, shipped between July 18, 1918 and July 19, 1919 from Pacific coast ports to Omaha, Neb., were unreasonable. Two carloads moved from Tacoma, Wash., five from San Francisco, Calif., and the remainder from Seattle, Wash., charged import rate of 85c, except that on one shipment from San Francisco a rate of 75c applied. Prior to June 25, 1918 an import rate of 55c from Pacific coast ports, blanketed to transcontinental groups from Denver, Colo., to Chicago, Ill., applied on burlap bagging to Omaha. On the date mentioned the import rate, in common with other import rates from the Pacific coast, was canceled. A class rate of $1.065 thereupon became applicable to Omaha, but on July 1, 1918 a blanket import rate of 85c was established. On May 29, 1919 this rate was reduced to 75c, and following the general increase of 1920 became $1. At present an import rate of

65c, minimum 50,000 pounds, to Omaha. HELD, rates assailed not unreasonable, complaint dismissed. Peters Mill Co. v. Director General, 129 I. C. C. 331.

(3o) Respondents proposed a revision in the rates applicable on imported iron and steel articles, in carloads, from Texas gulf ports to St. Louis, Mo., and Little Rock and Pine Bluff, Ark., from three of these ports to various destinations in Oklahoma and southern Kansas, and from two of these ports on most iron and steel articles, to Kansas City, Mo. An import commodity rate of 41.5c is now maintained on certain iron and steel articles, in carloads, from Texas gulf ports to St. Louis, Little Rock and Pine Bluff. Previous decision, Import Iron and Steel from Gulf ports, 115 I. C. C. 373 and 118 I. C. C. 482. ABSORPTION OF TERMINAL CHARGES AT PORTS. Terminal charges at the ports absorbed in connection with the present import rates including switching, wharfage, and carloading charges. Under the proposed rates only switching charges would be absorbed. There is nothing of record to indicate that carriers should be required to perform greater service for the same charge on import traffic than on domestic traffic between the same points except where necessary to avoid undue prejudice or preference. The services for which the terminal charges at the Texas ports accrue do not exisit with respect to domestic traffic. Very few domestic carload rates include car loading, one of the services for which the terminal charges apply. Respondents have justified the addition of reasonable terminal charges at the ports to the socalled domestic rates for application on import traffic from ship side provided no undue prejudice or preference results. EQUALIZATION OF TEXAS PORTS. The ports of Galveston, Houston and Texas City are equalized under the present import commodity rate of 41.5c to all destinations here considered, except Kansas City, and that to Little Rock, Pine Bluff and St. Louis this equalization includes all the Texas gulf ports. The ocean rates on the traffic are the same to Galveston and Houston and generally the same vessel calls at both ports. No sufficient justification appears for disturbance of the existing parity of the rail rates on import traffic from these ports. RATES ON PIPE WIRE NAILS ETC. From the Texas gulf ports to St. Louis, Little Rock, and Pine Bluff, from Galveston, Houston and Texas City to the intermediate destinations in Oklahoma and Kansas under consideration, and from Galveston and Houston to Kansas City, respondents propose to apply the socalled domestic commodity rate of 61c on pipe. An import commodity rate of 47.5c now applies on wire and nails from the Texas Gulf ports to Kansas City and no change is proposed in that rate but, subject to this exception, respondents proposed to apply the domestic class rates on wire and nails from the Texas gulf ports to the various other destinations under consideration. The import tariff naming the present commodity rates of 41.5c and 47.5c also provides import class rates to some of the destinations considered and, by alternative provision of the tariff, these class rates apply if lower than the commodity rates from and to the same points. HELD, suspended schedules not justified without prejudice to filing tariffs in accordance with conclusions hereinbefore reached. Import iron and steel articles, 129 I. C. C. 350.

(3p) Complainant alleged fifth class rate of 19.5c charged on carloads of imported vegetable fibers, from New York Lighterage, Manhattan Piers, N. Y., and Greenville Piers, N. Y., to Beverly, N. J., has been and is unreasonable. Beverly is on the Pennsylvania, 15.6 miles northeast of Philadelphia. Traffic moves from New York harbor points to Beverly via South Amboy, N. J., distance 84 miles. No special or expedited service is required; movement in considerable volume is uniform throughout the year; and claims for loss and damage are negligible. A rate of 17.5c was applicable on hemp from Long Island City, N. Y., distance 84 miles. HELD rate charged unreasonable to extent it exceeded 17.5c reparation awarded. Wall Rope Works v. Pennsylvania R. R., 129 I. C. C. 717.

(3q) K. C. S., M. P. and T. & N. O. proposed to establish an interstate rate of 38.5c on import and coastwise shipments of newsprint paper, in carloads from Lake Charles, La., to Shreveport, La. Short line distance is 183.9 miles. Short line distance from New Orleans to Shreveport is 304.2 miles. Present rate is fifth class 55c. The rate over lines of the other respondents, other than K. C. S. is a commodity rate

of 27c. By the schedules under suspension the K. C. S. proposed a commodity rate of 38.5c, 16.5c lower than the class rate, and the other respondents proposed to increase their present commodity rate by 11.5c to the same figure. No justification was offered for increasing the commodity rate of 27c. HELD, suspended schedules in so far as they effect a reduction over the K. C. S. has been justified, other respondents not justified. Newsprint paper from Lake Charles, 132 I. C. C. 543.

(3r) Complainant alleged that rates charged on 52 cars of imported dry quebracho extract shipped from New York to Waukegan, Ill., between June 11, 1924 and Dec. 11, 1925 were unreasonable and unduly prejudicial. Rated fifth class, which was charged. Commodity rates of 45, 43 and 40 were established over the standard route effective July 20, 1926 and over the National Dispatch and rail lake and rail routes effective Aug. 20, 1926. These are the present rates and the basis to which reparation is sought. HELD, rates assailed not unreasonable or unduly prejudicial. Complaint dismissed. Griess Pfleger Tanning Co. v. C. V. Ry., 132 I. C. C. 661.

(3s) Rates on imported burlap from Pacific coast points to Omaha, Nebr., found not unreasonable as compared with those contemporaneously in effect from Gulf and Atlantic ports; with import rates prescribed in 77 I. C. C. 78; 59 I. C. C. 570, on istle and nitrate of soda from Mexico border points and Atlantic ports, respectively; or with those prescribed in 57 I. C. C. 465, and other cited cases, on copra, manila hemp, unground pepper, and various other commodities between Pacific ports and eastern destinations. Peters Mill Co. v. Director General, 129 I. C. C. 331.

(3t) Addition of reasonable terminal charges at Texas ports to domestic rates for application on imported iron and steel articles from ship side, found justified, provided no undue prejudice results. Nothing of record indicates that carriers should be required to perform greater service for same charge on import traffic than on domestic traffic between same points except where necessary to avoid undue prejudice or preference. Here, services for which terminal charges at ports accrue do not exist with respect to domestic traffic and very few domestic rates include car loading, one of services for which terminal charges apply. Import Iron and Steel Articles, 129 I. C. C. 350, 353, 355.

(3u) Proposed import rates on iron and steel articles from Texas Gulf ports to St. Louis, Mo., and Little Rock and Pine Bluff, Ark., based on distance scale prescribed in 77 I. C. C. 473, in purported compliance with 115 I. C. C. 373; 118 I. C. C. 482, found not justified. While Houston objects to present equalization of Texas ports on ground that distances to various destinations are less from that port than from Galveston thus depriving it of its natural advantage of location, two ports named are and have been equalized as to import and export rates on various traffic; ocean rates are same to both ports; and no justification appears for disturbance of existing parity of rail rates on import traffic. See 101 I. C. C. 116. Import Iron and Steel Articles, 129 I. C. C. 350, 355, 356.

(3v) Proposed application of domestic commodity rate on imported pipe, wire, and nails from Texas ports to St. Louis, Mo., Little Rock and Pine Bluff, Ark. from Galveston, Houston, and Texas City, Tex., to intermediate destinations in Oklahoma and Kansas; and from Galveston and Houston to Kansas City, Mo., except on wire and nails to Kansas City, in purported compliance with 115 I. C. C. 373; 118 I. C. C. 482, found not justified. Domestic rates are higher than those under distance scale prescribed in 77 I. C. C. 473, and in 123 I. C. C. 203 (294), it was stated that a common rate should apply on staple articles in merchant-iron, structural-iron, and wire lists and same rates were prescribed therein on articles involved. Import Iron and Steel Articles, 129 I. C. C. 350, 356, 357.

(3w) Proposed restriction of fifth-class import rates on iron and steel articles from Texas Gulf ports to St. Louis, Mo., Little Rock and Pine Bluff, Ark., and various points in Oklahoma and Kansas, so as not to defeat application of import commodity rates established in purported compliance with 115 I. C. C. 373; 118 I. C. C. 482, found justified in so far as found necessary to give effect to bases of rates herein found reasonable. Tariff naming import commodity rates and class rates provides that latter shall apply if lower than former, and since in many cases class

rates are lower, restriction thereof is necessary in order to conform to fourth-section requirements and findings herein. Import Iron and Steel Articles, 129 I. C. C. 350, 357, 358.

(3x) Fifth-class rate on imported benzol from Eagle Pass, Tex., to Ivorydale, Ohio, a point within Cincinnati switching district, found unreasonable as compared with lower commodity rates contemporaneously in effect from near-by Texas producing points to Cincinnati and other northern markets; with rates on gasoline to Cincinnati; and to extent it exceeded lower combination consisting of lower commodity rate from Eagle Pass to St. Louis, subsequently established plus a contemporaneous commodity rate St. Louis to Cincinnati. Reparation awarded. Caldwell & Taylor v. C., R. I. & G., 129 I. C. C. 626.

(3y) Fifth-class rates on imported vegetable fibers, commonly known as hemp, sisal, istle, manila, gopalupore, varn, jute, and jute butts, from New York Lighterage, Manhattan Piers, N. Y., and Greenville Piers, N. J., to Beverly, N. J., found unreasonable as compared with import commodity rates on fibers from New York Harbor points to points in Massachusetts, New York, New Jersey, and Pennsylvania, with commodity rate on rope from Beverly to New York and to extent they exceeded lower contemporaneous rates on fibers from Long Island City, N. Y. Reasonable rates prescribed for future and reparation awarded. Wall Rope Works v. P. R. R., 129 I. C. C. 717.

IV. TARIFFS AND CONSTRUCTION.

§ 4. In General.

See Tariffs.

(a) Commission suspended schedules proposing increased rates for interstate transportation of papermaker's clay and scrap or waste paper and provided that use of such rates be deferred on interstate traffic pending hearing and decision. Terms "interstate transportation" and "interstate traffic" technically do not comprehend import traffic, i. e., foreign commerce, and carriers, so construing them, charged increased rates on imported clay and waste paper. Increased rates so assessed found unreasonable to extent they exceed rates on this traffic in effect immediately prior to date when the increases were made effective. Various Commodities between New England Points, 113 I. C. C. 44.

(b) On imported rattan furniture in bundles, moving from Seattle, Wash., to Cleveland, Ohio, no import c. l. rates were in effect and l. c. l. rates were assessed. Domestic rates provided minimum weights for cars of varying length but carriers elected to load this furniture in smaller cars. HELD: Domestic rates were applicable, and action of carriers in loading in smaller cars should not debar shipper from benefit of minimum on cars which presumably would have held shipments. Reparation awarded and original report 104 I. C. C. 255, reversed. Bailey Co. v. I. C., 118 I. C. C. 455.

(c) An importer of nitrate of soda, bought in Chile and brought from there in chartered ships, received delivery at Wilmington, N. C., which was his place of business. On arrival the nitrate was stored or delivered from the dock to purchasers to whom quantities had been resold; all contracts of resale providing for delivery at Wilmington. Purchasers, either from store or dock, reshipped by rail on new billing to various manufacturers of fertilizer or dealers to points both within and without the state. HELD that such reshipments were not in continuance of the foreign shipment, not being within the intention of the importer, whose purpose was fully subserved on delivery to him at Wilmington, but were new and independent movements, with which the importer had no concern, and that where such a reshipment was to a point within the state it was an intrastate shipment, and subject to established local rates. Seaboard Air Line Ry. Co. v. Lee, 14 Fed. (2d) 439.

(d) Second-class rate on games or toys, n. o. i. b. n., was assessed on imported mah-jongg sets. Contemporaneously lower import commodity rate applied on toys, in boxes or barrels (except as otherwise provided) viz: Games, not otherwise specified herein; Games, toy." Upon contention that the rates applied exclusively on toys, FOUND: While to some extent mah-jongg is played by children, it can not be denominated a toy, and since commodity rates must be applied strictly, only articles clearly comprehended within descriptive terms of such rates can be considered as removed from the classification. Here,

however, the abbreviation "viz" appears to include articles having similar characteristics but which do not come within general terms theretofore stated. Obviously item names rates on toy games, and also on games which can not be described as toy games, as any other interpretation would render meaningless descriptive term "Games, not otherwise specified herein." Rate assessed was therefore inapplicable. Reparation awarded. Paraffine Companies v. S. P., 128 I. C. C. 421.

V. ADVANCED RATES.

See Advanced Rates.

§5. In General.

(a) Proposed increased rate on imported iron and steel articles from New Orleans and other Gulf ports, excluding Texas Gulf ports, to St. Louis, and its restriction to lines east of Mississippi River, and proposed increased rates on those articles from New Orleans to Little Rock and Pine Bluff, Ark., designed for purpose of restoring domestic and import rates on this traffic to same level, found justified, nothing inherent in import traffic, as such, being shown which would entitle it to lower rates than domestic traffic. Import Iron and Steel from Gulf ports, 115 I. C. C. 373.

(b) Upon further consideration, former report, 115 I. C. C. 373, affirmed and proposed increased rate on imported iron and steel articles from New Orleans and other Gulf ports, excluding Texas Gulf ports, to St. Louis, and its restriction to lines east of Mississippi River, and proposed increased rates on those articles from New Orleans to Little Rock and Pine Bluff, Ark., found not justified. Import Iron and Steel from Gulf Ports, 118 I. C. C. 482.

(c) Upon further consideration, former report, 115 I. C. C. 373, affirmed and proposed increased rates on iron and steel articles, imported from Texas Gulf ports to St. Louis, to points in Oklahoma and Kansas, and to Little Rock and Pine Bluff, Ark., and proposed restriction of import class rates so that fifth-class rates will not apply on iron and steel articles from these points to the destinations involved, found not justified. Reasonable maximum rates from Texas Gulf ports prescribed for the future. Import Iron and Steel from Gulf Ports, 118 I. C. C. 482.

I. DETERMINATION OF STATUS.

§½. In General.

See Foreign Commerce §2; Import Traffic I.

(a) Whether or not a shipment is interstate must be determined by essential

character of the commerce, taking into consideration, among other things, the intention of party controlling movement of the traffic; and this must be ascertained from all of the pertinent facts, circumstances, and conditions, and not by mere billing or forms of contract. Hines Yellow Pine Trustees v. A., C. & Y. Ry., 109 I. C. C. 453, 456.

(b) Shipments moving from points in Maryland through the District of Columbia to other points in Maryland move in interstate commerce and are subject to commission's jurisdiction. Security Cement & Lime Co. v. B. & O., 113 I. C. C. 579, 580.

(c) By every fair test the transportation of this coal from mine to the upper lake ports is an interstate carriage, intended by the parties to be such. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 313.

(d) Interstate shipments of oil from company's refineries by its own vessels to its storage plant, to be there stored and reshipped to substations and to customers at such times and in such quantities as business should demand, HELD terminated by such stoppage and storage, so that subsequent shipments from such plant to points within state were subject only to intrastate rates; the stoppage being in good faith. Standard Oil Co., v. Atlantic Coast Line R. Co., 6 Fed. (2d) 911; Same v. Seaboard Air Line Ry. Co., 6 Fed. (2d) 911.

(e) Interstate commerce, which begins when the articles are delivered to carrier for transportation, ceases when they have arrived at their destination, and are there held for final disposal or use. Fox Film Corporation v. Trumbull, Governor of Connecticut, 7 Fed. (2d) 715; American Feature Film Co., Inc., v. Same 7 Fed. (2d) 715.

(f) Interstate character of shipments of oil from oil company's refineries by its own vessels to its storage plant, to be there stored and reshipped to substations and customers, at such times and in such quantities as business should demand, HELD terminated by such stoppage and storage, so that subsequent shipments from such plant to points within state were subject only to intrastate rates, notwithstanding further movement was contemplated when shipment was originally made. Atlantic Coast Line R. Co., v. Standard Oil Co., of N. J. 12 Fed. (2d) 541.

(g) Shipper in good faith and for convenience of business has right to gather articles in interstate commerce at distributing points, and thereafter as demands arise ship articles in entirely separate and distinct movement, even though bulk is not broken, continuity of journey not perceptibly interrupted, nor articles transferred from original means of carriage. Standard Oil Co., of Ky., v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633.

(h) Interstate movement of gasoline and oil, shipped into state from different points and there transferred to storage tanks, to be later shipped to different points in state, HELD to end on delivery of products to such storage tanks, and later shipment was intrastate, there being no question of bad faith in having delivery made at storage tanks. Standard Oil Co. of Ky. v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633.

(i) Intent of shipper at time shipment was made is vital element in determining whether admittedly interstate movement ends at given point. Standard Oil Co., of Ky., v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633.

(j) In determining whether or not freight movement is interstate or intrastate, court must look to essential nature of movement, and not merely to its accidents or isolated incidents. Standard Oil Co., of Ky. v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633.

(k) Distribution of gasoline and oils from storage tanks, to which they are shipped in interstate commerce, to owner's service stations as needs of business demand, HELD local in character, as if made directly to consumer. Standard Oil Co., of Ky., v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633, 634.

(l) Shipment of fuel oil from storage point within state HELD intrastate, though contracted to consumer before shipped to storage point from without state, where interstate shipment was ended for storage and safe-keeping until time of delivery, and no particular part of interstate cargo was intended for particular purchaser. Standard Oil Co., of Ky., v. Atlantic Coast Line R. Co., 13 Fed. (2d) 633, 634.

(m) Where shipment of automobiles in interstate commerce with title remaining in consignor was refused by consignee

and placed in warehouse by carrier in its own name, interstate character of shipment ceased, justifying state tax thereon despite Const. U. S. art. 1, § 8. The Columbia Motors Co., v. Ada County, (Idaho, 1926) 247 Pac. 786.

(n) Employment and service of railroad employe in water service department who fixed pumps and kept up wells on railroad at places where trains got water coming from Kansas and going into New Mexico, were in furtherance of interstate commerce. Chicago R. I. & G. Ry. Co., v. Bernnard, (Tex., 1925) 275 S. W. 505.

(o) When crude oil is pumped from tank steamers, which bring it into the state, into tank cars on the railroad tracks to be carried to the places to which it was originally intended by the shippers it should be taken, the last leg of the journey is not made an intrastate movement because a business agent of the shipper at the port of entry supervises the transshipment and rebilling of the commodity. State ex rel. Burr, State Railroad Com'rs, v. Seaboard Air Line Ry. Co., (Fla., 1926) 109 So. 656.

(p) The mere existence of business agencies of oil companies at ports of entry, to which crude oils and gasoline are brought in interstate movement, is not the determining factor which converts the movement, which began in interstate commerce, into an intrastate movement. State ex rel. Burr, State Railroad Com'rs, v. Seaboard Air Line Ry. Co., (Fla., 1926) 109 So. 656.

(q) The cause and purpose of the delay of the petroleum products, brought into the state in interstate movement, at the ports of entry to which they are first consigned are the factors by which it may be determined whether reshipments of the products at the ports of entry from storage tanks and warehouses, into which the products have been stored, is or is not a continuation of the original interstate movement. State ex rel. Burr, State Railroad Com'rs, v. Seaboard Air Line Ry. Co., (Fla., 1926) 109 So. 656.

(r) Where oil is transported in tank steamers from other states or countries to Florida ports and there unloaded into permanent storage tanks, owned and maintained by the shippers, for the purpose of reshipment as orders are received, and not for the purpose of promoting the safe or convenient transit in continuous interstate movement, such reshipment from permanent storage tanks at the ports to interior Florida points is intrastate and not interstate transportation. State ex rel. Burr, State Railroad Com'rs, v. Seaboard Air Line Ry. Co., (Fla., 1926) 109 So. 656.

(s) Change in method of transportation by floating to carriage on vessel does not affect continuity of interstate passage actually intended by parties. Hughes Bros. Timber Co., v. State of Minnesota, 47 Sup. Ct. 170.

(t) Owner's intention to ultimately send logs out of state, or preparatory gathering at depot for such purpose, does not place them in interstate commerce until movement to another state has actually begun. Hughes Bros. Timber Co., v. State of Minnesota, 47 Sup. Ct. 170.

(u) Imposition of direct burden on interstate commerce by state is restrained by force of the commerce clause, and must necessarily fall, regardless of its purpose. Public Utilities Commission of Rhode Island v. Attleboro Steam & Electric Co., 47 Sup. Ct. 294.

(v) Test of validity of state regulation is not character of general business of company, but whether particular business which is regulated is essentially local or national in character. Public Utilities Commission of Rhode Island v. Attleboro Steam & Electric Co., 47 Sup. Ct. 294.

(w) Sale of electric current generated in one state to purchaser in another state, with delivery at the state line, is a transaction in "interstate commerce." Public Utilities Commission of Rhode Island v. Attleboro Steam & Electric Co., 47 Sup. Ct. 294.

(x) To require that regulating body of state be advised of proposed change seriously affecting transportation conditions is not such obvious interference with interstate commerce as, on application for preliminary injunction, should be assumed beyond state's power. Lawrence v. St. Louis-San Francisco Ry. Co., 47 Sup. Ct. 720.

(y) Mere immediate reshipment of traffic which has moved interstate is not sufficient to give it interstate character where reshipment moves intrastate. New England Brick Co. v. B. & M., 129 I. C. C. 607, 609.

(z) Shipments of potatoes from points within state to seaboard, some of which were already sold for freign delivery, and all of which were intended for export, held not intrastate commerce entitled to lesser intrastate rates. Chandler v. Pennsylvania R. Co., 9 Fed. (2d.) 703.

(aa) As respects freight rates, interstate movement of fuel oil shipped into state on annual contracts with consumers in state, executed before shipment. HELD, not to end on delivery of oil into storage tanks at port of entry, where title passed from producer, to await further shipment to consumers as needed. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441.

(bb) Intent of those engaged in interstate commerce determines whether interstate commerce ends at particular point. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441, 442.

(cc) As respects freight rates, interstate movement of gasoline and kerosene. HELD, not to end when temporarily stored in tanks at port of entry awaiting distribution to shipper's "bulk stations" in interior points, from which distributed to consumers, notwithstanding title did not pass from producer until delivery at entry port. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky 16 Fed. (2d.) 441, 442.

(dd) Interstate movement of gasoline and kerosene, as respects freight rates. HELD, to end on delivery into storage tanks at port of entry, where 13 per cent, of quantity received into tanks was used locally. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441, 442.

(ee) Interstate movement of lubricating oil, as respects freight rates. HELD, to end at port of entry in state from which it was to be distributed to local consumers. Atlantic Coast Line R. Co. v. Standard Oil Co. of Kentucky, 16 Fed. (2d.) 441, 442.

§1. Beginning and End of Transit.

See Through Routes and Joint Rates §19; Transportation §11.

(a) Under the provisions of the commerce clause of Const. U. S. art. 1, § 8, railway companies may be regulated by Congress if they engage in interstate commerce, even though they may also carry on intrastate commerce. Missouri-Kansas-Texas R. Co., of Texas v. Mars, (Tex., 1927) 294 S. W. 941.

§2. State Shipment Through Another State.

(a) Where freight passed from Southern Illinois into Indiana and back to Illinois, it was "interstate commerce," and act to regulate commerce was applicable. Michael v. United States, 7 Fed. (2d) 865.

§3. Participation in Interstate Movement.

See Through Routes and Joint Rates §3½, §6½.

(a) When certain commodities, like petroleum and petroleum products, which are transported in bulk, come into the state on an interstate movement, whether the subsequent movements of such products from the receiving point in the state to other points in the state are movements in interstate or intrastate commerce must be determined by the essential character of the commerce, and not by the billing or forms of contracts. State ex rel. Burr., State Railroad Com'rs, v. Seaboard Air Line Ry. Co., (Fla., 1926) 109 So. 656.

(b) Where owner of pulp wood, in which buyer had acquired qualified interest by partial payment, agreed to float timber from place of piling for delivery on vessels for interstate shipment, the shipment was in interstate commerce from time it was placed afloat, precluding state taxation thereof. Hughes Bros. Timber Co., v. State of Minnesota, 47 Sup. Ct. 170.

(c) The Commission is without jurisdiction to prescribe a rate for the future from a point in the United States through a foreign country to a point in the United States. Montello Granite Co. v. M. St. P. & S. S. M. Ry., 129 I. C. C. 427, 429.

(d) Mere immediate reshipment of traffic which has moved interstate is not sufficient to give it interstate character where reshipment moves intrastate. New England Brick Co. v. B. & M., 129 I. C. C. 607, 609.

II. CONTROL AND REGULATION.

See Control and Regulation.

§4. State.

See Courts V; Crimes XI; Discrimination §11; Evidence §35; Express Companies §1½; Loss and Damage §9; State Rates and Regulation; Transportation §9, §11.

(a) Although state may legislate on matters affecting interstate commerce that are local and limited in character and operation, such power must be so exercised as not unreasonably to affect interstate traffic. State v. Caplan, (Vt., 1927) 135 Atl. 705, 708.

(b) Order of Rhode Island Public Utilities Commission, fixing rates on electric current generated within state and sold to distributor in another state, HELD invalid, as imposing a burden on interstate commerce, although regulation of such rates would necessarily benefit local consumers of electricity furnished by same company. Public Utilities Commission of Rhode Island v. Attleboro Steam & Electric Co., 47 Sup. Ct. 294.

(c) State may, in public interest, reasonably control and regulate use of its highways, so long as it does not directly burden or interfere with interstate commerce. Interstate Busses Corporation v. Holyoke St. Ry. Co., 47 Sup. Ct. 298.

§5. United States.

See Constitutional Law.

(a) Judicial decisions recognize paramount authority of Congress to regulate interstate and foreign commerce, and in certain of them uphold direct assertions of its supreme authority or exercise thereof through commission as against conflicting exercises of a State's police power. See 219 U. S. 467 and other cited cases. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 221.

(b) Provision of federal Constitution covering interstate commerce is not self-executing, and, when subject affecting interstate commerce is local and limited in character and operation, state may legislate thereon until Congress assumes control over it. State v. Caplan, (Vt., 1927) 135 Atl. 705, 707.

(c) Commerce clause of federal Constitution is not a limitation upon proper and reasonable exercise of police power abiding in state. State v. Caplan, (Vt., 1927) 135 Atl. 705, 708.

(d) Power of Congress to regulate commerce with Indian tribes is not terminated by mere fact that allotments of land have been made and citizenship conferred on Indians. Browning v. United States, 6 Fed. (2d) 801.

(e) In determining validity of exercise of power by Congress to regulate commerce with Indian tribes, circumstances surrounding such exercise should be considered. Browning v. United States, 6 Fed. (2d) 801.

(f) Power of Congress under Const. art. 1, §8, to regulate commerce with Indian tribes is continuing, and cannot be addicated, and covers traffic and intercourse, not only with tribes, but with members thereof, though within limits of state. Browning v. United States, 6 Fed. (2d) 801.

(g) Power of Congress to regulate commerce between states is complete, exhaustive, and paramount and not subject to interference by any state or municipality, in view of Const. U. S. art. 6, par. 2, and article 1, §8, cl. 3. St. Louis Connecting R. Co., v. Blumberg, (Ill., 1927) 156 N. E. 298, 299.

(h) In passenger's suit against railroad involving interstate commerce, pertinent federal statutes and decisions of federal courts determining their applicability control over inconsistent decisions of state courts. Franklin v. Southern Pac. Co., (Calif., 1927) 256 Pac. 214.

(i) Interstate shipments are governed by rules of law laid down by federal courts. Walters v. Kansas City Southern Ry. Co., (Mo., 1925) 266 S. W. 491.

(j) Interstate Commerce Act, § 12, as amended by Act. Cong. Feb. 28, 1920, § 415 (U. S. Comp. St. § 8576), enacted pursuant to power of Congress under Const. U. S. art. 1, § 8, vested Interstate Commerce Commission with complete and exclusive control of everything pertaining to regulation of interstate commerce, and state must surrender its jurisdiction and right of regulation whenever question involved is within purview of Commission's powers. Louisville & N. R. Co., v. Brashear, (Ky., 1926) 289 S. W. 1094.

(k) Paramount federal power over interstate commerce should not be exerted unnecessarily, hastily, or harshly; the demand of comity and courtesy, as well as law, requiring that, whenever possible, conflict with state authorities and resultant irritation be avoided. Lawrence v. St. Louis-San Francisco Ry. Co., 47 Sup. Ct. 720.

(l) The fact that regulation, within the acknowledged power of Congress to enact, may affect the ports of one state more than those of another, cannot be construed as a violation of any constitutional provision. Galveston Commercial Asso. v. G. H. & S. A. Ry., 128 I. C. C. 349, 378.

(m) It is impossible to decree dissolution for intrastate traffic as violative of state law, of combination for general traffic of competing railroads, without directly affecting and upsetting interstate traffic, and thus trespassing on federal subject, as to which Congress has legislated. Continental Securities Co. v. Michigan Central R. Co., 16 Fed. (2d.) 378.

I. JURISDICTION.

See Accounting §1; Adjacent Foreign Country; Advanced Rates §1, §2, §9, §20; Alaska; Allowances I; Bills of Lading I; Blanket Rates §1; Branch Lines §6; Bridges and Tolls; Classification §2; Control and Regulation; Courts; Demurrage §1, §1½; Differentials §½; Discrimination §2; Divisions §1; Electric Lines I; Equalization of Rates §1; Export Rates and Facilities §1; Express Companies §1; Facilities and Privileges §1; Foreign Commerce §1; Government Control; Interstate Commerce §2; Lighterage §1; Long and Short Hauls §2; Loss and Damage §4; Overcharges; Passenger Fares and Facilities; Precooling; Procedure Before Commission; Proportional Rates §1; Reconsignment §9; Reduced Rates §1;Refrigeration §1; Released Rates §1; Reparation §1; Routing and Misrouting §1; Storage §1; Substitution of Tonnage; Switch Tracks and Switching §2; Tap Lines §2; Tariffs §1; Terminal Facilities §1; Through Routes and Joint Rates §1; Transportation §1½; Undercharges §1; Water Carriers §2; Weights and Weighing §2.

§1. In General.

(a) It is not within commission's province to prescribe rates which appear desirable to it, but to ascertain whether existing rates are unlawful and, if so, to prescribe lawful rates in lieu thereof. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 134, 135.

(b) The commission should not undertake to usurp the office of a court and

pass upon merits of issues raised in court proceedings. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 226.

(c) Carriers may accord rates which commission may not require and their doing so does not of necessity afford a criterion for testing propriety of their refusal to accord similar treatment to other commodities, under other conditions, or in other territories. See 23 I. C. C. 432, 437. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 137.

(ca) Carriers may accord rates which commission may not require and their doing so does not of necessity afford a criterion for testing propriety of their refusal to accord similar treatment to other commodities, under other conditions, or in other territories. See 23 I. C. C. 432, 437. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 137.

(d) Upon contention that the regulation of train service for transportation of property is not one of the powers delegated to the commission by Congress; further, that by legislative enactment, the state has prescribed the minimum train service that may be maintained on all railroads within its borders, and that the sole jurisdiction of such service is in the state. HELD: Under section 1, paragraphs (10) (11), and (14), and section 15 of the act, jurisdiction to regulate the supply of trains for transportation of property has been vested in the commission, and where there is a conflict of jurisdiction similar to that here considered the state law must give way to the Federal statute. See 225 U. S. 501 and 267 U. S. 404. Train Service on Northern Pacific, 112 I. C. C. 191, 192, 195.

(e) Upon contention that commission has no authority to regulate the usual freight service maintained on any railroad and that its jurisdiction over train service is to be exercised only in times of emergency. HELD: Under section 1 (10) and (11) of the act the duty of carriers with respect to "car service" is continuous, and it is their duty to furnish safe and adequate car service at all times, the terms being used with equal force. It can not be said that duty of furnishing safe car service is in force only in times of emergency, and the same is true with respect to term adequate. Moreover, section 1 (14) and section 15 impose the duty upon carriers to furnish an adequate "supply of trains" for transportation of property, and confers authority upon commission to determine and prescribe just, reasonable, and equitable practice to be followed in respect thereto. Train Service on Northern Pacific, 112 I. C. C. 191, 192, 195.

(f) Claims for refund of transportation charges upon a "commercial transaction" or under terms of contract of sale are not subject to commission's jurisdiction, the basis of sale being a thing apart from the transportation. Such claims are for a court of law if refunds can not be voluntarily obtained from carriers. Briggs & Turivas v. Director General, 112 I. C. C. 313, 315.

(g) The commission has only such jurisdiction as is specifically conferred upon it by statute, and the two-year limitation of action provision as set forth in section 16 (3) of the act sets a limit to its powers, as distinguished from a rule of law for its guidance in reaching conclusions. See 246 U. S. 638, 642. Pfister & Vogel Leather Co. v. E. R. R., 112 I. C. C. 659, 660.

(h) A shipper may rightfully assail, and commission may properly condemn, unreasonable or otherwise unlawful rates regardless of their present use. Nebraska State Ry. Comm. v. A. & W., 113 I. C. C. 467, 469.

(i) The act contemplates that carriers shall receive just and reasonable compensation for transportation service rendered by them. It does not contemplate that they shall participate in transportation without any charge, and it certainly does not permit or require such transportation at less than no charge. Such a result is wholly repugnant to the letter and spirit of the law, and when it is sought to be accomplished it is to be condemned. The commission's power under the law is ample to deal with cases of this kind and commission would be derelict in its duty if it did not intervene to prevent unwarranted dissipation of carrier revenue regardless of where the responsibility lies. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597, 605.

(j) The commission must deal with freight charges as such and not as part of the price of a commodity. Duluth Boiler Works v. A. T. & S. F. Ry., 118 I. C. C. 161, 164.

(k) Fact that transportation charges have not been paid by a shipper does not

deprive commission of jurisdiction to pass upon lawfulness of such charges. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607, 608.

(l) The commission can not attempt to go beyond transportation charges as such to determine equities of parties under sales contracts. Sinclair Crude Oil Co. v. A., T. & S. F. 126 I. C. C. 73, 80.

(m) Upon contention that in an I. & S. proceeding the only issue before commission is as to lawfulness of suspended schedules which commission is called upon either to condemn or approve; that commission has no authority to approve a basis intermediate between the existing rates and basis sought to be made effective; and that where the proposed schedules are disapproved a finding that present rates are too low is "irrelevant," "gratuitous," and "not binding on anyone," HELD: This contention is wholly untenable and in conflict with numerous decisions of the commission and with specific provisions of the act. See Section 15 (7) of the act; 20 I. C. C. 307, 314, and other cited cases. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(n) It is no part of commission's duty to canvass and compare wage scales and other expenses and incidents of industrial operation, or the social or economic conditions surrounding a particular industry with a view to adjusting the rate structure to them. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 359.

(o) Under Interstate Commerce Act Feb. 4, 1887 (24 Stat. 379), as amended (U. S. Comp. St. § 8563 et seq.), and particularly sections 12-15 (U. S. Comp. St. §§ 8576, 8581-8583), Interstate Commerce Commission is corporate agency of federal government, with administrative and quasi judicial powers for the regulation and control of interstate commerce, possessing broad powers of investigation, regulation, and control over transportation companies within the scope of its powers, but beyond such powers having no authority, except such as may be necessarily incident to its specific powers, and it is not a federal court under the Constitution, nor does it exercise judicial powers. Davis, Director General of Railroads, v. Rochester Can Co., 221 N. Y. S. 666.

(p) Where there is conflict of jurisdiction between state court and Interstate Commerce Commission as to building and acquiring certain railroad, power to determine whether state action will obstruct interstate commerce is in United States as incident of power to regulate such commerce. People v. Illinois Cent. R. Co., (Ill., 1927) 155 N. E. 841.

(q) The action of the Interstate Commerce Commission is legislative or administrative in making rates and charges. The order of the Commission fixing rates and charges for transportation has the effect of legislative acts, and is the law determining the rights of the parties involved in the controversy. Chicago, R. I. & P. Ry. Co. v. Howe-McCurtain Coal & Coke Co., (Okla. 1926) 247 Pac. 986.

(r) Under the Interstate Commerce Acts, if the lawfulness or unlawfulness of the charge or service depends upon its being reasonable or unreasonable, just or unjust, the determination of the matter involves the trial of an issue of fact. The Interstate Commerce Commission is the exclusive trier of the question of fact so made. If there then remains a question among the parties, it goes to the court, for protection and enforcement as a judicial matter. Chicago, R. I. & P. Ry. Co. v. Howe-McCurtain Coal & Coke Co., (Okla., 1926) 247 Pac. 986.

(s) Interstate Commerce Commission, acting under Congress' paramount authority, occupies entire field pertaining to interstate comerce thereby ousting state jurisdiction to control intrastate transportation in manner resulting in unjust or unreasonable discrimination against interstate commerce. Atlantic Coast Line R. Co. v. Commonwealth State Corporation Commission (Va., 1926) 133 S. E. 883.

(t) Under Interstate Commerce Act, § 13, subd. 2, as amended by Act June 18, 1910, § 11 (Comp. St. § 8581), a complaint is not a prerequisite to exercise of jurisdiction by commission, which on its own motion may investigate and act on any matter which might be subject of complaint. United States v. New York Cent. R. Co., 47 Sup. Ct. 130.

(u) Price regulation is not matter within the province of commission. Sugar Between Louisiana and Texas Points 128 I. C. C. 309, 313.

(v) As an agency of Congress the Commission must assume that in laying statutory duties upon the Commission it has not transcended its powers. Gal-

veston Commercial Asso. v. G. H. & S. A. Ry., 128 I. C. C. 349, 379.

II. PRIMARY JURISDICTION.

See Actions at Law; Courts.

§2. In General.

(a) Owner of railroad entirely within state, which is leased to company operating interstate railroad, HELD to be engaged in "interstate commerce" and under authority of Interstate Commerce Commission, rather than Illinois Commerce Commission, in view of Callaghan's Ann. St. 1924, c. 111a, par. 109, as regards right of state courts to interfere with certificates and orders of Interstate Commerce Commission in condemnation proceedings. St. Louis Connecting R. Co., v. Blumberg (Ill., 1927) 156 N. E. 298, 299.

(b) Complaint to effect that rules and orders of Interstate Commerce Commission are unreasonable or unfair or result of unlawful or unreasonable practice or unjust discrimination or undue prejudice to shippers would involve an administrative question over which Interstate Commerce Commission alone would have jurisdiction. Midland Valley R. Co. v. Barkley, (Ark., 1927) 291 S. W. 431.

(c) Whether there are sufficient grounds to authorize the Interstate Commerce Commission to grant an order permitting the purchasers of a railroad company to assume liability upon a judgment of the sold-out corporation HELD a mixed question of law and fact, the determination of which was within the exclusive jurisdiction of the Commission. Missouri-Kansas-Texas R. Co., of Texas, v. Mars, (Tex. 1927) 294 S. W. 941.

(d) Where legality of rate depends on a controverted question of fact, it must be determined initially by Interstate Commerce Commission, though construction of tariff not dependent on extrinsic evidence or disputed fact is question which court may consider in first instance. J. C. Famechon Co. v. Northern Pac. Ry. Co. 11 Fed. (2d) 312.

(e) Whenever rate, rule. or practice is attacked as unreasonable or discriminatory, preliminary resort must be had to Interstate Commerce Commission. J. C. Famechon Co. v. Northern Pac. Ry. Co., 11 Fed. (2d.) 312.

(f) Courts may not exert original authority over subjects primarily within jurisdiction of Interstate Commerce Commission. J. C. Famechon Co. v. Northern Pac. Ry. Co., 11 Fed. (2d.) 312.

(g) In railroad's action to collect special tariff charge, Interstate Commerce Commission HELD not to have exclusive preliminary jurisdiction, precluding jurisdiction of court. Oyler v. Cleveland C. C. & St. L. Ry., Co.,16 Fed. (2d.) 455.

(h) The Interstate Commerce Commission is not negislative body, and cannot make or modify the law, having power only to execute and enforce. W. A. Hover & Co. v. Denver & R. G. W. R. Co., 17 Fed. (2d.) 881.

§3. Finality of Findings.

See Allowances §3; Procedure Before Commission §11.

(a) Finding of Interstate Commerce Commission of reasonableness of a rate cannot be pronounced arbitrary or unreasonable, if there is any competent evidence in its support. Western Paper Makers' Chemical Co., v. United States, 7 Fed. (2d) 164.

(b) Rail rates established by Interstate Commerce Commission on rosin from points south of the Ohio river to Kalamazoo and Grand Rapids, Mich., HELD not unjustly discriminatory as against such cities, or violative of the "long and short haul" clause of Interstate Commerce Act, § 4, as amended by Act Feb. 28, 1920, § 406, though rate from Gulf points was higher to Kalamazoo than to Chicago, and higher to Grand Rapids than to Milwaukee. Western Paper Makers' Chemical Co., v. United States 7 Fed. (2d) 164.

(c) The determination whether rate is unreasonable or discriminatory is a question on which the finding of Interstate Commerce Commission is conclusive, if supported by substantial evidence, unless there was some irregularity in proceeding or some error in application of rules of law. Western Paper Makers' Chemical Co., v. United States, 46 Sup. Ct. 500.

(d) Finding of Interstate Commerce Commission that rate is unjustly discriminatory, if supported by substantial evidence, is conclusive, unless there was

some irregularity in the proceeding, or error in application or rules of law. Virginian Ry. Co. v. United States. United States v. Virginian Ry. Co., 47 Sup. Ct. 222.

(e) Orders of Interstate Commerce Commission are final, unless beyond power which it could constitutionally exercise, or beyond its statutory power, or based on a mistake of law. Berdwin-White Coal-Mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429.

(f) Unless order of Interstate Commerce Commission is not within its powers, its reasonableness is administrative question, for Commission to decide, though it cannot so arbitrarily exercise its discretion as to transcend its conferred power. Berwind-White Coal-Mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429, 430.

(g) In determining validity of order of Interstate Commerce Commission court will consider only whether Commission acted within its power, and not the expediency or wisdom of the order, or whether on like testimony it would have made a similar ruling. Berwind-White Coal-Mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429, 430.

(h) Findings of Interstate Commerce Commission are prima facie true, and order of Commission, though reviewable, will not be examined, further than to determine whether there is substantial evidence to support it. Berwind-White Coal-Mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429, 430.

III. OVER PROCEDURE.

See Procedure Before Commission.

§3½a. In General.

(a) The authority of the Commission to reopen a case is not affected by whether or not an order was entered in connection with the decision. Lignite coal from North Dakota, 126 I. C. C. 243, 245.

IV. OVER RAILROADS.

§6½a. In General.

(a) The act contemplates that carriers shall receive just and reasonable compensation for transportation service rendered by them. It does not contemplate that they shall participate in transportation without any charge and it certainly does not permit or require such transportation at less than no charge. Such a result is wholly repugnant to the letter and spirit of the law, and when it is sought to be accomplished it is to be condemned. The commission's power under the law is ample to deal with cases of this kind and commission would be derelict in its duty if it did not intervene to prevent unwarranted dissipation of carrier revenue regardless of where the responsibility lies. Standard Oil Co. v. A. T. & S. F., 113 I. C. C. 597, 605.

(b) Contention that the word "practice" as used in the act relates only to matters between shippers and carriers and not to questions affecting handling of traffic between carriers, not sustained. The word as used in paragraphs (6) and (11) of section 1 and paragraph (1) of section 15 of the act clearly comprehends within its meaning questions relating to handling of traffic between carriers. C., R. I. & P. v. B. & O., 113 I. C. C. 681, 683.

§8¼. Earnings.

See Government Guaranty.

(a) Section 15a of the act requires or authorizes commission to fix remunerative reasonable rates in circumstances which embrace honest, efficient, and economical management as a condition of limitation. Commission should have information in that respect which will aid an effective exercise of its duty and authority, but it is not commanded to insure or empowered to enforce such management, responsibility for which at all times rests upon carriers. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 224.

V. OVER RATES.

§8½. In General.

(a) Section 15a of the act requires or authorizes commission to fix remunerative reasonable rates in circumstances which embrace honest, efficient, and economical management as a condition or limitation. Commission should have information in that respect which will aid in effective exercise of its duty and authority, but it is not commanded to insure or empowered to enforce such management, responsibility for which at all times rests upon carriers. M.-K.-T. v. K. C. T., 104 I. C. C. 203, 224.

(b) The commission does not subscribe to proposition that where freight

rates are producing, on the property devoted to freight service, the rate of return which has been fixed as fair, the commission can as a matter of law authorize no increases in such rates to correct deficiencies in aggregate earnings growing out of inability of passenger business to meet its full share of revenue burden. Freight and passenger services are both essential and both may be subjected to reasonable rates and charges to produce the fair aggregate return authorized by law even though thereby a higher rate of return may be exacted from one than the other. Revenues in Western District, 113 I. C. C. 3, 22, 23.

(c) Provision in section 15a directing commission to initiate, modify, establish, or adjust rates so that carriers may earn a fair return, does not relieve carriers from primary duty of initiating rates. That function belongs to management and not to regulation. It is the right and duty of carriers to take steps necessary to correct improper rate relations as they may be found to exist, and to supply revenue deficiencies by initiating suitable rates. Revenues in Western District, 113 I. C. C. 3, 38.

(d) Commission's decision involving rates on a particular class of traffic can not properly be predicated solely upon an attempt to average existing rates and maintain revenues of carriers. It is commission's duty to determine what are maximum reasonable rates and to prescribe such rates, whether the effect be to increase or reduce carriers' earnings. Fertilizers between Southern Points, 113 I. C. C. 389, 419.

(e) In the judgment of the commission its authority under section 15a in the exercise of its power to prescribe just and reasonable rates to initiate, modify, establish or adjust rates is not a mere transitory authority to establish in the first instance a general rate structure calculated to produce a fair return, but is a continuing authority to see that such a rate structure shall not be undermined and its purpose thwarted by new rates, either increases or reductions, proposed by particular carriers for the purpose of augmenting the traffic on certain lines, or on certain descriptions of traffic, or for the immediate and special benefit of particular persons, companies, firms, corporations, localities or particular descriptions of traffic, in disregard of the more general and seemingly inevitable consequences of such rates newly proposed. To upset or seriously to menace a general structure lawfully established suffices to make proposed rates calculated to effect such disruption unreasonable and unlawful. Grain and grain products, 115 I. C. C. 153, 164.

(f) Failure of a complaint to allege a violation of section 6, or that charges were inapplicable, does not affect jurisdiction of commission to determine applicable charges. See 102 I. C. C. 355, 357. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607.

(g) Under transportation act, 1920, the commission has power where warranted by record to prescribe specific rates to remove undue prejudice. See 59 I. C. C. 662; 107 I. C. C. 219; 113 I. C. C. 629. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633, 647.

(h) It is not the province of the commission to require carriers to meet rates of water carriers by the maintenance of rates lower than reasonable maxima. Consolidated Southwestern Cases, 123 I. C. C. 203, 319.

(i) It is not the province of the commission to require circuitous or more expensive routes to meet the rates of shorter or less expensive routes. However, it may give consideration to the rates of other routes and attempt to devise an adjustment which on the whole will provide reasonable rates and at the same time will, as nearly as may be, permit the various routes to engage in the traffic where they so desire. Consolidated Southwestern Cases, 123 I. C. C. 203, 374.

(j) Power to prescribe minimum rates should be sparingly exercised and only in cases where it clearly appears that its exercise is necessary in order that substantial public injury may be avoided. The commission does not desire to interfere with the initiative of railroad management in the reduction of rates unless compelling reasons affecting the public interest so require. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 504.

(k) Rates that may lawfully be required must in principle be high enough to cover all of the cost that may fairly be allocated to the service plus at least some margin of profit. See 236 U. S. 585; 236 U. S. 605. But it has always been

recognized that the burden of transportation may reasonably be adjusted with some regard to the value of service; in other words, that the higher-grade, more valuable commodities may be required to pay a greater margin of profit than those that are of lower grade and less value. The substance of the Hoch-Smith resolution is that agricultural products affected by depression shall in this respect be included in the class of most favored commodities, to such extent, at least, as may be "compatible with the maintenance of adequate transportation service." Grain and Products, 122 I. C. C. 235, 264.

(l) In the past the commission has had occasion to consider at times what may be called "out-of-pocket" cost, but while it has been contended that carriers might voluntarily, in certain situations, establish rates covering only such cost, it has never been seriously contended that commission could lawfully require this to be done. Rates that commission may lawfully require must in principle be high enough to cover all cost that may fairly be allocated to the service plus at least some margin of profit. See 236 U. S. 585; 236 U. S. 605. The commission says "in principle" because only rarely is definite information available as to such cost, and in practice rates must often be fixed largely by comparison with other rates. Of course, the other sections of the act must also be borne in mind in determining lowest lawful rates in a particular situation. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 617, 618.

(m) The commission is without authority to pass upon lawfulness of intrastate rates where the only issues raised in complaint are violations of sections 1, 2, and 3 of the act. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(n) Section 15 of the act provides that the Commission is given authority to determine the "lawfulness" of a "new" rate, whether it be increased or decreased. The duty of specifying in what respect and to what extent the new rate will be lawful or unlawful is not laid upon the Commission, although it "may" make any order which would be proper in a proceeding pending upon complaint. Lignite coal from North Dakota, 126 I. C. C. 243, 245.

(o) Upon contention that commission has no jurisdiction over rates on traffic moving to Lake Erie ports for transshipment by vessel, upon theory that because of lack of control over the water carriers which handle traffic beyond the ports, commission has no authority to deal with or prescribe proportional rates on traffic over which it does not have jurisdiction for the entire movement from points of original shipment to point of ultimate destinations, HELD: Where transportation to the port is interstate or foreign in character, it is subject to commission's jurisdiction under general provisions of section 1 of the act, irrespective of the mode of transportation beyond the port. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 313, 314.

(p) In fixing minimum rates on specific commodity from different points of origin to common destination, Interstate Commerce Commission may consider going rates on same commodity in same or different territories, relation of rates to destinations, revenue per car mile and ton mile, variations in traffic density, and pecularities in transportation which affect general transportation costs. Jefferson Island Salt Mining Co., v. United States (Interstate Commerce Commission, Intervener) 6 Fed. (2d) 315.

(q) Commission is authorized by the act to inquire into management of all common carriers subject to its provisions and is directed to keep informed as to manner and method by which same is conducted. In exercise of its power to prescribe rates yielding a fair return it must also satisfy itself with respect to honesty, efficiency, and economy of management. Construction and Repair of Railway Equipment, 128 I. C. C. 323, 342, 343.

(r) In the judgement of the Commission its authority under section 15a in the exercise of its power to prescribe just and reasonable rates to "initiate, modify, establish or adjust" rates is not a mere transitory authority to establish in the first instance a general rate structure calculated to produce a fair return, but is a continuing authority to see that such rate structure shall not be undermined and its purpose thwarted by new rates, either increases or reductions, proposed by particular carriers for the purpose of augmenting the traffic on certain carrier lines, or on certain descriptions of traffic, or for the immediate and special benefit of particular

persons, companies, firms, corporations, localities, or particular descriptions of traffic, in disregard of the more general and seemingly inevitable consequences of such rates newly proposed. To upset or seriously to menace a general structure lawfully established suffices to make proposed rates calculated to effect such a disruption unreasonable and unlawful. Absorption of drayage charges, 128 I. C. C. 405, 412.

(s) The Commission can not require carriers to reduce their rates for the purpose of meeting water competition, and it will not undertake to adjust rates from competing producing territories in order to equalize manufacturing costs. Woodstock Lumber Co. v. B. & A. R. R., 129 I. C. C. 255, 260.

(t) Commission has no power to compel defendants to publish a rate less than reasonable in order to meet a commercial exigency. Woodstock Lumber Co. v. B. & A. R. R., 129 I. C. C. 255,

(u) Nothing in section 15 operates to prevent the Commission, on complaint, from prescribing a reasonable maximum rate to be used as the basis of determining the charges to be assessed over an existing route. The Commission is not requiring the establishment of a new through route and it is not prescribing joint rates. Colorado Portland Cement Co. v. A. T. & S. F. Ry., 132 I. C. C. 671, 677.

§9½. Government Guaranty.

See Government Guaranty.

(a) The act specifically provides that rate of return determined by commission to be fair "shall be uniform for all rate groups or territories which may be designated by the commission." Paragraph (3) of section 15a. Before the commission changes its finding as to the fair rate of return, general announcement should be given of the intention to consider that subject at hearings. Revenues in Western District, 113 I. C. C. 3, 19.

§ 10. Intrastate.

See State Rates and Regulations.

(a) Upon contention that the regulation of train service for transportation of property is not one of the powers delegated to the commission by Congress, further, that by legislative enactment, the State has prescribed the minimum train service that may be maintained on all railroads within its borders, and that the sole jurisdiction of such service is in the State. HELD: Under section 1, paragraphs (10), (11), and (14), and section 15 of the act, jurisdiction to regulate the supply of trains for transportation of property has been vested in the commission, and where there is a conflict of jurisdiction similar to that here considered the State law must give way to the Federal Statute. See 225 U. S. 501 and 267 U. S. 404. Train Service on North Pacific, 112 I. C. C. 191, 192, 195.

(b) The order instituting this proceeding invited discussion of the question of the jurisdiction of the commission to approve, after Aug. 31, 1920, a reduction in rates or an award of reparation by state authority on intrastate traffic which moved during the period March 1 to Aug. 31, 1920, the guaranty period. Whatever doubt may have existed before, as to whether an award of reparation was a reduction of a rate within the meaning of section 208a of the act, must be taken to have been settled by the Supreme Court; and it seems clear that the Supreme Court regarded an award of reparation in intrastate traffic which moved during the guaranty period as being, in effect, a reduction of a rate prior to Sept. 1, 1920, regardless of the date on which the decision was rendered. HELD, the authority of the commission to approve awards of reparation on intrastate shipments which moved during the guaranty period did not expire on Aug. 31, 1920 but it was given authority to approve such awards upon traffic which moved during the guaranty period or thereafter. The phrase "prior to Sept. 1, 1920" as used in section 208 a of the transportation act, 1920, apparently is not to be construed as prescribing a time limitation within which it was authorized to act, but as fixing the period as to which its approval was necessary to a reduction in rates whether made during the guaranty period by the naming of lower rates for the future, or accomplished after the expiration of the period by way of reparation on shipments which moved during that period. The commission adheres to its conference ruling of March 13, 1922 and previous decisions to that extent that they hold that section 208 a of the transportation act, 1920, does not authorize it to award reparation on intrastate shipments which

moved during the guaranty period. It now holds however, that it has authority under that section to approve after Aug. 31, 1920 awards of reparation by state authority on intrastate traffic which moved during the guaranty period and the conference ruling will be modified accordingly. It is of the opinion that the power to approve necessarily implies the power to approve in whole or in part, or to disapprove, but does not include the power to enlarge the award. Reparation on Intrastate Traffic, 122 I. C. C. 443.

(c) Interstate Commerce Act, § 13, pars. (3), (4), as amended, and section 15a, as added by Act. Feb. 28, 1920, §§416, 422 (U. S. Comp. St. Ann. Supp. 1923, §§ 8581, 8583), give Interstate Commerce Commission power to regulate intrastate commerce only so far as necessary efficiently to regulate interstate commerce under Congress' paramount power, and state authorities may deal with intrastate rates on general level which commission has found fair to interstate commerce. Atlantic Coast Line R. Co., v. Commonwealth State Corporation Commission, (Va., 1926) 133 S. E. 883.

(d) Intention to interfere with state function of regulating intrastate rates is not to be presumed, and, where there is serious doubt whether Interstate Commerce Commission's order extends to intrastate rates, doubt will be resolved in favor of state power. Arkansas Railroad Commission v. Chicago, R. I. & P. R. Co., 47 Sup. Ct. 724.

(e) Orders of Interstate Commerce Commission relative to discrimatory character of intrastate rates for carriage of cottonseed and products in Southwestern states must be read together, to determine whether rate in Arkansas was declared discriminatory. Arkansas Railroad Commission v. Chicago, R. I. & P. R. Co., 47 Sup. Ct. 724.

§11. Suspension.

See Advanced Rates §1 (4); Suspension of Rates.

(a) The position is taken that, in an investigation and suspension proceeding, the only issue before the Commission is as to the lawfulness of the suspended schedules; that the Commission has no authority to approve a basis intermediate between the existing rates and the basis sought to be made effective; and that as the proposed schedules were not approved, the finding that the present rates were too low was consequently "irrelevant," "gratuitous" and "not binding on anyone." But this view is wholly untenable and in conflict with specific provisions of the act and numerous decisions of the Commission. Lignite coal from North Dakota, 126 I. C. C. 243, 244.

(b) Upon contention that commission has no power to reopen an I. & S. proceeding where its order requiring the cancellation of a proposed schedule is a final order; that when such order is complied with "nothing remains for consideration," and nothing "which is the subject of a lawful order" can be before commission, HELD: The commission's authority to re-open a case is not affected by whether or not an order was entered in connection with the decision. See 39 I. C. C. 523, 535. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(c) Upon contention that in an I. & S. proceeding the only issue before commission is as to lawfulness of suspended schedules which commission is called upon either to condemn or approve; that commission has no authority to approve a basis intermediate between the existing rates and basis sought to be made effective; and that where the proposed schedules are disapproved, a finding that present rates are too low is "irrelevant," "gratuitous," and "not binding on anyone," HELD: This contention is wholly untenable and in conflict with numerous decisions of the commission and with specific provisions of the act. See Section 15 (7) of the act; 20 I. C. C. 307, 314, and other cited cases. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(d) As a prerequisite to the commission's approval of rates under section 1 of the act it is only necessary for carriers to show, as it is in all suspensions proceedings where the commission approves rate changes, that the rates are within the limits of reasonableness, i. e., not more than reasonable maxima nor less than reasonable minima. Federated Metals Corp. v. C. R. R. Co. of N. J. 126 I. C. C. 703, 709.

§13. Unpublished Rate.

See Evidence §60; Unpublished Rates.

(a) The Commission has jurisdiction to examine and pass upon the alleged unlawfulness of the factors beyond Dawkins even though the Kentucky Ry., which

publishes the component from Royalton to Dawkins, which is not attacked, is not a party. Dawkins Lumber Co. v. C. & O. Ry., 129 I. C. C. 415, 418.

VI. TO AWARD DAMAGES.

§14. In General.

See Reparation.

(a) The commission is without jurisdiction to award punitive or exemplary damages. Harden v. Pullman Co., 120 I. C. C. 359, 360.

VII. APPEALS TO COURT.

§15. In General.

See Courts.

(a) Through order of Interstate Commerce Commission is invalid, unless supported by evidence, reviewing court cannot weigh testimony as to reasonableness of rates or wisdom in establishing them. Commission's judgment as to such matters being final. Jefferson Island Salt Mining Co. v. United States (Interstate Commerce Commission, Intervener) 6 Fed. (2d) 315.

(b) The courts are without power to interfere with an order of the Interstate Commerce Commission, made within its jurisdiction and not arbitrary nor unreasonable. Chicago, R. I. & P. Ry. Co. v. United States, 6 Fed. (2d) 888.

(c) It is no defense to an action against a railroad company on an award of damages made to a shipper by the Interstate Commerce Commission for overcharges that the shipper included the excessive rate paid in the prices charged its customers. Wyoming Sugar Co. v. Davis, Director General of Railroads and Agent, 7 Fed. (2d) 622.

(d) In an action on an award of damages made by the Interstate Commerce Commission to a shipper for overcharges, the fact that at the time the railroad was being operated under federal control, under Act March 21, 1918, § 10 (Comp. St. 1918, Comp. St. Ann. Supp. 1919, § 3115¾j), does not deprive plaintiff on recovery of the right to interest and cost and the attorney's fee provided by Interstate Commerce Act, § 16, subd. 2 (Comp. St. §8584). Wyoming Sugar Co., v. Davis, Director General of Railroads and Agent, 7 Fed. (2d) 622.

(e) Judicial Code, § 207 (Comp. St. § 993, giving District Court jurisdiction of suits to enjoin, annul, or suspend "any order" of Interstate Commerce Commission, does not include orders relating to practice or precedure of Commission, and gives court no jurisdiction of suit to enjoin Commission from proceeding under socalled order practically reopening valuation proceedings in respect to items not expected to by railroad. New York, O. & W. Ry. Co. v. United States (Interstate Commerce Commission, Intervener) 14 Fed. (2d) 850.

(f) The enforcement and protcetion terstate Commerce Commission is a juof the lawful rights created by the Indicial function for courts of competent jurisdiction. Chicago, R. I. & P. Ry. Co., v. Howe-McCurtain Coal & Coke Co., (Okla., 1926) 147 Pac. 986.

(g) Shipper, suing to annual order of Interstate Commerce Commission permitting one railroad to acquire control of another system, and not alleging any direct legal injury, except as might arise out of change of conditions in respect to transportation, unless the order definitely related to transportation, HELD without a proper cause of complaint, unless the order definitely related to transportation within meaning of Act Oct. 22, 1913 (Comp. St. §994). Home Furniture Co., v. United States, 46 Sup. Ct. 545.

(h) Order of Interstate Commerce Commission permitting acquisition of control of one railroad system by another HELD an order relating to transportation, suit to set aside which, under Act Oct. 22, 1913 (Comp. St. § 994), was required to be brough in district of residence of party on whose petition order was made. Home Furniture Co., v. United States, 46 Sup. Ct. 545.

(i) Action of District Court, staying enforcement of order of Interstate Commerce Commission pending an appeal from a decree dismissing bill in suit to enjoin enforcement, HELD unwarranted by the facts. Virginian Ry. Co., v. United States. U. S. v. Virginian Ry. Co. 47 Sup. Ct. 222.

(j) To justify stay of enforcement of order of Interstate Commerce Commission pending appeal from decree sustaining order, it must appea that District Court entertains serious doubt as to correctness of decree, or that decision depends on question of law on which there is conflict among courts of the several circuits, or unless for another special reason order of Commission ught not to become operative until Supreme Court

has considered its validity. Virginian Ry. Co., v. United States. United States v. Virginian Ry. Co. 47 Sup. Ct. 222, 223.

(k) That decree of District Courts sustaining order of Interstate Commerce Commission was not unanimous is not alone ground for staying enforcement of order pending appeal. Virginia Ry. Co., v. United States. United States v. Virginian Ry. Co., 47 Sup. Ct. 222, 223.

(l) Stay of enforcement of order of Interstate Commerce Commission pending appeal in injunction suit is not a matter of right, even if irreparable injury might otherwise result. Virginian Ry. Co., v. United States. United States v. Virginian Ry. Co. 47 Sup. Ct. 222, 223.

§17. Validity of Orders.

See Courts §5, §16a.

(a) While an order of the Interstate Commerce Commission fixing rates is invalid, unless supported by evidence, District Court cannot weight evidence of the reasonableness of rates or wisdom of establishing them; such subjects being finally committed to judgment and discretion of Commission, when acting within its powers. Western Paper Maker's Chemical Co. v. United States 7 Fed. (2d) 164.

(b) In an action against a carrier on an award of damages, made to a shipper by the Interstate Commerce Commission because of overcharges, the order of the Commission is prima facie evidence of the facts therein found. Wyoming Sugar Co. v. Davis, Director General of Railroads and Agent, 7 Fed. (2d) 622.

(c) Order of Interstate Commerce Commission, regular on its face, may be set aside if, on facts found, it is confiscatory and in violation of constitutional prohibition against taking of property without due process of law, or if authority has been exercised in unreasonable manner. Berwind-White Coal-mining Co. v. United States, (Pa., 1925) 9 Fed. (2d.) 429.

§18. Decisions As Precedents.

See Previous Decisions of Commission.

(a) When a given situation has been fully considered and deliberately passed upon, that decision ought not to be disregarded and the question kept open indefinitely unless good cause is shown for the adoption of a different course. American Door & Mfg. Co. v. B. & O. R. R., 122 I. C. C. 471, 472.

(b) Findings of the Interstate Commerce Commission are made by law prima facie true. Western Paper Maker's Chemical Co. v. United States, 7 Fed. (2d) 164.

INTERVENERS

See Claims §5¾; Procedure Before Commission §10 (3); Reparation §24.

INTOXICATING LIQUORS

See State Rates and Regulations.

(a) Whether sellers sold lemon and orange extracts containing alcohol under circumstances from which they might reasonably deduce buyer's intention to use them for purposes illegal under Volstead Act, tit. 2, § 4 (U. S. Comp. St. § 10138½b), HELD for jury, in action against guarantors of purchase price. Furst v. Shaws, (Ala., 1926) 110 So. 299.

(b) Where buyer's guarantors claimed that sales of extracts containing alcohol were for beverage purposes, refusing to charge that sale was legal, in absence of notice of buyer's intent to make such use, was reversible error; "notice" being equivalent to "under circumstances from which the seller might reasonably deduce" unlawful intention, found in Volstead Act, tit. 2, § 4 (U. S. Comp. St. § 10138½b.) Furst v. Shaws, (Ala., 1926) 110 So. 299.

JUNCTION POINT RATES

See Advanced Rates §8½a (h); Cars and Car Supply §14½, §23½; Routing and Misrouting §5½.

(a) Combination rates on coal from certain mines in the New River district of West Virginia on the C. & O. to interstate destinations on or via the Virginian Ry., and from mines on the Virginian to eastern interstate destinations on or via the C. & O., found not unreasonable, discriminatory, or unduly prejudicial as compared with rates accorded other mines similarly situated which, by trackage agreements or otherwise, have the benefit of the district rate on or via either line. Rates sought are not shown to be necessary or that it would be in the public interest to open the markets served by either the Chesapeake or the Virginian to shippers on the other line. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147.

(b) Complainant, Coal Co., and Ballard & Thompson, a corporation owning

a single track of railroad which connects the coal mine with the main line of the D. & R. G. W. at Thompson, Utah, 5 miles, alleged that the carload rates from Thompson on coal originating at Sego destined to western Colorado and Utah east of Castle Gate, Utah, were and are unreasonable; that the rates to Grand Jct., Colo., were unduly prejudicial when compared with rates from Somerset, Colo.; that the rates from Thompson to California, Nevada and Utah west of Castle Gate were unreasonable and when compared with rates from Rock Springs, Wyo., unduly prejudicial; that the practice of defendants in publishing district rates from mines on branch and independent lines in the Castle Gate district and not publishing rates from Sego was and is unduly prejudicial and unreasonable; and that failure of defendants to maintain the track of Ballard & Thompson, perform the train service from Sego to Thompson and grant an allowance sufficient to repay the interest on the capital invested in the Ballard & Thompson has damaged complainant. The distance from Thompson to destinations west of Castle Gate is 94 miles greater than the average distance from mines within that group. During federal control the rates from Thompson to these destinations were a differential of 10c over Castle Gate. The rates from the Rock Springs district in southern Wyoming, although for a somewhat longer haul, were generally the same as those from the Castle Gate district. HELD, assailed rates from Thompson during the period of federal control were not unreasonable except to destinations on the Nevada Northern, W. P. from Salduro to Winnemucca, and L. A. & S. L. from Leamington to Los Angeles. Complainant bore only the 10c differential of Thompson over Castle Gate, which was not unreasonable. Complainant has not proved damage by any undue preference of Rock Springs. Reparation denied. Present rates from Thompson to Nevada and California west of Castle Gate not unreasonable. Ballard & Thompson is owned by complainant American Fuel Co., and although said to be a common carrier, it owns no equipment, publishes no tariffs and files no annual report with the Commission. The traffic handled over its line has been and now is exclusively coal traffic shipped by complainant. Since the hearing it filed an application for a certificate of convenience and necessity for authorization to become a common carrier which was denied, 72 I. C. C. 644. This complainant was not and is not a common carrier, but was and is a plant facility. The record does not show that complainant's competitors in the Castle Gate group shipped, or are likely to ship, coal to eastern Utah and western Colorado. Complainant's mine is the only one in this territory which is not reached by the tracks of a common carrier. The D. & R. G. W. does not grant an allowance to any mine in the Castle Gate district, nor does it operate a plant facility for any mine within that district. It applies the main line rates from all mines located on branch or independent lines in the Castle Gate district. There is nothing in the record to indicate that the compensation for this gathering service demanded by defendants was unreasonable, separately considered. HELD, failure of defendants to publish junction points rates on coal from complainants mines not unreasonable but unduly prejudicial in that the D. & R. G. W. for the K. & H. performs the gathering service without any charge in addition to the junction point or group rate. HELD, refusal of defendants to pay interest on complainant's investment in the B. & T. not in violation of the act. If the D. & R. G. W. continues to perform the service over the B. & T. it will be expected to do so under proper tariff authority. American Fuel Co. v. A. T. & S. F. Ry., 123 I. C. C. 101.

(c) Upon contention that practice of carriers in publishing junction-point rates from coal mines located on branch and independent lines and not publishing such rates from complainant's mine which is connected with main line by its plant-facility track, is unreasonable, HELD: Complainant had option of hauling its coal by wagon or truck to rails of a common carrier; of constructing its own rails and furnishing its own equipment and motive power to so move it; or of asking for and obtaining the service of a common carrier in gathering its coal, and having selected latter course it should pay for it. Moreover, compensation demanded for this gathering service, separately considered, is not unreasonable. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 112.

(d) Practice of carriers in according junction-point rates to mines located on branch and independent lines, even

though performing the gathering service themselves, while contemporaneously failing to accord same rates and services to a mine which is connected with its line by a plant-facility track, is clearly a difference in treatment under substantially similar circumstances and conditions which comes within the inhibition of section 3. While service over private or plant-facility tracks by a common carrier is neither compelled nor prohibited under the act, to furnish or withhold it being within the discretion of carrier, in either event the statutory inhibition against discrimination or undue prejudice must be observed. American Fuel Co. v. A., T. & S. F., 123 I. C. C. 101, 112.

(e) Where a carrier elects to perform service of gathering coal from mines located on private or plant-facility tracks, it should publish tariffs to cover such service, section 1 (3) of the act providing that "the term 'transportation' shall include * * * all services in connection with receipt * * * of property transported," and section 6 providing that no carrier shall engage in transportation as defined in the act unless rates, fares, and charges shall have been filed and published. American Fuel Co. v. A. T. & S. F., 123 I. C. C. 101, 113.

JURISDICTION OF COMMISSION

See Accounting §1; Adjacent Foreign Country; Advanced Rates §1, §2; Allowances §1, §2; Arbitration; Bills of Lading §1; Blanket Rates §1; Branch Lines §6; Bridges and Tolls §1; Cars and Car Supply IA; Classification §2; Control and Regulation; Courts; Demurrage §1; Discrimination §2; Divisions §1; Equalization of Rates §1; Export Rates and Facilities §1; Express Companies §1; Facilities and Privileges I; Foreign Commerce I; Government Control; Interstate Commerce Commission I, II; Lighterage §1; Long and Short Hauls §2; Loss and Damage §4; Panama Canal Act; Passenger Fares and Facilities §1; Proportional Rates §1; Reconsignment §9; Reduced Rates §1; Refrigeration §1; Released Rates §1, §4; Reparation I; Routing and Misrouting §1; Special Contracts §4 (1); State Rates and Regulation; Storage §1; Switch Tracks and Switching §1, §2; Tap Lines §1, §2; Tariffs §1; Telephone and Telegraph Companies §3½; Terminal Facilities §1; Through Routes and Joint Rates §1; Transportation §1½; Undercharges §1; Unpublished Rates; War Taxes; Water Carriers §2.

KELLY RULE

See Live Stock Shipments (i).

KNOCKED-DOWN SHIPMENTS

See Classification §4½, §5.

LAKE-CARGO RATES

(a) Lake-cargo rates are in the nature of proportional rates, and commission has frequently prescribed such rates on a lower basis than corresponding local rates. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 361.

LEASE

See cars and Car Supply §11½; Common Carriers §2; Finance Dockets §3; Gas and Electric Companies (b); Warehouses.

(a) Carrier's action in leasing warehouse space and track facilities in its Pittsburgh produce yards to the Union Fruit Auction Co., for unloading, displaying, and selling at auction fruit and vegetables, while refusing to accord like use of same property to the Independent Fruit Auction Co., not shown to result in any violation of interstate commerce act or other statute administered by the commission. A carrier is free to grant an exclusive lease of such property to anyone it elects, whether shipper or not. See 199 U. S. 279, and other cited cases. This general rule is subject to exception, however, that carrier may not lease its property in such a manner as will result indirectly in a violation of some section of the act or related acts, for in such instances the commission has indirect authority over the lease. See 73 I. C. C. 673, 682. Prior proceedings 38 I. C. C. 165; 95 I. C. C. 87. Andrews Bros. Co. v. P. R. R., 123 I. C. C. 733.

(b) Complainant alleged that defendants refusal to lease to it a section of a certain building owned by them at Atlanta, Ga., while leasing similar sections to complainants competitors, resulted in unjust discrimination. The building in question, owned and maintained by defendants, and located on their private property, was designed as a place of business for produce dealers, and is

leased to a number of such dealers for their exclusive use. Each dealer has a section where he receives interstate and intrastate carload shipments of produce and sells to other dealers and to the public. Railroad tracks run alongside and the cars are switched to and from the respective dealers sections. Complainants lease expired during federal control, but a second lease was arranged which ran until Dec. 31, 1923. Prior to the expiration of the second lease complainant was notified that a renewal would not be made and that it would have to vacate the property on that date. Produce Row offers many advantages. Its facilities save its tenants drayage and promote efficient handling of the produce. If complainant is compelled to go elsewhere in Atlanta for a business location, it may have great difficulty in competing with the dealers which continue to occupy sections in Produce Row. Leading case Andrews Bros. v. P. R. R. 123 I. C. C. 733. HELD, defendants refusal to lease to complainant a section of Produce Row has been shown to result in unjust discrimination or other violation of the act, complaint dismissed. Williams Thompson Co. v. A. & W. P. R. R., 126 I. C. C. 417.

(c) Following 123 I. C. C. 733, refusal of carriers to lease to complainant a section of a certain building owned by them at Atlanta, Ga., for the sale of produce, while leasing similar sections to its competitors, FOUND not discriminatory, unduly prejudicial, or otherwise in violation of the act. Williams-Thompson Co. v. A. & W. P. 126 I. C. C. 417.

(d) Cars delivered on tracts alongside dock space leased by shipper held not "on or about" leased premises, within clause of lease whereby lessee assumed risk of loss by fire "on or about said leased premises," so as to exempt carrier from liability loss by fire; "on or about" meaning anywhere or everywhere on, but not outside of, locus. Pillsbury Flour Mills Co., v. Erie R. Co., (1926) 216 N. Y. S. 486, 487.

(e) Upon investigation by commission on its own motion, FOUND: That leasing of respondent's marine repair yard and floating equipment to a private concern; compensation paid such concern for lightering, towing, and shifting, including the furnishing of free coal for such transfer of its freight in New York Harbor; and expenditures under contracts with a private concern in violation of the Clayton Act, the officers of which concern are directly associated with respondent corporation, were not only in conflict with "honest, efficient, and economical management and reasonable expenditures for maintenance" and repugnant to sound business methods, but were also not in the interest of efficient and economical management as required by section 15a of the act. Construction and Repair of Railway Equipment, 128 I. C. C. 323.

(f) Commission instituted an investigation into and concerning all matters relating to the arrangement by which the marine repair yard and certain floating equipment of the Erie Railroad and subsidiaries, respondent, were leased; the reasonableness of the compensation paid to contractors for performing lightering, towing, shifting of vessels, and fire protection of water front property in New York harbor and repairs to floating equipment; and the names of all persons who receive directly or indirectly such compensation or the benefits thereof. This report primarily relates to dealings between the respondent and the three corporations, the Phoenix Transit Company, the Hudson Shipbuilding & Repair Co., and the International Marine Welding Co. The report also deals with the pecuniary interests of officials and employees of the respondent in the capital stock, profits, or transactions of these three companies and whether or not the charges or allowances paid or made by respondent to them were unreasonable and excessive. The contracts and agreements with these three companies relate to the leases to the Phoenix Company of respondents marine repair yard at Weehawken, N. J., 13 steam tugs, and 5 steam lighters; the arrangement with the Phoenix to perform all work incidental to the shifting and transferring of freight for respondent in New York harbor; and in addition thereto, repairs to respondents floating equipment by the Hudson, Phoenix and International. While the record does not contain all data necessary for an exact computation in dollars and cents of the total loss incurred by respondent by reason of excessive expenditures resulting from the lease and operation of the marine yard equipment, tug boats, and steam lighters, the facts with respect to rental, repairs, wages, shifting, free coal,

and comparative costs of operation are no less conclusive as to the improvident and improper character of the arrangement. The Commission is authorized by the act to inquire into the management of all common carriers subject to its provisions and are directed to keep ourselves informed as to the manner and method by which the same is conducted. In the exercise of this power to prescribe rates which will yield a fair return it must also satisfy itself with respect to the honesty, efficiency and economy of management. The Commission can not, therefore, disregard transactions such as these which, made under the circumstances and conditions, are not only in conflict with "honest, efficient and economical mangement and reasonable expenditures for maintenance" but are repugnant to sound business methods and in some cases at least repugnant to good conscience. Construction and Repair of Ry. Equipment 128 I. C. C. 323.

LEGAL RATE

II. CHARGES.

§ 2. In General.

(a) The shipper or receiver of lighterage freight obtains, generally speaking, all the service that a shipper of freight through the pier station does, and in addition a service involving a further handling of freight to and from lighters and the use of lighters to move it. Generally speaking, where shipper or consignee is located on the water front, the lighterage rate saves him cost of cartage to or from the rail stations. Colgate & Co. v. N. Y. C., 112 I. C. C. 573, 577.

§ 3. Reasonableness and Discrimination.

See Discrimination; Reasonableness of Rates.

(a) Rates on soap from complainant's pier at foot of Sussex Street, Jersey City, N. J., within lighterage limits of Greater New York, to various New England destinations, found not unreasonable or unduly prejudicial as compared with lower rates from freight stations, piers, and shipping points on Manhattan Island and Brooklyn, N. Y. A finding of undue prejudice would require a showing of substantial similarity of transportation conditions, not here shown, in addition to a competitive relationship and while cost of transporting complainant's shipments is greater by substantial amounts than cost of transporting those from Manhattan and Brooklyn, the present differences between assailed rates and those from Manhattan and Brooklyn are not shown to be greater than differences in transportation con-

ditions warrant. Colgate & Co. v. N. Y. C., 112 I. C. C. 573.

(b) Complainant objected to figures of carriers purporting to show cost of performing lighterage service as being incomplete, lacking in detail, and of such character as to leave not only a wide margin of possible error, but a wide opportunity for difference of opinion. HELD: While cost figures without the details upon which those figures are based are open to serious criticism, the lack of detail goes to weight to be given cost study and not to its relevancy. Motion to strike the study from the record denied. Colgate & Co. v. N. Y. C., 112 I. C. C. 573, 578.

(c) Class rates on barrel shooks from Rahway, N. J., to New York Harbor, which entail lighterage service, found not unreasonable as compared with other rates from and to same points including lighterage, on various commodities differing in transportation and other characteristics, or with rates for comparable distances on lumber and articles taking same rates, including barrel shooks, which do not include such service. Assailed rates compare favorably with commodity rates for similar distances from a number of New Jersey points to destinations on Long Island and South Brooklyn over routes which entail movement by car float across the Harbor. Hamilton v. P. R. R., 113 I. C. C. 723.

(d) Aggregate of express rate to Jersey City, N. J., plus Erie Railroad's floatage charge beyond, applicable to shipments of fruits and vegetables, n. o. s., from points in California, Washington, Oregon, and Idaho to Piers 20 and 21, New York, found unreasonable as compared with lower rates contemporaneously in effect to various Atlantic coast destinations and to extent it exceeded rate found reasonable in original report 81 I. C. C. 87, from California points. Rates from the Northwest and California were formerly the same, as floatage charges on shipments from both origin points were absorbed by the express company, and record does not justify increases resulting from cancellation of such absorptions. Reasonable rate prescribed for future and reparation awarded. Finding in original report above cited, affirmed. Amer. Fruit & Veg. Shippers Asso. v. Amer. Ry. Exp. Co., 128 I. C. C. 651.

VI. TARIFFS AND CONSTRUCTION.

See Tariffs.

§7. In General.

(a) Shipments of machinery and paint from Cleveland, Ohio, to Long Island City, N. Y., intended for lighterage delivery, were billed to local address of consignee which was not a specific station on the tracks of any carrier, its location not being shown in any tariff or billing book. Tariff governing lighterage service contained specific provision to effect that "all shipments requiring lighterage delivery must be receipted to 'New York lighterage' and billed to Greenville Piers or Manhattan Piers, N. J." Failure of complainant to specify lighterage delivery on bills of lading resulted in demurrage, storage and other charges and subsequent reconsignment of shipments. HELD: Extra expenses incurred as result of complainant's initial mistake found applicable and not unreasonable. Brown Hoisting Machinery Co. v. P. R. R., 115 I. C. C. 218.

LIMITATION OF LIABILITY

See Bills of Lading IV; Cars and Car Supply VII; Courts §15; Express Companies XII; Loss and Damage §9, §10 (1) (2), §11; Released Rates V; Reparation IV; Routing and Misrouting III; Special Contracts III; Telephone and Telegraph Companies IV; Undercharges IV.

LIVE STOCK SHIPMENTS

See Advanced Rates §8½a (a); Caretakers; Distance Rates §3 (4l); Facilities and Privileges §5½, §7½; Hoch-Smith Resolution; Limitation of Liability; Loss and Damage; Minimums §7 (o); Personal Injuries; Proportional Rates VIII (f); Quarantine Regulations; State Rates and Regulation (n); Stock Yard Companies; Tariffs §9a (3r), §18 (6i); Through Routes and Joint Rates §13 (5l), §20a (h); Twenty-Eight Hour Law.

(a) Interstate rates on livestock in single and double-deck cars from eastern and central Oregon and southern Idaho to North Portland, Oreg., and Tacoma and Seattle, Wash., found unreasonable but not unduly prejudicial. Reasonable distance rates, percentage relationships, and differentials prescribed and reparation denied. Cattle & Horse Raisers Asso. v. N. P., 104 I. C. C. 51.

(b) Proposed increased rates on cattle and sheep from stations on Oregon Short Line in eastern Idaho and southwestern Montana to Portland, Seattle, and points taking same rates, found not justified. Cattle & Horse Raisers Asso. v. N. P., 104 I. C. C. 51.

(c) Rates on cattle and hogs from Chicago, Indianapolis, and South St. Paul to Allentown, Pa., found unreasonable to extent component from east Penn Junction, Pa., the interchange point, exceeded industrial switching charge from that point. Reasonable rate prescribed for future and reparation awarded. Arbogast & Bastain Co. v. L. V. R. R., 107 I. C. C. 105.

(d) Collection of passenger fares for transportation of attendants accompanying shipments of live poultry from points in various States to Hoboken, N. J., found unreasonable. For many years it has been general practice of carriers to furnish transportation to attendants accompanying shipments of live poultry without charge, because carrier is thereby relieved of caring for poultry. Here the charges were apparently published in error and remained in effect for a short time only. Werner v. Director General, 107 I. C. C. 363.

(e) Upon reconsideration, rules and charges of carriers governing bedding of livestock cars found not unreasonable. Findings in former reports in that regard, 80 I. C. C. 747 and 87 I. C. C. 157, reversed. Nat'l Live Stock Exchange v. A., T. & S. F., 107 I. C. C. 512.

(f) Carriers have right to make a reasonable charge for service of bedding livestock cars. Report in 80 I. C. C. 747, affirmed. Nat'l. Live Stock Exchange v. A., T. & S. F., 107 I. C. C. 512, 513.

(g) Cost of service of bedding livestock cars naturally vary with conditions in different parts of the country, and fact that carriers failed to present uniform testimony upon this subject tends to strengthen rather than weaken credibility of their cost figures. Nat'l. Live Stock Exchange v. A., T. & S. F., 107 I. C. C. 512, 515.

(h) Cattle moving from Alfred, Tex., to Foraker, Okla., upon arrival were found tick infested, whereupon they were ordered by Federal authority to Oklahoma City for dipping. This accomplished, they were reforwarded to Foraker and delivered, carriers assessing an intrastate rate for movement between Foraker and Oklahoma City upon theory that original contract of carriage was completed on first arrival at Foraker and that movement to Oklahoma City and return was an independent intrastate shipment subject to local intrastate rates for haul each way. FOUND: Since cattle were inspected before delivery and full control denied complainant, who paid no freight charges at that time, took out no new bills of lading, or made shipments to new consignees, the shipments were overcharged, being subject to lower rates for entire movement under provisions of an interstate tariff permitting stoppage in transit of cattle moving under above circumstances. Refund of overcharges directed. Borroum & Tucker v. M. V., 107 I. C. C. 668.

(i) Proposed cancellation of the Kelly combination rule on livestock, originating on the C. & N. W. and C., M. & St. P. railways in South Dakota and intermediate stations in adjoining States, and publication in lieu thereof of proportional rates lower than corresponding locals from Chicago which reflect proper proportion of increases under General Order No. 28 of director general when applied to through traffic, found justified. When the Kelly rule was first established it was never intended that one carrier alone should bear burden of adjusting its rates so as to take care of the entire increase under General Order No. 28 in connection with traffic moving under combination rates. At that time all participating carriers bore their proportional share. To now require the equalization to be made by a single line smacks not only of inequity and unreasonableness, but would saddle upon respondents a shrinkage of their earnings, which they should not be called upon to bear. Proportional Rates on Livestock, 109 I. C. C. 417.

(j) Rate on horses and mules from Memphis, Tenn., to Fort Worth, Tex., found unreasonable as compared with rates from and to other points in same general territory for comparable distances. Darnell Commission Co. v. M. P., 109 I. C. C. 427.

(k) Houston, Tex.: Rates on horses and mules from Wichita, Kans., and Oklahoma City and Calumet, Okla., to, found not unreasonable but to have been unduly prejudicial in so far as they exceeded lower rates contemporaneously in

effect to Beaumont, Tex., a competing point. No damage shown by reason of discrimination found, which did not prevent complainants at Houston from doing a substantial business. While the cause of complaint was removed by subsequent establishment of rates pursuant to decision in Horse and Mule Rates in the Southwest, 1924, 93 I. C. C. 479, that case involved a comprehensive and systematic readjustment of rates within a large territory, following which claims for reparation are not ordinarily allowed. Moreover, rates to both Houston and Beaumont have been in effect for a number of years without protest by shippers. Cook v. A., T. & S. F., 109 I. C. C. 493.

(l) Rates on cattle, calves, hogs, and sheep from Sioux Falls, S. Dak., to Albert Lea and Austin, Minn., found not unreasonable or unduly prejudicial, but on like traffic from Sioux Falls to Chicago, Peoria, East St. Louis, Milwaukee, Madison, Cudahy, St. Louis, Kansas City, Omaha, Ottumwa, Des Moines, Cedar Rapids, and Mason City found unreasonable and unduly prejudicial as compared with rates to same destinations from St. Paul, Minn., Sioux City, Iowa, Omaha, Nebr., and Kansas City, Mo. Reasonable and non-prejudicial rates prescribed. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C. 501.

(m) Rates on beef cattle in straight carloads and on sheep and lambs, in double-deck and single-deck carloads, from points in Oregon, Washington, Idaho, and Montana to Chicago, St. Paul, Omaha, and other middle-western and Missouri-River markets, found unreasonable as compared with rates from points in the West and Southwest. Reasonable distance scale of rates to St. Paul, Omaha, and related points, and differentials over such rates to St. Louis and Chicago and related points, prescribed for future. American Nat'l. Live Stock Asso. v. O.-W. R. R. & N. Co., 109 I. C. C. 621.

(n) Rates on meat animals from points in Alabama to Moultrie, Ga., found not unreasonable, but the relationship of rates on hogs from southeastern Alabama to Moultrie, on the one hand, and Montgomery and Birmingham, Ala., on the other, found unduly prejudicial and preferential and unjustly discriminatory against interstate commerce. Nonprejudicial relationship prescribed for future. Swift & Co. v G. N., 109 I C. C. 733.

(o) Proposed revision of rates on calves from points in Texas to various interstate markets, designed for purpose of making such rates uniformly 15 per cent higher than cattle rates in conformity with views expressed by commission in 22 I. C. C. 160, and other cited cases, found justified, except for rates to Kansas City and points grouped therewith. This relationship was disrupted by general increases and reductions and through errors in tariff publication. However, there is no competitive reason for a spread between rates on cattle and calves, the 115 per cent relationship having been employed merely as a convenient means of arriving at rates on calves, once reasonable cattle rates are fixed. Rates on cattle from Texas points to Kansas City not having been fixed by commission and the record containing no evidence to show that they are maximum reasonable rates, it is as likely that cattle rates are too high as that the calf rates are too low. Calves from Texas, 112 I. C. C. 163.

(p) There is no competitive reason for a spread between the rates on cattle and calves, the 115 per cent relationship, calves over cattle, having been employed by commission in decided cases merely as a convenient means of arriving at rates on calves, once reasonable cattle rates are fixed. Calves from Texas, 112 I. C. C. 163, 165.

(q) Rates on livestock in the territory between Missouri River and Pacific coast, more particularly between range and feeding points, found not unreasonable or unduly prejudicial. This vast area reflects wide disparities in topographical, climatic, operating, and transportation conditions which render it impracticable to establish uniform mileage scales or some other basis differing therefrom only in degree. In numerous cases commission has reached widely divergent conclusions which point to a lack of homogeneity from a transportation standpoint which in fact exists throughout this area. Record, however, indicates desirability of a more stable and readily ascertainable basis of rates which will facilitate the movement of stock cattle between ranges and feeding points and it is strongly recommended that parties cooperate with a view looking to establishment of rates adapted to existing operating and transportation conditions in the different sections which

will encourage such movements. American Nat'l Live Stock Assn. v. A. T. & S. F., 112 I. C. C. 197.

(r) Combination rate on horses and mules from National Stock Yards, Ill., to Philadelphia, Miss., found not unreasonable or otherwise unlawful, as compared with lower rate contemporaneously in effect to Meridian, Miss., a farther distant point, or with rate subsequently established. The fourth section departure was protected by an appropriate order, and the subsequent reduction of the rate assailed is not of itself sufficient to establish unreasonableness of the former rate. Moreover, in absence of proof of damage, fact that carriers have charged a higher rate to an intermediate than to a more distant point is not sufficient to entitle shipper to an award of reparation. Dees v. M. & O., 112 I. C. C. 397.

(s) Respondents proposed certain changes in rates on livestock, in carloads, between points in Arkansas, Louisiana, Missouri, New Mexico, Oklahoma and Texas and also from that general territory to Arkansas City, Wichita, and Wichita Union Stock Yards, Kansas, Memphis, Tenn., and Natchez and Vicksburg, Miss. While the rates apply "between" points in the territory described, the movement is practically all northbound, and the present controversy relates almost entirely to the movement of stock or feeder cattle from producing points in Texas to the feeding grounds in Oklahoma and Kansas. It results in both increases and reductions. The record indicates that the rates on stock cattle from Texas points to Northern Oklahoma and Kansas are about as low as they can reasonably be for application over the present joint routes, or other routes which are not materially longer than the short routes. The commission prescribed the I&S 958 scale on which the present rates are based for application over reasonably direct routes, and defendants are justified in restricting the present rates to such routes. The present record is not comprehensive enough to warrant in fixing a degree of circuity as a measure of a reasonably direct route. HELD: Schedules not justified. Livestock from La. and Tex. to Kans. and Okla., 115 I. C. C. 137.

(t) In 100 I. C. C. 4, was reopened with respect to the method of applying mileage scale of rates on livestock to El Paso, Tex., from points in the Texas Pan Handle on the Ft. W. & D. C. and with respect to mileages from Calexico and El Centro, Calif., to El Paso, and rates on cottonseed oil, cake, meal and hulls based thereon. The tariff defines an impracticable route as one through a point where roads do not cross each other at grade, and where there are no connecting tracks to be used in the exchange of traffic. It contains a list of such points and this list does not include any of the points at which traffic would be interchanged if hauled over the short line route through New Mexico. The exception is specific in its provisions that the rates on livestock under consideration shall be based on short line distances over practicable routes, and does not require that the rates themselves shall be applicable over the routes which thus measure the distances. HELD: Rates applicable are those based on distances over the route of the Ft. W. & D. C., Rock Island and E. P. & S. W. Peyton Packing Co. v. A. E. R. R., 118 I. C. C. 452.

(u) Complainant attacked combination rates on cattle and hogs, carloads, from East St. Louis, Ill., St. Louis, Kansas City and St. Joseph, Mo., Omaha, Neb., Fort Worth, Tex., and Oklahoma City, Okla., to Atlanta and Moultrie, Ga., as unreasonable and also from Chicago. Present rates from all of the origin points except St. Louis are combinations of the rates to and from the Ohio and Mississippi river crossings, treated by the combination rule. The rates from St. Louis are joint rates made by the addition of differentials of 17c on cattle and on hogs in double deck cars and 19.5c on hogs in single deck cars to the rates from Evansville, Ind. HELD: Rates attacked unreasonable to extent they exceed distance rates ranging from 47c on cattle and hogs in double deck cars and 54c on hogs in single deck cars for 450 miles to 68 and 78c respectively for 1,200 miles. In applying these rates 20 miles may be added to the actual distances for Mississippi river transfer, but the rates attacked not unreasonable in past. White Prov. Co. v. A. B. & A. Ry., 118 I. C. C. 601.

(vw) Upon reargument, original report, 109 I. C. C. 733, affirmed, and rates on meat animals from points in Alabama to Moultrie, Ga., found not unreasonable; but relationship of rates on hogs from southeastern Alabama to Moultrie, on

the one hand, and Montgomery and Birmingham, Ala., on the other, found unduly prejudicial to Moultrie, unduly preferential of Montgomery and Birmingham, and unjustly discriminatory against interstate commerce. Removal of such prejudice, preference, and discrimination by establishment of intrastate rates upon basis of compromise scale set forth in Appendix A in 74 I. C. C. 419, prescribed. Swift & Co. v. G. N., 115 I. C. C. 661.

(x) Carload minimum weight of 22,000 pounds for factor from East Clinton, Ill., to Jersey City, N. J., on sheep and lambs in double-deck cars 36 feet 7 inches and under in length, originating at South Omaha, Nebr., found unreasonable to extent it exceeded a minimum of 18,000 pounds. Similar finding was made in 69 I. C. C. 125, and carriers here introduced no evidence to show that use of an 18,000-pound minimum would produce less than reasonable charges for service performed. Reparation awarded. Seaboard Live Stock Traffic Bureau v. A., C. & Y., 115 I. C. C. 687.

(y) Tariff defines an impracticable route as one through a point where roads do not cross each other at grade and where there are no connecting tracks to be used in interchange of traffic. An exception thereto, however, is specific in its provision that rates on livestock shall be based on short-line distances over practicable routes and does not require that rates themselves shall be applicable over routes which thus measure distances. Accordingly, rates on livestock from points in the Texas Panhandle on the Fort Worth & Denver City Ry., to El Paso, Tex., found properly based on distances over route of above-named line, the C., R. I. & P., and former El Paso & Southwestern. Original report 100 I. C. C. 4, affirmed. Peyton Packing Co. v. A. E. R. R., 118 I. C. C. 452.

(z) Combination rates based on Ohio and Mississippi River crossings on cattle and hogs from Chicago, East St. Louis, St. Louis, Kansas City, St. Joseph, Omaha, Ft. Worth, and Oklahoma City to Atlanta and Moultrie, Ga., and from Chicago to Birmingham, Jacksonville, Chattanooga, Knoxville, and Nashville, found not unreasonable in the past but for future found unreasonable and reasonable scale of distance rates, based upon scale approved in 81 I. C. C. 33, prescribed. The practice of basing the interterritorial rates on a combination of factors to and from the river crossings has been in effect for many years, and rates assailed, when judged as combination rates, do not produce excessive earnings. Under the circumstances they were not unreasonable in the past. However, no sound reason exists why interterritorial shipments that cross the rivers should pay materially higher rates than intraterritorial shipments within the Southeast, Southwest, and c. f. a. territories for comparable distances where shipments do not cross the river boundaries. White Provision Co. v. A., B. & A., 118 I. C. C. 601.

(aa) Complainant attacked rates charged on livestock, carloads, from St. Cloud, Calvary, Rosendale and Malone, Wis., to Chicago, Ill., during 1918 and 1919 as unreasonable. Points of origin are local stations, about 11 to 18 miles from Fond du Lac, Wis., on a branch of the Northwestern. Prior to federal control these shippers routed their shipments over the Northwestern direct to Chicago. The train schedules were changed requiring the stock to be held at Fond du Lac until the following morning and would not reach the Chicago market until the second morning. Holding the stock at Fond du Lac for movement over the Northwestern direct brought into operation the provisions of the law requiring the feeding, watering and resting of livestock in transit longer than 36 hours. These shippers signed livestock contracts authorizing routing beyond Fond du Lac over the Soo Line. No joint rates were maintained. The Northwestern individual rates were maintained prior to, during, and after the reparation period. HELD, rates attacked unreasonable to extent they exceeded the Northwestern single line rates, reparation awarded. Chicago Livestock Exchange v. Director General, 120 I. C. C. 295.

(bb) Complainant alleged that between Aug. 8, 1916 and Aug. 8, 1918 they made shipments of ordinary livestock from numerous points of origin to certain points at which their packing plants are located; that they were charged rates which were higher than the rates applicable if certain values had been declared by the consignor; and that the rates charged were unreasonable, unjustly discriminatory, unduly prejudicial and unlawful, to the extent that they exceeded the lowest rates which would have been applicable under declared values.

During the time the shipments moved, defendants maintained standard or basic rates on ordinary livestock the value of which, as declared by the shipper, did not exceed certain specified amounts, and these rates were increased by certain percentages when the declared values exceeded the standard or basic values. All of complainants shipments consisted of ordinary livestock subject to these rates. The effect of the second Cummins amendment to section 20 of the act was to render unlawful and void, on and after Aug. 9, 1916, the date when it became effective, all attempted limitations of liability for loss, damage, or injury to ordinary livestock transported, whatever the form of the attempted limitation. Rates based on values declared by shippers not required by tariffs to be actual values are in effect attempted limitations of carriers liability. HELD, standard or basic rates applicable, reparation awarded. Armour & Co. v. Director General, 120 I. C. C. 587.

(cc) Complainant attacked combination rate of 85.5 cents charged on 80 cars of live hogs shipped between Jan. 1 and July 14, 1924 from Sioux City, Ia., to Jersey City, N. J., and New York, N. Y., as unlawful in violation of section 6 to extent it exceeded 83.5 cents. Rate charged was based on proportional rate of 28 cents from Sioux City to Mississippi River plus a proportional rate of 63 cents beyond, subject to the combination rule. HELD: rate of 83.5 cents applicable, reparation awarded. Armour & Co. v. C. & N. W. Ry., 120 I. C. C. 737.

(dd) Domestic rate assessed on cattle and hogs from East St. Louis, Ill., and Louisville, Ky., to Key West, Fla., for export to Cuba, found not unreasonable as compared with lower export rate contemporaneously in effect to Jacksonville or with lower contemporaneous domestic rates applicable to New Orleans. Carriers showed that Jacksonville rate was depressed, higher rates being in effect to intermediate stations; also that no shipments have ever been exported from Jacksonville to Havana, rates to Jacksonville being published for purpose of facilitating shipments of supplies to Europe during the war. Moreover, carriers may establish export rates lower than domestic of their own volition provided no provisions of the act are violated. However, they are not required to do so, there being nothing inherent in export traffic that entitles it, as such to take lower rates than domestic. See 88 I. C. C. 269. Knight & Kennett v. L. & N., 115 I. C. C. 732.

(ee) Combination rates during Federal control on livestock, from St. Cloud, Calvery, Rosendale, and Malone, Wis., to Chicago, Ill., over Chicago & North Western Ry., to Fond du Lac, Wis., and Soo Line beyond, found unreasonable to extent they exceeded rates contemporaneously in effect over North Western direct. Change in schedule of trains instituted by Director General necessitated holding livestock at Fond du Lac, thus entailing additional expense for feeding. To expedite movement shipments were routed via the Soo beyond Fond du Lac and higher combination of locals assessed. However, service afforded was in nowise superior to or materially different from that enjoyed under lower rate and there is little difference in distances over the two routes. Reparation awarded. Chicago Live Stock Exchange v. Director General, 120 I. C. C. 295.

(ff) Rates charged on shipments of ordinary livestock which were higher than those applicable if standard or basic rates had been declared by consignor found unlawful and void under the second Cummins amendment to section 20 of the act. The effect of that amendment was to render unlawful and void all attempted limitations of liability for loss, damage, or injury to ordinary livestock transported, whatever the form of attempted limitation. Accordingly, rates here which were based on values declared by shippers and which were not required by tariffs to be actual values were in effect attempted limitations of carrier's liability. See 69 I. C. C. 235 and other cited cases. Reparation awarded. Armour & Co. v. Director General, 120 I. C. C. 587.

(gg) Proposal to restrict proportional commodity rate on horses and mules from Chicago to Ohio River crossings so that it will not apply on shipments routed over or in connection with the C., C., C. & St. L. Ry., found not justified. This rate was originally established to meet a rate of the Illinois Central R. R., but the Big Four does not desire to meet competition of that carrier. No justification, however, was shown for higher second-class rates which would result on this traffic from both Chicago and intermediate points. Moreover, the record indicates that pro-

posed restriction is only a temporary expedient, there now being under consideration an adjustment which, if made effective, will either materially increase present rate or result in its cancellation over certain routes. Piecemeal revision of rates, however, is not desirable except in unusual circumstances, not here present. Horses and Mules from Chicago, 120 I. C. C. 607.

(hh) Complainant attacked combination rates charged for four cars of graders outfits with excess livestock shipped Aug. 17, 1922 from Hazelhurst, Miss., to Hartselle, Ala., as unreasonable. Hazlehurst is a local station on the I. C., 34 miles south of Jackson, Miss., intermediate to New Orleans, La. Hartzelle a local station on the L. & N. is 72 miles north of Birmingham, Ala., intermediate to Nashville, Tenn. Shipments were tendered unrouted and moved I. C. via Jackson, Tenn., to Birmingham, thence L. & N., 580 miles, charged fifth class combination rate of $1.06, composed of 65c to Birmingham and 41c beyond. Charges on the excess livestock were collected at first class combination less carload rate of $2.015, made $1.35 to Birmingham and 66.5c beyond. There were contemporaneously in effect from New Orleans to Nashville first class and fifth class rates of $1.44 and 74.5c, respectively, which were subsequently established on July 20, 1924 from Hazlehurst to Hartselle. HELD, rates attacked unreasonable to extent they exceeded 144c on excess livestock and 74.5c on graders outfits, reparation awarded. Jones Construction Co. v. L. & N. R. R., 122 I. C. C. 18.

(ii) Complainant alleged commodity rates on hogs and cattle, carloads, to Madison, Wis., from South St. Paul, Minn., Sioux Falls, S. D., and Sioux City, Ia., are unreasonable and unduly prejudicial in favor of Milwaukee, Wis., and Racine, Wis., and Chicago and Peoria, Ill. Madison is practically the geographical center of the southern third of Wisconsin, which comprises the hog belt of that state; it is on through lines from important western and northwestern livestock markets; and has an adequate supply of labor. It is about 130 miles northwest of Chicago and 82 miles west of Milwaukee, and is reached by the Milwaukee and Northwestern, and I. C. From the standpoint of distance the rates to Madison should be lower than to Chicago and Milwaukee. Other elements affect the situation, and are entitled to consideration in determining whether the present relation shall be changed, and if so, to what extent. It is obviously impossible to set off these various factors one against another and arrive at a conclusion as to how they should be reflected in the rates, the correctness of which can be demonstrated with mathematical accuracy. HELD, carload rates on hogs in double deck cars, and on cattle, to Madison from South St. Paul on traffic from beyond, and from Sioux Falls and Sioux City are not shown to have been or to be unreasonable, except that the rate from Sioux Falls was unreasonable prior to June 22, 1926 to the extent it exceeded 37.5c, but that for future unduly prejudicial to extent they exceed amounts which are 2.5, 2.5 and 1c, less than the rates from the same points to Chicago and Milwaukee, reparation awarded. Mayer & Co. v. A. T. & S. F. Ry., 122 I. C. C. 305.

(jj) In 15686 all rates on livestock in the territory served by the carriers in the western and mountain Pacific groups, including Illinois and Wisconsin, are alleged to be unreasonable to the extent they exceed the pre war rates; that is, generally speaking, the rates in effect for many years prior to June 25, 1918, when G. O. 28 of the Director General became effective. This case is similar to 63 I. C. C. 107. While the condition of the livestock industry has materially improved since the period of extreme depression the recovery has by no means been complete. The industry is still suffering from depression, although not in all branches and not in the same degree as heretofore, and the Commission is required by the Hoch-Smith resolution to afford to livestock affected by that depression the lowest possible lawful rates compatible with the maintenance of adequate transportation service. Defendant's evidence as to the peculiarities of the traffic, the special facilities necessary, and the special services performed is similar to that offered in other livestock cases. The nature of the traffic is such that it must be handled with utmost care. Stock is easily injured. Damage claims are often filed when, by reason of delay in transit, stock shrinks unduly or reaches the market too late for advantageous sale. They exceed 2% of the livestock revenue. Livestock is handled with greater expedition than is most other traffic, except perishable

freight. Special runs by locomotives are often made in gathering the stock and getting it under way promptly after loading, particularly where it originates on branch lines, as a large proportion of it does. The livestock trains from one division point to another are frequently if not generally, moved at a speed several miles per hour greater than that of most trains. Livestock is also given expedited movement into and out of division terminals along the way. Special trains frequently run with only a few cars in order to reach division terminals along the way. Expedition is necessary in order to avoid as much as possible stopping in transit for water, feed, and rest. Other causes for expense occasioned by livestock are the showering of hogs, cleaning and disinfecting cars, and interference with other freight movements. Shippers may send caretakers with the stock and no charge is made for their transportation. The caretakers generally ride in cabooses, although some roads furnish special equipment known as drovers' cars. Free return transportation on regular passenger trains is provided if the caretaker has accompanied two or more cars of livestock to destination. The caretakers are expected to look after the welfare of the stock in such a way as to reduce loss and damage claims and relieve railroad employees of certain duties in that connection. The empty car movement occasioned by livestock traffic is relatively high. Livestock loads lighter than almost all other kinds of carload traffic that move in substantial volume. Special equipment is necessary for livestock, and it is not generally usable for other commodities, although so used to some extent. Loading and unloading pens and chutes must be provided, not only at points where the traffic originates and where it is delivered, but at intermediate points as facilities for stopping stock in transit for water, feed and rest. Obviously a determination whether all less carload traffic combined with a particular class of carload traffic selected by complainants loads more or less heavily than livestock would throw no light on the question of how profitable livestock traffic is to the carriers at present rates. Although the evidence relating to cost and revenues does not lead to a definite conclusion as to the precise profit derived from livestock traffic at present rates, it is sufficient to demonstrate that the Commission is not warranted, on the one hand, in reducing the livestock rates by any substantial amount; or, on the other hand, in regarding them as confiscatory. The record, as it now stands, is inadequate to warrant a finding either that livestock rates in the west, as a whole, are in excess of reasonable maxima as alleged, or in excess of the lowest possible rates compatible with the maintenance of adequate transportation service, that lawfully might be required. Complainants have gone as far as they can in adversary proceedings, but the record that they have been able to present is not sufficient in the respects noted. The record will be kept open in connection with 17000 for the purpose of removing inconsistencies in the present rates. It may be that the record in such further investigation will afford more light on the question of whether the present level constitutes the lowest possible lawful rates on this commodity. HELD, short haul rates complained of in 15686 and 16113 are not in excess of reasonable maxima, and in 16113 not in excess of reasonable maxima. Reparation denied. However, the Commission prescribes for the future for interstate application from and to such points in Oklahoma, Louisiana, Texas, Arkansas, Kansas and Missouri as now carry rates based upon the Shreveport scale, on cattle, in carloads, or on calves, hogs, sheep or goats in double deck cars, rates ranging single line 8.5c joint line 12c for 10 miles to 49.5c single and joint line for 600 miles. Hogs and calves in single decks 115% of the cattle rates and on sheep or goats in single decks 125% of the cattle rates. In No. 16131 it is alleged that certain rates on stock cattle from Oklahoma and Texas points to Missouri river markets as far north as Sioux City, and to interior points in Missouri, Iowa, and Nebraska were and are unreasonable to extent they exceed 75% of the fat cattle rates. Stock cattle are quite generally loaded considerably above the minimum weight, but as it is often impracticable to weigh the cars or to otherwise obtain the exact weights before delivery is made, the carriers in many instances transport some tonnage without charge. HELD, rates complained of, except those that exceed the aggregate of the intermediate rates, not in excess of reasonable maxima. Reparation denied. In No. 15565 a Fort Worth organization alleged that the rates on cattle from Texas to Kansas are unreasonable, un-

duly prejudicial and in violation of section four. 75% of fat cattle rates is asked on feeder cattle. HELD, present rates not in excess of reasonable maxima, except those that exceed the aggregate of intermediate rates, otherwise unlawful. American National Livestock Asso. v. A. T. & S. F. Ry., 122 I. C. C. 609.

(kk) Rates on hogs and cattle from South St. Paul, Minn., originating beyond, and from Sioux Falls, S. Dak., and Sioux City, Iowa, to Madison, Wis., found not unreasonable, except that rate from Sioux Falls was unreasonable prior to establishment of and to extent it exceeded the distance rate prescribed in 77 I. C. C. 451. Such rates, however, found unduly prejudicial in favor of Chicago and Milwaukee to extent that rates to Madison exceed 2.5, 2.5, and 1 cent, respectively, less than rates contemporaneously maintained to Chicago and Milwaukee. Nonprejudicial basis of rates prescribed and reparation awarded. Mayer & Co. v. A., T. & S. F., 122 I. C. C. 305.

(ll) Rates in the aggregate for interstate transportation of livestock between points in the territory served by the western and mountain-Pacific groups of carriers, including Illinois and Wisconsin, found not in excess of reasonable maxima, or in excess of the lowest possible rates compatible with maintenance of adequate transportation service, that lawfully might be required. A consideration of economic conditions surrounding the livestock industry together with evidence relating to cost and revenues, while not leading to a definite conclusion as to precise profit derived from traffic at present rates, demonstrates that commission is not warranted, on the one hand, in reducing the livestock rates by any substantial amount; or, on the other hand, in regarding them as confiscatory. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609.

(mm) Rates on cattle, hogs, sheep and goats from and to certain points in Oklahoma, Louisiana, Texas, Arkansas, Kansas, and Missouri, found not in excess of reasonable maxima. However, for purpose of removing existing discrepancies and in light of the Hoch-Smith resolution rates on a distance basis prescribed for future application. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609.

(nn) The nature of livestock traffic is such that it must be handled with utmost care. Stock is easily injured. Damage claims are often filed when, by reason of delay in transit, stock shrinks unduly or reaches the market too late for advantageous sale. They exceed 2 per cent of the livestock revenue. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 615.

(oo) While condition of livestock industry has materially improved since the period of extreme depression, the recovery has by no means been complete. The industry is still suffering from depression, although not in all branches and not in same degree as heretofore, and commission is required by the Hoch-Smith Resolution to afford to livestock affected by that depression the lowest possible lawful rates compatible with maintenance of adequate transportation service. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 615.

(pp) Shippers may send caretakers with live stock and no charge is made for their transportation. The caretakers generally ride in cabooses, although some roads furnish special equipment known as drovers' cars. Free return transportation on regular passenger trains is provided if caretaker has accompanied two or more cars of livestock to destination. The caretakers are expected to look after welfare of the stock in such a way as to reduce loss and damage claims and relieve railroad employees of certain duties in that connection. For 11 railroads carriers estimate that at current fares this service amounted to 5.6 per cent of the revenue from livestock in 1923. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 616.

(qq) Livestock is handled with greater expedition than is most other traffic except perishable freight. Special runs by locomotives are often made in gathering the stock and getting it under way promptly after loading, particularly where it originates on branch lines, as a large proportion of it does. The livestock trains from one division point to another are frequently, if not generally, moved at a speed several miles per hour greater than that of most other trains. Livestock is also given expedited movement into and out of division terminals along the way. Special trains frequently run with only a few cars in order to reach division terminals and markets on time. Expedition is necessary in order

to avoid as much as possible stopping in transit for water, feed, and rest. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 616.

(rr) The law requires carriers to bear expense of loading and unloading livestock at public stockyards and at points where it is stopped for water, feed, and rest. Almost all other carload freight is loaded and unloaded by shippers. American Nat'l. Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 617.

(ss) Special equipment is necessary for livestock, and it is not generally usable for other commodities, although so used to some extent. Loading and unloading pens and chutes must be provided, not only at points where traffic originates and where it is delivered, but at intermediate points as facilities for stopping stock in transit for water, feed and rest. American Nat'l Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609 617.

(tt) American Railway Express Company and Southeastern Express Company, provide in their tariffs for the free transportation of a specified number of attendants with race horses, in carloads, moving by express. Complainant alleged that these rules are unreasonable, and that the rules with respect to polo mounts and show horses are unjustly discriminatory and unduly prejudicial to the extent they permit less than six attendants per car in any territory. Defendants proposed to restrict the number of attendants carried free with carloads of race horses to two in all instances. The six attendant rule in connection with race horses has been maintained in most of eastern territory at least since 1898. The record warrants the conclusion that two and one attendants per aisle, respectively, are usually sent with and are necessary for the proper care of race horses and other horses, respectively, in stalled cars, by express, and that these attendants should be transported without any charge in addition to the minimum rates per car on this traffic. This can best be accomplished by regulating the number of free attendants by the number of horses in the car. HELD, rules unreasonable to extent they accord such transportation to fewer attendants per car than are indicated below: Race horses 4 and less attendants 2, 8 and over 4, attendants 4, 9 and over, attendants 6; Polo mounts and show horses, 6 and less 1 attendant, 12 and over 6, attendants 2, 13 and over, attendants 3. Horse Asso. of America v. American Railway Express Co., 126 I. C. C. 103.

(uu) Complainant attacked commodity rates charged on carloads of live hogs shipped between Jan. 1, 1918 and Feb. 29, 1920, from Peoria, Ill., to East St. Louis, Ill., and Chicago, Ill., as unlawful in that they were in excess of the published tariff rate. Hogs are not raised in Peoria for shipment to other markets. They are transported to that point by rail, by boat, by motor truck and by other means. Complainants records do not enable it to make a definite showing as to how those comprizing the shipments in question moved to that point or the percentage of tonnage received at Peoria by these respective methods of transportation. A tariff of the C & A named two sets of rates, one published without restricton and the other, which was on a somewhat lower level, published as applicable on traffic "when from beyond". Local rates were charged. The rates which complainant seeks to have applied were not expressly termed proportional rates in the body of the tariff. This tariff on its title page, is described as a local and proportional tariff and the only limitations upon the use of any rates therein which could establish their proportional application were the words "when from beyond". HELD, rates attacked legally applicable, complaint dismissed. Armour & Co. v. Director General, 126 I. C. C. 539.

(vv) Complaint alleged that the combination of local rates to and from Huron, S. D., charged on carloads of hogs between May 10, 1923 and March 31, 1924 from points in North and South Dakota, stopped in transit at Huron for feeding, watering, resting, or sorting, and reforwarded to Mason City, Ia., were unreasonable, unduly prejudicial and in violation of section 6 and 4. Shipments originated at Redfield, S. D., and at stations on defendants lines west and north of Redfield to and including Gettysburg, S. D., and Oakes, N. D. and moved as billed, south from Redfield to Huron where they were stopped for feeding, watering, resting and sorting. The movement into Huron was in single deck cars. Beyond Huron the shipments moved in double deck cars east over the line through Brookings, S. D., and Tracy, Minn., to Sanborn, Minn., thence southerly through Blue Earth, Minn., to Mason City. Charged on basis of separately

established local rates to and from Huron, subject to the single deck minimum inbound and double deck minimum outbound. Contemporaneously with the movement of these shipments specific rates from the several points of origin to Mason City were maintained over the short route through Redfield, Watertown, S. D., Marshall, Minn., and Tracy, and over the route through Watertown and Brookings. The route through Marshall and Tracy is 13 miles shorter, and the route through Watertown and Brookings 6.5 miles longer, than that through Huron. These specific rates were lower than the combination rates applied. At all times covered by the complaint defendant provided that carload shipments of hogs originating at points on its lines and destined to Chicago or intermediate points might be stopped in transit at certain stations, including Huron, for a period not to exceed 72 hours to finish loading, or for weighing, resting, feeding, watering, sorting, or consolidating, provided the stopping point was directly intermediate between the points of origin and destination. Prior to Nov. 24, 1923, defendants transit tariff also provided that when shipments were handled into the transit station in single deck cars and outbound in double deck cars, the charges inbound would be computed at the local rate to the transit station, subject to the single deck minimum weight, and that outbound charges would be computed at the balance of the through rate, subject to the double deck minimum weight. To settle a controversy as to the meaning of the "balance of the through rate" which arose subsequent to the publication on August 9, 1923, of different rates on single deck from those on double deck shipments, defendant on Nov. 24, 1923, expressly provided for the application in such instances of the through single deck rates and double deck minimum weights. Prior to March 14, 1924, transit at Huron was not applicable on the specific through rates, but on that date a note was added to the transit tariff providing that Huron would be considered as intermediate. This accorded Huron the transit arrangement at the specific rates from the points of origin here considered on shipments to Mason City. The evidence does not establish any undue prejudice or any violation of section 6. Violation of long and short haul provision has now been removed. HELD, attacked rates unreasonable to extent they exceeded the specific rates on hogs in single deck cars, subject to the double deck minimum provided in connection therewith, contemporaneously in effect from the respective points of origin to Mason City, Ia., reparation awarded. Decker & Sons v. C & N. W. Ry.. 126 I. C. C. 551.

(ww) Complainant sought refund of alleged overcharges on 427 shipments of hogs and 1 shipment of sheep, from the markets of Sioux City Ia., and South Omaha, Neb., and from country shipping stations in Iowa, to its packing plants at Kansas City and Wichita, Kan. In the original report, Cudahy Packing Co. v. Director General 104 I. C. C. 705, the Commission found the shipments were subject to graded rates based upon the actual value of the stock, that they were not of a value entitling them to the lower rates sought, and that the rates charged were applicable and dismissed the complaint. In Crown Overall Mfg. Co. v. Director General 100 I. C. C. 471, the Commission pointed out the clear distinction between rates in connection with which a declaration of value is required as a released value, and those rates where the declaration required is the actual value of the shipment, the principle underlying the latter rates being that the articles covered by the different groups of valuations are so different from a transportation standpoint as to constitute in effect different commodities. In the case of the latter, called actual value rates, there is no holding forth by the carrier of an offer to transport goods at the higher values at the lower rates in consideration of release by the shipper of the carriers liability, and the value declared is not given as a measure of the carriers liability, but as a part of the necessary description of the goods. Released rates and actual value rates may be fairly and effectively differentiated, and actual value rates should be applied as published. HELD, former finding affirmed, complaint dismissed. Cudahy Packing Co. v. Director General, 126 I. C. C. 674.

(xx) Rules governing free transportation of attendants with race horses, polo mounts, and show horses, in carloads, moving by express, found unreasonable to extent they accord transportation to fewer attendants than herein prescribed based on kind and number of horses per car. Express company's proposal to restrict number of attendants to two per car in all instances, FOUND not justified. Record indicates that race

horses being nervous, tempermental, and highly susceptible to disease, require a greater number of attendants per car than either polo or show horses which are more tractable and of more even temperament. Moreover, as record shows that two and one attendants per aisle, respectively, are usually sent with and are necessary for proper care of race horses and other horses, this number should be transported without charge in addition to minimum rates per car. Reasonable rules prescribed for future. Horse Asso. of America v. Amer. Ry. Exp. Co., 126 I. C. C. 103.

(yy) Tariff governing shipments of hogs from Peoria, Ill., to Chicago and and East St. Louis, Ill., carried an unrestricted local rate and a lower rate applicable on traffic "when from beyond." Upon contention that local rates were applicable only to hogs raised in the city of Peoria and were mere paper rates, while lower rates were applicable on all hogs from that point, including those raised immediately outside the city limits and driven across the boundary line, HELD; This interpretation can not be accepted. While lower rates were not termed proportional rates in body of tariff, title-page described tariff as a local and proportional tariff, only limitations upon use of any rates therein which could establish their proportional application being the words "when from beyond." In 81 I. C. C. 688 it was pointed out that the word "beyond" implied a line-haul movement "beyond" the rate-breaking point. Therefore, in instant case, local rates assessed on shipments moving to Peoria other than by rail from beyond were applicable. Armour & Co. v. Director General, 126 I. C. C. 539.

(zz) Combinations of local rates on hogs from North Dakota and South Dakota, moving in single-deck cars subject to single-deck minimum weight and rate inbound to Huron, S. Dak., there stopped in transit for feeding, watering, resting, sorting, and consolidating, and reforwarded to Mason City, Iowa, in double-deck cars subject to local outbound rate at double-deck minimum weight and rate, FOUND unreasonable to extent they exceeded lower specific through rates contenporaneously in effect between the same points via other routes and subsequently established via route of movement, on shipments moving in single-deck cars to transit point and double-deck cars beyond, subject to single-deck rate and double-deck minimum both inbound and outbound. See also 98 I. C. C. 153. Reparation awarded. Decker & Sons v. C. & N. W. Ry., 126 I. C. C. 551.

(3a) Finding in former report 104 I. C. C. 705, that shipments of hogs and sheep from South Omaha, Nebr., Sioux City and other Iowa points, to Kansas City and Wichita, Kans., on which charges were collected based upon actual-value rates, were not overcharged, affirmed. Complainant bases its claim upon 69 I. C. C. 235, 80 I. C. C. 737, in which it was found that actual-value rates and released rates alike operated as limitations upon shipper's right of recovery for full actual loss or damage and therefore the lowest of such graded rates were applicable upon shipments regardless of value. However, in 100 I. C. C. 471, this decision was overruled and it was declared that released rates and actual-value rates may be fairly and effectively differentiated, and that actual-value rates should be applied as published. Cudahy Packing Co. v. Director General, 126 I. C. C. 674.

(3b) Carrier's schedules for live stock shipments on file with Interstate Commerce Commission HELD not to limit a carload to 28 horses, but to merely fix this for rate-making purposes, with a graduated rate in proportion, if an additional number be loaded. Shaffer v. American Ry. Express Co., (Mo., 1926) 282 S. W. 725, 726.

(3c) Proposed rules, regulations, and charges governing the bedding of cars used for transportation of livestock in c. f. a. and western trunk-line territories, found not justified. Rules proposed are similar to those found not justified in 98 I. C. C. 323, principal difference being that in former case quantities considered suitable were specified, whereas rules here proposed specify like quantities as being sufficient to enable animals to retain their footing, respondents maintaining that when this is done their obligation ceases and that expense involved in furnishing additional bedding should be borne by shippers. While they disclaim any intention to deny their common-law obligations to furnish suitable bedded cars, it is not shown that proposed stock rules would not have this effect. Bedding Charges for Livestock, 128 I. C. C. 167.

(3d) Duty resting upon carriers to

bed cars for transportation of livestock has been recognized under the uniform rules established by the railroad administration and those now in effect. Climatic and transportation conditions vary the kind and quantity of bedding essential to safe transportation, but whatever is reasonably necessary the carrier is by law required to furnish. See 80 I. C. C. 747. Bedding Charges for Livestock, 128 I. C. C. 167, 168.

(3e) Charges based on joint-line interstate rates under agreed distance scales on livestock to Atlanta and Howell Stockyards, Ga., over certain lines under same management and control, found unreasonable to extent they exceeded rates based on single-line rates under agreed distance scale, which rates were subsequently made applicable in connection with carriers shown. In 101 I. C. C. 105, it was found that wherever joint-line rates under agreed distance scales had been applied under circumstances similar to those here involved, such rates were unreasonable to extent they exceeded the single-line rates under the agreed distance scales on a joint or continuous mileage basis, and record in instant case does not warrant a different conclusion. Reparation awarded. Bragg & Millsaps Co. v. A. & W. P. 128 I. C. C. 238.

(3f) Joint-line interstate rates under agreed distance scale on livestock to Atlanta and Howell Stockyards, Ga., over certain lines under separate management and control, found reasonable. Complainant contended that as certain groups of carriers were under common management and control the single-line rates rather than joint-line rates should have been applied in conformity with order in 74 I. C. C. 419. However, carriers showed that the traffic policy of any of the roads was in no way dictated by officials of other carriers. Carriers found not to be under same management and control as defined in 87 I. C. C. 654. Bragg & Millsaps Co. v. A. & W. P., 128 I. C. C. 238.

(3g) Complainant attacked joint-line distance scale of rates on livestock, in carloads, forwarded since July 15, 1923 to Atlanta and Howell Stockyards, Ga., as unreasonable and in contravention of order in Livestock to, from and between points in south east, 74 I. C. C. 419, to extent they exceeded the single line distance scale therein prescribed. Shipments originated at points on L. & N. and moved W. Ry., of Ala., and A. & W. P. Shipments originated at points on the L & N. and moved over N. C. & St. L. Shipments originated at points on the W. Ry. of Ala., and moved over A. & W. P. Shipments originated at points on the A. G. S. and C. N. O. & T. P. and moved over Southern. There is nothing on record to justify a finding that the carriers in class 1 and 2, were, or are, under the same management and control. As to class E and 4 single line rates should apply, and on August 31, 1925 single line rates were made applicable, reparation awarded. Bragg & Millsaps Co. v. A. & W. P. R. R., 128 I. C. C. 238.

(3h) In former report, 104 I. C. C. 607, division 3 found that the rates charged on hogs, carloads, from Iowa and adjacent states to East Cambridge, Mass., and other destinations in New England were in excess of the rates legally applicable to the extent they exceeded the combination rates in effect June 24, 1918 increased 7c per 100 pounds. The finding was limited to federal control. The publication on Feb. 29, 1920 of proportional rates from Iowa points to the Mississippi river crossings 2.5c higher and from the Mississippi river crossings to the east 4.5c higher than the rates in effect June 24, 1918 was an attempt to establish definitely and clearly for the first time the combination in force on the latter date increased 7c in accordance with G. O. 28. The failure concurrently to cancel reference to the combination rule in connection with the proportional rates so established, however, made such rates subject to the basis for constructing through combinations provided therein, that is, the components to the river were to be reduced 25 per cent and those from the river 7c, and the aggregate result increased 7c. This error resulted in establishing through combination rates for the period subsequent to Feb. 29, 1920 only slightly higher than the combinations in effect June 24, 1918 and thereby inadvertently eliminated a substantial portion of the increase contemplated in G. O. 28. It seems clear that the complaint in 13485 was filed merely for strategic purposes in connection with the complaint against the director general and that complainants recognized the injustice of taking advantage of defendants inadvertance in

order to secure transportation at an admittedly subnormal rate during the transitional period immediately following federal control, when the carriers earnings were guaranteed by the Government, and Congress had taken steps to prevent any unwarranted reductions in their rates. HELD, complaint dismissed. North Packing & Provision Co. v. Director General, 128 I. C. C. 306.

(3i) Rates on hogs in single and double deck cars from points in New Mexico, Kansas, and Oklahoma to Los Angeles found unreasonable but not unduly prejudicial as compared with those under distance scales prescribed in 22 I. C. C. 160; 26 I. C. C. 37; 81 I. C. C. 115, for application in same general territory. Reasonable rates and minimum weights prescribed for future and further hearing ordered on question of reparation. Calif. Dressed Beef Co. v. A., T. & S. F., 128 I. C. C. 607.

(3j) Complainant assailed rates and bedding charges on hogs, in single and double deck carloads, shipped since July 1921 from points on defendants lines in New Mexico, Texas, Oklahoma and Kansas to Los Angeles, Calif., as unreasonable, unjustly discriminatory, unduly prejudicial and illegal and in violation of section four. It does not appear that there were any departures of the fourth section and allegations with respect to the bedding charges were withdrawn. The rates assessed and collected on the shipments from points on the Santa Fe and its subsidiaries in New Mexico and Texas were the full aggregate of intermediate rates to and from Mojave. Since May 10, 1925 the Santa Fe has published in its own tariffs joint and through rates from stations in New Mexico and Texas to Los Angeles which have been and are generally speaking, the same in amount as the aggregate of intermediate rates to and from Mojave in effect immediately prior to May 10, 1925. HELD, rates attacked unreasonable to extent they exceeded double decks 74c single deck 85c for 1,000 miles to 95c and 109.5c respectively for 1,700 miles. Minimum on hogs single deck standard car 16,500 pounds, double deck 23,000 pounds. California Dressed Beef Co. v. A. T. & S. F. Ry., 128 I. C. C. 607.

(3k) Combination rates on hogs from points on A. T. & S. F. Ry., in New Mexico and Texas to Los Angeles, based on Mojave, Calif., found not unreasonable. Complainant contended that lower rate from Mojave should be extended to apply from Barstow, Calif., because distance from latter to Los Angeles is less. However, while none of shipments actually moved to Mojave and back through Barstow but moved directly through Barstow, the Mojave combination was applicable under rule 5 (b) of Tariff Circular 18-A, and over the Southern Pacific, the rate-making line, distance between Mojave and Los Angeles is much less than over the Santa Fe. Moreover, authority to depart from long-and-short-haul clause of California constitution and public utilities act has been granted the Santa Fe and departure from section 4 of the act is protected by application. Calif. Dressed Beef Co. v. A., T. & S. F., 128 I. C. C. 607, 610, 611.

(3l) Complainant attacked commodity rates charged on 14 cars of horses and mules, shipped between Jan. 8 and June 3, 1922 from Sikeston and Oran, Mo., to Memphis, Tenn., as inapplicable. Under rule 4c of the Tariff Circular 18-A it is permissible for a general commodity tariff to refer to other tariffs in which certain named class or commodity rates may be found, but where, as here, the tariff referred to fails to publish any rate on the commodity in question, the rate in the general commodity tariff remains the applicable rate. HELD, rate of $53.50 per car was applicable prior to April 1, 1922 and $75.50 thereafter, overcharges to be refunded, complaint dismissed. Maxwell Sons Commission Co. v. St. L. S. F. Ry., 128 I. C. C. 725.

(3m) General commodity tariff found applicable on shipments of horses and mules from Sikeston and Oran, Mo., to Memphis, Tenn., moving prior to date of its cancellation, although tariff, by exception, referred specifically to other tariffs for rates from points on carrier's lines in Missouri to Memphis. Contention of carrier that exception prohibited application of general tariff not sustained in view of fact that tariffs referred to fail to provide rates on livestock from and to points in question. Under rule 4 (c) of Tariff Circular 18-A it is permissible for a general commodity tariff to refer to other tariffs in which certain named class or commodity rates may be found, but where, as here, the tariff referred to fails to publish any rate on commodity in question, rate in general commodity tariff remains applicable.

Maxwell Sons Commission Co. v. St. L. S. F., 128 I. C. C. 725.

(3n) Complainants assailed the carload rates on horses and mules from St. Louis, Mo., East St. Louis, Ill., Ohio river crossings and various points in Kentucky and Tennessee to Atlanta and Howell stock yards, Ga., and from all points north of the Ohio and west of the Mississippi river to the same destinations and Birmingham and Montgomery, Ala., as unreasonable and unduly prejudicial. Original report 63 I. C. C. 6, the Commission found no violation of sections 3 or 4, departures from the latter section being protected by applications for fourth section relief, but it did find that "while the rates assailed appear not unduly high, they were unreasonable in and to the extent they respectively exceeded the aggregates of the intermediate rates subject to the act" and awarded reparation. Second report 74 I. C. C. 419, and on further hearing, 93 I. C. C. 325, the Commission awarded reparation to the basis of the lowest aggregates of intermediate rates upon shipments moving during the period from May 9, 1919 to May 15, 1923. HELD, the Commission is now of the opinion that the disparity between the through rates and the combination rates was due to the low level of the latter rather than any excessiveness in the former. It follows that the presumption of unreasonableness has been rebutted, complaints dismissed. Hudson Mule Co. v. L. & N. R. R., 129 I. C. C. 365.

(3o) Complainant alleged charges collected on seven double deck cars of sheep shipped during May, 1922 from Chicago, Ill., to Wolverine, Mich., were unreasonable and inapplicable. They moved in double deck cars furnished on orders for 36 ft. 6 inch double deck cars, charged 38c and applicable minimum of 22,000 pounds. The tariff publishing the 38c rate also published a rate of 30c on feeder sheep subject to a provision reading "these rates only apply when a certificate is presented by the shipper that the stock is intended for feeding purposes and not for slaughter." A certificate purporting to meet the requirements of that provision was presented some time after the shipments had moved. A reasonable interpretation of that provision requires that the certificate be presented at a time not later than the tendering of the shipments. As the provision reads, the shipper was required to present a certificate that the stock "is intended for feeding purposes." This must relate to the time of movement and a certificate presented subsequent to the movement would not serve the purpose. HELD, charges applicable but unreasonable to extent they exceeded minimum of 18,000 pounds, reparation awarded. Calkins Augsbury & Mikan v. M. C. R. R., 129 I. C. C. 475.

(3p) Complainant alleged that the rules and regulations governing the assessment of freight charges on mixed carloads of livestock between points in official classification territory are unreasonable. The Commission prescribed rules for future application in National Live Stock Exchange v. A. A. R. R., 69 I. C. C. 125, and 81 I. C. C. 305. These rules are applicable throughout the United States, and became effective Sept. 28, 1923. HELD, rules and regulations assailed not unreasonable, complaint dismissed. Ohio Farm Bureau Federation v. A. C. & Y. Ry., 129 I. C. C. 689.

(3q) Complainant alleged that rates charged on horses, mules, burros and asses in straight or mixed carloads since Jan. 1, 1923 from Oklahoma, Missouri, Kansas, Nebraska, Colorado and New Mexico to Fort Worth, Tex., and from that point to Vicksburg, Miss., were and are unjust, and in violation of the fourth section; also that the additional charge of 35c a head of those animals collected for yardage at Fort Worth since the same date was unreasonable. RATES ASSAILED. Prayer for future rates from New Mexico to Fort Worth and from that point to Vicksburg were with drawn. Reparation was limited to the period prior to April 20, 1925 when rates were established pursuant to Horse and Mule rates in the Southwest, 1924, 93 I. C. C. 479. No rates to Fort Worth are shown from Nebraska and Colorado points. The issue is thus narrowed to reparation on shipments from Oklahoma, Missouri and Kansas prior to April 20, 1925. The record fairly warrants the conclusion that this complaint was brought primarily with a view to securing reparation in larger measure than was accorded in the original case. HELD, dismissed as to reparation. YARDAGE CHARGE. Defendant, Forth Worth Stock Yards Co.,

a corporation operates a public stockyard and marketing facilities in that part of Fort Worth known as North Fort Worth. At the hearing the two dealers located within the stockyard withdrew their complaint against the yardage charge. Carload shipments of horses, mules, burros, and asses consigned to the outside dealers from interstate points of origin are delivered by the line haul carriers, together with the accompanying waybills, to the Belt at their several recognized points of interchange, ranging from about 0.5 miles to 2 miles from the stockyard. They are hauled thence by the Belt with its own power and crews to the unloading platform along the east side of the stockyard and spotted opposite the chutes. The Belt delivers the waybills to the stockyards company, which records the car initials and numbers, consignor, consignee, and all other information usually shown on such documents, retains copies and returns the originals to the Fort Worth agents of the line haul carriers. The stockyards company immediately notifies the outside dealers of the arrival of the shipments, ascertains and records the locations of the cars, and unloads the animals into pens adjoining or in the vicinity of the unloading platform, and cares for them as long as they remain in the stockyard. The interstate rates to Fort Worth include delivery of the livestock under consideration into the unloading pens at the stockyard through absorption by the line haul carriers of the switching charges of the Belt and the charge of the stock yard company for unloading. An additional charge of 35c per animal called a yardage charge, is assessed by the stockyards company for the use of its facilities from the time the animals are taken out of the unloading pens by it or the outside dealers and for the services rendered, except unloading. No part of this charge is divided with the line haul carriers or the Belt. The switching charges are filed with this commission but the unloading and yardage charges are not. The yardage charge is filed with the Secretary of Agriculture in purported compliance with the packers and stockyards act, 1921. The outside dealers pay the interstate rates to the line haul carriers and the yardage charge to the stockyards company. These costs are charged to the shippers in final settlements for shipments sold on commission and are borne by the outside dealers on shipments handled for their account. The question therefore is whether section 15 paragraph (5) is complied with by delivery of the livestock into such pens. A careful reading of the amendment to section 15 in the light of prior and subsequent decisions dealing with the questions closely related to that here presented leads to the conclusion that transportation of ordinary livestock, in carloads, to public stockyards ends when the animals are unloaded into suitable pens at such yards. It follows that this marks also the limit of the jurisdiction of the Commission over such shipments. HELD, the Commission is without jurisdiction to determine the issues respecting the yardage charge here assailed, complaint dismissed. Southwestern Horse & Mule Asso. v. A. T. & S. F. Ry., 129 I. C. C. 730.

(3r) Complainant alleged commodity rates charge on beef cattle, and on hogs in double deck cars, from Kansas City and St. Joseph, Mo., to Houston, Tex., were and are unreasonable and unduly prejudicial as compared with the rates from the same origin points to Oklahoma City, Okla., Fort Worth, Tex., and other points not named. Various rates in excess of 50c were charged. On Oct. 6, 1923 a reduction to 50c was made in the rates from Kansas City over direct routes, but not over circuitous routes nor from St. Joseph over any route. Rate of 50c is sought. It is satisfied with present rate of 50c over direct routes from Kansas City. HELD, rates assailed were and will be unreasonable to extent they exceeded those for actual distances provided by the modified 1716 scale published on pages 51 and 52 of Lelands tariff I. C. C. 1823, reparation awarded. Houston Packing Co. v. A. T. & S. F. Ry., 132 I. C. C. 326.

(3s) One tariff of the southwestern lines, naming rates from and to certain points provides in connection with the livestock distance scale that the rates based on short line distances will also apply over circuitous lines, but the fact that the carriers thus show a disposition to meet each others competition is not a sufficient reason for here compelling them to do so. Houston Packing Co. v. A. T. & S. F. Ry., 132 I. C. C. 326. 328.

(3t) Complainant alleged that rates charged on 92 cars of cattle and hogs

shipped between Jan. 8, 1923 and Oct. 1, 1924, from Carpenter, Wyo., and certain points in northern Colorado to Los Angeles, Calif., were unreasonable and in excess of the applicable rates. Charged group commodity rates plus incidental charges, which rates specifically applied from these points of origin, with the exception of Hayden, Colo. From that point combination on Denver. Complainant contends that the commodity rates from Willard. N. M., were applicable rates. All points of origin, except Hayden, Colo., were accorded specific commodity rates to Los Angeles and so do not come within the tariff provision relating to "Stations not named in individual rate items." Hayden is not an intermediate point. No evidence tending to show that the rates assailed were unreasonable other than that as to the applicable rates, was submitted. HELD, rates assailed not inapplicable or unreasonable, complaint dismissed. Clayton Murman Live Stock Co. v. C. B. & Q. R. R., 132 I. C. C. 421.

(3u) Complainant alleged commodity rates charged on ordinary livestock, in mixed carloads, from Mississippi, Tennessee, and Alabama to Louisville, Ky., and from Blackford, Ky., to Evansville, Ind., were unreasonable. The applicable tariffs required the application of the highest rate and the highest minimum weight. As the calf rate was higher than the cattle rate, and the cattle minimum greater than the calf minimum, charges collected on shipments of calves and cattle based on the calf rate and cattle minimum. Defendants offered no evidence. HELD, reparation awarded to basis of amended rule providing for application of the rate and minimum for that kind of stock which on a straight carload basis produces the highest charge, reparation awarded. Louisville Livestock Exchange v. L. & N. R. R., 132 I. C. C. 667.

(3v) Atlanta and Howell Stock Yards, Ga: upon further consideration through rates on horses and mules from St. Louis, Mo., Ohio River crossings, and numerous other points, to Atlanta, Ga., and certain other points, found not unreasonable nor in violation of aggregate-of-intermediates clause of section 4 of the act. Rates assailed compare favorably with rates contemporaneously maintained on like traffic from Ohio and Mississippi River crossings to other cities in the Southeast and with distance scale found reasonable for future in original report. Moreover, since disparity between through rates and combination rates appears to be due to low level of latter rather than any excessiveness in former, persumption of unreasonableness has been successfully rebutted. Findings in previous reports 63 I. C. C. 6; 74 I. C. C. 419; 93 I. C. C. 325, reversed. Hudson Mule Co. v. L. & N., 129 I. C. C. 365

(3w) Shipments of sheep moved in double-deck cars, charges being collected at rate of 38 cents, minimum 22,000 opunds Governing tariff also published a rate of 30 cents on feeder sheep, subject to provision, "These rates only apply when a certificate is presented by the shipper that stock is intended for feeding purposes and not for slaughter." Certificate purporting to comply with provision was presented sometime after shipments moved. Defendant contends that lower rate was inapplicable as certificate was not submitted at time of shipment. Complainant, on the other hand, contends that nothing in tariff indicated when certificate was to be presented and that subsequently presentation in writing met tariff requirements. HELD: A reasonable interpretation of provision requires that certificate be pesented at a time not later than tender of shipments. As the provision reads shipper was required to present a certificate that stock "is intended for feeding purposes," and commission is of opinion that this must relate to time of movement. Rate assessed found applicable. Calkins, Augsbury & Mikan v. M. C., 129 I. C. C. 475.

(3x) Charges collected on shipments of sheep, from Chicago, Ill., to Wolverine, Mich., in double-deck cars, minimum weight 22,000 pounds, found unreasonable to extent they exceeded charges which would have accrued on basis of 18,000 pounds, which basis was found reasonable in 69 I. C. C. 125, for application on sheep in double-deck cars of size here involved. Reparation awarded. Calkins, Augsbury & Mikan v. M. C., 129 I. C. C. 475.

(3y) Rules and regulations providing for the assessment of charges on mixed carloads of livestock at the rate and minimum weight for that kind of stock which on a straight c. l. basis

would produce highest charge, with certain exceptions, between points in official classification territory found not unreasonable as compared with the intrastate traffic rule effective in Ohio, and rates provided in rule 10 of the consolidated freight classification for mixed shipments of other commodities. These interstate rules were prescribed in 69 I. C. C. 125 and 81 I. C. C. 305, and are applicable throughout the United States. Complaint dismissed. Ohio Farm Bureau Federation v. A., C. & Y. Ry. Co. 129 I. C. C. 689

LOADING AND UNLOADING

See Allowances §8 (4⅞); Classification §4, §13; Demurrage; Facilities and Privileges §10; Minimums; Reasonableness of Rates §15½; Transportation §10.

LOCAL RATES AND COMBINATIONS

See Advanced Rates §5 (8); Class Rates; Combination Rule; Commodity Rates; Evidence §13 (3), §13 (5), §28, §47; Passenger Fares and Facilities §5¾; Reasonableness of Rates §28; Through Routes and Joint Rates §13½, §15, §22.

(a) Combination rates on sand and gravel from South Beloit, Ill., and on cement from Buffington, Ind., to Darien, Wis., thence recoonsigned to Vaughn Siding, Wis., found not unreasonable or otherwise unlawful. Complainant made comparisons with lower through rates on shipments which may be reconsigned to various Wisconsin points when no back haul is involved. To accomplish reconsignment here it was necessary to back haul shipments and comparisons of continuous line hauls are therefore of little value. Moreover, in 41 I. C. C. 422, 424, commission held that nonexistence of an out-of-line haul was a condition precedent to the right of a shipper to demand reconsignment. Fess v. C., H. & G. L., 104 I. C. C. 262.

(b) Shipment moved under combination rates, each factor of which was increased under General Order No. 28 of Director General. Tariff naming second factor contained combination rule which provided a method for constructing through rates made on combination, but made no reference to tariff carrying first factor, nor did the latter contain any reference to rule. FOUND: Following the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, and other cited cases, rate charged was inapplicable, and reparation awarded. Miller & Brickley Grain Co. v. Director General, 107 I. C. C. 81.

(c) Rates on solid asphalt in iron barrels and drums from Port Arthur and West Port Arthur, Texas., to Porter, Ind., based on Chicago combination, found unreasonable to extent they exceeded combinations contemporaneously in effect to and from Whiting, Ind. Reparation awarded. Sall Mt. Co. v. A., T. & S. F., 107 I. C. C. 395.

(d) Rates on wool, in the grease, in sacks, from points in Missouri to Boston, Mass., found unreasonable to extent they exceeded sum of proportional fourth-class rates to west bank of the Mississippi River and proportional commodity rate beyond. Reasonable rates prescribed for future. Former report, 77 I. C. C. 431, corrected. Boston Wool Trade Asso. v. B. & A. R. R., 107 I. C. C. 497.

(e) Shipments of brick moving from Springfield, Ill., to St. Petersburg, Fla., found overcharged inasmuch as lower combination should have been applied by application of combination rule which provided a method of constructing through rates made on combination. Reparation awarded. Boston Brick Co. v. I. T., 107 I. C. C. 507.

(f) Rates on Bristol board and printing paper from Holyoke, Mass., to Oklahoma City found unreasonable to extent they exceed lowest combination. Reasonable basis of rates prescribed for future and reparation awarded. Express Publishing Co. v. A. S., 107 I. C. C. 528.

(g) Rate on wood-pulp board from Bellows Falls, Vt., to Oklahoma City found not to have been unreasonable in past, but present rate found unreasonable to extent it exceeds lowest combination. Reasonable basis of rates prescribed for future. Boston Wool Trade Asso. v. B. & A. R. R., 107 I. C. C. 497, 528.

(h) Mere comparison of through rates with combinations does not prove that combination rates are unreasonable. Beatrice Creamery Company v. C., B. & Q., 107 I. C. C. 568, 570.

(i) Combination rate assessed on an unrouted sporadic shipment of rig irons and nails from Ranger, Tex., to Coman-

che, Okla., which moved over a route embracing three lines, found unreasonable to extent it exceeded a lower rate contemporaneously in effect via a slightly shorter two-line route. Notwithstanding that shipment was sporadic complainant is entitled to have its traffic move at a rate that is not unreasonable. The joint rate applying over shorter route is by no means depressed and unquestionably would produce earnings sufficient to be applied over slightly longer three-line route. Reasonable rate prescribed for future and reparation awarded. Lone Star Gas Co. v. C., R. I. & P., 109 I. C. C. 258.

(j) Combination rates assessed on forest products and naval stores from Barth, Kiln, and Loretta, local points on the Mississippi Southern R. R., a short line carrier, to interstate destinations, and on coal from interstate points to above-named stations, found not unreasonable as compared with lower blanket rates contemporaneously maintained from and to Lumberton, the junction point, and adjacent points in Mississippi Valley territory, which lower rates were subsequently established as through rates from and to Kiln, Barth, and Loretta. Reparation denied for any undue prejudice which may have existed in the past, no such proof of damage as is required to sustain an award of reparation under such a finding having been furnished. Hines Yellow Pine Trustees v. A., C. & Y. Ry., 109 I. C. C. 453.

(k) Class rate assessed on sporadic shipments of green salted hides from Moultrie, Ga., to Elsemere Junction, Del., found unreasonable as compared with lower commodity rates contemporaneously in effect from various points in Georgia, Alabama, and Florida to Elsemere Junction and to Philadelphia, New York, and Boston, and to extent it exceeded lower commodity rate subsequently established. Reparation awarded. Barr & Dougherty v. G. N., 109 I. C. C. 487.

(l) Combination rates assessed on lumber from Millville Junction, Fla., to Decatur, Ga., reconsigned to Scottdale, Ga., found unreasonable to extent that factor Millville Junction to Decatur exceeded rate from same origin point to Atlanta. Carrier offered no justification for an unusual situation whereunder industries at Decatur having private sidings were accorded the Atlanta rate, whereas higher rates were assessed on lumber consigned to the general public. Reasonable rates prescribed for future and reparation awarded. Watters-Tonge Lumber Co. v. A. & St. A. B., 109 I. C. C. 598.

(m) Complainant attacked combination rate charged on two cars of bituminous coal from Christopher, Ill., to Malvern, Ia., on June 24 and Aug. 20, 1924, as unreasonable. Shipments moved as routed by shipper over Burlington from Christopher to Litchfield, Ill., Wabash beyond, charged $1.36 to Litchfield and $3.10 beyond. There was a joint rate of $3.59 to Malvern over defendant's lines when routed via Jacksonville, Ill., 524 miles. This rate was in effect over the route of movement up to June 18, 1924, when the routing was changed to read via Jacksonville. Present rate via Jacksonville is $3.49. Short line distance is I. C., to East St. Louis Wabash beyond 470 miles. HELD: Rate attacked unreasonable to extent it exceeded $3.59, reparation awarded. Green Bay Lumber Co. v. C. B. & Q. R. R., 112 I. C. C. 562.

(n) Complainant attacked combination rate charged on two cars of wheat shipped July 30 and Oct. 3, 1921, from St. Francis, Kas., to Wausau, Wis., as unreasonable and inapplicable. St. Francis is on a branch line of the Burlington. Wausau is 180 miles northwest of Milwaukee on the Milwaukee and Northwestern. Shipments moved over Burlington to Kansas City, Mo., where they were stored and reforwarded over that line to Council Bluffs, Ia., and Northwestern beyond, distance 1,391 miles, charged 25c to Kansas City, 13c to Council Bluffs, and 27.5c beyond. Shipments were tendered to Burlington at Kansas City routed C. & N. W. delivery. The lowest combination consistent with the terminal delivery specified was a rate of 60c in connection with the M. P., as an intermediate carrier from St. Josephs, Mo., to South Omaha, Neb. Shipments misrouted. A rate of 51.5c was applicable over M. P., Omaha Northwestern. HELD: Rate attacked unreasonable to extent it exceeded 51.5c, reparation awarded. Hodgson Davis Grain Co. v. C. B. & Q. R. R., 113 I. C. C. 234.

(o) Complainant attacked combination rate of $1.175 charged on a car of alfalfa seed shipped Nov. 16, 1922, from Clayton, N. M., to Kansas City, Mo., as unjust, unreasonable and unduly discriminatory and in violation of section 4 to extent it exceeded 69c. Shipment

moved as routed in the bill of lading over C. & S., to Trinidad, Colo., thence Santa Fe, charged class A of 48.5c to Trinidad and commodity rate of 69c beyond. A joint rate of 69c was applicable from Clayton to Kansas City over C. & S., to Pueblo, Colo., and Santa Fe beyond. No necessity appears for a commodity rate over the route of movement. HELD, rate attacked unreasonable to extent it exceeded 69c, reparation awarded. Peppard Seed Co. v. A., T. & S. F. Ry., 113 I. C. C. 309.

(p) Complainant attacked combination commodity rates of 72 and 47c charged on 51 cars of petroleum products from Brunswick, Ga., to Richmond and Petersburg, Va., during Oct. and Nov., 1922, as in excess of the combination rate of 42c then in effect over the lines of defendant carriers. No specific commodity rates were in effect, but there was applicable a local rate of 24.5c to Wilmington, N. C., and 17.5c beyond. Complainant called defendants' attentions to this combination before any shipments were made and requested them to publish a through rate of 42c over their direct lines. A rate of 47c was published on one day's notice effective Oct. 12, 1922. HELD: Rate attacked unreasonable to extent it exceeded 47c, reparation awarded. National Oil Co. v. S. A. L. Ry., 113 I. C. C. 371.

(q) Through combination rate on unshelled peanuts from Suffolk, Va., to Hutchinson, Kans., found unreasonable to extent it exceeded rate prescribed in 83 I. C. C. 14 and 100 I. C. C. 307 from Suffolk and other Virginia points to Oklahoma and Texas destinations for comparable distances. Reasonable rates prescribed for future and reparation denied. Western Brokerage Co. v. A. C. L., 112 I. C. C. 103.

(r) Combination rates on coal from Colorado and northern New Mexico producing districts to local points in State of Kansas on the Frisco, Katy, and Midland Valley Railroads found unreasonable and unduly prejudicial as compared with joint rates maintained to destinations on other lines in same general Kansas territory. Reasonable rates prescribed for future. Kansas Public Utilities Comm. v. A., T. & S. F., 112 I. C. C. 235.

(s) Proposed increased rates on potatoes from Monte Vista and surrounding Colorado points on the Denver & Rio Grande Western to certain destinations in Texas on the Texas & Pacific found justified. Present rates were established to meet competition from Greeley, Colo., and were to apply as maxima only at intermediate points on direct routes. In establishing revised rates from Colorado to Texas, to comply with fourth section requirements, the present rates were inadvertently continued to destinations here considered, nor were they restricted in their application to direct routes as intended. Proposed schedules will eliminate these existing fourth-section violations and place points under consideration on general basis of rates now applying from and to all other points in same origin and destination territories for substantially same distances. Potatoes from Colorado to Texas, 112 I. C. C. 389.

(t) Combination rate on fresh peaches, in baskets, from Emmett, Idaho, to Miami, Fla., found unreasonable to extent it exceeded a joint rate contemporaneously applicable to same destination from numerous points in Oregon and Washington, Emmett being intermediate between these groups and Miami. The lower joint rate was published subject to rule 77 of Tariff Circular 18-A, and subsequent to filing of complaint was established from Emmett. Reparation awarded. Drake Produce Co. v. O. S. L., 112 I. C. C. 551.

(u) Combination rate on coal from Christopher, Ill., to Malvern, Iowa, via Litchfield, Ill., found unreasonable as compared with rates contemporaneously in effect from Illinois and Kentucky points to various destinations for comparable distances, and to extent it exceeded joint rate between origin and destination via Jacksonville, Ill. Reasonable rate via Litchfield prescribed for future and reparation awarded. Green Bay Lbr. Co. v. C., B. & Q., 112 I. C. C. 562.

(v) Combination rate on coal from Christopher, Ill., to Malvern, Ia., via Litchfield, Ill., found unreasonable to extent it exceeded lower joint rate contemporaneously in effect via Jacksonville, Ill. Reasonable rate via Litchfield prescribed and reparation awarded. Green Bay Lbr. Co. v. C., B. & Q., 112 I. C. C. 562.

(w) The primary purpose of a local rate is to apply to local shipments of the commodity which it covers from and to points specified, although in absence of joint through rates or of proportional

rates of same character between same points, it applies on through traffic as well as local traffic. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 735, 736.

(x) The commission's tariff rules authorize the publication of proportional rates and are silent as to the necessity for canceling the local rates between the same points for application on through traffic, and since the rules do not provide that proportional rates conflict with local rates, it follows that the establishment of a proportional commodity rate removes the application on through traffic of a local commodity rate on the same article between the same points. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 736.

(y) On a carload of cement from York, Pa., to Cape Girardeau, Mo., a combination of two local rates to and from an intermediate point, subject to combination rule, produced a lower charge than a combination of a local and a proportional rate to and from same intermediate point, not subject to said rule. Following Indian Refining Co., 112 I. C. C. 732. FOUND: That the higher combination of the local and the proportional rate was applicable. Sandusky Cement Co. v. P. R. R., 112 I. C. C. 737.

(z) Applicable combination rates on newsprint paper from Millinocket and East Millinocket, Me., to Providence, South Providence, and Pawtucket, R. I., found unreasonable as compared with lower rate on newsprint from Howland and Woodland, Me., to same destinations, and to extent they exceeded combinations composed of proportional commodity rate on printing paper to Northern Maine Junction plus the sixth-class rate beyond. Reparation awarded. Great Northern Paper Co. v. B. & A., 113 I. C. C. 463.

(aa) Combination rates charged on grain and products from points in Colorado, Kansas, and Nebraska to destinations in Tennessee, Georgia, and Alabama, found legally assessed. Lower joint rates applied to Greenwood, Miss., and New Orleans, La., farther distant points, and while tariff provided for their application to directly intermediate points, it also carried complete routes, none of which operated through intermediate destinations here involved. Complainant here attempts to ignore such routes and construct unauthorized circuitous routes via which destinations would be intermediate to Greenwood and New Orleans. The naming of specific routes to the farther distant points, however, eliminated all other routes, and conclusion set forth in rule 4 (j) of Tariff Circular 18-A which provides that "When a tariff specifies routing the rates may not be applied via routes not specified," is controlling. Russell Grain Co. v. A. G. S. R. R., 113 I. C. C. 701.

(bb) Complainant attacked combination rates charged on cars of crude rubber from New York, N. Y., and of reclaimed rubber from central territory to Omaha, Neb., during the statutory period, as unreasonable and unjustly discriminatory. Charged on fourth class rates to and from the Mississippi river. Present rates being fifth class to and from the river. HELD: Rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Nebraska Tire & Rubber Co. v. B. & O. R. R., 115 I. C. C. 99.

(cc) Complainant attacked combination rate charged on a car of peaches shipped on July 26, 1923, from Willvale, Ga., to Uniontown, Pa., reconsigned from Pittsburgh, Pa., as unreasonable and unduly prejudicial to extent it exceeded rate from Willvale to Connellsville, Pa. Willvale is a local point on the C. of Ga. about 5 miles west of Fort Valley, Ga. Uniontown is on a branch of the Pennsylvania extending from Greensburg, Pa., and is 69 miles from Pittsburgh. Connellsville is 56 miles from Pittsburgh and directly intermediate to Uniontown. The shipment moved from Willvale to Pittsburgh as routed, over C. of Ga., Southern, C. N. O. & T. P. and Pennsylvania to Pittsburgh, from which point it was reconsigned to Uniontown, charged 66.5c to Cincinnati and 47.5c beyond. The contemporaneous rate to Connellsville was $1.05, made up of 66.5c to Cincinnati and 38.5c beyond. HELD: Rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Gentile Bros. Co. v. C. of Ga. Ry., 115 I. C. C. 251.

(dd) Respondents stress the fact that in several reports the commission has commented upon the undesirability of the combination rule from a tariff standpoint. They refer to the cooperation and suggestions of Bureau of Traffic looking to the ultimate elimination of the combination tariff. Those suggestions did

not contemplate increases in rates, for which no sound justification is offered, by the cancellation of the combination rule. Combination rule on brick, 115 I. C. C. 293, 303.

(ee) A provision in a tariff carrying rates which may be used in combination to the effect that the rates are subject to the combination rule is equivalent to the publication of the rule in the rate tariff. Pendleton & Gilkey v. M. R. L. & M. Ry., 115 I. C. C. 413, 414.

(ff) Complainant attacked combination rates charged on a car of grapes shipped on September 27, 1918, from Portland, N. Y., to Memphis, Tenn., and reforwarded to New Orleans, La., as illegal and unreasonable. Shipment was originally consigned to complainant at Memphis. On arrival at Memphis the car was placed on a track adjacent to complainant's warehouse where deliveries are usually made, and complainant paid the charges thereon based on a rate of 74c. The shipment remained as placed for six days when complainant having disposed of the car at New Orleans reshipped it to that point on a separate bill of lading, paying the rate of 56.5c thereon from Memphis to New Orleans. Contemporaneously, there was in effect a joint rate of 99c on grapes in carloads from Portland to New Orleans. It was complainant's intent that the car should move to Memphis, that this intent was not changed prior to arrival of the car at Memphis, and it was tendered to and accepted by complainant at that point, thereby terminating the contract for carriage from Portland to Memphis. The further movement to New Orleans was under new billing and constituted a new contract of carriage. The car was reshipped from Memphis, and not reconsigned. HELD: Rates charged not illegal, complaint dismissed. Canale & Co. v. Director General, 115 I. C. C. 415.

(gg) Complainant attacked sixth class rates charged on rough marble, carloads, as inapplicable. Shipments were forwarded over interstate routes to Buffalo from piers in New York Harbor or from the yards of importers at Long Island City, N. Y. Some of the shipments moved over the Erie direct and others over the C. of N. J. and the Erie. Sixth class over either route previous to January 2, 1922, was 28.5c. On that date it became 29.5c. On July 1, 1922, it was reduced to 26.5c which is the present rate. A commodity rate of 25c was in effect up to June 30, 1922, on building stone from Long Island City and New York harbor points or Jersey City to Buffalo over the C. of N. J. and Erie and also from Long Island City to Buffalo over the Erie direct, subject to rule 77. HELD: Rates charged inapplicable, applicable rates commodity of 25c. Rates charged unreasonable to extent they exceeded rates from Long Island City, reparation awarded. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543.

(hh) It is settled that where the combination of separately established locals or proportionals is the usual and recognized basis of rates, the application of an increase to each component of such a combination rate is governed by the applicable tariffs in effect on the date of shipment, and that if neither of the tariffs carrying the component rates contains or makes reference to a combination rule there is no holding out to the shipper under the principle announced in Sligo case, 62 I. C. C. 643, and 73 I. C. C. 551. Utah Idaho Sugar Co. v. Director General, 115 I. C. C. 707, 709.

(ii) Complainant attacked combination commodity rate charged on one car of limestone rock shipped from Margerum, Ala., to Dallas, Tex., August 29, 1922, as unreasonable, unjustly discriminatory and unduly prejudicial. Shipment was billed as rough stone, charged over Southern to Memphis 123 miles, 4.5c on broken stone, and beyond 482 miles over St. L. S. W. rate of 29.5c on paving stone, rough quarried. On May 6, 1925, Southern published a scale of distance rates applicable from the Margerum quarry to certain destinations east of the Mississippi river on limestone, asphaltic, broken or crushed, not ground or pulverized. These were the rates sought by complainant. It is apparently satisfied with the rates for the future and the only question is reparation. None moved before, none has moved since, and none is likely to move in the future. HELD: Rates attacked not unreasonable, complaint dismissed. Florence Chamber of Commerce v. Southern Ry., 118 I. C. C. 7.

(jj) Complainant attacked combination rates charged on 6 cars of cordwood shipped from Twin and Crosby, Miss., to Braithewaite, La., during May and October, 1923, as unreasonable. Twin is on the N. O. G. N. and Crosby on the Pearl River Valley. Braithwaite is on the L. S.

16.1 miles south of New Orleans. Charged to New Orleans 8c from Crosby and 6c from Twin, beyond New Orleans 13c. On December 26, 1924, and April 1, 1925, commodity rates of 3 and 8c were established on cordwood from New Orleans to Braithwaite and from Crosby to New Orleans, respectively. HELD: Rate attacked unreasonable to extent the factor New Orleans to Braithwaite exceeded 3c, reparation awarded. E Z Opener Bag Co. v. Pearl River Valley R. R., 118 I. C. C. 524.

(kk) It would be manifestly impossible to adjust the inbound and outbound rates from and to all market points so that the combination of rates to any destination would be the same through all markets. Nashville Traffic Bureau v. L. & N. R. R., 118 I. C. C. 748, 753.

(ll) Combination rates on automobiles from Detroit, Flint, and North Flint, Mich., and on plumbers' supplies from Noblesville, Ind., to Birmingham, Ala., found not unreasonable as compared with lower joint rates subsequently established, or with rates to South Atlantic and Gulf ports. Rates from Ohio River to South Atlantic and Gulf ports are subnormal, being induced by competition over which rail lines have no control. For many years the prevailing basis for rate making to points south of the Ohio River has been the combinations on the crossings, and joint through rates subsequently established were constructed on that basis. Moreover, rates assailed to Birmingham compare favorably with those to such inland points as Atlanta, Gainesville, Macon, and Rome, Ga., and Montgomery, Alabama City, and Tuscaloosa, Ala. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33.

(mm) Two-factor combination rate assessed on automobiles from Detroit, Flint, and North Flint, Mich., and on plumbers' supplies from Noblesville, Ind., to Birmingham, Ala., based on Jeffersonville, Ind., found inapplicable. Legal rate found to be a lower three-factor combination based on Louisville and Water Works, Ky., and applicable under rule 5 (b) of Tariff Circular 18-A. Refund of overcharges directed. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33, 36.

(nn) Full combinations of locals to and from junction points on bituminous coal from West Frankfort, West Frankfort mine No. 18, Christopher, Christopher mine No. 20, Johnson City, and Buckner, Ill., to points in Indiana on the Big Four, found unreasonable and unduly prejudicial to extent they exceeded lower joint rates contemporaneously naintained from competing mines located in so-called Harrisburg group in southern Illinois to same Indiana destinations. Reasonable and nonprejudicial rates prescribed for future. Old Ben Coal Corp. v. C., C., C. & St. L., 115 I. C. C. 84.

(oo) Combination rates on crude rubber from New York terminals, and on reclaimed rubber from points in c. f. a. territory, to Omaha, found not unreasonable or otherwise unlawful as compared with rates to Akron, Ohio. Complainant's allegation of unreasonableness rests upon a showing that rates to Omaha yield ton-mile earnings higher than rates to Akron, but that fact alone does not establish unreasonableness of Omaha rate. The Mississippi River combination basis of constructing through rates has been in effect for many years, and has in numerous cases received approval of commission. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99.

(pp) Combination rates on crude rubber from New York terminals, and on reclaimed rubber from points in c. f. a. territory, to Omaha, Nebr., found not unreasonable or otherwise unlawful as compared with lower import rates from Pacific coast ports to Akron, Ohio, blanketed back to Missouri River. Complainant contended that it was unreasonable to apply blanket rates eastbound while maintaining graded rates westbound. The eastbound blanket rates, however, are shown to be unduly low, having been established by western carriers for purpose of securing some of traffic to Akron which otherwise would move through New York. Moreover, the Mississippi River combination basis of constructing through rates has been in effect for many years, and has in numerous cases received approval of commission. Nebraska Tire & Rubber Co. v. B. & O., 115 I. C. C. 99.

(qq) Combination rates on coal from certain mines in the New River district of West Virginia, on the C. & O., to interstate destinations on or via the Virginian Ry., and from mines on the Virginian to eastern interstate destinations on or via the C. & O., found not unreasonable, discriminatory, or unduly prej-

udicial as compared with rates accorded other mines similarly situated, which by trackage agreements or otherwise have the benefit of the district rate on or via either line. Rates sought are not shown to be necessary or that it would be in the public interest to open the markets served by either the Chesapeake or the Virginian to shippers on the other line. Ragland Coal Co. v. V. Ry., 115 I. C. C. 147.

(rr) Combination rate on crushed rock from Dresser Junction, Wis., to Minnehaha Falls, Minn., outside the switching district but within the city limits of Minneapolis, Minn., found unreasonable as compared with lower rates contemporaneously in effect from point of origin to various delivery points within the Minneapolis switching limits and to extent it exceeded lower joint rate subsequently established. Reparation awarded. Board of Park Commrs. v. C., M. & St. P., 115 I. C. C. 211.

(ss) Upon contention that combination rates on shipments of potatoes from Sidney, Mich., to Philadelphia, Pa., reconsigned at Old Forge, Pa., were inapplicable and unreasonable to extent they exceeded lower joint rate, contemporaneously in effect from origin to final destination over another route, plus a backhaul charge, HELD: Governing reconsignment tariff provided for the application of through rate plus certain distance rates for detours or back hauls not to exceed 300 miles, but a back haul of more than 480 miles would have been necessary in instant case. Reconsignment at Old Forge did not, therefore, come within such provision. Miller v. P. M. Ry., 115 I. C. C. 461, 462, 463.

(tt) Combination rates on staves and headings from Winnsboro, La., to Jackson, Miss., found unreasonable. Lower joint rates contemporaneously applied on lumber, commission having indicated in 52 I. C. C. 598, 619, that such rates should be observed as maxima on heading and staves. Moreover, no reason was shown why through rates should not be somewhat less than combination of locals, and mere fact that carrier desired to keep traffic on its own lines in order to secure a longer haul is no valid reason why it should refrain from becoming a party to joint rates. Reasonable joint rates prescribed for future and reparation awarded. Jackson Traffic Bureau v. A. & V., 115 I. C. C. 570.

(uu) On gravel moving from Glencoe, Yeatman, and Jedburg, Mo., to Greenville, Ill., no joint rates were in effect, charges being collected on basis of a two-factor combination treated by combination rule, which provided a specific method for construction of through rates. Contemporaneously a lower three-factor combination applied when treated by the rule, one factor of which carried the rule unrestricted, one restricted its application to cases where all factors referred to the rule and authorized an affirmative application thereof, third factor neither referring to nor containing the rule. HELD: The holding-out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551 governs, and lower combination treated by the rule was applicable. Shipments found overcharged and reparation awarded. Van Dusen & Baumberger Co. M. .P., 115 I. C. C. 603.

(vv) Upon reargument, former report, 101 I. C. C. 138, modified, and combination rates on shelled peanuts from points in Alabama, Florida, Georgia, and South Carolina, to Chicago, Ill., Milwaukee, Wis., Canton and Cleveland, Ohio, South Bend, Ind., and Dubuque, Iowa, and from Nashville, Tenn., to Chicago, found unreasonable due to factors north of the Ohio and Mississippi River crossings. Reasonable rates for future prescribed and reparation awarded only for the period extending back to date of filing of complaint. United Fig & Date Co. v. A. C. L., 115 I. C. C. 643.

(ww) Shipments moved under combination rates. Tariff governing one factor made reference to combination rule which provided a specific method for constructing through rates made on combination. Tariff governing other factor made no similar reference nor contained a similar rule. Upon contention of carriers that combination rule was not applicable because not specifically set forth in tariff but merely referred to, HELD: This position is untenable, following 93 I. C. C. 186, and rates constructed by use of the rule were applicable. See also 62 I. C. C. 643 and 73 I. C. C. 551. Allen Mfg. Co. v. L. & N., 115 I. C. C. 739.

(xx) Combination rate assessed on printing, blotting, and wrapping paper and on pulp board in mixed carloads from Hamilton, Ohio, to Wichita, Kans., found unreasonable to extent it exceeded a lower combination contemporaneously

in effect over route of movement. Reparation awarded. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(yy) Local rates on grain and products from Ohio and Mississippi River crossings to Nashville, Tenn., found unreasonable and unduly prejudicial in their relation to corresponding rates from same crossings to Memphis. Reasonable and nonprejudicial rates prescribed for future and reparation denied. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748.

(zz) Local rates on grain and products from Memphis, Tenn., to Birmingham, Ala., found unreasonable as compared with rates to Meridian, Miss., and other points in Mississippi Valley territory. Reasonable rates prescribed for future and reparation denied. Birmingham Traffic Bureau v. St. L.-S. F., 118 I. C. C. 756.

(3a) Complainant attacked combination rate of 44 cents charged on three cars of rough granite shipped in Dec. 1923 and April and August 1924, from Salida, Colo., to Keokuk, Ia., as unreasonable, unjustly discriminatory and unduly prejudicial. Shipments moved D. & R. G. W. to Denver, Colo., and Burlington beyond, 1,061 miles, charged at through rate of 44 cents constructed under the combination rule. Shipments consisted of rough granite in blocks. The ton-mile earnings over the route the shipment moved may well be somewhat higher than earnings for a haul through level country. HELD, rate charged not unreasonable or otherwise unlawful, complaint dismissed. Cameron Joyce & Schneider v. D. & R. G. W. R. R., 120 I. C. C. 129.

(3b) Complainant attacked combination rate charged on five cars of stoves and ranges shipped between Sept. 18, 1923 and March 13, 1924 from Indianapolis, Ind., to Des Moines, Ia., as unreasonable. Shipments moved Pennsylvania to Peoria, Ill., thence Burlington, charged fifth class 30.5 cents to Burlington, Ia., and 17 cents beyond. There was contemporaneously published a combination rate of 46 cents via Hannibal, Mo., in connection with the Wabash composed of 29 and 17 cents to and from the gateway, which rate was established via the Burlington on May 24, 1924. HELD, rate charged unreasonable to extent it exceeded 46 cents, reparation awarded. Indianapolis Chamber of Commerce v. Pennsylvania R. R., 120 I. C. C. 153.

(3c) Complainant attacked combination rate charged on one car of basket tops shipped Sept. 17, 1924 from Beaumont, Tex., to North East, Pa., as unreasonable. Shipment was originally consigned to Buffalo, N. Y., but at Fort Wayne, Ind., was diverted to North East a point directly intermediate to Buffalo. Shipment moved T. & N. O. and St. L., S. W. to East St. Louis, Ill., C. & A. to Chicago, Ill., N. Y., C. & St. L. Ry., beyond, charged 39.5 cents to Chicago and 34 cents beyond. A specific commodity rate of 47.5 cents was contemporaneously applicable on lumber, in carloads from Beaumont to North East, applicable on various lumber articles, including egg case material and box shooks. HELD, rate attacked unreasonable to extent it exceeded the rate on lumber, reparation awarded. Liberty Cooperage & Lumber Co. v. N. Y., C. & St. L. Ry., 120 I. C. C. 271.

(3d) Complainant attacked combination rate of 36.5 cents charged on three cars of second hand radiators shipped between Oct. 15 and Nov. 9, 1923, from Camp Meads, Md., to Trenton, N. J., as unreasonable and unjust to extent it exceeded 29 cents. Routed B. & O. to Wilmington, Del., and Pennsylvania beyond, applicable rate was 2.5 cents to Camp Meade Jct., plus 29 cents fifth class beyond. Reparation is sought to basis of 29 cents, which was the rate from Camp Meade to Princeton, N. J., to which Trenton is intermediate. On July 8, 1924 the rate of 29 cents was made to apply from Camp Meade. HELD, rate attacked unreasonable to extent it exceeded 29 cents, reparation awarded. Camp Meade Salvage Co. v. B. & O. R. R., 120 I. C. C. 273.

(3e) Complainant attacked combination rate of $3.52 charged on curbing, carloads, from Granite Hill, Ga., to St. Petersburg, Fla., as illegal and unreasonable to extent it exceeded a rate of $3, and unduly prejudicial as compared with a rate of $2.82 to Tampa, Fla. Granite Hill is on the Georgia R. R. 57 miles east of Macon, Ga. Charged $1.92 to Jacksonville and $2.10 beyond, subject to the combination rule. Short line distance is 482 miles over Georgia R. R. to Macon, G. S. & F. and A. C. L. through Valdosta, Ga., Jasper and Trilby, Fla. To Tampa distance 468 miles. Curbing

is shipped in flat cars. HELD, rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Georgia Quincy Granite Co. v. A. C. L. R. R., 120 I. C. C. 408.

(3f) Complainant attacked rate charged on coal, carloads, from La Follette, Tenn., to Ludington, Mich., reconsigned while in transit to Hawkeye, Ia., as unreasonable and illegal. Car was consigned to complainant at Ludington, and was reconsigned in transit. Shipment routed L. & N. and Big Four, bill of lading carrying the notation "this car is shipped with intention of reconsigning. Failure to follow routing specified hereon will subject consignee to loss." L. & N. tariff named a proportional rate of $3.43 to Milwaukee and Manitowoc, Wis., when for beyond, and the tariff also carried a reconsigning clause which permitted shippers to bill coal to Ludington. Subsequent to movement L. & N. amended its tariff and provided a rate of $3.43 from La Follette to Milwaukee and Manitowoc when for beyond, via L. & N. to Cincinnati, Big Four to Benton Harbor and P. M. beyond. HELD, rate attacked unreasonable to extent it exceeded $3.43, reparation awarded. Reeves Coal & Dock Co. v. L. & N., 120 I. C. C. 428.

(3g) Complainant attacked charges on six shipments comprising seven carloads, of cotton compress parts moving between Dec. 29, 1920 and May 29, 1922 from Winona and Houston, Miss., to Earle, Russellville, and Little Rock, Ark., as unreasonable and in violation of section four. Combination of locals to and from Memphis, Tenn., were applicable. The record on the whole falls short of establishing that the rates applicable were unreasonable to the extent that they exceeded the rates sought, but it warrants the conclusion that they were unreasonable to extent they exceeded the rates from New Orleans, Jackson and Meridian. HELD, applicable rates on parts or pieces weighing less than 2,000 pounds not unreasonable but rates on castings or forgings weighing 2,000 pounds or more unreasonable to extent they exceeded rates from New Orleans, Jackson and Meridian to the same destinations, reparation awarded. Russellville Compress Co. v. G. M. & N. Ry., 120 I. C. C. 481.

(3h) The fact that the Commission may not have found the combination basis of charges unreasonable in certain past cases dealing with other commodities is not conclusive. The issue concerns the measure of the charges. The method of their construction is incidental. Russellville Compress Co. v. G. M. & N. R. R., 120 I. C. C. 481, 485.

(3i) Complainant attacked combination rate of 86.5c charged on two cars of wooden telephone insulator pins and brackets shipped Aug. 29 and Dec. 3, 1924 from Charlottesville, Va., to Tampa, Fla., as unreasonable to extent it exceeded rates on lumber. Charged 48c to Jacksonville and sixth class 38.5c beyond. Rate on lumber was 43.5c, and rate on lumber in the reverse direction being 36c. HELD, rate attacked unreasonable to extent it exceeded lumber rates, reparation awarded. Peninsular Telephone Co. v. Southern Ry., 120 I. C. C. 669.

(3j) Complainant attacked combination rate charged on a car of lumber shipped Oct. 4, 1921 from Breckenridge, Tex. to Apperson, Okla., diverted in transit at Kaw, Okla., as unreasonable. Shipment moved W. F. & S. to Graham, Tex., C. R. I. & G. to Fort Worth, Tex. and Santa Fe beyond, 464 miles, charged class D of 34.5c to Fort Worth and commodity rate of 36c beyond. Breckenridge is in central Texas about 133 miles west of Fort Worth. Contemporaneously a commodity rate of 39c applied from numerous points in central Texas to Kaw. HELD, rate attacked unreasonable to extent it exceeds 39c, reparation awarded. Gulf Production Co. v. W. F. & S. Ry., 120 I. C. C. 709.

(3k) Combination rate based on Los Angeles, Calif., charged on petroleum refined oil from O'Donnell Spur, Calif., to Wilmington, Calif., for export, found not unreasonable as compared with rates contemporaneously in effect on same commodity from and to various points in same general territory. Complainant contended that as each factor of a combination rate is designed to cover a local movement and two terminal services, and as there were but two terminal services on its shipments, through rate should be less than combination rate assessed. Carrier, however, showed that each factor of the combination charged was depressed by actual or potential truck, pipe-line, and rail competition, which made it impracticable to establish a through rate lower than the sum of

locals. Thomas Traffic Co. v. L. A. & S. L., 120 I. C. C. 671.

(31) Complainant attacked combination rates charged on 9 cars of copper wire, in coils, and copper wire strand, on reels, from Black Eagle, Mont., to Salt Creek, Wyo., between Aug. 20 and Nov. 21, 1924 as unreasonable and unduly prejudicial. Shipments moved G. N. to Laurel, Mont., C. B. & Q. to Illco, N. & S. beyond, charged $1.065, made up of commodity rate of 70.5c to Illco about 529 miles plus fourth class rate of 36c beyond, 41.2 miles, the former factor not being under attack. When the shipments moved there was in effect from Illco to Salt Creek a commodity rate of 21c on oil well supplies, described as including articles such as boilers, steel cable, iron or steel cable wire, iron or steel strand wire, and also copper or iron wire when forming not to exceed 20% of a car of machinery. Rate of 21c was made applicable on copper wire July 15, 1925. HELD, rate attacked from Illco unreasonable to extent it exceeded 21c, reparation awarded. Midwest Refining Co. v. G. N. Ry., 122 I. C. C. 205.

(3m) Complainant attacked combination rate charged of 78.5c on two cars of basket tops made of scarfed material, shipped on Aug. 15 and 16, 1924 from Ellisville, Miss., to Cleveland, O., and reconsigned to North East, Pa., as unreasonable to extent it exceeded the rates on lumber. Shipments moved Southern to Cincinnati, O., Big Four and N. Y. C. & St. L. They were originally consigned to complainant at Cleveland, routed by the shipper over Southern, N. Y. C. St. L. delivery. Prior to their arrival at that point complainant effected a sale of the material and requested reconsignment to North East. Rate attacked combination rate composed of class A rate of 52c to Cincinnati, O., and fifth class 26.5c beyond. Joint rates are maintained, and during the period in question were maintained, on lumber from an extensive southern territory to destinations generally in central and trunk line territories, and these rates were and are accorded on various lumber products. Scarfed material used in making basket tops consists of that portion of the wood remaining in the slab after the log has been squared. Lumber rate was 45c. This rate was made applicable on June 5, 1925. HELD, rate attacked unreasonable to extent it exceeded 45c, reparation awarded. Liberty Cooperage & Lumber Co. v. Southern Ry., 122 I. C. C. 297.

(3n) Complainant attacked combination rates charged on 46 shipments of automobiles and extra parts from South Bend, Ind., to Pueblo, Colo., between Jan. 9, 1924 and May 28, 1925 as unreasonable. Automobiles are rated first class in western classification and 110% of first class in official classification. Rate charged was 58.5c to Chicago and $2.735 beyond. Complainant contended that on all shipments made subsequent to April 8, 1924 the rate charged was unreasonable to extent it exceeded $3.12 made up of $1.37 to Missouri river and $1.75 beyond. The factor to the Missouri river was published following 88 I. C. C. 728 and became effective June 1, 1925. The alternative is combination rate of $3.275 made up of 54c to Gary, Ind., and $2.735 beyond. Complainant is satisfied with the present rate. The decision in 88 I. C. C. 728 related only to future rates and resulted in a widespread readjustment of rates of long standing. Reparation denied. As to the Gary combination, the tariffs contained a restrictive note which prevented the use of the Gary-Pueblo factor in constructing through rates from points beyond Gary. The Chicago combination was applicable. A finding under section 1 that the difference of 4.5c by which it exceeded the Gary combination represents an excess over a reasonable maximum rate would necessarily have to proceed from considerations other than those ordinarily presented in the determination of questions of reasonableness. In other words, a difference of 4.5c in a total rate of $3.32 is relatively so inconsiderable that it could hardly be said to transgress the "flexible limits of judgment" in rate making. The publication of rates to Gary lower than rates to Chicago from points near Gary is not of itself unlawful. The restriction whereby all shippers east of the Indiana-Illinois state line are placed upon the Chicago basis on traffic to Colorado and other states is an equalization measure which places all shippers on an equal plane and should not lightly be condemned. HELD, rates charged not unreasonable, complaint dismissed. Van Dyke Motor Co. v. M. P. R. R., 122 I. C. C. 412.

(3o) Complainant attacked combination rate charged on two cars of bituminous coal screenings from Harrisburg, Ill., to Watertown, S. D., between Aug.

18 and 21, 1925 as unreasonable. Shipments were routed by consignor over Big Four to Danville, Ill., N. Y. C. and E. J. & E. and C. & N. W. to destination 881 miles, charged $1.85 to Joliet and $3.82 beyond. Contemporaneously a rate of $3.93 was applicable over Big Four to Peoria and C. & N. W. beyond and subsequently was published via routes shipments moved. HELD, rate attacked unreasonable to extent it exceeded $3.93, undercharges waived. Saline County Coal Corp. v. C. & N. W. Ry., 122 I. C. C. 469.

(3p) Complainant attacked commodity rates charged on naphtha, carloads, from Tulsa, Okla., Wichita Falls, Tex., and Shreveport, La., to Tulsa, Okla., as unreasonable and unduly prejudicial. The rates on refined oil from the midcontinent field to destinations in central territory east of the Illinois-Indiana state line usually have been composed of the separately established proportional rates to and beyond St. Louis or the other river crossings, the lowest combination applying. HELD, rates attacked from Shreveport, La., to Cincinnati, O., not unreasonable and from Tulsa and Wichita Falls not unreasonable but for future unreasonable to extent they exceed 46.5c and 49c respectively. Proctor & Gamble Co. v. A. T. & S. F. Ry., 122 I. C. C. 473.

(3q) Complainant attacked combination rate charged on 6 cars of gravel shipped in May 1925 from Holliday, Kas., to St. Joseph, Mo., as unreasonable. Shipment moved Santa Fe to Leavenworth, Kas., and Burlington beyond 67.3 miles, charged distance rate of 5.5c to Leavenworth and class E of 8c beyond. The line of the Santa Fe extends from Holliday to St. Joseph through Atchison, Kas., 78 miles. Prior to August 15, 1925 the rate via this route was 8c, upon which date the latter carrier established the present rate of 5c. HELD, rate attacked unreasonable to extent it exceeded 5c, reparation awarded. Spencer Co. v. A. T. & S. F. Ry., 122 I. C. C. 689.

(3r) The Commission in the past has consistently refused to condemn rates on grain merely because they are the same as, or are in fact the combination on the primary markets. Ogden Grain Exchange v. A. & S. Ry., 122 I. C. C. 691, 716.

(3s) Complainant attacked combination rate charged on a car of cane sirup, in barrels, shipped Dec. 23, 1923 from Inwood, Fla., to Columbus, Ga., was unreasonable. Inwood is on the L. & N. 9 miles west of River Jct., Fla. Shipment moved L. & N. to River Jct, A. C. L. to Albany, Ga., and C. of Ga., beyond 226 miles, charged fifth class of 27c to River Jct., and commodity rate of 24.5c beyond. On June 26, 1926 a commodity rate of 43c was established. HELD, rate attacked unreasonable to extent it exceeded 43c, reparation awarded. Hardway Cargill Co. v. L. & N. R. R., 123 I. C. C. 23.

(3t) Combination rates run counter to the theory that the financial necessities of weak lines should be met by liberal divisions of joint rates, because when rates are so constructed the trunk lines earn more for their hauls to and from junctions with short weak lines than they would earn to and from the same junctions on traffic to and from other trunk lines. Consolidated Southwestern Cases, 123 I. C. C. 203, 388.

(3u) Complainant alleged combination rates charged on powdered milk, carloads and less carloads, from Andes and Shavertown, N. Y., moving via East Branch, N. Y., to Pier 23, North River, New York between May 24, 1923 and July 31, 1925, as unduly prejudicial and in violation of section four. Shipments moved D. & N. to East Branch and N. Y. O. & W. beyond, charged combination on East Branch. The evidence is directed against the factors from East Branch. The rate from Delhi a point beyond East Branch was 28.5c carloads and 38c less carloads, subject to rule 77. Effective Oct. 10, 1925 commodity rates equal to the rates from Delhi were established. HELD, complaint dismissed, without prejudice to filing of application on the special docket under rule 77. Innis Speiden & Co. v. N. Y. O. & W. Ry., 123 I. C. C. 577.

(3v) Complainant attacked combination rate charged on gravel, carloads, from Montgomery, Ala., to Barney, Ga., between Jan. 10 and May 21, 1924 as unreasonable and inapplicable to extent it exceeded $1.98. Shipments moved A. C. L., to Quitman, Ga., thence South Georgia to destination, charged $1.53 to Quitman and 68 cents beyond. At the time these shipments moved defendants maintained a rate of $1.76 on gravel from Montgomery to various destinations beyond Barney, and in territory contiguous thereto, for comparable hauls.

HELD, rates charged unreasonable to extent they exceeded $1.76 per ton, reparation awarded. Luten Bridge Co. v. A. C. L. R. R., 123 I. C. C. 612.

(3w) It is not unreasonable to apply the combination of locals on a shipment which has been placed for unloading at original destination and is subsequently reforwarded to a different destination. This is doubly true where the shipment has been unloaded by the shipper and is subsequently reforwarded by him or another to a different destination. Sioux City Live Stock Exchange v. C. & N. W. 122 I. C. C. 177, 186.

(3x) Combination rates assessed on shipments of structural iron and steel, from St. Louis, Mo., Chicago, Ill., and Bethlehem, Pa., routed by shipper for fabrication in transit at Muskogee, Okla., and reforwarded to Casper, Illco, and Salt Creek, Wyo., found applicable and not unreasonable. While contemporaneously lower joint rates were in effect to Great Falls, Mont., and Spokane, Wash., they were restricted so as not to apply to destinations named, and lower joint rates in effect to the Wyoming points were not applicable via Muskogee. Complainants routed shipments over extremely circuitous routes involving an out-of-line haul of at least 800 miles. Had they been forwarded over direct routes, lower rates could have been secured and wasteful transporation avoided. Tulsa Rig, Reel & Mfg. Co. v. M. K. T., 122 I. C. C. 405.

(3y) Combination rates based on Chicago, Ill., charged on shipments of automobiles and extra parts from South Bend, Ind., to Pueblo, Colo., found not unreasonable as compared with lower combination subsequently established pursuant to commission's decision in 88 I. C. C. 728, or with lower combination contemporaneously in effect at time of movement via Gary, Ind. Tariff containing the Gary-Pueblo factor contained a provision which prevented its use in constructing through rates from points beyond Gary. Under such restriction all shippers east of the Indiana-Illinois State line are placed upon the Chicago basis on traffic to Colorado and other States, and this constitutes an equalization measure which should not lightly be condemned. Moreover, difference in the total rates is relatively so inconsiderable that it could hardly be said to transgress the "flexible limits of judgment" in rate making. Van Dyke Motor Co. v. M. P., 122 I. C. C. 411.

(3z-4d) Combination rate applicable via route of movement on bituminous coal screenings from Harrisburg, Ill., to Watertown, S. Dak., found unreasonable as compared with lower rates from and to other points in same general territory for comparable distances and to extent it exceeded lower joint rate contemporaneously in effect over other routes and subsequently established via route of movement. Waiver of undercharges authorized. Saline County Coal Corp. v. C. & N. W., 122 I. C. C. 469.

(4e) Rates to and from points on short lines should not be made by combining local rates to and from junctions with other lines. Combination rates of this character put the territory local to the weak or short lines at an even greater disadvantage than that under which such points of necessity labor, and tend to hamper development of such roads and of industries and towns located thereon. Also, such combination rates run counter to theory that financial necessities of weak lines should be met by liberal divisions of joint rates, because when rates are so constructed truck lines earn more for their hauls to and from junctions with short, weak lines than they would earn to and from same junctions on traffic to and from other trunk lines. Consolidated Southwestern Cases, 123 I. C. C. 203, 388.

(4f) Combination rates to and from points on short lines run counter to theory that financial necessities of weak lines should be met by liberal divisions of joint rates, because when rates are so constructed the trunk lines earn more for their hauls to and from junctions with short weak lines than they would earn to and from same junctions on traffic to and from other trunk lines. Consolidated Southwestern Cases, 123 I. C. C., 203, 388.

(4g) Complaint alleged that combination rates on powdered milk, moving interstate from Andes and Shavertown, N. Y., to Pier 23, North River, New York, were unduly prejudicial and in violation of long-and-short-haul provision of section 4 of the act. Contemporaneously carrier's tariff, subject to rule 77 of Tariff Circular 18-A, published commodity rates from Delhi, N. Y., lower than factor of rates assailed from East Branch, point directly intermediate to Delhi. HELD: While publication of a lower rate from a farther distant point under authority of rule 77 is equivalent to an

admission that higher rate from intermediate point is unreasonable, here complainant did not allege unreasonableness and has failed to show damage resulting from undue prejudice or violation of section 4. Moreover, commodity rates equal to those in effect from Delhi have since been established from East Branch. Innis, Speiden & Co. v. N. Y., O. & W., 123 I. C. C. 577.

(4h) Complainant assailed combination rates charged on 20 cars of nursery stock, five in Jan. 1923, eight in Dec. 1923 and seven in Dec. 1924 from Montebello, Calif., to Riverton, N. J., as unreasonable and unduly prejudicial, and that shipments were misrouted. Montebello is on U. P., 9 miles east of Los Angeles; Riverton is on the Pennsylvania 9 miles east of Philadelphia. Shipments were routed by the shipper and moved over the U. P. to Los Angeles, S. P. to New Orleans, Southern via Meridian, Miss., and Atlanta, Ga., to Potomac Yard, Va., and Pennsylvania beyond. Rate charged combination of $1.875 to Washington, D. C., and 31c beyond. Rate of $1.875 was effective over routes through St. Louis, Mo., Cincinnati, O., and Louisville, Ky., and was formerly in effect over the route of movement. HELD, rate charged over route of movement not unreasonable, shipments not misrouted, complaint dismissed. Dreer v. L. A. & S. L. R. R., 126 I. C. C. 130.

(4i) Complainant attacked combination rate charged on two cars of wall paper, shipped Dec. 12, 1924 and March 20, 1925 from Niagara Falls, N. Y., to Dallas, Tex. One shipment moved L. V. and Pennsylvania to Philadelphia, Pa., thence Southern Steamship Co. to Houston, Tex., and M. K. T. beyond. Other moved N. Y. C. to New York, Mallory Line to Galveston and M. K. T. beyond, charged combination of 149c, composed of 9.5c to Depew, N. Y., and 139.5c beyond. Allegation is that rate charged is unreasonable to extent it exceeded 94c. This rate was in effect on wrapping paper from Depew and 99c from Niagara Falls, composed of 5c to Depew and 94c beyond. HELD, rate attacked not unreasonable, complaint dismissed. Tex Mex Jobbing House v. L. V. R. R., 126 I. C. C. 175.

(4j) Combination rate on nursery or florists' stock, including dormant rosebushes and other plants and bulbs, from Montebello, Calif., to Riverton, N. J., routed by shipper via a southerly route to prevent freezing, FOUND not unreasonable as compared with lower rates contemporaneously in effect via various other routes and formerly in effect over route of movement. Carriers showed that routing in question was cancelled because of refusal of carriers in southeastern territory to participate in rates to points north of Potomac River and Virginia cities gateways; that to open route to Riverton would discriminate against other destinations north of the gateways; and that divisions accruing under divisions prescribed in 95 I. C. C. 385, are so low as not to warrant extension of transcontinental basis to points beyond lines of southeastern carriers north of the gateways. Moreover, earnings over route of movement indicate that rate charged was reasonably low. Dreer v. L. A. & S. L., 126 I. C. C. 130.

(4k) Combination rates on lumber and products from points in Puget Sound district of State of Washington to Montana, North Dakota, South Dakota, and Minnesota destinations, FOUND not unreasonable or unjustly discriminatory but unduly prejudicial to extent they exceed joint rates contemporaneously maintained from Tacoma, Wash., and other points in the coast group. Since absorption by complainants of differentials over coast-group rates is generally difficult or impracticable, resulting rates are prohibitive and buyers tend to deal with complainant's competitors in the coast group who can ship at lower rates. Non prejudicial rates required for future. Pacific States Lbr. Co. v. G. N. Ry., 126 I. C. C. 471.

(4l) Combination rates on lumber and products from Elk River, Idaho, to Montana, North Dakota, South Dakota, and Minnesota destinations, FOUND not unreasonable, discriminatory, or unduly prejudicial except that rates to points east of the Montana-Dakota State line are unduly prejudicial as compared with joint rates contemporaneously in effect from Spokane, a competing point; with rates prescribed in 50 I. C. C. 591, and 77 I. C. C. 156, from Winchester, Idaho, a point south of Elk River, and points southeast of Spokane, respectively, to same destinations; and to extent indicated in report. Nonprejudicial rates required for future. Pacific States Lbr. Co. v. G. N. Ry., 126 I. C. C. 471, 473, 474.

(4m) Local rate on crude petroleum oil from certain Kentucky points to Owensboro, Ky., for movement by pipe line to Lawrenceville, Ill., FOUND not un-

reasonable, unduly prejudicial, or otherwise unlawful, as compared with local rates contemporaneously in effect from same and various other points to Evansville, Ind., and Louisville, Ky.; or with proportional rates to Evansville and Louisville, Ky.; or with proportional rates to Evansville and Louisville, and to Jeffersonville and New Albany, Ind., more distant points. If proportional rates had been established to Owensboro for application in connection with the pipe line, no reason appears why they should have been higher than those to Louisville and Evansville. However, local rates assessed appear not to have exceeded maximum reasonable rates for service performed. Indian Refining Co. v. L. & N., 126 I. C. C. 543.

(4n) Combination rate on paving brick from Buffalo, Kans., to McCook, Nebr., subject to switching charge at Superior, Nebr., found unreasonable as compared with joint-line rates contemporaneously in effect on cement on which switching charge is absorbed; with distance rates prescribed in 77 I. C. C. 22 from Mason City., Iowa, to destinations in Nebraska and South Dakota; and to extent it exceeded joint-line distance rate prescribed in 77 I. C. C. 4, from Sioux City, Iowa, to Nebraska points for comparable distances. Reparation awarded. Buffalo Brick Co., v. M. P. Ry., 126 I. C. C. 744.

(4o) Combination rate is constructed when freight is carried from point on one railroad to point on another railroad when there is no through rate. Norfolk Southern R. Co. v. Freeman Supply Corporation, (Va., 1926) 133 S. E. 817.

(4p) Complainant attacked combination rates charged on carloads of lime from Engle, W. Va., and Woodville, O., to points in Maryland on the H. & F. and W. B. & A. as unreasonable and inapplicable. Complainant attacked rates on crushed stone and ground limestone, carloads, from Martinsburg, Kearneysville, Engle and Millville, Va., to W. B. & A. stations as unreasonable and inapplicable. No joint rates were in effect at the time the shipments moved, nor when complaints were filed, and full combination of rates without deduction were charged. Since the filing of the complaint joint rates have been established from points on the B. & O. to W. B. & A. stations on the full combination basis. Tariffs of the trunk lines made reference to the combination rule. Joint class rates have not been justified. HELD, they were unreasonable to extent they exceeded the joint commodity rates subsequently established, the latter not being unreasonable and are reasonable maximum rates for the future. The combination basis, plus the switching charge, is not shown to be unreasonable. While it may be that rates in trunk line territory should reasonably be somewhat higher than those in central territory, particularly to destinations on short or weak lines, defendants have failed to justify the increased rate from Woodville. The applicable combination basis in effect prior to Sept. 1, 1924 was not unreasonable. The rates maintained since that date are unresonable to extent they exceed the combination previously in effect. Reparation awarded. Washington Building Lime Co. v. B. & O. R. R., 128 I. C. C. 9.

(4q) Complainant attacked combination rate charged on a car of railroad ties shipped Jan. 14, 1924 from East End., Mo., consigned to Decatur, Ill., and reconsigned in transit to Clearing. Ill., as inapplicable. Shipment moved Sligo & Eastern to Sligo, Mo., Frisco to St. Louis and Wabash beyond, charged three factor combination of 36.5c plus a reconsignment charge of $2.70. Tariffs publishing the factors beyond Sligo were subject to the combination rule. HELD, shipment overcharged on basis of rate of 35c, which would be the rate applying the combination rule, reparation awarded. Potosi Tie & Lumber Co. v. S. & E. Ry., 128 I. C. C. 41.

(4r) Complainant attacked combination rate charged on 35 cars of bituminous smithing coal and foundry coke from Pennsylvania and West Virginia to points west of the Mississippi river or in Canada between March 4, 1919 and Feb. 28, 1920 were inapplicable. Charged combination rate without use of combination rule. Tariffs naming one of the factors were subject to the combination rule. HELD, rates charged inapplicable, rates applicable were the combination using the combination rule, reparation awarded. Pioneer Coal & Coke Co. v. Director General, 128 I. C. C. 49.

(4s) Complainant attacked combination rate charged on 28 cars of automobiles, 5 from Pontiac, Mich., and 23 from Detroit, Mich., shipped to Dodge City Kansas, from June 27, 1924 to May 25, 1925 as unreasonable. Charged 110% first

class rate to Mississippi river and first class beyond. A first class rate of $2.995 applies from these points to Tyrone, Okla., on the main line of the Rock Island about 96 miles southwest of Bucklin. This rate applies at intermediate points on the Rock Island. Dodge City is on a branch line. On July 1, 1925 a rate of 6c higher than $2.995 was made applicable to Dodge City. HELD, rate attached not unreasonable or otherwise unlawful, complaint dismissed. Gum Motor Co. v. A. T. & S. F. Ry., 128 I. C. C. 61.

(4t) Rates on iron and steel rails and reinforcement concrete bars from Huntington, W. Va., to certain points in Kentucky, Tennessee, and Virginia, found unreasonable as compared with lower rates for comparable distances from Pittsburgh, Pa., Newark, Ohio, and Birmingham, Ala., competitive points and to extent that rates on the rails over specific routes, exceeded those subsequently established from Huntington to Johnson City, Tenn., plus prescribed distance rate factors beyond, and rates on bars and rails to destinations involved, to extent they exceeded specific base rates, plus prescribed distance factors beyond Winchester, Ky. Reasonable rates prescribed for future and reparation awarded. West Virginia Rail Co. v. C. & O., 128 I. C. C. 153.

(4u) Complainant attacked combination rates charged on blank unfinished wall paper and newsprint paper, carloads, over routes wholly within the United States, from Thomson, N. Y., to points within and contiguous to central territory as unreasonable and unduly prejudicial. Rates from Thomson are generally based on the combination of local or proportional rates to Johnsonville and Albany group rates beyond. Blank wall paper and newsprint paper, are generally rated sixth class, by exception to the classification. Rates on newsprint paper from Thomson to central territory are based on the combination of a proportional commodity rate of 6c to Johnsonville and sixth class rates beyond. HELD, rates attacked on blank wall paper, in carloads, not unreasonable or otherwise unlawful, but on newsprint paper unreasonable to extent they exceed rates on blank wall paper. Iroquois Pulp & Paper Co. v. A. A. R. R., 128 I. C. C. 187.

(4v) Combination rates on grain and products from Oklahoma points to destinations in southeastern and Carolina territories found unreasonable to extent that factors east of Memphis, Tenn., exceed rates based on and approximating the class 12 rates prescribed in Southern Class Rate Investigation, 113 I. C. C. 200, and to extent that factors west of Memphis from all points exceed present group rates, computed as provided in Consolidated Southwestern Cases 123 I. C. C. 203, up to 610 miles and from points at greater distance from Memphis those graded up 1.5 cents on wheat and flour and made less by 10 per cent on coarse grains, for each 50 miles. Factors east of Memphis constructed as above should apply not only on Oklahoma traffic but also from other western states from which through rates are equalized via the various gateways. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(4w) Combination rates on grain and products from Oklahoma points to destinations in Louisiana west of the Mississippi River, including points on west bank thereof, and to Mississippi River crossings in Mississippi and Louisiana on east bank thereof, found unreasonable as compared with rates contemporaneously in effect from Kansas City, Mo., and Council Bluffs, Iowa, and to extent they exceed through rates based on those prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Reasonable joint through rates prescribed for future. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523.

(4x) Trend of recent decisions has clearly been against combination rates between territories. See 100 I. C. C. 513, 663. Rates on combination basis over the Mississippi River have been condemned in 81 I. C. C. 33, 39; 102 I. C. C. 540, and other cited cases. Oklahoma Millers' League v. A. & M., 128 I. C. C. 523, 529, 530.

(4y) Complainant attacked combination class rates charged on 9 cars of second hand machinery, dredging, shipped between Oct. 29 and Dec. 19, 1923 from Iron Mountain, Mont., to Baker, Ore., as unreasonable. Shipments moved N. P. via Spokane, Wash., to Wallula, Wash., thence O. W. R. R. & N. to Baker, 578 miles. Prior to Oct. 11, 1923 there was no joint commodity rate in effect. On that date, defendants established a joint rate of 85c minimum

80,000 pounds. Prior to its establishment the through rate had been $1.23 composed of class A rates of 35.5c from Iron Mountain to Wallace, Idaho, 87.5c beyond. HELD, rate attacked not unreasonable, complaint dismissed. Sweet Bros. v. N. P. Ry., 128 I. C. C. 543.

(4z) Complainant attacked combination rates charged on 23 cars of ground poultry manure between Oct. 1923 and April 24, from Kenton, O., to Hattiesburg and Meridian, Miss., as unreasonable. Eight moved to Hattiesburg and 15 to Meridian. Movement to Hattiesburg was over the Erie to Chicago, C. B. & Q. Paducah, Ky., N. C. & St. L. Jackson, Tenn., M. & O. Meridian, and N. O. & N. E, 1,213 miles. To Meridian 1,269 miles. Charged combination commodity rates of $7.60 to Hattiesburg and $8 to Meridian. There were contemporaneously published from Kenton joint commodity rates of $6.36 to Mobile, Ala., applicable over the route of movement via Meridian, and to New Orleans applicable over route of movement via Hattiesburg, which were subsequently established. HELD, rate attacked unreasonable to extent it exceeded $6.36, reparation awarded. Fosse & Company v. Erie R. R., 128 I. C. C. 553.

(5a) Complainant attacked combination rate charged on a carload of dried fruit shipped Nov. 3, 1924 from Suisun, Calif., to Phoenix, Ariz., as unjust and unreasonable. Shipment was tendered to S. P. at Suisun routed by the shipper "S. P., A. T. & S. F." It was forwarded to Stockton, Calif., over the S. P. and thence Santa Fe via Cadiz, Calif., to Phoenix 809 miles, charged 8c to Stockton and $1.25 beyond. At the time of movement there was in effect from Suisun to Phoenix over S. P. through Stockton and Maricopa, Ariz., 920 miles, a joint commodity rate of $1.25 and on Nov. 1, 1926 defendants established a joint rate of $1.25 over the route of movement. HELD, rate attacked unreasonable to extent it exceeded $1.25, reparation awarded. California Packing Corporation v. S. P. Co., 128 I. C. C. 631.

(5b) Combination rate on printing presses from Vancouver, British Columbia, to Orlando, Fla., a point taking Group K rates, found not unreasonable as compared with Group A rates contemporaneously maintained from Pacific coast terminals to New York. Earnings under latter rates as well as those under rates from various producing points to Orlando, compare favorably with those under rates assailed for comparable distances. Duplex Printing Press Co., v. B. C. E., 128 I. C. C. 692.

(5c) Complainant attacked combination rates charged on tanning extract, in carloads, from Nashville, Tenn., to Milwaukee, Wis., Kitchener, and Huntsville, Ont., as unreasonable, unjustly discriminatory and unduly prejudicial. Rates for future to Huntsville only are asked. Shipments moved between August 8 and Nov. 23, 1923 to Kitchener over L. & N. to Louisville Ky., C. I. & L. to La Crosse, Ind., P. M. to Detroit, Mich., C. P. to Galt, Ont., and Grand River R. R. beyond, charged 63c, composed of commodity rate of 24.5c to New Albany, Ind., and joint fifth class rate of 38.5c beyond. Other shipment routed L. & N. connections G. T. and moved Feb. 1, 1924 to Huntsville, charged 79.5c composed of commodity rate of 19c to Cincinnati and fifth class 60.5c beyond. Three shipments moved during Oct. and Dec. 1923 and in March 1924 to Milwaukee over N. C. & St. L. to Paducah, Ky., I. C. to Chicago and C. M. & St. P. beyond, applicable combinations 44c and 46c and effective Jan. 10, 1925 a joint commodity rate of 37c was established. HELD, rates to Kitchener not unreasonable or otherwise unlawful but rate to Milwaukee unreasonable to extent it exceeded 37c, and rate to Huntsville for future in so far as the transportation takes place in the United States unreasonable to extent it exceeds 66c, reparation awarded. Tennessee Extract Corp. v. L. & N. R. R., 128 I. C. C. 709.

(5d) Complainant assailed combination rate of $1.43 charged on three cars of peanuts, between Nov. 22, 1923 and April 3, 1924 from Suffolk and Petersburg, Va., to Enid, Okla., as unreasonable. Charged 58c to Memphis, Tenn., and 85c beyond. Effective July 25, 1925 the rate was reduced to $1.23. HELD, rate attacked unreasonable to extent it exceeded $1.23, reparation awarded. Alton Mercantile Co. v. A. T. & S. F. Ry., 128 I. C. C. 721.

(5e) Complainant attacked combination rates charged on 13 cars of lumber from Buick, Mo., to Hillsdale, Mich., between June 1, 1923 and May 1, 1924 as

inapplicable. Charged combination commodity rates ranging from 41.5c to 44.5c which in each instance were composed of three separately established factors made on Sligo and St. Louis. Tariffs except those naming the rates to Sligo were subject to the combination rule. HELD, applicable rate was 41c, reparation awarded. Culler Lumber Co., v. C. B. & Q. R. R., 128 I. C. C. 723.

(5f) Complainant attacked combination rates charged on 10 cars of relaying rails from Bellwood and Hartford, Ala., to Hellams, S. C., during July and August, 1925 as unreasonable. Bellwood and Hartford are local to the C. of Ga., 30 and 22 miles west of Dothan, Ala. Charged $9.942 and $9.822 made on Atlanta, Ga. Single line rates of $5.63 and $6.20 were applicable over the C. of Ga., and Southern, respectively, for distances over 460 up to 480 miles. Distance hauled 475 and 467 miles. Reasonable rate is claimed to be $6.80 arrived at by adding a 60c differential to the Southern Ry., distance tariff of $6.20. HELD, rate assailed unreasonable to extent exceeded $6.80, reparation awarded. Rinehart & Dennis Co., v. C. of Ga. Ry., 129 I. C. C. 247.

(5g) Complainant alleged combination rates charged on a car of lumber Sept. 11, 1925 from Luverne, Ala., to Sarasota, Fla., was unjust and unreasonable. Luverne is on A. C. L. branch line from Sprague, Ala., a point slightly east of Montgomery, Ala., and 53 miles from Luverne. Sarasota is in Florida and served by defendant and S. A. L. Shipments moved via defendants line 607 miles, charged 20.5c and 11.5c to and from Jacksonville. Applicable rate was 22.3c and 5.8c to and from Ruskin, Fla., overcharged. HELD, applicable rate not unreasonable, overcharge to be refunded, complaint dismissed. Aycock Holley Lumber Co., v. A. C. L. R. R., 129 I. C. C. 306.

(5h) Complainant alleged rates charged on 17 cars of rough granite shipped between May 12, 1923 and Nov. 1, 1924 from Bradford and Westerly, R. I., to Montello, Wis., were and are unreasonable and unduly prejudicial. Montello is on a branch line of the Soo Line. Rate charged from May 12, 1923, to April 20, 1924, 38.5c, La Crosse, Wis., rate as a maximum. On April 21, 1924 the La Crosse rate was increased to 42.5c, and on shipments moving on and after that date to Nov. 1, 1924 a combination rate composed of factors of 30.5c to Chicago, Manitowoc and Milwaukee, and of 12c beyond, combination rule, 40c, was assessed. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Montello Granite Co., v. M. St. P. & S. S. M. Ry., 129 I. C. C. 427.

(5i) Complainant alleged that commodity rate charged on sand, in carloads, from Willow Creek and Crisman, Ind., to Chicago Heights, Ill., was and is unreasonable. Willow Creek and Crisman are local on the M. C., 25.1 miles east of Chicago Heights. Charged combination of 75c, composed of 50c for the line haul over M. C. plus 25c switching charge of the Terminal at Chicago Heights. The question for determination is whether the combination rate is unreasonable, and the fact that the M. C. in this particular instance fails to absorb the switching charge of the Terminal can not be considered as controlling. Sand is a low grade commodity and can be transported in any tight open top cars. It loads heavily and is not easily susceptible to loss or damage. HELD, rate assailed not unreasonable, complaint dismissed. Chicago Heights Mfrs. Asso. v. C. H. T. T. R. R., 132 I. C. C. 43.

(5j) Complainant alleged rate charged on one car of scrap aluminum from Nashville, Tenn., to Aurora, Ill., March 12, 1924 and delivered March 27, 1924 as unreasonable and unduly prejudicial. Shipment moved T. C. to Hopkinsville, Ky., I. C. through Evansville, Ind., to Chicago, Ill., and C. & N. W. beyond, 561 miles, charged combination rate of 94.5c, made up of 54c to Evansville and 40.5c beyond, fourth class rates. Nov. 20, 1924 a commodity rate of 24.5c was established from Nashville to Evansville. HELD, rate assailed unreasonable and unduly prejudicial to extent it exceeded 55c made up of 24.5c to Evansville and 30.5c beyond, reparation awarded. Cline & Bernheim v. C. & N. W. Ry., 132 I. C. C. 311.

(5k) Complainant alleged combination rate of $2.15 charged on one carload of ash cans shipped from New York, N. Y., to Dallas Tex., on May 10, 1923 was unreasonable, inapplicable and in violation of the fourth section. Moved Pennsylvania to St. Louis, Mo., and M. K. T. beyond, charged 45c to

Pittsburgh and $1.70 beyond. No routing specified by shipper. There is no evidence of a fourth section violation. HELD, rate charged applicable not unreasonable or otherwise unlawful, complaint dismissed. Selig Co., of Texas v. Pennsylvania R. R., 132 I. C. C. 331.

(5l) Complainant alleged combination rate charged on five cars of yellow pine lumber shipped in Jan. 1923 from Oakdale, La., to Spaulding, Ark., was unreasonable and unduly prejudicial. One shipment moved O. & G. and M. P. to Eldorado, Ark., E. & W. to destination. Other four moved O. & G. and Rock Island to Eldorado and E. & W. beyond. Charged commodity rate of 21c to Eldorado and 5.5c beyond. Rate of 21c was subsequently established. HELD, rate charged unreasonable to extent it exceeded 21c, reparation awarded. Beaumont Lumber Co., v. C. R. I. & P. Ry., 132 I. C. C. 349.

(5m) Complainant alleged rate charged on a car of cedar posts shipped Feb. 13, 1924 from spur 28, Minn., to Stoutsville, Mo., was inapplicable. Shipment moved M. R. L. & M., Bemidji, Minn., Soo Line, Minnesota Transfer, Minn., Burlington, Hannibal, Mo., and M. K. T., charged combination of 42c, 9c to Bemidji and 33c beyond. Factor to Bemidji contained no combination rule but tariff naming factor beyond was subject to the combination rule. HELD, applicable rate 40c, reparation awarded. Pendleton & Gilkey v. M. R. L. & M. Ry., 132 I. C. C. 359.

(5n) Complainant alleged combination rates charged on a car of rough rolled glass, shipped Feb. 18, 1924, from Okmulgee, Okla., to Salina, Kas., was unreasonable. Shipment was routed by complainant "Frisco-Union Pacific" and moved over Frisco to Kansas City, Mo., and U. P. beyond, 494 miles. Charged 61c composed of 30.5c to Topeka, Kas., and 30.5c beyond. At time of movement there was in effect a joint rate of 30.5c over the routes of several competing carriers, the distances in many instances being considerably greater than that over the route traversed and on Dec. 16, 1924 defendants established the same rate over the route of movement. HELD, rate assailed unreasonable to extent it exceeded 30.5c, reparation awarded. Southwestern Sheet Glass Co., v. St. L.-S. F. Ry., 132 I. C. C. 577.

(5o) Combination rates on cottonseed cake and meal from points in Southwest and Mississippi Valley to York and Lancaster, Pa., and Buffalo, N. Y. there mixed in transit and product feed forwarded to trunk-line and New England destinations, found unreasonable and unduly prejudicial to extent they exceeded the contemporaneous joint rates from same origin territory to basing points with which destinations named are usually grouped. While rates assailed to c. f. a. destinations are not on proper basis, record is inadequate to make finding as to their reasonableness, partly due to fact that no basing points have been established in connection with cake and meal to that territory and further that existing joint commodity rates were published to destinations to which there was a known movement. Reparation awarded. American Feed Mfrs. Asso. v. A. & S., 129 I. C. C. 157.

(5p) Local rates from Dawkins, Ky. a point on the C. & O. Ry., to points in central and eastern trunk-line territories on lumber originating at Royalton, Ky., a branch-line point, found not unreasonable but unduly prejudicial to shippers at Royalton and unduly preferential of competing shippers located on the Sewell Valley R. R., which connects with C. & O. at Meadow Creek, W. Va., to extent they exceeded rates made the same differential under contemporaneous local rates from Dawkins as proportional rates to same destinations from Meadow Creek are made under contemporaneous local rates from latter point. Undue prejudice ordered removed. Dawkins Lbr. Co., v. C. & O., 129 I. C. C. 415.

(5q) Combination rates on refined petroleum products from Augusta, Topeka, and El Dorado, Kans., to St. Francis, Kans. and intermediate points in Kansas and Nebraska, via Superior, Nebr., found unreasonable as compared with joint rates in effect over longer routes via Kansas City and other Missouri River points; and via Kansas City or St. Joseph, Mo., unreasonable as compared with rates from Kansas City to points in Kansas, with intrastate rates in Kansas, with rates between points in Oklahoma and Kansas, and from points in Group 2. Reasonable rates prescribed and reparation awarded. White Eagle Oil & Refining Co. v. C., B. & Q. R. R., 129 I. C. C. 467.

LOCOMOTIVE INSPECTION

(a) Locomotive repairs can not be equitably apportioned between services on basis of hours of service alone, without regard to things which affect relative costs, such as the size, tractive capacity, or other characteristics of locomotives used and number of miles run in such services. Rates of P. & P. U. Ry., 115 I. C. C. 469, 489.

(b) This proceeding was instituted pursuant to a petition of the American Electric Railway Association, which includes in its membership a large proportion of the electric railway companies operating in the United States. The primary question involved is whether or not the railway companies included in the membership of this association are subject to order of Dec. 14, 1925 in this matter. The rules and instructions approved applied to locomotives propelled by power other than steam power, locomotives propelled by steam power having previously been covered. The locomotive inspection act makes it the duty of the commission to approve rules and instructions for the inspection and testing of locomotives and tenders and appurtenances thereof subject thereto. After such approval and service of a copy thereof upon the carrier, such rules become obligatory and a violation thereof is punishable as provided in the act. Whereas prior to the amendment of 1924 the locomotive inspection law applied only to locomotives propelled by steam power, the amendment then made removed this restriction and made the law apply to all locomotives used or permitted to be used on the line of any carrier subject to the act, regardless of the power by which they are propelled. It is the view of the commission that under section 2 any locomotive used or permitted to be used on the line of any carrier subject to the act is clearly within the scope thereof and that this is not restricted by the words referred to be the petitioner. Obviously the character of the lines may change without a change in the name of the operating company. The record here shows that the name of a carrier, whether it is called a railroad, traction system, interurban railway, or power and light company, indicates nothing as to the character of the line or the nature of the traffic handled. A line which today extends only between two cities, and is dependent upon passenger traffic for the bulk of its revenues, might properly be termed an interurban line. In a period of years it might through natural development or consolidation become a railway comparable with the steam railroads and still retain its original name. It would no longer, however, be an interurban railway in substance and in fact. The distinguishing feature of their operation is that electric, instead of steam, motive power is used. The commission thinks that such carriers are not excluded from the scope of the locomotive inspection act, as amended. HELD, carriers listed do not operate as a part of a general railroad system and do not fall within the scope of the act as amended, other carriers do fall within that scope. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414.

(c) The courts have enunciated important principles which should be kept in mind when construing the locomotive inspection act. This law was enacted for the safety of employees; it should be liberally construed and its obvious purpose effectuated. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 420.

(d) Order of the commission of December 14, 1925, approving rules and instructions for the inspection and testing of locomotives propelled by power other than steam power in accordance with the locomotive-inspection act, as amended, applies to (a) electric railways subject to the interstate commerce act and which are not street, suburban, or interurban railways, and (b) street, suburban, and interurban electric railways operated as parts of general railroad systems of transportation. Rules for Testing Other than Steam Power Locomotives, 122 I. C. C. 414.

(e) The locomotive-inspection act makes it the commission's duty to approve rules and instructions for inspection and testing of locomotives and tenders and appurtenances thereof subject thereto. See Napier v. A. C. L. R. R., 71 L. Ed. 237. After such approval and service of a copy thereof upon the carrier, such rules become obligatory and a violation thereof is punishable as provided in the act. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 415.

(f) Upon contention that provisions of the locomotive-inspection act where reference is made to boilers and tenders

of locomotives, and to that part of section 8 which refers to locomotives disabled to extent that they can not be run by their own steam, show that the act was intended to apply only to steam locomotives, HELD: In the light of the language of section 2 of that act, the presence or absence of a boiler, tender, or any particular part or appurtenance of a locomotive does not govern the question as to whether or not such locomotive is subject to the act. Under section 2 any locomotive used or permitted to be used on the line of any carrier subject to the act is clearly within the scope thereof and this is not restricted by the words referred to in the contention. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 418.

(g) Whereas prior to the amendment of 1924 the locomotive-inspection law applied only to locomotives propelled by steam power, the amendment then made removed this restriction and made the law apply to all locomotives used or permitted to be used on the line of any carrier subject to the act, regardless of the power by which they are propelled. Rules for Testing Other than Steam Power Locomotives, 122 I. C. C. 414, 418.

(h) The locomotive-inspection act was enacted for the safety of employees, 266 U. S. 521, and other cited cases, and should be liberally construed and its obvious purpose effectuated, 275 Fed. 766 and other cited cases. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 420.

(i) Every carrier by railroad subject to the interstate commerce act and which is not in strictness a street, suburban, or interurban electric railway, is subject to the locomotive-inspection act, as amended. And even though it is a street, suburban, or interurban electric railway, if it is operated as a part of a general railroad system of transportation, such electric railway is also within the scope of the locomotive-inspection act, as amended. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 422.

(j) Electric railways which have developed into railways which are more than interurbans, and which do not fall fairly within the expression "street, suburban, and interurban electric railways" as used in the locomotive-inspection act, are not excluded from scope of that act, as amended. This view is in harmony with the body of this statute and the provisions and scope of various other laws enacted for the same purpose. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 424, 425.

(k) Certain carriers found to be street, suburban, or interurban electric railways not operated as parts of general railroad systems of transportation and accordingly not within scope of the locomotive-inspection act, as amended. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 425, 426.

(l) It is unnecessary for the commission to determine whether electric lines upon which no locomotives are used are subject to the locomotive-inspection act, as amended. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 426.

(m) Certain electric lines found not properly classed as street, suburban, or interurban electric railways. Accordingly, such carriers are subject to the locomotive-inspection act, as amended. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 428.

(n) There is nothing in the amendment of 1924 to the locomotive-inspection act which indicates that Congress intended to narrow its scope, but, on the contrary, it is evident from the changes expressly made in the several sections, other than section 1, that the intention was to broaden the act and make it more effective. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 429.

(o) The locomotive-inspection law has for its purpose the promotion of safety of employees and travelers upon railroads, and commission sees no material difference in the hazard of locomotive operation, or in the beneficial results that will flow from observance of the requirements of that law, on electric as well as other lines. Rules for Testing other than Steam Power Locomotives, 122 I. C. C. 414, 429.

(p) Laws 1923, c. 139, and order of Railroad Commission made in pursuance thereof, requiring railroads operating within the state to equip their locomotives with certain cab curtains, are for purpose of promoting health or comfort of engine men, and hence do not conflict with Locomotive Boiler Inspection Act Feb. 17, 1911, and its amendments, nor Safety Appliance Act and its amendments (U. S. Comp. St. §§ 8605-8650; U. S. Comp. St. Supp. 1925, §§ 8630-8633),

which have for their purpose the promotion of public safety, in view of rules adopted by Interstate Commerce Commission pursuant thereto, and no conflict appearing between such order and rules and regulations prescribed by chief boiler inspector and approved by Interstate Commerce Commission. Chicago & N. W. Ry. Co. v. Railroad Commission of Wisconsin; Chicago, M. & St. P. Ry., Co., v. Same; Minneapolis, St. P. & S. S. M. Ry. Co. v. Same, (Wis., 1925) 205 N. W. 932.

(q) Congress having, by the Locomotive Boiler Inspection Act, as amended by Act March 4, 1915, and Act June 7, 1924 (Comp. St. §§ 8630-8633), occupied the field, state legislation regulating equipment of locomotives used in interstate commerce is precluded. Napier, Atty. Gen., v. Atlantic Coast Line R. Co.; Chicago & N. W. R. Co. v. Railroad Commission of Washington; Chicago, M. & St. P. Ry. Co., v. Same, 47 Sup. Ct. 207.

(r) Congress has power to preclude state legislation regulating locomotive equipment for use in interstate commerce after occupying the field itself. Napier, Atty. Gen., v. Atlantic Coast Line R. Co.; Chicago & N. W. R. Co., v. Railroad Commission of Washington; Chicago, M. & St. P. Ry. Co. v. Same, 47 Sup. Ct. 207.

(s) Locomotive Boiler Inspection Act, as amended by Act March 4, 1915, and Act June 7, 1924 (Comp. St. §§ 8630-8633), HELD to confer on Interstate Commerce Commission power to specify the sort of equipment to be used on locomotives in interstate commerce. Napier, Atty. Gen., v. Atlantic Coast Line R. Co.; Chicago & N. W. R. Co., v. Railroad Commission of Washington; Chicago, M. & St. P. Ry. Co., v. Same, 47 Sup. Ct. 207.

I. CONTROL AND REGULATION.

See Control and Regulation.

§2. Jurisdiction of Commission.

See Interstate Commerce Commission; Jurisdiction of Commission.

(a) Provisions of fourth section of the act apply where point of origin is in an adjacent foreign country and intermediate point and more distant point of destination are in the United States. See 74 I. C. C. 733. Newsprint Paper and Wall Paper, 126 I. C. C. 166, 168.

(b) Power of Interstate Commerce Commission to prescribe extent to which common carrier may be relieved from operation of Act to Regulate Commerce, § 4, as amended by Act June 18, 1910, § 8, is not limited to long and short haul clause, but extends also to aggregate of intermediate clause added by 1910 amendment. Patterson v. Louisville & N. R. Co., 46 Sup Ct. 8.

II. SECTION 4 AS AMENDED.

§2½. Construction in General.

(a) Violations of long-and-short-haul provision of section 4 of the act, where not protected by applications to or permission from the commission, are unlawful. Decker & Sons v. C., R. I. & P., 109 I. C. C. 261, 271.

(b) Testimony to effect that unrestricted routing is considered necessary on vegetable traffic does not constitute justification for departures from the long-and-short-haul provision of section 4 of the act. Wichita Chamber of Commerce v. A. & V., 109 I. C. C. 368, 374.

(c) An allegation of a violation of the long and short haul provision of the fourth section is one manner of alleging undue prejudice. Anderson Taylor Co. v. A. T. & S. F. Ry., 115 I. C. C. 313, 314.

(d) The law is plain that regardless of basis upon which relief from the long-and-short-haul provision of section 4 of the act is granted the commission must not permit establishment of a rate to a more distant point that is not reasonably compensatory for service performed. In a territory where rates in general via direct hauls have been passed upon by commission and where there is such a maze of possible routes, making it practically impossible to check and enumerate each route available in published tariffs, the commission must place some general limitations upon relief granted, so that rates via direct routes will not be less than reasonably compensatory when applied via circuitous hauls. Class and Commodity Rates from Pennsylvania, 115 I. C. C. 331, 334.

(e) The provisions of the fourth section of the act apply where the point of origin is an adjacent foreign country and the intermediate point and the more distant point of destination are in the United States. Newsprint and wall paper, 126 I. C. C. 166, 168.

(f) Fourth-section departures resulting from changes in classification may be either of long-and-short-haul or aggregate-of-intermediates type. They may occur on local traffic within a classification territory, or on interterritorial traffic between points where joint through rates are in effect. Fourth Section Departures, 129 I. C. C. 187, 189.

§4. Exceptions.

See Tariffs §12½.

(a) Upon applications of C., M. & St. P., Illinois Central, St. L.-S. F., Union Pacific, C., R. I. & P., Missouri Pacific, A., T. & S. F., and Kansas City Southern railways, relief from long-and-short-haul provision of section 4 of the act granted as to class and commodity rates between western trunk line territory and points west of Missouri River. Class and Commodity Rates between Western Points, 104 I. C. C. 578.

(b) Where routes of a carrier seeking relief from long-and-short-haul provision of section 4 of the act are circuitous via some gateways as compared with its own routes via other gateways, it must appear that lower rates to more distant points on circuitous routes are reasonably compensatory before relief will be granted. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 591.

(c) The principle embodied in equidistant provision of section 4 of the act may be applied by commission, at its discretion, to cases in which it is not in terms applicable. See 64 I. C. C. 26, 30. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 591.

(d) If relief is granted from long-and-short-haul provision of section 4 of the act there must be some reasonable limitation upon degree of circuity in order to conform to requirement of the law that lower rates at more distant points must be reasonably compensatory. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 592.

(e) The equidistant rule of section 4 of the act, though formerly also observed by commission as an administrative practice, is now an integral part of the law, and its application is mandatory where relief is sought because of circuity, regardless of methods of rate making. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 595.

(f) Commission is authorized under

section 4 of the act to grant relief from operation thereof "in special cases." The circuity of a rail line or route has long been recognized as a special case in which relief may properly be granted if circumstances as a whole warrant that action. In practice commission has generally limited relief to routes which are not less than 15 per cent circuitous, but this has not been regarded as an inflexible rule. See 24 I. C. C. 192; 61 I. C. C. 700. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 595.

(g) Upon application of certain independent short lines in southern territory for authority to continue to charge lower rates on lumber and other forest products to trunk-line and New England territories from junction points with trunk-line connections than from intermediate points on their lines, relief sought being based solely on ground of water competition. FOUND: Considering the great difference between all-rail and water rates from south Atlantic ports to eastern port cities, and small volume of movement via eastern ports to interior destinations, the continued maintenance of lower rates from these ports than from intermediate points would divert or retain little, if any, traffic to rail carriers. Fourth section relief denied and original report, 85 I. C. C. 270, affirmed. North Carolina Pine Asso. v. A. C. L., 107 I. C. C. 190, 192, 193.

(h) Authority to establish reduced rates on certain commodities from eastern defined territories, Groups D to J, inclusive, to Pacific coast terminals, without observing long-and-short-haul clause of section 4 of the act, based on market competition and a desire to place Mid-Western manufacturers on a rate equality with eastern competitors who enjoy cheaper water transportation by reason of their location near Atlantic seaboard, denied. Section 500 of transportation act, 1920, declares it to be the policy of Congress to foster and preserve in full vigor both rail and water transportation. While rates proposed are reasonably compensatory; traffic diverted from water routes would inappreciably effect net revenues of rail lines, they would be disproportionate to losses the water lines would suffer, and might impair latter's ability to maintain their present standard of service. Commodity Rates to Pacific Coast Terminals, 107 I. C. C. 421.

(i) Before relief from operation of the long-and-short-haul provision of section 4 of the act may be granted the commission must be satisfied that there will not thereby be created infractions of other provisions of the act, particularly those of section 3 prohibiting undue or unreasonable preference or advantage of or prejudice or disadvantage to persons or localities. Commodity Rates to Pacific Coast Terminals, 107 I. C. C. 421, 436.

(j) Warren, Pa.: Authority to continue to charge for transportation of iron and steel articles from Johnstown, to Titusville, Pa., via the B. & O., in connection with the N. Y. C., rates which are lower than rates contemporaneously in effect on like traffic from, to, and between intermediate points, denied. Hammond Iron Works v. P. R. R., 107 I. C. C. 473.

(k) Nashville, Ga.: Authority to continue to maintain for transportation of black sheet steel, c. l. and l. c. l., from Lynchburg, Va., to Valdosta, Sparks, and Moultrie, Ga., rates which are lower than rates contemporaneously in effect on like traffic to Nashville and other intermediate points on the Georgia & Florida Ry., granted, provided that rates at intermediate points shall in no case exceed lowest combination and that rates to said intermediate points shall not exceed rates which may be established pursuant to findings in Southern Class Rate Investigation, 100 I. C. C. 513, 650, 655. Lynchburg Chamber of Commerce v. G. & F., 109 I. C. C. 39.

(l) Authority to continue to charge for transportation of overalls, l. c. l., from Middlesboro, Ky., to Memphis, Tenn., via Birmingham, Ala., rates which are lower than rates contemporaneously in effect on like traffic to Tupelo and other intermediate points, denied. Northeast Miss. Traffic Bureau v. M. & O., 109 I. C. C. 246.

(m) Wichita, Kans.: Authority to continue to charge for transportation of vegetables from Jacksonville and other Florida points to Kansas City, Mo., and other Missouri River cities and points taking same rates or rates made with relation thereto, also other points as to which Wichita, Kans., is intermediate, rates which are lower than those contemporaneously in effect on like traffic to Wichita, without observing the long-and-short-haul provision of section 4 of the act, denied. Wichita Chamber of Commerce v. A. & V., 109 I. C. C. 368, 378.

(n) Applications of certain carriers for authority to maintain class and commodity rates from points in New England and eastern trunk-line territories and Canada to the Twin Cities lower than to intermediate points in Iowa, southeastern Minnesota, and Western Illinois, based upon ground that depressed rates apply via rail-and-water competitive routes via Duluth and Superior, Wis., and low rates in force over routes through Canada, denied. Contention that Twin Cities rates are depressed is not supported by adequate proof in light of the fact that lower rates to intermediate Wisconsin points were prescribed or approved by commission. Nor does evidence sufficiently indicate that financial condition of Minneapolis & St. Louis, one of the applicant carriers, is such as would entitle that carrier to special treatment. Rates from Eastern Territory to Twin Cities, 109 I. C. C. 437.

(o) Application for authority to establish a rate on sugar from Key West, Fla., imported from Cuba to Jacksonville, Fla., lower than to intermediate points denied. Actual competition with water lines between Cuba and Jacksonville direct does not exist, and while there is a substantial movement of raw sugar from Cuba to Port Wentworth (Savannah), Ga., the volume of refined sugar shipped to Jacksonville from Port Wentworth is not shown, nor is it established that competition with that sugar warrants the rate proposed. Sugar from Key West, 112 I. C. C. 347.

(p) Authority to continue to charge for transportation of rosin from Gulfport, Miss., Pensacola, Fla., Mobile, Ala., and New Orleans, La., to Hamilton, Ontario, Canada, rates which are lower than rates contemporaneously maintained on like traffic from Eureka, Ala., Hattiesburg, Miss., and other intermediate points, denied. Procter & Gamble Co. v. A. & V., 112 I. C. C. 381, 386.

(q) Authority to continue to charge for the transportation of transformer cores from Atlanta, Ga., to Pittsfield, Mass., rates which were higher than those contemporaneously maintained on like traffic from Ocoee and other intermediate points denied. Tennessee Electric Power Co. v. L. & N. R. R., 112 I. C. C. 491, 494.

(r) A higher rate from a farther distant than from an intermediate point does not constitute a violation of long-and-short-haul provision of section 4 of the act if protected by an appropriate application on file with commission. Drake Produce Co. v. O. S. L., 112 I. C. C. 551, 552.

(s) Authority to maintain rates on coal from mines in Kansas, Missouri, Arkansas, and Oklahoma to Kansas City, Mo., or Topeka, Kans., and thence via Rock Island to Lincoln and Havelock, Neb., same as those contemporaneously maintained on like traffic by direct lines from and to same points, and to maintain higher rates at intermediate points, granted, such authority not to include intermediate points as to which the haul of petitioning line or route is longer than that of direct line or route between competitive points, the rates at intermediate points affected not be increased without authority from commission, and in no case exceed lowest combination. Lincoln Chamber of Commerce v. A. C. R. R., 113 I. C. C. 161, 164.

(t) In original report, 88 I. C. C. 543, commission granted fourth-section relief under the distance scale there prescribed on brick and related articles between points in southern territory by authorizing indirect lines to meet direct lines' rates at competitive points and maintain higher rates at intermediate points. Upon a showing by carriers that publication of all routes over which rates apply would impose upon them tremendous labor and expense and result in such an increase in the bulk of tariffs as to render them cumbersome and difficult to use, original findings modified and in the interest of tariff simplicity carriers authorized, in lieu of publication of specific routing between points of origin and destination, to publish a general rule showing rates and maximum distances for routing. Brick and Clay Products in the South, 113 I. C. C. 380.

(u) Authority granted to maintain, via routes which are not more than 50 per cent circuitous, on brick and other clay products from Clearfield, Pa., and points grouped therewith, to points in eastern trunk-line and New England territories, rates which are lower than those contemporaneously in effect on like traffic from Johnsonburg and Ridgeway, Pa., and points grouped therewith and intermediate thereto, said authority not to include intermediate points as to which the haul of petitioning line or route is

not longer than that of direct line or route between competitive points, the rates from intermediate points to in no case exceed lowest combination. Alumina Shale Brick Co. v. B. & O., 113 I. C. C. 496, 499, 500.

(v) Applications for authority to continue rates on petroleum and products from Ohio and Mississippi River crossings to Carrollton, Ky., which are lower than rates contemporaneously in effect at Worthville and other intermediate points, denied. Petroleum to Carrollton, 113 I. C. C. 587.

(w) Authority to continue to charge for transportation of sugar from New Orleans and Louisiana points taking same or related rates, from Sugarland, Tex., and from points in various Western States, to Oklahoma, rates which are lower than those contemporaneously maintained to intermediate points, denied. Oklahoma Traffic Assn. v. A. G. S. R. R., 113 I. C. C. 635, 639.

(x) Authority to continue to charge for the transportation of cotton, any quantity, from Goldsboro, Maxton, Selma, and other points in North Carolina to Danville, Va., rates which are lower than those contemporaneously maintained on like traffic from Elm City, Wilson, Black Creek, Freemont, and Lucama, N. C., and from other intermediate points, denied. Bradshaw-Roberson Cotton Co. v. A. C. L., 113 I. C. C. 661, 662, 663.

(y) The law is plain that regardless of basis upon which relief from the long-and-short-haul provision of section 4 of the act is granted the commission must not permit establishment of a rate to a more distant point that is not reasonably compensatory for service performed. In a territory where rates in general via direct hauls have been passed upon by commission and where there is such a maze of possible routes, making it practically impossible to check and enumerate each route available in published tariffs, the commission must place some general limitations upon relief granted, so that rates via direct routes will not be less than reasonably compensatory when applied via circuitous hauls. Class and Commodity Rates from Pennsylvania, 115 I. C. C. 331, 334.

(z) Authority to charge for transportation of refuse sand from Detroit, Mich., to Cincinnati, Ohio, rates which are lower than those contemporaneously maintained on like traffic to Indianapolis and other intermediate points, denied. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529, 531.

(aa) An order of commission authorizing temporary rate adjustments involving fourth-section departures pending determination of fourth-section applications, is not sufficient justification for new and increased fourth-section departures in an extensive revision of rates which should be justified for permanent establishment. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633, 636.

(bb) Applications for authority to continue rates on potatoes from Cash Corner, Vandemere, Washington, and Faison, N. C., to Grand Rapids, Mich., which are lower than rates contemporaneously maintained on like traffic to Jackson and Kalamazoo, and other intermediate points, denied. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633, 639.

(cc) Authority to continue to charge for transportation of green salted hides from Birmingham and Montgomery, Ala., Shreveport, Monroe, and New Orleans and Baton Rouge, La., to Winchester, Mass., rates which are lower than those contemporaneously maintained on like traffic from Laurel, Meridian, Clarksdale, Greenwood, Yazoo City, Vicksburg, Jackson, and Natchez, Miss., Tuscaloosa and Dothan, Ala., and other intermediate points, denied. Beggs & Cobb v. A. & V., 118 I. C. C. 13, 18.

(dd) Application for authority to continue to charge for transportation of green salted hides from Mobile, Ohio, to Buffalo, N. Y., rates which are lower than those contemporaneously maintained on like traffic from Meridian and other intermediate points of origin to Portville, N. Y., and other intermediate points of destination, denied. Northwestern Leather Co. Trust v. M. & O., 118 I. C. C. 37, 41.

(ee) Authority to charge for transportation of newsprint paper, from Berlin, N. H., to New Orleans, La., rates which are lower than those contemporaneously maintained to Birmingham and other intermediate points, denied. Birmingham News Co. v. A., B. & A., 118 I. C. C. 205, 207.

(ff) Authority to continue to charge for transportation of bale ties and wire fencing from Sterling, Ill., to Mobile, Ala., rates which are lower than those contemporaneously maintained to Mont-

gomery and other intermediate points, denied. Teague Hardware Co. v. C., B. & Q., 118 I. C. C. 221, 226.

(gg) Authority to charge on sugar from New Orleans, higher rates to Keokuk and Burlington, Iowa, and other intermediate points than to Chicago over the C., B. & Q., denied, and so much of previous order as permits charging of such higher rates, vacated. Relief can not be granted on ground of circuity of route because Iowa points are less distant than Chicago as section 4 of the act specifically precludes granting of relief on than ground when distance to the intermediate point is not greater than to the lower rated competitive point beyond. Moreover, carrier competition is not such as to warrant relief on grounds other than circuity of route. See 88 I. C. C. 46. Keokuk Shippers' Asso. v. A., T. & S. F., 118 I. C. C. 683.

(hh) Authority to continue to charge for transportation of petroleum and petroleum products from points in Oklahoma and Texas to Buffalo, rates which are lower than those contemporaneously maintained on like traffic to Bradford and other intermediate points, denied. Kendall Refining Co. v. A. & V., 118 I. C. C. 689, 691.

(ii) Authority to continue to charge rates for transportation of envelopes from Waukegan, Ill., and West Carrollton, Ohio, to Oklahoma City, Okla., which are lower than rates contemporaneously maintained on like traffic to Wichita and other intermediate points, denied. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(jj) S. A. L., T. & G., L. & N., G. R. R., Southern, C. N. O. & T. P., asked for authority to establish rates on paving brick, carloads, from Robbins, Tenn., Coaldale, Alton, Graves Mine, and Birmingham, Ala., Rockmart, and Campania, Ga., to Tampa, St. Petersburg, Palmetto, Bradentown and Sarasota, Fla., without observing the long and short haul provision of the fourth section. Destination points are all located on navigable water with water terminal facilities on Tampa Bay, except Sarasota, which is on Sarasota Bay, just south of Tampa. The competition which the applicants now meet is the water rate to Tampa, plus the rail rates beyond, which from Westport are 16 cents, as compared with the proposed rates of 16.5 cents from Campania, 18.5 cents from Rockmart and 20 cents from the other points. HELD. applicants have not shown sufficient justification for relief sought, application denied. Paving brick to Florida, 120 I. C. C. 469.

(kk) Authority to continue to charge for transportation of salt from East St. Louis, Ill.; St. Louis and Kansas City, Mo.; New Orleans, Cypremort, Weeks Island, and Salt Mine, La.; Memphis, Tenn.; Hutchinson, Nickerson, Sterling, and other points in Kansas; Toledo, Cleveland, and other points in Ohio; Detroit, Ludington, and other points in Michigan; also points in Illinois, Indiana and Wisconsin, to points in Texas, without observing long-and-short-haul provision of section 4 of the act, denied. Salt Between Western and Southwestern Points, 120 I. C. C. 91, 109, 110.

(ll) A departure from the long-and-short-haul clause of section 4 of the act, does not in itself establish unreasonableness of higher rate to less distant point or form a basis for an award of reparation. See 50 I. C. C. 719. Virginia & Rainy Lake Co. v. D., W. & P., 120 I. C. C. 131, 133.

(mm) Authority to continue to charge for transportation of vegetables from points in Virginia on line of Norfolk Southern to points in c. f. a. territory, rates which are lower than rates contemporaneously maintained on like traffic from, to, and between intermediate points, denied. Vegetables from Virginia 120 I. C. C. 319, 324.

(nn) Rates on old secondhand barrels from Cynthiana and Poindexter, Ky., to Rochester and Syracuse, N. Y., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect from Lexington and Winchester, Ky., to which Cynthiana and Poindexter are intermediate. The fourth-section departures were protected by an appropriate application, considered and disposed of in 100 I. C. C. 513, and orders entered in cited case will result in correction of the situation presented. Carriers showed that because of light loading of barrels, the earnings or shipments here considered were low; also that rates charged compare favorably with rates in general on old secondhand barrels from points in interior Kentucky, other than Lexington and Winchester, to territory north of the Ohio River. Liberty Cooperage & Lbr. Co. v. L. & N., 120 I. C. C. 379.

(oo) Where a fourth-section application has been considered by commission and denied in a previously decided case and effective date of the denial order has been fixed, it would be an idle gesture for a division of the commission to reiterate the denial or to fix a different effective date. Liberty Cooperage & Lbr. Co. v. L. & N., 120 I. C. C. 379, 381.

(pp) Application of Seaboard Air Line Ry., and other carriers for authority to establish rates on paving bricks from producing points in the Southeast to Tampa, St. Petersburg, Palmetto, Bradentown, and Sarasota, Fla., lower than rates contemporaneously maintained to intermediate points, based upon desire of such carriers to meet water, water-and-rail, and market competition from Westport, Md., and prospective competition of paving brick imported from Holland, Belgium, and England, denied. Paving Brick to Florida, 120 I. C. C. 469.

(qq) Authority to continue to charge for transportation of compress castings and fittings from New Orleans, La., and Jackson and Meridian, Miss., to Little Rock and Fort Smith, Ark., rates which are lower than those contemporaneously maintained on like traffic from and to or between intermediate points, denied. Russellville Compress Co. v. G., M. & N., 120 I. C. C. 481.

(rr) Authority granted carriers to apply under distance rates herein prescribed, on salt from Louisiana mines to Mississippi destinations over all routes, the lowest rate available over any route from and to said points, and to maintain higher rates from and to intermediate points; provided that rates from and to the intermediate points shall in no case exceed the lowest combination, and that the relief granted shall not include routes more than 50 per cent longer than the direct route from and to the competitive points. Mississippi R R. Comm. v. A. & V., 120 I. C. C. 569.

(ss) Petitioners ask for authority to establish rates on plaster and gypsum products, in carloads, from Centerville, Fort Dodge, and Gypsum, Ia., Alabaster and Grand Rapids, Mich., and Port Clinton, O., district to Illinois, southern Wisconsin, northwestern Indiana, and on the west bank of the Mississippi River, without observing the long and short haul provision of section four. The fourth section application is incidental to an adjustment agreed to by and between interested carriers and representatives of all plaster manufacturers operating at points of origin, having in view the equalization of the rates from the various origin points to the defined territory. In 34 I. C. C. 202, 41 I. C. C. 1 and 83 I. C. C. 682, the commission considered the rates on these commodities within the territory involved herein, and ordered the removal of undue prejudice found to exist in the rates and minimum weights from Grand Rapids as compared with the rates and minimum weights from Fort Dodge. Although fourth section relief was granted. Circuitous lines are here seeking relief to meet at competitive destinations the rates of the direct routes and to maintain higher rates based upon the proposed scales at points intermediate thereto. The proposed rates over the direct routes conform to the long and short haul rule. The distances shown to the competitive points over the direct routes range from 200 to 594 miles, and over the circuitous routes from 262 to 765 miles. In the illustrations given the circuitous lines or routes range from 9 to 146% longer than the direct routes. HELD, applicants will be authorized to establish and maintain via routes that are not less than 15% nor more than 70% circuitous, from the origin to the destination territory described, the lowest rate applicable via any route and to maintain higher rates to intermediate points, provided that the rates to the said intermediate points shall not exceed the scales of rates proposed and shall in no case exceed the lowest combination; that the relief herein granted shall not extend to intermediate points as to which the haul of the circuitous line or route is not longer than that of the direct line or route to the competitive points; and that the authority herein granted shall be limited to rates under the scales described herein. Except as relief is herein granted, all other and further relief sought by this application will be denied. Plaster and Gypsum Products. 122 I. C. C. 747.

(tt) Carriers parties hereto ask, among other things, for authority to continue to charge rates for the transportation of salt, carloads, from East St. Louis, Ill., St. Louis and Kansas City, Mo., Memphis, Tenn., and points in Louisiana, Ohio, Indiana, Illinois, Michigan, Wisconsin and Kansas to points in Colo-

rado, New Mexico, western trunk line, southwestern, southern and central territories, without observing the provisions of section four of the act. The evidence presented only pertains to relief sought in connection with the rates from Louisiana mines in southern Louisiana, to destination territory described as lying on and east of the Mississippi River. The distance from points of origin to the higher rated intermediate points on circuitous routes is in many instances much less than the distance between competitive points over the direct routes. The rates to such intermediate points are clearly unjustified as compared with the rates to the lower rated destinations. Sufficient basis for relief over direct lines has not been shown. HELD, relief will be granted applicants the same as the rates in effect on like traffic from and to the same points over the lines of their competitors, but not lower than the present rates from and to the same points, and to maintain higher rates to intermediate points; provided, that the authority herein granted shall not include intermediate points as to which the haul of the petitioning line or route is not longer than that of the direct line or route between the competitive points; provided further, that the rates from, to, and between intermediate points shall not be increased except as hereafter may be authorized by the commission and shall in no case exceed the lowest combination; and provided further, that the authority herein granted shall not extend to lines or routes which are more than 50% longer than the direct line or route between the competitive points. Fourth Section Departures on Salt, 123 I. C. C. 73.

(uu) Authority to continue rates on furniture from Fort Smith, Ark., to Birmingham, Ala., which are lower than those contemporaneously maintained on like traffic to Sheffield, Tuscumbia, and other intermediate points in Alabama, denied. Florence Chamber of Commerce v. L. & N., 122 I. C. C. 367, 370.

(vv) Authority granted to maintain on cattle, hogs, sheep, and goats, from and to certain points in Oklahoma, Louisiana, Texas, Arkansas, Kansas, and Missouri, over all interstate routes, the lowest rates over any route, and to maintain higher rates from, to, or between intermediate points, provided that rates from, to, or between the intermediate points shall not exceed the scale of rates prescribed, and in no case the lowest combination, the relief authorized not to apply to lines or routes that are more than 70 per cent circuitous. American Nat'l. Live Stock Asso. v. A., T. & S. F., 122 I. C. C. 609, 630.

(ww) Authority granted the Illinois Central R. R. to charge rates on grain and products from Utah and from points in Idaho on the Oregon Short Line and Utah Idaho Central railroads to St. Louis, Peoria, St. Paul, and Albert Lea, and points grouped therewith, and other points in related rate groups, the same as those in effect over other routes operating from and to same points, and maintain higher rates at intermediate points in instances where the Illinois Central operates to points in lower rated groups through higher rated groups; provided, that rates to intermediate points in no case are increased or exceed lowest combination or basis of rates herein prescribed, such relief not to include intermediate points as to which the haul of applicants' route is not longer than that of direct line or route between same points, or apply in instances where applicants' route between competitive points is more than 50 per cent circuitous. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 718, 719.

(xx) Authority granted to maintain rates on salt from Mine, Weeks, Avery, Anse La Butte, Barnett, and Lafayette, La., to destinations on and east of Mississippi River, including c. f. a. and southern territories, except from and to points as to which relief was authorized in 120 I. C. C. 569, same as rates contemporaneously in effect on like traffic from and to same points over competing lines, and to maintain higher rates to intermediate points; provided that authority shall not include intermediate points as to which the haul of petitioning line or route is not longer than that of direct line or route between competitive points; that rates from, to, and between intermediate points shall not be increased except as authorized, and in no case exceed lowest combination; the authority herein granted not to embrace lines which are more than 50 per cent circuitous. Fourth-Section Departures on Salt, 123 I. C. C. 73.

(yy) The manner of constructing rates afford no basis for relief from the requirements of section 4 of the act. Fourth-Section Departures on Salt, 123 I. C. I. 73, 75.

(zz) Upon further consideration, fourth-section relief granted in original report 113 I. C. C. 389, authorizing short or weak-line carriers in the Southeast to maintain rates on fertilizers between junction points on their lines and points generally in that territory the same as those contemporaneously maintained between same points by standard-line competitors, amended so as to provide that such lines may participate in competitive routes which will afford them a longer haul, at same time maintaining higher rates to and from intermediate points on their lines, and to allow them to participate as intermediary lines in competitive routes between points on standard lines. Fertilizers Between Southern Points, 123 I. C. C. 193, 194.

(3a) Upon further consideration, fourth-section relief denied Norfolk Southern R. R., on fertilizer between southern points, in connection with routes which exceeded the limits of circuity prescribed in original report 113 I. C. C. 389. In no instance has the commission made an exception as to circuity of routes which may engage in transportation under fourth-section relief and no sufficient reason was here presented for such an exception. Fertilizers Between Southern Points, 123 I. C. C. 193, 195.

(3b) Where a fourth-section application is on file with commission and pending its disposition the rates from the intermediate and farther distant points are equalized, such equalization removes protection afforded by the application, and if thereafter carriers reestablish higher rates from the intermediate than from the farther distant point a new violation of the long-and-short-haul clause of section 4 of the act is created. See 256 U. S. 408, 416. Globe Brick Co. v. P. R. R., 123 I. C. C. 498, 502.

(3c) Application for authority to continue to charge lower rates for transportation of crude phosphate rock from Florida mines to New Orleans and Gulf ports taking same rates, and to Mississippi River destinations than to intermediate destinations, granted in part. Meridian Fertilizer Factory v. A. C. L., 126 I. C. C. 478.

(3d) Applications for authority to continue to charge for transportation of fleshings from Chattanooga and other points in Tennessee, Virginia, West Virginia, North Carolina, and Kentucky, to West Williamsport, Pa., rates which are lower than rates contemporaneously maintained on like traffic from Johnson City, Tenn., and other intermediate points, denied. Keystone Glue Co. v. S. Ry., 126 I. C. C. 507.

(3e) Under Act to Regulate Commerce, § 4, as amended by Act June 18, 1910, § 8 (Comp. St. § 8566), filing of application for relief from aggregate of intermediates clause, or even order granting such relief, would not validate a rate which violated some other section of act. Patterson v. Louisville & N. R. Co., 46 Sup. Ct. 8.

(3f) Authority to continue to charge for transportation of cabbage and potatoes from points in lower Rio Grande Valley of Texas to Cincinnati, rates which are higher than rates in effect on like traffic to Chicago and Peoria, Ill., Milwaukee, Wis., Evansville, Indianapolis, Terre Haute, and Vincennes, Ind., and other more distant points without observing the long-and-short-haul provision of section 4, denied. Leonard, Crosset & Riley v. A., T. & S. F., 128 I. C. C. 225, 229.

(3g) Authority to continue to charge for transportation of sugar from Franklin, La., to Memphis, Tenn., rates which are lower than those contemporaneously maintained on like traffic to Wilmot, Ark., and other intermediate points, denied. Sugar Between Louisiana and Texas Points, 128 I. C. C. 309, 322.

(3h) Authority to continue to charge for transportation of grain products from points in the Panhandle of Texas to certain destinations in Louisiana, lower rates than contemporaneously apply from intermediate Oklahoma points, denied. Not only are Texas rates lower but combinations over such Texas points make lower through charges than are in effect from the Oklahoma points direct. Oklahoma Millers League v. A. & M., 128 I. C. C. 523, 536.

(3i) Authority to continue to charge for transportation of brass and copper ingots from Baltimore, Md., to Detroit, Mich., rates which are lower than those contemporaneously maintained from East Liberty, Pa., and other intermediate points, denied. Federal Metals Corp., v. P. R. R., 128 I. C. C. 757.

(3j) Commission authorized certain relief in connection with rates between San Francisco and other California points, on the one hand, and Portland

and East Portland, Ore., and related points, on the other, in Pacific Coast Fourth Section Applications 24 I. C. C. 34. For many years the rail carriers have competed with the water carriers not only for the port to port traffic, but for traffic originating at or destined to interior points. This has resulted in relatively low rates between the ports, the influence of which is reflected, more or less, in the rate structure throughout this general territory. CALIFORNIA OREGON APPLICATIONS. Application No. 12193 filed by the S. P. covers all commodity rates as to which relief is now sought on account of water competition. The S. P. has not secured permission of the rail carriers north of Portland to publish as joint rates the rates here requested to and from points north of Portland but, in the event the Commmission sanctions their establishment, it anticipates no difficulty in this regard. Permission is also desired to have the same rate basis made applicable to shipments originating on the Santa Fe and Pacific Electric Ry., and moving in connection with the S. P. CLASS RATES. The proposed intermediate rates are from 108 to 247% of the rates between the more distant points. The class rates seem to be reasonably compensatory. Applicants will be authorized to establish the proposed class rates, provided that the rail class rates at intermediate points shall not be increased except as authorized by the Commission, that they shall in no instance be more than 100% higher than the terminal rates and that they shall not exceed the lowest combination. The S. P. desires to cancel the proportional scales and apply in lieu thereof the 80c local scale. This would result in increasing certain class rates, but it would place the all rail class rates to and from points north, south, and east of Portland on the same relative basis. Relief will be granted which will permit the establishment of rates to and from these points constructed on the basis of the 80c scale between the ports plus the local rates beyond and relief to continue rates based on lower scales will be denied. COMMODITY RATES. There are no joint through commodity water and rail rates between points north, south or east of Portland and interior California points, but such rates are published on certain articles from San Francisco to points east of Portland in Henrys tariff I. C. C. 35. The water arbitraries used in the construction of these joint through rates bear no fixed relation to the steamer locals. The present rail rates are made on San Francisco and Portland combinations, using proportional or basing rates between these ports. Although originally related thereto, these basing rates are not equivalent to the local steamer rates. They, as increased during and subsequent to the war, have been in effect for years. The record shows that the rail carriers have always had to meet keen water competition along the Pacific coast. The rail carriers actual water competition on local rail traffic is the cost to the shipper of marine insurance, plus the expense to reach the dock at point of origin, the local steamer rate and the expense of making delivery at destination. On shipments between interior California points, on the one hand, and interior Oregon and Washington points, on the other, the additional costs of utilizing the water routes are not as great since the transfer charges at Portland and Seattle are absorbed. The Commission is of the opinion that the proposed commodity rates, except as hereinafter indicated, will cover and more than cover the additional expenses incurred in handling the traffic to which they apply. Applicants propose to maintain a minimum less than carload commodity rate of 41c per 100 pounds on traffic between these ports. This application will be denied. Less than carload traffic should move on the applicable class rates herein approved. HELD, further, the minimum carload rate between San Francisco and Portland should be not less than 32c, between San Francisco and San Pedro and Portland 50c, between San Francisco and Seattle not less than 43c, between San Francisco and Everett 46c, between Los Angeles or Los Angeles rate points and Seattle 61c, and between Los Angeles or Los Angeles rate points and Everett 64c. Under the law the all rail rates "can be no lower than necessary to meet existing competition". In the judgment of the Commission this will be accomplished if the applicants establish the proposed carload rates, subject to the minimum rates which have been indicated, and provided that (a) the port to port rates are not less than 10c higher than the rates contemporaneous-

ly maintained on like traffic by the standard steamer lines operating between the same ports; (b) that the rail rates at intermediate points shall in no instance be more than 100% higher than the rates on like traffic between the ports; (c) that the present rates at intermediate points shall not be increased, except where necessary to remove or reduce fourth section departures, and when increased for that purpose shall not exceed rates graded according to distance with relation to rates at other intermediate points at which higher rates are herein authorized; (d) that rates at the said intermediate points shall in no case exceed the lowest combination; and (e) that rates from or to inland points which may be lower than rates at intermediate points shall not be lower than the full combination on the ports. RATES BETWEEN CALIFORNIA PORTS. The Santa Fe and the S. P. desire to maintain the present terminal interstate rates between northern California ports, on the one hand, and southern California ports on the other. These rates are protected by the fourth section applications here in issue and are lower than the intermediate rates. The interstate traffic handled between these ports is relatively small. The present intrastate rates have been sanctioned by the State Commission and are the same as the present interstate rates on which fourth section relief is herein sought. The spread between the rail and water rates, both class and commodity, is great enough to satisfy the standard steamer lines. HELD, proposed class rates between the competitive points are reasonably compensatory, also that the rates at intermediate points are not unreasonable, and relief will be granted to establish and maintain rates not lower than those proposed between the said points and to maintain higher rates at intermediate points, provided the present rates at said intermediate points are not increased except as may be hereafter authorized by the Commission and that they shall in no instance be more than 100% higher than rates in effect between the ports and shall not exceed the lowest combination. HELD, further, the high point intermediate rates should not be more than 100% higher than the proposed terminal rates and in no case less than 31.5c per 100 pounds. No showing was made in justification of rates to other southern California ports such as San Diego and relief to continue them will be denied. APPLICATION NO. 12179 ON AUTOMOBILES. This requests permission to establish on automobiles from San Francisco and Oakland to Tacoma and Seattle and points taking the Seattle rates a rate of $1.27, terminal in application, which is lower than the present intermediate rates. HELD, the proposed rates will be allowed to be established, since it is shown to be reasonably compensatory and also that, if established, it will not cause any violation of other sections of the act. APPLICATION NO. 1435 on lumber. The record shows that the present intrastate lumber rates from California points have been sanctioned by the state commission. The present interstate rates are constructed on the same basis as the intrastate rates. The producing interior lumber points are thus given rates designed to place them on an equal basis in southern California markets with their competitors located in Washington, Oregon and western California. These competitors have access to lumber schooner water rates. The present lumber rates from points on these branch lines of the S. P. bear no fixed relation to the present water rates from northern points. The relief in this case is based solely on the ground of water competition. HELD, no facts in record to show that the higher rates at the intermediate points are reasonable, and the Commission is not satisfied that the applicants have sustained the burden of justifying the continuance of such higher rates. Fourth section relief in this situation will be denied. Pacific Coast Fourth Section Applications, 129 I. C. C. 3.

(3k) To obtain relief under the fourth section the applicant must demonstrate that the intermediate rates proposed are not unreasonably high; that actual water competition exists; and that the proposed terminal rates are "reasonably compensatory". See 74 I. C. C. 48, 71. Pacific coast fourth section applications, 129 I. C. C. 3, 15.

(31) By petition for and on behalf of carriers parties to the official, southern and western classifications ask in substance to be relieved from observance of the fourth section of the act in making changes in classification ratings, rules and regulations. Fourth section departures resulting from changes in

classification may be either of the long and short haul or the aggregate of intermediates type. They may occur on local traffic within a classification territory, or on inter-territorial traffic between points where joint through rates are in effect. The act confers upon the Commission authority to grant carriers relief from the provisions of the fourth section only "in special cases, after investigation". The Commission is here asked to relieve carriers entirely from observing the fourth section in making classification changes for the sole reason that, under the existing rate structure and with several independent classifications effective, fourth section departures can be avoided only with considerable difficulty, if at all. There is no contention that the departures which result from classification changes are of such character as reasonably to justify lower charges for longer than for shorter distances as defined by the statute. On the contrary, the petitioners practically concede that investigation of the individual departures would disclose in nearly all cases a complete absence of justification. Under the circumstances this petition does not present a "special case" for relief as the Commission interprets the law. What is sought rather is a complete repeal of the fourth section in so far as it relates to classification changes; and this the Commission has no power to effect. HELD, the Commission is not convinced that the relief prayed is necessary or desirable. Fourth Section Departures, 129 I. C. C. 187.

(3m) Fourth section application No. 12645 filed by the L. & N. and M. P., authority is asked to establish and maintain rates on coal, in carloads, from mines on the L. & N. in western Kentucky to Helena, Ark., lower than contemporaneously maintained to intermediate points. Applicants seek authority to establish a rate of $2.39 to Helena from western Kentucky mines over the L. & N. through Memphis, Tenn., in connection with the M. P., average distance 353 miles. Relief from the long and short haul provision of the fourth section is asked primarily on the ground of meeting the rates made by carriers operating east of the Mississippi through a lower rated territory. The rate that applicants desire to establish applies from the points of origin under consideration over the L. & N. through Memphis in connection with the Y. & M. V. by way of a Mississippi river transfer at Helena, as no bridge is located at that point. HELD, applicants have not submitted sufficient justification for the relief prayed and the application will be denied. FOURTH SECTION APPLICATION 11694. This application was filed by the L. & N. and the portion thereof under consideration in this proceeding asks authority to continue rates on coal, in carloads, from mines on the L. & N. in western Kentucky to points in Mississippi and Tennessee without observing the long and short haul provision of the fourth section of the act. The destinations to which applicant desires to continue lower rates than to intermediate points are located on either the I. C. or Y. & M. V. HELD, the revision of rates pursuant to Alabama Mining Institute v. I. C. R. R. 109 I. C. C. 749 and Coal from Illinois, Kentucky and Alabama, 128 I. C. C. 113 will obviate the necessity of this relief. HELD, relief denied. FOURTH SECTION APPLICATIONS 3236 and 3237. By 3236 applicants, I. C. and Y. & M. V. ask, among other things, for authority to continue rates on coke, carloads, from points on the Frisco in Alabama and Tennessee to points on their lines that are lower than those maintained to intermediate points, and 3237 from points on the Southern and Northern Alabama Ry. These applications are based upon the desire of applicants to meet over their longer line or route, competitive conditions created by the L. & N., Southern, A. G. S. and M. & O., with their direct line, and also via those lines in connection with the A. & V., N. O. & N. E., M. C., N. O. G. N. and F. & G. They are further based upon the desire of applicants to meet lower rates fixed by competition of water carriers via barges from Pittsburgh and Pennsylvania coal fields by way of the Ohio, Mississippi and Yazoo rivers to various points on applicants lines in the states named. HELD, applicants will be permitted to continue rates on coke, carloads, to points on their own lines from producing points on the Frisco in Alabama and Tennessee, and on the Southern Ry., and N. A. Ry., in Alabama, Kentucky and Tennessee, the same as the rates of the shorter lines in cases where the routes in connection with applicants lines are not less than 15% longer than the shorter

or more direct lines, and to maintain higher rates to intermediate points, provided the authority granted shall not include intermediate points as to which the haul of the applicants lines or routes are not longer than that of the direct line or route from and to the competitive points. Coal and coke from Ky., Ala., and Tenn., 129 I. C. C. 197.

(3n) Section four of the act, as amended by the transportation act, provides that in exercising the authority to relieve carriers in special cases from the provisions of that section "the commission shall not permit the establishment of any charge to or from the more distant point that is not reasonably compensatory for the service performed." Western Cement Rates, 132 I. C. C. 273, 274.

(3o) Fourth-section relief to establish or continue class and commodity rates between San Francisco and other California points and Portland and other Oregon, Washington, and Idaho points lower than at intermediate points granted, provided that relief to continue class rates based on lower scales than the 80-cent scale between ports plus local rates beyond, will be denied, and that in establishing proposed commodity rates subject to minimum rates indicated the port-to-port rates shall not be less than 10 cents higher than contemporaneous rates on standard steamer lines operating between same ports; that rail rates at intermediate points shall not be more than 100 per cent higher than contemporaneous rates between ports; that present rates at intermediate points shall not be increased except as provided and shall not exceed lowest combination; and that rates from or to inland points which may be lower than rates at intermediate points shall not be lower than full combination on ports. Pacific Coast Fourth Section Applications, 129 I. C. C. 3.

(3p) Relief granted Southern Pacific and A., T. & S. F. to establish or continue class rates between northern and southern California ports not lower than those proposed, and to maintain higher rates at intermediate points provided present rates at intermediate points are not increased except as authorized, and shall not exceed by more than 100 per cent rates contemporaneously in effect between the ports or the lowest combination; and to continue or establish commodity rates between San Francisco and Bay points, on one hand, and Los Angeles or Los Angeles rate points, on other, lower than contemporaneous rates at intermediate points but not to exceed lowest combination, subject to condition that high-point intermediate rates shall not be more than 100 per cent higher than proposed terminal rates or be less than minimum rates proposed. Relief to continue rates to other southern California ports denied. Pacific Coast Fourth Section Applications, 129 I. C. C. 3, 19, 22.

(3q) Authority to establish on automobiles from San Francisco and Oakland, Calif., to Tacoma and Seattle, Wash., and points taking Seattle rates, a rate lower than to intermediate points, granted. Rate proposed is shown to be reasonably compensatory; if established will not violate the act; and carriers are of opinion that spread between all-rail and all-water rates effected thereby is sufficient to hold a fair share of traffic to all-rail lines. Pacific Coast Fourth Section Applications, 129 I. C. C. 3, 22.

(3r) Authority to continue terminal lumber rates from Oregon, Nevada, and California points to destinations in southern California which are lower than rates to intermediate points, denied. Relief is based solely on gorund of market competition, it being alleged that lower rates are necessary to enable southern California producers to market their lumber in competition with lumber from Oregon and northern California arriving by water. However record fails to show that higher rates at intermediate points are reasonable and applicants have failed to sustain burden of justifying continuance thereof. Pacific Coast Fourth Section Applications, 129 I. C. C. 3, 22, 23.

(3s) Authority to continue rates on broken, crushed, or ground limestone from Colrock and Margerum, Ala., to destinations in southern territory, without observing long-and-short-haul provision of section 4 of the act, denied. Nearly all rates involved are published subject to rule 77 of Tariff Circular 18-A as to intermediate points, which is a substantial compliance with the fourth section; scale rates herein prescribed will cure most of other departures; and

no justification for any unprotected departures which may exist was offered. Colbert Limerock Asphalt Co. v. A. C., 129 I. C. C. 177, 185.

(3t) Petition for amendment of fourth-section order No. 144, general No. 5, so as to permit changes in classification ratings, rules, and regulations without observing the fourth section of the act, denied, except that temporary relief previously granted in that order should be continued until rates prescribed in Southern Class Rate Investigation, 100 I. C. C. 513; 109 I. C. C. 300; 113 I. C. C. 200, have become established. Petitioners do not contend that departures which result from classification changes justify lower charges for longer than for shorter distances as defined by the statute, but on contrary concede that investigation of individual departures would disclose a complete absence of justification. Moreover, petition does not present a "special case" for relief as provided by section 4, but a complete repeal of that section in so far as it relates to classification changes. This the commission has no power to effect. Fourth Section Departures, 129 I. C. C. 187.

(3u) Fourth-section departures resulting from changes in classification may be either of long-and-short-haul or aggregate-of-intermediates type. They may occur on local traffic within a classification territory, or on interterritorial traffic between points where joint through rates are in effect. Fourth Section Departures, 129 I. C. C. 187, 189.

(3v) Where departures from long-and-short-haul clause of section 4 exist in one class rate and not in another, as in second-class but not in third-class rate, and departure in second-class rate is protected, then in accordance with amendments to order No. 144, general No. 5, the new departure which would result from adding another commodity to group of articles subject to second-class rates is likewise protected. If departure in second-class rate is not protected there is a violation of fourth section whenever the second-class rate, higher to the intermediate point than to the more distant point is charged on any commodity. In such a case, carrier should not urge that it requires protection with respect to commodities added to second class group while it has none and seeks none as to the hundreds of commodities that are subject to that rate. Proper method of correcting such a situation is to remove the departure in second-class rate itself. Fourth Section Departures, 129 I. C. C. 187, 192.

(3w) The interstate commerce act confers upon the commission authority to grant carriers relief from provisions of the fourth section only "in special cases after investigation." Fourth Section Departures, 129 I. C. C. 187, 193.

(3x) It does not seem unreasonable to require a carrier which maintains fourth-section departures under protection of an order to keep in touch with changes in classification governing its class rates between same points and to revise its commodity rates comformably. Fourth Section Departures, 129 I. C. C. 187, 195.

(3y) Authority to establish and maintain rates on coal from mines on the Louisville & Nashville in western Kentucky to Helena, Ark., in connection with the Missouri Pacific at Memphis, Tenn., lower than to intermediate points in Arkansas, on ground of meeting rates of carriers operating east of the Mississippi through a lower-rated territory, denied, insufficient evidence being submitted to justify relief prayed for. Coal and Coke from Kentucky, Alabama, and Tennessee, 129 I. C. C. 197.

(3z) Authority to continue rates on coal from mines on the Louisville & Nashville in western Kentucky to points in Mississippi and Tennessee, lower than to intermediate points, denied. Revision of rates on coal from mines in Alabama, western Kentucky, and southern Illinois to Mississippi Valley destinations, pursuant to decisions in 109 I. C. C. 740; 128 I. C. C. 113, will obviate necessity for granting relief sought. Coal and Coke from Kentucky, Alabama, and Tennessee, 129 I. C. C. 197, 199, 201.

(4a) Authority to continue rates on coke from points on St. Louis-San Francisco in Alabama and Tennessee and on Southern Railway and Northern Alabama Railway in Alabama, Kentucky, and Tennessee, the same as rates of shorter lines, in cases where routes involved are not less than 15 per cent longer than more direct lines, and to

maintain higher rates to intermediate points, granted, provided that such authority shall not include intermediate points as to which the haul of the applicants' lines is not longer than that of direct route between competitive points, and subject to condition that present rates at intermediate points shall not be increased except as authorized and shall in no case exceed the lowest combination. Coal and Coke from Kentucky, Alabama, and Tennessee, 129 I. C. C. 197, 201, 202.

(4b) Upon further consideration in original report 113 I. C. C. 389, fourth-section order No. 9346, amended so as to authorize carriers to maintain rates on fertilizers and materials within southern territory from and to intermediate points on circuitous routes in excess of those under distance scale prescribed in original report, provided such rates shall not exceed the scale basis by more than 15 cents per ton on and after date designated herein. Fertilizers Between Southern Points, 129 I. C. C. 215.

(4c) Upon further consideration in original report 113 I. C. C. 389, petition of Carolina Railroad seeking authority to maintain same rates on fertilizers and materials to Snow Hill, N. C., as are contemporaneously in effect to Maury, N. C., in order to meet competition at latter point, and to maintain rates to intermediate stations on basis prescribed in original report, denied. Fertilizers Between Southern Points, 129 I. C. C. 215, 216, 217.

(4d) Rates on lumber from points in Maine to destinations in New England, found reasonable in 43 I. C. C. 641, but reduced by carriers to allow lumber interests to compete with Pacific coast shipments via Panama Canal, were subsequently increased to former level. Upon contention that such increase was in violation of section 4 (2) of the act, FOUND: Purpose of section 4 (2) is to prevent carriers from increasing rates after water competition has been eliminated by reduced rates. Here, voluntary reduction was not to destroy competition but to preserve it, but since it has continued undiminished, restoration of rates to former basis does not fall within prohibition contained in that section. See 249 U. S. 557. Moreover, in 85 I. C. C. 270, commission stated it would not adjust rates from competing producing territories in order to equalize manufacturing costs. Woodstock Lbr. Co. v. B. & A., 129 I. C. C. 255.

(4e) Rates from various eastern points to Dallas and Fort Worth, Tex., are same as those to Deming, N. Mex., a more distant point, as well as to Los Angeles and other California ports. Rates not higher than rates to the coast necessarily are maintained to Deming in order to avoid unauthorized fourth-section departures; rates to Deming are for same reason observed as maximum at interior points such as Texas common points. Similar blanket applications frequently occur with respect to transcontinental rates and such rates are not necessarily determinative of reasonableness of rates to intermediate points. Nor does it follow that rates to Deming should be scaled back to intermediate points, particularly where showing is not sufficient to warrant such an adjustment. Apex Co. v. A. & V., 129 I. C. C. 283, 287, 288.

(4f) L. c. l. joint commodity rate on cotton piece goods from certain points in Connecticut, Massachusetts, and Rhode Island to Lynchburg, Va., which exceeds contemporaneous class rate to same and more distant Virginia destinations, found not unreasonable or otherwise unlawful, following 113 I. C. C. 270. Fourth-section departures were protected by appropriate applications. Traffic Bureau v. N. Y., N. H. & H., 129 I. C. C. 309.

(4g) Authority granted Rock Island lines and their interested connections to establish and maintain rates on imported iron and steel articles from Galveston and Houston, Tex., to Amarillo, Tex., over their route through Oklahoma, the same as rates contemporaneously in effect on like traffic over direct lines from same ports to Amarillo, but not lower than present rates of direct lines, and to establish and maintain higher rates to Oklahoma stations on their lines on basis herein found reasonable, subject to equidistant provision of section 4 of the act. Import Iron and Steel Articles, 129 I. C. C. 350, 358.

(4h) Motion for further hearing on ground of two alleged errors in original report, 63 I. C. C. 6, viz, statement that

departures from aggregate-of-intermediates provision were protected by applications, heard but not determined, and statement that rates found unreasonable appeared not unduly high, denied. Question of whether departures were protected by applications was res adjudicata not because of commission's decision but that of Supreme Court in 269 U. S. 1. Even if question has not been res adjudicata and commission concluded that departures were not protected, complainants would not be entitled to reparation for violation of fourth section, since there was no proof that they suffered any special damage, and no such proof was submitted at further hearing. Hudson Mule Co. v. L. & N., 129 I. C. C. 365, 368, 369.

(4i) Fourth-section relief sought in connection with readjustment of rates on lime in southern territory, denied, except that Gulf & Ship Island is granted authority to continue to charge higher rates on lime to local stations on its line than to its junctions with trunk lines. That carrier has been recognized generally as a weak line; its rates are generally higher than those of trunk lines; and with respect to other commodities it has been permitted to meet rates to its direct-line connections at junction points and to maintain higher rates to intermediate points where similar competition is not encountered. Lime Between Southern Points, 129 I. C. C. 635.

§4a. Short Lines.

(a) Based upon light traffic density and unfavorable operating and financial conditions, certain independent short lines in southern territory granted authority to continue to charge lower rates on lumber and other forest products to trunk line and New England territories from junction points with trunk-line connections than from intermediate points on their lines; provided rates from such intermediate stations shall in no case exceed lowest combination, and further provided that differences between rates from more distant junction points on the one hand, and intermediate points on short lines on the other, shall not be increased. North Carolina Pine Asso. v. A. C. L., 107 I. C. C. 190.

III. APPLICATION OF SECTION 4 TO RATES.

§4½. In General.

(a) The unauthorized establishment of rates or charges to or from points within lighterage or delivery limits of New York Harbor on a basis higher than that contemporaneously maintained to or from more distant points east thereof on routes which pass through the harbor, so long as such points are continued within delivery limits of New York Harbor, would be considered as in contravention of the long-and-short-haul rule of section 4 of the act. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 545.

(b) Section 4 of the act does not prohibit charging of same rate for a shorter as for a longer distance. Birmingham Traffic Bureau v. St. L.-S. F., 118 I. C. C. 756, 757.

(c) The Commission has consistently held that the publication of rates subject to rule 77 constitutes a substantial compliance with the long-and-short-haul provision of the fourth-section, and affords an adequate basis for an award of reparation on shipments which moved to the intermediate point at charges higher than those to the farther distant point. Burlington Shippers Asso. v. C. B. & Q. R. R., 126 I. C. C. 179, 181.

(d) Compliance with carriers' request that differentials should be applied only over the short-line routes would deprive shippers of the natural advantage of the lower-rate routes through central territory; would result in many rates as high as the full combinations on the gateways and give rise to further long-and-short-haul departures and unwarranted increases in the rates prescribed. Southern Class Rate Investigation, 128 I. C. C. 567, 580.

(e) Rate on fresh peaches from Palisade, Colo., to Syracuse, N. Y., found not unreasonable or otherwise unlawful as compared with those from Georgia points to Syracuse or from California points. Distance considered, rate attacked is on a relatively lower basis than those from Georgia, and as it is blanketed from Colorado to the Pacific coast, the alleged violation of long-and-short-haul provision of section 4 is without merit. Caruso, Rinella, Battaglia Co., v. D. & R. G. W., 128 I. C. C. 687.

(f) The Commission has frequently found that rates in violation of the long and short haul provision of the fourth section were prima facie unreasonable. Forcum James Lumber & Cooperage Co., v. I. C. R. R., 132 I. C. C. 293, 295.

§4¾. Circuitous Routes.

See Advanced Rates §2½ (g); Routing and Misrouting §1½ (j).

(a) Upon applications of the C., M. & St. P., Illinois Central, St. L.-S. F., Union Pacific, C., R. I. & P., Missouri Pacific, A., T. & S. F., and Kansas City Southern railways, relief from long-and-short-haul provision of section 4 of the act granted as to class and commodity rates between western trunk-line territory and points west of Missouri River. Class and Commodity Rates between Western Points, 104 I. C. C. 578.

(b) Where it appears that routes of applicant carriers are unduly circuitous, relief from long-and-short-haul clause of section 4 of the act will be denied. See 77 I. C. C. 473, 526, and cases therein cited; also 49 I. C. C. 40; 47 I. C. C. 576. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 585.

(c) Contention of carrier that where it is not asking for relief on account of circuity of its line, the equidistant provision of fourth section of the act is not applicable and that reductions should not be required at intermediate points to conform to this provision, sustained. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 589.

(d) Where routes of a carrier seeking relief from long-and-short-haul-provision of section 4 of the act are circuitous via some gateways as compared with its own routes via other gateways, it must appear that lower rates to more distant points on circuitous routes are reasonably compensatory before relief will be granted. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 591.

(e) The principle embodied in equidistant provision of section 4 of the act may be applied by commission, at its discretion, to cases in which it is not in terms applicable. See 64 I. C. C. 26, 30. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 591.

(f) If relief is granted from long-and-short-haul provision of section 4 of the act there must be some reasonable limitation upon degree of circuity in order to conform to requirement of the law that lower rates at more distant points must be reasonably compensatory. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 592.

(g) The commission is authorized under section 4 of the act to grant relief from operation thereof "in special cases." The circuity of a rail line or route has long been recognized as a special case in which relief may properly be granted if circumstances as a whole warrant that action. In practice commission has generally limited relief to routes which are not less than 15 per cent circuitous, but this has not been regarded as an inflexible rule. See 24 I. C. C. 192; 61 I. C. C. 700. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 595.

(h) The equidistant rule of section 4 of the act, though formerly also observed by commission as an administrative practice, is now an integral part of the law, and its application is mandatory where relief is sought because of circuity, regardless of methods of rate making. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 595.

(i) In cases where commission prescribes distance scales carriers are not required to establish over circuitous routes rates found reasonable for application over rate-making routes. They may do so if long-and-short-haul provision of section 4 of the act is observed or if relief therefrom is granted. Grain and Products to Mississippi Valley, 107 I. C. C. 167, 169.

(j) The unnecessary hauling of traffic over unduly circuitous routes at same rates that are applicable over direct routes results in wasteful transportation. Brick and Clay Products in the South, 113 I. C. C. 380, 381, 382.

(k) Authority granted to maintain, via routes which are not more than 50 per cent circuitous, on brick and other clay products from Clearfield, Pa., and points grouped therewith, to points in eastern trunk-line and New England territories, rates which are lower than those contemporaneously in effect on like traffic from Johnsonburg and Ridgeway, Pa., and points grouped therewith and intermediate thereto, said authority not to include intermediate points as to which the haul of petitioning line or route is not longer than that of direct line or route between competitive points, the rates from intermediate points to in no case exceed lowest combination. Alumina Shale Brick Co. v. B. & O., 113 I. C. C. 496, 499, 500.

(l) Carriers forming the circuitous

routes from points in the Scranton and Williamsport, Pa., groups to central and western trunk line territories proposed to increase their class and commodity rates from points in these groups to points in the destination territories to the basis of the rates in effect from higher rated intermediate groups. Fourth section application also set for hearing. HELD: Not justified, carriers permitted to meet the rates of the short line without applying this basis to intermediate points. Class and commodity rates from Pennsylvania, 115 I. C. C. 331.

(m) Fourth section relief could not be granted on the ground of circuity of route, inasmuch as the fourth section specifically precludes the granting of relief on that ground when the distance to the intermediate point is not greater than to the lower rated competitive point beyond. Keokuk Shippers Assn. v. A. T. & S. F. Ry., 118 I. C. C. 683, 685.

(n) Proposal of carriers forming circuitous routes from points in Scranton and Williamsport, Pa., groups to increase their class and commodity rates on traffic moving to c. f. a. and western trunk-line territories to basis of rates in effect from higher-rated intermediate groups, found not justified. Class and Commodity Rates from Pennsylvania, 115 I. C. C. 331.

(o) Authority granted carriers to meet via their circuitous lines or routes the class and commodity rates contemporaneously maintained via direct lines or routes from points in the Scranton and Williamsport groups to points in c. f. a. and western trunk-line territories and to maintain higher rates at intermediate points, such authority not to include intermediate points as to which the haul of petitioning line or route is not longer than that of direct line or route from and to competitive points, the present rates at intermediate points in no case to exceed lowest combination, the relief here granted to apply to routes 70 per cent circuitous where direct route does not exceed 150 miles; 50 per cent circuitous where the direct route exceeds 150 but not 1,000 miles; and 33⅓ per cent circuitous where direct route exceeds 1,000 miles. Class and Commodity Rates from Pennsylvania, 115 I. C. C. 331.

(p) If unusual or circuitous movement is desired the necessary instructions therefor should appear on bills of lading as it would place an undue burden on carriers to require them to search tariffs for all possible cheaper routes in absence of routing restrictions. Miller v. C. of G., 115 I. C. C. 518, 520.

(q) Authority to charge on sugar from New Orleans, higher rates to Keokuk and Burlington, Iowa, and other intermediate points than to Chicago over the C. B. & Q., denied, and so much of previous order as permits charging of such higher rates, vacated. Relief can not be granted on ground of circuity of route because Iowa points are less distant than Chicago since section 4 of the act specifically precludes granting of relief on that ground when distance to the intermediate point is not greater than to the lower-rated competitive point beyond. Moreover, carrier competition is not such as to warrant relief on grounds other than circuity of route. See 88 I. C. C. 46. Keokuk Shippers' Asso. v. A., T. & S. F., 118 I. C. C. 683.

(r) Authority granted carriers to apply under distance rates herein prescribed on salt from Louisiana mines to Mississippi destinations over all routes the lowest rate available over any route from and to said points and to maintain higher rates from and to intermediate points; provided that rates from and to the intermediate points shall in no case exceed the lowest combination, and that the relief granted shall not include routes more than 50 per cent longer than the direct route from and to the competitive points. Mississippi R. R. Comm. v. A. & V., 120 I. C. C. 569.

(s) Application for authority to establish rates over circuitous lines which are not less than 15 per cent nor more than 70 per cent longer than direct line or route between competitive points, on plaster and gypsum products from points in Iowa, Michigan, and Ohio, to destinations in Illinois, Indiana, Wisconsin, and on west bank of Mississippi River, same as rates contemporaneously maintained on like traffic by direct lines or routes from and to same points, and to maintain higher rates at intermediate points, granted, relief authorized not to include intermediate points as to which the haul of circuitous line or route is not longer than that of direct line or route between competitive points; rates at intermediate points not to exceed distance scales herein prescribed and in no case the lowest combination. Plaster and Gypsum Products, 122 I. C. C. 747.

(t) Applicable rate on apples from White Salmon, Wash., to Phoenix, Ariz.,

moving by way of a circuitous route found unreasonable to extent it exceeded lower rate contemporaneously in effect over a more direct route. Shipper here originally directed routing via direct route, but carrier's agent refused to execute the bill of lading until it was changed to accord carrier furnishing refrigerator equipment a road haul. In this territory it is the practice of lines forming indirect routes to meet the rates in effect over short routes and rates lower than those here charged were in effect at time of movement between various points over various indirect routes for comparable distances. Wuille & Co v. S. P. & S., 123 I. C. C. 190.

(u) It is not commission's province to require circuitous or more expensive routes to meet rates of shorter or less expensive routes. However, commission may in fixing rates by any route, give consideration to rates of other routes and attempt to devise an adjustment which on the whole will provide reasonable rates and at same time, as nearly as may be, permit various routes to engage in the traffic where they so desire. Consolidated Southwestern Cases, 123 I. C. C. 203, 374.

(v) Carriers having circuitous routes authorized to establish and maintain rates on cement from Ada, Okla., Portland and Concrete, Colo., Bonner Springs, Kans., Sugar Creek, Mo., and points in the Kansas gas belt, to competitive points in Texas, the same as those contemporaneously in effect on like traffic over short lines from and to same points, and to maintain higher rates at intermediate points, provided, that rates at intermediate points shall not exceed distance rates herein prescribed and in no case the lowest combination; authority herein granted not to include intermediate points as to which haul of carriers having circuitous routes is not longer than that of direct lines or routes between competitive points. Oklahoma Portland Cement Co. v. D. & R. G. W., 128 I. C. C. 63, 86.

(w) Where a circuitous route is permitted to meet a short-line rate, latter rate exists in any event over the short route, and no locality or shipper is deprived of the benefit of location if longer routes are permitted to meet this competition and share in the traffic. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 386.

(x) In the original report 48 I. C. C. 201 maximum rates were prescribed for the interstate transportation of cement within western trunk line territory, and between points in western trunk line territory and certain other territories adjacent thereto, including trans-Missouri territory and southwestern Missouri. The rates constructed over short or direct lines or routes on the basis prescribed generally conform to the requirements of section four of the act. By fourth section order No. 7260 the circuitous routes were granted relief to meet the rates of the direct routes. This order was modified from time to time and, in 69 I. C. C. 644 it authorized respondent carriers having circuitous routes between points of production in the territory considered and common points or key points to apply over their routes between such points rates on cement the same as those in effect between the same points, over the short lines, and to maintain higher rates at intermediate points not to exceed rates constructed on the basis prescribed. No limitations were placed on the degree of circuity of the routes which might avail themselves of the relief granted in the order. The rates published by the carriers under order 7260 are generally unrestricted as to routing and are applicable over routes which in some instances are so extremely circuitous as to make it doubtful whether such rates are reasonably compensatory for the service performed. HELD, fourth section order 7260 will be amended so that the relief authorized therein shall not apply (1) where the short line is 150 miles or less and the longer line or route is more than 70% circuitous; (2) where the short line exceeds 150 miles in length and the longer line or route is more than 50% circuitous, provided, however, that where the short line exceeds 150 miles and the longer line or route does not exceed 255 miles, relief will apply to such longer line or route even though the said longer line or route is more than 50% circuitous. Western Cement Rates, 132 I. C. C. 273.

§5. Intermediate Points.

See Infra §6; Through Routes and Joint Rates §21.

(a) Bowling Green, Ky.: Proposal to cancel commodity rate on clean rice from New Orleans to Bowling Green, thereby making effective by application of an in-

termediate rule, higher c. l. rate from New Orleans to Louisville, to which Bowling Green is intermediate, and which will remove departures from long-and-short-haul provision of section 4 of the act, found justified. Rice from New Orleans, 104 I. C. C. 333, 336.

(b) Applicable rate on crushed stone from Gary, Ill., to Kankakee and Stillwell, Ind., found in violation of long-and-short-haul provision of section 4 of the act in that it exceeded rate contemporaneously in effect to La Porte and Michigan City, Ind., to which Kankakee and Stillwell are intermediate. Taylor v. N. Y., C. & St. L., 109 I. C. C. 441.

(c) Chattanooga and other Tennessee points: Rates on imported fertilizer materials from Charleston, S. C., and Savannah, Ga., to Chattanooga, McCarthy, and certain other points found to contravene the long-and-short-haul provision of section 4 of the act. These rates were unrestricted as to routing, and shipments could move through Knoxville at a less rate than shippers at Knoxville must pay. Knoxville Traffic Bureau v. A. C. L., 109 I. C. C. 705, 706.

(d) Rate on bulk corn from Jefferson, S. Dak., to Fowler, Colo., found applicable, but unreasonable to extent it exceeded a lower rate contemporaneously in effect to Trinidad, a more distant point, to which Fowler is directly intermediate. Tariff carrying lower rate contained in intermediate rule under provisions of which rates apply to intermediate points only when they are not named in the tariff. Fowler was named in the tariff, but not in item carrying rates on this commodity between points named, consequently the Trinidad rate was not applicable to Fowler. See 36 I. C. C. 523 and 45 I. C. C. 183. Later carriers provided by addition of a note to the rule for application of Trinidad rate to Fowler and other points; thus the situation presented clearly raises a presumption of unreasonableness, which carriers made no attempt to meet. Reparation awarded. Summit Grain Co. v. C., M. & St. P., 109 I. C. C. 763.

(e) Complainant attacked combination rate charged on two cars of ground limestone shipped on Nov. 16, 1922, and Jan. 12, 1923, from Cartersville, Ga., to Cuyahoga Falls, O., as unjust, unreasonable and in violation of the fourth section. One shipment moved L. & N., to Cincinnati, O., Erie to Akron, O., Pennsylvania beyond. The other moved W. & A., to Chattanooga, Tenn., C. N. O. & T. P. to Cincinnati, Erie to Akron and Pennsylvania beyond, charged $2.52 to Cincinnati and $3.50 beyond. Cuyahoga Falls is 33 miles south of Cleveland and intermediate to that point. Rate to Cleveland at time of movement was $4.79. Complainant requested the Cleveland basis of rates on Nov. 23, 1922. On Feb. 5, 1923, the rate was made the same and on Sept. 15, 1923, the rates to both Cuyahoga Falls and Cleveland were reduced to $4.77. HELD: Rate attacked unreasonable to extent it exceeded $4.79, reparation awarded. Thompson Weinman & Co. v. W. &. A. R. R., 112 I. C. C. 395.

(f) Complainant attacked combination rate charged on four cars of horses and mules from National Stock Yards, Ill., to Philadelphia, Miss., between Sept. 8 and Nov. 9, 1921, as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. National Stock Yards is within the switching limits of East St. Louis, Ill. Philadelphia is a local point on the G. M. & N. 33.6 miles north of Newton, Miss., and 47.5 miles northwest of Meridian, Miss. Shipments moved M. & O. to Jackson, Miss., thence G. M. & N. 472 miles. Over this route Philadelphia is intermediate to both Newton and Meridian. Charged combination on Mathison, Miss. Joint rates of $140 and $144.50 were maintained to Meridian and Newton over the route through Philadelphia authorized under fourth section order 7026. HELD: Rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Dees v. M. & O. R. R., 112 I. C. C. 397.

(g) Complainant attacked commodity rates charged on low grade book paper, carloads, from Spring Grove, Pa., to Nashville, Tenn., as illegal, unreasonable, unduly prejudicial and in violation of the fourth section. Spring Grove is on the Pennsylvania and the W. M. Shipments moved W. M., to Hagerstown, Md., N. & W., to Bristol, Tenn., and Southern either to Harriman, Tenn., and T. C., beyond, or to Chattanooga, Tenn., and N. C. & St. L., beyond, hauls of 805 and 850 miles. Until Nov. 28, 1921 the rates to Nashville were the same as, or lower than, those to Memphis, but since that date they have been higher. Over the routes of movement Nashville is intermediate to Memphis on traffic from Spring Grove and prior to July 15, 1925,

the rate over the N. C. & St. L., contravened the fourth section. On that date the N. C. & St. L., withdrew its participation in the rate to Nashville over the routes of movement, thus removing the violation in connection with that carrier. The departure over the T. C., was and is authorized by fourth section order 8680. HELD: Rate attacked unreasonable to extent it exceeded 65.5c prior to July 1, 1922, and 59c on and after that date, reparation awarded. Clements Paper Co. v. T. C. Ry., 112 I. C. C. 411.

(h) Complainant attacked combination rate charged on two cars of crude ground sulphur, shipped Jan. 19 and Feb. 17, 1923, from Freeport, Tex., to Elyria, O., as unreasonable and in violation of section 4. Charged 71.5c made up of 50.5c to Cincinnati, O., sixth class 21c beyond. Elyria is about 17 miles south of Lorain, O., over B. & O. and 25 miles west of Cleveland, O. When shipments moved a rate of 57.5c was applicable to Cleveland, Elyria being intermediate. That rate was established April 1, 1923. HELD: Rate attacked unreasonable to extent it exceeded 57.5c, reparation awarded. Stauffer Chemical Co. v. H. & B. V. Ry., 112 I. C. C. 495.

(i) Complainant attacked combination rate charged on two cars of fresh peaches, in baskets, shipped in August and Sept., 1923, from Emmett, Ida., to Miami, Fla., as unjust, unreasonable, unjustly discriminatory, unduly preferential and in violation of the fourth section. Shipment moved as routed, O. S. L., to Granger, Wyo., U. P., to Kansas City, Mo., Frisco to Birmingham, Ala., Southern to Macon, Ga., G. S. & F., to Jacksonville, Fla., F. E. C., beyond, 3,189 miles charged $3.37 made up of $1.44 to Cairo, Ill., 70c to Jacksonville and $1.23 beyond. Contemporaneously a joint commodity rate of $1.875 was named on fresh peaches, carloads, to Miami from Oregon and Washington. Shipments were in baskets, rate sought not named on shipments in baskets but only in boxes, barrels or crates, applicable rate 50c higher or $2.815. Emmett is intermediate but was protected by unheard fourth section application, rate subsequently being established from Emmett. HELD: rate attacked unreasonable to extent it exceeded $2.815, reparation awarded. Drake Produce Co. v. O. S. L. R. R., 112 I. C. C. 551.

(jk) Complainant attacked joint commodity rate of 66.5c charged on six shipments of cotton piece goods, made between Nov. 9, 1923, and Jan. 31, 1924, from Norwich, Conn., to Canton, Mass., to Lynchburg, W. Va., as unjust, unreasonable, unjustly discriminatory and unduly prejudicial as compared with the rate of 53.5c from the same points to Montview, Va., a farther distant point. Shipments moved over New Haven and Pennsylvania to Potomac Yard, Va., thence Southern. Cotton piece goods are rated fourth class under the governing classification. Fourth class rate from Norwich and Canton to Lynchburg is 53.5c. Fourth class rate to Montview was 53.5c and was applicable as there was no commodity rate published to that point. A higher basis of rates generally applies on cotton piece goods in official territory than the rate attacked. The rate attacked is not out of line with the level of rates on cotton piece goods from Boston to Virginia territory. The fourth section departure should be removed at once. No substantial evidence was introduced with respect to unjust discrimination or undue prejudice and no damage is shown because of the fourth section violation. HELD: Rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Lynchburg Chamber of Commerce v. N. Y. N. H. & H. R. R., 113 I. C. C. 270.

(l) Complainant attacked fourth class rate charged on a less carload of malleable link belting from Indianapolis, Ind., to Algoma, Ore., on Dec. 20, 1919, as unjust, unreasonable, illegal, and in violation of the fourth section. Charged fourth class rate of $2.69, reparation being sought to rate of $2.065 to Modoc Point, Ore., 9.2 miles north of Algoma on the same railroad. Fourth section departure was protected by 7316, 74 I. C. C. 733. HELD: Rate of $2.065 applicable, but not unreasonable, reparation awarded. Algoma Lumber Co. v. Director General, 113 I. C. C. 311.

(m) Rate on printing paper other than newsprint from Spring Grove, Pa., to Nashville higher than on like traffic to Memphis, a farther distant point to which Nashville is intermediate over route of movement, found to contravene the long-and-short-haul provision of section 4 of the act. Clements Paper Co. v. T. C., 112 I. C. C. 411, 415, 416.

(n) The establishment of a lower rate from a more distant point subject to rule 77 of Tariff Circular 18-A is tantamount to an admission that a higher rate

from an intermediate point is unreasonable, and when rates are so established shippers at intermediate points have a lawful right to a rate no higher than that from the more distant point. Drake Produce Co. v. O. S. L., 112 I. C. C. 551, 552.

(o) Joint commodity rate on cotton piece goods from Norwich, Conn., and Canton, Mass., to Lynchburg, Va., in excess of class rate contemporaneously maintained to Montview, Va., a farther distant point, unprotected by an appropriate application, found to violate long-and-short-haul clause of section 4 of the act. Lynchburg Chamber of Commerce v. N. Y., N. H. & H., 113 I. C. C. 270, 271.

(p) Rate on stone from Silverdale, Kans., to Tulsa, Okla., higher than rate to Muskogee, Okla., to which point Tulsa is directly intermediate found to violate the long-and-short-haul provision of section 4 of the act. Consolidated Cut Stone Co. v. A., T. & S. F., 113 I. C. C. 480, 485.

(q) Complainant attacked commodity rate of $3.73 per ton on clay, carloads, from McKenzie, Tenn., to Abingdon and Macomb, Ill., as unreasonable, unduly prejudicial and in violation of section four. Also on clay, carloads, from western Kentucky and Tennessee to Lincoln and Morton, Ill., as unreasonable and in violation of the fourth section. HELD: Rates attacked from points of origin in Groups 1 and 2 unreasonable to extent they exceeded $3.54 but present rates and rates from Group 3 not unreasonable, reparation awarded. Abingdon Sanitary Mfg. Co. v. C. & N. W. Ry., 113 I. C. C. 556.

(r) Complainant attacked applicable rate of $2.05 on sand, other than blast, engine, foundry, glass, moulding, or silica, carloads, from Sandusky, O., to Pittsburgh, Pa., and points taking the same rates as unreasonable. Prior to August 26, 1920, rate was $1.80, increased on that date to $2.52. Effective December 10, 1921, the carrier in central territory voluntarily reduced all rates on road building materials, including sand, to a basis about 115 per cent of the rate in effect prior to August 26, 1920, making the rate to $2.07, this being changed to $2.05 on June 15, 1922. At the time of the hearing a rate of $1.75 was in effect from Sandusky to West Newton, Pa., to which Pittsburgh is directly intermediate. No sufficient reason appears for the maintenance of a rate from Sandusky to Pittsburgh upon a level other than that of the rates prescribed for application from points in western Pennsylvania to Ohio as laid down in 104 I. C. C. 717. HELD: Rate attacked not unreasonable for the past, but unreasonable for the future to extent it exceeded $1.60 per ton. Booth & Flinn v. Pennsylvania R. R., 113 I. C. C. 613.

(s) A showing that there was a lower rate in effect to a more distant point on same route does not in itself establish unreasonableness of higher rate to an intermediate point. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 614.

(t) Complainant attacked commodity rates charged on certain shipments of cotton from North Carolina points to Danville, Va., between October 7, 1922, and January 12, 1924, as unreasonable, unduly prejudicial and in violation of the fourth section. Wilson is served by the A. C. L., and N. S., the other points of origin named are served only by the Coast Line, Elm City being about 6 miles north of Wilson, Lucama about 8 miles south of Wilson and Black Creek and Freemont about 7 and 14 miles south of Wilson. Apparently all the shipments were delivered to the Coast Line; although the short line route from Wilson is over N. S., through Raleigh, N. C., thence Southern 182 miles. During a part of the time these shipments were moving defendants had joint rates of 65.5c from Wilson, Lucama and Elm City to Martinsville, Va., 43 miles beyond Danville. Effective April 8, 1924, and July 29, 1924, rates to Danville of 65.5c were established from all points of origin. Over short line routes, none of these points of origin is as much as 200 miles from Danville, but the average distance via Suffolk is about 313 miles. The maladjustment in these rates is made clear by the fact that at times during the period considered rates to Danville from all points of origin named, excepting Elm City, made upon the Draper, N. C., combination. HELD: Rates attacked unreasonable to extent they exceeded 65.5c, reparation awarded. Bradshaw Roberson Cotton Co. v. A. C. L. R. R., 113 I. C. C. 661.

(u) Combination rates charged on grain and products from points in Colorado, Kansas, and Nebraska to destina-

tions in Tennessee, Georgia, and Alabama, found legally assessed. Lower joint rates applied to Greenwood, Miss., and New Orleans, La., farther distant points, and while tariff provided for their application to directly intermediate points, it also carried complete routes, none of which operated through intermediate destinations here involved. Complainant here attempts to ignore such routes and construct unauthorized circuitous routes via which destinations would be intermediate to Greenwood and New Orleans. The naming of specific routes to the farther distant points, however, eliminated all other routes, and conclusion set forth in rule 4 (j) of Tariff Circular 18-A which provides that "When a tariff specifies routing the rates may not be applied via routes not specified," is controlling. Russell Grain Co. v. A. G. S., 113 I. C. C. 701.

(v) The establishment of a lower rate to a more distant point subject to Rule 77 of Tariff Circular 18-A is tantamount to an admission that a higher rate to an intermediate point is unreasonable, and when rates are so established shippers at intermediate points have a lawful right to a rate no higher than that to a more distant point. Crown Cork & Seal Co. v. B. & O., 113 I. C. C. 726, 727.

(w) The law is plain that regardless of the basis upon which relief is granted the commission must not permit the establishment of a rate to a more distant point that is not reasonably compensatory for the service performed. In a territory where the rates in general via the direct hauls have been passed upon by the commission and where there is such a maze of possible routes, making it practically impossible to check and enumerate each route available in published tariffs, it must place some general limitations upon the relief granted, so that rates via direct routes will not be less than reasonably compensatory when applied via the circuitous hauls. Class and commodity rates from Pennsylvania, 115 I. C. C. 331, 334.

(x) Complainant attacked sixth class rate charged on 6 cars of refuse sand shipped from Detroit, Mich., to Indianapolis, Ind., during July, August, and September, 1922, as unreasonable, unjustly discriminatory and unduly prejudicial to extent they exceeded the rate from the same point to Cincinnati or Columbus, O. One of the cars moved as routed, M. C., to Michigan City, Ind., C. L. & L. beyond. The remaining cars moved D. & T. S. L., to Toledo, O., N. Y. C. & St. L., to Frankfort, Ind., and Monon beyond, charged 22c. At the time shipment moved commodity rates of $1.64 and $1.89 from Detroit to Columbus and Cincinnati, respectively, were maintained by both the M. C. and Short Line. The Cincinnati rate of $1.89 was applicable on the shipment which was routed, and moved, over M. C. and Monon because of the absence of any restriction in the tariff prohibiting a movement via Michigan City. As to the remaining five shipments which moved by the Shore Line and connections, the words "on the same line" in the intermediate rule required that the intermediate point be on the line of the same carrier as the more distant point to which a rate is published. The rails of the Monon do not reach Cincinnati, therefore, the intermediate rule of the Shore Line tariff did not apply to the shipments which moved over that line and were delivered by the Monon at Indianapolis. However, as no routing instructions were published and as shipments to Cincinnati could be routed through Indianapolis, the higher class rate from Detroit to Indianapolis contravened the long and short haul provision of the fourth section. By no reasonable construction of the tariffs could the $1.64 rate to Columbus be held to apply via Indianapolis. HELD: Rates attacked unreasonable to extent they exceeded $1.89, reparation awarded. American Radiator Co. v. D. & T. S. L. R. R., 115 I. C. C. 529.

(y) The unauthorized establishment of rates or charges to or from points within the lighterage or delivery limits of New York harbor on a basis higher than that contemporaneously maintained to or from more distant points east of New York harbor on routes which pass through the harbor, so long as such points are continued within the delivery limits of New York harbor, would be considered as in contravention of the rule of the fourth section of the act. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 545.

(z) Complainant attacked commodity rate of 66.5c minimum 36,000 pounds, charged on 40 cars of potatoes, in barrels, shipped during June, July, August and September, of 1922, 1923 and 1924 from Virginia points to Jacksonville, Fla., as unjust, unreasonable, unjustly

discriminatory and unduly preferential to extent it exceeded 52.5c minimum 30,000 pounds and in violation of section 4 to extent it exceeded 63c. The points of origin are in eastern Virginia on the Norfolk division of the Pennsylvania about 5 to 58 miles north of Cape Charles, Va., and 699 to 758 miles from Jacksonville. On March 18, 1925, after the shipments moved the rates from these points were reduced to 63c, removing the fourth section departures. Rate of 52.5c was applicable from Washington to Jacksonville. Present rate of 63c is the rate from New York and Philadelphia. HELD: Minimum not unreasonable, rate attacked unreasonable to extent it exceeded 55c, reparation awarded. Nooney & Co. v. P. R. R., 115 I. C. C. 547.

(aa) Complainant attacked sixth class rate of 47c charged on two cars of built up wood, native stock, shipped in June and September, 1923, from Louisville, Ky., to Harriman, Tenn., as unreasonable, unduly prejudicial and in violation of the fourth section. Shipments moved Southern to Danville, Ky., C. N. O. & T. P. beyond. At the same time defendants maintained commodity rates on like traffic from Louisville of 38.5c to Knoxville and Chattanooga, Tenn., and 35.5c to Cleveland, Tenn. Harriman is 258 miles south of Cincinnati, O., and 80 miles north of Chattanooga over the C. N. O. & T. P. Shipments from Louisville over defendant's lines to Knoxville and Chattanooga move through Harriman, but these fourth section departures are protected. Inasmuch as a commodity rate of 17.5c on built up wood has since been established from Louisville to Harriman, effective October 19, 1923, any prejudice which might have existed has since been removed. HELD: Rate charged unreasonable to extent it exceeded 38.5c, reparation awarded. Dame Furniture Co. v. C. N. O. & T. P. Ry., 115 I. C. C. 566.

(bb) Complainant attacked commodity rates of $2.20 and $2.09 charged on coal, carloads, from points in the Alabama coal fields to Columbus, Ga., two years prior to March 15, 1924, as unreasonable and in violation of the fourth section to extent they exceeded rates of $2.03 and $1.93 contemporaneously maintained on like traffic to Girard, Ala., to which Columbus is intermediate over some routes. The points of origin are coal mines in Alabama from 5 to 55 miles distant from Birmingham. The fourth section departures were protected by appropriate applications. During March and April, 1924, the rates were reduced to the Girard basis, thus removing the fourth section departures. HELD: Rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Mayo v. Southern Ry., 115 I. C. C. 595.

(cc) Complainant alleged rates ranging from 55c to 76c and minima of 30,000 pounds charged on numerous cars of potatoes shipped between May 20 and July 30, 1923, from Alabama and Florida to destinations in Indiana, Ohio, Illinois, Michigan, Kentucky and Missouri were and are unjust, unreasonable, illegal and in violation of section four. Five cars originated on the A. F. & G., a lumber tap line about 10 miles long extending south from Falco, Ala., to its junction with the L. & N. at Galliver, Fla. Since the period of movement the road has been abandoned under authority from the commission. The remaining shipments originated at different points on the M. S. B. & P. extending northward from Pensacola, Fla., to Kimborough, Ala., 142.5 miles and there connects with the Southern, and with the L. & N. at Atmore, Ala. All the shipments moved via junctions with the L. & N. and thence over that road and its connections to the destinations, most of which were in Ohio and other states north of Ohio river. Defendants assessed on the five cars three factor combinations of 86c made up of 2.5c minimum 30,000 pounds, to the junction point, 62c minimum 24,000 pounds thence to the Ohio river crossing, and 21.5c minimum 30,000 pounds beyond. Each destination was intermediate to some station to which a specific rate with 24,000 pound minimum was published from the junction point and to which accordingly two factor rates applied from points of origin. The rates were subject to rule 77. HELD: Minimum weight of 30,000 pounds of M. S. B. & P. unreasonable to extent it exceeded 24,000 pounds, that the rates attacked on the five shipments unreasonable to extent they exceeded rates to farther distant points, reparation awarded. Atmore Produce Co. v. M. S. B. & P. Ry., 115 I. C. C. 599.

(dd) Complainant attacked combination rate charged on newsprint paper, carloads, two years prior to June 5, 1925,

from Millinocket, Me., to Lynchburg, Va., as unreasonable, unjustly discriminatory and unduly prejudicial to Lynchburg and unduly preferential of Atlanta, Ga., Chattanooga and Memphis, Tenn., and New Orleans, La. Charged 53c, composed of proportional rate of 12.5c to Deering Junction, Me., class A rate of 40.5c beyond. On traffic from Millinocket, Lynchburg is intermediate to Memphis and the present rate adjustment constitutes a violation of the fourth section. The Southern, the delivering line herein, contemplates increasing the Memphis rate to 60 or 61c. This adjustment would remove the existing violation. HELD: Rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Lynchburg Chamber of Commerce v. B. & A. R. R., 115 I. C. C. 715.

(ee) Complainant alleged third class rates charged on drugs and medicines, carloads, from Elkhart, Ind., to New York and Philadelphia are unreasonable, unjustly discriminatory, unduly prejudicial and in violation of section four and illegal. At hearing defendants announced their purpose to establish a rate for the future on drugs and medicines, carloads, of 71c, which is satisfactory to complainant. Charged 98.5c and 96.5c prior to July 1, 1922, and 89c and 87c thereafter. During the same period commodity rates applicable on drugs and medicines from Kalamazoo, Mich., were 77.5c and 70c. Elkhart is in the 94 per cent group with regard to the New York-Chicago rate and Kalamazoo is in the 92 per cent group. Elkhart is intermediate. HELD: Applicable rate third class, but prior to June 15, 1925, proper rate was commodity rate from Kalamazoo, overcharge to be refunded, complaint dismissed. Dr. Miles Medical Co. v. B. & O. R. R., 118 I. C. C. 33.

(ff) Complainant attacked commodity rates charged on green salted hides, carloads, from Meridian, Miss., to Portville, N. Y., as unreasonable and in violation of section four in that the rates exceeded the rates from New Orleans and Mobile to Buffalo. Portville is on the Pennsylvania 6 miles south of Olean, N. Y., and takes Rochester basis of rates. Meridian is 135 miles north of Mobile and 202 miles north of New Orleans. Hides are rated sixth class in southern and fifth in official, charged sixth class rates on one car of 97c and 87.5c on the five. Effective October 4, 1924, after the shipments moved defendants established present commodity rate of 73c. Reparation is sought to basis of commodity rates of 56c and 50.5c in effect from New Orleans and Mobile. The 56c rate by which it is sought to measure reparation on shipment of February, 1922, did not become effective until April 1, 1922. When the shipment moved the rate from New Orleans and Mobile to Buffalo was 66c. Defendants admit that the rates on this commodity from points in the south to northern points have been in a very unsatisfactory condition for years. The evidence shows that the rates charged and the present rate of 73c were and are out of line, distance considered, with the rates applicable from and to nearby points of origin and destination, as well as with the rates between points in the same rate territories. HELD: Rates charged prior to July 1, 1922, unreasonable to extent it exceeded 75.5c and thereafter unreasonable to extent it exceeded 68c, reparation awarded. Northwestern Leather Co. Trust v. M. &. O. R. R., 118 I. C. C. 37.

(gg) Complainant attacked commodity rates on newsprint paper, carloads, from Berlin, N. H., to Birmingham, Ala., as unjust, unreasonable, unduly prejudicial and in violation of the fourth section. On 27 shipments originating on the G. T. a rate of 71.5c established January 1, 1924, was applicable but charges collected at 64.5c, undercharged. From November, 1922, to December 31, 1923, the rate had been 64.5c. Berlin is on the G. T. and B. & M. Rates to Birmingham and the destinations varied, dependent upon the initial carrier and the route of movement, whether the all rail route via Virginia cities or Ohio river crossings or the rail-water-rail route. The G. T. and delivering carriers admit that no higher rate should have been applied on the 27 shipments than the rate of 68.5c which contemporaneously applied over the B. & M. as initial carrier and express willingness to waive the charges which exceed that basis. Birmingham is directly intermediate to New Orleans, the all rail to that point being 66c. It is also intermediate over rail-water-rail routes to Nashville and Memphis, destinations to which the present rates are lower, being 47 and 48c, respectively. HELD: Rates attacked unreasonable to extent they exceeded 64c all rail and 60c rail-water-rail; that present rates with B. & M. as initial carrier

not unreasonable; that all rail rates attacked to Birmingham which exceed by more than 1c the rate all rail maintained to Nashville and rail-water-rail rates attacked to Birmingham which exceed rates to Memphis and Nashville are unduly prejudicial, reparation awarded. Birmingham News Co. v. A. B. & A. R. R., 118 I. C. C. 205.

(hh) Complainant attacked commodity rates charged on bale ties and woven and barbed fencing, carloads, from Sterling, Ill., to Montgomery, Ala., as unjust and unreasonable, and unduly prejudicial as compared with the rates to Mobile, Ala., and Meridian, Miss., and in violation of the fourth section. Montgomery is in southeastern territory about 180 miles northeast of Mobile and 150 miles east of Meridian. It is served by the L. & N. and M. & O. Meridian is 135 miles north of Mobile. Both Meridian and Mobile are border line points between Mississippi valley and southeastern territories and are considered Mississippi valley points for rate making purposes. Sterling is in the northwestern part of Illinois, due west of Chicago, Ill., and is in I. F. A. territory. The rates from Sterling to Meridian and Mobile are somewhat lower than to Montgomery. The outbound jobbing rates to the common trade territory are the same from all three points. In consequence, jobbers at Meridian and Mobile can lay their goods down at points equidistant from Montgomery at a much lower aggregate cost than complainants can, thus placing complainants at a disadvantage in doing business at such points. Since the hearing the Montgomery rate has been reduced to 57c, the Mobile and Pensacola basis. It will be observed that the same rates applied and apply on all of the commodities here considered to all destinations except Montgomery, and that those to the latter destination were made the same on all on July 1, 1925. HELD: Rates charged prior to October 15, 1924, unreasonable and unduly prejudicial to extent they exceeded 63c prior to July 1, 1922, and 57c, thereafter, reparation awarded. Teague Hardware Co. v. C. B. & Q. R. R., 118 I. C. C. 221.

(ii) Combination rates on potatoes from Florida points on the Andalusia, Florida & Gulf Ry., to Ohio destinations found unreasonable to extent they exceeded lower rates contemporaneously in effect to farther distant points, such lower rates being subject to rule 77 of Tariff Circular 18-A. Reparation awarded. Atmore Produce Co. v. M. S., B. & P., 115 I. C. C. 599.

(jj) Traffic from certain stations may move via either of two junctions, one of which constitutes normal route. Rates from such stations being unrestricted in their application, applied by way of junction which did not constitute normal route, and when so moving the traffic must pass through intermediate points taking higher rates. HELD: That situation involved a technical violation of long-and-short-haul provision of section 4 of the act because of unrestricted application of rates to the normal or customary route. Indianapolis Board of Trade v. C., C., C. & St. L., 115 I. C. C. 681, 682, 683.

(kk) Rates on newsprint paper from Millinocket, Me., to Memphis, Tenn., lower than corresponding rates to Lynchburg, an intermediate point, found to contravene the long-and-short-haul provision of section 4 of the act. Lynchburg Chamber of Commerce v. B. & A. R. R., 115 I. C. C. 715, 718.

(ll) Fifth-class rate on refined petroleum oil from Reno, Pa., to Rockford, Ill., found to violate section 4 of the act in that a lower commodity rate was contemporaneously applicable via Reno from Foxburg, Pa., a farther distant point. Smith Oil & Refining Co. v. C., M. & St. P., 118 I. C. C. 527.

(mm) Complainant attacked rate of 20.5 cents charged on 13 cars of cement from Humboldt, Kas., to Florence, Neb., between Oct. 9, 1922 and Nov. 2, 1922 as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section and inapplicable. Shipments moved over Santa Fe and U. P. to Omaha, Neb., and C., St. P., M. & O. beyond. Delivery was made a point about 2 miles from the Florence station on the only lead track to the spur of the Metropolitan water district and the Metropolitan water district station, private industries at Florence. There was no switch, sidetrack, or plant at the unloading point. The consignee, the National Construction Co., was not a permanent industry on the Omaha. It was granted the privilege of unloading the shipments on the lead track instead of the public team track because delivery at that point saved the cost of drayage, as the paving operation in which it was temporarily engaged was adjacent thereto. Florence,

Neb., is within the corporate limits of Omaha. The rates from Mason City, Gilmore, Des Moines and La Salle, Ill., to Florence were the same as the rates to Omaha. At the time of movement a rate of 16 cents applied from Humboldt to Omaha and to California Jct., Ia. Florence is intermediate to California Jct. via Omaha and the rails of the Omaha. The 16 cent rate became applicable to Florence Jan. 1, 1923. HELD, rate attacked unreasonable to extent it exceeded 16 cents plus switching of $6.30 per car, reparation awarded. Monarch Cement Co. v. C., St. P., M. & O. Ry., 120 I. C. C. 4.

(nn) Complainant attacked joint rate of 31 cents charged on five cars of lumber shipped during Nov. and Dec., 1921 and Feb., 1922 from Virginia, Minn., to Grafton, Wis., as unreasonable, unjustly discriminatory and unduly prejudicial. Virginia is 78 miles north west of Duluth, Minn., on the D. W. & P. Grafton is 24 miles north of Milwaukee, Wis., on the C., M. & St. P. Shipments moved D. W. & P. to Duluth and C., M. & St. P. beyond, 566.7 miles. Prior to Nov. 15, 1919 a specific commodity rate of 23 cents was maintained on lumber. A commodity rate of 18 cents contemporaneously applied from the same point of origin to Hilbert Jct., Neenah and Menasha, Wis., to which Grafton is directly intermediate. The 24.5 cent rate to which reparation is desired is the 18 cent rate brought up to date. HELD, rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, and complainant not damaged by the fourth section violation, complaint dismissed. Virginia & Rainy Lake Co. v. D. W. & P. R. R., 120 I. C. C. 131.

(oo) Complainant attacked commodity rate charged on 72 cars of gasoline and petroleum refined burning oil shipped between March 17 and Dec. 15, 1924 from Casper, Wyo., to Glenwood Springs, Rifle and Grand Jct., Colo., as unreasonable. Shipments moved C. B. & Q., to Wendover, Wyo., C. & S. to Pueblo, Colo., and D. & R. G. W., beyond, average distance of 733 miles, charged 96.5 cents. There was a rate of 83.5 cents from Casper to Salt Lake City to which the Colorado points named are intermediate over the route of movement. In 66 I. C. C. 8, and 92 I. C. C. 376, the commission found the rate unreasonable to extent it exceeded 66 cents. HELD, rate attacked unreasonable to extent it exceeded 66 cents, reparation awarded. White Eagle Oil & Refining Co. v. D. & R. G. W. R. R., 120 I. C. C. 166.

(pp) Complainant attacked commodity rate charged on 39 cars of gravel from Montgomery, Ala., to Milton, Fla., between June 13 and Nov. 26, 1924 as unreasonable and illegal. Rate charged $1.62. Rate to Pensacola, Fla., was $1.44. Milton is directly intermediate between Montgomery and Pensacola. Subsequent to the movement defendant restricted the tariff provision so as to cover only destinations intermediate to Pensacola over the route through Flomaton. Reference to rule 77 contained no restriction as to route. HELD, rate attacked unreasonable to extent it exceeded $1.44, reparation awarded. Lawrence Construction Co. v. L. & N. R. R., 120 I. C. C. 316.

(qq) Complainant attacked combination rates charged on six cars of old second hand barrels shipped from Cynthiana and Poindexter, Ky., to Rochester and Syracuse, N. Y., as unreasonable, unduly prejudicial and in violation of the fourth section in that they were higher than the rates over the same routes from Lexington and Winchester, Ky., farther distant points. Cynthiana and Poindexter are on the L. & N. between 60 and 70 miles south of Cincinnati, O. Applicable rates were fifth class to Cincinnati plus fourth class beyond. From Lexington and Winchester on the C. & O. and L. & N., there were in effect to Rochester and Syracuse over the same routes, joint fourth class rates which were much lower than the combination charged. The usual method of constructing rates from points immediately south of the Ohio River to destinations in official classification territory has been the combination basis. From Lexington and Winchester to eastern cities joint rates are published which are equal to those applying from Louisiville over the official classification lines under the Chicago-New York adjustment. This departure is said to be due to the action of the C. & O. which, in accordance with a time honored policy of strictly observing the long-and-short-haul rule, has applied the Louisville rates as maxima from Lexington, Winchester and other intermediate points on its line. The L. & N. for competitive reasons has applied the same rates over its line from Lexington and Winchester through Cincinnati. HELD, rates charged not unreasonable or otherwise unlawful, complaint dis-

missed. Liberty Cooperage & Lumber Co. v. L. & N. R. R., 120 I. C. C. 379.

(rr) Complainant attacked rates charged on seven cars of sugar shipped between Nov. 26, 1920 and June 6, 1921 to Lynchburg, Va., from Yonkers and Brooklyn, N. Y., as unreasonable and unduly prejudicial. Applicable commodity rate was 42 cents, the sixth class rate to Lone Jack and South Boston, Va., 8 and 64 miles beyond Lynchburg were 40.5 and 42.5 and 38.5 and 40.5 cents respectively, the fourth section departure being protected. On July 20, 1924 the rates from Brooklyn and Yonkers to South Boston were increased to 41 and 43 cents, and subsequently the rate to Lynchburg was reduced to 35 cents. HELD, rate attacked unreasonable to extent it exceeded 39 cents, reparation awarded. Chamber of Commerce, Lynchburg, Va. v. P. R. R., 120 I. C. C. 392.

(ss) Upon further hearing, previous finding in 89 I. C. C. 356, that joint rates on gasoline from points in Texas and Oklahoma to destinations in California were applicable, and that there is no violation of the aggregate-of-intermediates clause of section 4 of the act unless carriers maintain a specific through rate which is higher than lowest aggregate-of-intermediate rates over same route, the product of intermediate rates, treated by the combination rule and resulting in something less than the aggregate, not being an aggregate within meaning of the fourth section, affirmed. McLeod v. T. & P., 120 I. C. C. 550.

(tt) Rate on cement from Navarro, Pa., to Dunraven, N. Y., found unreasonable to extent it exceeded a lower rate contemporaneously in effect to farther distant points beyond Dunraven, whicl lower rate was established to latter-named destination subsequent to movement. This fourth-section violation, unprotected by an appropriate application, created an unlawful situation raising a presumption of unreasonableness. The mere assertion of carriers that rate to the farther distant points was depressed by reason of competition, and that assailed rate was subsequently reduced for the same reason, unsupported by evidence as to reasonableness of either of these rates, is insufficient to overcome that presumption. Reparation awarded. Atlas Portland Cement Co. v. N. & B., 120 I. C. C. 583.

(uu) The charging of a higher rate to an intermediate than to a farther distant point in violation of long-and-short-haul clause of section 4 of the act is prima facie unreasonable. See 269 U. S. 1. Atlas Portland Cement Co. v. N. & B., 120 I. C. C. 583, 584.

(vv) Complainant attacked rates charged on quebracho extract in carloads from New York Harbor lighterage, N. Y., and Hoboken and Jersey City, N. J., prior to Jan. 7, 1924 and unreasonable and illegal between that date and April 4, 1925, to Ludlow, Pa. Charged prior to April 4, 1925 at the fifth class rate of 34 cents and on and after that date a commodity rate of 31.5 cents. There was on Oct. 25, 1922 and still is published from the points of origin to Salamanca, N. Y., a point beyond Ludlow a commodity rate of 28.5 cents. On April 1, 1923 a like rate was established to Johnsonburg, Pa., a point intermediate to Ludlow. Ludlow is between Johnsonburg and Salamanca on shipments from New York lighterage via Warren and is shown as a point of destination in the tariffs. On April 4, 1925 a commodity rate of 31.5 cents was established to Ludlow under the intermediate clause. By exceptions to the classification a sixth class rate of 28.5 cents is in effect on other similar imported dry extracts from New York harbor to Ludlow over defendants lines. The maintenance of a rate of 31.5 cents to Ludlow and 28.5 cents to Salamanca constituted a departure from the long and short haul provision of the fourth section, which is not protected. HELD, charges April 1, 1923 to April 3, 1925 inapplicable, applicable rate was 28.5 cents; that rate of 31.5 cents applicable on and after April 4, 1925 was unreasonable to extent it exceeded 28.5 cents, reparation awarded. Curtis Leather Co. v. Pennsylvania R. R., 123 I. C. C. 1.

(ww) Complainant attacked commodity rates on brick and articles taking the same rates from Ohio and West Virginia to Verona, Brackenridge and Tarentum, Pa., as unreasonable, illegal, and in violation of section four. Rates charged were $1.50 to Verona and $1.65 to Brackenridge and Tarentum. Rates of $1.35 and $1.50 are published from the same points of origin to Glassmere and Butler Junction, to which destinations Tarentum and Brackenridge are intermediate. Since June 1, 1922 from the Steubenville and New Cumberland groups and Oct. 16, 1922 from the Iron-

dale group, the rates have departed from the long and short haul provision, as the rates to Butler have been, and now are, lower than to the intermediate points. HELD, rates to Brackenridge and Tarentum unreasonable to extent they exceeded $1.50, to Verona $1.35, reparation awarded. Globe Brick Co. v. Pennsylvania R. R., 123 I. C. C. 498.

(xx) Complainant attacked combination rate charged on three cars of cotton shipped on Oct. 10, 1922 from Corinth, Miss., to Monroe, Ga., as unreasonable, unduly prejudicial and in violation of the fourth section. Shipments moved Southern to Atlanta and Georgia to destination, 435 miles, charged 96 cents, composed of 73.5 cents to Atlanta and 40.5 cents beyond, less 18 cents under the combination rule. Contemporaneously there was a rate of 70 cents from Memphis to Monroe, Corinth being intermediate. Distance from Memphis via this route is 528 miles, short line route is 478 miles, Corinth not being intermediate. Effective Oct. 20, 1924 the rates were revised and those from interior Mississippi points reduced the rates to Monroe becoming 82 cents from Memphis and 78 cents from Corinth. HELD, rates attacked not unreasonable, complaint dismissed. Manget Bros. Co. v. Georgia R. R., 123 I. C. C. 532.

(yy) Rates on brick and articles taking same rates from designated points in Ohio and West Virginia to Verona, Brackenridge and Tarentum, Pa., found in violation of fourth section of the act, and unreasonable to extent they exceeded rates from the same origin points to Butler, a farther distant point. Reasonable rates prescribed for future, and reparation awarded. Globe Brick Co. v. P. R. R., 123 I. C. C. 498.

(zz) Complainant alleged commodity rate of $5.07 charged on crude phosphate rock, carloads, shipped between July 26, 1923 and March 3, 1925 from Tilphosco and Brewster, Fla., to Meridian, Miss., was and is unreasonable, unduly prejudicial and in violation of section four of act. Points of origin are on the A. C. L. and C. H. & N. operated by the S. A. L. Crude phosphate rock is necessary ingredient in the manufacture of fertilizer. The rates are the same from the entire Florida phosphate territory. Defendants seek authority to continue to charge lower rates from Florida to New Orleans and to Gulf ports taking the same rates, and to Mississippi river destinations, than to intermediate destinations. Water competition met by defendants at New Orleans and Gulf ports taking the same rates is active and compelling. HELD, rate attacked unreasonable to extent it exceeds $4.73, reparation awarded. Fourth section relief granted. Meridian Fertilizer Factory v. A. C. L. R. R., 126 I. C. C. 478.

(3a) Upon contention that rates on grain and products from points in Colorado and Utah to California destinations are in violation of the long-and-short-haul clause of fourth section of the act in that they exceed rates from Denver and other points in transcontinental westbound Group J to same destinations, HELD: Rates from the more distant points were published subject to provisions of rule 77 of Tariff Circular 18-A and such provision constitutes a substantial compliance with requirements of the fourth section. See 51 I. C. C. 185. Ogden Grain Exchange v. A. E. R. R. Co., 126 I. C. C. 255, 268.

(3b) Complainant alleged fifth rate of 40.5c charged on 35 cars of bar steel moving from Youngstown, O., to Lynchburg, Va., between Feb. 12, 1924 and Sept. 22, 1925, was and is unjust, unreasonable unjustly discriminatory of Lynchburg and unduly preferential of Lone Jack, Va., and in violation of section four. Traffic from Youngstown to Lone Jack, Va., 8 miles farther distant than Lynchburg is governed by the southern classification, in which bar steel, carloads, is rated sixth class. Lone Jack is a flag stop at which there is no post office or business of any consequence. Sixth class rate to Lone Jack was 33c prior to Nov. 28, 1924 since when it has been 33.5c, but under the minimum class rate scale effective Nov. 28, 1924 40.5c became the minimum carload rate on bar steel from Youngstown to Lone Jack, which removed the fourth section departure. The fact that lower charges would have accrued on the shipments that originated prior to Nov. 28, 1924, if they had moved through Lynchburg to Lone Jack does not constitute unjust discrimination, complaint dismissed. Lynchburg Traffic Bureau v. B. & O. R. R., 128 I. C. C. 557.

(3c) Rates on copper wire from Phillipsdale, R. I., to Wallingford, Conn., found unreasonable to extent they exceeded rates to Harlem River, N. Y., published in conformity with rule 77 of

Tariff Circular 18-A, governing publication of rates to intermediate points and unrestricted as to routing. Wallingford is a directly intermediate point over Berlin route, but carrier contended that, the Berlin route being impracticable, Wallingford was not an intermediate point, and rule 77 was therefore not applicable. Routing being unrestricted, contention not sustained. Reasonable rates prescribed for future and reparation awarded. New York Insulated Wire Co. v. N. Y., N. H. & H., 128 I. C. C. 698.

(3d) Complainant alleged rates charged on copper wire, carloads and less carloads, since April 1, 1923 from Phillipsdale, R. I., to Wallingford, Conn., were and are unreasonable and in violation of section four. Phillipsdale is a local station on New Haven in the vicinity of Providence, R. I. Wallingford is 13 miles northeast of New Haven, Conn. Applicable fourth class and third class, 31 and 41c were assessed. Contemporaneously defendant maintained from Phillipsdale to Harlem River, N. Y., commodity rates on copper wire of 22c when in carloads, and 28c in less carloads. Wallingford is directly intermediate between Phillipsdale and Harlem River over the route through Berlin. The tariff naming the commodity rates to Harlem River contained a provision authorized by rule 77 of tariff circular 18-A, for the publication on one day's notice of rates to intermediate points not higher than to more distant points. The tariff reference to rule 77 contains no restriction as to route. HELD, rates attacked unreasonable to extent they exceed 22c carloads and 28c less carload, reparation awarded. New York Insulated Wire Co. v. N. Y., N. H. & H. R. R., 128 I. C. C. 698.

(3e) Complainant alleged third class rate of 79c charged on three less carloads of fruit wrappers, unprinted, cut to size, forwarded during August and Sept. 1924 from Hamburgh, N. J., to Lynchburg, Va., was and is unreasonable, unduly prejudicial and in violation of section four. Shipments moved N. Y. S. & W, Erie and Pennsylvania, Southern, 461 miles. Lynchburg is served also by the N. & W. and C. & O. and is intermediate to Montview, Va., over the route of movement, that point being local to the Southern, 6 miles beyond Lynchburg. Complainants allegations are based entirely upon the lower rates published to Montview and Lone Jack, Va., farther distant points, or on combination rates based upon such points. On shipments to Lynchburg official classification governs, whereas to Montview and Lone Jack the southern classification governs. Fifth class rate to Montview was 52.5c and rate Montview to Lynchburg 10.5c. If the rate to Lynchburg is a reasonable rate, the maintenance of the lower rate to the farther distant points not only violates the fourth section, but is also prejudicial to Lynchburg. Inasmuch as no movement of fruit wrappers unprinted, in less carload quantities, from Hamburgh to Montview has been shown or appears probable the Commission can not make a finding of unjust discrimination or undue prejudice. HELD, rate assailed not unreasonable or otherwise unlawful, complaint dismissed. Lynchburg Chamber of Commerce v. E. R. R. 129 I. C. C. 230.

(3f) Complainant alleged that the commodity rates charged on asphalt, carloads, from North Baton Rouge, La., to Louisville and Philadelphia, Pa., were unreasonable and inapplicable. Charged 25.5c. The tariff contained a general provision that rates on asphalt, in carloads, published therein from New Orleans, La., would also apply from North Baton Rouge; the tariff contained an intermediate rule which provided that unnamed destinations which were intermediate to two named destinations should be accorded the rate to the next more distant point. Louisville and Philadelphia are between Newton and Ackerman, Miss., which points are accorded a rate of 22.5c in the original tariff. On July 1, 1925 the tariff was amended to provide a new basis for making rates to certain points. No change was made in the manner of publishing rates from North Baton Rouge. Under the new basis referred to, both Louisville and Philadelphia were accorded differentials of 3c over the rate of 22.5c from New Orleans to Mathiston, Miss. The intermediate rule in the original tariff was not canceled on July 1, 1925. Complainant contends that under this rule the applicable rates were 22.5c. But the intermediate rule provides only for rates to unnamed points and both these destinations were named in the tariff. Fourth section departures were protected by appropriate order. No evidence was offered in sup-

port of the allegation of unreasonableness. HELD, rates assailed applicable and not unreasonable, complaint dismissed. Merrill Engineering Co. v. G. M. & N. Ry., 129 I. C. C. 249.

(3g) Complainant alleged commodity rate charged on six cars of bituminous coal, shipped from Ziegler, Ill., to Logan and Woodbine, Ia., between Jan. 15 and Feb. 16, 1926 was unreasonable, inapplicable and otherwise unlawful and that shipments were misrouted. Logan and Woodbine are served by the I. C. and Northwestern, Ziegler is a producing point in the socalled Southern Illinois district. Shipments moved via I. C, charged $4.12, rate sought $3.62. On July 19, 1925 a $3.62 rate was established from the southern Illinois district to Omaha, Neb., and Council Bluffs, Ia., applicable over the I. C. direct to Peoria or South Pekin, Ill., and Northwestern beyond. Logan and Woodbine are directly intermediate to Omaha and Council Bluffs over the above specified routes. Fourth section order 8952 authorized that I. C. to maintain lower rates to Omaha and Council Bluffs than to certain intermediate points on its lines, which protected the departure over the I. C. Upon discovering that the departures over the routes via Peoria or South Pekin were not protected, the $3.62 rate was protected on Jan. 2, 1926, in connection with the Northwestern and on April 1, 1926 it was established via defendants line. HELD, rate assailed not unreasonable or otherwise lawful, complaint dismissed. Borman Lumber Co. v. I. C. R. R., 129 I. C. C. 507.

(3h) Complainant alleged charges collected on 827 cars of refined petroleum products from Lawrenceville, Ill., to Greencastle, Indianapolis, LaFayette and Fowler, Ind., between May 4, 1922 and Nov. 20, 1923 were violative of sections 1, 4 and 6 of the act. The movement of the shipments was confined to defendants rails and were charged commodity rates of 17.5c, except to Fowler, 22c. At the time of movement there was in effect from Lawrenceville, Ill., to Chicago, Ill., and Chicago rate points, a commodity rate of 16c applicable over, among others, the route through the points of destination under consideration, and the tariff naming the rate carried an intermediate rule which provided: except as otherwise specifically provided for herein, the rate to any point of destination not specifically provided for, the following will govern: If point of destination is not located between two stations to which specific rates are named, the rates to the next more distant station beyond located on the same railroad as the intermediate station will apply. Complainant and interveners contend that under the above rule the 16c rate was applicable, but this contention is unsound. The rates charged to the first three points were specific commodity rates which became effective prior to the effective date of the intermediate rule and consequently took precedence over any rate which might otherwise have applied under that rule. The rate to Fowler applied on the single group of commodities in the petroleum list and was published as a definite amount. It was, therefore, sufficiently specified to render the rule inoperative in connection with the shipments to this point. The present rates from Lawrenceville and other Illinois points to Indiana destinations are now on a basis of about 80% of fifth class, and from Lawrenceville specifically are 15c to Greencastle 17c to Indianapolis, 18.5c to Lafayette and 19.5c to Fowler. The fact that additional readjustments might be necessary is no ground for denying relief if shown by the record as proper, but the record here shows that the rates charged conformed approximately to the general basis applying in central territory during the period of movement, and that the present rates from Lawrenceville to Indiana destinations are about 10% lower. No sound reason appears for substituting for this basis, as a measure of the reasonableness of the rates assailed, the lower basis applying between points in Illinois territory. Complainant and interveners have shown no damages as a result of these departures and the mere fact that because of unrestricted routing during the period of movement shipments might have moved over the longer route raises no presumption of unreasonableness with respect to the rates to the intermediate points. HELD, rates assailed applicable and not unreasonable, complaint dismissed. Indiana Refining Co. v. C. C. C. & St. L. Ry., 132 I. C. C. 553.

(3i) Complainant alleged that rate charged on numerous carloads of wool noils from Forge Village and Granite-

ville, Mass., to Nepperhan, N. Y., between Sept. 25 and Nov. 30, 1923 was unreasonable and in violation of section four. Shipments moved B. & M. through Ayer, Mass., to Troy, N. Y., thence N. Y. C. to destination, charged second class rate of 60c. A commodity rate of 38c was applicable from Boston, Mass., to Nepperhan. Forge Village and Graniteville are 5.8 and 7.1 miles east of Ayer the junction of the Stony Brook branch with the main line, and are intermediate between Boston and Troy via the B. & M. through Lowell, Mass., and Ayer. Over the route of movement they are 311 and 312 miles from Nepperhan. Distance from Boston 341 miles. The 38c rate from Boston was published without restrictions to route. Effective March 31, 1924, after the shipments moved, a commodity rate of 38c applied from Forge Village and Graniteville to Nepperhan. HELD, rate assailed unreasonable to extent it exceeded 38c reparation awarded. Smith & Sons v. B. & M. R. R., 132 I. C. C. 596.

(3j) The fact that a rate to one point or to a group is the same as maintained to an intermediate point less distant does not necessarily demonstrate that the rate to the intermediate point is unreasonable. Tidal Western Oil Corp. v. M. K. T. R. R., 132 I. C. C. 681, 683.

(3k) Complainant alleged that charges collected on 14 cars of cabbage and potatoes shipped between Oct. 2, 1920 and from Nov. 26, 1921 from New York and Freehold, N. J., to Lynchburg, Va., were and are unreasonable and unduly prejudicial. Charged fifth class rates of 46c from the New York points and 53c from Freehold. Substantially lower rates were maintained from the same points of origin to South Boston, Lone Jack, Rustburg and Danville, Va., which destinations are farther distant from points of origin than is Lynchburg. Complainants claim for reparation is based upon the fact that lower rates were in effect to more distant points. But the mere fact that the rates under attack were out of line with a few other rates to which the assailed rates were closely related, may as well indicate that the compared rates were too low and that the rates assailed were too high. HELD, rates assailed were not and are not unreasonable or otherwise unlawful, complaints dismissed. Lynchburg Chamber of Commerce, v. P. R. R., 132 I. C. C. 708.

(3l) Complainant alleged commodity rate charged on a car of bulk oats shipped Sept. 10, 1923 from Oldham, S. D., to Leides Park, Wis., was inapplicable. Shipment moved C. M. & St. P. to La Crosse, Wis., thence L. C. & S. E. beyond. Charged commodity rate of 28c specifically published from Oldham to Stoddard, Wis., the next more distant point beyond Leides Park and to which Leides Park is directly intermediate. Leides Park was specifically included in the tariff index of stations but it was not named as a point to which rates apply from Oldham. Contemporaneously there was in effect over the route of movement a combination rate of 23c made up of 18c to La Crosse and 5c beyond. HELD, rate assailed applicable, complaint dismissed. Fruen Grain Co. v. L. C. & S. E. Ry., 132 I. C. C. 747.

(3m) Rates on asphalt from North Baton Rouge, La., to Louisville and Philadelphia, Miss., higher than to more distant point to which they were intermediate, found applicable and not unreasonable. An intermediate clause provided for application of this lower rate to unnamed intermediate points, but Louisville and Philadelphia were both named in tariff and fourth-section departures were protected. Merrill Engineering Co. v. G., M. & N., 129 I. C. C. 249.

(3n) Rates from various eastern points to Dallas and Fort Worth, Tex., are same as those to Deming, N. Mex., a more distant point, as well as to Los Angeles and other California ports. Rates not higher than rates to the coast necessarily are maintained to Deming in order to avoid unauthorized, fourth-section departures; rates to Deming are for same reason observed as maximum at interior points such as Texas common points. Similar blanket applications frequently occur with respect to transcontinental rates and such rates are not necessarily determinative of reasonableness of rates to intermediate points. Nor does it follow that rates to Deming should be scaled back to intermediate points, particularly where showing is not sufficient to warrant such an adjustment. Apex Co. v. A. & V., 129 I. C. C. 283, 287, 288.

(3o) Rates on bitiminous lump coal from Zeigler, Ill., to Logan and Woodbine, Iowa, found not unreasonable or otherwise unlawful. While contemporaneously a lower rate applied from southern Illinois district to Omaha, Nebr., and Council Bluffs, Iowa, to which Logan and Woodbine are directly intermediate, and was subsequently established by other carriers to intermediate points including Logan and Woodbine, this departure from fourth section was protected by fourth-section order. However, rate assailed compares favorably with contemporaneous rates to Sioux City and other Iowa points and with those prescribed in 89 I. C. C. 170, from southern Illinois district to Sioux City for comparable hauls. Bowman Lbr. Co. v. I. C., 129 I. C. C. 507.

§6. Intermediate Points Off Line.

See Supra §5.

(a) The fact that a lower combination applies over another route does not constitute a fourth section violation. Baker & Holmes Co. v. I. C. R. R., 112 I. C. C. 407, 408.

(b) Complainant attacked combination rate charged on three carloads of fir lumber, shipped between Nov. 20, 1924, and Dec. 16, 1924, from Ostrander, Wash., to Manchester, O., an inapplicable. Shipments moved via Cincinnati, O., and C. & O. Charged 88.5c to Trinity, Ky., and ferry charge of 8c beyond. When the shipments moved defendants maintained a joint commodity rate of 88.5c from Ostrander to points on the C. & O. L., in Kentucky between Cincinnati and Ashland, Ky., including Trinity. Manchester is on the north bank of the Ohio River, opposite Trinity, and is reached only by a ferry service. The arrangement of stations in the open and prepay station list does not indicate that Manchester is directly intermediate between any two points on the C. & O., in Kentucky. Traffic to such Kentucky points beyond Trinity would not move through Manchester. 96.5c rate applicable. HELD: Rate attacked applicable, complaint dismissed. Miller Lumber Co. v. O. W. R. R. & N. Co., 112 I. C. C. 727.

(c) Complainant attacked commodity rates charged on live poultry, carloads, between April 27, 1922, and June 30, 1923, from Livingston, Carthage, Algood, Cookeville, Baxter, Silver Point, Watertown, and Monterey, Tenn., to New York, as unreasonable, unjustly discriminatory and unduly prejudicial and in violation of the fourth section. All except Livingston and Carthage, are on the main line of the Tenn. Cent. Livingston is on the T. K. & N., 19 miles north of Algood. Carthage is on a branch of the T. C., 7 miles from the main line. None of the shipments moved via Nashville, Tenn., but under the tariffs the Nashville combination was applicable on shipments routed via Cincinnati. Distances to Harriman range from 58 to 121 miles. From Nashville to Harriman distance is 166 miles. Distance from Harriman to New York via Cincinnati is 1,015 miles and via Potomac Yard 893 miles. The $1.425 rate from Nashville to New York was applicable over all open routes, and complainants point out that as to traffic from Nashville routed via Emory Gap and Cincinnati or Harriman and Potomac Yard, all points on the T. C., here under consideration, with the exception of Carthage, are directly intermediate to Nashville. Contemporaneously there was in effect a proportional commodity rate of 94c on live poultry from Chattanooga, Tenn., to New York applicable via either Cincinnati or Potomac Yard. On traffic moving over the C. N. O. T. P. from Chattanooga, Harriman is directly intermediate to and about 90 miles nearer New York than Chattanooga. HELD: Applicable rate unreasonable to extent it exceeded rates to Harriman plus 94c beyond, reparation awarded. Getz v. T. K. & N. R. R., 113 I. C. C. 174.

(d) Complainant attacked commodity rates on potatoes, carloads, from points on the N. P., between Kennewick and Yakima, Wash., known as the Yakima Valley to California as unreasonable, unjustly discriminatory, unduly prejudicial and in violation of the fourth section. Present applicable rates from main line points range from 55.5 to 67c and from branch line points from 60 to 74c. They are combinations on Portland, Ore., of commodity rates of 20c from main line points, 24.5c to 27c from branch line points to Portland, plus commodity rates ranging from 35.5c to 47c beyond. The branch line points are from 5.2 to 20 miles from the main line junctions. Complainants seek the same rates from branch line points as are found reasonable from main line points, and desire the same rate 42.5c from all points of origin. From the evidence of record the only justification for a lower rate from Spokane than from the intermediate Yakima valley points is to be found in the

rates of the short line from Spokane. This being so, as the hauls from the intermediate Yakima valley points are shorter than the short line distance from Spokane, the maintenance of higher rates from Yakima valley main line points than those applicable over the short line from Spokane constitutes a departure from the fourth section. HELD: Rates attacked not unreasonable or unjustly discriminatory, but unduly prejudicial to extent that the difference between the rates attacked and the rates from Spokane to the same destinations is more than the difference between the rates on the same traffic from the same points of origin to Portland. Reparation denied. Wood Curtis Co. v. N. P. Ry., 115 I. C. C. 39.

(e) Complainant attacked carload rates on building material described in item 5135 of Agent Speidens I. C. C. 969, from Jackson, Miss., to Forsythe, Tenn., as unreasonable and in violation of section four. Articles rated fifth class. Forsythe is on the Frisco about 9 miles east of Memphis, Tenn. Shipments moved I. C. to Memphis and Frisco, 219 miles. Charged fifth class rates. Commodity rates of 28 and 29c on the material described in item 5135 applied from Vicksburg to Memphis and Forsythe. The routing is not restricted. Over certain routes Forsythe is intermediate to Memphis, but not over route of movement. HELD, rate attacked unreasonable to extent it exceeded 29c, reparation awarded. Jackson Traffic Bureau v. A. & V. Ry., 128 I. C. C. 744.

(f) Complainant alleged that the rate charged on four cars of automobiles shipped between April 7 and Oct. 4, 1923 from Lansing, and North Flint, Mich., to Santa Fe, N. M., was unreasonable unduly prejudicial and in violation of section four. Complainant attacked the rate charged on a less carload shipment consisting of a steam condenser with motor parts, shipped on June 7, 1923 from Philadelphia, Pa., to Santa Fe was unduly prejudicial. From Lansing and North Flint charged first class rate of $3.945, first class rate from group C to Deming, applicable to Santa Fe as a maximum. Prior to Sept. 1, 1923 a first class rate of $3.74 applied from group C to Columbus, N. M., on that date increased to $3.945. Applicable tariffs from Philadelphia named a combination rate of $4.435 to Santa Fe made up of $1.395 to East Fort Madison, Ia., and $3.04 beyond. Charged $4.45 rate to Deming. A rate of $4.17 applied to Columbus. In order to pass through Santa Fe en route to Columbus an out of line haul from Lamy to Santa Fe thence to Kennedy would be necessary, except over a route in connection with the N. M. C., from Santa Fe to Torrance, thence E. P. & S. W., and the rates of $3.74 and $4.17 are not applicable over that route because Torrance is not shown in the tariff as a western gateway. The rates of $3.74 and $4.17 to Columbus were only applicable in connection with the E. P. & S. W., via Tucumcari, or Deming, or El Paso, which are western gateways. The shipments from Philadelphia appears to have been overcharged 1.5c per 100 pounds. The evidence is insufficient to warrant a finding of unreasonableness or undue prejudice. HELD, except as indicated, rates assailed applicable and not unreasonable or otherwise unlawful, complaint dismissed. Merabal Motor Co. v. M. C. R. R., 129 I. C. C. 411.

§6¼. Comparison of Rates.

See Comparative Rates.

(a) It is well settled that in applying the provisions of the fourth section of the act, rates and fares of the same kind should be compared with one another. Egyptian Powder Co. v. I. C. R. R., 126 I. C. C. 293, 301.

§6¾. Exceeding Combination of Intermediates.

See Advanced Rates §5 (2½); Through Routes and Joint Rates §15.

(a) Fact that a joint rate exceeds aggregate of intermediate rates does not afford a basis for an award of reparation where commission has granted fourth section relief. Valley City Milling Co. v. C. & O., 104 I. C. C. 634, 636.

(b) Complainant attacked joint through rate charged on a car of cantaloupes from Rocky Ford, Colo., to Jacksonville, Fla., on Sept. 10, 1923, as unjust and unreasonable and unlawfully exceeded the aggregate of intermediate rates. Complainant routed shipment A., T. & S. F., Wab., L. & N., G. S. & F., S. A. L., and it moved Santa Fe to Kansas City, Mo., Wabash to East St. Louis, Ill., L. & N. to Montgomery, Ala., thence to destination over S. A. L., and G. S. & F., charged $1.75. The joint rate was can-

celed Oct. 15, 1923, on which date a combination rate of $1.275 became applicable under rule 5b of tariff circular 18a. This rate was composed of 75.5c, to Mobile, Ala., and applicable via Montgomery, Ala., and 52c beyond Mobile, applicable via Montgomery. This combination would have applied when the shipment moved if the joint rate had been canceled. The joint rate charged exceeded the Mobile combination applicable via Montgomery. HELD: Rate attacked unreasonable to extent it exceeded $1.275, reparation awarded. Hulsey Bessent Co. v. S. A. L. Ry., 112 I. C. C. 392.

(c) Complainant attacked joint rates charged on steel sheets, galvanized sheets, black sheets, angle bars, steel bars, washers, band and hoop steel, channel steel, steel plates, and wrought pipe, carloads, from Youngstown, Cleveland, Warren and Girard, O., to Black Rock and Buffalo, N. Y.. as in excess of the aggregate of intermediates and unreasonable. Applicable first class rate of 25c was charged. Combination was 23c composed of 11.5c to Erie, Pa., and 11.5c beyond, this combination being subsequently published as a through rate. HELD: Rate attacked unreasonable to extent it exceeded 23c, reparation awarded. Taylor Co. v. Pennsylvania R. R., 112 I. C. C. 541.

(d) Complainant attacked commodity rates charged on 11 cars of calcium chloride and caustic soda shipped between March 31, 1922, and Jan. 31, 1923, from Midland, Mich., to Oklahoma as illegal and in violation of section 4. Complainant makes no showing that the rates charged were higher than the lowest aggregate of intermediates over routes of movement. HELD: rate not unreasonable or otherwise unlawful, complaint dismissed. Dow Chemical Co. v. P. M. Ry., 112 I. C. C. 559.

(e) Section 4 provides that it shall be unlawful for any common carriers to charge any greater compensation as a through rate than the aggregate of the intermediate rates subject to the act. There is no violation of this clause unless the carrier maintains a specific through rate which is higher than the lowest aggregate of intermediates over the same route. Dow Chemical Co. v. P. M. Ry., 112 I. C. C. 559, 560.

(f) Complainant attacked through rate charged on two cars of bar steel, one shipped June 18, 1921, from Pittsburgh, Pa., and other shipped Dec. 7, 1921, from South Duquesne, Pa., to Orrville, O., as unreasonable and in violation of section 4. Joint rate charged 23.5c, aggregate of intermediate rates to and from Youngstown was 21c. HELD: Rate attacked unreasonable to extent it exceeded 21c, reparation awarded. Sanderson Cyclone Drill Co. v. Pennsylvania R. R., 113 I. C. C. 213.

(g) Application for authority to continue to charge for the transportation of celery from certain points in Florida to Chicago, Ill., through rates which are higher than the aggregate of intermediates contemporaneously in effect, denied. Zulfer & Co. v. Director General, 112 I. C. C. 723, 725, 726.

(h) In 88 I. C. C. 273, the commission found rates attacked on pickles, carloads, from Colorado to Oklahoma unreasonable to extent they exceeded the aggregate of intermediates over the same routes; and that such rates subject to minimum of 36,000 pounds unduly prejudicial to Oklahoma points and unduly preferential of Kansas to extent they yield earnings per ton mile higher than those yielded by the rates on pickles to Kansas. The responsibility is on defendants to remove the prejudicial relationship now existing with due regard to the other provisions of the act. Ridenour Baker Mercantile Co. v. A. T. & S. F. Ry., 113 I. C. C. 629.

(i) Complainant attacked fifth class rates charged on carloads of iron and steel articles from October, 1917, to 1924, between the Pittsburgh district and other points, on the one hand, and, on the other, Ohio points such as Cleveland, Akron and Canton, as unreasonable and in violation of the fourth section. Rates charged were higher than the aggregate of intermediate commodity rates maintained over the routes by which the class rates applied. HELD: Rates attacked unreasonable to extent they exceeded the aggregate of intermediates, reparation awarded. Firestone Tire & Rubber Co. v. Director General, 113 I. C. C. 751.

(j) Complainant attacked rates and charges on one car of steel frame pitless farm scales, shipped June 11, 1918, from Pleasant Hill, Mo., to Logan, Iowa, stopped at Missouri Valley, Ia., for partial unloading, as unreasonable and in violation of sections four and six. The car was stopped at Missouri Valley and partially unloaded. At the time the

shipment moved there was in effect a class A rate of 24.5c from Pleasant Hill to both Missouri Valley and Logan. The tariffs did not contain the provision for stopping for partial unloading. Applicable charges were 24.5c to Missouri Valley plus a less carload rate of 12.6c beyond. The first factor was in excess of the aggregate of intermediate rates, consisting of 12.5c to Omaha and 6c from Omaha to Missouri Valley. HELD: Rate of 24.5c to Missouri Valley unreasonable to extent it exceeded the aggregate of intermediates, reparation awarded. Deere Plow Co. v. Director General, 115 I. C. C. 1.

(k) In the absence of evidence rebutting the presumption, the commission has found that joint rates in excess of the aggregate of intermediate rates were to that extent unreasonable. Deere Plow Co. v. Director General, 115 I. C. C. 1, 2.

(l) Complainant attacked rates charged on six cars of oak railroad ties from Crocker, Mo., to Lyons, Ia., in April and June, 1922, as unreasonable, unlawful and in violation of section 4. Charged 35c, but refunded to basis of 32.5c. Subsequently the carriers sought to collect on basis of 38c, and on April 1, 1925, complainant paid an alleged undercharge amounting to $179.30. Shipments moved Frisco to St. Louis, Mo., Wabash to Ottumwa, Ia., C. M. & St. P. to Lyons, 570 miles. At time the first five shipments moved a combination rate of 32.5c was applicable to Savanna, Ill., a point 17 miles beyond Lyons by the route of movement but was not applicable to Lyons. HELD: Rates attacked unreasonable to extent they exceeded 32.5c and 33c, reparation awarded. Abeles & Taussig Lbr. & Tie Co. v. C. M. & St. P. Ry., 115 I. C. C. 205.

(m) Complainant attacked class A rates charged on 17 cars of vegetable hampers shipped between April 18, 1923, and May 24, 1923, from Wauchula, Fla., to Meggetts and Nosbig, S. C., as inapplicable and that shipments were misrouted. Wauchula is a local station on defendant's line, 240 miles south of Jacksonville, Fla. Meggetts and Nosbig are also on defendant's line 27 and 18 miles south of Charleston, S. C. Shipments were unrouted and moved over defendant's line from and to points, 488 and 496 miles. Through class A rates of 76c to Meggetts and 78c to Nosbig were applicable. The intermediate rates over route traversed aggregated 47c, composed of class P rate of $31 per car to Jacksonville and 31.5c beyond. HELD: Rate attacked unreasonable to extent it exceeded 47c, and claim will be handled on special docket, complaint dismissed, shipments not misrouted. Wauchula Development Co. v. A. C. L. R. R., 115 I. C. C. 207.

(n) Complainant attacked commodity rate on numerous carloads of cement shipped since June 23, 1922, from Coplay, Saylor, and Hokendauqua, Pa., to Riverhead, Long Island, N. Y., as unreasonable and in violation of fourth section. The points of origin are in the Lehigh cement district of eastern Pennsylvania. Shipments from Coplay and Hokendauqua originated on L. V. and moved via that line and L. I. Shipments from Saylor originated on the Ironton and moved over that line, C. N. J. and L. I., hauls approximating 190 miles. Riverhead is a local station on the Long Island. HELD: Rate charged unreasonable to extent it exceeded the aggregate of intermediates, 23c prior to July 1, 1922 and 20.5c beyond, reparation awarded. Awiza Corp. v. L. I. R. R., 115 I. C. C. 245.

(o) Complainant attacked through fifth class rates charged on steel plates and bar steel, carloads, from Pittsburgh, Bessemer, and Junction Transfer, Pa., to Zanesville and Malta, O., as unjust and unreasonable to extent they exceeded aggregate of intermediates. Charged 23c to Zanesville, 24c to Malta from Junction Transfer and Pittsburgh and 25c to Malta from Bessemer. The aggregate of intermediate rates over routes of movement were lower in each instance than the through class rates. HELD: Rates attacked unreasonable to extent they exceeded the aggregate of intermediates, reparation awarded. Brown Mfg. Co. v. B. & O. R. R., 115 I. C. C. 352.

(p) Complainant attacked sixth class rates charged on 61 cars of crossties shipped between April 4, 1922, and August 6, 1923, from Pennsylvania points to Buffalo, Black Rock, Lockport and North Tonawanda, N. Y., as unreasonable, unjustly discriminatory unduly prejudicial and in violation of section four. Shipments originated in southern Pennsylvania on the Huntington & Broad Top Mountain and the Pennsylvania. Fifty-eight were routed Pennsylvania to John-

sonburg, Pa., and Erie beyond, 349 and 350 miles from Bedford and Everett to Buffalo. The distances over the Pennsylvania direct from Bedford and Everett to Buffalo are 310 and 324 miles. Sixth class rates charged ranging from 26.5c to 30.5c. A commodity rate of 23.5c was established from Everett to Buffalo on Jan. 9, 1925, and on December 17, 1925, this rate was established from Everett and certain other points of origin to Black Rock, N. Y. HELD, rates attacked unreasonable to extent they exceeded 23.5c, reparation awarded. Lafayette Lumber Co. v. Pennsylvania R. R., 115 I. C. C. 445.

(q) Complainant attacked through commodity rates charged on alfalfa meal, carloads, two years prior to Aug. 2, 1924, from Colorado, Nebraska and Kansas to Jackson, Miss., as unjust, unreasonable, and as compared with rates to Vicksburg, Miss., Memphis, Tenn., and New Orleans, La., unduly preferential and in violation of the fourth section. The record discloses a number of instances where the joint rates to Jackson exceeded the aggregate of the intermediates to and from Memphis. HELD, rates attacked unreasonable to extent they exceed aggregate of intermediates, reparation awarded. Jackson Traffic Bureau v. A. & V. Ry., 118 I. C. C. 27.

(r) Complainant attacked joint fifth class rates charged on 46 cars of annealing boxes, rough castings, and unfinished rolling mill rolls, from Vandergrift, Pa., to Cleveland, Elyria, Canton and Ashtabula, O., between May 14, 1923, and Aug. 26, 1924, as unreasonable, unjustly discriminatory and unduly prejudicial, and in excess of aggregate of intermediates. The aggregate of intermediates subsequent to July 1, 1922, from Pittsburgh, Bessemer and other adjacent points was 19c via Youngstown. HELD, rates attacked unreasonable to extent they exceeded 19c, reparation awarded. United Engineering & Foundry Co. v. B. &. O. R. R., 118 I. C. C. 43.

(s) Complainant attacked class rates applicable on soap and related articles, carloads and less carloads from Jersey City, N. J., to Kentucky, Tennessee and Georgia, Cairo, Ill., and Evansville, Ind., as unreasonable and in violation of section 4. Defendants agree that all rates in violation of the aggregate of intermediates provision should be found unreasonable and reparation awarded. HELD, rates attacked unreasonable to extent they exceed the lowest aggregate of intermediate rates over the same route and the lowest rate to either Atlanta, Harriman, Birmingham or Memphis over the same route, reparation awarded. Colgate & Company v. P. R. R., 118 I. C. C. 243.

(t) Complainant attacked fifth class rate of 20c charged on steel bars, carloads, from Massilon, O., to Swissvale, Pa., between Feb. 2, 1923, and October 4, 1924, as unreasonable and in violation of section four. Aggregate of intermediates was 17.5c composed of 6c to Alliance and 11.5c beyond, which was made applicable on Nov. 15, 1925. HELD, rate attacked unreasonable to extent it exceeded the aggregate of intermediates, reparation awarded. Central Steel Co. v. Penn. R. R., 118 I. C. C. 497.

(u) Complainant attacked class rate charged on five cars of steel plates and bars shipped from Rankin, Pa., to Barnesville, O., between March 2 and July 24, 1923, as unreasonable and in violation of the fourth section. Shipments moved B. & O. via Wheeling, charged fifth class 20c, combination 9.5c to and 9.5c from Wheeling. HELD, rate attacked unreasonable to extent it exceeded aggregate of intermediates, reparation awarded. Watt Mining Car Wheel Co. v. B. & O. R. R., 118 I. C. C. 567.

(v) Complainant attacked joint commodity rates charged on 77 cars of wrought iron pipe shipped between Feb. 21 and Aug. 6, 1923, from Youngstown, O., to Louisiana as unreasonable and in violation of section four. Shipments moved Big Four, N. Y. C. and Pennsylvania and B. & O. and M. P. via Monroe, hauls ranging from 1,100 to 1,184 miles, charged 81c to Tioga and 89c to other points which are intermediate to Tioga. A rate of 79c was in effect to Alexandria 6.4 miles beyond Tioga. Fourth section departures were protected, and have since been removed by establishing distance rates as prescribed in 77 I. C. C. 473. HELD, rates attacked unreasonable to extent they exceeded 86c, the rate subsequently established to the more distant point of Alexandria, reparation awarded. Hope Engineering Co. v. M. P. R. R., 118 I. C. C. 598.

(w) Apart from statutory enactment it is prima facie unreasonable to charge

more for a shorter than for a longer haul. To charge more for a through haul than the aggregate of the intermediate rates is likewise prima facie unreasonable. Hope Engineering & Supply Co. v. M. P. R. R., 118 I. C. C. 598, 599.

(x) Rates on soap, soap powder, and cleaning, cleansing and scouring compounds, l. c. l., from Jersey City, N. J., to points in Kentucky, Tennessee, and Georgia, and to Cairo, Ill., and Evansville, Ind., found unreasonable to extent they exceeded lower aggregate of intermediate rates contemporaneously in effect. While fourth-section relief was granted regarding publication of rates to intermediate points upon demand, carriers failed to amend their tariffs in compliance therewith, which action should not be allowed to defeat right of a shipper to reparation. Reasonable rates for the future prescribed and reparation awarded. Colgate & Co. v. P. R. R., 118 I. C. C. 243.

(y) Complainant attacked through rates charged on 1700 cars of watermelons between May 19 and Aug. 4, 1922 and between April 26 and Aug. 15, 1923, from Georgia, Florida and Alabama to Chicago and Peoria, Ill., and Milwaukee, Wis., as unjust, unreasonable and in violation of section four to extent they exceeded the Nashville combination. Applicable rates charged were in all instances in excess of the aggregate of the intermediate rates to and from Nashville. They were protected by appropriate applications. The departures were removed effective Aug. 15, 1923, by increasing the factors from Nashville from 32 to 47.5 cents on traffic to Chicago and Peoria from 34.5 cents to 50 cents on traffic to Milwaukee. HELD, rates attacked unreasonable to extent they exceeded aggregate of intermediates, reparation awarded. Alderman v. A. & V. Ry., 120 I. C. C. 387.

(z) There is no violation of the fourth section unless the carrier maintains a specific through rate which is higher than the lowest aggregate of intermediate rates over the same route. McLeod v. T. & P. Ry., 120 I. C. C. 550, 551.

(aa) The commission has found that where a through rate exceeds the aggregate of the intermediate rates it is prima facie unreasonable to that extent. Bissinger & Co. v. G. N. Ry., 120 I. C. C. 745, 749.

(bb) Rates on sulphate of alumina from Kokomo, Ind., to Wisconsin destinations found unreasonable to extent they exceed the aggregate of intermediate rates contemporaneously in effect, and unduly prejudicial to extent they exceed the contemporaneous rates on like traffic from Chicago Heights and Joliet, Ill., by more than 5.5 cents. Reasonable and nonprejudicial rates prescribed for future. Como Chemical Co. v. A., T. & S. F., 120 I. C. C. 517.

(cc) Upon further hearing, previous finding in 89 I. C. C. 356, that joint rates on gasoline from points in Texas and Oklahoma to destinations in California were applicable, and that there is no violation of the aggregate-of-intermediates clause of section 4 of the act unless carriers maintain a specific through rate which is higher than lowest aggregate of intermediate rates over same route, the product of intermediate rates, treated by the combination rule and resulting in something less than the aggregate, not being an aggregate within meaning of the fourth section, affirmed. McLeod v. T. & P., 120 I. C. C. 550.

(dd) Complainant attacked sixth class rate of 93.5 cents charged on three less carloads of rice from New Orleans, La., to Lynchburg, Va. Feb. 16, March 24 and May 12, 1922 as unreasonable to extent it exceeded aggregate of intermediates. Shipments moved 983 miles over N. O. N. E., A. G. S., Southern through Montview, Va., 6 miles south of Lynchburg. Defendants maintain commodity rate of 59.5 cents to Montview and sixth class 14 cents beyond. No evidence was introduced tending to show that the sixth class rate was unreasonable per se. HELD, rate attacked not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Lynchburg Traffic Bureau v. N. O. N. E. R. R., 122 I. C. C. 371.

(ee) Complainant attacked through commodity rate charged on two cars of glass bottles from Terre Haute, Ind., to Homer, La., June 27, 1922 and April 6, 1923 as unreasonable to extent they exceeded 88 cents and 79.5 cents. Homer is on the L. & N. W., 42.5 miles south of McNeil, Ark. Prior to July 1, 1922 a commodity rate of 79 cents was maintained from Terre Haute to destinations on L. & N. W., from McNeil to Mohawk, 21 miles south of McNeil, and 88 cents to Gibsland and Chestnut. Fifth class

rate of 120 cents applied to all other points. On July 1, 1922 these rates became 71.5 cents, 79.5 cents and 108.5 cents, on Nov. 27, 1923 commodity rates were established. Aggregate of intermediate rates on Mohawk were 102.5 cents prior to July 1, 1922 and 92.5 cents thereafter. HELD, rates attacked unreasonable to extent they exceeded aggregate of intermediates on Mohawk, reparation awarded. Root Glass Co. v. E. I. & T. H. Ry., 123 I. C. C. 68.

(ffgg) Complainant attacked rate charged on one triple carload and one double carload of cedar poles shipped on Dec. 17 and 20, 1923 from Sand Point, Ida., to Shingle Springs, Calif., as unreasonable to extent it exceeded the aggregate of intermediates. Sand Point on the G. N., is 75 miles east of Spokane, Wash. Shingle Springs is 48 miles east of Sacramento, Calif. Shipments moved G. N., to Spokane, S. P. & S., to Portland, and S. P., beyond, 1,178 miles, charged 62 cents to Brighton and 17 cents class B basing rate beyond. The governing tariff specified that the rate from Sand Point to Shingle Springs would be made by the addition of this basing rate to the 62 cent commodity rate and thus prescribed a specific maner of constructing the through rate. At the time of movement the rates on cedar poles by the route of movement from Sand Point to Portland and from Portland to Shingle Springs were, and now are, 34 and 37 cents. HELD, rate attacked unreasonable to extent it exceeded 71 cents, reparation awarded. McFarland Co. v. G. N. Ry., 123 I. C. C. 631.

(hh) Complainant attacked rates charged on manufactured iron and steel articles, carloads, from Newton Falls, Youngstown, Niles and points taking same rates to points in western New York and northwestern Pennsylvania as unreasonable, unduly prejudicial and in violation of the fourth section. Rates charged exceeded the aggregate of intermediates. HELD, rates attacked unreasonable to extent they exceed 18.5 cents for 90 miles and less to 23 cents for over 180 miles, reparation. Concrete Steel Co. v. B. & O. R. R., 123 I. C. C. 677.

(ii) A departure from long-and-short-haul provision of section 4 of the act raises a presumption of unreasonableness in the higher rate to the intermediate point, but this presumption is rebuttable. Cardosi & Co. v. B. & O., 122 I. C. C. 1.

(jj) Rates on glass bottles from Terre Haute, Ind., to Homer, La., found unreasonable as compared with rates to various Louisiana and Texas points for comparable distances and to extent they exceeded the aggregate of rates to and from Mohawk, Homer being intermediate thereto over route of movement specified in bills of lading. Reparation awarded. Root Glass Co. v. E., I. & T. H., 123 I. C. C. 68.

(kk) A rate which exceeds the aggregate of intermediates is prima facie unreasonable. Kroehler Mfg. Co. v. C. N. Ry., 123 I. C. C. 555.

(ll) The aggregate of intermediate rates within the meaning of section four is the sum of the separate rates, and not the sum of those rates subjected to the combination rule. Walrath & Sherwood Lumber Co. v. C. & N. W. Ry., 126 I. C. C. 97, 98.

(mm) The Commission has previously stated that joint rates in excess of the combinations of local rates which would apply in the absence of joint rates are prima facie unreasonable. Walrath & Sherwood Lumber Co. v. C. & N. W. Ry., 126 I. C. C. 97, 101.

(nn) Complainant attacked through fifth class rate charged on carloads of boiler tubes between Dec. 20, 1923 and May 17, 1924 from Washington, Pa., to Zanesville and Cleveland, O., as unreasonable and in violation of the aggregate of intermediate provisions of section four. Rates charged were higher than the aggregate of intermediates via route of movement. HELD, rates charged unreasonable to extent they exceeded the aggregate of intermediates, reparation awarded. Tyler Tube & Pipe Co. v. B. & O. R. R., 126 I. C. C. 135.

(oo) Complainant attacked combination rates charged on eight cars of broom corn shipped during Oct. and Nov. 1921 from Leely, Longdale, and Fairview, Okla., to Philadelphia and Hamburg, Pa., and Atco, N. J., as unreasonable, unjustly discriminatory, unduly prejudicial, inapplicable and in violation of the fourth section. The general basis for constructing rates from southwestern territory to eastern territory has been combination on Chicago or Ohio and Mississippi river crossings. On Feb. 14, 1916 joint rates on broom corn were published in order that the lower combination via

Memphis and other lower Mississippi river crossings might be available on traffic via the northern gateways. On April 17, 1922 the joint rates were canceled, permitting lowest combination to again apply. The aggregate of intermediate rates via Chicago and East St. Louis were lower than the joint rates. HELD, rates charged unreasonable to extent they exceeded the aggregate of intermediates, reparation awarded. Hamburg Broom Works v. C. R. I. & P. Ry., 126 I. C. C. 171.

(pp) The aggregate of intermediate rates within meaning of section 4 of the act is the sum of separate rates, and not the sum of those rates subjected to combination rule. See 96 I. C. C. 259. Walrath & Sherwood Lbr. Co. v. C. & N. W., 126 I. C. C. 97, 98.

(qq) Upon contention that combination of domestic commodity rates lower than the import rate is a violation of the aggregate-of-intermediates clause of section four of the act, HELD: Contention is without merit, for in applying provisions of the fourth section, rates and fares of the same kind must be compared with one another. See Conf. Ruling 304. Moreover, domestic rates apply only in absence of tariffs naming specific import rates. Egyptian Powder Co. v. I. C. 126 I. C. C. 293, 301.

(rr) Where through rate, higher than aggregate of intermediates, is attacked under Act to Regulate Commerce, § 1 (Comp. St. § 8563), there is a prima facie presumption that such higher through rate is unreasonable and unlawful, though in proceeding under section 4, as amended by Act June 18, 1910, § 8 (Comp. St. § 8566), specifically declaring such a rate unlawful, there is no occasion to consider either presumption of unreasonableness or justification for higher rate; the rate involved being either violative of that section, or not depending on whether an adequate and timely application to suspend operation of the section has been filed and granted, or remains undetermined. Patterson, v. Louisville & N. R. Co., 46 Sup. Ct. 8.

(ss) Complainant alleged that charges collected on one car of cabbage shipped from Cortland, N. Y., Oct. 15, 1924 to Williamson, W. Va., were unreasonable and in violation of section four. The latter was based on the joint rate being higher than the combination on Kenova, W. Va., but the shipment did not move that way. Shipment was tendered to the L. V. on a bill of lading routing "N. & W. del.". It moved L. V. to East Penn. Jct., Pa., Reading to Shippenburg, Pa., W. M. to Hagerstown, Md., thence N. & W. to destination. Charged joint rate of 79c. There was in effect a combination rate of 65c, made up of 34c to Kenova and 31c beyond. Complainant alleged charges collected on a car of agricultural implements from Syracuse, N. Y., Feb. 9, 1923 to Williamson, W. Va., were unreasonable and that shipment was misrouted. The only routing instructions specified in the bill of lading were "N. Y. C. care of N. & W." Shipment moved N. Y. C. to Newberry Jct, Pa., Reading to Shippensburg, W. M. to Hagerstown, thence N. & W. to Williamson. Charged through joint rate of 79c. Combination rate of 65c was in effect using 34c to Kenova plus 31c beyond. HELD, shipments misrouted, reparation awarded. Amicon Co. v. L. V. R. R., 128 I. C. C. 34.

(tt) Complainant attacked combination rates charged on nine cars of cedar posts and poles moving on and after Nov. 28, 1922 from Hollywood, Larkinsville, and Lim Rock, Ala., Rising Fawn, Ga., and Morristown and Talbott, Tenn., to Illinois as unreasonable and in violation of section 4. Shipments were unrouted except that the delivering carrier was designated in each instance. All of the shipments moved via East St. Louis, Ill., except the one originating at Rising Fawn which originated and moved via Cairo, Ill. From Lim Rock to Mason City and from Rising Fawn to Olive Branch the through rates were higher than the aggregate of intermediates. HELD, reparation awarded based on combination. Nebraska Bridge Supply & Lumber Co. v. A. G. S. Ry., 128 I. C. C. 94.

(uu) Complainant attacked rates of 64.5c charged on four cars of rough marble and 93.5c charged on six cars of polished marble between Nov. 30, 1923 and March 18, 1924 from Marble, Colo., to Clifford Spur, Calif., as unreasonable to extent they exceeded 56c and 84.5c respectively. Marble is on the C. R. & St. J. in central western Colorado. Clifford Spur is within the city limits of Los Angeles, Calif., but beyond the switching limits of the L. A. & S. L. Charged 5c Marble to Redstone, 11 miles plus 56 and 84.5c on rough and polished

marble from Redstone to Los Angeles, plus class rates of 3.5 and 4c from Los Angeles to Clifford Spur. Subsequent to movement defendants established commodity rates of 56 and 84.5c from Redstone to Glendale, Calif., beyond Los Angeles and Clifford Spur. HELD, rates attacked unreasonable to extent they exceeded 61 and 89.5c, reparation awarded. Clifford Co. v. C. R. & S. J. Ry., 128 I. C. C. 182.

(vv) In 77 I. C. C. 431, Commission found that the rates on wool in the grease from points in Iowa to Boston, Mass., were unreasonable to extent they exceeded the sum of the proportional fourth class rates from the points of origin to west bank Mississippi river crossings and the joint proportional commodity rate of 92c thence to destination. HELD, reparation awarded. Boston Wool Trade Asso. v. B. & A. R. R., 128 I. C. C. 185.

(ww) Complainant alleged that rates charged on a car of pears from Fayette Jct., Ark., to Jackson, Miss., Sept. 24, 1924 was unreasonable and in violation of section four. Fayette Jct., is on the Frisco, about 2 miles south of Fayetteville, Ark., shipment was billed to Kansas City, Mo., but while enroute was reconsigned to Memphis, Tenn., and after arrival at Memphis was reconsigned to Jackson, moving through Fayetteville to Monett, Mo., thence Memphis and over I. C. 610 miles, charged combination rate of 1.055, defendant admitting applicable rate was 59.5c to Memphis and 45.5c beyond. HELD, rate attacked unreasonable to extent it exceeded 85.5c reparation awarded. Jackson Traffic Bureau, v. I. C. R. R., 129 I. C. C. 497.

(xx) Complainant alleged that rate charged on a tank car of benzol from Eagle Pass, Tex., to Ivorydale, O., was unreasonable and in violation of the fourth section. Shipment originated at Rosita, Mexico, Feb. 10, 1925, was consigned to Ivorydale, O., a point within the switching district of Cincinnati, and moved from Eagle Pass, via G. H. & S. A. to Fort Worth, C. R. I. & G. and C. R. I. & P. to St. Louis, Mo., and Pennsylvania, beyond, charged fifth class $1.41. On Feb. 10, 1926 a commodity rate of 39.5c on benzol was established from Eagle Pass to St. Louis, Mo., and that rate, combined with a commodity rate of 24c from St. Louis to Cincinnati, made a combination of 63.5c. HELD, rate charged unreasonable to extent it exceeded 63.5c, reparation awarded. Caldwell & Taylor, v. C. R. I. & G. Ry., 129 I. C. C. 626.

(yy) A through rate exceeding a combination under rule 5 b does not violate the fourth section. National Tube Co. v. A. T. & S. F. Ry., 129 I. C. C. 693, 694.

(zz) Upon reconsideration, maintenance of combination rates on rosin from points in the South and Southeast to Hamilton, Ontario, Canada, accorded transit at Ivorydale (Cincinnati), Ohio, higher than joint rates from more distant points over same route, in same direction, the shorter being included within the longer distance, when shipments are accorded transit at Latonia or Central Covington, Ky, found to contravene the long-and-short-haul provision of section 4 of the act. See 35 I. C. C. 27 and other cited cases. Moreover, such rates contravene the fourth section notwithstanding fact that such rates are joint rates from points within United States to Canadian destinations. See Conf. Ruling 447; 66 I. C. C. 627, and other cited cases. Former report 112 I. C. C. 381. Procter & Gamble Co. v. A. & V., 129 I. C. C. 385.

§ 6¾a. Combinations Subject to Section 4.

(a) Upon contention of complainants that, under an intermediate clause and open routing of the tariffs, where point of destination was intermediate to a named point designated as taking a particular group rate, a shipment could be routed over any lines parties to tariffs, and that hence the rate to any point not specifically named would be that applicable to unnamed intermediate points located between two named points, HELD: Not only destinations named are indexed within meaning of intermediate rule in question, but all points falling with in the descriptions of "all points," "all other points," and "unnamed intermediate points located between two of the above-named points" are likewise indexed; i. e., a point in the higher rated territory covered by the description "all other points" is not to be regarded as located between two named points merely because there is a possible route from one named point to another through such higher rated territory. Pacific Coast Shippers' Asso. v. A., C. & Y., 112 I. C. C. 527.

(b) Commodity tariff on tinware from Chicago, Rockford, and Waukegan, Ill., Milwaukee, Wis., and points taking same rates made St. Louis basis of rates applicable to McIntosh, Mo. Such tariff carried an intermediate clause but index of stations named neither Burlington nor Keokuk, Iowa. HELD: That such tariff authorizes application of the McIntosh and St. Louis basis of rates to Keokuk and Burlington since routing from Milwaukee is specified through Chicago and from Waukegan through Chicago or Sterling, Ill., with no routing specified beyond these junction joints. In absence of routing instructions over direct route, such tariff therefore authorizes application of the McIntosh and St. Louis basis to Burlington and Keokuk as intermediate points over permissible routes through those points. Burlington Shippers' Asso. v. C., B. & Q., 112 I. C. C. 533, 536, 537.

(c) Rate on crushed stone from New Ulm, Minn., to Holstein, Iowa, found not unreasonable as compared with lower rates to Sac City and Lake View, Iowa, farther distant points. While an item in governing tariff carried the so-called intermediate rule which provided for application to unnamed points of rate to next more distant point, Holstein was itself named in the tariff, therefore, rate to next more distant point was not applicable. Everist & Co. v. C. & N. W., 113 I. C. C. 267.

(d) Combination rates charged on grain and products from points in Colorado, Kansas and Nebraska, to destinations in Tennessee, Georgia, and Alabama, found legally assessed. Lower joint rates applied to Greenwood, Miss., and New Orleans, La., farther distant points, and while tariff provided for their application to directly intermediate points, it also carried complete routes, none of which operated through intermediate destinations here involved. Complainant here attempts to ignore such routes and construct unauthorized circuitous routes via which destinations would be intermediate to Greenwood and New Orleans. The naming of specific routes to the farther distant points, however, eliminated all other routes, and conclusion set forth in rule 4 (j) of Tariff Circular 18—A which provides that "When a tariff specifies routing the rates may not be applied via routes not specified," is controlling. Russell Grain Co. v. A. G. S., 113 I. C. C. 701.

(e) Complainant attacked commodity rates on common brick, carloads, on and after Dec. 6, 1924, from Nashville, Tenn., to Moorehead and Ashland, Ky., and points taking same rates as unreasonable, unduly prejudicial and inapplicable. Shipments were routed L. & N—C. & O., by complainant and moved over L. & N. to Winchester, Ky., and C. & O. beyond, excepting one shipment which moved T. C. and Southern to Louisville and C. & O. beyond. Moorehead is 47 miles from Winchester and 335 miles northeast of Nashville via Winchester, about 350 miles via Louisville. Rates charged were combinations on Winchester and Louisville. Six of the shipments moved between Dec. 12, 1924, and May 6, 1925, when a specific commodity rate of 13c applied from Nashville to Maysville, Ky., and under an intermediate clause this rate applied from Nashville to Morehead, via either Louisville or Winchester, shipments overcharged. Under complainant's routing instructions it was the duty of defendant to route the remaining shipments over the cheapest reasonable route, in this instance through Louisville, shipments misrouted. HELD, charges on shipment of Dec. 6, 1924, inapplicable to extent they exceeded 16.4c, and unreasonable to extent they exceeded 15.5c charges on shipments between Dec. 12, 1924, and May 6, 1925, inapplicable to extent they exceeded 13c and subsequent to May 6, 1925, unreasonable to extent they exceeded 15.5c, reparation awarded. Bush & Co. v. L. & N. R. R., 115 I. C. C. 45.

(f) Complainant attacked combination rate charged on one car of lumber shipped Oct. 5, 1921, from Brooksville, Miss., to Chicago, Ill., as illegal, unreasonable and in violation of section four. Brooksville is on the M. & O., shipment moving to Chicago, a distance of 705 miles, in accordance with shipper's routing instructions: Rives, I. C., Paducah, C. B. & Q., Litchfield, Wab., C. M. N. W. dely. Charged combination rate of 38.5c, subsequently collected on joint rate of 39.5c. The rate sought is constructed by use of the combination rule to the factors to and beyond Paducah, Ky., 19c and 21.5c, respectively. In the tariff naming the joint rate there was a restrictive clause reading "will not apply via C. B. & Q. R. R." But under the wording of the tariff this restriction had application only to traffic originating at stations

served by certain named carriers, not including the M. & O. It is clear therefore, that the routing restriction referred to did not apply to the shipment under consideration, and joint rate finally charged was applicable. It is also clear that the existence of the joint rate prohibited the use of the combination rule. HELD, rate charged of 39.5c applicable and not unreasonable or otherwise unlawful, complaint dismissed. Thornton Claney Lumber Co. v. M. & O. R. R., 118 I. C. C. 25.

(g) It is equally clear that the rates as published did not constitute a departure from the aggregate of intermediate clause of the fourth section because the combination rate treated by the socalled combination rule is not an aggregate of the intermediate rates within the meaning of that section. Thornton Claney Lumber Co. v. M. & O. R. R., 118 I. C. C. 25, 26.

(h) The specific joint rates were not rendered inapplicable under the alternative rule in the same tariffs for the intermediate rates did not aggregate less than the joint rates. The product of intermediate rates treated by a rule which results in something less than the aggregate is not the aggregate within the meaning of the alternative rule. McLeod v. T. & P. Ry., 120 I. C. C. 550, 551.

(i) Conference ruling 304 D and fourth section order No. 5 authorize the carriers to absorb switching charges on competitive and not on non-competitive traffic, even though departures from the long and short haul provision of the fourth section may result therefrom, but neither the ruling nor the order authorize this to be done in violation of the aggregate of intermediates provision of the fourth section. Bissinger Co. v. G. N. Ry., 120 I. C. C. 745, 748.

(j) When the assessment of a switching charge in connection with transit results in greater aggregate compensation to the carrier than the sum of the intermediate rates, it can not be considered that section four has thereby been violated, for the services performed are not the same in the two instances. Transit involves an additional service on the part of the carrier for which a separate charge may be made; the switching charge is an additional expense incident to the transit service. Bissinger Co. v. G. N. Ry., 120 I. C. C. 745, 748.

(k) The establishment of a rate subject to rule 77 does not make that rate applicable to intermediate points but is only a holding out that it will be extended to said intermediate points upon reasonable request. Woodward Auto Co., v. C. M. & St. P. Ry., 129 I. C. C. 613, 615.

(l) Complainant alleged that charges collected or which defendants are endeavoring to collect on 190 cars of wrought pipe shipped from Lorain, O., to Kansas during the period from April 1, 1924 to May 9, 1925, were in violation of sections 1, 2, 3 and 4 of the act. Lorain is 25 miles west of Cleveland. 186 of the shipments were charged at the rates to and from Jacksonville, Ill., remaining 4 charged on rate of 35.5c to Mississppi river crossings and 46.5c beyond to Madison and Eureka and 42c to Gridley. Though published in separate tariffs, the basing rates from the river crossings and the local rates from St. Louis territory which included Jacksonville were the same to the destinations, while from Lorain the rate to Jacksonville was 1.5c less than the rate to the river crossings. There were no applicable joint through rates. However, the tariff publishing the basing rates from the river crossing provided that, in the absence of specific through rates, rates from described territories, including that in which Lorain is located, would be made by adding to those basing rates the rates shown in other tariffs on file with the Commission. The through rates made on the river crossings were therefore applicable in preference to the Jacksonville combination. On May 1, 1925 the rates from Jacksonville were increased by placing that point in Peoria territory, with the result that the combination rates made thereon are no longer lower than the combination rates constructed on the river crossings. HELD, prior to May 1, 1925 the rates assailed were unreasonable to extent they exceeded the Jacksonville combination, reparation awarded. National Tube Co. v. A. T. & S. F. Ry., 129 I. C. C. 693.

§6¾b. Combination Rule.

(a) Rate charged under an exception to classification on prepared roofing moving over the Chicago & Eastern Illinois from Chicago to Terre Haute, Ind., found illegal. Legal rate found to be a specific joint commodity rate published in a tariff to which the C. & E. I. was a party from Chicago to Midland City, Ill.,

applicable over its line to Terre Haute and the Pennsylvania beyond. This tariff carried the intermediate rule which provided that rates named therein would apply from or to directly intermediate points not indexed, or if indexed, but with no rate shown, such tariff not naming a specific rate to Terre Haute. Refund of overcharges directed. Elaborated Ready Roofing Co. v. C. &. E. I., 109 I. C. C. 401.

(b) Complainant took advantage of unrestricted combination rules published in local tariffs of intermediate short lines by routing shipments over unusual routes. Shipments could have been billed without intervention of intermediate short lines. Tariffs of originating and delivering carriers specifically prohibited use of such rule and computation of rates by its use would require the intermediate roads to haul traffic for less than nothing. FOUND: Holding out principle laid down in the Sligo case, 62 I. C. C. 643; 73 I. C. C. 551, is not controlling. In no case applying that principle was a carrier required to protect a rate less than nothing or surrender all its earnings to connections; nor does the act permit or require transportation without any charge or at less than no charge. When, as here, such a result is sought to be accomplished it is to be condemned and the commission may intervene to prevent unwarranted dissipation of carrier revenues regardless of where the responsibility lies. Combination rules here produce a result unlawful per se and are of no effect. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597.

(c) Rule 77 was promulgated in order to obviate the necessity of publishing commodity rates from and to intermediate points where shipments may never be made, and has no application where specific commodity rates apply from or to intermediate points. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 614.

(d) The publication of a rate under authority of rule 77 is a substantial compliance with the requirements of the fourth section. Lissberger & Co. v. P. R. R. Co., 115 I. C. C. 521, 525.

(e) Rule 77 is a substantial compliance with the long and short haul clause of the fourth section, and that rates to the intermediate points are unreasonable to extent they exceed the lower rates to the farther distant points, even though there had been no previous request for the establishment of the lower rates to the intermediate points. Atmore Produce Co. v. M. S. B. & P. Ry., 115 I. C. C. 599, 600.

(f) Complainant attacked combination commodity rate charged on two cars of charcoal shipped Oct. 27, 1923, and March 26, 1924, from Gaskins Siding, Fla., to Amsterdam and Wataga, Ga., as unreasonable, unduly prejudicial and in violation of the fourth section. Shipments moved M. & B. to Marianna, Fla., 40 miles, L. & N. to River Jct., 25 miles, and A. C. L. beyond, 39 and 36 miles, total 104 miles to Amsterdam and 101 miles to Wataga, charged commodity rate of $5.29 to Amsterdam and to Wataga, combination of $5.29 to Amsterdam and $2.10 beyond. Wataga is directly intermediate to and 3 miles less distant than Amsterdam. The rate of $5.29 was subject to rule 77, and effective April 30, 1925, a rate of $4.35 was published to both points. HELD, rate attacked unreasonable to extent it exceeded $4.35 per ton, reparation awarded. American Sumatra Tobacco Co. v. A. C. L. R. R., 118 I. C. C. 583.

(g) Rule 77 is a substantial compliance with the long and short haul section of the fourth section. American Sumatra Tobacco Co. v. A. C. L. R. R., 118 I. C. C. 583, 584.

(h) Rates on rough marble moving interstate from New York Harbor points to Buffalo, N. Y., found unreasonable to extent they exceeded lower rates contemporaneously maintained from Long Island City, N. Y., a farther distant point, to same destination, inasmuch as tariff naming lower rates carried a rule conforming to rule 77 of Tariff Circular 18-A. Reparation awarded. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543.

(i) The commission has uniformly found that when rates to farther distant points lower than to intermediate points are published subject to rule 77 of Tariff Circular 18-A, a substantial compliance with long-and-short-haul provision of section 4 of the act is thus affected and rates to intermediate points are unreasonable to extent they exceed lower rates to farther distant points. Reparation is generally awarded to lower-rate basis even though there have been no previous requests for establishment of lower rates to intermediate points. See 63 I. C. C.

327, 331. Atmore Produce Co. v. M. S., B. & P., 115 I. C. C. 599, 600.

(j) Rate on charcoal from Gaskins Siding, Fla., to Wataga, Ga., higher than to Amsterdam, Ga., a farther distant point, found not in violation of long-and-short-haul clause of section 4 of the act. The lower rate to farther distant point was subject to provision of rule 77 of Tariff Circular 18-A, and although complainant failed to make required request the commission has uniformly found that such a rule in a tariff is a substantial compliance with fourth section, and has awarded reparation on shipments moving to the intermediate point. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 583.

(k) Complainant attacked commodity rate charged on glue stock shipped between June 30, 1922 and March 26, 1924, from Wilmington, Del., to Philadelphia, Pa., as unreasonable and in violation of the fourth section. Distance hauled 36 miles, charged 11.5 cents. Contemporaneously the rate on tannery refuse Wilmington to Camden, N. J., was 10 cents subject to rule 77, and this rate was established to Philadelphia May 16, 1924. HELD, rate attacked unreasonable to extent it exceeded 10 cents, reparation awarded. Tunnell & Co. v. P. R. R., 120 I. C. C. 425.

(l) The tariff naming the rate was subject to rule 77 which is a substantial compliance with the requirements of the fourth section. Tunnell & Co. v. P. R. R., 120 I. C. C. 425, 426.

(m) Complainant attacked commodity rate charged on five mixed cars of bones, horns, and hoofs forwarded during the period Aug. 28, 1922 to Dec. 20, 1923, from El Paso, Tex., to Chicago as unreasonable, inapplicable and in violation of section four. Effective Feb. 8, 1923, defendants provided for a deduction of $7.50 per car in the carload rates on shipments from points beyond the Orient lines which are handled by those lines as intermediate carriers. Charged 78 cents El Paso to Chicago, deducted $7.50. Contemporaneously there was a joint commodity rate of 68 cents on bones, hoofs, and horns, in mixed carloads, from Deming, N. M., to Chicago. This was a fourth section departure, the tariff naming the 68 cent rate being subject to rule 77. HELD, applicable rate of 78 cents unreasonable to extent it exceeded 68 cents, subject to reduction of $7.50 per car, reparation awarded. Tomkins Summer Co. v. C., M. & St. P. Ry., 120 I. C. C. 677.

(n) The publication of a rate under authority of rule 77 is a substantial compliance with the requirements of the fourth section, and equivalent to an admission by defendants that the higher rate from the intermediate point is unreasonable. Tomkins Summer Co. v. C., M. & St. P. Ry., 120 I. C. C. 677, 679.

(o) The publication of rule 77 in a tariff is a substantial compliance with the provisions of section four of the act Grain and Grain Products from North Dakota, 123 I. C. C. 49, 54.

(p) Complainant attacked commodity rates charged on numerous cars of petroleum products from East Chicago, Ind., to Houston, Tex., from July 1, 1922 to Jan. 22, 1924 were illegal to extent they exceeded 71 cents, and from Jan. 1, 1924 to Sept. 1, 1925 unreasonable and unduly prejudicial to extent they exceeded 69 cents, which rate was established on the latter date. With respect to the shipments which moved between Jan. 1, 1924 and Sept. 1, 1925 complainant contended that the rates of 71, 74.5, 78 and 80 cents were unreasonable to extent they exceeded the New Orleans combination of 69 cents using the combination rule. Full New Orleans combination was 74.5 cents. HELD, rates attacked between Jan. 1, 1924 and Sept. 1, 1925 unreasonable to extent they exceeded 69 cents, reparation awarded. Sinclair Refining Co. v. A., T. & S. F. Ry., 123 I. C. C. 537.

(q) The publication of a rule in conformity with rule 77, is a substantial compliance with the requirements of the fourth section, and the publication of a lower rate from a farther distant point under authority of that rule is equivalent to an admission that the publication of a higher rate from an intermediate point in unreasonable. Innis Speiden & Co. v. N. Y., O. & W. Ry., 123 I. C. C. 577, 578.

(r) Fifth-class rate on quebracho tanning extract, from New York Harbor points to Ludlow, Pa., found inapplicable. Contemporaneously a lower commodity rate applied to a farther-distant point and as tariff carried the intermediate rule which provided for application of rates to intermediate points not specifically named in the tariff, such lower rate was also applicable to Ludlow. Reparation awarded. Curtis Leather Co. v. P. R. R., 123 I. C. C. 1.

(s) Publication of rule 77 of Tariff

Circular 18-A, is a substantial compliance with provisions of section 4 of the act. Grain and Products from North Dakota, 123 I. C. C. 49, 54.

(t) Applicable rate on potatoes from Pablo and Whitehall, Mont., to New Orleans, La., found not unreasonable as compared with lower rate contemporaneously in effect to Houston, Tex., a farther distant point. While subsequent to movement tariff naming lower rate was made subject to rule 77 of Tariff Circular 18-A, and such lower rate was made applicable from and to points here involved, neither the subsequent reduction nor the fourth-section violation, in and of themselves, establish unreasonableness of the rate to New Orleans. Moreover, carriers showed that higher rates contemporaneously applied on this traffic between various points in same general territory for comparable distances. Kohlman & Sugarman v. L. & N., 123 I. C. C. 56.

(u) Rates on brick, and articles taking same rates, from designated points in Ohio and West Virginia to Verona, Brackenridge, and Tarentum, Pa., found applicable. While lower rates contemporaneously applied from same points of origin to Glassmere and Butler Junction, Pa., to which Tarentum and Brackenridge are intermediate, and governing tariff carried an intermediate clause which specifically provided that it had application only to points to which specific rates were not named, here the tariff named specific rates to Tarentum and Brackenridge. Globe Brick Co. v. P. R. R., 123 I. C. C. 498.

(v) Where a fourth-section application is on file with commission and pending its disposition the rates from the intermediate and farther distant points are equalized, such equalization removes protection afforded by application, and if thereafter carriers reestablish higher rates from the intermediate than from the farther distant point a new violation of the long-and-short-haul clause of section 4 of the act is created. See 256 U. S. 408, 416. Globe Brick Co. v. P. R. R., 123 I. C. C. 498, 502.

(w) Publication of a rule in conformity with rule 77 of Tariff Circular 18-A, is a substantial compliance with requirements of fourth section of the act, and publication of a lower rate from a farther distant point under authority of that rule is equivalent to an admission that publication of a higher rate from an intermediate point is unreasonable. Innis, Speiden & Co. v. N. Y., O. & W., 123 I. C. C. 577, 578.

(x) Sixth-class rate on lumber from Burks Falls, Ontario, Canada, to Pontiac, Mich., found inapplicable. Contemporaneously tariff carrying an intermediate rule published a lower joint commodity rate from Burks Falls to Owosso, Mich. As Pontiac is intermediate to Owosso over route of movement and as rate was unrestricted in its application, it was therefore applicable to Pontiac and shipments were overcharged. Refund of overcharges directed. Strable Lbr. & Salt Co. v. C. N. Ry., 123 I. C. C. 585.

(y) Shipments of iron pipe and oil-well supplies from Fruita, Colo., and Price, Utah, to Sunburst and Kremlin, Mont., routed Denver & Rio Grande Western via Ogden and Salt Lake City, Utah, respectively, Union Pacific and Great Northern beyond, found not misrouted. Contemporaneously tariff published a lower rate from Pueblo, Colo., a point east of Fruita and Price on the Denver & Rio Grande Western to Helena, Mont., and carried the intermediate rule which provided for application of rates to unnamed points directly intermediate to and on the same line with named stations. However, "on the same line" was interpreted to mean "on the same railroad" in 115 I. C. C. 529, and since there are no points on Denver & Rio Grande Western west of Fruita and Price from which through rates are published to Helena, the lower rate under the intermediate rule did not apply. Carter Oil Co. v. D. & R. G. W., 123 I. C. C. 596.

(z) Rates subject to rule 77 of tariff circular 18-A are in substantial compliance with the requirements of the fourth section. Ogden Grain Exchange v. A. E. R. R., 126 I. C. C. 255, 268.

(aa) The product of intermediate rates treated by a rule which results in something less than the aggregate is not the aggregate within the meaning of the alternative rule. California Dressed Beef Co. v. A. T. & S. F. Ry., 128 I. C. C. 607, 610.

(bb) Complainant alleged sixth class rates charged on wrapping paper, in carloads, shipped on and after Dec. 20, 1923, from Richmond, Va., to Harlem River, N. Y., were and are unreasonable. Sixth class rate of 38c applied until Nov. 25, 1924 when a commodity rate of 30c was published. The rate of 28.5c from Covington to New York, also

applies to Harlem River. This rate was and is subject to rule 77 of tariff circular 18-A, and as it is unrestricted with respect to routing it was and is applicable via Richmond and the routes over which these shipments moved. HELD, rate assailed unreasonable to extent it exceeded 28.5c, reparation awarded. Albemarle Paper Mfg. Co., v. R. F. & P. Ry., 129 I. C. C. 502.

(cc) The Commission has frequently found that rule 77 is a substantial compliance with the fourth section of the act, and awarded reparation on shipments moving from or to intermediate points under rates that were higher than those from or to more distant points where the rates from or to the latter points were subject to rule 77, and the less distant points were intermediate over the route the traffic moved. The publication of that rule does not warrant a finding of unreasonableness where the point which is claimed to be intermediate to the lower rated point is intermediate only via circuitous and unnatural routes over which no shipper could reasonably request transportation under the provisions of section 1 (4) of the act. Woodward Auto Co.. v. C. M. & St. P. Ry., 129 I. C. C. 613, 615.

(dd) Complainant alleged that illegal charges were collected on various carloads of automobiles and parts between June 11, 1918 and Feb. 7, 1920 from Detroit, Flint and Alma, Mich., Chicago, Ill., Cleveland, O., and Racine, Wis., on agricultural implements from Waterloo, Ia., Chicago and Moline, Ill; on wire fencing from Richmond, Ind; on wrought iron pipe from Sharpsburg, Pa., and Youngstown, O., on cast iron radiators from Kansas City, Mo., and Detroit, Mich., and on traction engines from Chicago to Klamath Falls, Ore. Klamath Falls is on the branch of the S. P. extending from Weed, Calif., to Pryor, Ore., and is intermediate between Weed and Ritter or Modoc Point, Ore. Modoc Point was formerly named Lelu and was at the time of movement designated in the tariffs by both names. Joint class rates were published from the points of origin described to Klamath Falls, subject to the aggregate of intermediate rates, but no joint commodity rates were specifically published to that destination. Joint commodity rates were maintained to Modoc Point or Ritter. Charged combination on Weed. The intermediate rule was applicable only when rates were not specifically provided for stations located directly intermediate to stations to which rates were provided. Joint through class rates were published from the points of origin to Klamath Falls and, therefore, the intermediate rule has no application here. Rates charged applicable. HELD, complaint dismissed. Baldwin Hardware Co. v. Director General, 129 I. C. C. 708.

(ee) Complainant alleged rates charged on three carloads of desks and chairs shipped between Nov. 10, 1920 and Feb. 26, 1921 from Evansville, Ind., and Herkimer, N. Y., to San Francisco were inapplicable. Complainant alleged fourth class rates charged on four less carload shipments of rough iron castings, in bags, shipped between Oct. 23, 1920 and April 27, 1921 from Joilet, Ill., to Sunnyvale, Calif., were inapplicable. Charged $3.585 commodity rate from Evansville and $3.755 from Herkimer, from Joliet fourth class rate of $3.455. Complainants interpretation of the intermediate rule item would clearly result in defeating specifically published rates to important destinations by the use of rates applicable to relatively unimportant points, and would result in a maladjustment of rates and discriminatory rate situations. Intermediate rules should not be construed to defeat specifically published rates in the same tariff unless the tariff so provides. HELD, rates assailed applicable, complaints dismissed. Prentice v. S. P. Co., 132 I. C. C. 409.

(ff) The inclusion in a tariff of a provision in accordance with rule 77 is a substantial compliance with the fourth section requirements; that a request for the publication of a rate under that rule prior to movement of the shipments is not essential in order that the shipper may have the advantage of that provision; and damages such as are required in a violation of the fourth section do not have to be shown in such cases. Smith & Sons Co. v. B. & M. R. R., 132 I. C. C. 596, 598.

(gg) A rate made by the application of an intermediate clause in a tariff is as specific as if the points of origin and destination were specifically named in connection with that rate. Fruen Grain Co., v. L. C. & S. E. Ry., 132 I. C. C. 747, 748.

§6⅞. Discrimination and Reasonableness.

See Discrimination; Reasonableness of Rates.

(a) While evidence of departure from long-and-short-haul provision of section 4 of the act does not establish unreasonableness of intermediate rate, it is evidence tending in that direction, particularly when accompanied by subsequent establishment of lower rate at the intermediate point. Lynchburg Chamber of Commerce v. P. R. R., 104 I. C. C. 293, 294.

(b) No set rule or formula can be laid down as to character of evidence that should be submitted to show that rates are reasonably compensatory within requirement of section 4 of the act, any more than to establish that rates are not unreasonable. Many of the means commonly employed to prove that rates are reasonable, such as comparisons of ton-mile and car-mile revenue, comparisons with other rates, evidence relative to traffic density, volume of movement, cost of service, etc., are also adapted to show that depressed rates are reasonably compensatory. Statistics showing average revenue and average operating expense per ton-mile, average haul, and average car loading are also helpful. Class and Commodity Rates between Western Points, 104 I. C. C. 578, 584.

(c) Rates on wrapping paper, l. c. l., from Hartsville, S. C., to Jackson, Miss., found not unreasonable, but unduly prejudicial to extent they exceeded contemporaneous rates to Vicksburg, a farther distant competitive point. Jackson Paper Co. v. A. G. S. Ry., 104 I. C. C. 758.

(d) Rate on overalls, l. c. l., from Middlesboro, Ky., to Tupelo, Miss., found not unreasonable or unduly prejudicial as compared with rate to Memphis, Tenn., a farther distant point. Following 98 I. C. C. 627, the lower rate to Memphis was canceled, leaving in effect a rate higher than that to Tupelo, thus removing alleged undue prejudice and departure from long-and-short-haul provision of section 4. There is no proof of damage because of undue prejudice that may have existed, and it does not follow that an award of damages should be made because of long-and-short-haul violation. Portland Seed Co., 264 U. S. 403. Northeast Miss. Traffic Bureau v. M. & O., 109 I. C. C. 246.

(e) Rate on bulk corn from Jefferson, S. Dak., to Fowler, Colo., found applicable but unreasonable to extent it exceeded a lower rate contemporaneously in effect to Trinidad, a more distant point, to which Fowler is directly intermediate. Tariff carrying lower rate contained an intermediate rule under provision of which rates apply to intermediate points only when they are not named in the tariff. Fowler was named in the tariff, but not in item carrying rates on this commodity between points named, consequently the Trinidad rate was not applicable to Fowler. See 36 I. C. C. 523, and 45 I. C. C. 183. Later carriers provided by addition of a note to the rule for application of Trinidad rate to Fowler and other points; thus the situation presented clearly raises a presumption of unreasonableness which carriers made no attempt to meet. Reparation awarded. Summit Grain Co. v. C., M. & St. P., 109 I. C. C. 763.

(f) Proposal to readjust rates on grain and products from points in Utah and Idaho to destinations in the Southwest and Alabama and Mississippi and to cancel application of such rates over routes through Texas designed for supposed purpose of removing departures from long-and-short-haul provision of section 4 of the act found not justified. There is in issue in a pending proceeding the reasonableness of rates to this destination territory as well as to points in Texas, where rates are now higher than to more distant Louisiana points, and cancellation of joint rates over Texas routes, which are generally shorter than through States north thereof, would result in substantial rate increases which would seriously affect the ability of Texas mills to handle Idaho wheat. Grain and Products from Western Points, 112 I. C. C. 283.

(g) A showing that there was a lower rate in effect to a more distant point on the same route does not in itself establish the unreasonableness of the higher rate to an intermediate point. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 614.

(h) Complainant attacked class rates on carload and less carload rates on candy and confectionery from Salt Lake City, Utah, to destinations on the Mississippi and Missouri rivers, and to St. Paul, Minn., as unreasonable and in comparison with rates from Provo, Utah and California unduly prejudicial, and in violation of section 4. Prior to Feb.

15, 1925, commodity rates from California applied as maxima from Salt Lake City. From that date to Aug. 1, 1925, through an error on the part of the carriers, class rates, second class on less than carloads and third class on carloads, were applicable. This was corrected on the latter date by the establishment from Salt Lake City of commodity rates the same as or lower than from San Francisco. HELD, rates attacked unreasonable and unduly prejudicial during the period from Feb. 15 to July 31, 1925, to extent they exceeded the rates from San Francisco, reparation awarded. McDonald Chocolate Co. v. B. E. R. R. Co., 118 I. C. C. 45.

(i) Complainant attacked commodity rates charged on mixed vegetables, in carloads, shipped since March, 1919, from Los Angeles, Calif., to Salt Lake City and Ogden, Utah, as unreasonable and in violation of section four, in that the shipments were subjected to a switching charge at Los Angeles which was not assessed on shipments originating at points beyond Los Angeles taking the Los Angeles rates. Shipments originated on the Santa Fe and the Pacific Electric at Los Angeles, were there switched to the L. A. & S. L. and moved over that road to Salt Lake City, those destined to Ogden moving over the O. S. L. beyond Salt Lake City. Applicable rates from Los Angeles plus a switching charge were assessed. The only evidence submitted in support of the fourth section allegation is the fact that the L. A. & S. L. absorbed the switching charges of the S. P. at Los Angeles and refused to do likewise for shippers on the Santa Fe and P. E. The S. P., maintains the same rates to Salt Lake City and Ogden on these articles as does the L. A. & S. L. HELD, charges applicable and not unreasonable, complaint dismissed. Frank Produce Co. v. Director General, 118 I. C. C. 88.

(j) The law is plain that regardless of basis upon which relief from the long-and-short-haul provision of section 4 of the act is granted the commission must not permit establishment of a rate to a more distant point that is not reasonably compensatory for service performed. In a territory where rates in general via direct hauls have been passed upon by commission and where there is such a maze of possible routes, making it practically impossible to check and enumerate each route available in published tariffs, the commission must place some general limitations upon relief granted, so that rates via direct routes will not be less than reasonably compensatory when applied via circuitous hauls. Class and Commodity Rates from Pennsylvania, 115 I. C. C. 331, 334.

(k) An order of commission authorizing temporary rate adjustments involving fourth-section departures pending determination of fourth-section applications, is not sufficient justification for new and increased fourth-section departures in an extensive revision of rates which should be justified for permanent establishment. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633, 636.

(l) Rate on charcoal from Gaskins Siding, Fla., to Wataga, Ga., higher than to Amsterdam, Ga., a farther distant point, found not in violation of long-and-short-haul clause of section 4 of the act. The lower rate to farther distant point was subject to provision of rule 77 of Tariff Circular 18-A, and although complainant failed to make required request the commission has uniformly found that such a rule in a tariff is a substantial compliance with fourth section, and has awarded reparation on shipments moving to the intermediate point. American Sumatra Tobacco Co. v. A. C. L., 118 I. C. C. 583.

(m-p) In so far as the departures from the fourth section are concerned, the commission has found that rates which exceed the aggregate of intermediate rates are prima facie unreasonable, but this presumption of unreasonableness may be rebutted. Marshall and Jefferson v. T. & P. Ry., 120 I. C. C. 455, 458.

(q) Complainant attacked combination rate charged on 23 cars of cement shipped between May 10 and June 10, 1922, from Navarro, Pa., to Dunraven, N. Y., as unreasonable and in violation of the fourth section. Navarro is local to the N. & B. Dunraven is served only by the D. & N. Shipments were charged 26 cents composed of 16 cents to East Branch and 10 cents beyond. There was published a joint rate of 22.25 cents from Navarro to points on the U. & D., including Arkville, N. Y., the junction of the D. & N. with the U. & D. This rate junctions mentioned above. Effe
was applicable over the lines and via the 15, 1922 the 22.25 cent rate was made applicable to Dunraven. HELD, rate attacked unreasonable to extent it exceeded 22.25 cents, reparation awarded. Atlas

Portland Cement Co. v. N. & B. R. R., 120 I. C. C. 583.

(r) Apart from statutory enactment it is prima facie unreasonable to charge more for a shorter than for a longer haul. Atlas Portland Cement Co. v. N. & B. R. R., 120 I. C. C. 583, 584.

(s) Complainant attacked commodity rate charged on 17 cars of lubricating oil stock from Chaison and Morgans Point, Tex., to Topeka and Eldorado, Kas., between Dec. 10, 1923 and May 9, 1924, as unreasonable. Charged 42 cents. There was contemporaneously in effect a rate of 32 cents on this commodity from Chaison to Sugar Creek, Mo., over all available routes, including the Santa Fe. Sugar Creek is on the Santa Fe within the switching limits of Kansas City. Over a route of the Santa Fe from Beaumont, Topeka and Eldorado are intermediate to Sugar Creek. This 32 cent rate was restricted so as not to apply to Topeka and Eldorado over any route. Effective Feb. 5, 1925, this rate was restricted so as not to apply over the Santa Fe to Sugar Creek. HELD, rate attacked not unreasonable in the past but for future unreasonable to extent it exceeds 34 cents. Petroleum Oils Corp. v. A., T. & S. F. Ry., 120 I. C. C. 614.

(t) Rate on lumber from Virginia, Minn., to Grafton, Wis., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect from Virginia to points in Wisconsin farther distant than Grafton; also from other Minnesota points north of Virginia to Grafton. Carriers pointed out that at time of movement numerous fourth-section departures occurred in this territory because of maintenance of depressed rates to Chicago and other Lake Michigan ports. Complainant failed to show damage by reason of such fourth-section departures, and a violation departure from long-and-short-haul clause of section 4, does not alone establish unreasonableness or form a basis for reparation. Moreover, rates assailed compared favorably with corresponding rates from and to various points for comparable distances. Virginia & Rainy Lake Co. v. D., W. & P., 120 I. C. C. 131.

(u) A departure from the long-and-short-haul clause of section 4 of the act does not in itself establish unreasonableness of higher rate to less-distant point or form a basis for an award of reparation. See 50 I. C. C. 719. Virginia & Rainy Lake Co. v. D., W. & P., 120 I. C. C. 131, 133.

(v) Rates on sugar from Yonkers and Brooklyn, N. Y., to Lynchburg, Va., found unreasonable as compared with rates between other points for comparable distances and to extent they exceeded lower rate subsequently established. For a time, lower rates were in effect from points of origin to Lone Jack and South Boston, Va., farther-distant points. Subsequently, rates to South Boston were increased, and those to Lynchburg reduced, thus removing fourth-section departures. Although evidence of a departure from long-and-short-haul provision of fourth section of the act does not establish unreasonableness of the intermediate rate, it is evidence tending in that direction, particularly when, as here, it is accompanied by subsequent establishment of the lower rate. Reparation awarded. See also 104 I. C. C. 293. Lynchburg Chamber of Commerce v. P. R. R., 120 I. C. C. 392.

(w) Although evidence of a departure from long-and-short-haul provision of fourth section of the act does not establish unreasonableness of the intermediate rate, it is evidence tending in that direction, particularly when accompanied by subsequent establishment of the lower rate. See 104 I. C. C. 293. Lynchburg Chamber of Commerce v. P. R. R., 120 I. C. C. 392, 393.

(x) While a departure from the long-and-short-haul provision of fourth section of the act does not establish unreasonableness of intermediate rate, it is evidence tending in that direction, particularly when accompanied by subsequent establishment of the lower rate at the intermediate point. See also 104 I. C. C. 293. Riegel Sack Co. v. C. R. R. Co. of N. J., 120 I. C. C. 405, 407.

(y) Rate on cement from Navarro, Pa., to Dunraven, N. Y., found unreasonable to extent it exceeded a lower rate contemporaneously in effect to farther distant points beyond Dunraven, which lower rate was established to latter-named destination subsequent to movement. This fourth-section violation, unprotected by an appropriate application, created an unlawful situation raising a presumption of unreasonableness. The mere assertion of carriers that rate to the farther-distant points was depressed by reason of competition, and that assailed rate was subsequently reduced for

the same reason, unsupported by evidence as to reasonableness of either of these rates, is insufficient to overcome that presumption. Reparation awarded. Atlas Portland Cement Co. v. N. & B., 120 I. C. C. 583.

(z) Complainant attacked combination rate charged on a car of cabbage shipped April 16, 1925 from St. Elmo, Ala., to Lima, O., as unreasonable and in violation of the fourth section. St. Elmo is on the L. & N., 19 miles south of Mobile, Ala. Lima is on the B. & O., 72 miles south of Toledo, O. Shipment moved L. & N., to Cincinnati, O., B. & O., beyond, 927 miles, charged 56.5 cents to Jeffersonville, Ind., and 26.5 cents beyond. There was contemporaneously in effect from St. Elmo to Toledo a rate of 81 cents and on May 15, 1925 this rate was made effective to Lima. HELD, rate attacked unreasonable to extent it exceeded 81 cents, reparation awarded. Cardosi & Co. v. B. & O. R. R., 122 I. C. C. 1.

(aa) The failure of a shipper to request the publication of a rate so published from or to an intermediate point does not deprive the shipper of the benefit of the lower rate and in such instances have uniformly found that a higher rate charged was unreasonable. Toberman Mackey Co. v. C. B. & Q. R. R., 122 I. C. C. 299, 300.

(bb) A rate in excess of the aggregate of intermediates is prima facie unreasonable. This is true apart from any statutory enactment, but conditions may exist or evidence may be introduced which establishes the reasonableness of the through rate. Lynchburg Traffic Bureau v. N. O. N. E. R. R., 122 I. C. C. 371, 372.

(cc) Complainant alleged sixth class rate of 54 cents charged on a carload of lumber shipped March 3, 1923 from Sundridge, Ont., Can., to Naperville, Ill., was unreasonable, unjustly discriminatory, unduly prejudicial and in violation of section four. Shipment moved as routed Canadian National and G. T. W., to Chicago and Burlington to destination. Contemporaneously there was in effect over route of movement a combination rate of 39 cents, made 34 cents to Chicago and 5 cents beyond, and this was established as a joint commodity rate Sept. 25, 1923. HELD, rate attacked unreasonable to extent it exceeded 39 cents, reparation awarded. Kroehler Mfg. Co. v. C. N. Ry., 123 I. C. C. 555.

(dd) Complainant attacked sixth class rate charged on two cars of sand from Cape May, N. J., to East Radford, Va., as unreasonable and in violation of the fourth section. Shipments moved on June 11, 1924, charged 58 cents sixth class, reparation requested to rate of $4.65 made $1.25 to Philadelphia and $3.70 beyond subject to the combination rule. Effective April 24, 1926 defendants published joint rates of $4.95 on common sand and $5.40 on silica sand from Cape May to East Radford, which were the combination on Philadelphia without reference to the combination rule. HELD, rate charged unreasonable to extent it exceeded $4.95, reparation awarded. Lynchburg Chamber of Commerce v. W. J. & S. R. R., 123 I. C. C. 579.

(ee) A departure from long-and-short-haul provision of section 4 of the act raises a presumption of unreasonableness in the higher rate to the intermediate point, but this presumption is rebuttable. Cardosi & Co. v. B. & O., 122 I. C. C. 1.

(ff) Proportional rates on grain and products from Mississippi River gateways and points west thereof to intermediate destinations on the Gulf & Ship Island R. R., higher than to farther distant points, found not unreasonable or otherwise unlawful. Higher rates to intermediate points were permitted to meet rates of trunk-line competitors at junction points by fourth-section order. Moreover, carriers show that rates to points on the Gulf & Ship Island compare favorably with rates from same points to destinations in Mississippi and Louisiana on the New Orleans Great Northern, Mississippi Central, and Gulf, Mobile & Northern, and are on a lower level than rates to the Southeast. Jackson Traffic Bureau v. A. & V., 122 I. C. C. 387, 388, 389.

(gg) Proposed increased local interstate rate on tanning extract from Lynchburg to Norfolk, Pinners Point, and Portsmouth, Va., higher than from Charlottesville, Va., found not justified. Lynchburg is intermediate to Charlottesville and under the increase proposed a higher rate would apply to former than to latter, in violation of long-and-short-

haul clause of section 4 of the act. Tanning Extract from Lynchburg, 122 I. C. C. 647.

(hh) Rates prescribed to the Mississippi Valley were not designed as standards of reasonable maximum rates but primarily to bring rates in harmony with fourth section, and at same time return to carriers substantially the same revenue as earned under adjustment theretofore maintained. Florence Chamber of Commerce v. I. C., 122 I. C. C. 653, 657, 658.

(ii) Third-class rates on printing and wrapping paper l. c. l., from Niagara Falls, N. Y., to Lynchburg, Va., found not unreasonable or unduly prejudicial as compared with lower l. c. l. rates to Lone Jack, South Boston, and Danville, Va., to which Lynchburg is intermediate. Carriers showed that rates from Niagara Falls to Lynchburg compare favorably with corresponding rates between other points in that territory. Moreover fourth-section departures were protected by appropriate applications, and were subsequently removed by increasing the rates from the farther distant points to level of rates to Lynchburg. Lynchburg Traffic Bureau v. N. Y. C., 123 I. C. C. 15.

(jj) A violation of long-and-short-haul clause of fourth section of the act does not in itself establish unreasonableness of the higher rate to the less distant point, or form a basis for an award of reparation. See 50 I. C. C. 719. Nor does subsequent reduction of a rate in and of itself justify such an award. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 58.

(kk) Rate on cotton from Corinth, Miss., to Monroe, Ga., found not unreasonable or otherwise unlawful as compared with those from Memphis, to which Corinth is intermediate; from New Orleans to Monroe and other Georgia destinations; or with rate subsequently established. Rates from Memphis and New Orleans were depressed and in 89 I. C. C. 47, it was found that rates on cotton to the Southeast departed in many instances from provisions of fourth section. Moreover, comparisons of rates assailed with those from other origins to Monroe for similar distances indicate that rate from Corinth was properly adjusted with relation to general level of rates from other Mississippi points intermediate to the various river crossings, and from points in interior Tennessee and Alabama. Manget Bros. Co. v. G. R. R., 123 I. C. C. 532.

(ll) Proposed readjustment of rates on grain and products from Birmingham, Chattanooga, and Knoxville, to South Atlantic ports and certain intermediate points, to same basis as existing commodity rates from Nashville, found not justified. Grain rates from Birmingham are generally lower than from Nashville and carriers may not undermine this adjustment solely for purpose of removing fourth-section departures created by an attempt to establish interstate class rates in accordance with distance scale of class rates prescribed by Georgia Railroad Commission between Georgia points, for to do so would unduly prejudice Birmingham and its milling interests, especially in view of its shorter haul to the ports. Grain and Products to Southeast, 123 I. C. C. 569.

(mm) Complainant alleged that rates on 183 cars of phosphate rock from Brewster, Bradleys and Achan, Fla., to Gulfport, Miss., between March 22 and Dec. 18, 1920 were unreasonable, unduly prejudicial and in violation of the fourth section. Phosphate rock is not susceptible to damage by fire and water, and loads heavily. The two used routes are the A. C. L. to River Junction, Fla., and L. & N. beyond, 726 miles, and A. C. L. to Montgomery, Ala., L. & N. beyond, 796 miles. Over each of these routes Gulfport is directly intermediate to New Orleans, 66 miles beyond. Rate charged $4.50 prior to August 26, 1920 and $5.625 on and after that date. On Dec. 30, 1920 the rate became $5.65. The rates to New Orleans were $4.10 and $5.125, and became $5.13 Dec. 30, 1920. Since these shipments moved the rate to Gulfport has been reduced to the New Orleans basis. The record shows that phosphate rock from Brewster to Gulfport usually moves by rail to Port Tampa and steamship beyond, and that it was due solely to lack of available ships, owing to the exigencies of the World War, that these shipments were not so moved. It would therefore appear that the water competition during the period of complainants shipments was more potential than actual at both Gulfport and New Orleans. The Commission is not justified in condemning the rates to Gulfport by comparison alone with the rates to New Orleans, even if there was at the time no more actual water competition at New Orleans than at Gulfport. HELD, rates

attacked not unreasonable, complaints dismissed. Gulfport Fertilizer Co. v. A. C. L. R. R., 126 I. C. C. 463.

(nn) Proposed increased rates on sugar from New Orleans and other Louisiana refining points to points in southern and eastern Texas, and from Sugarland and Texas City, Tex., to Shreveport and other Louisiana points and to Vicksburg, Miss., and other Mississippi River crossings south thereof, found not justified in so far as they exceed those that will result from application of maximum reasonable rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Proposed rates are higher than those under distance scale prescribed in 77 I. C. C. 473 for application in same general territory and proposed rate to Houston without appropriate change in present ocean-and-rail rate from New York via New Orleans to Houston, would create an adjustment contrary to long-and-short-haul provisions of section 4 of the act. Moreover, rates constructed on bases prescribed in Consolidated Southwestern Cases will provide reasonable, nonprejudicial, and nondiscriminatory rates between points involved. Sugar Between Louisiana and Texas Points, 128 I. C. C. 309.

(oo) Mere showing of rates to a point higher than to more distant points over same route does not prove that the former are unreasonable. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445, 462.

(pp) Rate on brass and copper ingots from East Liberty, Pa., a point within Pittsburgh switching limits, to Detroit, Mich., found unreasonable to extent it exceeded lower rate contemporaneously in effect from Baltimore applicable through East Liberty, and published in accordance with rule 77 of Tariff Circular 18-A. Although that rule as amended April 7, 1924, provides that it is not authority for reducing commodity rates from or to intermediate points on less than statutory notice, and was therefore not applicable in instant case, the rate from East Liberty being a commodity rate, there were departures from the fourth section, and establishment of lower rate from Baltimore subject to the rule is tantamount to an admission by carriers that higher rate from East Liberty was unreasonable. See 66 I. C. C. 611. Federated Metals Corp. v. P. R. R. 128 I. C. C. 757.

(qq) Apart from statutory enactment it is prima facie unreasonable to charge more for a shorter than for a longer haul. To charge more for a through haul than the aggregate of the intermediate rates is likewise prima facie unreasonable. In each case conditions may exist which, if shown, would establish the reasonableness of the rate in question. Lynchburg Traffic Bureau v. E. R. R., 129 I. C. C. 230, 232.

(rr) Complainant alleged sixth class rate charged on two shipments of cast iron pipe fittings, from Jacksonville, Fla., to Brooklyn, N. Y., were and are unreasonable and in violation of section four. Both shipments moved A. C. L. to Norfolk, Va., thence Pennsylvania, 1,036 miles, charged sixth class rate of 75.5c. HELD, the evidence does not warrant a revision of the class rate at this time, or the establishment of a commodity rate, and the rate assailed not unreasonable, complaint dismissed. Morse Dry Dock & Repair Co. v. A. C. L. R. R., 132 I. C. C. 351.

(ss) Complainant alleged that rates on curbing, in carloads, from Granite Hill and Lithonia, Ga., to St. Petersburg, Fla., were and are unreasonable and illegal. It was stipulated at the hearing that complainants claim with respect to the rate of $3.52 collected on the shipments from Granite Hill to St. Petersburgh should be governed by the then pending case of Georgia Quincy Granite Co. v. A. C. L. R. R., 120 I. C. C. 408. The Commission there found that the applicable rate of $3.52 for 482 miles was not unreasonable, unjustly discriminatory or unduly prejudicial and dismissed the complaint. Applicable rate of $3.74 from Lithonia to St. Petersburg, 607 miles via Jacksonville, was constructed by deducting 50c from each of the factors to and from Jacksonville, and adding 50c to the sum of the remainders, under the combination rule. Effective March 1, 1924 this rate was reduced to $3.62 and April 23, 1924 it was restored to $3.74. HELD, rates assailed applicable and not unreasonable, complaints dismissed. Macken v. A. C. L. R. R., 132 I. C. C. 589.

(tt) In view of the purposes of rule 77, it must follow that rates voluntarily established thereunder from the more distant points are prima facie reasonable, and if reasonable from or to the more distant points they must

be deemed reasonable from or to the intermediate points. Smith & Sons Co. v. B. & M. R. R., 132 I. C. C. 596, 598.

(uu) Complainant alleged commodity rates charged on numerous carloads of soft coal screenings from West Frankfort and Christopher, Ill. to Clarinda and Missouri Valley, Ia., and from El Dorado and Harrisburg, Ill., to the latter point, from Feb. 28, 1925 to July 17, 1925 were unreasonable. At the time of movement charged on basis of $3.52 and $3.78 to Clarinda and Missouri Valley. Rates of $3.41 and $3.68 were published effective July 19, 1925. HELD, rates attacked not unreasonable. Complaint dismissed. Nebraska Gas & Electric Co. v. C. B. & Q. R. R., 132 I. C. C. 669.

(vv) Third-class l. c. l. rate, under official classification, on unprinted fruit wrappers from Hamburg, N. J., to Lynchburg, Va., found not unreasonable or otherwise unlawful as compared with fifth-class rate, under southern classification, contemporaneously in effect to Montview and Lone Jack, Va., more distant points. The general level of rates applicable in official territory is extended south of Lynchburg to and including more distant points, and reasons in justification therefor are fully discussed in 31 I. C. C. 145; 107 I. C. C. 249. Rates assailed are same as those from Cincinnati, Ohio, to Lynchburg, and compare favorably with those from Hamburg to various other Virginia districts for comparable distances, and presumption of unreasonableness of rate to Lynchburg is rebutted. See 269 U. S. 1. Moreover, since no movement of fruit wrappers has been shown from Hamburg to Montview, no finding of discrimination or undue prejudice can be made. See 34 I. C. C. 634. Lynchburg Chamber of Commerce v. E. R. R., 129 I. C. C. 230.

IV. COMPETITION AS JUSTIFICATION.

See Competition.

§10. Water Competition.

See Water Competition.

(a) Complainant attacked fourth class rate of 34 cents charged on nine cars of burlap bags, in bales, shipped from Jersey City, N. J., to Baltimore, Md., as unreasonable. Shipments moved Central of New Jersey to Bound Brook, N. J., Reading to Park Jct., and B. & O., beyond, 192 miles. When the shipments moved a commodity rate of 25 cents applied from Jersey City to Norfolk, Va. This was a water competitive rate and while it applied on shipments moving through Baltimore, it was protected by fourth section application. Effective Jan. 10, 1925, a commodity rate of 25 cents was published to Baltimore. HELD, rate attacked unreasonable to extent it exceeded 25 cents, reparation awarded. Riegel Sack Co. v. C. R. R. of N. J., 120 I. C. C. 405.

V. PROCEDURE.

See Procedure Before Commission.

§11. Complaints and Orders.

(a) Complaint alleged unreasonableness and undue prejudice. At the hearing complainant sought to amend complaint with allegation of violation of long-and-short-haul provision of section 4. Upon objection by carriers that such amendment unduly broadens issues presented, HELD: Allegation embraced in amendment is one manner of alleging prejudice and evidence thereon submitted is admissible in support of the issue raised under section 3 of the act. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313, 314.

(b) It is desirable in the interest of economy of time and expense wherever practicable to hear and dispose of fourth-section applications in connection with formal complaints or investigations involving same rate under other sections of the act. This policy has been followed for a number of years and so far as practicable will be adhered to in future. The commission shall expect carriers to be ready to proceed in support of their fourth-section applications at time they are set for hearing. Mississippi R. R. Comm. v. A. & V., 120 I. C. C. 569, 573.

§12. Evidence.

(1). Burden of Proof.

See Evidence I.

(a) Burden of proof is upon carriers to prove reasonableness of rates which depart from the long-and-short-haul provision of fourth section. Hope Engineering & Supply Co. v. M. P., 118 I. C. C. 598, 599.

(b) The unlawful rate situation shown by the present record raises a presumption of unreasonableness, and the mere assertion of defendants that the rate to

the farther distant point was depressed by reason of competition and that the rate attacked was subsequently reduced for the same reason, unsupported by evidence as to the reasonableness of either of these rates, is insufficient to overcome that presumption. Atlas Portland Cement Co. v. N. & B. R. R., 120 I. C. C. 583, 584.

(c) A violation of the long and short haul clause of the fourth section does not in itself establish the unreasonableness of the higher rate to the less distant point, or form a basis for an award of reparation. Kohlman Bros. & Sugarman v. L. & N. R. R., 123 I. C. C. 56, 58.

(d) In view of the purposes of Rule 77 it must follow that rates voluntarily established thereunder from the more distant points are prima facie reasonable, and if reasonable from or to the more distant points they must be deemed reasonable from or to the intermediate points. Failure on the part of a shipper to request prior to a shipment a rate to which he is entitled under the rule, through ignorance or otherwise, is not a reason for saying he is not entitled to reparation or that the burden is on him to show that the higher rate paid was unreasonable per se, or that he has suffered damage from undue prejudice. Fosse & Company v. Erie R. R., 128 I. C. C. 553, 554.

(e) Complainant alleged that the carload rates on wool and mohair, in the grease, in sacks, from trans-Mississippi territory to Boston, Mass., are unreasonable, unduly prejudicial and in violation of the fourth section. The wool shipping points here concerned are located in eastern Nebraska and Kansas, and western Missouri, on or within about 100 miles west of that portion of the Missouri river extending from Omaha, Neb., on the north to Kansas City, Mo., on the south. Previous decision Wool Rates Investigation, 1923, 91 I. C. C. 235. The rates in compliance with that decision became effective Dec. 27, 1924. Subsequent to that date it appeared that by the use of the proportional rates from east bank Mississippi river crossings to Boston in combination with proportional fourth class rates from certain points in Kansas, Nebraska, and Missouri to such Mississippi river crossings, rates on wool in sacks, lower than the joint through rates established could be made. Effective July 15, 1925 the proportional rates were restricted so as not to apply on traffic originating at points on and west of the east bank of the Missouri river. This had the effect of eliminating the fourth section departures. It is the view of the Commission that the evidence in this case is sufficient to rebut the presumption of unreasonableness of the joint rates assailed which were attacked by reason of the fact that they exceeded, between Dec. 27, 1924 and July 15, 1925, the aggregate of intermediates. HELD, rates assailed not unreasonable, unduly prejudicial or unjustly discriminatory, complaint dismissed. Boston Wool Trade Asso. v. A. T. & S. F. Ry., 129 I. C. C. 681.

§12. (2) Circumstances of Probative Force.

See Evidence II.

(a) Existence of lower rate from a more distant point on same line or route is not in and of itself sufficient to justify a finding of unreasonableness and an award of reparation by reason of exaction of higher rates from an intermediate point or points. See 50 I. C. C. 719. Ohio Farm Bureau Federation v. N. Y. C., 104 I. C. C. 490, 492.

(b) No set rule or formula can be laid down as to character of evidence that should be submitted to show that rates are reasonably compensatory within requirement of section 4 of the act, any more than to establish that rates are not unreasonable. Many of the means commonly employed to prove that rates are reasonable, such as comparisons of ton-mile and car-mile revenue, comparisons with other rates, evidence relative to traffic density, volume of movement, cost of service, etc., are also adapted to show that depressed rates are reasonably compensatory. Statistics showing average revenue and average operating expense per ton-mile and per car-mile, average haul, and average car loading are also helpful. Class and Commodity Rates between Western Points, 104 I. C. C., 578, 584.

(c) A showing that there was a lower rate in effect to a more distant point on the same route does not in itself establish unreasonableness of higher rate to an intermediate point. Booth & Flinn v. P. R. R., 113 I. C. C. 613, 614.

(d) An order of commission authorizing temporary rate adjustments involving fourth-section departures pending de-

termination of fourth-section applications, is not sufficient justification for new and increased fourth-section departures in an extensive revision of rates which should be justified for permanent establishment. Taylor Produce Co. v. A. C. L., 115 I. C. C. 633, 636.

(e) The commission's decision in Rates to, from, and between Points South of Ohio River, 64 I. C. C. 306, is not to be considered as fixing maximum reasonable rates; that adjustment having been approved merely for purpose of removing fourth-section departures and maintaining as nearly as possible existing revenues of carriers. Capital Grain & Feed Co. v. I. C., 118 I. C. C. 732, 745; Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748, 751.

(f) In view of the purposes of rule 77, it must follow that rates voluntarily established thereunder from the more distant points are prima facie reasonable, and if reasonable from or to the more distant points they must be deemed reasonable from or to the intermediate points. Lawrence Construction Co. v. L. & N. R. R., 120 I. C. C. 316, 318.

(g) Where a fourth-section application has been considered by commission and denied in a previously decided case and effective date of the denial order has been fixed, it would be an idle gesture for a division of the commission to reiterate the denial or to fix a different effective date. Liberty Cooperative & Lbr. Co. v. L. & N., 120 I. C. C. 379, 381.

(h) The publication of a rule subject to rule 77 of tariff circular 18-A, is tantamount to an admission by defendants that the higher rate from the intermediate point from which no specific commodity rate is published is unreasonable. Miles Medical Co. v. B. & O. R. R., 126 I. C. C. 159, 160.

(i) In view of the purpose of rule 77, it must follow that rates voluntarily established thereunder from the more distant points are prima facie reasonable and if reasonable from or to the more distant points they must be deemed reasonable from or to the intermediate points. New York Insulated Wire Co. v. N. Y., N. H. & H. R. R., 128 I. C. C. 698, 699.

(j) The court recognized the presumption that through rates in excess of the aggregate of intermediate rates are prima facie unreasonable, but indicated that such presumption might be rebutted, as it said that "conditions may exist which, if shown, would establish the reasonableness of the rate in question." Hudson Mule Co. v. L. & N. R. R., 129 I. C. C. 365, 368.

(k) While evidence of a departure from the long and short haul provision of section four of the act does not establish unreasonableness of the intermediate rate, it is evidence tending in that direction, particularly when accompanied by a subsequent establishment of a lower rate at an intermediate point. Southwestern Sheet Glass Co. v. St. L. S. F. Ry., 132 I. C. C. 577, 578.

§13. Reparation.

See Reparation.

(a) Contention that subsequent reduction of a rate does not show prior rate to be unreasonable, and that a violation of long-and-short-haul clause of the fourth section without a showing of injury is insufficient to support an award of reparation, sustained. Murphy v. A. C. L., 107 I. C. C. 651, 652.

(b) An award of damages will not be made merely because a rate contravened long-and-short-haul provision of fourth section of the act. Portland Seed Co., 264 U. S. 403. Northeast Miss. Traffic Bureau v. M. & O., 109 I. C. C. 246, 248.

(c) Fact that carriers have charged a higher rate to an intermediate than to a more distant point is not sufficient to entitle a shipper to an award of reparation for a violation of section 4 of the act. Dees v. M. & O., 112 I. C. C. 397, 398.

(d) The commission has, with but few exceptions, awarded reparation in cases where higher rates have been charged from intermediate than from more distant points, where rule 77 of Tariff Circular 18-A has been referred to. Lautz Marble Corp. v. E. R. R., 115 I. C. C. 543, 545.

(e) Failure on part of carriers to comply with fourth-section orders of commission should not be allowed to defeat the right of a shipper to reparation. Colgate & Co. v. P. R. R., 118 I. C. C. 243, 247.

(f) In the absence of proof of damage to the shipper the fact that carriers have charged or received rates which violate the long and short haul rule of the fourth section of the act is not of

itself a sufficient basis for an award of reparation; and also on the fact that the departures from the long and short haul rule were protected at the date of movement. Root Glass Co. v. E. I. & T. H. Ry., 123 I. C. C. 68, 70.

(g) A violation of long-and-short-haul clause of fourth section of the act does not in itself establish unreasonableness of the higher rate to the less distant point, or form a basis for an award of reparation. See 50 I. C. C. 719. Nor does subsequent reduction of a rate in and of itself justify such an award. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 58.

(h) Commission has consistently held that publication of rates subject to Rule 77 of Tariff Circular 18-A constitutes a substantial compliance with long-and-short-haul provisions of fourth section of the act, and affords an adequate basis for an award of reparation on shipments moving to intermediate points at charges higher than those to farther distant points. Burlington Shippers Asso., v. C., B. & Q. 126 I. C. C. 179, 181.

(i) Fifth-class rate on bar steel from Youngstown, Ohio to Lynchburg, Va., governed by official classification, found not unreasonable. While a lower sixth-class rate under southern classification was contemporaneously maintained to Lone Jack, Va., a more distant point, that point is a flag stop at which there is no post office of business of any consequence and rate thereto was subsequently increased to level of the Lynchburg rate, thus removing fourth-section departure. Complainant found not to have been damaged by reason of any undue preference or fourth-section violation that may have existed. Lynchburg Chamber of Commerce v. B. & O., 128 I. C. C. 557.

(j) Motion for further hearing on ground of two alleged errors in original report, 63 I. C. C. 6, viz, statement that departures from aggregate-of-intermediates provision were protected by applications, heard but not determined, and statement that rates found unreasonable appeared not unduly high, denied. Question of whether departures were protected by applications was res adjudicata not because of commission's decision but that of Supreme Court in 269 U. S. 1. Even if question had not been res adjudicata and commission concluded that departures were not protected, complainants would not be entitled to reparation for violation of fourth section, since there was no proof that they suffered any special damage, and no such proof was submitted at further hearing. Hudson Mule Co. v. L. & N., 129 I. C. C. 365, 368, 369.

(k) The commission has frequently found that rule 77 of Tariff Circular 18-A is a substantial compliance with the fourth section of the act and awarded reparation on shipments moving from or to intermediate points under rates that were higher than those from or to more distant points where rates from or to latter points were subject to rule 77 and the less distant points were intermediate over route traffic moved. Woodward Auto Co. v. C., M. & St. P., 129 I. C. C. 613, 615.

§16. Tariffs and Construction.

See Tariffs II.

(a) Carrier incorporated in its tariff a note for purpose of applying the intermediate rule under which rates to farther distant points would apply at intermediate stations. HELD: As commission's tariff rules require publication of rates in clear and specific manner, and include a rule extending rates to intermediate points which is not subject to misinterpretation, tariff should be amended by incorporating therein a rule substantially in accord with that appearing in Tariff Circular 18-A. See also 66 I. C. C. 472, 473. Summit Grain Co. v. C., M. & St. P., 109 I. C. C. 763, 764.

(b) In original report, 88 I. C. C. 543, commission granted fourth-section relief under the distance scale there prescribed on brick and related articles between points in southern territory by authorizing indirect lines to meet direct lines' rates at competitive points and maintain higher rates at intermediate points. Upon a showing by carriers that publication of all routes over which rates apply would impose upon them tremendous labor and expense and result in such an increase in the bulk of tariffs as to render them cumbersome and difficult to use, original finding modified and in the interest of tariff simplicity carriers authorized, in lieu of publication of specific routing between points of origin and destination, to publish a general rule showing rates and maximum distances for routing. Brick and Clay Products in the South, 113 I. C. C. 380.

(c) Complainant attacked combination rates charged on a car of wooden chairs shipped Dec. 24, 1919, from Winston Salem, N. C., and less carload of blankets forwarded Jan. 19, 1920, from Nashua, N. H., to Casper, Wyo., as illegal and unreasonable. Complaint is barred as to unreasonableness because filed more than one year after federal control. Shipments were unrouted. Charged $2.625 on chairs and $4.055 on the blankets composed of factors to and beyond the Mississippi river. There were contemporaneously in effect joint commodity rates of $2.19 on chairs, carloads, from Winston Salem and $2.84 on blankets less carloads from Nashua to San Francisco. The tariff publishing the rates to San Francisco was not restricted as to routing so as to preclude movement via Casper over the Burlington, which hauled the shipments from Paducah, Ky., or Kansas City, Mo., to destination, and lines of other participating carriers beyond. HELD, applicable rate was $2.19 on chairs and $2.84 on the blankets, reparation awarded. Chamberlin Furniture Co. v. Director General, 115 I. C. C. 575.

(d) Complainant attacked combination rates charged on 21 cars of sawed stone and marble shipped between Oct. 22, 1921 and March 12, 1925 form Carthage and Phoenix, Mo., to Indianapolis, Brightwood and St. Mary-of-the-Woods, Ind., as unreasonable and inapplicable. Complainant withdrew the question of unreasonableness leaving for determination only the question of tariff interpretation. Phoenix is a local point on the Frisco between Kansas City and Springfield, Mo. Carthage is on a branch line of the Frisco also served by the M. P. All destinations are served by the Big Four. Charged combinations on St. Louis or East St. Louis. A fair and reasonable conclusion to be drawn from a consideration of the item in its entirety, and of the tariff as a whole, is that the phrase "and intermediate points" as used refers only to points between Chicago and Milwaukee. Stone is rated class E and rates are 30.5c and 33c to Chicago and intermediate points. HELD, applicable rates 30.5c from Phoenix and 33c from Carthage, shipments overcharged, reparation awarded. Gates Marble & Tile Co. v. C. P. & St. L. Ry., 120 I. C. C. 275.

(e) Rates on gasoline, kerosene, naphtha, lubricating oil, and fuel oil, in tank-car loads, from points in Oklahoma to Lawrenceville, Paris, and Farrington, Ill., found inapplicable to certain destinations in Ohio and Indiana on the B. & O., C., C., C. & St. L., and Pennsylvania. Tariff publishing rates attacked contained an intermediate rule, exception thereto providing that rates named therein were not applicable over any routes east of the Illinois-Indiana State Line except on the N. Y. C. R. R, via junctions Danville, Ill., north thereof, or west of Schneider, Ind. However, shipments under consideration did not move via that line. Pure Oil Co. v. A., T. & S. F., 123 I. C. C. 624.

(f) Commission has consistently held that publication of rates subject to Rule 77 of Tariff Circular 18-A constitutes a substantial compliance with long-and-short-haul provision of fourth section of the act, and affords an adequate basis for an award of reparation on shipments moving to intermediate points at charges higher than those to farther distant points. Burlington Shippers Asso. v. C., B. & Q., 126 I. C. C. 179, 181.

(g) Upon contention that rates on grain and products from points in Colorado and Utah to California destinations are in violation of the long-and-short-haul clause of fourth section of the act in that they exceed rates from Denver and other points in the transcontinental west-bound Group J to same destination, HELD: Rates from the more distant points were published subject to provisions of Rule 77 of Tariff Circular 18-A and such provision constitutes a substantial compliance with requirements of the fourth section. See 51 I. C. C. 185. Ogden Grain Exchange v. A. E. R. R. Co., 126 I. C. C. 255, 268.

(h) A through rate for long haul, greater than aggregate of intermediate rates in force and lawful on June 18, 1910, when section 4 of Act to Regulate Commerce was amended by Act June 18, 1910, § 8 (Comp. St. § 8566), by addition thereto of clause declaring it unlawful for carrier to charge any greater compensation as a through rate than the aggregate of the intermediates, remains lawful, provided an application to suspend operation of the section was made and either allowed or remained undetermined. Patterson v. Louisville & N. R. Co., 46 Sup. Ct. 8.

(i) Notation on a tariff provision in accordance with rule 77 is a substantial compliance with requirements of the fourth section. New York Insulated

Wire Co. v. N. Y., N. H. & H. 128 I. C. C. 698, 699.

§2. Construction in General.

See Act to Regulate Commerce II; Released Rates.

(a) In view of history of legislation, Transportation Act 1920, §§ 400, 437 (U. S. Comp. St. Ann. Supp. 1923 §§ 8563, 8604a), amending Interstate Commerce Act, HELD not to broaden provision of Interstate Commerce Act, § 20, par. II, governing liability of common carriers to shippers for loss or damage to shipments, so as to make it applicable to shipments from United States to nonadjacent foreign countries. A. L. Wolff & Co. v. Missouri, K. & T. Ry. Co. of Texas, (Tex., 1926) 283 S. W. 250.

(b) In view of U. S. Comp. St. §§ 8604a, 8604aa the rights and liabilities in connection with an interstate shipment depend on the applicable congressional acts, bills of lading or receipts issued for shipment, and common-law principles accepted or enforced by federal courts. Ex parte American Ry. Express Co., Farmers' & Merchants' Bank of Samson v. American Ry. Express Co. (Ala., 1925) 105 So. 197.

§4. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) Car was damaged in transit and

lading transferred into another car resulting in degrading commodity and its rejection by consignee. To avoid action for loss and damage carrier purchased shipment but collected demurrage charges which accrued at destination. Shipper contended that such charges were inapplicable under a tariff which provided for their cancellation where there is error of any railroad preventing proper tender of delivery, and that if they were applicable they were unjust and part of the damage suffered by it. HELD: Degradation of a commodity under aforesaid circumstances was not an error but an incident of loss and damage over which commission has no jurisdiction. The demurrage charges were legally assessed and not unreasonable. Atwater & Co. v. M. C. R. R., 107 I. C. C. 491.

(b) Upon complaint alleging that failure of carrier to promptly notify consignor of refusal of a shipment at destination occasioned loss and damage in an amount equal to agreed selling price of shipment to his undue prejudice in violation of section 3 of the act, HELD: Effort to recover value of such shipment is properly a loss and damage claim not covered by provisions of section 3. Such claims and measure of damages applicable thereto are cognizable only in the courts. See 91 I. C. C. 611 and other cited cases. Rinelli v. N. Y., N. H. & H. R. R., 112 I. C. C. 567.

(c) Loss and damage claims and measure of damages applicable thereto are cognizable only in the courts. See 91 I. C. C. 611, and other cited cases. Rinelli v. N. Y., N. H. & H. R. R., 112 I. C. C. 567, 568.

(de) A claim for loss and damage growing out of alleged delay, not shown to have resulted from misrouting, is a matter over which the Commission has no jurisdiction. Kingman Co. v. A. C. L. R. R., 118 I. C. C. 31, 32.

(f) The commission has no jurisdiction over claims of shippers that they paid for a greater quantity of a commodity than they received. Hipskind v. W. Ry., 115 I. C. C. 417.

(g) Complainant sought reparation on a shipment of cucumbers, alleging that failure of carrier to properly divert en route resulted in their deterioration and consequent decline in value; also that manner in which its diversion order was handled was prima facie evidence of negligence and indicated a lack of system in handling of such orders. HELD, the commission may award reparation only for violations of the act, not here shown, and claims for loss and damage and measure of damages applicable thereto are cognizable only in courts. Here the carrier fulfilled its obligation by forwarding shipment over lowest rated route known to it, no routing instructions having been furnished by shipper when diversion was requested. Johnston v. C. & W. C., 118 I. C. C. 19.

(h) Claims for loss and damage to shipments in transit, and measure of damages applicable thereto, are cognizable only in the courts, and it is well settled that commission may award reparation only for damages arising out of violations of interstate commerce act. Johnston v. C. & W. C., 118 I. C. C. 19, 20.

(i) Complainant sought reparation for loss and damage sustained due to deterioration, by reason of alleged failure of carrier to observe routing instructions on shipment of sweet peppers from Fort Myers, Fla., to Boston, reconsigned to Chicago. HELD, evidence establishes that shipment moved in accordance with original instructions given, that no additional routing instructions were furnished at time reconsignment was requested, and that it was handled through to ultimate destination in an expeditious manner. No misrouting can therefore be attributed to carriers, and claim for loss and damage not resulting therefrom presents a matter over which commission has no jurisdiction. Kingman v. A. C. L., 118 I. C. C. 31.

(j) The commission has no jurisdiction over claims for loss and damage growing out of delay in transit not due to a violation of the act. Kingman v. A. C. L., 118 I. C. C. 31, 32.

(k) Complainant seeks reparation for damages alleged to have been sustained by it through the misrouting of a car of strawberries. Shipment was delivered to the A. C. L. at Plant City, Fla., March 19, 1925 consigned to complainant at Jersey City, N. J., routed A. C. L.-R. F. & P.-P. R. R. It moved over A. C. L. and R. F. & P. to Potomac Yard, Va., thence Pennsylvania to Manhattan Produce Yards, N. J., where it arrived at 11 a. m. March 23, 1925. Manhattan Produce yards, which are intermediate to and under the jurisdiction of the agent of the perishable freight delivery

yards of the Pennsylvania at Jersey City, are about 4 miles farther distant from the Jersey City ferry of the Pennsylvania than the yards at Jersey City. No explanation or justification is offered by defendants for their failure to tender delivery at Jersey City, the billed destination. The car was unloaded at Manhattan Produce yards transferred by dray to complainants place of business in New York by its drayman. Charged same to Manhattan Produce Yards as to Jersey City. No claim is made for reparation for the difference between the expense of drayage actually incurred and the expense which would have incurred if delivery had been made at Jersey City. The contention that the shipment was misrouted can not be sustained. There was no deviation from the route named in the bill of lading in the movement of the shipment from point of origin to Manhattan Produce Yards, where delivery was accepted by complainant's agent and where the rail transportation terminated. The situation here is one involving defendant's failure to complete a transportation service which they contracted to perform, and on which no violation of the act can be predicated. Complainant's remedy, if any, lies in the courts. HELD, complaint dismissed. Long v. A. C. L. R. R., 120 I. C. C. 601.

(l) Upon complaint seeking damages due to alleged misbilling of two carloads of watermelons shipped from Sumter and Norman Park, Ga., to Potomac Yard, Va., thus delaying delivery and causing deterioration and decrease in value of the commodity, HELD, Shipments not having been shown to have been misbilled by carriers but forwarded in the usually manner without unnecessary delay and damages sought not being shown to result from any violation of the act, complainant's redress, if any, lies in the courts. See 100 I. C. C. 259. Mossburg v. A., B. & A. 126 I. C. C. 447.

(m) Complainant alleged that failure of delivering carrier to notify it of the refusal at destination of two cars of cabbage shipped August 4 and 5, 1924, from Crockett and Grubb, Va., to Jersey City, N. J., was in violation of section 6, and resulted in damage in the sum of $501, which was the invoice price of the shipments. Points of origin are on the N. & W. Shipments moved under refrigeration, as routed, over the N. & W. to Hagerstown, Md., and Pennsylvania beyond. They were consigned to complainant at Jersey City with instructions to notify Wishnatski & Nathel, New York. Shipments arrived Jersey City on August 7 and 8, 1924. Notice of arrival was mailed to Wishnatski & Nathel by the agent of the Pennsylvania at Jersey City on the date of arrival of each shipment. After telephoning that firm on several successive days in an effort to secure disposition order, the agent at Jersey City telegraphed complainant on August 13 that the shipments were on hand unclaimed and requested advice as to disposition. Subsequent correspondence between this agent and complainant resulted in complainant advising, on August 22, 1924, that the shipments should be disposed of to the best advantage. They were then sold at auction by the Pennsylvania for less than the accrued charges. Complainant contends that defendants should have notified it within 48 hours after arrival of each shipment that they were on hand unclaimed. The effort of the complainant to recover the value of the shipment is properly a loss and damage claim and not covered by the tariff. HELD, complaint dismissed. Independent Produce Shippers v. N. & W. Ry., 129 I. C. C. 747.

(n) Complainant alleged that the Stoppage at Cameron Yard, Va., of three cars of cucumbers shipped from Blackville, S. C., to Potomac Yard, Va., and diverted to New York, N. Y., resulted in delay in arrival of the shipments and deterioration of the commodity, and was unreasonable, unduly prejudicial and in violation of section 15 of the act. Shipments were tendered to the Southern at Blackville billed to Potomac Yard. It was complainants custom to bill cars in that manner and to have his representative file diversion orders with the carriers before arrival of the shipments at Potomac Yard. Complainant contends that the cars were stopped at Cameron Yard, a point intermediate to Potomac Yard, and that the interruption caused delay and consequent deterioration of the cucumbers. His testimony fails to sustain the allegations in the complaint. HELD, complaint dismissed. Pape & Co. v. Southern Ry., 132 I. C. C. 1.

(o) Complainant alleged that collection of freight charges Sept., 16, 1925 from Boston, Mass., to Miami, Fla., but not delivered to complainants, and defendants refusal to refund such charges promptly, violated sections 1, 2, 3, and

10 of the act, the bills of lading act, and the Elkins act. Potatoes were shipped on order notify bill of lading from Boston, Sept. 16, 1925, and moved by Ocean Steamship Company, S. A. L. and F. E. C. to Miami. On Sept. 26, 1925 the car which is alleged to have contained the shipment was placed on the private track of complainants by the F. E. C. without surrender of the bill of lading to the carrier. This car, on the night of Sept. 28, 1925, was removed from complainants track and sent to Hialeah, Fla., where it was loaded with livestock. The evidence is in conflict as to whether or not the car contained the potatoes at the time of removal from complainants track. Complainants state that they did not receive the shipment, and that the charges, which were not collected until Dec. 12, 1925, were paid through error. Defendants urge that complainants received the shipment but failed to make proper entry of its receipt in their record. Whether the basis of the complaint be the recovery of damages incident to the loss of goods or the recovery of money paid through mistake, it is a matter properly within the jurisdiction of the courts. HELD, complaint dismissed. Drake Produce Co., v. F. E. C. Ry., 132 I. C. C. 729.

(p) As the Commission has no jurisdiction of loss claims it is not empowered to prescribe rules and regulations for the payment of such claims. Drake Produce Co. v. F. E. C. Ry., 132 I. C. C. 729, 730.

(q) Any claim for damages due to delay is beyond the jurisdiction of the Commission. Scott Graff Lumber Co. v. C. St. P. M. & O. Ry., 132 I. C. C. 745, 746.

§5. Jurisdiction of Courts.

See Courts §11.

(a) Loss and damage claims, and the measure of damages applicable thereto, are cognizable only in the courts. Rinelli v. N. Y. N. H. & H. R. R., 112 I. C. C. 567, 568.

(b) Loss and damage claims and the measure of damages applicable thereto, are cognizable only in the courts. Independent Produce Shippers v. N. & W. Ry., 129 I. C. C. 747, 748.

II. CARRIER'S LIABILITY.

§5½. In General.

(a) Complainant alleged defendant's failure to give notice as required by the tariff rules of the refusal at destination of a car of onions shipped from Buffalo, N. Y., to Providence, R. I., resulted in undue prejudice in violation of section 3. Shipment originated in California and on June 7, 1924 was reconsigned from Buffalo by complainant to his order, notify F. E. Winsor at Providence. It arrived at destination on June 11 and on June 19 defendant's agent notified complainant by wire that the shipment had been refused by the person for whom it was intended. The effort of complainant to recover the value of the shipment is properly a loss and damage claim and not covered by section 3. HELD: complaint dismissed. Rinelli v. N. Y., N. H. & H. R. R., 112 I. C. C. 567.

(b) It is well established that where an article which has been shipped for sale is lost or damaged in transit by the carrier, the carrier is liable not only for the cost of production, but also for the reasonable and normal profits of the sale of which the vendor has been deprived. Burrough Adding Machine Co. v. M. C. R. R., 120 I. C. C. 19, 20.

(c) Factory cost of an article without addition of any profit can not properly be compared with sales prices of other commodities in which a profit is included, regardless of basis upon which claims are filed against carriers for goods lost or damaged in transit, for it is well established that where an article which has been shipped for sale is lost or damaged in transit by carrier, the latter is liable not only for cost of production but also for reasonable and normal profits of the sale of which the vendor has been deprived. See 13 Fed. (2d) 459. Burroughs Adding Machine Co. v. M. C., 120 I. C. C. 19, 20.

(d) Name of grower was erroneously substituted by carrier in waybill in lieu of consignee's name, thereby necessitating the obtaining of telegraphic advice from originating carrier as to correct consignee before placement of car could be made Upon contention that failure to follow shipping instructions violated section 15 of the act and resulted in delay and deterioration in transit, FOUND: Due to congestion at destination it is not shown that any undue delay was caused by holding car while awaiting proper shipping instructions. Evidence is therefore insufficient to show that failure to follow instructions was

proximate cause of alleged damage. Pearce v. G. N., 129 I. C. C. 253.

§7. Intermediate Carrier.

(a) Under the common law, a connecting common carrier, engaged in interstate commerce, is liable for damages to goods occurring on its line as a result of its negligence, but, in such a case, the burden of proof is upon the plaintiff to show that the damage occurred while the shipment was being transported over such carrier's line. Hansen-Peterson Co., v. Atchison, T. & S. F. Ry. Co., (Minn. 1925) 205 N. W. 605.

§10. Common Law Liability in General.

(2). Limitation of Liability.

See Limitation of Liability.

(a) Under section 20 (11) of the act, all limitations of liability for actual loss, damage, or injury in respect to livestock are prohibited. Bedding Charges for Livestock, 128 I. C. C. 167, 176.

§10¼. Damages in General.

See Reparation §10½.

(a) In action against carrier for damage to hay which ultimate consignee refused to accept, demurrage and return freight charges held not allowable, in absence of showing why hay should not have been disposed of at destination. Texas & P. Ry. Co. v. Beck—Mattox Brokerage Co., (Tex., 1925) 279 S. W. 289.

MAILS

(a) Upon reargument, findings in 95 I. C. C. 204,, 208; 95 I. C. C. 493, 513; and 96 I. C. C. 43, 46, that rates of pay for transportation of United States mails, previously prescribed by commission in original Mail Pay case, 56 I. C. C. 1, and in effect during periods from dates applications for re-examinations were filed to dates of commission's orders establishing increased rates for future, were not fair and reasonable, affirmed. Order entered establishing such increased rates as of dates of filing of applications by carriers. Railway Mail Pay, 104 I. C. C. 521.

(b) The circumstances surrounding transportation of mail are unusual and not in all respects analogous to those surrounding determination by commission of just and reasonable rates for freight or express service. Railway Mail Pay, 104 I. C. C. 521, 523.

(c) From a consideration of the statute as a whole it appears that Congress conferred upon commission full power to determine just and reasonable rates for transportation of mail. The provision for reexamination gives commission power to reexamine, upon application by carriers, mail pay rates previously prescribed and if it is of opinion that rates for services covered by applications were not fair and reasonable as of and following dates the applications were filed, so as to find and to fix and determine rates that were fair and reasonable. Railway Mail Pay, 104 I. C. C. 521, 524.

(d) The charge per mile of car space for transportation of United States mail is a charge against the Government, and forms no measure for charges against shippers. Newspaper in Baggage Cars, 104 I. C. C. 527, 536.

(e) The Government is a carrier of mails and its dealings with the railroads are contractual matters between carriers. Charges for mail space partake more of nature of absorptions upon the Government's part out of revenue derived by it from the public for mail service. Furthermore, charge per mile of car space for mail is a charge against the Government, and forms no measure for charges against shippers. The railway-mail-service pay act provides that this distinction shall be considered by commission in fixing fair and reasonable rates and compensation for transportation of mail by common carriers. The railway-mail service bears one characteristic which is unlike any other form of transportation in that there is but one consignee and one consignor for all mail shipments, in so far as carrier is concerned. Newspapers in Baggage Cars, 104 I. C. C. 527, 536.

(f) In an endeavor to show unreasonableness in rates on newspapers in baggage cars publishers offered extensive studies of revenue from newspapers with revenue derived from the Government for carriage of closed-pouch mail. FOUND: Incidents of this traffic in handling and in methods of computing charges are so different from any other traffic that any comparison with rates for railway-mail service are valueless. Newspapers in Baggage Cars, 104 I. C. C. 527, 536, 537.

(g) Present rate of mail pay received by the Canadian National Ry. over lines in New England, and the Tonopah & Goldfield R. R. in Nevada, originally prescribed by commission in 56 I. C. C. 1,

upon reexamination found not fair and reasonable on and after dated applications for reexamination were filed by respective carriers. Fair and reasonable rates established as of such dates. Railway Mail Pay, 109 I. C. C. 13.

(h) No rates of mail pay may be established by commission as of a period prior to filing by a carrier of an application for reexamination of rates in effect. Railway Mail Pay, 109 I. C. C. 13, 14, 16.

(i) Upon reexamination of facts and circumstances surrounding transportation of mail matter upon line of the Alabama, Tennessee & Northern R. R. Corp., FOUND: That rates of mail pay on and after date of filing of carrier's application were unfair and unreasonable. Fair and reasonable rates on basis of those established in 95 I. C. C. 493 prescribed for services rendered and former report, 56 I. C. C. 1, modified. Railway Mail Pay, 112 I. C. C. 151.

(j) The commission does not regard a cost ascertainment arrived at by a study of space operated during a 30-day period as necessarily conclusive in determining fair and reasonable rates of pay for transporting mails of the United States. Such a cost study does, however, afford a reasonably reliable approximation of the cost upon a car-foot-mile or space basis to which considerable weight should be given. Railway Mail Pay, 112 I. C. C. 151, 153.

(k) This case was reopened, on allegation of carriers that their present rates of pay established by the order in 56 I. C. C. 1 are not fair and reasonable and that higher rates should be established. The applicant carriers are located in the intermountain and Pacific coast territory, the same general territory in which are located 23 short line railroads whose rates of pay were increased in 95 I. C. C. 493. Of the applicant roads two are in Oregon, eight in California, three in Nevada, two in Utah, two in Arizona, one in New Mexico, two in Colorado and one in Montana. Four are narrow gauge roads. HELD, rates of pay now in effect not fair or unreasonable and increased rates prescribed. Railway Mail Pay, 120 I. C. C. 439.

(l) Upon further hearing and a consideration of conditions affecting operations, rates of pay for transportation of mail on certain short lines in intermountain and Pacific coast territory, found unfair and unreasonable and fair and reasonable rates prescribed. Former report, 56 I. C. C. 1. Railway Mail Pay, 120 I. C. C. 439.

(m) Winston Salem Southbound Ry., by application filed April 25, 1925 requests that it be classified as a separately operated railroad not exceeding 100 miles in length and not less than 50 miles in length, as from Dec. 23, 1919, within the meaning of the order in 56 I. C. C. 1; and that, if not so classified, increased rates of mail pay be established for the service rendered by it with special reference to the period beginning on the said date. Winston Salem is 90 miles in length, extending from Winston Salem, N. C., where it connects with the N. & W., to Wadesboro, N. C., at which point it connects with the A. C. L. Road was built with money furnished by the N. & W. and A. C. L. It is clear that the Winston Salem has not a separate administrative organization and hence does not come within the classification of roads for which higher rates of mail pay were established. Its request, therefore, for classification as a separately operated railroad within the meaning of the order is denied. HELD, rates of pay now accorded not fair and reasonable and that increases are justified on and after April 25, 1925 the date it filed its application for reexamination. HELD, further for future will be for each mile of service, by a 15 foot apartment car, 18.75 cents, by a 3 foot closed pouch space 5.625 cents. Railway Mail Pay, 123 I. C. C. 33.

(n) It is proper to repeat that if the carriers make no special effort to utilize space made available by reduced authorizations, the advantages of economizing on space requirements will be lost, the complementary space will be augmented and the ultimate mail space figures will be unduly increased. Railway Mail Pay, 123 I. C .C. 33, 40.

(o) Upon a consideration of space ratios and apportionment of expenses and investment based thereon, rates of pay for transportation of mail matter by the Winston-Salem Southbound Ry., found unfair and unreasonable. Following 104 I. C. C. 521, fair and reasonable rates established, retroactive to date of filing of application for reexamination of its mail-pay rates. Railway-Mail Pay, 123 I. C. C. 33.

(p) Winston-Salem Southbound Ry.,

found not to be a separately operated railroad within meaning of commission's order entered in 56 I. C. C. 1. In defining the term "separately operated" the commission did not limit it to physical operation but it was given a broader meaning to include administration of the affairs of the carrier as well. The Winston-Salem has not a separate administrative organization and hence does not come within the classification of roads for which higher rates of mail pay were established. Railway-Mail Pay, 123 I. C. C. 33.

(q) In ascertaining relative costs of service upon a car-foot-mile basis between mail and other services rendered in passenger-train equipment mixed or combination cars can not be treated as composed of separate unrelated parts. Unused space necessarily operated in such cars should be apportioned to the respective services in proportion to amount of space used by each service in such cars. See 85 I. C. C. 157, 173. Railway-Mail Pay, 123 I. C. C. 33, 37.

(r) Space ratios and apportionment of expenses and investment based on them, while not necessarily conclusive, furnish a substantial basis for conclusions as to reasonableness of rates of pay for transporting mails of the United States. Railway-Mail Pay, 123 I. C. C. 33, 40.

MEXICO

See Adjacent Foreign Country; Through Routes and Joint Rates.

(a) Shipment of whiskey was consigned to shippers' order c/o collector of customs, El Paso, notify a drug store at Juarez, Mex. Upon arrival at El Paso consignee was notified but shipment remained unclaimed and was subsequently stored. Thereafter, by command of United States court, customs collector was notified to detain shipment in his custody. This was done until dismissal of court proceeding when, upon payment of accrued storage charges, shipment was returned to point of origin. Tariff rule provided that no storage charges should be collected for detention due to delay by U. S. customs and that free time lost through such delay shall be allowed. FOUND: While detention here was for purposes other than those incident to customs inspection and clearance for export, terms of the rule, which clearly comprehend any delay by U. S. customs are sufficiently broad to preclude assessment of storage charges under circumstances. Refund of overcharges directed. Sunny Brook Distillery Co. v. A., T. &. S. F., 107 I. C. C. 77.

(b) The Commission is without power or authority to require the establishment of international joint rates for the future, and it can not prescribe for the future through routes and joint rates which would include two rails lines located wholly in Mexico. Spanish River Pulp & Paper Mills v. A. & W. Ry., 120 I. C. C. 251, 253.

MINIMUM CLASS RATE SCALE

See Class Rates §1 (l).

MINIMUM RATES

See Classification §15, §16; Interstate Commerce Commission 10¼.

(a) Each case involving fixing of minimum rates must be judged upon its own particular facts since a rate which may appear unduly low under one set of circumstances may not so appear under another set of circumstances. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 83.

(b) Rates charged on cotton fabrics, l. c. l., from North Carolina points to Galveston, Tex., found inapplicable. Governing tariff stated that it was subject to western classification "Except as otherwise provided," and provided for alternative application of rates in section 2 or 3, whichever were lower. No minimum weight was provided in connection with lower rates under section 3, and rates were there applicable to actual weight of shipments. However, since rule 15 of the western classification provided for assessment of separate loading and unloading charges on l. c. l. freight moving at c. l. rates, and rule 13 required a minimum charge of $15 per car, these rules must be considered in determining rates applicable to various shipments. Refund of overcharges directed on basis indicated. Southern Traffic & Audit Asso. v. I.-G. N., 129 I. C. C. 723.

CROSS REFERENCES

See Adjacent Foreign Country; Cars and Car Supply; Classification §4, §15, §21; Evidence §65; Express Companies §37½; Weights and Weighing.

I. APPLICATION OF MINIMUM.

§1. In General.

(a) No doubt the power to fix minimum rates can in some situations be employed to advantage and with propriety, for the purpose of averting rate wars, which are always injurious to the carriers and ordinarily, in the long run, to the public interest, or for the purpose of preventing an unjust burden upon other forms of traffic or upon other parts of the country. The Commission believes, however, that the power should be sparingly exercised and only in cases where it clearly appears that its exercise is necessary in order that substantial public injury may be avoided. Ex Lake iron ore from Chicago to Granite City, 120 I. C. C. 75, 83.

(b) The establishment of a minimum weight, irrespective of the size of equipment, is a holding out by the carrier, upon which shipper is entitled to rely, that it will furnish a car capable of holding that minimum. Folly Town Co. v. Erie R. R., 120 I. C. C. 157, 158.

(cd) Practice of assessing charges at published minimum where cars furnished by carriers for their own convenience can not reasonably be loaded to the minimum, is unreasonable. Under "carriers' convenience" rules, carriers are not obliged to furnish cars of size ordered, but are required to protect actual weights where smaller cars furnished are fully loaded. See 74 I. C. C. 747. Folly Town Co. v. E. R. R., 120 I. C. C. 157, 158.

(e) In the case of light and bulky articles the minimum weight represents the maximum loading of this article is commonly fixed with a view to directly affecting the car earnings. Where the minimum carload weight is made with the object of returning not more than a fair earning per car in connection with the carload rate, the rule seems not to apply. The rule meant is that it is unreasonable to assess charges on the basis of a minimum weight to which cars are not capable of being loaded. Rome Metallic Bedstead Co. v. B. & A. R. R., 122 I. C. C. 733, 735.

(f) The carload minimum is a part of the rate. Three Forks Portland Cement Co. v. C. B. & Q. R. R., 129 I. C. C. 107, 116.

(g) One factor of combination rate on a carload of sawmill machinery, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification." Governing classification rated sawmill machinery sixth class, minimum 24,000 pounds, subject to rule 34, and exceptions thereto provided class N rating on "Machines and machinery, c. l., * * * minimum weight 20,000 pounds," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Upon contention by carriers that under rule 34 the rate of $61 should be regarded as applicable to a unit of 23,400, the minimum weight for a car of size used, and that excess above such weight should be computed proportionately, HELD: The portion of rule 34 on which carriers rely fits ordinary situation where rates are applicable to specified units of weight, but has no reasonable application where, as here, the rate stated as a flat charge per carload, and charges collected were inapplicable. Reparation awarded. West Florida Lbr. Co. v. G., F. & A., 129 I. C. C. 62.

(h) One factor of combination rate on a mixed carload of sawmill machinery and a power boiler, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification." Governing classification rated both sawmill machinery and power boilers sixth class, minimum 24,000 pounds, subject to rule 34. Exceptions to classification, however, provided class N rating to apply on 'Boilers, steam power * * * in straight or mixed carloads, with machinery and machines,

per car 20,000, excess in proportion," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Complainant's contention that the rate of $61 is applicable to 20,000-pounds units of freight with any fractional excess in proportion, sustained, and charges collected found inapplicable to extent they exceeded charges computed by multiplying the rate per car by the weight of shipment and dividing by 20,000 units. Reparation awarded. West Florida Lbr. Co. v. G., F. & A., 129 I. C. C. 62.

(i) Rates charged on cotton fabrics, l c. l. from North Carolina points to Galveston, Tex., found inapplicable. Governing tariff stated that it was subject to western classification, "Except as otherwise provided," and provided for alternative application of rates in section 2 or 3, whichever were lower. No minimum weight was provided in connection with lower rates under section 3, and rates were there applicable to actual weight of shipments. However, since rule 15 of the western classification provided for assessment of separate loading and unloading charges on l. c. l. freight moving at c. l. rates, and rule 13 required a minimum charge of $15 per car, these rules must be considered in determining rates applicable to various shipments. Refund of overcharges directed on basis indicated. Southern Traffic & Audit Asso. v. I.-G. N., 129 I. C. C. 723.

§3. Furnishing Car of Minimum Ordered.

See Cars and Car Supply §8.

(a) Charges applicable on one electric traveling crane, resulting from carrier furnishing three cars each shorter than two cars ordered, found unreasonable to extent they exceeded those which would have accrued based on size of equipment ordered. A tariff rule in effect provided that where a car of specified length is ordered and a longer car is furnished minimum weight for the latter shall be that fixed for car ordered. It was unreasonable for carriers to fail to provide a like rule to cover situations similar to that here presented. Reparation awarded. Metal & Thermit Corp. v. P. R. R., 115 I. C. C. 396.

§5. Minimum Higher Than Car Capacity.

(a) If carriers desire to protect themselves from unduly low charges per car they should do so by regulating rate and not by prescribing arbitrary minimum weights which can be loaded only in cars of unusual size. It is unreasonable to base charges on a minimum to which cars are incapable of being loaded. Swift & Co. v. G. T. Ry., 109 I. C. C. 45.

(b) The commission looks with disfavor upon minimum weights than can not ordinarily be loaded. Carriers should not regulate their revenues by prescribing arbitrary minima that can be loaded only in cars of unusual size, but by adjusting their rates with relation to a reasonable minimum. See also 25 I. C. C. 434. Gille Mfg. Co. v. K. C. S., 109 I. C. C., 408, 412.

(c) A minimum beyond the limit of safe loading will not be prescribed by commission. Protection against unduly low charges per car should be accomplished by regulating the rate and not by arbitrary minimum. A minimum does not contemplate a weight closely approaching the maximum loading possible; due regard should be given to commercial requirements. Heinz Co. v. Director General, 112 I. C. C. 206, 209.

(d) If carriers desire to protect themselves from unremunerative charges per car they should do so by regulating the rate and not by prescribing minimum weights which manifestly can not be loaded. Hauber Cooperage Co. v. A. T. & S. F. Ry., 115 I. C. C. 533, 534.

(e) Complainant attacked rates charged on 56 cars of alfalfa meal shipped from Idaho to Memphis, Tenn., between Oct. 1, 1923, and Jan. 5, 1924, as unreasonable and unduly prejudicial, and also alleged that some of the cars because of lack of capacity could not be loaded to the minimum weight prescribed in the tariffs and that thereby the shipper was subjected to unjust charges. Rates charged were milling in transit rates. Under these rates complainant received hay from the several points of origin and milled it at Pocatello or Gooding. Prior to June 10, 1923, the rates from these origin points to Memphis ranged from 64c to 69.5c, minimum 40,000 pounds. Rates from Firth, Pocatello and Gooding are taken as representative. From Firth and Pocatello the rates to Memphis were 64c; from Gooding 69.5c. The rates contemporaneously in effect from Idaho points to St. Louis were from 59 to 64c, minimum 40,000

pounds. On June 10 and Aug. 30, 1923, the rates from points of origin in Idaho to St. Louis were reduced to rates ranging from 54 to 57c. Rates from the same points to Memphis were not reduced until Jan. 5, 1924, when rates ranging from 62 to 64c were established. On Nov. 28, 1923, the minimum weight on alfalfa meal from Idaho points to St. Louis was reduced from 40,000 pounds to the same basis as that in effect from Colorado; and on Jan. 5, 1924, the minimum weight from Idaho to Memphis was likewise reduced to the Colorado basis. No reason was given by the carriers for the maintenance of a higher minimum weight from Idaho than from Colorado. It is shown that Colorado produces much more alfalfa hay than Idaho, that it is considered the more important of the two states in this respect, and that the selling price of Idaho alfalfa meal is based upon the Colorado price. HELD, rates attacked not unreasonable but minimum weight of 40,000 pounds was unreasonable to extent it exceeded 30,000 for cars 36 ft. 6 inches or under in length and 36,000 pounds for cars over 36 ft. 6 in. in length, reparation awarded. Bailey v. O. S. L. R. R., 115 I. C. C. 745.

(fg) Practice of assessing charges at published minimum where cars furnished by carriers for their own convenience can not reasonably be loaded to the minimum, is unreasonable. Under "carriers' convenience" rules, carriers are not obliged to furnish cars of size ordered, but are required to protect actual weights where smaller cars furnished are fully loaded. See 74 I. C. C. 747. Folly Town Co. v. E. R. R., 120 I. C. C. 157, 158.

(h) The familiar line of cases supporting the rule that it is unreasonable to assess charges on basis of a minimum weight to which cars are not capable of being loaded is subject to important exceptions. See 26 I. C. C. 197; 14 I. C. C. 597; 55 I. C. C. 495; and 91 I. C. C. 598. Rome Metallic Bedstead Co. v. B. & A., 122 I. C. C. 733, 736.

(i) Where there is a uniform minimum for all lengths, the carrier is not required to furnish a car of any specific length, but it is under the duty of establishing a minimum weight that can be reasonably loaded into a car of the size furnished. Barker Bros. v. A., T. & S. F. Ry., 132 I. C. C. 753, 756.

§7. Reasonableness and Discrimination.

See Cars and Car Supply §8; Discrimination; Distance Rates §3; Emergency Rates; Reasonableness of Rates; Reduced Rates §5 (h).

(a) Powder, common black: Proposed increase in minimum carload weight on, from Fairchance, Pa., to Carney's Point, N. J., and points taking same rates, to general basis of that applying to all points within trunk-line territory on connecting lines, found justified. Powder from Fairchance, Pa., 104 I. C. C. 45.

(b) Boxes, battery: Proposed increased c. l. minimum weight on asphalt composition battery boxes in official, southern and western classifications from 20,000 to 24,000 pounds found justified, it being shown that such boxes readily load to the higher minimum. Classification of Asphalt Battery Boxes, 104 I. C. C. 190.

(c) Proposal to decrease minimum weight on salt from eastern shipping points, except Groups B and C rate points, to destinations in Arizona, California, Mexico, Nevada, New Mexico, Oregon and Utah, found justified. Proposed decrease will remove handicap of shippers west of Chicago in marketing their salt in competition with salt produced in Utah and California, and result in less damage to shipments in transit. Minimum Weight on Salt, 104 I. C. C. 631.

(d) Drums, iron or steel, returned empty: Minimum weight on returned empty used iron or steel drums found not unreasonable as compared with minimum weights on same commodity new. The old drums are frequently painted, accumulate more or less dirt and rust in use, and not infrequently contain a small quantity of original contents, features tending to produce variations in weight justifying higher minimum weights on the old drums than on the new. Western Paper Makers' Chem. Co. v. A. A. R. R., 109 I. C. C. 133, 138.

(e) Minimum weight applied on shipments of myrobalans, wattle bark, and divi-divi pods under classification provision "extract, bark and tanning, viz: * * * myrobalans, wattle bark, and divi-divi pods * * * minimum 60,000 pounds," found to have been illegally assessed, and minima of 36,000, 30,000, and 24,000 pounds applicable under governing classification on myrobalans, divi-divi pods, and wattle bark, respectively, found ap-

plicable. Tariff item carrying higher minimum applied only on bark or tanning extracts, and not on unmanufactured extract materials. Applicable minima not shown unreasonable. Adjustment of undercharges and overcharges directed. International Shoe Co. v. B. & O., 109 I. C. C. 641.

(f) Respondents proposed to increase from 12,000 to 16,000 pounds, subject to rule 34 (graduated minima rule), the carload minimum applicable in connection with commodity rates on theater chairs, set up or knocked down, in straight or mixed carload, or in mixed carloads with such articles of furniture as are provided with carload, less carload, or any quantity ratings in western classification under the caption, furniture, and furniture parts (except school desks and seats, iron or steel and wood combined, and household refrigerators) from points in certain defined territories to Texas gulf ports and El Paso, Tex., and points taking same rates, and to Oklahoma and also on like traffic originating at or destined to points in Louisiana, northeastern Texas and Texarkana, Tex. The proposed minimum is the same as the minimum on theater chairs, in straight carloads in the consolidated classification. The evidence indicates that 16,000 pounds of theater chairs can readily be loaded in a standard 36-foot car. No justification is shown for the maintenance of any different provisions governing the shipment of theater chairs in mixed carloads with other furniture from the origin points here considered. HELD: Proposal relates to traffic from these defined territories to Texas gulf ports and El Paso, and points taking the same rates, and to Oklahoma, and to like traffic originating at or destined to points in Louisiana, northeastern Texas and Texarkana. Respondent's evidence is directed to the proposal in its entirety. HELD: Proposed schedules justified except as noted. Theater chairs to southwestern destinations, 113 I. C. C. 313.

(g) In fixing reasonable minima some leeway of course must be accorded for commercial conditions, and the minima should not require the loading of all cars to their utmost capacity. Theater chairs to southwestern destinations, 113 I. C. C. 313, 317.
enough to insure the proper utilization of equipment. Theater chairs to southwestern destinations, 113 I. C. C. 313, 317.

(i) Rates and minimum weights on strawberries and cabbage from points in Kentucky and Tennessee to Kalamazoo, Battle Creek, Sturgis, and Coldwater, Mich., found unreasonable and unduly prejudicial to extent they exceeded those contemporaneously applicable to Grand Rapids, Mich. Reparation awarded. Lewis Co. v. L. & N., 112 I. C. C. 213.

(j) Proposed increased minimum weight on theater chairs, s. u. or k. d., in mixed carloads, from points in certain defined territories to Texas Gulf ports and El Paso, Tex., and points taking same rates, and to Oklahoma, and on traffic originating at or destined to points in Louisiana, northeastern Texas, and Texarkana, Ark.-Tex., found justified. The increased minimum is designed primarily to satisfy complaints made by manufacturers in c. f. a. territory who alleged undue preference of competitors at Illinois, Wisconsin, and North Carolina producing points. Minimum proposed can readily be loaded in standard equipment, is same as that on straight carloads in consolidated classification, and evidence falls short of establishing the extent, if any, to which the minimum should, for commercial reasons, be less than that proposed. Theater Chairs to Southwestern Destinations, 113 I. C. C. 313.

(k) In fixing reasonable minima some leeway should be accorded for commercial conditions, and minima should not require loading of all cars to their utmost capacity. On the other hand, carload minima should be high enough to insure a proper utilization of equipment. Theater Chairs to Southwestern Destinations, 113 I. C. C. 313, 317.

(l) Upon contention that theater chairs compete with portable chairs, church furniture, and wood benches, and that an increase in the minimum on theater chairs would be unduly prejudicial to the latter, HELD: This competition, which is limited, should not be controlling in determination of a reasonable minimum on theater chairs. Theater Chairs to Southwestern Destinations, 113 I. C. C. 313, 318.

(m) Complainant attacked charges on slack wood barrels from Kansas City, Kans., to Enid and Tulsa, Okla., as unjust, unreasonable, unduly prejudicial and in excess of charges under the ag-

gregate of intermediate rates by reason of differing carload minima. Commodity rates on wooden barrels from Kansas City to Oklahoma are grouped as to points of origin and destination. The Kansas City group includes St. Joseph and Springfield, Mo., and Salina, Hutchinson and Kiowa, Kans. Enid is in Oklahoma Group 5 and Tulsa in Group 3. Present rate of 45.5c from the Kansas City group to both destinations applies not only on slack but also on tight wooden barrels, tierces, and kegs, and is subject to minimum of 20,000 pounds. In other cases the Commission has prescribed lower minima for slack than for tight barrels. Complainant's shipments were loaded to the full space or visible capacities of the cars furnished and the actual weights were in every instance considerably less than the tariff minimum, although 50 foot cars were customarily furnished and used. The record is convincing that no transportation or traffic conditions warrant lower rates from the competing Texas manufacturing points than from the Kansas group and the carriers should readjust the rates from the Texas points to the level of those from the Kansas group so as to remove the alleged undue prejudice in rates. HELD, carload minimum attacked unjust on slack wooden barrels to extent it exceeded 10,000 pounds for 36 ft. cars, subject to rule 34. Rates not unreasonable, but charges unreasonable to extent they would exceed those found reasonable under the ordered minima, reparation awarded. Hauber Cooperage Co. v. A. T. & S. F. Ry., 115 I. C. C. 533.

(n) Complainant attacked carload minimum of 22,000 pounds on sheep and lambs, in double deck cars 36 ft. 7 inches and under in length, from South Omaha, Neb., East Buffalo, N. Y., Chicago, Ill., East Louisville, Ky., to Jersey City and Harsimus, N. J., and New York as unreasonable and illegal. The issue was confined to the reasonableness of the minimum from East Louisville and Cincinnati and east of the Mississippi river. Charged proportional commodity rates of 26c to East Clinton, Ill., and 63c beyond minimum 22,000 pounds subject to the combination rule. Effective August 19, 1922, the carload minimum on sheep and lambs from East Clinton to Jersey City was reduced to 18,000 pounds for double deck cars. HELD, minimum attacked unreasonable to extent it exceeded 18,000 pounds from East Clinton to Jersey City, reparation awarded. Seaboard Livestock Bureau v. A. C. & Y. Ry., 115 I. C. C. 687.

(o) The carload minima on sheep and lambs in western territory are so directly and intimately related to the rates per 100 pounds that the propriety of the minima can not be determined without considering the measure of the rates. Seaboard Livestock Bureau v. A. C. & Y. R. R., 115 I. C. C. 687, 690.

(p) Respondents proposed to increase the minimum carload weight on shipments of common brick originating on the Pennsylvania and moving from and to points in central territory. Present tariffs provide that the minimum carload weight on common brick is the "marked capacity of car ordered, but not less than 60,000 pounds." It is proposed to cancel this provision and substitute therefore "marked capacity of car," which is construed by the parties as having reference to the car furnished and loaded. Brick producers always load as heavily as possible, frequently to 10 per cent above the marked capacity. The record in this proceeding clearly shows that there is a real trade need for a minimum on common brick of 60,000 pounds, the capacity of equipment owned by the Pennsylvania. Under the proposed schedules some shippers could be favored over others in being furnished cars of desired capacities. Respondents admitted that no consideration had been given to the reasonableness of a minimum of 100,000 pounds on common brick the practical effect of their proposal on most shipments. HELD, schedules not justified. Minimum weight on brick, 118 I. C. C. 136.

(q) Carload minimum of 20,000 pounds on shipments of slack wooden barrels loaded to full visible capacity, found unreasonable to extent it exceeded 10,000 pounds for 36-foot cars, subject to graduated minima for longer cars. Reasonable minima prescribed and reparation awarded. See also 45 I. C. C. 468; 49 I. C. C. 588. Hauber Cooperage Co. v. A., T. & S. F., 115 I. C. C. 533.

(r) Carload minimum of 36,000 pound on potatoes, in barrels, found not unreasonable as compared with lower mimimum of 30,000 pounds applicable on potatoes in bags or in bulk. The lower minimum in bags or bulk was established as a protective measure for the early

variety of potatoes which have tender skins and are subject to damage if heavily loaded, while the same potatoes may be loaded in barrels to a higher degree without damage, the barrels acting as sufficient protection from abrasion. Moreover, shippers could have availed themselves of the lower minimum by shipping in bags or bulk. Nooney & Co. v. P. R. R., 115 I. C. C. 547.

(s) Minimum weight of 30,000 pounds applicable on old potatoes and applied on new potatoes found unreasonable to extent it exceeded a minimum of 24,000 pounds subsequently established. New potatoes are of an entirely different character from mature or storage potatoes and because of their more tender skin and higher water content would be more subject to abrasion and deterioration en route if loaded to higher minimum. Moreover carriers generally maintain the 24,000-pound minimum on new potatoes during shipping season of this commodity. Reparation awarded. Atmore Produce Co. v. M. S., B. & P., 115 I. C. C. 599.

(t) Minimum weight on meal, alfalfa from Idaho points to St. Louis, Mo., and Memphis, Tenn., found unreasonable to extent it exceeded minimum contemporaneously in effect from Colorado points. No reason was given for maintenance of higher minimum from Idaho than from Colorado points and fact that latter territory is considered the more important producer of alfalfa products strongly indicates that minimum applicable therefrom is the more accurate and reasonable basis for determining minimum loadings. Reparation awarded. Bailey v. O. S. L., 115 I. C. C. 745.

(u) Proposed increased minimum weight on common brick originating on Pennsylvania R. R., and moving from and to points in c. f. a. territory, by canceling present tariff rule providing that minimum is the "marked capacity of car ordered, but not less than 60,000 pounds," and substituting in lieu thereof "marked capacity of car," found not justified. There is real trade need for a minimum of 60,000 pounds, the capacity of equipment owned by Pennsylvania, and under proposed schedules some shippers could be favored over others in being furnished cars of desired capacities. Moreover, in 68 I. C. C. 213, 222, commission prescribed a 60,000-pound minimum on articles in uniform brick list, including face, fire, and paving brick, marked capacity of car to govern if less than minimum. Minimum Weight on Brick, 118 I. C. C. 136.

(v) On imported rattan furniture in bundles, moving from Seattle, Wash., to Cleveland, Ohio, no import c. l. rates were in effect and l. c. l. rates were assessed. Domestic rates provided minimum weights for cars of varying length but carriers elected to load this furniture in smaller cars. HELD, domestic rates were applicable, and action of carriers in loading in smaller cars should not debar shipper from benefit of minimum on cars which presumably would have held shipments. Reparation awarded and original report 104 I. C. C. 255 reversed. Bailey Co. v. I. C., 118 I. C. C. 455.

(w) The propriety of l. c. l. minimum weight on a particular commodity must be judged in the light of loading possibilities of entire line and not by the lightest types of that commodity. Public Service Cup Co., v. A. C. L., 118 I. C. C. 697, 701.

(x) Complainant attacked charges based on minimum weights assessed on seven shipments of candy from Chicago to New York during April and May 1924 as unreasonable. In official classification candy is rated third class, charged third class 94.5c, there being no provision for graduated minimum weights of cars of different sizes. Complainant ordered 50 ft. car, two 36 ft. cars furnished at carriers convenience. The prescribed minimum of 30,000 pounds could not reasonably have been loaded into the cars furnished by defendants. HELD, charges unreasonable to extent they exceeded 94.5c and the actual weight subject to minimum of 30,000 pounds, undercharges waived. Folly Town Co. v. Erie R. R., 120 I. C. C. 157.

(y) Complainant attacked class rates on fiberboard cans carloads from Jersey City, N. J., to Providence, R. I., as unreasonable. Damage claims are negligible. Carload rating is second class, and third class. Although the Commission has condemned the maintenance of minimum weights which ordinarily can not be loaded into cars of standard dimensions, the evidence here does not establish a case of that kind with respect to shipments of fiberboard cans in general. The charges which accrued on complainants shipments, based on the carload rates and minima can not be said to have been unreasonable. HELD, rates attacked not unreasonable, complaint

dismissed. Brownell & Field Co. v. N. Y. N. H. & H. R. R., 120 I. C. C. 229.

(z) The Commission has frequently approved efforts of the carriers designed to bring about a more adequate utilization of their equipment. Minimum weight on pipe and tubing, 120 I. C. C. 657, 661.

(aa) Where there is a uniform minimum for cars of all weights, carriers are not required to furnish a car of any specified length, but are under the duty of establishing a minimum weight that can reasonably be loaded into a car of size furnished. See 55 I. C. C. 17. Folly Town Co. v. E. R. R., 120 I. C. C. 157, 158.

(bb) Establishment of a minimum weight, irrespective of size of equipment, is a holding out by carrier, upon which shipper is entitled to rely, that it will furnish a car capable of holding that minimum. Folly Town Co. v. E. R. R., 120 I. C. C. 157, 158.

(cc) Sixth-class rates and minimum weights on spelter, from Trenton, N. J., to Atlanta, Birmingham, and Chattanooga, and points grouped therewith, found unreasonable as compared with lower commodity rates taking a higher minimum contemporaneously in effect from spelter-producing points in eastern Pennsylvania relatively close to Trenton to same destinations; also with those from and to various other points for comparable distances. Reasonable rates and minimum weights prescribed for future. Federated Metals Corp. v. P. R. R., 120 I. C. C. 181.

(dd) Complainant sought same ratings on l. c. l. shipments of fiberboard cans in paper bags as apply on l. c. l. shipments of same commodity in barrels, boxes, or crates, contending that although it might be proper to penalize shipments of cans in paper bags which do not fill the cars, such a penalty is unreasonable when cars are loaded to capacity, as possibility of damage is no greater than if the cans are boxed or crated. HELD: Although commission has condemned the maintenance of minimum weights which ordinarily can not be loaded into cars of standard dimensions, evidence here does not establish a case of that kind with respect to fiberboard cans in general. Charges accruing on complainant's shipments, based on c. l. rates and minima, can not, therefore, be said to have been unreasonable. Brownell & Field Co. v. N. Y., N. H. & H., 120 I. C. C. 229.

(ee) Minimum of 60,000 pounds on dried seed peas from Grace, Idaho, to Smithfield, Utah, found unreasonable to extent it exceeded a minimum of 40,000 pounds which is usual minimum for commodity rates on dried peas in this territory. Reasonable minimum prescribed for future, and reparation awarded. Morgan Canning Co. v. O. S. L., 120 I. C. C. 466.

(ff) Proposed increased rates and minimum weight on manure from New Orleans, La., to points in Alabama and Mississippi found justified. Proposed rates compare favorably with those on agricultural limestone and various other commodities for similar hauls; also with those in effect between other points on respondent's lines and with those prescribed by commission in other cases. Manure from New Orleans, 120 I. C. C. 525.

(gg) Proposed increased minimum weight on wrought-iron pipe and seamless iron and steel tubing between points in official classification territory from 36,000 to 46,000 pounds, designed to bring about a more adequate utilization of equipment, found not justified. The increased minimum would not furnish any substantial incentive toward increased loading but would result in materially increased charges to small shippers both for space not needed, and on mixed shipments of iron and steel articles now taking same rates and a 36,000-pound minimum. It would also operate to the advantage of the large shipper and to the disadvantage of the small shipper by diverting business from the latter to the former. Moreover, the minimum proposed constitutes a marked exception to the minimum prevailing on practically all articles of iron and steel classified fifth class and moving on class rates, for which no adequate reason is disclosed. Minimum Weight on Pipe and Tubing, 120 I. C. C. 657.

(hh) Complainant alleged that charges based on minimum weights applicable on carloads of metallic bedsteads and springs from Rome, N. Y., to interstate destinations in official territory and to Richmond, Va., are unreasonable and unduly prejudicial. Commodities here dealt with are rated rule 26 or 80% of third class, in the official classification, minimum 20,000 pounds for a 36 ft. car,

subject to rule 34. Rates on this basis are applicable from Rome to all destinations except New York, N. Y., to which point a commodity rate is published. The essence of the complaint is that the assessment of charges upon the basis of the existing minima compels complainant to pay freight charges upon a greater weight than can be loaded in the car. It is clear from the record that complainants shipments do not load to the minimum and that the weight of a car loaded to capacity will vary both with the width of the beds and the character of the packing. The real issue is whether or not the minimum of 20,000 pounds, applied in connection with the existing rule 26 rates results in charges which are unreasonable. The car mile earnings under the existing minimum yielded by this traffic are not excessive, especially when taken in connection with the value of the commodities transported. HELD, minimum weights and rates not unreasonable or otherwise unlawful, complaint dismissed. Rome Metallic Bedstead Co. v. B. & A. R. R., 122 I. C. C. 733.

(ii) In 91 I. C. C. 598, the commission stated that the carload minima were directly and intimately related to the rates per 100 pounds in connection with which they apply, and that the propriety of the minima could not be determined without considering the measure of the rates. Rome Metallic Bedstead Co. v. B. & A. R. R., 122 I. C. C. 733, 736.

(jj) Eastbound rates on flour, minimum 40,000 pounds from points in Colorado, Utah, Idaho, Montana, Oregon, and Wyoming found unreasonable and unduly prejudicial in favor of dealers located at points in Montana and Colorado, to extent they exceed corresponding rates on wheat. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 718.

(kk) Minimum weight of 20,000 pounds, and charges based thereon, on metallic bedsteads and springs from Rome, N. Y., to points in official territory found not unreasonable or otherwise unlawful. Complainant contended that as its shipments can not load to 20,000 pounds it was unreasonable to assess charges on that basis. An experiment conducted by carriers, however, shows that cars can be loaded in excess of the minimum and actual shipments made by complainant's competitors of mixed carloads of iron and steel beds. and other articles frequently exceeded the minimum. Moreover, earnings under existing minimum are not excessive, considering value of commodity, this case being an exception to the rule that it is unreasonable to assess charges on basis of a minimum weight to which cars are not capable of being loaded. Rome Metallic Bedstead Co. v. B. & A., 122 I. C. C. 733.

(ll) Complainant alleged substantially that the minimum weights applicable on lumber and other forest products loaded in open cars and shipped from Oregon, Washington and British Columbia to destinations in the United States are unjust, unreasonable and unduly preferential. The prayer is for the establishment of the same minima for shipments in open cars as apply on shipments in closed cars. Open top cars generally are used for transporting rough lumber and timbers, which are considerably heavier than manufactured articles such as molding, columns, and doors, for which closed car equipment generally is used. Open top cars are also used where the articles are of such length as to make it impossible to use closed cars not equipped with end doors. The use of closed car equipment is restricted by its height. Open top car loading has no such restriction, and it has been seen that the latter type affords heavier loading. Manifestly, the wide difference in the two types and their loading possibilities warrant a difference in minima. Obvously, the particular commercial needs or requirements of the relatively few complainants, of whom but one appeared at the hearing, and of the lesser number of interveners, of whom none appeared, should not, in the absence of convincing evidence warrant a change, operate to disturb a minimum weight adjustment that for so long a period apparently has been satisfactory to all other shippers in this extensive origin territory. HELD, minima attacked not unreasonable or otherwise unlawful, complaint dismissed. Coast Fir & Cedar Products Co. v. C. P. Ry., 126 I. C. C. 151.

(mm) Minimum weights applicable on shipments of lumber and other forest products in open cars, from points in Washington, Oregon, and British Columbia, to various destinations in United States, FOUND not unreasonable or otherwise unlawful as compared with lower minimum on closed cars. Use of latter is restricted by their height whereas open cars are not so restricted and carriers show that they are generally loaded above specified minimum. Greater cost of some open types coupled with their loading possibilities warrant a different minima.

Moreover, in 68 I. C. C. 98, present minimum appeared satisfactory to both shippers and carriers and record here is not persuasive that any change in various transportation characteristics of forest products from this territory has since occurred to warrant a different conclusion. Coast Fir and Cedar Products Co. v. C. P. Ry. 126 I. C. C. 151.

(nn) The particular commercial needs or requirements of relatively few complainants and interveners, should not, in absence of convincing evidence warranting a change, operate to disturb a minimum-weight adjustment that for a long period has been satisfactory to all shippers in an extensive territory. Coast Fir & Cedar Products Co. v. C. P. Ry., 126 I. C. C. 151, 158.

(oo) Rate and minimum weights on poles from San Pedro to Thenard, Calif., being part of through movement from interstate points, of shipments reaching San Pedro by water, found not unreasonable or otherwise unlawful as compared with rates accorded competitors at Los Angeles, or with rates and minimum weights on lumber between points in the Los Angeles harbor district. While poles received by competitors are creosoted in the Pacific Northwest, thus reducing weight of poles transported, creosoting is permitted at Thenard and the creosoted poles move at the lower minimum sought on the green poles under the through rates from San Pedro to Los Angeles and other southern California destinations. Although none of shipments involved exceeded the applicable minima, evidence does not establish that cars covered by the complaint were loaded to full capacity or that the applicable minimum could not have been loaded. Moreover, in 87 I. C. C. 1, per-car rate on lumber equal to that here assessed was found reasonable. Baxter & Co. v. S. P. 128 I. C. C. 211.

(pp) Complainant attacked rate and minimum weight on carload shipments of poles and piling from San Pedro to Thenard, Calif., during and since 1922 as unreasonable, unjustly discriminatory and unduly prejudicial. These poles originate in the Pacific northwest and are shipped green in complainants steamers to San Pedro, thence over the S. P. to Thenard. There they are creosoted at complainants plant, losing from 18 to 20% in weight in the creosoting process. From San Pedro to Thenard 4.1 miles, rate 2.5c, subject to minima of 60,000, 84,000 and 108,000 pounds on single, double and triple loads, respectively. The evidence does not establish that the applicable minimum weight could not have been loaded on the cars furnished or that the cars covered by the complaint were loaded to full capacity. HELD, rate and minimum weights assailed not unreasonable, unjustly discriminatory or unduly prejudicial, complaint dismissed. Baxter & Co. v. S. P. Co., 128 I. C. C. 211.

(qq) Complainant alleged that certain practices of defendants incident to the loading of waste paper in cars at their rail terminals result in freight charges which were and are unreasonable, unjustly discriminatory and illegal. Waste paper is classified, carloads, sixth class, minimum 24,000 pounds subject to rule 34. In connection with the transportation of imported waste paper, which likewise is loaded by defendants at New York Harbor, defendants have in their tariffs made an exception to rule 34, under which they apply the carload rate to the actual weight of any consignment equal to or in excess of the minimum carload weight, regardless of the number or size of cars used. Complainant seeks the establishment of a similar exception on domestic waste paper. HELD, tariff rules assailed are, and for the future will be, unreasonable, and that there should be substituted for them a rule or rules providing in substance, that if baled paper in an amount equal to or exceeding the carload minimum weight applicable to a 36 ft. car is tendered to defendants for movement by and transfer from barges and loading by them into cars at their rail terminals, for transportation as a single shipment, freight charges will be collected on the basis of the carload rate and the actual weight, regardless of the size or number of cars used for the transportation. Reparation denied. Blank v. C. R. R. Co. of N. J., 132 I. C. C. 385.

(rr) Complainant alleged that the charges on one shipment of derricks, knocked down, forwarded on May 16, 1922 from Columbus, O., to Reno, Nev., and delivered on June 13, 1922 were illegal. Three cars were used. The bill of lading carried the notation "these three cars must travel together". The derricks were loaded by the shipper into available equipment at Columbus, no request having been made for cars of any

particular size or length. Charged class A rate of $2.70 based on weights of 42,600 pounds each for the first two cars, and 30,000 pounds for idler. Complainants contention, for the application of the less carload rate and actual weight, can not be sustained, because the derricks were loaded by the shipper and, although the cars were not fully loaded, were tendered as a carload shipment, thus clearly coming within the provisions of section 3 of rule 15. The second contention, for the rating and minimum applicable on secondhand contractors or graders outfits, can not be sustained in view of the specific rating on the articles comprising the shipment. HELD, the class A rate of $2.70 per 100 pounds at the actual weight loaded in the first car, and at weights of 42,600 and 30,000 pounds on the second and idler cars was applicable, and shipment undercharged, complaint dismissed. Nevada Dept. of Highways v. B. & O. R. R., 132 I. C. C. 727.

(ss) The carload minimum is a part of the rate. Therefore, where minima differ exhibits introduced for comparison should plainly indicate the fact. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 116.

(tt) Rates on Portland cement and plaster in mixed carloads from Hanover, Mont., to western and central portions of North Dakota and South Dakota, found not unreasonable but unduly prejudicial to extent that charges thereunder exceed those which would accrue under mixing rules similar to those contemporaneously maintained from Steelton, Minn., and Des Moines and Gilmore City, Iowa. Mixtures from Hanover move under rates subject to 50,000 pounds minimum, whereas from preferred points cement moves at c. l. rate and actual weight subject to 50,000 pounds minimum, and plaster at actual weight and c. l. rate subject to lowest minimum. No order entered but carriers expected to provide for mixing rules in revising rates. Three Forks Portland Cement Co. v. C., B. & Q., 129 I. C. C. 107, 118.

(uu) Charges collected on shipments of sheep from Chicago, Ill., to Wolverine, Mich., in double-deck cars, minimum weight 22,000 pounds, found unreasonable to extent they exceeded charges which would have accrued on basis of 18,000 pounds, which basis was found reasonable in 69 I. C. C. 125, for application on sheep in double-deck cars of size here involved. Reparation awarded. Calkins Augsbury & Mikan v. M. C., 129 I. C. C. 475.

(vv) Class D rates and switching charges collected on interstate shipments of smithing coal from San Diego to Los Angeles, Calif., originating at Douglas, W. Va., found not unreasonable or otherwise unlawful. Exceptions to governing tariff provided a minimum class scale applicable to the total of the combinations of separately established class rates or class and commodity rates applicable on continuous through movements. Complainant's contention that switching charge, under the tariff, should be considered a commodity rate, and that minimum class scale was applicable to combination of class rates plus switching, charge, not sustained. The switching charge was an incidental one for a special service performed upon completion of the line haul. Romann & Bush Pig Iron & Coke Co. v. A., T. & S. F., 129 I. C. C. 509.

(ww) Rules and regulations providing for the assessment of charges on mixed carloads of livestock at the rate and minimum weight for that kind of stock which on a straight c. l. basis would produce highest charge, with certain exceptions, between points in official classification territory, found not unreasonable as compared with the intrastate traffic rule effective in Ohio, and rates provided in rule 10 of the consolidated freight classification for mixed shipments of other commodities. These interstate rules were prescribed in 69 I. C. C. 125 and 81 I. C. C. 305, and are applicable throughout the United States. Complaint dismissed. Ohio Farm Bureau Federation v. A., C. & Y. Ry. Co. 129 I. C. C. 689.

§8. Two Cars for One Ordered.

See Bills of Lading §5; Cars and Car Supply §8; Classification §21; Follow Lot Shipments.

(a) Carrier for own convenience furnished two small cars in lieu of larger car ordered. Neither classification nor governing tariff provided for graduated minima for cars of different sizes. Upon complaint attacking assessment of charg-

es based on minimum weight for first car and actual weight at c. l. rate on second car, HELD: Record indicates that prescribed minimum could not reasonably have been loaded into cars furnished and therefore charges assessed in excess of applicable rate and actual weight of entire shipment subject to established minimum, were unreasonable. Folly Town Co. v. E. R. R., 120 I. C. C. 157.

§12. Fourth Section Violations.

See Long and Short Hauls.

(a) Rates found to violate the aggregate-of-intermediates provision of section 4 of the act, due to differences in the minima on the through rates and the combinations of locals. Hauber Cooperage Co. v. A., T. & S. F., 115 I. C. C. 533.

§13. Proposed Advances.

See Advanced Rates.

(a) Proposed increased minimum weight on common brick originating on Pennsylvania R. R. and moving from and to points in c. f. a. territory, by cancelling present tariff rule providing that minimum is the "marked capacity of car ordered, but not less than 60,000 pounds," and substituting in lieu thereof "marked capacity of car," found not justified. There is a real trade need for a minimum of 60,000 pounds, the capacity of equipment owned by the Pennsylvania, and under proposed schedules some shippers could be favored over others in being furnished cars of desired capacities. Moreover, in 68 I. C. C. 213, 222, commission prescribed a 60,000-pound minimum on articles in uniform brick list, including face, fire, and paving brick, marked capacity of car to govern if less than minimum. Minimum Weight on Brick, 118 I. C. C. 136.

(b) Respondents proposed to increase the minimum carload weight on wrought iron pipe and seamless iron and steel tubing from and to points in official classification territory, from 36,000 pounds to 46,000 pounds. They usually move in open top equipment. It is apparent that the increased minimum here proposed would not furnish any substantial incentive toward increased loading on the part of large or small manufacturers, jobbers or consumers. The former are, and have been, loading far in excess of not only the present minimum but also the proposed minimum. The latter are undoubtedly loading as heavily as the nature of their business permits, as it is manifestly their interest to do. It would operate to the advantage of the large shipper and to the disadvantage of the small shipper by diverting business from the latter to the former. It would constitute a marked exception to the minimum prevailing on practically all other articles of iron and steel classified fifth class and moving on class rates, an exception for which no adequate reason is disclosed upon this record. HELD, proposed schedules not justified. Minimum weight on pipe and tubing, 120 I. C. C. 657.

MIXED CARLOADS

See Classification §7, §16⅝; Evidence §34¼; Express Companies §16; Minimum §6.

MOTION PICTURE FILMS

(a) Owners of motion picture films, in shipping them from one state into another, to lessees thereof, for purpose of exhibition, are engaged in interstate commerce. Fox Film Corporation v. Turnbull, Governor of Connecticut, 7 Fed. (2d) 715. American Feature Film Co., Inc., v. Same, 7 Fed. (2d) 715.

(b) Laws Conn. 1925, c. 177, prohibiting delivery of motion picture films for purposes of exhibition in the state without having registered them and paid a tax of $10 for each film of 1,000 feet or less, with 50 cents additional for each extra 100 feet, whether regarded as a revenue measure or police regulation, held not a regulation of or unlawful restraint on interstate commerce, as regards films shipped in to lessees for exhibition; it operating alike on films brought into or produced in the state, being concerned only with public exhibition of moving pictures in the state, and only incidentally affecting interstate commerce. Fox Film Corporation v. Trumbull, Governor of Connecticut, 7 Fed. (2d) 715. American Feature Film Co., Inc. v. Same, 7 Fed. (2d) 715.

(c) Transportation company, engaged in transporting moving picture films for theaters and exchanges under special contracts, exclusively operating over fixed routes, but which did not advertise or solicit business, nor hold itself out to transport for public indiscriminately, HELD private carrier, and state Public Utilities Commission will be enjoined from applying Pub. Acts Mich., 1923, No. 209, and particularly section 3, relating to common carriers, thereto, as constitu-

ting a taking of private property for public use without just compensation, in violation of due process clause of Const. U. S. Amend. 14. Film Transport Co., v. Michigan Public Utilities Commission, 17 Fed (2d) 857.

MOTOR BUS

(a) The Connecticut law requiring interstate carriers of passengers by motor bus to pay an annual excise tax of one cent per mile for the total number of miles of highway in the state over which its vehicles operate, HELD not to impose an unlawful burden on interstate commerce, in violation of the commerce clause of the Constitution, but a valid exercise of the taxing power of the state to exact compensation for the use and wear of its highways and contribution to their upkeep. Interstate Busses Corporation v. Blodgett, State Tax Comn'r of Connecticut, 19 Fed. (2d) 256.

(b) A state has power to exercise a reasonable discretion in providing different methods of taxation for use of its highways by intrastate and interstate carriers of passengers by motor bus, provided the classification is reasonable, as where the intrastate carriers are subjected to a comprehensive system of regulation and licensing which is not applied to interstate operators. Interstate Busses Corporation v. Blodgett, State Tax Comn'r of Connecticut, 19 Fed. (2d.) 256.

MOTOR TRUCK COMPETITION

See Evidence §14 (6); Long and Short Hauls §8½.

MOTOR TRUCK SERVICE

(a) The growing use of the private automobile and autobus and truck, which has come with improvement of public highways, has injected a disturbing economic influence into the railroad situation as to both freight and passenger business. Although this influence has been relatively more adverse in the case of passenger traffic, the loss in passenger revenue growing out of this new competition has, to an extent at least, been offset by augmented freight revenues derived from carriage of materials for and products of automobile manufactories, and in carriage of fuel and lubricants used in operation of the automobile. Revenues in Western District, 113 I. C. C. 3, 23.

(b) Since duties of interstate motor stage line do not impose on it obligation to conduct intrastate business, order enjoining it from receiving intrastate passengers until granted permission therefor under Laws N. H. 1919, c. 86, HELD not an interference with interstate commerce, infringing commerce clause of the federal Constitution (article 1, § 8). Haselton Co., v. Interstate Stage Lines, (N. H., 1926) 133 Atl. 451.

(c) Motor Vehicle Act (Acts 1925, No. 70) in which provision is made for taxing motor busses of nonresidents making more than 30 regular trips during current year on highways in state, HELD not unconstitutional as being in violation of interstate commerce clause. State v. Caplan, (Vt., 1927) 135 Atl. 705, 708.

(d) A state may exact a reasonable excise tax for use of its highways by motor vehicles engaged in interstate commerce. State v. Caplan, (Vt. 1927) 135 Atl. 705, 708.

(e) If G. L. Mass. c. 159, § 45, 48a, 49, as amended by St. 1925, c. 280, relative to operation of motor vehicles for hire, directly interferes with or burdens interstate commerce, it cannot be sustained, regardless of purpose for which it was passed. Interstate Busses Corporation v. Holyoke St. Ry. Co., 47 Sup. Ct. 298.

MULTIPLE CAR SHIPMENTS

(a) Rates on timbers, poles, piling, and spars cut from various kinds of wood which, on account of length, require two or more cars for their transportation, found not unreasonable, discriminatory, or unduly prejudicial, the additional expense and hazard incident to movement of multiple shipments of long timbers, etc., warranting charging of higher rates on such shipments than on single carloads of lumber. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661.

(b) The transportation qualities of multiple carloads of timbers, poles, and piling, on the one hand, and single carloads of fir lumber or poles, on the other, are essentially dissimilar, the carriage of the former requiring of carriers spe-

cial, expensive, and burdensome services, including the furnishing of materials which are not required in the movement of the latter. Moreover, hazards of transportation are materially greater in case of the former, particularly in the mountainous regions, than in the case of the latter. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661, 669.

(c) Circumstances and requirements surrounding the preparation of equipment, clearances required, bolstering and staking of loads, weighing and switching, hazards of transportation, and readjustment of loads in transit, in transportation of multiple-car shipments of long poles and piling, described. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661, 669, 673.

NAVIGABLE WATERS

See Car Ferry; Merchant Marine Act.

NON AGENCY STATIONS

(a) It is not uncommon for carriers to provide that shipments destined to a nonagency station shall be billed to an agency station which may take a different rate. American Sand & Gravel Co. v. Director General, 109 I. C. C., 557, 559.

(b) Shipment of lumber from Logan, Ga., to Paintsville, Ky., found not misrouted. omplainant contended that, under an intermediate clause, a lower combination was in effect over an indirect route, but Logan was a nonagency station and even if lower rate was applicable, agent should not be charged with such knowledge. Conf. Rulings 91 and 214 (g) and 98 I. C. C. 451. Pine & Cypress Mfg. Co. v. W. & L., 129 I. C. C. 321.

NOTICE

See Demurrage §16; Evidence §39; Facilities and Privileges §11; Loss and Damage §11; Procedure Before Commission §3; Reconsignment §5½; Tariffs §3 (3); Transportation §6, §6½.

OPERATING CONTRACTS

(a) Contention that paragraphs (1) and (3) of section 3 of the act vitiate an operating agreement providing for joint use of terminal facilities in so far as it provides for an equal division of interest and taxes, not sustained. Those charges are distinctly capital charges, based upon terminal property itself, not upon its use, and are divided among lines in proportions of their equitable titles to or interests in property. For their respective uses of property the lines also severally assume proportionate maintenance and operating expenses. This is not undue prejudice, preference or discrimination within meaning of paragraph (1). Also as essentially capital charges, they have no direct or indirect relation to interchange of traffic between several lines within contemplation of paragraph (3). M.-K.-T.- v. K. C. T., 104 I. C. C. 203, 224.

(b) Carriers seeking, in effect, revision or reformation of an improvident operating agreement governing joint use and operation of terminal facilities, contend that for commission's jurisdiction to attach it need only give effect to section 15a of the act without waiting until a carrier's bankruptcy shall ensue, and find as a fact that operating agreement is so burdensome as to result in inefficient and uneconomical operation, to cause misapplication of funds created for an entirely different purpose, and generally to operate to impair carrier's ability to furnish adequate railway service. FOUND: Neither expressly nor by implication does section 15a embrace a direct or indirect revision or reformation of any such contract, nor is commission able to find requisite power or authority in any other provision of the act. M.-K. T. v- K. C. T., 104 I. C. C. 203, 223, 224.

ORDER NOTIFY SHIPMENTS

See Bills of Lading V; Demurrage §7.

OVERCHARGES

See Claims I, V; Express Companies §27; Freight Charges; Reparation §20½; Tariffs §14; Through Routes and Joint Rates §22.

(a) Upon arrival of shipment at originally-billed destination it was accepted by consignee who unloaded and paid freight and demurrage charges. Becoming dissatisfied with goods they were reloaded and forwarded to a new destination, carrier advancing such consignee demurrage, unloading and reloading charges. These were collected from new consignee who deducted them in settlement with consignor. FOUND: Latter movement being separate and distinct under a new bill of lading, and governing tariff providing that no charges of any

description be advanced, the advancement made to original consignee was illegal. Moreover, in Conf. Ruling 249, commission ruled that outbound charges may not be refunded by a carrier and charged back against consignor. Refund of overcharges directed. Heineman Lbr. Co. v. C., St. P. M. & O., 107 I. C. C. 62.

(b) Shipment of piles moving in two cars from Hadley, Ala., to West Brighton, N. Y., found overcharged. Charges were assessed on basis of an erroneous rate and billed weight, whereas they should have been assessed on basis of applicable rate and actual weight as determined by track scale, the shipment having been weighed on such scale en route. Reparation awarded. Bowers & Co. v. Director General, 107 I. C. C. 305.

(c) Shipments of brick moving from Springfield, Ill., to St. Petersburg, Fla., found overcharged inasmuch as lower combination should have been applied by application of combination rule which provided a method of constructing through rates made on combination. Reparation awarded. Boston Brick Co. v. I. T., 107 I. C. C. 507.

(d) It is not necessary, in complaint alleging overcharges, to name all carriers participating in transportation, since collection of an overcharge is a tort for which they are all jointly and severall liable. Boston Brick Co. v. I. T., 107 I. C. C. 507.

(e) Overcharge claim barred prior to June 7, 1924, found not to have been revised by amendment to section 16 (3) of the act, passed on that date, which extended limitation period for filing such claims with commission. See conference ruling of July 28, 1925. Saxony Mills v. M. P., 107 I. C. C. 640.

(f) Shipments of sulphuric acid, in tank cars, moving over an interstate route from Grasselli, Ind., to Vincennes, Ind., found overcharged, inasmuch as lower rate to Lawrenceville, Ind., applied to Vincennes under provisions of rule 77 of tariff Circular 18-A carried in applicable tariff at time of movement. Reparation awarded. Vincennes Refining Co. v. C. & E. I., 109 I. C. C. 25.

(g) Shipments of sulphuric acid, in tank cars, moving over an interstate route from Grasselli, Ind., to Vincennes, Ind., found overcharged. Conflicting rates were named in separate tariffs, and under uniform findings of commission the rate first established remained in effect and was lawful rate until formally canceled. Reparation awarded. Vincennes Refining Co. v. C. & E. I., 109 I. C. C. 25.

(h) Fourth-class rating and rates in official classification territory on automobile bow sockets assessed under tariff item on "Carriage or wagon iron: * * * Bow sockets," found illegal. Fifth-class rating carried in same tariff on "Automobile parts, n. o. i. b. n.," found applicable. Automobile bow sockets are not carriage or wagon irons. They are designed and manufactured solely for automobiles and are not interchangeable with the analogous parts of horse-drawn vehicles. Tariff description of latter being specific, analogous-article rule could not be applied, hence bow sockets must be considered to have been embraced in item of automobile parts n. o. i. b. n. Refund of overcharges directed. Chevrolet Motor Co. v. B. & O., 109 I. C. C. 185, 186, 187.

(i) Claims for refund of overcharges, which were barred prior to enactment of amendment of June 7, 1924, to section 16 of the act, under which the time for filing such claims was extended to three years, found to fall within provisions of the commission's conference ruling of July 28, 1925, wherein the decision of the Supreme Court in 268 U. S. 633 was construed as prohibiting awards of reparation on claims barred at or prior to the enactment of the new statute of limitations which had the effect of reviving barred claims. American Splint Corp. v. C. P. Ry., 109 I. C. C. 170; Chevrolet Motor Co. v. B. & O., 109 I. C. C. 184, 185; Calumet Baking Powder Co. v. A. & N. R. R., 109 I. C. C. 249.

(j) Intrastate shipments of petroleum made during Federal control moved partly over short lines not under Federal control. No joint rates being in effect, combinations were assessed each factor of which was increased under General Order No. 28 of the director general. Tariffs publishing factors applicable over federally controlled lines contained the combination rule which provided a specific method for constructing through rates made on combination, but no similar rule, or reference thereto, was carried in tariffs of short lines. HELD: The combination rule being unrestricted in its application, the applicable rates were those constructed in conformity therewith. Shipments found overcharged and reparation awarded. Continental Oil Co. v. Director General, 109 I. C. C. 289.

(k) Shipments moved in part over a line not under Federal control. No joint rates being in effect, combinations were assessed each factor of which had been increased under General Order No. 28 of the director general. Tariffs of federally controlled lines carried combination rule which provided a specific method for constructing through rates made on combination, the tariff of the nonfederally controlled line not carrying a similar rule or concurring in or making reference to tariffs in which it was published. HELD: That applicable rates were those constructed in conformity with combination rule, except during period when such rule was specifically restricted so as to apply in connection with rates between points on railroads "under Federal control" during which period the full combinations were applicable. Reparation awarded. Calif. Cotton & Factorage Co. v. Director General, 109 I. C. C. 293.

(l) Rate charged under an exception to classification on prepared roofing moving over the Chicago & Eastern Illinois from Chicago to Terre Haute, Ind., found illegal. Legal rate found to be a specific joint commodity rate published in a tariff to which the C. & E. I. was a party from Chicago to Midland City, Ill., applicable over its line to Terre Haute and the Pennsylvania beyond. This tariff carried the intermediate rule which provided that rates named therein would apply from or to directly intermediate points not indexed, or if indexed but with no rate shown, such tariff not naming a specific rate to Terre Haute. Refund of overcharges directed. Elaborated Ready Roofing Co. v. C. & E. I., 109 I. C. C. 401.

(m) Shipment of coal found overcharged, due to deduction by carrier of 41,000 pounds to cover weight of car, whereas actual weight as shown by carrier's records was 45,000 pounds. Reparation awarded. Monon Lbr. Co. v. Director General, 109 I. C. C. 429.

(n) Shipments moved under combination rates each factor of which was increased under General Order No. 28 of director general. Tariff governing second factor carried the combination rule which provided for application of a single increase to through rates made on combination. First factor contained a similar rule which was restricted in its application. HELD: Following 81 I. C. C. 193, and other cited cases, effect of restricted tariff was tantamount to absence of a rule and rates constructed by application of but a single increase to through rate as contemplated by rule contained in tariff governing second factor found applicable. Reparation awarded for overcharges. White Star Refining Co. v. A., T. & S. F., 109 I. C. C. 577.

(o) Claims for refund of overcharges, which were barred prior to enactment of amendment of June 7, 1924, to section 16 of the act, under which the time for filing such claims was extended to three years, found to fall within provisions of the commission's conference ruling of July 28, 1925, wherein the decision of the Supreme Court in 268 U. S. 633 was construed as prohibiting awards of reparation on claims barred at or prior to the enactment of a new statute of limitations which had the effect of reviving barred claims. American Splint Corp. v. C. P. Ry., 109 I. C. C. 170; Chevrolet Motor Co. v. B. & O., 109 I. C. C., 184, 185; Calumet Baking Powder Co., v. A. & N. R. R. R., 109 I. C. C. 249; Moore Lawless Grain Co. v. M. P. R. R., 109 I. C. C., 588.

(p) Out-of-route charges collected on grain shipped from Ossian and Helmer, Ind., to Jonesville, Mich., there milled in transit and reshipped to other Michigan points, found illegal. Neither tariff publishing the joint through rates with provisions for milling in transit nor transit tariff carried any restrictions as to routing, and term "out-of-route" as carried in transit tariff is not defined. Rates between any given points, where no restrictions are made as to routing, apply over all routes of carriers parties to the tariff naming rates, where such routes are circuitous or not, if there be no back haul. Likewise transit arrangements applicable in connection with such rates, where no special restriction as to transit is contained in the tariff, are co-extensive with routes over which the rates apply, provided routes are not employed which necessitate a back haul. Refund of overcharges directed. Jonesville Milling Co. v. N. Y. C., 109 I. C. C. 601.

(q) Shipment of clean rice from Galveston, Tex., to Bluefield, W. Va., found overcharged to extent that rate assessed exceeded a lower combination via Memphis, Tenn. While shipments did not move through Memphis, lower combination via that point was applicable over routes of movement under the tariffs. Refund of overcharges directed. Seaboard Rice Milling Co. v. A. G. S., 109 I. C. C. 718.

(r) Complainant attacked commodity rate charged on two cars of baled cotton shipped March 29, 1922, from Brownsville, Tenn., to Delano, Tenn., as unreasonable and unlawful in violation of sections 1 and 6. Shipments moved L. & N., to Memphis, Tenn., thence N. C. & St. L. to Cartersville, Ga., and L. & N. beyond, charged 95c. Complainant contends rate should have been 86c composed of 44c to Memphis and 62c beyond, reduced 20c under Kelley U. S. 1. HELD: Applicable rate was 86c, reparation awarded. Gunther & Co. v. L. & N. R. R., 112 I. C. C. 387.

(s) Full combination rates charged on shipment of lumber from Pachuta, Miss., to Homestead, Meadville, Titusville, and Mercer, Pa., found illegally assessed. Applicable rate found to be a through rate constructed by use of combination rule which provided a specific method for constructing through rates made on combination, each factor of the combination being subject thereto. Reparation awarded for overcharges. Moore-Marshall Lbr. Co. v. N. O. & N. E., 112 I. C. C. 33.

(t) Claim for refund of overcharges, which was barred prior to enactment of amendment of June 7, 1924, to section 16 of the act under which the time for filing such claims was extended to three years, found to fall within provisions of the commission's conference ruling of July 28, 1925, wherein decision of the Supreme Court in 268 U. S. 633 was construed as prohibiting awards of reparation on claims barred at or prior to the enactment of a new statute of limitations which had the effect of reviving barred claims. Memphis Freight Bureau v. C. & O. Ry., 112 I. C. C. 55.

(u) Claim was first filed with commission informally in the form of an overcharge. Formal complaint, seasonably filed after complainant had been notified that claim was not susceptible of informal adjustment, contained additional allegations, predicated on ground of misrouting. HELD: The basis of an informal claim can not be broadened or otherwise varied by a formal complaint subsequently filed unless such formal complaint itself be filed within statutory period. See 49 I. C. C. 649. Harman & Hulsey v. Director General, 112 I. C. C. 275.

(v) Scrap steel rails from Detroit to Kenosha, Wis., purchased "f. o. b. Chicago" moved under through bills of lading at joint rates. Upon complaint alleging overcharges due to failure of director general to refund charges down to basis of lowest published rate from Chicago to Kenosha, upon theory that movements from Detroit to f. o. b. point was separate and distinct from those beyond, HELD: Complainant would have been entitled to lowest rate from Chicago to Kenosha had shipments originated at Chicago or had billing indicated that rails were "company material" entitled to free transportation to that point. However, shipments originated at Detroit, moved on through bills of lading correctly describing commodity without indicating that it was company material. Moreover, through movements were intended by consignor and nothing indicates that movement to Chicago was to be a nonrevenue haul or that transportation should begin there. Claim arises out of terms of contract of sale over which commission has no jurisdiction. Joint rates assessed found applicable. Briggs & Turivas v. Director General, 112 I. C. C. 313.

(w) Complainant attacked commodity rates charged on cement, carloads, from Security, Md., to destinations in Maryland served by the W. B. & A. Electric Line, as unlawful and in excess of rates specified in tariffs during the period from Jan. 1, 1922, to Jan. 4, 1923; and unjust and unreasonable between Jan. 5, 1923, and May 15, 1925. Security is on the main line of the W. M., just east of Hagerstown. W. M., is not named as defendant. Within recent years the B. & O., has built into Security and all shipments here considered moved over the latter carrier through the District of Columbia to Camp Meade Jct., and thence Electric line. It is to be noted that during the period from Jan. 1, 1922, to Jan. 4, 1923, and to March 30, 1923, inclusive, the Electric did not concur in, refer to, or otherwise make effective the combination rule. The B. & O., did refer to it. Considering the facts that the Electric is what is known as a short line, essentially a suburban line, and that rates from Security to its stations compare favorably with rates from complainant's immediate competitors, Lehigh, York, and Union Bridge. HELD, shipments between Jan. 1. 1922, to Jan. 4, 1923, and to March 29, 1923, overcharged, balance rates attacked not unreasonable, reparation awarded. Se-

curity Cement & Lime Co. v. B. & O. R. R., 113 I. C. C. 579.

(x) Complainant attacked charges collected on nine cars of anthracite coal between October 1, 1920, and Jan. 13, 1921, from Crested Butte, Colo., to McDonald, Oberlin and St. Francis, Kas., and Curtis and Republican, Neb., as illegal. Shipments moved D. & R. G. W. to Denver, Burlington beyond. $8.40 rate was based on proportional commodity rate of $2.65 to Denver and local commodity rate of $3.15 beyond, in effect prior to June 25, 1918, plus 50c authorized under G. O. 28 and $2.10 which reflects an increase of 33⅓% under the general increases of August 26, 1920. The combination rule fixed a definite basis or formula for constructing combination rates. HELD, rate applicable $6.30 per ton. Reparation awarded. Foster Lumber Co. v. C. B. & Q. R. R., 113 I. C. C. 734.

(y) Complainant attacked rate of $4.17 charged on four cars of cottonseed meal shipped from Greenwood to Angola, La., during Jan. and Feb., 1925, as illegal and unreasonable. Shipments moved from Greenwood over the Y. & M. V., through Jackson and Harriston, Miss., to Baton Rouge, La., thence L. R. & N., charged $3.15 to Baton Rouge and $1.02 beyond. A joint rate of $3.60 per ton is in effect from Memphis, Tenn., to Angola, applicable over Y. & M. V., to Baton Rouge and L. R. & N. beyond. Nothing in the tariff precludes the routing of a shipment from Memphis to Angola over the Y. & M. V. through these points and over this route the distance 443 miles, is only 30 miles longer than the shortest route of the Y. & M. V. through Vicksburg, Miss., and Baton Rouge. HELD, shipments overcharged, reparation awarded to basis of $3.60, Planters Oil Mill v. Y. & M. V. Ry., 115 I. C. C. 21.

(z) Complainant attacked rates charged since Oct. 9, 1920, on automobiles, carloads, from Detroit, Flint, and North Flint, Mich., and on plumbers supplies, carloads, from Noblesville, Ind., to Birmingham, Ala., as unreasonable and inapplicable. There were no joint through rates on automobiles prior to Jan. 15, 1921, from Detroit and Flint, and from North Flint prior to Aug. 20, 1922. On the dates shown joint through rates on automobiles were established equal to or slightly less than the Jeffersonville, Ind., combination. There were and are no joint through rates on plumbers' supplies. Prior to the dates above shown, as to automobiles and during the entire period as to plumbers' supplies, rates were assessed on basis of the two factor Ohio river combination. Complainant contends that in the absence of a joint through rate the three factor combination basing on Louisville, and Water Works, Ky., when lower than the above mentioned combination, is the applicable rate. HELD, two factor combinations inapplicable, legal rate three factor combinations as shown, refund of overcharges to be made, applicable rates not unreasonable, complaint dismissed. Birmingham Traffic Bureau v. Director General, 115 I. C. C. 33.

(aa) Complainant attacked rate charged on a car of iron roofing shipped Oct. 29, 1923, from Delphos, O., to Springfield, Tenn., as unreasonable and in excess of applicable rates. Shipment moved over Pennsylvania to Cincinnati and L. & N. via Bowling Green to Amqui, Tenn., which is 10 miles north of Nashville. Charged 62.5c, 45c to Amqui and 17.5c beyond. A 45c rate was specifically named from Delphos to Bowling Green and Nashville. Defendant operates a line from Memphis Junction, Ky., 5 miles south of Bowling Green to Memphis which intersects its Henderson division at Guthrie, Ky. Springfield is intermediate on the Henderson division between Guthrie and Amqui. The 45c rate was unrestricted as to routing. HELD, 45c rate applicable, reparation awarded. Cincinnati Sheet Metal & Roofing Co. v. Pennylvania R. R., 115 I. C. C. 133.

(bb) Complainant attacked combination rate of $4.33 charged on lime, carload, from Knoxville, Tenn., to Braithwaite, La., during November and Dec., 1924, and Jan., 1925, as inapplicable. They moved Southern to New Orleans, La., and La. Sou. beyond. Rate charged $2.93 per ton to New Orleans and $1.40 per ton beyond. The $2.93 rate was subject to the combination rule and likewise the $1.40 rate. HELD, rate charged inapplicable to extent it exceeded 40c per ton less, reparation awarded. Traffic Bureau of Knoxville v. Southern Ry., 115 I. C. C. 187.

(cc) Complainant attacked charges

collected on various shipments of bars of steel or steel bars, carloads, made June 4, 1923, and thereafter, from Alabama City, Bessemer, East Birmingham and Fairfield, Ala., to New Orleans, La., as inapplicable. The shipments consisted of steel bars, round, square, and bent, used for concrete reinforcements. HELD, rates on sheet bars or bars of steel applicable, overcharges to be refunded, complaint dismissed. Olsen v. A. G. S. R. R., 115 I. C. C. 195.

(dd) Complainant attacked commodity rates charged on two cars of molding sand, shipped from Rockport and Sandale, Ind., to Nashville, Tenn., on Feb. 6, 1923, and Aug. 13, 1924, as inapplicable. One of the shipments moved from Rockport over E. & O. V., to Evansville, Ind., and L. & N. beyond. Other from Sandale over same route to Evansville, thence Southern, C. N. O. & T. P. and T. C. beyond. Charged 48c to Evansville and $1.58 beyond. Tariffs from Evansville to Nashville made reference to the combination rule. HELD, rates charged inapplicable, rate applicable from Rockport $1.76 and from Sandale $1.73, reparation awarded. Allen Mfg. Co. v. L. & N. Ry., 115 I. C. C. 739.

(ee) While the complaint does not in specific terms allege a violation of section 6, it is therein stated that the rates were unreasonable and otherwise unlawful, and that complainant paid and bore illegal excess charges over and above those which were just, proper and reasonable. HELD, allegations sufficient to cover overcharges. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 172.

(ff) Complainant attacked combination rate of 27c, composed of 16c to Dawkins and 11c beyond, charged on six cars of cement shipped during June and Sept., 1923, and Dec., 1924, from Fordwick, Va., to Ivyton, Royalton and West Royalton, Ky., two reshipped to Painesville, Ky., as unreasonable and inapplicable. Shipments moved C. & O. to Dawkins, Ky., and B. S. & K. R. beyond. Two shipments reshipped to Paintsville moved B. S. & K. R. from Royalton to Dawkins and C. & O. beyond. Tariffs of the C. & O. naming the rates to Dawkins and from Dawkins to Paintsville made reference to the combination rule. HELD, rates charged inapplicable, applicable rate to Ivyton, Royalton and West Royalton 24.5c, Royalton to Paintsville, $2.96 per ton, reparation awarded. Lehigh Portland Cement Co. v. B. S. & K. R. Ry., 118 I. C. C. 507.

(gg) Refunds to which shippers are entitled upon compliance with provisions of bunching rules are in no sense overcharges. Manassa Timber Co. v. L. & N., 115 I. C. C. 421, 423.

(hh) Shipments of crude oil blended with a small quantity of casing-head gasoline and assessed gasoline rates found overcharged. Such shipments found to consist of crude oil, it being shown that the material here considered as shipped, when subjected to usual tests, showed characteristics well within range of those exhibited by crude oils to which no casing-head gasoline had been added. Moreover, while oil originally contained a substantial percentage of casing-head gasoline, in view of highly volatile character of the commodity and opportunities that were afforded for its evaporation between time of its production and time it was loaded into the cars, the oil as tendered for shipment did not contain a sufficient quantity of casing-head gasoline to render it different in any essential respect from crude oil as covered by tariffs. Reparation awarded. National Refining Co. v. L. & N., 118 I. C. C. 177.

(ii) Complainant attacked combination rate charged on a car of building brick shipped Aug. 10, 1923 from Shawnee, O., to St. Petersburg, Fla., as inapplicable. Shipment moved N. Y. C. to Bannon, O., N. & W. to St. Paul, Va., C., C. & O. to Yemassee, S. C., and A. C. L. beyond, 1,360 miles, charged $1.90 per ton to Cincinnati, 21.5c to Jacksonville and 9.5c beyond, under authority of rule 5b. The 9.5c component was subject to the rule for constructing combination rates. HELD, applicable rate was 35.5c, shipment overcharged, reparation awarded. Dann Gerow Co. v. A. C. L. R. R., 120 I. C. C. 123.

(jj) Complainant attacked combination rate on one car of sugar shipped June 21, 1920 from Oklahoma City, Okla., to Indianapolis, Ind., as unreasonable and illegal. Shipment moved Rock Island to St. Louis, Mo., Big Four beyond, charged fifth class of 79c to St. Louis and 22.5c beyond. Contemporaneously there was in effect a joint commodity rate on sugar of 55c from Sugarland, Tex., to Indianapolis. Oklahoma City is intermediate. HELD, applicable rate was 55c, reparation awarded. Williams, Halsell Frazier Co. v. C. R. I. & P. Ry., 120 I. C. C. 125.

(kk) Complainant attacked combination rate charged on six cars of common building brick from Shawnee, O., to St. Petersburg, Fla., as illegal. Rate charged 9.5c to Cincinnati, 21.5c to Jacksonville and 9.5c beyond. The 9.5c rate was subject to the combination rule. HELD, applicable rate was 35.5c, reparation awarded. Dann Gerow Co. v. A. C. L. R. R., 120 I. C. C. 163.

(ll) Complainant attacked combination rate charged on 44 cars of logs during July and August 1923 from spur S 30 Mich., to Peshtigo, Wis., as unreasonable and illegal. Shipments were routed by Mineral Range and C., M. & St. P. Shipments appear to have moved by M. R. to Riddle Jct., Mich., thence C., M. & St. P., and C. & N. W. Charged 16.2 cents, but refund made later to 14 cents. The latter was a specific rate applicable to pulpwood. Refund is sought to basis of combination of 11.3 cents. Complainant submits an affidavit that the shipments were originally cut as saw logs, but that on account of market conditions they were sold to a paper company at Peshtigo which converted them into pulp. No other conclusion is possible than that the shipment consisted of saw logs and were subject to the saw log rate. Complaint only attacks the factor to Riddle Jct. Applicable rate on saw logs was 13 cents, composed of 3.5 cents to Riddle Jct., 7 cents to Marinette, Wis., and 2.5 cents to destination, shipments overcharged 1 cent. HELD, rates charged inapplicable, applicable rate was 13 cents not unreasonable, defendant to refund outstanding overcharges, complaint dismissed. Menasha Woodenware Co. v. D. S. S. & A. Ry., 120 I. C. C. 415.

(mm) Complainant attacked combination rate charged on one car of textile machinery shipped Sept. 18, 1924 from Tallassee, Ala., to Natchez, Miss., as unreasonable. Shipment moved B. & S., to Milstead, Ala., W. of A. to Selma, Ala., Southern to Meridian, Miss., A. M. V., to Jackson, Miss., and T. & M. V., beyond, 382 miles, applicable rate sixth class 16 cents to Milstead and 59.5 cents beyond. HELD, sixth class rate applicable not unreasonable, overcharge to be refunded complaint dismissed. Cotton Mills Products Co. v. A. & V. Ry., 120 I. C. C. 473.

(nn) Complainant alleged overcharges on numerous cars of scrap iron, shoveling steel, bushings and scrap borings, shipped during federal control, as unreasonable and in violation of section four. HELD, shipments overcharged, reparation awarded. Hyman Michaels Co. v. Director General, 120 I. C. C. 617.

(oo) Complainant attacked combination rate charged on a car of uncompressed cotton linters, shipped from Cooper, Tex., to Pittsburgh, Pa., and reconsigned to Newburgh, N. Y., as unlawful in violation of section six. Shipment was forwarded from Cooper on March 15, 1924 over T. M. and St. L. S. W., to St. Louis, Mo., thence over B. & O., to Pittsburgh. Upon arrival the shipment was not delivered, but was held on the B. & O. tracks at Allegheny Jct. (Pittsburgh) until April 5, 1924 when it was reconsigned to Newburgh, B. & O. and Erie, charged $1.505 to Pittsburgh and 39.5 cents beyond. Complainant contends a combination rate of $1.785 made up of 95.5 cents to Marion, Ind., 43.5 cents to Allegheny and 39.5 cents beyond to Newburgh should have been assessed. As there was no joint rate in effect the three factor combination was applicable. HELD, applicable rate $1.785, reparation awarded. Fraser Jr. v. B. & O. R. R., 120 I. C. C. 675.

(pp) Complainant attacked combination rate charged on two cars of broom handles shipped in August and Sept., 1922 from Pellston, Mich., to Wichita, Kans., as unreasonable to extent it exceeded 59 cents. Shipments moved Pennsylvania, E. J. & E., and Santa Fe. Rate sought is proportional rate of 21.5 cents on lumber to Chicago plus 40.5 cents on lumber from Chicago to Wichita, subject to combination rule or 57.5 cents plus arbitrary of 1.5 cents. Present rate is 76.5 cents made fifth class 34.5 cents to Chicago plus commodity of 42 cents beyond. HELD, rate attacked unreasonable to extent it exceeded the rates on lumber by more than 1.5 cents, reparation awarded. Wichita Chamber of Commerce v. A., T. & S. F. Ry., 123 I. C. C. 520.

(qq) Complainant attacked combination rate charged on one car of piling shipped on June 30, 1924 from Minong, Wis., to Dakota, Minn., as inapplicable and unreasonable. Minong is on the Omaha 120 miles north of St. Paul, Minn., Dakota is on the Milwaukee 120.7 miles southeast of St. Paul, shipments moving Omaha to Minnesota Transfer and Milwaukee beyond, charged combination of 11.5 cents to St. Paul and 11 cents beyond. A 11 cent rate was published in a tariff to which the defendants

are named as participating carriers. HELD, rate assessed inapplicable to extent it exceeded 11 cents, overcharge to be refunded, complaint dismissed. Finch Bros. v. C., St. P., M. & O. Ry., 123 I. C. C. 541.

(rr) Complaint attacked through commodity rate charged on 3 cars of fire brick shipped between Feb. 27 and July 30, 1925 from Mineral City, O., to Miami and Tampa, Fla., as unreasonable and inapplicable. Two of the shipments moved to Miami over B. & O., Southern, Georgia Southern & Florida and F. E. C., charged 43.5 cents and 44.5 cents, respectively. The other shipment moved to Tampa over B. & O., L. & N., and A. C. L., charged 39.5 cents. The allegation of unreasonableness was not supported by any evidence and will not be considered further. No joint rates were in effect. None of the factors were subject to the combination rule. HELD, rates applicable were 43.5 cents to Miami and 39.5 cents to Tampa, overcharge to be refunded, complaint dismissed. Federal Clay Products Co. v. A. C. L. R. R., 123 I. C. C. 557.

(ss) Complaint alleging overcharges was filed January 6, 1926. Citing 107 I C. C. 136, carriers contended that limitation provision of the statute barred from consideration shipments moving more than two years prior thereto. HELD: As oldest shipment under consideration was delivered in April, 1923, and amendment of June 7, 1924, extended period for filing overcharge claims to three years, none of shipments are barred. Curtis Leather Co. v. P. R. R., 123 I. C. C. 1, 3.

(tt) An overcharge, if proved, is a tort for which all participating carriers are jointly and severally liable. See 107 I. C. C. 507. Kohlman Bros. & Sugarman v. L. & N., 123 I. C. C. 56, 57.

(uu) Where action against carriers to recover overcharges had been barred by limitation under Interstate Commerce Act. Feb. 4, 1887, as amended by Transportation Act Feb. 28, 1920 (U. S. Comp. St. § 1007¼ et seq.) cause of action was not revived by Act. Cong. June 7, 1924, § 16. par. 3, subsec. (h), being U. S. Comp. St. § 8584, removing bar in case suit should be brought within six months after enactment, as construction of statute to revive liability after its destruction by limitation would deprive carriers of their property without due process, in violation of Const. U. S. Amend. 5. Peninsula Produce Ex. v. N. Y. P. & N. R. Co., (Md., 1927) 137 Atl. 350.

(vv) Interstate Commerce Act. U. S. Feb. 4, 1887, § 22, par. 1 (U. S. Comp. St. § 8595), providing nothing in act shall abridge existing remedies and that provisions in addition to such remedies did not operate to permit revival of outlawed action against carriers for overcharges under provisions of Act Cong. June 7, 1924, § 16, par. 3, subsec. (h) being U. S. Comp. St. §8584 in view of Const. U. S. Amend. 14, though action was brought in state court. Peninsula Produce Ex. v. N. Y., P. & N. R. Co., (Md., 1927) 137 Atl. 350.

(ww) Shipper may recover overcharge from carrier with whom he made contract for carriage, and subsequent enforcing of ultimate liability with connecting carriers are matters within ruling of Interstate Commerce Commission for enforcing rights of carriers between themselves. W. L. Shepherd Lumber Co. v. Atlantic Coast Line R. Co., (Ala., 1927) 112 So. 323.

(xx) Complainant attacked combination rates charged on 28 cars of potatoes shipped from Idaho, Colorado, Nebraska and Utah to Nashville, Tenn., between Aug., 25, 1921 and Dec. 11, 1924 as unreasonable and in violation of section four in that they exceeded the rates to New Orleans. Charged rates to and beyond East St. Louis, Ill., or Evansville, Ind. Defendants state that rates to New Orleans were not applicable over routes passing through Nashville, except on two shipments. HELD, rates attacked not unreasonable or otherwise unlawful, overcharges and undercharges to be adjusted, complaint dismissed. Boyle Commission Co. v. C. B. & Q. R. R., 128 I. C. C. 51.

(yy) Under Federal Control Act, § 10 and Transportation Act, § 206 (a), (c), a shipper, charged excessive freight rates during federal control of railroads, was entitled to recover so-called interest on the reparation award ordered by the Interstate Commerce Commission to be paid pursuant to Interstate Commerce Act, § 16 despite Judicial Code, § 177, but was not entitled to recover the costs and attorney's fees ordered by the Commission to be paid. Wilson & Co., of Okla. v. Davis, Director General of Railroads, 8 Fed. (2d.) 484.

PANAMA CANAL ACT

See Evidence §42; Facilities and Privileges §16; Water Carriers; Water Competition.

(a) Application of Northern Pacific and Minneapolis, St. Paul & Sault Ste. Marie railways, under section 5 of the act, for authority to establish a joint passenger-train service between Minneapolis and St. Paul, Minn., and Duluth, Minn., and Superior, Wis., and to divide earnings therefrom, approved. Proposed arrangement found to be in interest of economy of operation, not to unduly restrain competition, and to be upon just and reasonable terms and conditions. Joint Passenger Train Service, 107 I. C. C. 493.

(b) Under Interstate Commerce Act, § 6, subd. 13, as amended by Panama Canal Act 1912, § 11, and Transportation Act 1920, §§ 412, 413 (Comp. St. § 8569), giving commission authority to establish physical connection between lines of rail carrier and docks of water carrier, and providing that it "may * * * determine what sum shall be paid to or by either carrier," Commission, in proceeding by the state of New York, owning and maintaining Erie Barge Canal, though not a carrier, HELD to have power to compel railroad already having a physical connection with barge terminal to provide transportation service, between such terminal and shippers along its tracks or lines of other railroads, with which it could interchange traffic; the quoted language not being a requirement that two carriers be before Commission. United States v. New York Cent. R. Co., 47 Sup. Ct. 130.

(c) Under Interstate Commerce Act, § 6, subd. 13, as amended by Panama Canal Act 1912, § 11, and Transportation Act, 1920, §§ 412, 413 (Comp. St. § 8569), order of Interstate Commerce Commission, requiring railroad to furnish transportation service between public terminal of Erie Barge Canal and shippers in its own and connecting lines. HELD not invalid, because transportation so required would include intrastate as well as interstate traffic, in view of definition of transportation contained in Interstate Commerce Act, § 1, subd. 3, as amended by Transportation Act 1920, § 400 (Comp. St. § 8563). United States v. New York Cent. R. Co., 47 Sup. Ct. 130.

I. CONTROL AND REGULATION.

See Control and Regulation.

§½. In General.

(a) Even though purely intrastate carriage of passengers by an interstate carrier may be within the commerce clause of the federal Constitution (article, 1, § 8), such clause is not self-executing and in absence of federal legislation, the state may regulate intrastate business of such carrier. Haselton Co., v. Interstate Stage Lines, (N. H., 1926) 133 Atl. 451.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission..

(a) Upon contention of defendant that since summer excursion fares to Boulder, Colo., which complainant claims were unduly prejudicial and preferential, expired, any decision would be of a moot question. HELD: Complainant's prayer is for future relief and the jurisdiction of commission is ample to provide such relief. See also 52 I. C. C. 255. Boulder Chamber of Commerce v. A., T. &. S. F., 107 I. C. C. 49, 52.

II. REASONABLENESS AND DISCRIMINATION.

§2. In General.

See Discrimination; Reasonableness of Rates.

(a) Summer excursion fares from Chicago, Omaha, St. Louis, and Kansas City to Boulder, Colo., found unduly and unreasonably prejudicial to Boulder to extent they exceeded and exceed fares contemporaneously in effect to Colorado Springs and Pueblo. Boulder Chamber of Commerce v. A., T. & S. F., 107 I. C. C. 49.

(b) A public duty rests upon managements of carriers, individually and collectively, carefully to survey the passenger situation and to exert every legitimate effort to place this branch of their operations on a more compensatory basis. Revenues in Western District, 113 I. C. C. 3, 23.

(c) The growing use of the private automobile and autobus and truck, which has come with improvement of public highways, has injected a disturbing economic influence into the railroad situation both as to freight and passenger business. Although this influence has been relatively more adverse in the case of passenger traffic, the loss in passenger revenue growing out of this new competition has, to an extent at least, been offset by augmented freight revenues derived from carriage of materials for and products of automobile manufactories, and in carriage of fuel and lubricants used in operation of the automobile. Revenues in Western District, 113 I. C. C. 3, 23.

(d) The commission does not subscribe to proposition that where freight rates are producing, on the property devoted to freight service, the rate of return which has been fixed as fair, the commission can as a matter of law authorize no increases in such rates to correct deficiencies in aggregate earnings growing out of inability of passenger business to meet its full share of revenue burden. Freight and passenger services are both essential and both may be subjected to reasonable rates and charges to produce the fair aggregate return authorized by law even though thereby a higher rate of return may be exacted from the one than from the other. Revenues in Western District, 113 I. C. C. 3, 22, 23.

§3a. Caretakers.

See Caretakers.

(a) Collection of passenger fares for transportation of attendants accompanying shipments of live poultry from points in various States to Hoboken, N. J., found unreasonable. For many years it has been general practice of carriers to furnish transportation to attendants accompanying shipments of live poultry without charge, because carrier is thereby relieved of caring for poultry. Here the charges were apparently published in error and remained in effect for a short time only. Werner v. Director General, 107 I. C. C. 363.

§6. Mileage, Excursion Rates and Scrip.

See Distance Rates.

(a) Summer excursion fares from Chicago, Omaha, St. Louis and Kansas City to Boulder, Colo., found unduly and unreasonably prejudicial to Boulder to extent they exceeded and exceed fares contemporaneously in effect to Colorado Springs and Pueblo. Boulder Chamber of Commerce v. A., T. & S. F., 107 I. C. C. 49.

(b) Upon contention of defendant that since summer excursion fares to Boulder, Colo., which complainant claims were unduly prejudicial and preferential, expired, any decision would be of a moot question. HELD: Complainant's prayer is for future relief and jurisdiction of the commission is ample to provide such relief. See also 52 I. C. C. 255. Boulder Chamber of Commerce v. A., T. & S. F., 107 I. C. C. 49, 52.

III. FACILITIES.

See Facilities and Privileges.

§10. Baggage and Baggage Car Service.

See Baggage Car Service.

(a) Proposed schedules denying to owners of traveling tent-shows who engage special baggage cars the right to check, in regular passenger service, the usual 150 pounds of baggage allowed on each adult ticket found not justified. Baggage from and between Southern Points, 112 I. C. C. 717.

(b) The wide application of schedules which deny to owners of traveling tent-shows who engage special baggage cars the right to check, in regular passenger service, the usual 150 pounds of baggage allowed on each adult ticket, is not conclusive proof of their reasonableness. Baggage from and between Southern Points, 112 I. C. C. 717, 721.

(c) Rates and charges of a railroad can not be based entirely on cost for each particular character of service rendered. If such were the case, the passenger with baggage would pay more than the passenger without baggage, and rates to large industrial centers would vary dependent upon character of terminal service employed, including connecting switching. Cost of service is an important element but not the only or necessarily the controlling one by which to measure a rate or charge for a particular service. Rates on Cotton to Gulf Ports, 123 I. C. C. 685, 702.

(d) Public Service Commission Law, § 38, in so far as it authorizes carriers to make reasonable charge for transporting passenger's baggage in excess of $150 in value, in conflict with schedule of rates approved by Interstate Commerce Commission providing a minimum of $100, is ineffective, and is superseded by such tariff even as respects intrastate journeys. Minturn v. New York Cent. R. Co., 220 N. Y. S. 789.

(e) Railroad Law, § 67 , providing that employee of common carrier recklessly or willfully damaging passenger's baggage, or railroad which knowingly keeps any such willful or reckless person in its employment, or which permits such an injury through failing to provide sufficient help and facilities for handling thereof, shall pay $50 to person injured thereby, is penal, and must be strictly construed. Minturn v. New York Cent. R. Co., 220 N. Y. S. 789.

(f) Congress, through agency of Interstate Commerce Commission, having determined limitation of carrier's liability for damages to passenger's baggage by approval of its tariffs, such determination is controlling, and if any provisions of Railroad Law, § 67, or Public Service Commissions Law, § 40, attempt to create greater liability in case of willful inquiry to passenger's baggage, they are in effective minturn v. New York Cent. R. Co., 220 N. Y. C. 789.

(g) Interstate passengers are charged with notice of the rates and liabilities of common carriers of checked baggage as disclosed by published tariffs on file with the Interstate Commerce Commission pursuant to the acts of Congress. Robidoux v. Chicago & N. W. Ry. Co., (Neb., 1925) 204 N. W. 870.

(h) Under published tariffs on file with the Interstate Commerce Commission, interstate passengers have the alternative of two rates for the transportation of 150 pounds of checked baggage, one based on a value of $100 as a carrying liability, without any compensation beyond the price of the passenger's ticket, and the other an additional charge of 10 cents for each increase of $100 in value, or fraction thereof. Robidoux v. Chicago & N. W. Ry. Co., (Neb., 1925) 204 N. W. 870.

§11. Colored Passengers.

(a) Upon complaint seeking an award of damages due to alleged undue prejudice against, and unreasonable regulations affecting, persons of colored race in favor of persons of the white race, in the furnishing of unequal train and station accommodations, FOUND: That commission has no jurisdiction to award punitive or exemplary damages as here sought, and while evidence is not sufficient to warrant findings of undue prejudice to complainant in particular, and to the colored race in general, nevertheless

it strongly points to unsatisfactory conditions in several instances, which should be promptly corrected. Crosby v. St. L.-S. F., 112 I. C. C. 239.

(b) Complainant alleged that on July 7, 1923, defendant refused to furnish him Pullman accomodations from Atlanta, Ga., to Chicago, Ill., in violation of section 2. Complainant offered no evidence in support of his claim for damage. The refusal alleged would not constitute unjust discrimination in violation of section 2 which prohibits charging one person more than another for a like and contemporaneous service. HELD complaint dismissed. Harden v. Pullman Co., 120 I. C. C. 359.

(c) Upon complaint alleging a violation of section 2 of the act, and seeking damages due to unjust discrimination against colored passengers in favor of persons of the white race in furnishing of Pullman accommodations, HELD: That commission had no jurisdiction to award punitive or exemplary damages as here sought. See 112 I. C. C. 239. Undue prejudice in violation of section 3 of the act was not alleged or established by proof, and refusal to sell Pullman accommodations to colored passengers as alleged does not constitute unjust discrimination within the meaning of section 2 of the act, which prohibits charging one person more than another for a like and contemporaneous service. Harden v. Pullman Co. 120 I. C. C. 359.

§11½. Divisions.

See Divisions §3 (s).

§12. Free Transportation and Passes.

See Crimes III; Express Companies §5; Free Transportation.

(a) Free transportation within exceptions of Interstate Commerce Act, as amended by Hepburn Act (34 Stat. 584), is not free in popular sense, but in name only, and is part of consideration of shipment. Miller v. Maine Cent. R. Co., (Me., 1926) 133 Atl. 907.

§13. Stations.

See Stations.

(a) Complainant alleged that the failure of defendants to provide passenger station facilities on their lines in the west end of Cleveland, Ohio, subjected their patrons who reside in that section of the city to great inconvenience and hardship. Defendants are the N. Y. C. and Big Four. HELD, Commission is without power to require carriers to construct passenger stations under conditions such as are presented here, complaint dismissed. Witt v. N. Y. C. R. R., 115 I. C. C. 108.

(b) Upon complaint praying that the New York Central and Big Four railroads be compelled to erect passenger stations on their tracks in west end of Cleveland, Ohio, based primarily upon inconvenience and hardships suffered by patrons living in that section of the city who are obliged to journey a distance of five miles or more to carrier's downtown passenger station to board through trains, and upon alleged discrimination due to maintenance of outlying stations in east end of the city, HELD: Following Los Angeles Passenger Terminal Cases, 100 I. C. C. 421, commission is without power to require carriers to construct passenger stations under conditions such as are here presented. Witt v. N. Y. C., 115 I. C. C. 108.

§14. Through Routes and Rates.

See Through Routes and Joint Rates.

(a) Application of Northern Pacific and Minneapolis, St. Paul & Sault Ste. Marie railways, under section 5 of the act, for authority to establish a joint passenger-train service between Minneapolis and St. Paul, Minn., and Duluth, Minn., and Superior, Wis., and to divide earnings therefrom, approved. Proposed arrangement found to be in interest of economy of operation, not to unduly restrain competition, and to be upon just and reasonable terms and conditions. Joint Passenger Train Service, 107 I. C. C. 493.

(b) Upon further hearing, modified joint passenger-train service and division of earnings therefrom between the Twin Cities and the head of the Lakes, proposed by the Northern Pacific Ry. Co. and the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., found not unduly to restrain competition, to be upon just and reasonable terms and conditions, and to meet the requirements imposed by section 5 of the act. Prior report, 107 I. C. C. 493. Twin Cities and Head of the Lakes Joint Passenger Train Service, 112 I. C. C. 403.

(c) On further hearing, finding of original report, 96 I. C. C. 116, that

operation of joint passenger-train service between Seattle and Tacoma, Wash., and Portland, Oreg., and division of earnings therefrom will be interest of better service to the public, will promote economy of operation, and will not unduly restrain competition; and that terms and conditions under which such division is proposed to be made are just and reasonable, affirmed, and new contract extending terms and conditions of original contract for three years and amendment thereto eliminating requirement that one pool train be operated daily between Portland and Centralia, Wash., approved upon showing that pool trains were being operated at a loss and upon arrangement for additional stops or flags of through trains. Puget Sound-Portland Joint Passenger-Train Service, 128 I. C. C. 149.

(d) On Dec. 22, 1924, N. P. G. N. and O. W. R. R. & N., submitted to the Commission for approval a certain contract which provided for the establishment of a joint passenger train service between Seattle, Wash., Tacoma, Wash., and Portland, Ore., and for a division of earnings therefrom. Original decision Puget Sound-Portland Joint Passenger-Train Service 96 I. C. C. 116. The amendments to the prior contract now proposed will not in any way affect the service to be rendered. One amendment provides, in effect, that special trains operated over all or any portion of the tracks used by regular pool trains shall be considered as pool trains and taken into pool accounts. Another amendment relates to regular trains that have runs only in part over tracks regularly used by pool trains. These are not to be considered pool trains and are not taken into pool accounts. The discontinuance of trains Nos. 456 and 457 is the subject of another amendment. HELD, proposed contract approved. Puget Sound-Portland Joint Passenger-Train Service, 128 I. C. C. 149.

(e) In 107 I. C. C. 493 and 112 I. C. C. 403, the Commission found that the joint passenger train service between the Twin Cities and the head of the Great Lakes proposed by the N. P. and the Soo Line and proposed division of earnings therefrom would meet the conditions imposed by section 5 (1) of the act. The pooling arrangement was subsequently put into effect. Under the proposed arrangement, whereby the G. N. and N. P. will each discontinue a train each way per day, a saving of 116,800 train miles per annum for each road, or a total of 233,600 train miles, will result. The proposed arrangement was not opposed at the further hearing. HELD, the proposed joint service and division of earnings between the applicants will be in the interest of economy in operation and will not unduly restrain competition, and the terms and conditions under which division is proposed to be made are just and reasonable. Joint Passenger Train Service, 132 I. C. C. 413.

V. OPERATION.

§17. In General.

See Evidence §18.

(a) In 107 I. C. C. 493 the proposed joint passenger train service between the Twin Cities and the Head of the Lakes, by the N. P. Ry. and Soo Line, was found to meet the conditions imposed by section 5 of the act. The pooling arrangement thus authorized was not made effective. Instead, on March 30, 1926, the carriers filed an application for an amended order to approve a proposed modified train service and division of the earnings therefrom on the basis set forth in a copy of the contract between the applicants attached to the latter application. The modification of the original plan is that, instead of a withdrawal of two trains daily in each direction, but one will be withdrawn from the service. The train so to be discontinued is the Soo night train in each direction, the N. P. night train to continue in service. A late afternoon fast nonstop train will be operated by the N. P., instead of by the Soo, as first planned, and both lines will operate early afternoon fast trains. Each line will operate a morning train to care for local traffic. HELD: Proposed modified plan just and reasonable. Twin Cities and Head of the Lakes joint passenger train service, 112 I. C. C. 403.

(b) Upon further hearing, modified joint passenger train service and division of earnings therefrom between the Twin Cities and the head of the lakes, proposed by the Northern Pacific Ry. Co. and the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., found not unduly to restrain competition, to be upon just and reasonable terms and conditions, and to meet the requirements imposed by

section 5 of the act. Prior report, 107 I. C. C. 493. Twin Cities and Head of the Lakes Joint Passenger-Train Service, 112 I. C. C. 403.

PAST RATES

See Evidence §29, §43; Reasonableness of Rates §25.

PEDDLER CAR SERVICE

See Cars and Car Supply §9¾.

(a) Class rates on fresh meats, packing-house products, and other articles, in peddler cars, from Chicago and East St. Louis, Ill., to points on the C. & O. east of Gauley, W. Va., found unreasonable to extent they exceeded aggregate of intermediates to and from Gauley. Reasonable class rates prescribed for future, and reparation awarded. Wilson & Co. v. C. & O., 104 I. C. C. 641.

(b) Class rates on fresh meats, packing-house products, and other articles, in peddler cars, from Chicago and East St. Louis, Ill., to certain interstate destinations on the C. & O., found not unreasonable or otherwise unlawful. Wilson & Co. v. C. & O., 104 I. C. C. 641.

(c) Class rates on fresh meats, packing-house products, and other articles, in peddler cars, from Chicago and East St. Louis, Ill., to branch-line points on Big Sandy and Logan divisions of C. & O., found unreasonable and unduly prejudicial to extent they exceeded rates to main-line junctions plus differentials for hauls beyond, computed under distance scale prescribed herein. Reasonable and nonprejudicial class rates prescribed for future and reparation awarded. Wilson & Co. v. C. & O., 104 I. C. C. 641.

(d) Proposed increased minimum charges on articles in peddler cars, from East St. Louis, Ill., to points on C. & O., in Kentucky and West Virginia, designed to place such charges on a basis similar to that from Chicago to same points, found not justified. The loading of peddler cars is dependent upon consuming ability of destination territory. Territory served by the C. & O. especially branch lines, is thinly settled, and limited refrigeration facilities render storage of perishable articles for extended periods impossible. Wilson & Co. v. C. & O., 104 I. C. C. 641.

(e) Peddler Car Minimum Charges: Minimum charges on fresh meats, packing-house products, and other products, in peddler cars, from Chicago and East St. Louis, Ill., to points on C. & O. in Kentucky, West Virginia, and Virginia found unreasonable and unduly prejudicial to extent they exceeded charges on 20,000 pounds of freight at 3 cents per 100 pounds less than fourth-class rates from point of origin to final destination of car. Reasonable and nonprejudicial minimum charges prescribed for future and reparation awarded. Wilson & Co. v. C. & O., 104 I. C. C. 641.

PENALTY CHARGES

See Classification §16a; Demurrage §7½, §16½.

(a) Complainant alleged the socalled penalty charge exacted on grain originating on the Santa Fe, milled at Dallas, Texas, and destined to points on the T. & P. north and west of Fort Worth, Texas, as unjust and unreasonable and unduly prejudicial to complainant and unduly preferential of Fort Worth. The charge is 2c. The line haul rates are not in issue. There is no penalty charge on shipments from and to the same territory which are accorded transit at Fort Worth. The assessment of the penalty charge is due to the fact that the Santa Fe is unwilling to accept any less division to Dallas than to Fort Worth, while the T. & P. demands a greater division for its 32 mile longer haul from Dallas than from Fort Worth. Each carrier is willing to have the charge removed if the other will bear the consequent reduction in the total charges. HELD, There is no evidence upon which to base a finding that the charge is unlawful, charges attacked not unreasonable or unduly prejudicial, complaint dismissed. Pearlstone Mill & Elevator Co. v. A. T. & S. F. Ry., 115 I. C. C. 551.

(b) Applicable charges and tariff rule which provided for assessing of double the c. l. rate on excess weight of overloaded cars when moved through to destination, or for levying a charge for reloading into suitable equipment where such shipments are discovered en route, found not unreasonable or otherwise unlawful. Complainant here operated under a weight agreement whereby his weights were accepted by carriers tariffs providing that such shipments need not be reweighed either at point of origin or en route. Moreover, while a carrier is obliged to furnish proper equipment for safe transportation of goods, shipper's duty is to load properly and to

observe tariff rules, noncompliance with which affords no basis for finding legally applicable charges unreasonable or otherwise unlawful. See also 95 I. C. C. 525; 51 I. C. C. 99. Memphis Frt. Bureau v. St. L. S. W., 115 I. C. C. 409.

(c) Maintenance of penalty charge for out-of-line haul on grain from points on A., T. & S. F., milled in transit at Dallas, Tex., and destined to points north or west of Fort Worth, while failing to exact such charges on similar traffic at Fort Worth, found not unreasonable or unduly prejudicial. The out-of-line haul when traffic moves through Dallas is substantially greater than distance through Fort Worth, the penalty charge here assailed not being shown unreasonable for extra service performed. Moreover, failure of other carriers to maintain similar penalty charges at Dallas does not establish unlawfulness of those here assailed. Pearlstone Mill & Elevator Co. v. A., T. & S. F., 115 I. C. C. 551.

(d) Carriers assessed sixth-class rate applicable on rosin in bulk in barrels on shipments of rosin in boxes without tops. Governing classification which rated rosin in boxes at second class, defined a box as a closed container. It also provided for charging of rates one class higher where improperly closed containers are inadvertently accepted for transportation. HELD: While first-class rate was legally applicable, there is a general rate parity on dry and solid articles in barrels and in boxes and no reason appears why this parity should not obtain on rosin. Accordingly, rosin in barrels being rated sixth class, the applicable first-class rate on rosin in boxes was unreasonable to extent it exceeded fifth class which would apply under penalty provision for failure to comply with packing requirements. Adjustment of charges directed. Hyman-Michaels Co. v. A. C. L., 120 I. C. C. 127.

(e) Upon contention that as shippers are charged with a knowledge of classification provisions but having for some reason elected to ship a commodity in a manner which did not comply with packing requirements they should not be heard to complain of resulting penalty charges occasioned thereby, HELD: This view can not be sustained. Even if shippers knowingly subject themselves to higher rates, clearly they are not estopped thereby from complaining that charges exacted for service performed were excessive. Hyman-Michaels Co. v. A. C. L., 120 I. C. C. 127, 128.

(f) Railroad's so-called penalty charge of $10 per day, exacted pursuant to tariff duly filed, for detention of car containing interstate shipment of lumber awaiting reconsignment, HELD in essence an additional demurrage charge, properly exacted, having been found reasonable by Interstate Commerce Commission. Turner, Dennis & Lowry Lumber Co., v. Chicago, M. & St. Paul Ry. Co., 46 Sup. Ct. 530.

PER CAR RATES

(a) One factor of combination rate on a mixed carload of sawmill machinery and a power boiler, shipped in a car 41 feet 4 inches in length, was published as "$61 per car as per classification." Governing classification rated both sawmill machinery and power machinery and power boilers sixth class, minimum 24,000 pounds subject to rule 34. Exceptions to classification, however, provided class N rating to apply on "Boilers, steam power * * * in straight or mixed carloads, with machinery and machines, per car 20,000 excess in proportion," for cars 36 feet 6 inches, or under, larger cars being subject to rule 34. Complainant's contention that the rate of $61 is applicable to 20,000-pound units of freight with any fractional excess in proportion, sustained, and charges collected found inapplicable to extent they exceeded charges computed by multiplying the rate per car by the weight of shipment and dividing by 20,000 units. Reparation awarded. West Florida Lbr. Co. v. G., F. & A., 129 I. C. C. 62.

PER DIEM CHARGE

See Cars and Car Supply §11¾, §11⅞; Demurrage §18¼; Switch Tracks and Switching §9b; Tap Lines §12½.

PERCENTAGE RATES

See Advanced Rates §7 (8); §9½ (f); Blanket Rates §12½ (m); Evidence §43¼; Express Companies §23.

(a) Rates on fresh meats from Chicago, St. Louis and other packing points in c. f. a. territory to trunk-line and New England territories found unrea-

sonable for future. Reasonable rates and percentage relationships, based on the Chicago-New York rates, which will not result in undue prejudice in their relation to present rates on livestock, prescribed. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 135.

(b) Rates on flaxseed from South Dakota points to Minneapolis, Duluth, Chicago, Milwaukee, Des Moines, Omaha, and Kansas City, found unduly prejudicial and preferential. Nonprejudicial basis of rates bearing a uniform percentage relationship to corresponding wheat rates prescribed. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35.

(c) Upon reargument, finding in original report, 95 I. C. C. 181, that rates on rig irons from Parkersburg, W. Va., to destinations in Louisiana, Arkansas, Oklahoma, Kansas, Montana, and California were and for the future will be unreasonable to extent they exceed 85 per cent of rates on oil-well outfits and supplies, affirmed as to rates for future, but as to unreasonableness in the past, reversed, and reparation denied. Parkersburg Rig & Reel Co. v. C., R. I. & P., 107 I. C. C. 182.

(d) Rates on fabricated-steel tank material and rig-iron outfits from Parkersburg, W. Va., to Riverton, Wyo., found unreasonable to extent they exceeded, on fabricated-steel tank material, lower contemporaneous rate on structural iron and steel, fabricated or unfabricated, and on rig-iron outfits, to extent they exceeded 85 per cent of rates contemporaneously in effect on oil-well outfits and supplies. Reasonable rates prescribed for future and reparation awarded. Parkersburg Rig & Reel Co. v. C. & N. W. Ry., 107 I. C. C. 187.

(e) Upon reconsideration, rates on zinc dross from Ashland, Ky., to Newport News, Va., found unreasonable to extent they exceeded 85 per cent of contemporaneous sixth-class rates prescribed in 78 I. C. C. 469; 81, I. C. C. 645. Reparation awarded. Original report, 101 I. C. C. 23, modified. Lissberger & Co. v. C. & O., 107 I. C. C. 308.

(f) Rates on copper-clad steel scrap from Swissvale and Rankin, Pa., to Norfolk and West Norfolk, Va., found unreasonable to extent they exceeded 85 per cent of sixth class. Reasonable rate from Rankin prescribed for future and reparation awarded. Copperweld Steel Co. v. B. & O., 109 I. C. C. 99.

(g) Rates on plumbago and graphite from New York Harbor, N. Y., free lighterage limits to Delano Junction, N. J., destined to Ticonderoga, N. Y., over an interstate route, found unreasonable to extent they exceeded rate contemporaneously in effect from Jersey City, N. J., by more than 3 cents. Reparation awarded and reasonable rate prescribed for future. Dixon Crucible Co. v. D. & H., 109 I. C. C. 380.

(h) Rate on imported wood pulp from Baltimore, Md., to Baltimore, Ohio, found not unreasonable or unduly prejudicial as compared with rates from Gulf ports to destinations in same general territory. Fact that present rate is not 78 per cent of New York-Chicago rate, less the differential from Baltimore, is not evidence that rate in effect is unreasonable or unduly prejudicial. The percentage formula is not a hard and fast rule but is merely a guide. And further, the practice of not scaling back the New York-Chicago rate to 78 per cent territory is not confined to wood pulp, but applied to rates on many commodities. Fairfield Paper Co. v. B. & O., 109 I. C. C. 514.

(i) Rates on agricultural and fluxing lime having no commercial value for building or chemical purposes found unreasonable for the future to extent they exceed 80 per cent of rates on common lime, hydrated, quick, or slaked, except agricultural and fluxing lime having no commercial value for building or chemical purposes. Eastern Lime Mfrs. Traffic Bureau v. A. & B. B., 112 I. C. C. 7, 26.

(j) Rates on paper boxes found unreasonable to extent they exceeded 110 per cent of rates on newsprint paper. Reparation awarded. Beatrice Creamery Co. v. A., T. & S. F., 112 I. C. C. 113.

(k) Sixth class rate on logs from Cottage Grove, Ind., to Hicksville, Ohio, found unreasonable to extent it exceeded 89 per cent of sixth-class contemporaneously in effect under the c. f. a. log-mileage scale for same distance. Reparation awarded. Crook, Son & Co. v. C. I. & W., 112 I. C. C. 399.

(l) Group rates on fuel oil and other low-grade petroleum products from points in midcontinent field of Missouri, Kansas, Oklahoma, Arkansas, Louisiana, and Texas to destinations in western trunk-line territory, Illinois, Indiana, and northern peninsula of Michigan, found unreasonable to extent they exceed 80

per cent of contemporaneous rates on gasoline between same points, fractions of a cent to be resolved to the nearest half cent. Mid-continent Oil Rates, 1925, 112 I. C. C. 421, 474.

(m) Rate equal to 90 per cent of sixth class on box board from Halltown, W. Va., to Lynchburg, Va., found not unreasonable as compared with lower commodity rate on wood-pulp board from Covington, Va., to Richmond. While these commodities are comparable from a transportation standpoint, the movement from Halltown to Lynchburg is over two or more roads. Carriers show that boxboard rates from Halltown to various destinations for comparable distances produce greater ton-mile earnings than under rates assailed, and while to certain points ton-mile earnings on box board from Halltown are lower than to Lynchburg, there is no showing that rate to Lynchburg is above general level in similar territory. Lynchburg Chamber of Commerce v. B. & O., 115 I. C. C. 465.

(n) Following Lissberger & Co., 81 I. C. C. 645, rates on spelter by-products between points in New England and eastern trunk-line territories and on zinc by-products from points in Canada to points in New England and eastern trunk-line territories, found unreasonable to extent they exceeded 85 per cent of sixth class, except between points where commodity rates are maintained on spelter, lower than 85 per cent of sixth class rates in which cases they are unreasonable to extent of such lower commodity rates. Reasonable basis of rates prescribed and reparation awarded. Lissberger & Co. v. P. R. R., 115 I. C. C. 521.

(o) Following Crescent Bed Co., 102 I. C. C. 419, rate on metallic couch frames found unreasonable to extent it exceeded 75 per cent of corresponding rate on furniture. Reparation awarded. Memphis Furniture Mfg. Co. v. I. C. R. R., 115 I. C. C. 554.

(p) Sixth-class rate applicable on lumber and assessed on logs from Adrian, Mich., to Hicksville, Ohio, found unreasonable to extent it exceeded a lower rate contemporaneously in effect from Adrian to other destinations in same general territory as Hicksville, such lower rate being equivalent to 74 per cent of contemporaneous sixth-class rate. Reparation awarded. Crook Son & Co. v. W. Ry., 118 I. C. C. 285.

(q) Sixth-class rate applicable on lumber and assessed on logs from Arcola, Ind., to Montpelier, Ohio, found unreasonable to extent it exceeded a lower log rate equal to 65 per cent of sixth class contemporaneously in effect from and to points in c. f. a. territory for like distances and found reasonable as maxima in 85 I. C. C. 533. Reparation awarded. Liberty Cooperage & Lbr. Co. v. P. R. R., 118 I. C. C. 505.

(r) Rates on envelopes, in straight carloads, from West Carrollton, Ohio, and Waukegan, Ill., to Wichita, Kans., found unreasonable to extent they exceeded 150 per cent of contemporaneous rates on newsprint paper from and to same points, minimum 40,000 pounds. Reasonable rate prescribed for future and reparation awarded. Western Newspaper Union v. A., T. & S. F., 118 I. C. C. 692.

(s) Complainant sought rates on cotton-pulp board from Nitro, W. Va., to Marcus Hook and Lewistown, Pa., and Roanoke, Norfolk, and Newport News, Va., lower than 90 per cent of sixth class, the basis prescribed for all kinds of paper-boards in 52 I. C. C. 84, contending that rates therein were prescribed as maximum only, instances being cited where carriers have departed therefrom and published lower commodity rates on some of these articles. HELD: Rates established in case cited have been maintained quite generally throughout this territory and an effort to secure a lower rate on strawboard in 101 I. C. C. 273, was not sustained. As no exception was made in that case, an exception in favor of higher grade of pulpboard here involved would be still less justifiable. Viscose Co. v. N. Y. C., 120 I. C. C. 352.

(t) Upon reargument, statement in original report, 104 I. C. C. 104, that fresh-meats rate from St. Louis to New York is a marked exception to the adjustment prevalent, and that 117 per cent is the standard relationship on almost every other commodity, found to be in error. Finding that local and proportional rates on fresh meats from St. Louis and other Mississippi River crossings to destinations in trunk-line and New England territories should be based upon 117 per cent of the Chicago-New York rate, withdrawn, and rates based upon specific differentials over Chicago prescribed for future. Morrell & Co. v. N. Y. C., 120 I. C. C. 537.

(u) Sixth-class rates on cement roofing slabs, reinforced with metal, from Wampum, Pa., to Toronto, Ontario, Canada, found unreasonable to extent they exceeded 75 per cent of sixth class, which lower basis was contemporaneously in effect from Chicago and other producing points to destinations in c. f. a. territory, and from Chicago to Sarnia, Windsor, and Toronto, Ontario, Canada, for comparable hauls. Reparation awarded. American Cement Tile Mfg. Co. v. P. R. R., 120 I. C. C. 611.

(v) Rates on cement building or roofing slabs reinforced with metal, in straight carloads or mixed with roofing cement (other than liquid) and/or asphaltum, from Lincoln, N. J., to points in trunk-line and New England territories, found not unreasonable in past, but for future found unreasonable to extent they exceed 75 per cent of contemporaneous sixth-class rates, minimum 50,000 pounds. This basis is generally applicable from and to points in c. f. a. territory and was also found justified in 107 I. C. C. 335, from Chicago and points grouped therewith, and Terre Haute, Ind., to points in c. f. a. territory. Reasonable basis prescribed for future. American Cement Tile Mfg. Co. v. A. & A. R. R. Corp., 120 I. C. C. 730.

(w) Complainant alleged that rates on rig irons, carloads, from Parkersburg, W. Va., to Louisiana, Arkansas, Oklahoma, Kansas, Montana and California were unreasonable. Original report in 95 I. C. C. 181 wherein commission found the rates applicable, being those on oil well outfits and supplies, unreasonable to extent they exceeded 85% of the rates on oil well outfits and supplies, minimum 40,000 pounds. In 107 I. C. C. 182, the original finding was affirmed as to the future but not as to the past. HELD, on and after July 1, 1922 and to the effective date of the order, rates to Louisiana and Arkansas unreasonable to extent they exceeded 85% of the oil well supplies. To Oklahoma and Kansas on and after July 1, 1922 unreasonable to extent they exceed 85% of oil well supplies; the same situation is true as to Montana and California, reparation awarded. Parkersburg Rig & Reel Co. v. C. R. I. & P. Ry., 123 I. C. C. 79.

(x) Rates on common brick from Harrisonville, Mo., to Kansas City, Kans., and Argentine, Kans., found unreasonable to extent they exceeded via various routes, 80 per cent of rates on other brick, which rates are equal to those prescribed for similar distances in Ballou Brick case, 77 I. C. C. 4, considered in connection with the General Brick case, 68 I. C. C. 213. Reparation awarded. Harrisonville Brick & Tile Co. v. A., T. & S. F., 122 I. C. C. 489.

(y) Proposed increase in basis of rates on paving and roofing pitch, paving and roofing tar, coal tar, and oil tar from 70 to 80 per cent of sixth class in c. f. a. territory, the basis applicable on asphalt, found not justified. While a review of conclusions in 61 I. C. C. 719, wherein 80 per cent of sixth class was prescribed in official classification territory on these commodities justifies carriers' attempts to replace the pitch and tar rates on a parity with those on asphalt in so far as reasonableness of rates is concerned, such an adjustment would produce a disparity in rates between producers at Cincinnati, and St. Louis and Chicago in favor of competing plants at latter points, resulting in undue prejudice to Cincinnati producers. Pitch and tar in C. F. A. Territory, 122 I. C. C. 573.

(z) On reconsideration, former finding that rates on rig irons from Parkersburg, W. Va., to destinations in Louisiana, Arkansas, Oklahoma, Kansas, Montana, and California were unreasonable for future but not for the past, modified so as to provide that rates to Oklahoma and Kansas were unreasonable to extent they exceeded 85 per cent of rates on well-boring outfits composed of rate from Parkersburg to St. Louis, the same in amount as that applicable on shipments destined to Louisiana and Arkansas, plus rates beyond St. Louis constructed in accordance with distance scale prescribed in 77 I. C. C. 473, minimum 40,000 pounds, and rates to Montana and California to extent they exceeded rates herein found reasonable, minimum 40,000 pounds. Reasonable rates prescribed and reparation awarded. Former reports 95 I. C. C. 181; 107 I. C. C. 182. Parkersburg Rig & Reel Co. v. C., R. I. & P., 123 I. C. C. 79.

(aa) Sixth-class rate on lumber assessed on logs moving from Huntertown, Ind., to Hicksville, Ohio, found unreasonable to extent it exceeded rate for similar distance under the c. f. a. log scale prescribed in 88 I. C. C. 533, approximating 70 per cent of sixth class. Reparation awarded. Cook Son & Co. v. N. Y. C., 123 I. C. C. 93.

(bb) In so far as considerations which

govern class percentages are concerned there are no differences in conditions as between the Southwest and western trunk-line territory. Accordingly, substantially same class percentages should apply in both these territories. Consolidated Southwestern Cases, 123 I. C. C. 203, 234.

(cc) Generally speaking, same class percentages should apply throughout any one classification territory, and as rapidly as may be possible progress should be made to harmonize classification ratings and class percentages throughout the country. Consolidated Southwestern Cases, 123 I. C. C. 203, 233, 234.

(dd) Following 95 I. C. C. 181; 107 I. C. C. 182, rates on rig irons in straight carloads should be about 15 per cent lower than rates on oil-well supplies. Consolidated Southwestern Cases, 123 I. C. C. 203, 331.

(ee) Rates on flaxseed from points in South Dakota to Fredonia, Kans., constructed by adding proportionals to local rates to Missouri River, found unreasonable and unduly prejudicial as compared with rates contemporaneously in effect to Minneapolis, Des Moines, Chicago, and St. Louis, competing points, and to extent they exceeded corresponding rates to Omaha, Nebr., by more than 16 cents. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Fredonia Linseed Oil Works Co. v. A., T. & S. F., 123 I. C. C. 525.

(ff) Rates on building and roofing material, from Chicago, Ill., and St. Louis, Mo., and points taking same rates, and from Lockland, Ohio, to Colorado common-point territory, found not unreasonable. Contention that above rates should not exceed 95 per cent of rates contemporaneously in effect on newsprint paper, not sustained. See also 95 I. C. C. 296. Rates on prepared roofing to destinations here involved range from 100 to 135.6 per cent of rates on newsprint paper. Moreover, present rates on building and roofing material and prepared roofing are on a comparable basis with rates on other building materials. Mountain States Roofing Co. v. A., T. & S. F., 126 I. C. C. 475.

(gg) Rates on face brick from Wooster, Ohio, to eastern points found not unreasonable as compared with lower rates contemporaneously in effect from Canton and Massillon, Ohio, competing producing points, but unduly prejudicial to extent they exceed those from the latter points. Rates assailed are generally based upon a percentage of Chicago-New York rates prescribed in 68 I. C. C. 213, although the percentage bases are not rigidly observed. Since carriers have accorded same rates from all three points to destinations in all directions in a large expanse of surrounding territory it is unjust to subject Wooster to a disadvantage to more distant destinations in the East. Nonprejudicial basis of rates prescribed for future. Medal Brick & Tile Co. v. B. & O., 128 I. C. C. 241.

(hh) Rates on furniture from Memphis, Tenn., to destinations in c. f. a., Buffalo-Pittsburgh, and southern territories, found unreasonable to extent they exceed: In case of mixed furniture, minimum 12,000 pounds, 60 per cent of the corresponding first-class rates; in case of iron beds and articles classified therewith minimum 12,000 pounds, the fourth-class rates and minimum 30,000 pounds the sixth-class rates, all of which are to be established under Southern Class Rate Investigation 100 I. C. C. 513; 109 I. C. C. 300; 113 I. C. C. 200; and in the case of l. c. l. rates on all articles of furniture, the class rates so established applicable under the southern classification. Reasonable bases of rates prescribed for future. Memphis Freight Bureau v. A. G. S., 128 I. C. C. 445.

(ii) The percentage formula can not be accepted as a measure of reasonableness of rates or as a criterion of their lawfulness in other respects. See 93 I. C. C. 271. Knoxville Iron Co. v. L. & N., 128 I. C. C. 513.

(jj) Complainant alleged that rates on bed springs or spring beds compressed, in carloads, from Carthage, Mo., to Oklahoma and Texas since Dec. 1, 1922 have been and are unjust, unreasonable and unduly prejudicial. The rates on bed springs, compressed, in carloads, from the points of origin named are mostly commodity rates, minimum 12,000 pounds, subject to rule 34, alternating with commodity rates, minimum 30,000 pounds, and with class C rates, minimum of 30,000 pounds. Oklahoma exceptions provide third class, minimum 12,000 pounds, on bed springs rated fourth class in western classification. HELD, assailed rates prior to Nov. 27, 1923, not unreasonable and complain-

ants not damaged by any undue prejudice which may have existed prior to that date. On and after that date the assailed rates to Oklahoma and Texas were, are, and for future will be, unreasonable and unduly prejudicial to extent they exceed rates which are 55 and 41% of the first class rates from and to the same points prescribed in Consolidated Southwestern cases, 123 I. C. C. 203, minimum weights of 12,000 and 30,000 pounds, reparation awarded. Leggett & Platt Spring Bed & Mfg. Co. v. A., T. & S. F. Ry., 129 I. C. C. 219.

(kk) Complainant alleged rates charged on scrap brass and brass ingots from Pittsburgh to Newark and Jersey City, N. J., and Baltimore, Md., during 1922, 1923 and 1924 were unreasonable and inapplicable. Charged to Newark and Jersey City 34c and to Baltimore 35c prior to July 1, 1923 and 31.5c thereafter. The rates from 60% territory west of Pittsburgh to Newark and Jersey City was 22.5c, to Baltimore 22c prior to July 1, 1922, 20c from that date to Sept. 15, 1922 and 19c thereafter. On and after that date, June 1, 1922, defendants maintained from Zanesville, O., a 74% group point, rates of 28c to Jersey City and 25c to Baltimore subject to a clause which authorized the application of these rates from Pittsburgh as an intermediate point. Shipments overcharged. HELD, rates applicable were 28c and 25c, refund to be made; rates attacked to Newark and Jersey City unreasonable to extent they exceeded 22.5c, and to Baltimore 22c prior to July 1, 1922, 20c on and after that date to Sept. 15, 1922 and 19c thereafter, reparation awarded. Hausman & Sons Co. v. Pennsylvania R. R., 129 I. C. C. 233.

(ll) Complainant alleged that commodity rates charged on sash, doors window and door screens, and building wood work, in carloads, from Clinton, Dubuque and Muscatine, Ia., to central territory, including the western termini of eastern trunk lines are unreasonable and as compared with rates from Oshkosh and other points in Wisconsin unduly prejudicial. Points of origin are upper Mississippi river cities. Present rates on sash and doors from Oshkosh to destinations in central territory are 3c over the lumber rates from and to the same points where the rate on lumber is 28.5c or less and 2.5c over the lumber rates where the rate on lumber is over 28.5c. The rates on sash and doors from Oshkosh to central territory range from 107 to 113% of the lumber rates from and to the same points. Commodity rates apply on sash and doors from Mississippi river points to most of central territory, but full class rates, fifth, apply generally to the eastern portion of that territory. The commodity rates bear no fixed relation to the lumber rates from and to the same points. To points in trunk line territory the present rates on sash and doors are, from Mississippi river and Wisconsin cities, 125% of the lumber rates from the Pacific coast 115% of the lumber rates. Generally speaking the rates on sash and doors from both Wisconsin and Mississippi river points to central territory are higher than from the same origin points to western trunk line territory. HELD, rates from Clinton, Dubuque, Muscatine and Davenport, Ia., and Rock Island, Ill., to points in central territory, except to points in Michigan, including the western termini of eastern trunk lines and points taking the same rates or arbitraries higher, except Buffalo, N. Y., are unreasonable and unduly prejudicial to extent they exceed the rates from Oshkosh, Wis. HELD, further, rates to Buffalo and Bay City and Grand Rapids, Mich., are and for future will be unreasonable and unduly prejudicial to extent they exceed 37, 32 and 29c, respectively. Farley & Loetscher Mfg. Co. v. A. C. & Y. Ry., 129 I. C. C. 645.

(mm) Rates on millet seed from points in Colorado, Kansas, Nebraska, North Dakota, and South Dakota to Minneapolis, Minn., found unreasonable as compared with rates contemporanerously in effect on corn, coarse grains, and flaxseed, and to extent they exceeded by more than 12 per cent the contemporaneous rates on wheat. In 107 I. C. C. 35, rates on flaxseed were found unreasonable to extent they exceeded wheat rates by more than 12 per cent, and since from a traffic standpoint millet seed resembles flaxseed in many respects, although of less value, and the two seeds have been maintained on same rate basis in the past, this relationship, for convenience, should be preserved. Reasonable rates prescribed for future and reparation awarded. Northrup, King & Co. v. A., T. & S. F., 129 I. C. C. 125.

(nn) Rates on bed springs or spring beds, compressed, from Carthage, Mo., to points in Oklahoma and Texas, found unreasonable and unduly prejudicial as compared with lower rates contemporaneously in effect from Chicago, Kansas City, St. Louis, and various other points and to extent they exceeded 55 and 41 per cent of first-class rates to Oklahoma and Texas, respectively, prescribed in 123 I. C. C. 203, between same points. Reasonable maximum basis of rates prescribed for future and reparation awarded. Leggett & Platt Mfg. Co. v. A., T. & S. F., 129 I. C. C. 219.

(oo) Rates on common unglazed doors from points in Oregon to destinations in trunk-line and New England territories found unreasonable to extent they exceeded 115 per cent of rates on lumber found reasonable in 78 I C. C. 495, 513, between same points on same commodity. Reparation awarded. M. & M. Wood Working Co. v. O.-W. R. & N., 129 I. C. C. 329.

PERISHABLE FREIGHT

See Inspection; Protective Service; Refrigeration.

(a) Upon contention that charges on l. c. l. mixed shipments of fruits, vegetables, and perishable freight, covered by one bill of lading, from one consignor to one consignee at one destination, should be based on the lowest instead of the highest-rated article in car, to compensate carrier for any deficit in minimum weight, HELD: To authorize charges on basis contended for might encourage shippers loading less than the minimum to place in car a low-rated article and thereby defeat very purpose of the minimum loading. Charges on Refrigerator Equipment, 115 I. C. C. 198, 201, 202.

PERSONAL INJURIES

See Caretakers; Employers' Liability Act; Safety Appliance Acts; Telephone and Telegraph Companies.

(a) Employee of railroad, injured while arranging and remodeling bins used to store spare railroad repair parts used in intra and interstate commerce, HELD not engaged in interstate commerce so as to be entitled to recover under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Phillips v. Baltimore & O. R. Co., (Pa., 1926) 135 Atl. 102.

(b) In determining whether employee is engaged in interstate commerce and within scope of federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), question is whether employee at time of injury was engaged in interstate commerce, or in work so closely related to it as to be practically part of it. Smith v. Philadelphia & R. Ry. Co., (Pa., 1927) 135 Atl. 648.

(c) To be within "interstate transportation," employment or instrumentality must be reasonably close to movement in interstate transportation, a train movement in some form, and it must not be acts in preparation for, or expectation of, but in actual furtherance of, interstate transportation, in view of federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Smith v. Philadelphia & R. Ry. Co., (Pa., 1927) 135 Atl. 648.

(d) One unloading coal from railroad car for purpose of storage is not employed in "interstate commerce," even if the coal is subsequently used in interstate commerce. Smith v. Philadelphia & R. Ry. Co., (Pa., 1927) 135 Atl. 648.

(e) To come within scope of operation of federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), thing on which, or about which, injury takes place must have actually been thrown into interstate transportation or movement, and not merely preparatory to, or intended to be later used in such movement. Smith v. Philadelphia & R. Ry. Co., (Pa., 1927) 135 Atl. 648.

(f) A railroad employee, employed in interstate commerce, does not lose that status, within the meaning of Employers' Liability Act (Comp. St. §§ 8657-8665), because during a rest period, and when injured or killed, he was engaged in an act which, though not required in performance of his duty, was in intent not inconsistent with his duty to resume work at the appointed time. Brown's Adm'r. v. Norfolk & W. Ry. Co., 12 Fed. (2d) 319.

(g) Plaintiff's intestate was a member of a mason's crew employed in repairing bridges, etc., along the track of defendant's railroad, used in both interstate and intrastate commerce, and which used a train as headquarters and in moving from one place of work to another. The duty of plaintiff's intestate included keeping the kitchen and dining cars

supplied with coal and water. While the train in moving to a new place of work, was stopped at an intermediate station, he crossed some tracks and filled a sack from a car of commercial coal there standing, and while on his way back was struck and killed by a passing train. He had been forbidden by the foreman to take coal from commercial cars, and such was a minor rule of the company, not in its printed rules, but its violation was not a serious offense. HELD, that, regardless of the purpose for which he took the coal, he was, when killed, employed in interstate commerce, within Employers' Liability Act, § 1 (Comp. St. § 8657) Brown's Adm'r v. Norfolk & W. Ry. Co., 12 Fed. (2d) 319.

(h) Where employee's services are intimately related to interstate commerce, and there is an element of interstate commerce in a traffic or employment, it determines employee's remedy. Salno v. New York Cen. R. Co., 215 N. Y. S. 645.

(i) Plaintiff, who accepted free pass, which released carrier from liability for personal injuries arising from any cause, assumed all risks while she was using facilities afforded for her transportation, including slipping on floor or railroad station before she boarded train, notwithstanding station was maintained by separate corporation sued as joint tort-feasor with carrier. Wilder v. Pennsylvania R. Co., 217 N. Y. S. 56.

(j) Terminal railroad, adjudged by United States Supreme Court to be a common carrier by railroad within federal Hours of Service Act (U. S. Comp. St. §§ 8677-8680), must be held to be "common carrier" within federal Employers' Liability Act. (U. S. Comp. St. §§ 8657-8665), in view of Transportation Corporations Law N. Y. §§ 155-157, as added by Laws 1911, c. 778, §1. Busch v. Brooklyn Eastern District Terminal, Inc., 218 N. Y. S. 516.

(k) In action under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), for wrongful death of fireman killed on work train in collision with locomotive, fireman HELD engaged in interstate commerce at time of injury, which occurred when train was returning to base after movements toward state line gathering up scrap iron for purpose of transportation into another state, train having same crew on return, as entire movement of work train was continuous operation in interstate commerce. Wabash Ry. Co., v. Whitcomb, (Ind., 1927) 154 N. E. 885.

(l) To bring case within federal Employers' Liability Act (U .S. Comp. St. §§ 8657-8665), plaintiff, at time of injury, must have been engaged in interstate commerce, or work directly related to or so closely connected with it, as to be part of it. Conway v. Southern Pac. Co., (Utah, 1926) 248 Pac. 115.

(m) Employe, injured while blasting rock from employer's quarry, 10 or 15 miles from where it was used to fill up employer's railroad track, used in interstate commerce, HELD not engaged in such commerce, within federal Employers, Liability Act. (U. S. Comp. St. §§ 8657-8665). Conway v. Southern Pac. Co., (Utah, 1926) 248 Pac. 115.

(n) To be liable for employee's injury, under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), railroad must have accepted and designated for interstate use one or more units of train on which he worked. Johnson v. Southern Pac. Co., (Calif., 1926) 248 Pac. 501.

(o) In suit under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), there is presumption that railroad, while operating within state, was engaged in intrastate commerce. Johnson v. Southern Pac. Co., (Calif., 1926) 248 Pac. 501.

(p) Empty, private owned cars being moved to certain yard where they were to be inspected, after which owners of incoming oil, who had leased such cars, intended to ship oil to other states in them, HELD neither vehicles nor parcels of interstate commerce, so as to permit action under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665) for death of brakeman on train of which they were part, notwithstanding statement as to their intended use by traffic manager of lessor to railroad's car clerk. Johnson v. Southern Pac. Co., (Calif., 1926) 248 Pac. 501.

(q) Question of railroad's negligence in selection of physician for treatment of injured section hand HELD for jury, whether case was within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), or not. Crawford v. Davis, Director General of Railroads as Agent, (S. C., 1926) 134 S. E. 247.

(r) Federal Employers' Liability Act

(U. S. Comp. St. §§ 8657-8665), applies only when particular service in which employee is engaged is part of interstate commerce. Crawford v. Davis, Director General of Railroads, as Agent, (S. C., 1926) 134 S. E. 247.

(s) Act of railroad in choosing doctor to treat employee was purely intrastate matter, as respected application of federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665) to action for negligence in selecting incompetent physician. Crawford v. Davis, Director General of Railroads, as Agent, (S. C., 1926) 134 S. E. 247.

(t) Petition stating cause of action in favor of personal representative of flagman, employed in interstate commerce to protect trains engaged therein, HELD within federal Employer's Liability Act (U. S. Comp. St. §§ 8657-8665). Sears v. Texas & N. O. Ry. Co., (Tex., 1924) 266 S. W. 400.

(u) While under Employers' Liability Act, § 4 (U. S. Comp. St. § 8660), contributory negligence is abolished as complete defense, if negligence of employee succeeds that of employer and is sole proximate cause of his injury or death, there can be no recovery. Sears v. Texas & N. O. Ry. Co., (Tex., 1924) 266 S. W. 400.

(v) To be within federal Employers' Liability Act (U. S. Comp. St. 8657-8665) employee must be engaged in work interstate in character or so nearly related thereto as to be practically part of it, as in repairing instrumentality then in use in interstate transportation. Brock v. Chicago, R. I. & P. Ry. Co., (Mo. 1924) 266 S. W. 691.

(w) Refusal of instruction, in action under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), that, if plaintiff was performing no duty in or incidental to his general employment, but was engaged in going after water for his own personal use and comfort at time of injury, he could not recover, HELD not reversible error, in view of instructions that he must have been engaged in interstate commerce or work incidental thereto, and not engaged with his own private concerns. Brock v. Chicago, R. I. & P. Ry. Co., (Mo., 1924) 266 S. W. 691, 692.

(x) Action for injuries to employee while unloading mail from interstate car at distributing point was properly brought under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Missouri Pac. Ry. Co., v. Baldwin, (Tex., 1925) 273 S. W. 834.

(y) Generally, where applicability of the federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665) is uncertain, the character of employment in relation to commerce may be adequately tested by inquiring whether at the time of injury employee was engaged in work so closely connected with interstate transportation as practically to be a part of it. Missouri Pac. Ry. Co., v. Baldwin, (Tex. 1925) 273 S. W. 834.

(z) Section hand HELD to have assumed risk under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), where injured while slipping into an unfilled space between railway ties while putting motor car on track, where he knew the track had not been reasonably safe for two years. Odell v. St. Louis-San Francisco Ry. Co., (Mo., 1926) 281 S. W. 456.

(aa) Appellate court may not weigh the testimony on whether there was complaint and promise to repair dangerous place so that employee did not assume the risk under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), but only determine whether any substantial evidence supports the judgment. Odell v. St. Louis-San Francisco Ry. Co., (Mo., 1926) 281 S. W. 456.

(bb) Section hand, whose duties required him to repair and inspect railroad track over which interstate commerce was carried, was engaged in interstate commerce, within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Odell v. St. Louis-San Francisco Ry. Co., (Mo., 1926) 281 S. W. 456.

(cc) Where section hand complained to foreman of condition of track in front of section house at various times during two years, but received no definite promises to repair, evidence that section hand relied on promise to repair, and so did not assume risk under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), HELD insufficient for jury. Odell v. St. Louis-San Francisco Ry. Co., (Mo., 1926) 281 S. W. 456.

(dd) Where an employee knows of a defect, and appreciates the risk, if he continues in the employment without objection or assurance of its remedy, he

assumes the risk, though it arises from master's breach of duty, unless there be promise of reparation, and then an employee, relying thereon, does not assume risk during a reasonable time for, or until time specified for, performance, unless the danger be so imminent that no ordinarily prudent man would rely on the promise, under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Odell v. St. Louis-San Francisco Ry. Co. (Mo., 1926) 281 S. W. 456.

(ee) Under Federal Employers' Act (U. S. Comp. St. §§ 8657-8665), the common-law doctrine of assumed risk applies to injury to trucker in freight depot while engaged in interstate commerce. Gulf C. & S. F. Ry. Co. v. Young, (Tex. 1926) 284 S. W. 664.

(ff) Trucker in freight depot, injured while handling shipment being transported from Dallas, Tex., to Monterey, Mexico, HELD engaged in interstate commerce, within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), notwithstanding, because of revolution in Mexico, shipment was moved on local bill of lading from Dallas to Laredo, Tex., and shipment moved across border by truck, where new bill of lading was procured. Gulf C. & S. F. Ry. Co. v. Young, (Tex., 1926) 284 S. W. 664.

(gg) Railroad employee, at time of injury assisting in placing grates between rails for purpose of draining water off main lines used in interstate commerce HELD engaged in "interstate commerce," within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), making defense of assumed risk applicable. Galveston, H. & S. A. Ry. Co., v. Contonis, (Tex., 1926) 288 S. W. 154.

(hh) Employee of common carrier, engaged in interstate commerce, must also have been engaged therein at time of injury, to recover, under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Williams v. Carolina C. & O. Ry. Co., (Tenn., 1926) 289 S. W. 520.

(ii) Employee HELD engaged in interstate commerce, within meaning of federal Employers' Liability Act, § 1 (U. S. Comp., St. § 8657), where repairing upper deck of bridge, which deck was used by wagons, automobiles, pedestrians, street car lines, and electric interurban cars, and which deck was immediately above deck used by employer in transporting interstate commerce, since failure to keep the upper deck in repair would endanger interstate commerce on the lower deck. Swain v. Terminal R. R. Ass'n of St. Louis, (Mo., 1927) 291 S. W. 166.

(jj) That one of two railroad tracks on bridge extending from one state to another and used in interstate commerce was withdrawn from use during repair of bridge until 4 o'clock in the afternoon HELD not to prevent employee, engaged in repair of bridge, from being engaged in interstate commerce, within meaning of federal Employers' Liability Act, § 1 (U. S. Comp. St. § 8657). Swain v. Terminal R. R. Ass'n of St. Louis, (Mo., 1927) 291 S. W. 166.

(kk) Employee HELD engaged in interstate commerce, within meaning of federal Employers' Liability Act, § 1 (U. S. Comp. St. § 8657) where engaged in unloading, at destination, interstate shipment of girders, which had been transported by employer over its interstate railroad line from another state. Swain v. Termnial R. R. Ass'n of St. Louis, (Mo., 1927) 291 S. W. 166.

(ll) Employee held engaged in interstate commerce, within the meaning of federal Employers' Liability Act, § 1 (U. S. Comp. St. § 8657), where engaged in repairing deck of bridge, for use of which deck employer received toll under contract or running agreement with electric interurban railroad companies engaged in transporting passengers in interstate commerce. Swain v. Terminal R. R. Ass'n of St. Louis, (Mo., 1927) 291 S. W. 166.

(mm) It is not necessary that an employee know the interstate character of the movement which he is aiding at the time of his injury, in order for him to be within the federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665.) La Lone v. St. Louis Merchants' Bridge Terminal Ry. Co., (Mo., 1927) 293 S. W. 379.

(nn) Where switchman was killed in the discharge of his duties during the movement of a train of empty cars toward a freight house, and where jury might have found that previous to the movement of the cars at least four of them had been designated to be used in interstate commerce after they were loaded at the freight house, whether switchman was engaged in interstate

commerce, within the meaning of the federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), at the time of his death, HELD a question for the jury. La Lone v. St. Louis Merchants' Bridge Terminal Ry. Co., (Mo., 1927) 293 S. W. 379.

(oo) Brakeman with duty of determining time spent in partly unloading car shipped in interstate commerce, prior to its being taken to its ultimate destination, HELD employed in interstate commerce for the purpose of determining whether injury received was within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665). Clark v. Wheelock, (Mo., 1927) 293 S. W. 456.

(pp) Assistant claim agent, who was injured in wreck on interstate train, while returning to headquarters for further orders, after having completed settlement of claim, HELD not engaged in "interstate commerce," within purview of federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), so as to come within two-year limitation therein. Gulf M. & N. R. Co., v. Myer, (Miss., 1926) 110 So. 444.

(qq) Where employee was injured while repairing instrumentality of interstate commerce, and thus his claim for damages arose exclusively under federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), compromise of claim was binding without having been submitted to and approved by district judge, as required by Act La. No. 20 of 1914, § 17. Hamilton v. Louisiana Ry. & Nav. Co., In re Louisiana Ry. & Nav. Co., (La., 1926) 111 So. 184.

(rr) Hauling empty freight cars from one state to another is "interstate commerce," within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665), interstate character of which begins when and not until car has been designated therefor and has begun to move for such purpose. Gulf & S. I. R. Co., v. Curtis, (Miss., 1927) 111 So. 587.

(ss) Where empty freight cars for use in interstate commerce were delivered by one railroad to another in accordance with interchange agreement, use in interstate commerce, within federal Employers' Liability Act (U. S. Comp. St. §§ 8657-8665, HELD not to begin prior to time switching crew commenced to move them for delivery to other railroad pursuant to orders required before delivery was to be made. Gulf & S. I. R. Co. v. Curtis, (Miss., 1927) 111 So. 587.

(tt) Kind or amount of evidence required to establish liability under federal Employers' Liability Act (Comp. St. §§ 8657-8665) is not subject to control by states. Chicago, M. & St. Paul Ry. Co., v. Coogan, 46 Sup. Ct. 564.

(uu) On writ of certiorari to review judgment of state court in action under federal Employers' Liability Act (Comp. St. §§ 8657-8665), Supreme Court will examine record, and, if it finds evidence insufficient as a matter of law to sustain findings of carrier's negligence, will reverse judgment against it. Chicago, M. & St. P. Ry. Co. v. Coogan, 46 Sup. Ct. 564.

(vv) Federal Employers' Liability Act (Comp. St. §§ 8657-8665) supersedes state laws affecting employers' liability to employees in interstate transportation by rail. Chicago, M. & St. Paul Ry. Co., v. Coogan, 46 Sup. Ct. 564.

(ww) Employer is liable for injury or death resulting in whole or in part from negligence specified in federal Employers' Liability Act (Comp. St. §§ 8657-8665). Chicago, M. & St. P. Ry. Co., v. Coogan, 46 Sup. Ct. 564.

I. CONTROL AND REGULATION.

See Control and Regulation.

§1. In General.

(a) Holding oil in tanks located on pipe lines extending from oil fields to refinery in another state, some of which remained in storage for several months in tanks which were of greater capacity than required for continuous operation of pipe lines, and at all times contained large quantity of oil, HELD to break continuity of interstate journey, and subject oil to local taxation. Gulf Refining Co., of Louisiana v. Phillips, Tax Collector, 11 Fed. (2d) 967. Same v. Sandlin, Tax Collector, 11 Fed. (2d) 967.

(b) Pipe line company, purchasing oil from lessee, HELD charged with notice of lessor's reserved title to one-eighth of oil and liable for conversion thereof, notwithstanding division order which was confined to part only of the land leased. Shreveport-el Dorado Pipe Line Co., Inc., v. Bennett, (Ark. 1927) 290 S. W. 929.

(c) Special assessment on pipe line, used in interstate commerce, as real property, for construction of drainage and highway districts, HELD not tax which is forbidden by interstate commerce clause of the United States Constitution (article 1 § 8). Standard Pipe Line Co., v. Index-Sulphur Drainage Dist. (Ark., 1927) 293 S. W. 1031.

(d) Assessment against pipe line for road and bridge improvement is not unlawful burden on common carrier for hire in interstate commerce, but is general improvement tax, which may be levied against all real property of corporation having situs within state, irrespective of use, so long as it is all treated alike. Miller County Highway & Bridge Dist. v. Standard Pipe Line Co., Inc., 19 Fed. (2d) 3.

II. AS COMMON CARRIER.

See Common Carrier.

§3. In General.

(a) Shipments of crude oil from certain Kentucky points to Owensboro, Ky., moved from latter point by pipe line to Lawrenceville, Ill. Upon contention that the pipe-line company was not a common carrier but a plant facility and that shipments were local to Owensboro and movement beyond constituted a reshipment, HELD: Owensboro was never considered as the destination for any shipments. There were no storage facilities or refineries at that point, the oil passed from carrier's possession to the pipe line as a matter of necessity, and none was sold locally. Circumstances of movement, therefore, imparted an interstate character to shipments. Indian Refining Co. v. L. & N. 126 I. C. C. 543, 544.

IV. RATES AND CHARGES.

See Reasonableness of Rates.

§6. In General.

(a) Local rate on crude petroleum oil from certain Kentucky points to Owensboro, Ky., for movement by pipe line to Lawrenceville, Ill., FOUND not unreasonable, unduly prejudicial, or otherwise unlawful, as compared with local rates contemporaneously in effect from same and various other points to Evansville, Ind., and Louisville, Ky.; or with proportional rates to Evansville and Louisville, and to Jeffersonville and New Albany, Ind., more distant points. If proportional rates had been established to Owensboro for application in connection with the pipe line, no reason appears why they should have been higher than those to Louisville and Evansville. However, local rates assessed appear not to have exceeded maximum reasonable rates for service performed. Indian Refining Co. v. L. & N. R. R. 126 I. C. C. 543.

POOLING OF TRAFFIC

(a) Application of Northern Pacific and Minneapolis, St. Paul & Sault Ste. Marie railways, under section 5 of the act, for authority to establish a joint passenger-train service between Minneapolis and St. Paul, Minn., and Duluth, Minn., and Superior, Wis., and to divide earnings therefrom, approved. Proposed arrangement found to be in interest of economy of operation, not to unduly restrain competition, and to be upon just and reasonable terms and conditions. Joint Passenger Train Service, 107 I. C. C. 493.

(b) Where law of a State prohibits pooling of revenues by competing rail carriers, and only a small portion of such revenues proposed to be pooled is from intrastate traffic, commission has jurisdiction in the matter under section 5 of the act, paragraph (1) of which gives it authority to enter orders approving certain pooling arrangements, and paragraph (8) of which provides that carriers so affected shall be relieved of all

restraints or prohibitions by law, State or Federal, in so far as may be necessary to enable them to do anything authorized or required by such orders. Joint Passenger Train Service, 107 I. C. C. 493, 495.

(c) Eastern car pool, under which coal cars were pooled with object of attaining maximum efficiency, was created by carriers and during Federal control was operated under direction of the car-service section of the U. S. Railroad Administration. Its function was to distribute cars between operating units so that all shippers in each unit might be equitably served. Northern W. Va. Coal Asso. v. P. R. R., 109 I. C. C. 604, 607.

PORT DIFFERENTIALS

See Import Traffic §2 (3o).

(a) Rates on cottonseed and vegetable cake and meal from points in Texas to Galveston, for export, differentially higher than rates on same commodities to Houston and other Gulf ports, found not unduly prejudicial to Galveston or unduly preferential of Houston and such other ports in their relation to distance scale of rates prescribed in Oklahoma case, 98 I. C. C. 183. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114.

(b) Port Differentials: Contention that since carriers have equalized rates to Gulf ports on cotton fabrics, bagging and ties, soap, and other commodities, they should be required to do so as to cottonseed cake and meal, not sustained. No competition was shown between commodities instanced and cottonseed cake and meal, undue prejudice alleged being against one port to advantage of another in rates on same commodities, i. e., cake and meal, which issue does not include undue prejudice as between various commodities. Galveston Commercial Asso. v. A. & S., 109 I. C. C. 114, 121.

(c) Upon further hearing in 95 I. C. C. 539, all rail-rates on grain and products from Illinois, Wisconsin, Minnesota, the Dakotas, Montana, Iowa, Nebraska, Kansas, Arkansas, and Oklahoma, to Boston and New York, for export, FOUND not unreasonable or otherwise unlawful as compared with lower contemporaneous rates to Philadelphia and Baltimore. Complainants agree with all other parties that present method of constructing rates from western points to Atlantic ports is best that has been devised. Moreover, as larger portion of export grain now moves through Philadelphia and Baltimore, to require carriers to establish equal reshipping rates from primary markets on grain originating in Northwestern States, in accordance with recommendation in former report, would undoubtedly complicate the grain-rate structure, and might create some difficulties in handling grain at primary markets. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R. 126 I. C. C. 199.

(d) Upon further hearing in 95 I. C. C. 539, carriers attempt to justify ex-lake differentials on grain and products from Buffalo to New York and Boston for export, over those to Baltimore and Philadelphia, contending that most ex-lake grain comes from c. f. a. territory; that there are all-rail routes through Buffalo reflecting the full differential, and that mere substitution of lake for rail movement should not deprive Baltimore and Philadelphia of their differentials. HELD: Record indicates that most ex-lake grain is not domestic but Canadian, and the differential adjustment of ex-lake grain rates to north Atlantic ports is an exception to general rule with respect to export rates from Buffalo, since both export class and commodity traffic moves therefrom to Boston, New York, Philadelphia, and Baltimore on identical rates. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 208, 211.

(e) Proposal to add a differential to the intrastate rate at Mobile, Ala., in order to place that port on a parity with Gulfport, Miss., and New Orleans, found justified. Similar differential was adopted at Gulfport in favor of Alabama, the same as prescribed at New Orleans, in order to preserve this rate parity on coal from Illinois-Kentucky mines, and on this long-haul traffic for substantially equal distances, it is believed the parity of these ports should be maintained. Coal from Illinois, Kentucky, and Alabama, 128 I. C. C. 113, 120.

(f) Rates on petroleum and products in export and coastwise movement from southern Kansas, Oklahoma, and Texas to Galveston and other Texas ports taking same rates, and on grain and products from southern Kansas, same as to New Orleans and other Louisiana ports, found not unduly prejudicial, but like rates on various other commodities found unduly prejudicial to Texas ports,

with certain exceptions. While parity of rates results in substantially greater service for same rate to Louisiana ports than to Texas ports between interior points from which the short-line distance to New Orleans exceeds that to Galveston by more than 25 per cent, it does not result in substantial injury except as designated. Findings in original report reversed in some respects and modified in others, and nonprejudicial basis of rates prescribed for future. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349.

(g) The principal issue is one of prejudice against the Texas ports and preference of Louisiana ports on some 14 commodities or commodity descriptions moving export, import, or coastwise through the Gulf ports, from or to interior points in southern Kansas, Oklahoma, Texas, Arkansas and Louisiana. Original report, Galveston Commercial Asso. v. G. H. & S. A. Ry., 100 I. C. C. 110. The Texas ports, with unimportant exceptions, have long enjoyed the same rates from and to points in Texas on and north of the T. & P., referred to as northern Texas, Oklahoma and southern Kansas, hereinafter referred to as the affected territory, on foreign and coast wise traffic moving in substantial volume through two or more of those ports. This is also true of the Louisiana ports. The difference in distance to any two of the Texas ports or to any two of the Louisiana ports is in no instance greater than 100 miles. The present equalization as between the Texas ports or as between the Louisiana ports is not here in issue, and in considering the relative conditions at these ports the two sets of ports will be considered together, so far as possible, unless otherwise indicated. The fact must not be lost sight of, however, that Galveston is the principal complainant and New Orleans the principal protesting intervener, so that the relative conditions affecting these two ports with respect to the traffic herein concerned merit particular attention. From southern Kansas to New Orelans 898 miles, to Galveston 755 miles, difference 143 miles; excluding points in equalized territory, 930 and 768 miles, respectively, difference 162 miles. From Oklahoma to New Orleans 691 miles, to Galveston 545 miles, difference 146 miles; excluding points in equalized territory, 720 and 546 miles, respectively, difference 174 miles. From northern Texas to New Orleans 644 miles, to Galveston 444 miles, difference 200 miles; excluding points in equalized territory, 670 and 457 miles, difference 213 miles. The foregoing differences in distance are reasonably accurate for all commodities moving export, import or coastwise, with the exception of petroleum and petroleum products, and if the differences were determined from the same origin points to all the Texas ports through which there is a movement of general cargo, on the one hand, and New Orleans on the other, the average differences would vary little from those given. Summarized, generally speaking, except on coastwise shipments, New Orleans as a port has held its own in percentage of increase in total tonnage handled as compared with all the Texas ports combined; that the progress of New Orleans has been substantially greater than that of Galveston, particularly in commodities moving in steady volume; that while a substantial portion of the difference between the percentages of increase at New Orleans and Galveston is attributable to the faster progress made by other Texas ports, particularly Houston, a large part of that difference is traceable to the more rapid increase in tonnage during the same period enjoyed by New Orleans. The total tonnage of the Texas ports, particularly the Sabine Pass ports, is swollen by the large volume of petroleum and products which they handle. The tonnage handled at New Orleans is distinguished by its diversification and the fact that it is less seasonal in character than that of the Texas ports. The evidence bearing upon the facilities at the various ports indicates that at the Lousiana and Texas ports the facilities are adequate to handle without serious difficulty the peak movements which are now offering and would be likely to offer through any of those ports under the present adjustment of rates, with the single exception of grain. It leaves no doubt also that with the same exception, no serious congestion or delay would be likely to result at any of the Texas ports if the differentials prescribed in the original report were to become effective. With respect to the handling facilities for export grain at the Texas ports particularly Galveston, the record indicates that the establishment of differentials from all points in differential territory

as defined in the original report would threaten serious congestion, especially at the port of Galveston during a substantial portion of the annual period of normal export movement. Congestion at the port and consequent embargo usually entail great losses because of deterioration of the grain enroute, tying up of railroad equipment, cancellation of old and the making of new contracts, diversions and accrued demurrage; and these losses are suffered, not by the port interests, but by interior shippers whose contracts call for delivery at the coastal elevators. Nothing can be found upon this record which would indicate that the establishment of differentials would be detrimental in any substantial degree to any of the steamship lines serving any of the Gulf ports, or to the barge lines operating on the Mississippi and Missouri rivers. While the tonnage of the federal barge line operating on the Mississippi river is an important factor in the total foreign and coastwise movement through New Orleans, a very small portion of its tonnage originates at or is destined to points in differential territory. The testimony leaves little doubt that the differential prescribed in the original report, or even smaller differentials on most of the commodities, would in time divert to the Texas ports a substantial portion of most of the commodities having origin or destination in the affected territory that are now moving through New Orleans. On several of the commodities, however, green coffee for instance, the movement that would be diverted from New Orleans would probably be small. The establishment of differentials would seem more certain to divert from New Orleans practically all of the movement of grain and grain products and petroleum and products originating in differential territory than of any of the other commodites. Several interveners take the position that no matter what differentials may be prescribed against New Orleans on certain commodities, Galveston never was and never will be a port of any consequence as to those commodities. But Galveston is entitled to a fair opportunity to secure foreign and coastwise traffic on such commodities, and the Commission is certainly not justified in predicting a failure on the part of Galveston to take advantage of such opportunity. Still less would it be justified in using such a forecast as a reason for withholding what it would otherwise accord. A port is neither the destination nor the origin of traffic passing through it. It levies toll on the traffic, in substantially the same manner as do common carriers, in its charges for use of its facilities in the transfer of traffic between the rail and water carriers. Healthy competition is no less important between ports than between rail and water carriers. There is, however, a limit beyond which the disregard by rail carriers of the geographical advantages of one port in favor of another will impair rather than promote healthy competition between the ports. There is much ground for believing that a policy of port equalization, if carried beyond reasonable limits, has the effect of strengthening unduly, at the expense of others, those ports which by reason of natural or acquired advantages have attained commanding positions in the export and import trade. Such a policy also encourages waste in rail transportation. HELD, the Texas & Pacific is an independently operated carrier and is not to be regarded as a part of the Missouri Pacific system. Since the T. & P, therefore, does not serve any Texas port, and has no controling voice in fixing the level of the assailed rates to any of the Texas ports it can not be held guilty of undue preference or prejudice under the circumstances in this case. This is also true of the Louisiana Railway & Navigation system. What has just been said, of course applies only to traffic originating at, or destined to, points on the lines of those two carriers. There is a clear distinction between a situation under the fourth section, under which differences in distance over direct and circuitous routes are in effect disregarded, and a situation like this one. Where a circuitous route is permitted to meet a short line rate, the latter rate exists in any event over the short route, and no locality or shipper is deprived of the benefit of location if longer routes are permitted to meet this competition and share in the traffic. Here the Commission has quite a different question, namely, whether carriers which are responsible for the rates between common destinations or origin points and these rival ports can lawfully, under section 3, discriminate between the ports by giving materially more service for the same charge to one than they give to another. If the parity in rates would in any event continue to exist by reason

of the independent action of a carrier or carrier serving only one of the ports and responsible only for its rates, there would be the same justification for permitting the carriers which serve both New Orleans and one or more of the Texas ports to meet this competition as exists where the Commission permits circuitous routes to meet short line rates between the same points. This the Commission finds to be the situation as to points directly served by the T. & P. and the L. R. & N. system. The Commission can not concede to the view that distance is not one of the most important factors which should be considered in determining whether or not port adjustments are unlawful. However, it is by no means the only factor. HELD, the present parity of rates as between the Texas and Louisiana ports results in substantially greater service for the same rate to the Louisiana ports than to the Texas ports from and to interior points from which the short line distance to New Orleans exceeds that to Galveston by more than approximately 25%; that this parity of rates does not result in substantial injury to the Texas ports in respect of petroleum and its products, but does result in substantial injury to and prejudice against the Texas ports in respect of the other commodities considered, except on grain and grain products from points in southern Kansas north of the Rock Island, from the Kansas Oklahoma state line through Liberal to Hutchinson, Kas; HELD, in 12798 that the present relationships of the assailed carload rates on export, import and coastwise traffic in the commodities enumerated in the findings on page 123 of the original report. excepting petroleum and its products, rosin from Texas points, green coffee to points other than Texas, and grain and grain products from points in southern Kansas as hereinbefore defined, north of the line of the Rock Island from the Kansas Oklahoma state line through Liberal to Hutchinson and west of the M. P. from Hutchinson through Sterling and Lyons to Kanapolis, from or to points in southwestern Louisiana, as hereinbefore defined, Arkansas, Texas, excepting points on the T. & P. and L. R. & N. system. Oklahoma, and southern Kansas, and in bagging, cotton bale ties, and buckles to points to Oklahoma, are, and for the future will be, unduly prejudicial to Galveston and the other Texas ports taking the same rates and unduly preferential of New Orleans. HELD, further, this undue prejudice should be removed by establishing, from or to interior points from which the short line distances to New Orleans do not exceed those to Galveston by more than about 25%, rates to or from Galveston and the other Texas ports taking the same rates, as the case may be, which do not exceed the rates on the same commodities to or from New Orleans; and by establishing, from or to interior points from which the short line distances to New Orleans exceed those to Galveston by more than approximately 25%, rates to or from Galveston and the other Texas ports taking the same rates, as the case may be, which do not exceed rates which are less than the rates on the same commodities to or from New Orleans by certain differentials. SUSPENDED SCHEDULES. On bagging (cotton bale covering), cotton bale ties, and buckles, differentials are prescribed herein only to southwestern Louisiana, Texas and Oklahoma. The Commission expects respondents to publish import and coastwise rates on these commodities from New Orleans and Texas ports, and which will conform to fourth section requirments. HELD, suspended schedules not justified without prejudice to the filing of new schedules in conformity with foregoing conclusions. THE ISSUES [N 17850. Complainant alleged that rates on petroleum and its products in export and coastwise movement from refining points in north Central Texas to New Orleans and Galveston and points taking the same rates as unreasonable, and to Louisiana ports are unduly prejudicial because higher for like distances than are the rates from refining points in southern Arkansas, northern Louisiana and southern Texas to the same ports; and the refusal of defendants to permit blending in transit of petroleum products at interior Texas refining points while permitting such blending in transit at refineries located at Texas and Louisiana ports is unduly prejudicial to the former. Rate attacked is 20.5c. Under the present extensively grouped and highly competitive adjustment, both in the interior and at the ports, a reduction in the rate from any one important group should be made with caution and only for the strongest reason. There is a clear distinction between the circumstances under which this blending provision applies at the ports and the circumstances under which it would apply

at interior refining points. While the rule is designated as a blending in transit provision and is applicable to shipments in transit to an export or coastwise destination, the shipments upon which it applies has in fact reached its destination, so far as the rail carrier is concerned, upon its delivery to the coastal refiner for unloading into his storage tank. The blending rule is necessary in order to insure protection of the export or coastwise rate, and the protection of that rate appears to be proper because the carrier performs no greater service in delivering to the storage tank than it does on like shipments delivered direct to the vessel. At the interior refining point, however, transit arrangements such as those at the port would involve two separate and distinct movements, and no necessity therefore such as that pointed out at the ports exists at the interior points. No transit service of any kind is now permitted at interior points on export, coastwise or domestic petroleum or its products, and no such arrangements are in effect on domestic shipments at the ports. It is apparent that under the present extensive grouping of shipping points transit arrangements such as those here sought at interior points would have the effect in most instances of requiring the carriers to perform the inbound haul without charge; and if such arrangements were established at refining points in north central Texas similar provisions would have to be established throughout the entire southwestern refining territory. HELD, attacked rate not unreasonable or unduly prejudicial, and that the attacked provision for blending in transit at Gulf ports is not unduly prejudicial. Galveston Commercial Asso. v. G. H. & S. A. Ry., 128 I. C. C. 349.

(h) Upon contention that no matter what differentials may be prescribed against New Orleans on certain commodities, Galveston never was and never will be a port of any consequence as to those commodities, FOUND: Galveston is entitled to a fair opportunity to secure foreign and coastwise traffic in such commodities, and commission is not justified in predicting a failure on part of Galveston to take advantage of such opportunity, still less use such a forecast as a reason for withholding what would otherwise be accorded. Galveston Commercial Asso. v. G. H. & S. A., 128 I. C. C. 349, 368.

(i) Upon contention that since differentials of New Orleans and other Gulf ports and south Atlantic ports under New York and other north Atlantic ports are now in effect on all European and African import traffic destined to points north of Ohio River, in order to follow Gulf ports to compete on a fair basis because of superior steamship service at north Atlantic ports, differentials at Texas ports under New Orleans are justified for same reason, FOUND: While such commercial advantages can not be determinative of rate relationships and ordinarily can not be taken into consideration when passing upon question of undue prejudice, they serve to show that advantages of New Orleans are superior to those of Texas ports and that differentials mentioned would not likely cause serious injury to New Orleans. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 368.

(j) Healthy competition is no less important between ports than between rail or water carriers. There is, however, a limit beyond which disregard by rail carriers of geographical advantages of one port in favor of another will impair rather than promote healthy competition between the ports. There is ground for believing that a policy of port equalization, if carried beyond reasonable limits, has the effect of strengthening unduly, at expense of others, those ports which by reason of natural or acquired advantages have attained commanding positions in export and import trade. Such a policy also encourages waste in rail transportation. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 369.

(k) Contention that establishment of differentials against New Orleans and in favor of Texas ports would violate both the letter and spirit of the Constitutional prohibition against preference by any regulaton of commerce to the ports of one State over another not sustained, following 209 U. S. 56, and 95 I. C. C. 539. Galveston Commercial Asso. v. G. H. & S. A., 128 I. C. C. 349, 378.

(l) Upon contention of carrier that rail rates on export and coastwise traffic are in essence proportional rates, constituting merely factors of aggre-

gate through rates between interior points and foreign or coastwise destinations beyond, and that in determining matter of port equalization consideration should be given to both water and rail factors entering into these aggregates, FOUND: Similar contention advanced in 73 I. C. C. 384 was found without merit. Equalization of port rates on basis advocated would require consideration, in every instance of port relationship, of water rates not on file with commission and over which, except on coastwise traffic under certain circumstances, it has no jurisdiction. This does not mean, however, that because a port is not the origin or destination of traffic passing through it, such port is not entitled to consideration in countenancing greater disregard of distance in import, export, or coastwise rates than in corresponding domestic rates. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 379, 380.

(m) Suspended schedules filed in purported compliance with findings in original report 100 I. C. C. 110, wherein relationships between rates on certain commodities in export, import and coastwise movement from points in Kansas, Oklahoma, and Texas to Galveston and New Orleans and ports taking same rates, were found unduly prejudicial and ordered removed by establishment of differentials prescribed, found not justified, without prejudice to filing of new schedules conforming with findings herein. Galveston Commercial Asso. v. G., H. & S. A., 128 I. C. C. 349, 392, 393.

(n) Proposed import rates on iron and steel articles from Texas Gulf ports to St. Louis, Mo., and Little Rock and Pine Bluff, Ark., based on distance scale prescribed in 77 I. C. C. 473, in purported compliance with 115 I. C. C. 373; 118 I. C. C. 482, found not justified. While Houston objects to present equalization of Texas ports on ground that distances to various destinations are less from that port than from Galveston, thus depriving it of its natural advantage of location, two ports named are and have been equalized as to import and export rates on various traffic; ocean rates are same to both ports; and no justifications appears for disturbance of existing parity of rail rates on import traffic. See 101 I. C. C. 116. Import Iron and Steel Articles, 129 I. C. C. 350, 355, 356.

PORT HANDLING CHARGES

(a) Contention that port handling charges are in violation of section 1 of the act, in that carriers did not give affected shipping and receiving public an opportunity to understand effect of increased charges before arriving at a definite agreement, not sustained. While some public hearings were held prior to filing of proposed changes, failure to inform intervener of contemplated action or the effect of changes does not constitute such a violation. Philadelphia Commercial Traffic Managers v. B. & O., 104 I. C. C. 173, 177.

PORT-TO-PORT RATES

See Barge Lines; Coastwise Traffic.

(a) Upon application of certain independent short lines in southern territory for authority to continue to charge lower rates on lumber and other forest products to trunk-line and New England territories from junction points with trunk-line connections than from intermediate points on their lines, relief sought being based solely on ground of water competition. FOUND: Considering the great difference between all-rail and water rates from south Atlantic ports to eastern port cities, and small volume of movement via eastern ports to interior destinations, the continued maintenance of lower rates from these ports than from intermediate points would divert or retain little if any, traffic to rail carriers. Fourth section relief denied and original report, 85 I. C. C. 270, affirmed. North Carolina Pine Asso. v. A. C. L., 107 I. C. C. 190, 192, 193.

(b) Cost of transportation per mile by water is comparatively high for short distances and very small for long distances. See 24 I. C. C. 570. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

(c) Port-to-port rates, even when including terminal services at ports, are not subject to the act, except as provided in section 5 (11). Consolidated Southwestern Cases, 123 I. C. C. 203, 376.

PORTO RICO

See Adjacent Foreign Country; Through Routes and Joint Rates.

(a) In 37 I. C. C. 470, 472; 224 U. S. 547; and 227 U. S. 145 Porto Rico was declared to be an organized territory

appurtenant to, but not incorporated in, the United States. However, after the cases were decided, Congress in an act to provide a civil government for Porto Rico declared that 'The interstate commerce act and amendments thereto, * * * shall not apply to Porto Rico." Fernandez & Co. v. S. P., 104 I. C. C. 193, 194.

I. PRACTICE.

§1. In General.

See Reasonableness of Rates §1½.

(a) Case presented in accordance with modified procedure under which parties submitted in writing facts and arguments upon which they rely, oral hearing being had only with respect to such matters as were not agreed to or which were agreed to in part, parties arguing case before examiner at conclusion of taking of testimony which was not briefed. Union Bag & Paper Corp. v. B. & M., 104 I. C. C. 327.

(b) Upon contention of defendant that since summer excursion fares to Boulder, Colo., which complainant claims were unduly prejudicial and preferential, expired, any decision would be of a moot question. HELD: Complainant's prayer is for future relief and the jurisdiction of commission is ample to provide such relief. See also 52 I. C. C. 255. Boulder Chamber of Commerce v. A., T. &. S. F., 107 I. C. C. 49, 52.

(c) Complaint filed on behalf of receiver of complainant firm. Upon objection to testimony of witnesses, on the ground that they were not authorized to represent receiver, HELD: Such authorization is unnecessary. Columbia Steel Co. v. B. & O., 109 I. C. C. 46, 50.

(d) Where a carrier introduces evidence entirely beyond scope of a proceeding in an endeavor to establish that certain statements in a report of the commission were incorrect, such evidence can not be considered where objected to by complainant. Northern W. Va. Coal Asso. v. P. R. R., 109 I. C. C. 604, 608.

(e) Section 8 provides that whenever a common carrier does any matter, act, or thing in the act required to be done or prohibited or declared to be unlawful, such common carrier shall be liable for the full amount of damages sustained in consequence of any such violation. In section 9 it is provided that any person claiming to be damaged may make complaint to the commission or may sue for the recovery of damages in any district or circuit court of the United States. The terms of the above section plainly permit the aggrieved person to select the commission as the forum in which his complaint is to be heard and establishes the right of the Commission to award damages for the violations complained of. Standard Oil Co. v. A. C. L. R. R., 115 I. C. C. 239, 241.

(f) Complaint alleging overcharges because of failure of carriers to make dunnage allowance on lumber shipments as provided in the tariff, dismissed for lack of sufficient proof. Evidence failed to show that allowance was not made on any specific shipment or that stakes or braces were used on all shipments. While carrier's records show that in a few instances allowance was made, they do not show whether it should have been allowed in instances where it was not. As the case has stood submitted for more than five years and record is still deficient, no sufficient reason appears for holding it open on the docket for a longer period. Parry & Co. v. B. M. Ry., 118 I. C. C. 193.

(g) Piecemeal revision of rates is not desirable except in unusual circumstances. Horses and Mules from Chicago, 120 I. C. C. 607, 610.

(h) The obvious purpose of Rule III (s) of the Rules of Practice is the prevention of piecemeal litigation. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723, 728.

(i) Upon contention that commission has no power to reopen an I. & S. proceeding where its order requiring the cancellation of a proposed schedule is a final order; that when such order is complied with "nothing remains for consideration," and nothing "which is the subject of a lawful order" can be before commission, HELD: The commission's authority to reopen a case is not affected by whether or not an order was entered in connection with the decision. See 39 I. C. C. 523, 535. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(j) Upon contention that in an I. & S. proceeding the only issue before commission is as to lawfulness of suspended schedules which commission is called upon either to condemn or approve; that commission has no authority to approve a basis intermediate between the existing rates and basis sought to be made effective; and that where the proposed schedules are disapproved, a finding that present rates are too low is "irrelevant," "gratuitous," and "not binding on anyone," HELD: This contention is wholly untenable and in conflict with numerous decisions of the commission and with specific provisions of the act. See Section 15 (7) of the act; 20 I. C. C. 307, 314, and other cited cases. Lignite Coal from North Dakota., 126 I. C. C. 243, 245.

(k) As a prerequisite to the commission's approval of rates under section 1 of the act it is only necessary for carriers to show, as it is in all suspension proceedings where the commission approves rate changes, that the rates are within the limits of reasonableness, i. e., not more than reasonable maxima nor less than reasonable minima. Federated Metals Corp. v. C. R. R. Co., of N. J., 126 I. C. C. 703, 709.

§1a. Joint State Hearings.

(a) Contention that commission has no jurisdiction to require carriers to in-

crease intrastate rates in order to remove alleged undue prejudice where complainants do not specifically allege a violation of section 13 of the act, not sustained where complaints sufficiently set forth facts putting both defendant carriers and State authorities, as required by the act, upon notice that maintenance of lower intrastate rate as compared with interstate rate is challenged, and where State authorities are also notified of hearings. Four States Grocery Co. v. K. C. S. Ry., 107 I. C. C. 485, 489.

(b) Complainant attacking interstate rates heard jointly with similar complaint assailing intrastate rates filed with state public utilities commission, a member of state commission sitting with the Interstate Commerce Commission in argument. Ohio Farm Bureau Federation v. A. & W., 120 I. C. C. 361.

II. COMPLAINT.

See Allowances §8 (2¼) (a); Blanket Rates §15; Claims §7; Discrimination §18; Long and Short Hauls §11; Reparation §21; Switch Tracks and Switching IV; Through Routes and Joint Rates § 13a (a).

§2. Form and Issues Tendered.

(a) Where formal complaint brings in issue claims on additional shipments, not covered by informal complaint previously filed, such additional claims are barred unless presented within statutory period. Werner v. Director General, 107 I. C. C. 363, 364.

(b) In an issue, provable by a preponderance of evidence, as between two parties, one of whom alleges an affirmative which it establishes by the best obtainable evidence, other of whom introduces no evidence but rests its case solely upon alleged insufficiency of its adversary's showing, the doubt, if there be a doubt, must be resolved in favor of the former. Wertheim Coal & Coke Co. v. L. V., 112 I. C. C. 513, 518.

(c) Objection to the receiving of evidence tending to prove damages on shipments originating at points located on rails of carriers not named as defendants in complaint, sustained, the language of complaint not being sufficiently broad to cover shipments originating on those lines. South Carolina Cotton Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 685.

(d) A complaint which merely alleges that rate charged on a shipment was in excess of rate applicable does not involve an issue of misrouting, and unless an allegation with respect to the latter is brought in issue within statutory period of limitation provided by the act, it can not be considered. See also 87 I. C. C. 130. Armour & Co. v. Director General, 113 I. C. C. 1.

(e) Complaint alleged straight overcharges under section 6 of the act. Upon motion of one defendant carrier asking that commission determine the proper rates and divisions thereof to be applied as between the several defendants on each of the shipments involved, HELD: Motion denied since it seeks to broaden the issues. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597, 598.

(f) An allegation of overcharges does not embrace an issue of misrouting damages for the latter not being "overcharges above the legal tariff charges." See also 87 I. C. C. 130. Tidal Osage Oil Co. v. Director General, 115 I. C. C. 237, 238.

(g) Complaint which did not specifically allege a violation of section 6 of the act, but stated that rates were "unreasonable and otherwise unlawful" and that complainant paid and bore "illegal excess charges" over and above those which were "just, proper, and reasonable," held sufficient to cover overcharges. Crerar Clinch Coal Co. v. A. A. R. R., 118 I. C. C. 171, 172.

(h) Failure of complaint to allege a violation of section 6, or that charges were inapplicable, does not affect jurisdiction of commission to determine applicable charges. See 102 I. C. C. 355, 357. Western Bridge & Construction Co. v. St. L.-S. F., 118 I. C. C. 607.

(i) Upon further hearing, finding in former report, 88 I. C. C. 747, that rates on roofing and paving material from St. Louis and Kansas City, Mo., Cleveland and Lockland, Ohio, and Chicago, Aurora, Madison, Marseilles, and East St. Louis, Ill., to Little Rock, Ark., were not unreasonable or otherwise unlawful, affirmed. Complainants point out that reparation has been awarded on commission's special docket covering claims on similar shipments. However, such awards were based upon admission of carriers that rates charged were unreasonable. There is no such admission in this case, record is more complete and fails to establish that rates charged were

unreasonable. Cooperative Oil & Paint Co. v. Director General, 122 I. C. C. 227.

(j) Informal complaint seasonably filed alleged only overcharges. Formal complaint filed more than two years after delivery or tender of delivery of shipments contained additional allegations of unreasonableness and prejudice. HELD: Aside from claim of overcharge, formal complaint is barred. See 115 I. C. C. 105. North Ontario Packing Co. v. O. W. R. R. & Nav. Co., 122 I. C. C. 360, 364, 365.

(k) Complaint alleged that rates were unreasonable and unjustly discriminatory. Evidence at first hearing disclosed that the gist of the complaint was that such rates were "unjustly discriminatory." Testimony, however, gave color to the thought expressed in complainant's petition for rehearing that an allegation of undue prejudice under section 3, rather than one unjust discrimination under section 2, was intended, such petition seeking also to present further evidence upon allegation of unreasonableness under section 1. Upon contention of carriers that, inasmuch as complainant alleges unreasonableness, the case in reality concerns only this issue, and as this was the only matter which complainant attempted to prove at the original hearing, it should have been held to this particular kind of proof at the further hearing, HELD: Such contention is not sound, since allegations of complaint are broad enough to cover both sections 1 and 3 of the act. Farrell Foundry & Machine Co. v. A., B. & A., 123 I. C. C. 127, 128.

(l) The commission is without authority to pass upon lawfulness of intrastate rates where the only issues raised in complaint are violations of sections 1, 2, and 3 of the act. Chicago Fire Brick Co. v. C. & N. W., 123 I. C. C. 164.

(m) Complainants have a right to limit the issues in their complaint but such limitation does not preclude the Commission from considering the rates from, to, and through adjacent territories or over routes of carriers not parties defendant but shown of record, particularly if it appears, as it does not here, that such carriers operate the rate making routes. Southwestern Millers League v. A. T. & S. F. Ry., 126 I. C. C. 23, 30.

(no) Commission's finding in former report 118 I. C. C. 85, were confined to rates on compressed cotton. However, except that uncompressed cotton is compressed by and at expense of carriers, circumstances surrounding its movement and that of compressed cotton are identical. Accordingly original report modified and rates on uncompressed cotton moving rail-water-and-rail from Opelousas and Bunkie, La., to destinations in New England and New York, FOUND unreasonable to extent they exceeded rates contemporaneously maintained from Shreveport and Alexandria, La., to same destinations. Reparation awarded. Manget Bros. Co. v. A. C. R. R. 126 I. C. C. 403.

(p) Complaint did not specifically ask for reparation on shipment moving subsequent to filing of complaint but did allege that rates "were and are unjust and unreasonable," and prayed for reasonable rates for future and for "reparation for unlawful charges hereinbefore alleged, such sum as in view of evidence to be adduced herein the commission shall determine that complainants are entitled to." At time of original hearing, complainants had uncut timber and were operating their mill. It would be doing less of violence to consider that shipments made during pendency of this proceeding are within scope of pleadings than to assume that complainants did not intend to ask for full relief, or to deny them that relief for want of use of particular words. Moreover, carrier has not been misled to its disadvantage and an award of reparation under circumstances would be in accord with similar finding in 21 I. C. C. 45. Reparation awarded. Burns & Knapp v. B. S. & K. R., 126 I. C. C. 410, 411, 412.

(q) Carriers filed a motion to dismiss a complaint alleging undue prejudice upon ground that it failed to show when shipments moved, points of origin, routes, rates applied, or wherein provisions of the act were violated. HELD: Commission has repeatedly said that technical pleading is not necessary in complaints filed with it and the courts have sustained this position. Statements "that these rates were when exacted and still are unduly preferential or prejudicial in violation of Section 3," and "that they are unreasonable in and of themselves, unduly prejudicial to complainant, and unduly preferential of shippers at other points," are sufficient to place carriers upon notice to defend their rates. Motion

is therefore denied. Rogers-Wade Furniture Co. v. A., C. & Y., 126 I. C. C. 460, 461.

(r) It is not essential to specify by number or to use the specific words of the section of the act which is alleged to have been violated if from the context of the complaint it becomes apparent that defendants are apprised of the nature of the violation they are called upon to answer. Michigan Bean Co. v. D. G. H. & M. Ry., 128 I. C. C. 207, 209.

(s) Failure to allege violation of section 6 does not affect the jurisdiction of the Commission to determine the applicable charges. Michigan Bean Co. v. D. G. H. & M. Ry., 128 I. C. C. 207, 209.

(t) A shipper is entitled to a reasonable rate on his traffic and where he attacks the reasonableness of a rate, whether class or commodity, that issue must be decided on its merits. See 100 I. C. C. 411. Davies & Thomas Co. v. C. R. R. Co. of N. J., 128 I. C. C. 241, 242.

(u) Every shipper is entitled to a reasonable rate on his traffic and where he attacks the reasonableness of a rate, that issue must be decided upon its merits. Curtiss Aeroplane & Motor Co. v. P. R. R., 129 I. C. C. 174, 176.

§4. Amendment.

See Claims §5.

(a) Carrier serving alleged preferred points was not named as defendant; nor was it served with a copy of complaint, as required by the act, or represented at hearing. Trial examiner found to have been in error in allowing a motion by complainant to add such carrier as a party defendant. Louisville Cement Co. v. S. Ry., 104 I. C. C. 455, 456.

(b) Original complaint alleged a violation of section 6 of interstate commerce act and of section 10 of Federal control act. Amended complaint alleged a violation of section 1 of interstate commerce act, to which director general objected on ground that it stated a new cause of action which was barred. HELD: The words "just and reasonable" as used in the control act obviously bear a similar or closely analogous meaning to that attaching to their use in the interstate commerce act. See 51 I. C. C. 250, 258. Moreover, in 100 I. C. C. 223, 224 the commission said it is not essential to specify by number or to use specific words of sections of the act alleged to have been violated if from context of complaint it is apparent carriers are appraised of nature of violation they are called upon to answer. North Packing & Provision Co. v. Director General, 104 I. C. C. 607, 608.

(c) Complainant sought to amend its complaint so as to include shipments moving on and after March 1, 1920, referring to amendment to section 16 of the act, as approved June 7, 1924. However, on July 28, 1925, a conference ruling was adopted construing decisions of the Supreme Court as prohibiting awarding of reparation on claims barred by the statute prior to that amendment. Shipments sought to be included, not being covered by complaint seasonably filed; found barred. Great Northern Paper Co. v. B. & A., 113 I. C. C. 463, 466.

(d) Complaint alleged unreasonableness and undue prejudice. At the hearing complainant sought to amend complaint with allegation of violation of long-and-short-haul provision of section 4. Upon objection by carriers that such amendment unduly broadens issues presented, HELD: Allegation embraced in amendment is one manner of alleging prejudice and evidence thereon submitted is admissible in support of the issue raised under section 3 of the act. Anderson-Taylor Co. v. A., T. & S. F., 115 I. C. C. 313, 314.

(e) Where specific shipments are named in a complaint filed within statutory period, additional shipments may not be subsequently included unless presented within limitation period required by the act, and burden of proof to show that such shipments were seasonably filed is upon complainant. Duluth Boiler Works v. A., T. & S. F., 118 I. C. C. 161, 162.

(f) Complainant in its complaint erroneously referred to a shipment as moving from and to specified points, whereas in fact, it moved in reverse direction. Shipment was fully described by car number, initials, date of movement, and weight of contents. Amended complaint was offered at hearing to correct this error and was allowed by presiding examiner over objection of carriers. HELD: Under the circumstances, complaint as amended considered on its merits. Bender Iron & Supply Co. v. K. C. S., 118 I. C. C. 661, 662.

(g) Carrier sought dismissal of supplemental complaint on ground that reparation was not specifically prayed for in original complaint, citing rule III (s) of Rules of Practice which provides that reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding. HELD: This rule has no application where, as here, prayer for reparation is not a new complaint but an amendment of one already filed. See 96 I. C. C. 124. Hollingshead Co. v. Director General, 120 I. C. C. 55, 56.

(h) Claim for damages found barred by statute of limitations, supplemental complaint not having been filed within statutory period. See Rule III (u) of Rules of Practice. Hollingshead Co. v. Director General, 120 I. C. C. 55, 56.

(i) Original report, finding that rates "are and for the future will be unreasonable," was reopened upon petition of carriers. Thereafter complainants were permitted to amend their complaint with an allegation of damages. Report on further hearing reiterated the original finding and in addition awarded reparation. Upon contention that wording of commission's reports did not cover unreasonableness in past, HELD: While the word "were" was omitted from finding of unreasonableness in report awarding reparation, the question of past unreasonableness entered into the proceeding when amended complaint was filed. Evidence upon which original report, later affirmed, was made, being presented some months prior to beginning of reparation period, and second report making provision for proof in affidavit form as to shipments moving subsequent to date of second hearing, shows inconsistency of any attempts to construe the finding as operative only on and after date of decision in second report. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723.

(j) The obvious purpose of Rule III (s) of the Rules of Practice is the prevention of piecemeal litigation. Nelson Fuel Co. v. C. & O., 120 I. C. C. 723, 728.

(k) Complainant's statement of facts under shortened procedure sought reparation to a basis lower than that specified in its complaint, and because of such variance carriers declined to handle the case further under such procedure, and it was accordingly set for oral hearing. At the hearing complainant was granted leave to amend its complaint by asking for reparation to a lower basis, to which carriers objected on ground that they were unprepared to defend any rate lower than that specified in the complaint. HELD: That if any amendment was necessary carriers were not taken by surprise at the offer and their objection thereto was properly overruled. Luten Bridge Co. v. A. C. L., 123 I. C. C. 612.

§8. **Rehearing.**

(a) Upon further consideration, findings in previous report, 93 I. C. C. 85, that rates on crude oil from Irvine and Beattyville, Ky., to Blue Island, Ill., were unreasonable, corrected to include, as points of origin, all oil-producing points in eastern Kentucky. Both the complaint and evidence were broad enough to cover entire eastern Kentucky fields, and findings should not have been limited to Irvine and Beattyville. Reparation awarded. Barnett Oil & Gas Co. v. Director General, 122 I. C. C. 651.

(b) Contention that because no application for further hearing was made by any of the parties to the proceeding the commission is without power to reopen the case, not sustained. Statements requesting a further hearing were submitted by various parties to the proceeding, and, even if there had been no such request, commission has authority and has frequently reopened cases for further hearing on its own motion. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(c) Upon contention that commission has no power to reopen an I. & S. proceeding where its order requiring the cancellation of a proposed schedule is a final order; that when such order is complied with "nothing remains for consideration," and nothing "which is the subject of a lawful order" can be before commission, HELD: The commission's authority to reopen a case is not affected by whether or not an order was entered in connection with the decision. See 39 I. C. C. 523, 535. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(d) The rules of the Interstate Commerce Commission fixing no time for filing petition for rehearing after order denying reparation, a one-year limit on time within which to do so cannot be implied from Interstate Commerce Act, § 16 (Comp. St. 8584), providing that suit

on order granting reparation can only be brought within one year after entry of order, and order denying reparation is not irrevocable after one year, nor will delay of Commission in disposing of application for rehearing deprive it of jurisdiction. Louisville & N. R. Co. v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

(e) Upon further hearing, original report 95 I. C. C. 104, reversed in part, following 118 I. C. C. 725. Rates on scrap brass and copper from certain points in New York and New Jersey to East Liberty and Pittsburgh, Pa., found unreasonable with certain exceptions. Reparation awarded. Union Smelting & Refining Co. v. C. R. R. of N. J., 128 I. C. C. 129.

(f) Complainant alleged rates on nitrate of soda and certain allied commodities, in carloads, from New Orleans, La., and other Gulf ports to points on and north of the Ohio River were unreasonable. Original report, 126 I. C. C. 293. Santa Fe, Rock Island, M. P. and Frisco which operate west of the Mississippi river filed a petition in which they request that the order entered in these proceedings be modified so as to eliminate petitioners from the operation of its provisions. HELD, rates assailed as applied over the lines of the petitioning carriers not unreasonable or otherwise unlawful. Egyptian Powder Co. v. I. C. R. R., 132 I. C. C. 153.

(g) Upon reconsideration in former reports 88 I. C. C. 747 and 122 I. C. C. 227, restatement of two recitals therein, for purpose of accuracy, found not to affect or modify conclusions therein reached. Cooperative Oil & Paint Co. v. Director General, 129 I. C. C. 213.

III. MOTIONS.

§9a. In General.

(a) Complaint alleged straight overcharges under section 6 of the act. Upon motion of one defendant carrier asking that commission determine the proper rates and divisions thereof to be applied as between the several defendants on each of the shipments involved, HELD: Motion denied since it seeks to broaden the issues. Standard Oil Co. v. A., T. & S. F., 113 I. C. C. 597, 598.

(b) Carrier sought dismissal of supplemental complaint on ground that reparation was not specifically prayed for in original complaint, citing Rule III (s) of Rules of Practice which provides that reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding. HELD: This rule has no application where, as here, prayer for reparation is not a new complaint but an amendment of one already filed. See 96 I. C. C. 124. Hollingshead Co. v. Director General, 120 I. C. C. 55, 56.

§10. Dismissing Complaint.

(1). In General.

(a) By letter the commission requested complainant to supplement record by furnishing bills of lading in order to determine whether certain shipments were misrouted or whether, in absence of misrouting, a reasonable rate should be measured by service over route of actual movement or over a more direct route. No reply having been received to that letter, or a tracer, complainant was advised that unless bills of lading were made a part of record or good reason shown why they could not be submitted on or before a certain date, an order would be entered dismissing complaint for lack of prosecution. Complainant's failure to comply with request and furnish additional evidence found tantamount to an abandonment of its complaint and shipments covered thereby not further considered. Raleigh Chamber of Commerce v. N. S., 109 I. C. C. 52, 53.

(b) Motion to dismiss compiaint on ground that complainant did not maintain an office at destination point, denied. Whether complainant does or did maintain an office at destination point is immaterial. Holt Co. of Texas v. S. P. 128 I. C. C. 555.

(c) Complaint filed within statutory period but twice returned for correction was not resubmitted until almost five years after receipt of original complaint. Upon contention that complainant's failure to prosecute the claim amounts to abandonment thereof and complaint should therefore be dismissed under doctrine of laches. FOUND: Abandonment as recognized by the commission, occurs where a formal complaint is not filed within the six-months' period following notification to parties of termination of informal proceedings. Here, receipt of original complaint constituted a filing

thereof, although no complaint was docketed and served until almost five years thereafter. Circumstances of case do not warrant dismissal on grounds alleged. See 92 I. C. C. 63, 66. Peters Mill Co. v. Director General, 129 I. C. C. 331.

§10(3). Interveners.

See Discrimination §13½ (a); Interveners; Reparation §7 (a).

(a) Petitions of intervention filed subsequent to original complaint seek reparation on shipments made under rate alleged to be unreasonable in complaint. Contention that petitions of intervention should not be considered because they unduly broaden issues in that reparation is sought in intervening petitions but not in complaint, not sustained. See 28 I. C. C. 332, 335. Becker, Moore & Co. v. N. Y. C., 104 I. C. C. 11.

(b) Original petition in intervention did not seek reparation but amended petition included such claim. Date of filing of amended petition governs with respect to limitation period. Becker, Moore & Co. v. N. Y. C., 104 I. C. C. 11, 12, 15.

(c) Complainant, the consignor, filed intervening petition purporting to be on behalf of consignees who paid unreasonable freight charges. Consignor was not definitely authorized to file such petition, and did so without consulting consignees, stating that such authorization was not obtained because it guaranteed rates which consignees were to pay. HELD: Filing of reparation claim on behalf of consignees can not be regarded as having been authorized. Rocbond Co. v. A., T. & S. F., 104 I. C. C. 517, 519, 520.

(d) An intervening petition which names points of origin or destination not covered by the complaint constitutes a broadening of the issues and can not be permitted. White Eagle Oil & Refining Co. v. D. & R. G. W., 112 I. C. C. 605, 606.

(e) Complaint filed by an association for and in behalf of its members failed to name one member as a party complainant. Such member filed an intervening petition but same was not received by commission until after expiration of statutory period of limitation. HELD: As to shipments on which reparation is claimed by this particular member statute of limitations was not tolled by the complaint as filed by association. See 27 I. C. C. 302. South Carolina Cotton Mfrs. Assn. v. C., C. & O., 112 I. C. C. 683, 686.

(f) Intervening petition was offered at hearing with statement that it did not broaden the issues, but in so far as it embraced rates to three points not mentioned in the complaints under consideration it did in fact broaden them. No objection, however, was interposed to receipt of petition upon presiding examiner's inquiry respecting it, and to examiner's subsequently proposed relief to two of the three points named no exception was taken by carriers. HELD: Under the circumstances rates to the three additional points may therefore be deemed to be properly in issue. Nebraska State Ry. Comm. v. A. & W., 113 I. C. C. 467, 469.

(g) Upon objection of carriers to a petition of intervention in a proceeding involving undue prejudice by a shipper located at a point not named in complaint, upon ground that it unduly broadens the issue. HELD: To some points same rates now prevail from the two points involved and to deny petition and at the same time permit a reduction in rates from the point named in complaint would have the effect of sanctioning an unwarranted rate situation as between competing manufacturers. Accordingly, petition in intervention allowed. Sonoco Products Co. v. A. C. L., 113 I. C. C. 553, 554.

(h) Where an intervening petition does not ask for affirmative relief none will be accorded by commission. Paragraph (1) of Rule II of Rules of Practice provides that where affirmative relief is sought by an intervener in any proceeding before commission the intervening petition "should conform to the requirements of a formal complaint." Iola Cement Mills Traffic Asso. v. A. V. I., 115 I. C. C. 49, 61.

(i) Where a complainant alleges that a rule incorporated in a specific tariff is unreasonable but intervener alleges that same charge published in another tariff is likewise unreasonable, this does not unduly broaden the issues presented in complaint. U. S. Industrial Alcohol Co. v. C. & N. W., 118 I. C. C. 674.

(j) A separate wrong to a shipper other than the complainant, although founded upon the imposition of the same unlawful freight rate, is a distinct issue, and the redress of that wrong by an award of reparation must depend upon

competent evidence particularly relating thereto. To assume in this case that the defendants, had they been seasonably forewarned of the additional issue, would have been unable to develop evidence to controvert the interveners claim of reparation due would be to deny defendants their day in court. This the commission may not do. Concrete Steel Co. v. B. & O. R. R., 123 I. C. C. 677, 678.

(k) Commission has rejected a contention that certain intervening petitions seeking reparation, two of which were filed at the hearing, unduly broadened the issues, similar relief not having been sought in the complaint. Concrete Steel Co. v. B. & O. R. R., 123 I. C. C. 677, 678.

(l) In accordance with Rule III (s) of Rules of Practice, reparation awarded upon a new complaint to complainants and interveners not parties to the proceeding prescribing reasonable rates to basis of which reparation is sought, upon showing of good cause and unusual circumstances. Decker & Sons v. U. P., 123 I. C. C. 621, 622, 623.

(m) Intervening petition seeking reparation, filed at hearing by parties newly come into the case, found to unduly broaden the issues presented by complaint, within contemplation of Rule II (1) of Rules of Practice. Even though reparation was sought in original complaint, a separate wrong to a shipper other than complainant, founded upon imposition of same unlawful freight rate, is a distinct issue and redress of that wrong by an award of reparation must depend upon competent evidence particularly relating thereto. To assume that carriers, had they been seasonably forewarned of the issue, would have been unable to develop evidence to controvert interveners' reparation claim, would be to deny carriers their day in court and this the commission may not do. However, objection of intervening petition may be waived, failing in which interveners may petition for further hearing upon the issue of which carriers have now had abundant notice. Concrete Steel Co. v. B. & O., 123 I. C. C. 677, 678, 679.

(n) Complainants failure to intervene in another case does not constitute an estoppel. McKeesport Tin Plate Co. v. A. A. R. R. Co., 128 I. C. C. 259, 260.

(o) Petition of intervention filed after hearing but prior to oral argument by purchaser of complainant's business and property, asking to be accorded under original issues any relief which might otherwise have been accorded to its predecessor in interest on causes of action accruing subsequent to date of purchase, allowed at oral argument. Harbor Coaling Corp. v. B. & O., 128 I. C. C. 747, 748.

IV. ORDERS OF COMMISSION.

See Advanced Rates §2½; Interstate Commerce Commission §17.

§11. Modification, Validity and Effect.

(a) The Interstate Commerce Commission within narrow limits may, on its own motion or on request, correct any order still under its control, without notice to a party, who cannot possibly suffer by reason of the modification made. Louisville & N. R. Co., v. Sloss-Sheffield Steel & Iron Co., 46 Sup. Ct. 73.

V. PARTIES.

See Association; Crimes §24; Parties.

§13. Necessary and Proper Parties.

See Loss and Damage §17.

(a) Regardless of who complains about rates or who would use them, shippers are entitled to reasonable rates. Cattle & Horse Raisers Asso. v. N. P., 104 I. C. C. 51, 60.

(b) Carrier serving alleged preferred points was not named as defendant; nor was it served with a copy of complaint, as required by the act, or represented at hearing. Trial examiner found to have been in error in allowing a motion by complainant to add such carrier as a party defendant. Louisville Cement Co. v. S. Ry., 104 I. C. C. 455, 456.

(c) Contention that, because of change in complainant's name, it is not a proper complainant in respect of shipments which moved prior to date of such change, not sustained. An authorized change in name of a corporation does not affect its rights or lessen or add to its obligations. See 141 U. S. 520. Copperweld Steel Co. v. B. & O., 109 I. C. C., 99.

(d) Formal complaint filed within six months after notice that claim could not be adjusted informally was returned for correction. In corrected complaint received after expiration of six months, an additional party defendant was named. HELD: Under Rule III (g) of Rules of Practice claim against additional party

defendant is barred. See 92 I. C. C. 29. Remaining carriers, however, are jointly and severally liable for any damage resulting from assessment of an unreasonable joint rate. See 66 I. C. C. 627, and cases there cited. Bunte Bros. v. C. & N. W., 112 I. C. C. 557, 558.

(e) Points of origin and destination are located on lines of carriers not named in the complaint, but rates found unlawful were joint through rates in which carriers not named participated. Upon objection to introduction of evidence tending to prove damage on shipments moving over lines of carriers not named as defendants in original complaint. HELD: Following 295 Fed. 53, the participation by initial carriers in a violation of the act by exacting unreasonable rates is enough to make such carriers liable for full amount of damages sustained in consequence of such violation, liability against such carrier resulting from its unlawful action in charging unreasonable rates, that liability being enforceable against defendants though other parties to such joint rates were also liable but were not proceeded against. South Carolina Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 685.

(f) Complaint filed by an association for and in behalf of its members failed to name one member as a party complainant. Such member filed an intervening petition but same was not received by commission until after expiration of statutory period of limitation. HELD: As to shipments on which reparation is claimed by this particular member statute of limitations was not tolled by the complaint as filed by association. See 27 I. C. C. 302. South Carolina Mfrs. Asso. v. C., C. & O., 112 I. C. C. 683, 686.

(g) Formal complaint received within statutory period of limitation was returned to complainants for correction of errors in names of defendants, attention also being called to omission of reference to informal complaint, and to fact that statements of shipments were attached to only a limited number of copies of complaint. The complaint, as corrected, was refiled after statutory period had expired. HELD, there being no substantial error in names of defendants against which complaint is principally directed, and omissions referred to not being of vital importance, original receipt of complaint operated to stay limitation provisions of the act. Ryan Fruit Co. v. Director General, 120 I. C. C. 206, 207.

(h) A failure to name one participating carrier as a party defendant in a complaint is not fatal where rate in which such carrier participated was a joint rate under which liability of the participants is joint and several. Russellville Compress Co. v. G., M. & N., 120 I. C. C. 481, 482.

(i) Upon further hearing, additional defendant carriers objected to being made parties to amended complaint, contending that in being brought into the case after considerable testimony had been taken they were denied a full hearing in contemplation of law and that no valid order could, therefore, be entered against them. HELD: This contention is without merit since substantially all previous evidence was reintroduced at further hearing and complainants made it plain that they did not rely upon original record as to such carriers. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R., 126 I. C. C. 199, 202.

(j) Under Interstate Commerce Act, § 13, as amended by Act June 18, 1910, § 11 (Comp. St. §8581,) a state, when its interests are concerned, whether a carrier or not, may file a complaint with the Interstate Commerce Commission. United States v. New York Cent. R. Co., 47 Sup. Ct. 130.

(k) Carriers point to defect in pleadings in that a certain carrier was not named as party defendant in the complaint. FOUND: As shipments moved under joint rates omission is not fatal, although no order can be entered against carrier not named. Practical Drawing Co. v. C. & N. W. 128 I. C. C. 540, 541.

(l) Both shipments moved in connection with the Burlington and the inclusion of the Santa Fe as a party defendant is not necessary when reparation only is sought. Nebraska v. C. B. & Q. R. R., 132 I. C. C. 717, 718.

(m) Upon contention that under doctrines laid down in 42 I. C. C. 396; 46 I. C. C. 343, complaint must fail because one originating carrier was not named as a defendant and because total through rates were not set forth. HELD: Through rates were not in issue, but commission has jurisdiction to examine and pass upon alleged unlawfulness of factors making up through rate. Dawkins Lumber Co. v. C. & O., 129 I. C. C. 415, 418.

VII. ADMISSION OF EVIDENCE.

See Evidence §3.

§14½. In General.

(a) Protestants objected to consideration of certain testimony in original record on ground that it was "relevant, competent, and material" only to intrastate rates and that that portion pertaining to interstate rates was not segregated and again offered at second hearing, asserting that they were thus deprived of opportunity to object to admissibility of such testimony and were left in ignorance of evidence to be considered. HELD: Even if testimony received at original hearing should not properly be considered in determination of interstate rates, counsel making objection did not demand segregation of that testimony prior to rendition of previous report and at last oral argument stated that he did not even then move to strike such testimony. Moreover, commission's attention is not directed to any testimony which is not relevant and material to issues involved. Lignite Coal from North Dakota, 126 I. C. C. 243, 245.

(b) Carriers objected to including in an exhibit certain shipments which moved over routes embracing carriers not named as defendants. HELD: Objecton is without merit. Testimony was not limited to any particular route or routes; rates under attack applied at time of movement over all routes shown on exhibit; and several of named defendants paticipated in each movement set forth. Where carriers participate in an unreasonable joint rate they are jointly and severally liable for the unlawful assessment. See 21 I. C. C. 20. Boston Wool Trade Asso. v. B. & A., 128 I. C. C. 185, 186.

(c) Possession of paid freight bills coupled with witness's knowledge of customary method of payment and his personal investigation of particular claims involved is sufficient to support a finding that complainants paid and bore the the charges under review. Bakeries Service Corp. v. B. & M., 128 I. C. C. 695, 696.

§15¼a. Modified Procedure.

(a) Case presented in accordance with modified procedure under which parties submitted in writing facts and arguments upon which they rely, oral hearing being had only with respect to such matters as were not agreed to or which were agreed to in part, the parties arguing case before examiner at conclusion of taking of testimony which was not briefed. Union Bag & Paper Corp. v. B. & M., 104 I. C. C. 327.

(b) In a shortened procedure proceeding, evidence was supported by agent's affidavit. Upon contention that admission of the affidavit was improper and demanding further proof, HELD: Shortened procedure is predicated on affidavit form of proof, and such statements standing undenied are competent and convincing evidence. Brooks Bros. v. N. Y., N. H. & H., 123 I. C. C. 607, 608.

§16. Judicial Notice or Other Decision.

See Evidence III.

(a) Upon reconsideration, rate on paper from Orange, Tex., to Hutchinson, Kans., prescribed in former report, 95 I. C. C. 457, and equal to rate from St. Louis and Kansas City to Houston and other Texas points, found not unduly prejudicial because it exceeded 110 per cent of rate from Orange to Kansas City. Rates from St. Louis and Kansas City, referred to were based on rates found reasonable and prescribed in Minnesota & Ontario Paper case, 66 I. C. C. 571, and rate from Orange to Kansas City is shown to be depressed by market competition, and is not a maximum reasonable rate. Former finding of unreasonableness adhered to. Hutchinson Paper Co. v. T. & N. O., 112 I. C. C. 49.

(b) Upon further hearing, taking into consideration development of the flaxseed industry in this country, the conditions which have demanded importation of flaxseed from abroad, the early rates on this commodity, comparisons with other rates, and comparative earnings thereunder, finding in American Linseed Co., 91 I. C. C. 663, wherein rates on flaxseed from New York Harbor points to Buffalo, N. Y., were found unreasonable and reparation awarded, affirmed, and converse finding in the Kellogg case, 77 I. C. C. 249, reversed. In addition, similar rates from same origin points to Chicago and Toledo, and from Philadelphia to Toledo found unreasonable and reparation awarded. Spencer Kellogg & Sons v. D., L. & W., 112 I. C. C. 629.

§17. Res Adjudicata.

See Evidence V, §69.

(a) Case submitted upon pleadings

by stipulation of counsel agreeing that it should be disposed of on issue of unreasonableness applied on basis of commission's decision in another decided case. Glidden Co. v. C. R. R. Co. of N. J., 118 I. C. C. 59.

§18½. Reparation Statements and Pleadings.

See Reparation.

(a) Complaint seeking reparation on shipments of fertilizer and fertilizer materials from Jackson, Miss., to Arkansas and Louisiana destinations, predicated upon findings in Jackson Traffic Bureau, 102 I. C. C. 129, wherein reparation was not sought, dismissed, rule III (s) of Rules of Practice providing that "Except under unusual circumstances, and for good cause shown, reparation will not be awarded upon a complaint in which it is not specifically prayed for, or upon a new complaint by or for same complainant which is based upon any finding in original proceeding." Jackson Traffic Bureau v. A. & V., 118 I. C. C. 217.

VIII. DEFENSES AND EVIDENCE.

See Evidence.

§20. In General.

(a) On shipments moving during Federal control informal complaint alleged only overcharges. Formal complaint subsequently filed brought in additional issue of unreasonableness. Allegation of unreasonableness not having been presented within statutory period of one year after Federal control terminated, found barred. Rohan Co. v. Director General, 118 I. C. C. 83.

(b) Lapse of time is an important element in laches, but doctrine does not, like statute of limitations, rest on time alone, but is founded also on the inequity of permitting claim to be enforced because of some intervening change in conditions. Peters Mill Co. v. Director General, 129 I. C. C. 331, 332.

PROHIBITION

See Intixcating Liquors; Special Rates and Services.

(a) Policing charge of $25 per car on shipments of ethyl alcohol, designed to cover cost of protection against pilferage, found not unreasonable. Carriers showed that pilferage of intoxicating liquors has greatly increased since national prohibition act became effective and that cost of furnishing protection now necessary for this commodity has radically changed; also that cost of furnishing this protection frequently exceeds transportation charges received. Moreover, in numerous cases commission has approved separately stated charges for special service rendered by carriers. See 61 I. C. C. 680 and other cited cases. U. S. Industrial Alcohol Co. v. C. & N. W., 118 I. C. C. 674.

CROSS REFERENCES

See Advanced Rates §9½; Evidence §13 (5), §14 (5); Through Routes and Joint Rates §13½.

I. APPLICATION.

See Divisions §8 (a); Through Routes and Joint Rates §18.

(a) Proportional rates are but parts of through rates and are in nature of divisions rather than of rates. Where joint through rates are reasonable and free from undue prejudice shippers are not concerned with whether divisions up to or beyond a given gateway are higher on their traffic than on traffic of their competitors. Morrell & Co. v. N. Y. C., 104 I. C. C. 104, 128.

(b) Proportional rates, unrestricted in their application, are intermediate rates within meaning of the aggregate-of-intermediates provision of section 4 of the act. Hulsey-Bessent Co. v. S. A. L., 109 I. C. C. 389, 390.

(c) Complainant attacked combination charged of 52.5c on a car of portland cement shipped May 19, 1924, from York, Pa., to Cape Girardeau, Mo., as unreasonable and inapplicable. Shipment moved Pennsylvania to St. Louis, Mo., thence Frisco, charged 52.5c. There was in effect over route of movement a

local commodity rate of 31.5c also a proportional commodity rate of 30.5c applying on cement from York to St. Louis, and a local rate of 11.5c beyond. The local rate to St. Louis was subject to combination rule, but the proportional rate to, and the local rate applying beyond St. Louis were not. The proportional rate applied only on shipments destined to points beyond, to which no joint through rates were in effect. HELD: The applicable component to St. Louis was the proportional rate of 30.5c which, added to the local rate beyond, makes a total of 42c. HELD: Applicable rate was 42c, reparation awarded. Sandusky Portland Cement Co. v. Pennsylvania R. R., 112 I. C. C. 737.

(d) Proportional rates ordinarily are lower than local rates from and to same points. Capital Grain & Feed Co. v. I. C., 118 I. C. C. 732, 743.

(da) Proportional rates on wheat and flour from Missouri River points, when from beyond, to points in Indiana, Ohio, Pennsylvania, West Virginia, and Kentucky, found unduly prejudicial to extent they exceed those contemporaneously maintained from Minneapolis, and points taking same rates, to same destinations. Level of rates is higher from Kansas City than from Minneapolis, notwithstanding great difference in distance. While from latter point rates on wheat and flour are the same, rates on flour from Kansas City are generally higher than on wheat thus permitting millers at Minneapolis to compete on a more favorable basis. Moreover, principles announced in 113 I. C. C. 3; 122 I. C. 235, in construing the Hoch-Smith resolution with reference to advancing rates on products of agriculture to rectify inequalities could here well be given application by carriers in removing undue prejudice found to exist, as rates from Kansas City not exceeding those from Minneapolis, appear to be reasonable. Southwestern Millers' League v. A., T. & S. F., 126 I. C. C. 23.

(e) Upon contention that commission has no jurisdiction over rates on traffic moving to Lake Erie ports for transshipment by vessel, upon theory that because of lack of control over the water carriers which handle traffic beyond the ports, commission has no authority to deal with or prescribe proportional rates on traffic over which it does not have jurisdiction for the entire movement from point of original shipment to point of ultimate destination, HELD: Where transportation to the port is interstate or foreign in character, it is subject to commission's jurisdiction under general provisions of section 1 of the act, irrespective of the mode of transportation beyond the port. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 313, 314.

(f) Lake-Cargo rates are in the nature of proportional rates, and commission has frequently prescribed such rates on a lower basis than corresponding local rates. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 361.

(g) Rule 5 (b): Provision of Tariff Circular 18-A, providing that tariffs publishing proportional rates must specifically refer to tariffs naming other rates used in conjunction therewith in making through rates, is restricted to "basing rates." Armour & Co. v. Director General 126 I. C. C. 539, 540.

(h) Tariff published two sets of rates from Peoria, one without restriction, and the other a lower rate applicable on traffic "when from beyond." Upon contention that lower rates are not proportional rates because when added to rates inbound to Peoria from shipping points generally "through rates" are not thereby secured inasmuch as joint rates on lower basis are maintained from such points through Peoria, HELD: Contention is without merit. The "when from beyond" rates could be used in constructing combination rates from points from which no through rates were published. Moreover, in 81 I. C. C. 688, the commission held that the word "beyond" implies a line-haul movement "beyond" the rate-breaking point. Armour & Co. v. Director General, 126 I. C. C. 539, 540, 541.

(i) Contention that as proportional rate is but part of a through rate it is impossible to determine an issue of undue prejudice to one market and undue preference of another solely with respect to proportional rate unless evidence of through rates based on each market is available, not sustained, since each of such rates must be judged upon its own merits. See 46 I. C. C. 343, 350. This is especially apt where inbound rates to prejudiced or preferred markets are upon a distance scale. Des Moines Board of Trade v. F. D., D. M. & S., 129 I. C. C. 138, 145.

(j) The incorrect description of a rate as a proportional rate when as a matter of fact it was an arbitrary did not change the character of the rate. National Pole Co. v. G. N., 129 I. C. C. 697, 699.

II. DISCRIMINATION AND REASONABLENESS.

See Advanced Rates §8½a (i), §14¾ (ja); Discrimination; Reasonableness of Rates; Reduced Rates §4½ (x) (cc); Restricted Rates (h); Through Routes and Joint Rates §24 (a).

(a) Shipments of matches moving from Chico, Calif., to destinations in Washington were assessed a rate to Portland, Oreg., higher than proportional rate applicable over a route other than route of movement to St. Johns, situated within corporate and switching limits of Portland. Lower rate was restricted to destinations other than those here involved and carried a switching charge at Portland also restricted to switching service performed in connection with a line haul. There was no switching in connection with a line haul via route of movement, and an out-of-line haul would have resulted had traffic moved through St. Johns. FOUND: Rates assessed were not unreasonable or otherwise unlawful. Diamond Match Co. v. Director General, 104 I. C. C. 147.

(b) Proposed cancellation of proportional rates on anthracite coal from Erie, Pa., and Brocton, Buffalo, and Buffalo Junction, N. Y., to Sparland, Ill., thereby making applicable higher combination rates based on Chicago through increase of factor beyond these junction points, found justified on ground that such higher rates will compare favorably with rates on like traffic from and to other points for comparable distances. Coal from Erie to Sparland, 104 I. C. C. 188.

(c) Rates on wool, in the grease, in sacks, from points in Missouri to Boston, Mass., found unreasonable to extent they exceeded sum of proportional fourth-class rates to west bank of the Mississippi River and proportional commodity rate beyond. Reasonable rates prescribed for future. Former report, 77 I. C. C. 431, corrected. Boston Wool Trade Asso. v. B. & A. R. R., 107 I. C. C. 497.

(d) Upon further hearing, rate on wrapping paper from Madison, Me., to New Hope, Pa., found unreasonable to extent that proportional rate comprising factor to Brunswick, Me., exceeded lower proportional rate from Enfield, Howland, Montague, and Lincoln, Me., farther distant points, which lower rate was established from Madison subsequent to movements here involved. Reparation awarded. To this extent former report, 88 I. C. C. 593, reversed. Universal Paper Bag Co. v. M. C., 107 I. C. C. 661.

(e) Respondent, C. I. & L., proposed certain changes in the application of proportional rates between New Albany, Ind., and Louisville, Ky., effecting increased rates on carload and less carload traffic. Present schedules name proportional rates on carload and less than carload traffic between New Albany, on traffic passing through that point over respondent's line, and Louisville, to be used in making through rates to and from Louisville proper and points beyond. The schedules further provide that where the lines north of the Ohio river publish rates to or from New Albany, but not Louisville, through rates to or from Louisville will be made by adding the proportionals mentioned in the rates to or from New Albany, and where the lines south of the Ohio river publish rates to or from Louisville but not New Albany through rates will be the sum of the rates to or from Louisville and the rates to or from New Albany plus the proportionals. By the suspended schedules respondent proposed to cancel the application of the proportionals in constructing through rates to or from Louisville, and to confine the application of the proportionals to the construction of proportional rates to or from Louisville or New Albany on traffic originating at or destined to points in the southeast. Respondent introduced no evidence to justify the resulting increase of 6.5c. HELD: Schedules not justified. Proportional rates between New Albany and Louisville, 113 I. C. C. 243.

(f) Conditions surrounding proportional and local rates are dissimilar. Nooney & Co. v. P. R. R., 112 I. C. C. 35, 36.

(g) On shipments of crude and refined petroleum from points in Kentucky, Kansas, and Oklahoma to Lawrenceville, Ill., and Findlay, Ohio, no joint rates were in effect. Combinations of proportional and local rates to and from certain intermediate points, subject to combination rule produced lower charges than combinations of proportional rates

to and from same intermediate points, not subject to the rule. Contention that under 5 (c) of Tariff Circular 18-A, there being no joint rate in effect, shipper was entitled to lowest combination over the routes of movement, not sustained. Rule relied upon provided that where a combination is to be used it shall be the lowest combination of applicable rates and here the applicable rates were the combinations of proportionals. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 735.

(h) The commission's tariff rules authorize publication of proportional rates and are silent as to necessity for canceling local rates between same points for application on through traffic, and since the rules do not provide that proportional rates conflict with local rates, it follows that establishment of a proportional commodity rate removes application on through traffic of a local community rate on same article between same points. Indian Refining Co. v. L. & N., 112 I. C. C. 732, 736.

(i) On a carload of cement from York, Pa., to Cape Girardeau, Mo., a combination of two local rates to and from an intermediate point, subject to combination rule, produced a lower charge than a combination of a local and a proportional rate to and from same intermediate point, not subject to said rule. Following Indian Refining Co., 112 I. C. C. 732, FOUND: That the higher combination of the local and the proportional rate was applicable. Sandusky Cement Co. v. P. R. R., 112 I. C. C. 737.

(j) Rates charged on one car of poles originally shipped from Colville, Wash., to Minneapolis, Minn., there stored and subsequently reforwarded to Zwingle, Iowa, found not unreasonable, discriminatory, or unduly prejudicial; except that local rate from Minneapolis to Zwingle was unduly prejudicial to extent it exceeded a lower proportional contemporaneously in effect on similar traffic shipped from territory west of the Montana-Dakota State line to Minnesota Transfer and Cologne, Minn., for storage and reforwarding to same ultimate destination. Lindsley Bros. Co. v. G. N. Ry., 113 I. C. C. 166.

(k) Proposed increased through rates on grain and products from Omaha and South Omaha, Nebr., and Council Bluffs and Des Moines, Iowa, when from beyond and from Illinois Central stations to Arkansas destinations, found not justified. Present proportionals from Des Moines to Arkansas are on a parity with those from Omaha and competition between these markets is keen since both draw from same territory. If proposed rates are permitted the disparity will prevent Des Moines from competing with Omaha. Moreover, in 102 I. C. C. 186, rates on grain originating beyond Des Moines were found unduly preferential and prejudicial to extent they exceeded contemporaneous rates on grain originating beyond Omaha to same destinations, and in 104 I. C. C. 742 the commission stated that through rates should be somewhat less than the sum of rates to and from an intermediate point and to urge that combinations are the general basis for constructing rates is not sufficient to justify proposed increases. Grain and Products to Arkansas, 113 I. C. C. 209.

(l) Proposed changes in application of proportional rates between New Albany, Ind., and Louisville, Ky., effecting increases on c. l. and l. c. l. traffic, found not justified. Schedules propose to cancel proportionals in effect in constructing through rates, and to confine their application to construction of rates to or from Louisville or New Albany on traffic originating at or destined to points in certain southern states. Under proposed change the combination rate from Kansas and Oklahoma to Louisville based on New Albany would be increased. Carriers introduced no evidence to justify resulting increase, the proposal being actuated by desire of certain lines to eliminate this one remaining so-called bridge tariff in interest of uniformity. Proportional Rates Between New Albany and Louisville, 113 I. C. C. 243.

(m) Generally speaking a proportional rate is lower than a local rate between same points and ordinarily there should be no reason for a through rate composed of a local and a proportional in excess of combination of two locals, it being obvious that cost of handling a through shipment is less than cost of handling a shipment into and out of some point intermediate to final destination. Alabama-Georgia Syrup Co. v. A. C. L., 113 I. C. C. 283.

(n) Complainant attacked combination rates charged on 51 cars of celery from Sanford, Crippen, Sipes, Brisson, Moores, Cameron City and Beardall, Fla.,

and two cars from Palmetto, Fla., to Chicago, Ill., all under refrigeration, as unreasonable, unjustly discriminatory and unduly prejudicial. All the points of origin except Palmetto are included in what is known as the Sanford group and took the same rates to Jacksonville. Palmetto, farther south, took higher rates. The distances to Chicago are 1,193 miles from Sanford and 1,300 miles from Palmetto. Applicable combinations of proportionals of 16.5c per crate to Jacksonville from the Sanford group and 23c from Palmetto plus $1.20 per 100 pounds was charged. A joint rate was finally published on a uniform per crate basis of 60c effective March 27, 1923. HELD, rates attacked not unreasonable or otherwise unlawful. Complaint dismissed. Ahern Brokerage Co. v. A. C. L. R. R., 113 I. C. C. 651.

(o) Combinations of proportional commodity rates on celery from points in Florida to Chicago, composed of so-called gathering charges to Jacksonville plus proportionals beyond, found not unreasonable or discriminatory. In support of reasonableness of the resulting charges carriers compare earnings on celery with those on tomatoes, cucumbers, and citrus fruit. Allegations of discrimination and undue prejudice rest upon collection of rates to Chicago based on a higher component to the Ohio River than that charged for delivery at Cincinnati and other Ohio River points, but record establishes that these differences resulted from general percentage territorial increase to Cincinnati and interterritorial increase to Chicago. Moreover, such comparable rates between Florida points and Chicago offered by carriers tend strongly to disprove unreasonableness of rates assailed. Ahern Brokerage Co. v. A. C. L., 113 I. C. C. 651.

(p) Respondent K. C. S., in connection with the T. & F. C., T. & P. and L. R. & N., proposed to reduce the proportional rate on grain and grain products, in carloads, from Kansas City, Mo., to Beaumont and Port Arthur, Tex., and New Orleans, Gretna, Port Chalmette, and Westwego, La., for export. The proposed rates are not published to apply to Galveston, Houston, Texas City, or Orange, Tex., for the reason that the lines serving these ports apparently declined to concur in the proposed reduction. Respondent, in an endeavor to attract export grain to its line at Kansas City, has for several years maintained socalled open proportional export rates from Kansas City to Port Arthur, New Orleans, and other Gulf ports. It has also maintained variable proportional rates from Kansas City to the Gulf ports applicable on grain from points on the Rock Island and the M. P., which rates are substantially the equivalent of the transit balances from Kansas City to the Gulf over the Rock Island or the M. P., dependent upon the point of production. The proposed Kansas City combinations to the Gulf ports would be lower than the present joint rates from 510 out of a total of 774 origins on those lines, and from 248 of those 510 origins the combinations would be less than the joint rates by 3c. While the rates here proposed do not seem to be violative of sections 1 or 3 of the act applying the usual standards, the Commission must of necessity consider the probable consequences of the action. The record before the Commission is narrow. The proceeding is submitted without oral argument, and, because of its nature, must by law be disposed of expeditiously. Approval of the schedules will inevitably lead to a disruption of the grain rate structure, and have marked effects upon distribution and marketing, the extent of which the Commission can not adequately foresee, and must of necessity impair the revenues of the carriers and their ability to render satisfactory service. HELD, suspended schedules not justified. Grain and grain products, 115 I. C. C. 153.

(q) Complainant attacked commodity rate on crushed slate carloads from Whiteford and Slate Hill, Md., to New Orleans, La., and Mobile, Ala., since October 1, 1923, as unreasonable, unjustly discriminatory and unduly prejudicial as compared with commodity rates in effect to New Orleans and Mobile from Esmont, Va. Whiteford and Slate Hill are local to the M. & P., 42.4 and 45.6 miles, north of Baltimore, Md. Shipments moved via Cincinnati. A commodity rate of $8.24 was applied. Prior to May 11, 1923, a class rate of 74c applied from Whiteford to New Orleans, applicable via either Potomac Yard, Va., or the Ohio river crossings. On that date provision was made for the non-application of the class rate from eastern cities to New Orleans, Mobile and other Mississippi valley points. Concurrent with this action a proportional rate of $4.38 was established from Cincinnati. This rate, in combination with a commodity rate of

$3.86 from Whiteford and other slate producing points in eastern Pennsylvania to Cincinnati made a through rate of $8.24. Subsequent to the filing of these complaints the $8.24 rate was made applicable via Potomac Yard. HELD, rate attacked not unreasonable but unduly prejudicial to extent it exceeded rate from Esmont by more than $1.50 per ton, reparation denied. Staso Milling Co. v. M. & P. R. R., 115 I. C. C. 605.

(r) Respondents, L. & A. and V. S. & P. proposed to increase the proportional rates on structural iron and steel articles, carloads, from Natchez and Vicksburg, Miss., to Shreveport, La. A proportional rate of 27.5c had been in effect, through error a rate of 13.5c was established, and proposed rate 27.5c. HELD, proposed schedules justified. Iron and Steel to Shreveport, 115 I. C. C. 612.

(s) Complainant attacked commodity rates on coal, carloads, of $2.39 from Clincho, Va., and $2.64 from Clinchfield and Dante, Va., to Toledo and Toledo Dock, Ohio, for transshipment by vessel, as unduly prejudicial to extent they exceed $1.91 from Clincho and $2.06 from Clinchfield and Dante. Clinchfield is on the Dumps Creek branch of the C. C. & O., about 3 miles north of Carbo, Va., the junction of that branch with the N. & W. Westerly from Carbo to St. Paul, Va., about 9 miles, the C. C. & O. operates under trackage rights. Connection is made at St. Paul with its main line, which runs north and south. Dante and Clincho are on the main line of the C. C. & O., about 7 and 25 miles, north of St. Paul. Rates on lake cargo coal from this general region are lower than the rates on commercial coal, but this is not true of complainants mines, from which the commercial coal rates apply also on lake cargo coal. Generally speaking, rates of $1.91 and $2.06 apply on lake cargo coal to Toledo and Toledo dock from districts in the Inner and Outer Crescent, from which the commercial coal rates are $2.39 and $2.64. The rates for lake cargo coal are in the nature of proportional rates, and, with some exceptions, they are the same to all Lake Erie ports. HELD, rates attacked for transshipment by vessel are unduly prejudicial to the extent they exceed the lake cargo coal rates by more than 15c per ton. Clinchfield Coal Corp. v. C., C. & O. Ry., 118 I. C. C. 79.

(t) Complainant attacked local and proportional or reshipping rates on grain and grain products, carloads, from Memphis, Tenn., St. Louis, Mo., and Ohio river crossings and local rates from intermediate points since April 1, 1922, as unreasonable and unduly prejudicial to extend the rates from St. Louis and Ohio river crossings to Nashville exceed the local and proportional rates from the crossings to Memphis and to extent the rates from Memphis exceed the rates sought from St. Louis to Nashville. The short line distance from Omaha to Memphis is 666 miles over lines operating west of the Mississippi river, and through rates are published over these lines which are 25c on traffic originating at points beyond Omaha and 31c on traffic from Omaha proper. Distance over routes operating through St. Louis is 725 miles. The proportional rate from Omaha to St. Louis is 13.5c, and in order to participate in the traffic and permit grain interests at St. Louis to do business in Memphis, the lines operating from St. Louis maintain a proportional rate from that crossing to Memphis of 11.5c which is the balance of the rate of 25c from Omaha to Memphis. The rates over the west side lines from Omaha to Cairo and Evansville are 3c higher than those to St. Louis, and the proportional rates from these points to Memphis are accordingly made 3c less than the rate from St. Louis, or 8.5c. The general basis for making rates on classes and commodities from western points to Nashville and Chattanooga, Atlanta, Birmingham and other southeastern points is and for many years has been the combination on Ohio or Mississippi river crossings; and the rates on grain and other commodities from western points to Nashville are and always have been higher than to Memphis. HELD, rates attacked on grain and grain products, in carloads, to Nashville are unreasonable and unduly prejudicial to extent they exceed 20c from Memphis and St. Louis, 17c from Cairo and Evansville, 14.5c from Louisville and 21.5c from Cincinnati on traffic originating beyond and 22, 23, 20, 18, 20 and 24c on traffic originating at those points. The local rates herein prescribed will set the level of the maximum rate which may be maintained from intermediate points to Nashville for the future. Nashville Traffic Bureau v. L. & N. R. R., 118 I. C. C. 748.

(u) Complainant attacked rates on

grain and grain products in carloads, from Memphis, Tenn., to Birmingham, Ala., as unreasonable unjustly discriminatory and unduly prejudicial in favor of Meridian, Miss., and in violation of the fourth section. Generally speaking, grain and grain products, in any quantity, move in the south on class D rates or the equivalent thereof. During federal control carload rates were published to points in the southeast from the Ohio and Mississippi river crossings because of a provision of G. O. 28 which limited the increase in carload rates on grain and grain product to a maximum of 6c. No finding of undue prejudice can be made because the sole defendant does not control the rates to the territory alleged to be preferred. The rates from crossings other than Memphis are not under attack, and the Commission can make no findings as to those rates, but it anticipates that the interests of other carriers and of grain dealers at the other crossings served by them will cause the continuance of the existing relative adjustment of through rates to Birmingham via the several crossings. HELD, rates attacked on grain and grain products, carloads, from Memphis to Birmingham unreasonable to extent it exceeds 20c on traffic originating beyond Memphis and 22c from Memphis proper. Birmingham Traffic Bureau v. St. L. S. F. Ry., 118 I. C. C. 756.

(v) Proposal of the Frisco to cancel proportional rates on grain and products from Omaha, South Omaha, Des Moines, Council Bluffs, and Kansas City, when from beyond, on traffic moving via East St. Louis to destinations in Arkansas on that portion of its line formerly operated by the Jonesboro, Lake City & Eastern Ry., designed to place these destinations on same rate basis maintained to other near-by stations on the Frisco system and to confine routing from these origins to its own line and to the Kansas City gateway, found not justified. If proposed rates are permitted, combinations from Omaha to Arkansas points involved on shipments moving beyond St. Louis or East St. Louis would be higher than on shipments moving beyond Kansas City, and grain operators at St. Louis be prevented from competing with those at the Missouri River points. Moreover, no evidence was submitted to show that present rates are unduly low. Grain and Products to Arkansas, 115 I. C. C. 457.

(w) Proposed increased proportional rate on iron and steel articles from Natchez and Vicksburg, Miss., to Shreveport, La., found justified. Carriers cancelled proportional formerly in effect upon assumption that by so doing higher distance rates prescribed in 77 I. C. C. 473 would become effective. Proportional rates, however, were not considered in cited case and carriers now propose to restore preexisting rates. In justification thereof carriers show that they compare favorably with rates on same commodities from other important Mississippi River crossings to destinations west thereof; also that continuance of present low westbound rates which became lower than those eastbound through printer's error, would result in breaking down joint rates in effect from principal iron and steel producing centers to Shreveport. Iron and Steel to Shreveport, 115 I. C. C. 612.

(x) Proportional rates ordinarily are lower than local rates from and to same points. Capital Grain & Feed Co. v. I. C., 118 I. C. C. 732, 743.

(y) Proportional or reshipping and local rates on grain and products from Ohio and Mississippi River crossings to Nashville, Tenn., found unreasonable and unduly prejudicial in their relation to corresponding rates from same crossings to Memphis. Reasonable and nonprejudicial rates prescribed for future and reparation denied. Nashville Traffic Bureau v. L. & N., 118 I. C. C. 748.

(z) The principle that proportional rates may be lower than local rates because they apply to portions of much longer total hauls has long been recognized in rate making. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 78.

(aa) Where proportional rates and joint rates are contemporaneously effective and proportionals would apply in absence of joint rates, such proportional rates are intermediate rates within meaning of section 4 of the act. See 37 I. C. C. 591 and other cited cases. Ryan Fruit Co. v. Director General, 120 I. C. C. 206, 213.

(bb) Upon reargument, statement in original report, 104 I. C. C. 104, that fresh-meats rate from St. Louis to New York is a marked exception to the adjustment prevalent and that 117 per cent is the standard relationship on almost every other commodity, found to be in error. Finding that local and proportional rates on fresh meats from St.

Louis and other Mississippi River crossings to destinations in trunk-line and New England territories should be based upon 117% of the Chicago-New York rate withdrawn and rates based upon specific differentials over Chicago prescribed for future. Morrell & Co. v. N. Y. C., 120 I. C. C. 537.

(cc) Complainant attacked the rates on grain and grain products from points in Indiana to Chicago, Ill., when reshipped over lake or lake and rail lines, are unjust, unreasonable, unjustly discriminatory and unduly prejudicial to its members. The rates assailed apply only on inbound grain when reshipped from Chicago by lake or lake and rail routes. There is no evidence of unjust discrimination. HELD, rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Indianapolis Board of Trade v. C. I. & L. Ry., 122 I. C. C. 289.

(dd) Complainant alleged that rates on flaxseed, carloads, from South Dakota to Fredonia, Kas., are unreasonable and unduly prejudicial. In 107 I. C. C. 35, the Commission found rates on flaxseed from South Dakota to the points named were unreasonable to the extent they exceeded 112% of the wheat rates. Fredonia is about 153 miles southwest of Kansas City, served by the Santa Fe, M. P., and Frisco. The movement of flaxseed to Fredonia from South Dakota is through Sioux City, Ia., Omaho or Kansas City, the greater part moving through Omaha. The rates are made up of the local rates to these points and proportional rates beyond in the same manner as the rates on wheat. Proportional rate from Omaha to Fredonia is 22.5c on wheat and on flaxseed 24c. The Commission has in former decisions passed upon both the level and the relation of flaxseed rates from South Dakota to various points, including Omaha and Kansas City, and a consideration of the present record does not convince it that there was error in such findings. Rates prescribed, especially to Omaha and Kansas City, may appropriately be used in the construction of rates to Fredonia. The construction of rates to Fredonia by the addition to the rates to the Missouri river points of the present proportional rates results in through rates which are excessive and which unduly prejudice complainant and unduly prefer flaxseed crushers located at competing points. HELD, rates attacked unreasonable and unduly prejudicial to extent they exceed the rates to Omaha by more than 16c, reparation awarded. Fredonia Linseed Oil Works Co. v. A. T. & S. F. Ry., 123 I. C. C. 525.

(ee) Proportional rates on grain and products from Mississippi River gateways and points west thereof to intermediate destinations on the Gulf & Ship Island R. R., higher than to farther distant points, found not unreasonable or otherwise unlawful. Higher rates to intermediate points were permitted to meet rates of trunk-line competitors at junction points by fourth-section order. Moreover, carriers show that rates to points on the Gulf & Ship Island compare favorably with rates from same points to destinations in Mississippi and Louisiana on to New Orleans Great Northern, Mssissippi Central, and Gulf, Mobile & Northern, and are on a lower level than rates to the Southeast. Jackson Traffic Bureau v. A. & V., 122 I. C. C. 387, 388, 389.

(ff) Proposed reduced proportional rates from Minneapolis and Duluth, Minn., and points grouped therewith, applicable over the Minneapolis & St. Louis and Soo Line, respectively, and their eastern rail connections, to points in trunk-line and New England territories, on grain and products originating in Montana, the Dakotas, and northwestern Minnesota, designed by above-named carriers in an effort to secure some of the traffic now moving via rail-lake-rail routes through Duluth and Buffalo, N. Y., found not justified. Such rates would lead directly to a disruption of the grain-rate structure, have marked effects on marketing and distribution, and of necessity impair revenues of carriers and their ability to render satisfactory service. Moreover, Minneapolis already has more favorable rates than competing western markets, and rates proposed would increase the preference. Grain and Products to Eastern Points, 122 I. C. C. 551.

(gg) Complainant attacked the proportional rates on wheat and wheat flour, carloads, from Kansas City, Mo., St. Joseph, Mo., Leavenworth, Kan., and Atchison, Kan., and Omaha, Neb., when from beyond, to points to certain portions of Indiana, Ohio, Pennsylvania and West Virginia and Kentucky as unreasonable and, as compared with the proportional rates on the same commodities from Minneapolis, Minn., and points taking same rates when from beyond, to the

same destination territory, unduly prejudicial. The rates from the Missouri river cities to the destination territory are made either combination on St. Louis, Peoria, Ill., or Chicago and from Minneapolis and Duluth are based on the Milwaukee, Wis., Chicago or Peoria combinations. Such combination rates are composed of proportional rates from origin territories, on traffic from beyond, to the rate breaking points plus proportional or reshipping rates beyond. It is sufficient to say that the general level of rates on both wheat and flour is from 0.5 c to 5 c higher from Kansas City than from Minneapolis, notwithstanding the distances from Kansas City are generally from a few miles to as much as 250 miles less than from Minneapolis. There are no conditions affecting the transportation of this traffic to this territory which justify a different level of rates from Minneapolis than is applied from the Missouri river points. HELD proportional rates on wheat and flour, in carloads, from the Missouri river cities to points in the destination territory involved are unduly prejudicial to these points to the extent they exceed or may exceed the rates maintained on like traffic from Minneapolis and points taking same rates to the same destinations. It would appear that the establishment of rates from the Missouri river cities to points in the destination territory here involved not in excess of the rates that now apply from Minneapolis would result in rates from the Missouri river cities which will be both reasonable and lawful. The present parity of rates on wheat flour and compound flours should be maintained. Southwestern Millers League v. A. T. & S. F. Ry., 126 I. C. C. 23.

(hh) Respondents propose to increase the rates on crushed slate, carloads from Esmont, Arvonia, Dutch Gap, and Rockfish, Va., to Mobile, Ala., New Orleans, La., and Vicksburg, Miss. Arvonia and Dutch Gap are on the C & O and Esmont is on the C & O and N & A. Respondents proposed to increase the present rate of $4.77 from Esmont, Arvonia and Dutch Gap to $6.74. A proportional rate of $4.50 is applicable from Rockfish over the Southern on traffic originating on the N & A. The local rate of the N & A to Rockfish is 27 c. Proposed to increase the proportional rate from Rockfish to $6.47, presumably in compliance with Staso Milling Co. v. M. & P. R. R. 115 I. C. C. 605. HELD, proposed rates justified. Slate from Virginia points, 126 I. C. C. 70.

(ii) Proportional rates on wheat and flour from Missouri River points, when from beyond, to points in Indiana, Ohio, Pennsylvania, West Virginia, and Kentucky, found unduly prejudicial to extent they exceed those contemporaneously maintained from Minneapolis, and points taking same rates, to same destinations. Level of rates is higher from Kansas City than from Minneapolis, notwithstanding great difference in distance. While from latter point rates on wheat and flour are the same, rates on flour from Kansas City, are generally higher than on wheat thus permitting millers at Minneapolis to compete on a more favorable basis. Moreover, principles announced in 113 I. C. C. 3; 122 I. C. C. 235, in construing the Hoch-Smith resolution with reference to advancing rates on products of agriculture to rectify inequalities could here well be given application by carriers in removing undue prejudice found to exist, as rates from Kansas City not exceeding those from Minneapolis appear to be reasonable. Southwestern Millers League v. A. T. & S. F., 126 I. C. C. 23.

(jj) Upon further hearing in 95 I. C. C. 539, all rail rates on grain and products from Illinois, Wisconsin, Minnesota, the Dakotas, Montana, Iowa, Nebraska, Kansas, Arkansas, and Oklahoma, to Boston and New York, for export, found not unreasonable or otherwise unlawful as compared with lower contemporaneous rates to Philadelphia and Baltimore. Complainants agree with all other parties that present method of constructing rates from western points to Atlantic ports is best that has been devised. Moreover, as larger portion of export grain now moves through Philadelphia and Baltimore, to require carriers to establish equal reshipping rates from primary markets on grain originating in Northwestern States, in accordance with recommendation in former report, would undoubtedly complicate the grain-rate structure, and might create some difficulties in handling grain at primary markets. Maritime Asso., Boston Chamber of Commerce v. A. A. R. R. 126 I. C. C. 199.

(kk) Complainant alleged that the proportional rates on grain and grain products, carloads, from Des Moines, Ia., to Louisiana, applicable on traffic originating beyond Des Moines, are unreasonable and, in comparison with lower proportional rates on like traffic from Omaha, Neb., and Council Bluffs, Ia., unduly

prejudicial. The complaint arises from the disparity in the proportional rates from Des Moines and Omaha to Louisiana. Des Moines has three principal bases of rates on grain to Louisiana. It may operate on transit, either under one factor through rates from country stations to Louisiana or under one factor rates from those stations to Kansas City and proportional rates beyond, or it may use combinations of local rates to Des Moines and proportional rates beyond. The average distance from Des Moines to the Louisiana destinations generally is almost exactly the same as that from Omaha. HELD, proportional rates assailed not unreasonable but unduly prejudicial to extent they exceed the proportional rates from Council Bluffs or Omaha. Des Moines Board of Trade v. Ft. D. M. & S. Ry., 129 I. C. C. 138.

(ll) It can not properly be argued that a proposal to increase unremunerative reshipping rates could be denied upon the ground that the through charge composed of an excessive inbound rate and the unremunerative reshipping rate is just and reasonable. The converse must also be true, namely, that shippers may not on like grounds be denied relief from unreasonable or unduly prejudicial reshipping rates. Each of such rates must be judged upon its individual merits. Des Moines Board of Trade v. Ft. D. D. M. & S. Ry., 129 I. C. C. 138, 145.

(mm) Respondents, M. P. Santa Fe, and Rock Island, proposed to establish proportional rates on grain and grain products from stations on their lines in Colorado, Kansas, and Nebraska to Kansas City, Mo-Kas., and from points on their lines in Kansas to Wichita, Kas., destined to Gulf ports for export, for application from Kansas City is over the K. C. S., C. & A., M. K. T. or Frisco and their connections and the movement from Wichita is over the K. C. M. & O. or Midland Valley and their connections. The proposed rates are in excess of the corresponding local rates and would result in increases in the through rates over these routes by amounts ranging from 0.5c to 7.5c. For many years Kansas City has been one of the most important primary markets and the rates through that market very generally have been combinations of rates to and from that point. Prior to 1924 the applicable rates under which this traffic moved via Kansas City were combinations of the inbound locals and the outbound standard proportional, the latter applicable over the lines now maintaining the varying proportionals as well as over respondents lines. There is no question in the mind of the Commission but what there have been and are at least implied arrangements for the through carriage of this traffic sufficient to constitute all of these routes through routes within the meaning of the act, and their status would not be affected by the suspended inbound proportionals here considered. Respondents have made no attempt to justify the proposed inbound proportional rates in and of themselves. The routes via Kansas City over which the proposed inbound proportional rates would increase the through charges are in many instances shorter than the routes via that point over which the rates would not be increased. HELD, schedules not justified. Grain and Grain Products, 129 I. C. C. 261.

(nn) Under the provisions of paragraph 13 (c) of section 6 of the act, the Commission is authorized to prescribe proportional rates to ports applicable to traffic moving beyond by water, and such rates may differ from the corresponding local rates. They are not restricted to cases where the rates beyond by water are filed with the Commission. Washington Coal Producers Asso. v. U. P. R. R., 129 I. C. C. 499, 500.

(oo) Rates on cotton and linters for export or coastwise movement from points west of Mississippi River to Mobile, Ala., by rail to Alabama ports on Warrior River and barge beyond, found not unduly prejudicial as compared with rail-and-barge rates contemporaneously in effect from same points to New Orleans via Memphis, Tenn., or Vicksburg, Miss. Evidence submitted fails to show similar transportation costs over route sought via Cordova Ala., or that traffic would move over that route if established. However, certain carriers have agreed and will be expected to publish rail-and-barge rates from western Tennessee, western Kentucky, and Mississippi through Cordova, or some other Warrior River port to Mobile, based on principles laid down in 77 I. C. C. 317; 100 I. C. C. 491. Mobile Chamber of Commerce v. A. & V., 129 I C. C. 103.

(pp) Proportional rates on grain and products from Des Moines, Iowa, to Louisiana destinations west of Mississippi River, originating beyond Des Moines, found not unreasonable but unduly prejudicial to extent they exceed corresponding rates contemporaneously maintained from Council Bluffs or Omaha on traffic originating beyond those points. Undue prejudice ordered removed. Des Moines Board of Trade v. F. D., D. M. & S., 129 I. C. C. 138.

(qq) Proposed increased proportional rates on grain and products inbound to Kansas City, Mo.-Kans., and Wichita, Kans., destined to Gulf ports for export, applicable only when movement beyond Kansas City or Wichita is over certain routes, found not justified. Previously, rates over all lines consisted of locals to Kansas City plus standard proportionals beyond, but to meet lower through one-factor rates established by respondents, other lines published varying proportional rates beyond Kansas City. Contention that respondents are entitled to long haul on traffic which they originate, and that through routes do not exist over their lines in connection with varying proportional rates, not sustained, since implied arrangements are sufficient to constitute all these routes through routes. Moreover, mere desire to retain long haul is not sufficient to justify rates proposed. Grain and Products, 129 I. C. C. 261.

(rr) Local rates from Dawkins, Ky., a point on the C. & O. Ry., to points in central and eastern trunk-line territories on lumber originating at Royalton, Ky., a branch-line point, found not unreasonable but unduly prejudicial to shippers at Royalton and unduly preferential of competing shippers located on the Sewell Valley R. R., which connects with C. & O. at Meadow Creek, W. Va., to extent they exceded rates made the same differential under contemporaneous local rates from Dawkins as proportional rates to same destinations from Meadow Creek are made under contemporaneous local rates from latter point. Undue prejudice ordered removed. Dawkins Lbr. Co. v. C. & O., 129 I. C. C. 415.

III. LEGALITY.

See Legality of Rates; Tariffs §14.

(a) Proportional rates, unrestricted in their application, are intermediate rates within meaning of the aggregate-of-intermediates provision of section 4 of the act. Husley-Bessent Co. v. S. A. L., 109 I. C. C. 389, 390.

IV. EVIDENCE AND PROCEDURE.

See Evidence; Procedure Before Commission.

(a) Although local rates are not necessarily controlling in determining measure of proportional rates from and to same points, they are not without probative value. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 334.

V. CONTROL AND REGULATION.

See Control and Regulation.

§1. Jurisdiction of Commission.

See Interstate Commerce Commission I; Jurisdiction of Commission.

(a) A proportional rate is defined as one which applies to part of a through transportation which is entirely within the jurisdiction of the act; that is, the balance of the transportation to which the proportional rate applies must be under a rate filed with the Commission. A rate to a port for shipment beyond by a water carrier not subject to the provisions of this act would not be a proportional rate. Grain and grain products, 122 I. C. C. 235, 270.

(b) Commission is authorized, under provisions of paragraph 13 (c) of section 6 to prescribe proportinal rates to ports applicable to traffic moving beyond by water, and such rates may differ from corresponding local rates and are not restricted to cases where rates beyond by water are on file with commission. Washington Coal Producers Asso. v. U. P., 129 I. C. C. 499, 500.

VI. TARIFFS AND CONSTRUCTION.

See Tariffs.

(a) Section 6 of the act deals with two classes of rates, joint through rates and, in the absence thereof, application of separately established rates factors applicable to through movement over through route. In addition to the two methods of rate making the commission has in rule 5 (b) of Tariff Circular 18-A outlined another plan of making through rates. FOUND: That the so-called Flo-

rida basis book containing proportional rate factors used for making through combination rates on Jacksonville and other Florida junction points does not conform to rule 5 (b), nor are carriers serving a large part of origin territory here involved named as participating carriers. The basis book, therefore, can only be considered as containing proportional rates, which may be used in combination when such combinations are lower than other lawfully established combination rates applicable over route of movement. Lumber from or to Florida Points, 112 I. C. C. 133, 138.

(b) The commission's tariff rules authorize the publication of proportional rates and are silent as to the necessity for canceling the local rates between the same points for application on through traffic, and since the rules do not provide that proportional rates conflict with local rates, it follows that the establishment of a proportional commodity rate removes the application on through traffic of a local commodity rate on the same article between the same points. Spencer Kellogg & Sons, Inc. v. D., L. & W. R. R. Co., 112 I. C. C. 629, 637.

(c) On shipments of crude and refined petroleum from points in Kentucky, Kansas, and Oklahoma to Lawrenceville, Ill., and Findlay, Ohio, no joint rates were in effect. Combinations of proportional and local rates to and from certain intermediate points, subject to combination rule produced lower charges than combinations of proportional rates to and from same intermediate points, not subject to the rule. HELD: The combination rule not being at any time applicable in connection with combinations of proportionals, but only in connection with locals from the intermediate points, and since a proportional commodity rate takes precedence over a local commodity rate on through traffic on same article between same points, the combination of proportionals was legally applicable. Indian Refining Co. v. L. & N., 112 I. C. C. 732.

(d) Complainant attacked combination of proportional rates charged on 444 cars of gasoline, kerosene, naphtha, lubricating oil and fuel oil shipped between July 16, 1923 and March 9, 1924 from Oklahoma to Uniontown, Pa., Luray, Va., Youngstown, Cleveland, Cincinnati and other destinations in Ohio and Indianapolis and Logansport, Ind., as unreasonable and illegal. Complainants introduced no evidence to show that the rates were unreasonable. The only issue to be determined is whether the rates from the points of origin to Lawrenceville, Ill., on the B. & O., Paris, Ill., on the Big Four and Farrington, Ill., on the Pennsylvania were applicable to certain destinations on those lines in Indiana and Ohio. The line of the N. Y. C. from Danville to Chicago is the only line of that carrier east of the Illinois-Indiana state line on which the tariff containing the claimed rates shows specifically named destinations, and the shipments under consideration did not move via that line. It is unnecessary to look to the intention of the framers of the tariff. Even under the literal interpretation urged by complainants it sufficiently appears that the tariff containing the claimed rates did not apply over any route east of the Illinois-Indiana state line except that of the N. Y. C. between Danville and Chicago. HELD, rates to Lawrenceville, Paris and Farrington not applicable from Oklahoma to Ohio and Indiana, complaint dismissed. Pure Oil Co. v. A. T. & S. F. Ry., 123 I. C. C. 624.

(e) The at-and-east rates are proportional rates from the lake ports and apply only on grain which is moved to lake ports by water. They include a charge of 1 cent a bushel for elevation and transfer of lading to cars. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 64.

(f) Charges assessed on wheat, reforwarded under proportional rates from Kansas City, Mo., to various interstate destinations and accorded transit at Leavenworth, Kan., and Sweet Springs, Mo., found applicable and not unreasonable or otherwise unlawful. Under transit tariff, proportional rates applied with transit at points in direct line of shipment, but since movement to Leavenworth necessitated an out-of-line haul, transit at that point and Sweet Springs was not authorized. Moreover, in 91 I. C. C. 58; 100 I. C. C. 303, contention that carrier's tariff authorized protection of proportional rates from Kansas City, with transit at Leavenworth and Sweet Springs, was not sustained, and record in instant case does not warrant a different conclusion. Moore Lawless Grain Co. v. M. P., 123 I. C. C. 647.

(g) The words "when from beyond" implies a line haul movement "beyond" the rate breaking point. Armour & Co. v. Director General, 126 I. C. C. 539, 542.

(h) Provisions of Tariff Circular 18-A, providing that tariffs publishing proportional rates must specifically refer to tariffs naming other rates used in conjunction therewith in making through rates, is restricted to "basing rates." Armour & Co. v. Director General, 126 I. C. C. 539, 540.

(i) Seattle-Portland factor of combination rates on wooden poles from Washington points to California was described in the governing tariff as a proportional rate but was, nevertheless, an arbitrary. Tariff authorized the application of the combination rule "except as otherwise indicated" and restricted use to "separately established commodity (or class) rate factors," thus precluding the use of the rule in connection with the Seattle-Portland arbitrary. Rates assessed found applicable except that overcharge, not due to inapplicable rate, was assessed on one shipment. Complaint dismissed. National Pole Co. v. G. N., 129 I. C. C. 697.

VIII. RESTRICTED RATES.

See Restricted Rates.

(a) Proposal to restrict proportional rates on anthracite coal from Niagara frontier to East Burlington, Ill., via the New York, Chicago & St. Louis R. R. and its western connections, so as not to apply on traffic destined to Burlington, Iowa, found justified. Iowa R. R. Commrs. v. C. R. R. Co. of N. J., 109 I. C. C. 273.

(b) Proportional rates, unrestricted in their application, are intermediate rates within meaning of the aggregate-of-intermediates provision of section 4 of the act. Husley-Bessent Co. v. S. A. L., 109 I. C. C. 389, 390.

(c) Complainant attacked combination rate of 64c charged on table sirup, packed in tin, in carloads, from Montgomery, Ala., to Tampa, Fla., as unjust and unreasonable. Rates on sirup, and commodities in general, from Montgomery to Tampa are constructed by using the rate to Jacksonville, Fla., and a proportional or basing rate beyond. In the present case the through rate of 64c is composed of local of 28.5c to Jacksonville plus 35.5c basing rate beyond. The local rate from Jacksonville to Tampa is 22.5c or 13c less than the proportional rate. The 22.5c rate is published as an interstate rate, but its application is restricted so as not to apply as a basing rate where, as here, a basing rate is specified in Glenns I. C. C. A368. Generally speaking, a proportional rate is lower than the local rate between the same points, and ordinarily there should be no reason for the through rate to exceed the combination of locals for it is obvious that the cost of handling a through shipment is less than that of handling a shipment into and out of some point intermediate to final destination. Thus it is presumptively unreasonable to require the complainant in the instant case to pay a through rate of 64c where under the tariffs it is permissible to ship a carload of sirup into Jacksonville, unload and reload the contents into another car and reship it to Tampa at a cost of 13c less than the rate charged. HELD: Rate attacked unreasonable to extent it exceeded 51c, reparation awarded. Alabama Georgia Sirup Co., v. A. C. L. R. R., 113 I. C. C. 283.

(d) Proposal of the Frisco to cancel proportional rates on grain and products from Omaha, South Omaha, Des Moines, Council Bluffs, and Kansas City, when from beyond, on traffic moving via East St. Louis to destinations in Arkansas on that portion of its line formerly operated by the Jonesboro, Lake City & Eastern Ry., designed to place these destinations on same rate basis maintained to other near-by stations on the Frisco system and to confine routing from these origins to its own line and to the Kansas City gateway, found not justified. If proposed rates are permitted, combinations from Omaha to Arkansas points involved on shipments moving beyond St. Louis or East St. Louis would be higher than on shipments moving beyond Kansas City, and grain operators at St. Louis would be prevented from competing with those at the Missouri River points. Moreover, no evidence was submitted to show that present rates are unduly low. Grain and Products to Arkansas, 115 I. C. C. 457.

(e) In 50 I. C. C. 531, the commission found the application of proportional rates was limited to traffic to those points to which no through rates were published either in the tariff containing the proportional rates or another tariff to which it made specific reference, and the commission found that in view of this limitation the proportional rates were not intermediate rates which would have become effective in the absence of

joint rates and that no violation of section four had been shown. Ryan Fruit Co. v. Director General, 120 I. C. C. 206, 213.

(f) Respondents proposed to restrict the proportional commodity rate of 29 cents on horses and mules, in carloads, from Chicago to Ohio River crossings so as not to apply on shipments routed over or in connection with the Big Four. In 1922 the carriers in central territory ascertained that the I. C. had established a rate of 32 cents on horses and mules from Chicago to Cairo, Ill. To meet this rate there was published for account of these carriers, including the Big Four, a proportional rate of 32 cents from Chicago the crossings applicable on traffic destined to certain points in the Southeast, including Atlanta. These rates became 29 cents in 1922. The Big Four asserts that the rate was made applicable over its line without its sanction, that it does not desire to meet the competition of the I. C. on this traffic, and that it now desires to withdraw from participation therein. Horses and mules are rated second class and if suspended schedules are allowed to become effective the second class rate will apply. The record indicates that the proposed restriction contained in the suspended schedules is only a temporary expedient, there now being under consideration an adjustment which, made effective, will either materially increase the 29 cent rate or result in its cancellation over certain other routes. Piecemeal revision of rates is not desirable except in unusual circumstances not present in this case. HELD, suspended schedules not justified. Horses and Mules from Chicago, 120 I. C. C. 607.

(g) Proposal to restrict proportiona' commodity rate on horses and mules from Chicago to Ohio River crossings so that it will not apply on shipments routed over or in connection with the C., C., C. & St. L. Ry., found not justified. This rate was originally established to meet a rate of the Illinois Central R. R., but the Big Four does not desire to meet competition of that carrier. No justification, however, was shown for higher second-class rates which would result on this traffic from both Chicago and intermediate points. Moreover, the record indicates that proposed restriction is only a temporary expedient, there now being under consideration an adjustment which, if made effective, will either materially increase present rate or result in its cancellation over certain routes. Piecemeal revision of rates, however, is not desirable except in unusual circumstances, not here present. Horses and Mules from Chicago, 120 I. C. C. 607.

(h) Respondents propose to increase their rate on coarse grain, in carloads, from points in Texas to points in Mississippi and Alabama, and propose to restrict the application of rates to certain routes. The present and proposed rates are made on the basis of locals or proportionals to Memphis, Tenn., Vicksburg, Miss., or other lower Mississippi river cities, and locals or proportionals beyond, and under appropriate tariff provision the rates so made through any of these gateways are generally applicable through all of them. The proposed factors east of Vicksburg, 14 c to most of the points in Mississippi, equal or approximate the present reshipping rates east of Memphis, although the distances from Vicksburg are quite generally only third or one fourth as great. Respondents propose to route the traffic via Fort Worth, Tex., which would deprive Waco interests of opportunity to transit. HELD, suspended schedules not justified except those canceling the routing of traffic via McGregor and Waco. Grain and grain products, 126 I. C. C. 454.

PROTECTIVE SERVICE

See Facilities and Privileges §10½; Heater Car Serivce; Perishable Freight; Precooling; Refrigeration.

(a) Tariff rule providing for assessment of a charge of $2 per day for heater service on shipments of potatoes moving under carriers' protective service against cold, and which are held at shipments of potatoes in refrigerator cars from points in Minnesota and other Northwestern States to interstate destinations. Such charge is uniformly applied throughout entire territory where carriers' protective service against cold is effective, and applies not onlv to potato shipments but on fruits and other vegetables as well. The evidence lacks that degree of conviction which should appear before commission attempts to disrupt a uniform and widespread practice. Moreover, shippers may avoid imposition of charge either by placing reconsignment instructions prior to arrival of cars at hold points or by availing themselves of shippers' protective serv-

ice. Northern Potato Traffic Asso. v. B. & O., 113 I. C. C. 511.

(b) Tariff rule providing for carrier's refusal to accept instructions to manipulate side doors of box cars in transit to meet changes in temperature, in connection with shipments of potatoes, found not unreasonable or in violation of section 20 of the act. Assailed rule contains no disclaimer of liability and if carriers prefer to run the risk, if any, entailed by refraining from manipulating doors in transit and expressly disavow any attempt to evade their common-law liability in so doing, it is not seen how present rule could result in ultimate damage. Northern Potato Traffic Assn. v. B. & O., 113 I. C. C. 511.

(c) Upon contention that inasmuch as heater service is not ordinarily necessary during October, November, March, and April, a tariff rule providing for assessment of a charge of $2 per day for heater service on potato shipments moving under carriers' protective service, and held at intermediate points for reconsignment, should be qualified by a provision that no charge will be made unless one or more heaters are fired when the outside temperature is at or below 17 degrees above zero, HELD: The commission does not regard such a qualification practicable. Heater service is primarily a matter of protection and certain fixed expenses, such as constant maintenance of a working crew, are necessary, irrespective of weather. The mere fact that during some days, or portions of days, it is unnecessary to fire the heaters is not sufficient in and of itself to condemn present charge or to warrant a finding that no charge should intermediate points for reconsignment, found not unreasonable as applied to apply. Northern Potato Traffic Assn. v. B. & O., 113 I. C. C. 511, 517.

(d) Complainant alleged rate charged on one car of top iced lettuce shipped August 16, 1924, from Granger, Colorado, to Jacksonville, Fla., was unreasonable and that the assessment of commodity rates on the ice in the packages with lettuce is unjustly discriminatory and unduly prejudicial. Granger is on the D. & R. G. W. about 170 miles southwest of Pueblo, shipment moving over D. & R. G. W. to Pueblo, M. P. to East St. Louis, Ill., L. & N. to Nashville, G. S. & F. and S. A. L. Rate charged combination of $1.84 composed of 80c to Cairo, Ill., and $1.04 beyond. The record does not disclose that the circumstances and conditions surrounding the transportation of iced lettuce are similar to those in respect of fresh fish, fresh meat and other commodities, or that lettuce is sold in competition with fresh fish and fresh meats. HELD, rate attacked not unreasonable or unduly prejudicial, complaint dismissed. Hulsey Bessent Co. v. D. & R. G. W. Ry., 118 I. C. C. 707.

(e) The mere showing that a practice exists with respect to transportation of ice with shipments of certain commodities which differs from that applicable to the transportation of ice with lettuce is not sufficient to establish unjust discrimination or undue prejudice. Hulsey Bessent Co. v. D. & R. G. W. Ry., 118 I. C. C. 707, 709.

(f) Complainant's order for refrigerator cars stated "Shipments to move under full-tank refrigeration," no other instructions being given. Car furnished was iced for loading and was forwarded under standard refrigeration, being reiced at four points en route. Contention that because no instructions were given other than to furnish a car iced for loading shipments should have started with bunkers loaded and moved without further icing en route, not sustained, the applicable tariff providing that when shipments are received from shipper without instructions as to character of service desired, shipments would be handled under full tank refrigeration. Johnston v. A. C. L., 118 I. C. C. 1.

(g) Shipper ordered a half-tank refrigerator car but on date order was placed no car of this type was available. Carrier furnished a full-tank car which was accepted, loaded, and forwarded, bills of lading bearing notation "Full tanks ice." HELD: Under applicable tariffs and circumstances of this case shipper had option of either accepting the full-tank car, or waiting until a car of type ordered became available, but having elected to follow former course, the published tariff charge covering full-tank refrigeration assessed was applicable. Moreover, record fails to establish that carrier received reasonable advance notice, to which it was entitled under its tariffs, of type of car desired. Chase & Co. v. A. C. L., 118 I. C. C. 289.

PUNITIVE DAMAGES

See Interstate Commerce Commission §14 (a).

PURE FOOD LAW

(a) Federal Pure Food Law (Act June 30, 1906, as amended by Act Aug. 23, 1912, Act March 3, 1913 [U. S. Comp. St. § 8724], and Act July 24, 1919), prohibiting transportation of adulterated foods in interstate commerce, do not cover the same field as state pure food laws (St. 1923, §§ 4600, 4601), which are valid regulations of commerce in foodstuffs within the state. Day-Bergwall Co., v. State, (Wis., 1926) 207 N. W. 959.

QUARANTINE REGULATIONS

See Cars and Car Supply §32¼.

(a) Various regulations issued by the Secretary of Agriculture relative to quarantine of diseased animals, pursuant to Act, Feb. 2, 1903 (Comp. St. §§ 8698-8700), and Act March 3, 1905 (Comp. St. § 8701 et seq.), are matters of which Supreme Court may take judicial notice. Thornton v. United States, 46 Sup. Ct. 585.

(b) Passage of diseased cattle by ranging from one state into another constitutes interstate commerce, and is prohibited by Act March 3, 1905 (Comp. St. § 8701 et seq.) Thornton v. United States 46 Sup. Ct. 585.

(c) Act May 29, 1884 (23 Stat. 31), providing for disinfection and quarantine measures to prevent disease of animals spreading from one state into another, HELD not unconstitutional, under Const. Amend. 10, as authorizing federal employees to dip cattle and suppress disease among cattle within state, since, in view of the act and subsequent legislation by Act Feb. 9, 1889 (Comp. St. § 789 et seq.), Act. Feb. 2, 1903 (Comp. St. §§ 8698-8700), and Act March 3, 1905 (Comp. St. § 8701 et seq.), everything authorized to be done was expressly intended to prevent spread of disease from one state to another by passage of diseased cattle in interstate commerce. Thornton v. United States, 46 Sup. Ct. 585.

(d) In action by shipper of cattle against carrier, under Carmack Amendment of Hepburn Act of June 29, 1906, for damages resulting from inaccurate information concerning quarantine regulations of Secretary of Agriculture, authorized under Act Feb. 2, 1903, § 1 and Act March 3, 1905, § 2, no recovery could be had, in absence of fraud, where shipper had access to regulations, and where contract limited carrier's liability for inaccurate information thereon. Manieri v. Seaboard Air Line Ry. Co., (Va., 1927), 137 S. E. 496, 497.

(e) In action under Carmack Amendment of Hepburn Act of June 29, 1906, where shipper had access to rules and information was given gratuitously, carrier was under no duty to inform shipper that live stock from quarantined section could be shipped for immediate slaughter, under Regulation of Secretary of Agriculture, No. 2, § 1; shipment from quarantined section being prohibited generally by Act March 3, 1905, § 2. Manieri v. Seaboard Air Line Ry. Co. (Va., 1927), 137 S. E. 496, 497.

(f) Carrier's agreement with shipper that carrier should not be liable for any mistakes in information furnished concerning quarantine regulations held valid, as outside inhibition of contracts against carrier's negligence, under Carmack Amendment of Hepburn Act of June 29, 1906; carrier not being under duty to furnish such information. Manieri v. Seaboard Air Line Ry Co. (Va., 1927), 137 S. E. 496, 497.

(g) In action against carrier, under Carmack Amendment of Hepburn Act of June 29, 1906, for damages for misinformation given concerning quarantine regulations, no relation of trust or confidence exisited between parties, making carrier liable, in view of contract limiting liability for such misinformation. Manieri v. Seaboard Air Line Ry. Co. (Va. 1927), 137 S. E. 496, 497.

(h) Act Feb. 2, 1903, § 1, authorizing publication of quarantine regulations concerning transportation of live stock and giving such regulations force of law. HELD to charge shipper of cattle with notice thereof, in action under Carmack Amendment of Hepburn Act of June 29, 1906, against carrier for damages for misrepresenting regulations. Manieri v. Seaboard Air Line Ry. Co. (Va. 1927), 137 S. E. 496, 497.

RADIO

(a) If there is conflict between provision in license for operating radio station and regulations established by Act Aug. 13, 1912, c. 287, § 1, latter must control. United States v. Zenith Radio Corporation, 12 Fed. (2d.) 614.

RAIL-AND-PIPE TRANSPORTATION

See Pipe Lines.

(a) Local rate on crude petroleum oil from certain Kentucky points to Owensboro, Ky., for movement by pipe line to Lawrenceville, Ill., FOUND not unreasonable, unduly prejudicial, or otherwise unlawful, as compared with local rates contemporaneously in effect from same and various other points to Evansville, Ind., and Louisville, Ky.; or with proportional rates to Evansville and Louisville, and to Jeffersonville and New Albany, Ind., more distant points. If proportional rates had been established to Owensboro for application in connection with the pipe line, no reason appears why they should have been higher than those to Louisville and Evansville. However, local rates assessed appear not to have exceeded maximum reasonable rates for service performed. Indian Refining Co. v. L. & N. 126 I. C. C. 543.

(b) Shipments of crude oil from certain Kentucky points to Owenboro, Ky., moved from latter point by pipe line to Lawrenceville, Ill. Upon contention that the pipe-line company was not a common carrier but a plant facility and that shipments were local to Owensboro and movement beyond constituted a reshipment, HELD: Owensboro was never considered as the destination for any shipments. There were no storage facilities or refineries at that point, the oil passed from carrier's possession to the pipe line as a matter of necessity, and none was sold locally. Circumstances of movement therefore, imparted an interstate character to shipments. Indian Refining Co. v. L. & N., 126 I. C. C. 543, 544.

RAIL-AND-WATER RATES

See Bills of Lading §3; Differentials §8 (4f); Equalization of Rates §4 (3); Evidence §13 (7), §14 (4); Lighterage; Panama Canal Act; Port-to-Port Rates; Routing and Misrouting §6½; Through Routes and Joint Rates; Water Carriers.

(a) Water-and-rail rate on green coffee from New York to Denison, Fort Worth, Dallas, and Austin, Tex., found unreasonable as compared with rates on like traffic from New York to other destinations and from and to other points for comparable distances. Reparation awarded. Findings in original report, 92 I. C. C. 14, modified. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C. 155.

(b) Although commission has used a ratio of water miles to rail miles for purpose of comparing rail-and-water and all-rail rates, before this is done careful analysis should be made of conditions surrounding transportation of different lines. Under rail-and-water rates traffic must be unloaded from ship and reloaded into cars; and cost of operating a ship is practically same whether it carries full cargo or no cargo, and much depends upon ability of ship to obtain a proper load and return cargo. Moreover, transportation conditions in connection with both rail hauls and water hauls change from time to time. Alexander Grocery Co. v. B., S. L. & W., 104 I. C. C., 155, 161.

(c) Rate on bituminous coal from Allyn's Point to Sterling, Conn., as part of a through interstate movement from Virginia mines by rail and water, found not unreasonable as compared with contemporaneous rates on like traffic between points in same general territory for comparable distances and with rates found reasonable in 83 I. C. C. 563. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412.

(d) Contention that commission is without jurisdiction over an intrastate movement as part of through rail-and-water movement from an interstate point of origin where there is no common control, management or arrangement for continuous carriage or shipment, not sustained. Where there is an original and continuing intention to ship goods from a point in one State to a point in another State the commerce is interstate and its character, as such, is not changed by mere accidents or incidents of billing. See 260 U. S. 166, and 88 I. C. C. 447. United States Finishing Co. v. N. Y., N. H. & H., 107 I. C. C. 412, 413.

(e) Joint rail-and-water rate via New York City on canned fruit, in tins, from Red Creek, N. Y., to Jacksonville, Fla., found unreasonable to extent it exceeded lower combination rail-and-water rate contemporaneously in effect. Reparation awarded. Smith, Richardson & Conroy v. N. Y. C., 107 I. C. C. 553.

(f) Rates on logs for movement from Cooper's Point to Victor Talking Machine Company's siding, both points within the switching district of Camden, N. J., the original movement having been

by barge from James River landings, Va., found unreasonable as compared with charges on various commodities for similar hauls between points within the Philadelphia industrial district, and to extent they exceeded lower switching charge contemporaneously in effect for the same movement on logs but restricted in its application so as not to apply on shipments arriving at or moved from Camden by water. Reparation awarded. Rickards v. P. R. R., 109 I. C. C. 297.

(g) Rate on building paper from Downingtown, Pa., to Jacksonville, Fla., on shipments moving by rail to Philadelphia, thence by water beyond, found not unreasonable as compared with lower rate contemporaneously in effect on like traffic from York, Pa., moving by rail to Baltimore, thence water to Jacksonville, or with lower rail-and-water rate subsequently established from Downingtown to Jacksonville through Philadelphia in order to place complainant in a better position to compete in the Jacksonville market. Baker & Homes Co. v. P. R. R., 109 I. C. C. 396.

(h) Refusal of rail carriers to establish through routes and joint or proportional rates with the Nelson S. S. Co. on same basis and to same extent as contemporaneously maintained with the Pacific S. S. Co and McCormick S. S. Co., competing water lines, found to result in undue prejudice. The Nelson company transports same classes of freight at same time between same ports at same rates under substantially similar circumstances and conditions as its competitors, its service is satisfactory, and it is financially responsible. While service rendered by the competing lines is also satisfactory, this fact alone is insufficient under the law to warrant undue prejudice found in view of the express language of section 3 of the act. The through routes and rates prayed for found desirable in the public interest and ordered established. Nelson S. S. Co. v. B., A. & P., 109 I. C. C. 529.

(i) The commission has repeatedly declined to sustain pleas of rail carriers that their existing water-line connections were ample and satisfactory as a reason for not requiring them to make similar arrangements with another water line. The national policy has been declared to be that a navigable river is a public highway, a natural avenue of commerce, and public interests demand that its advantages be utilized to the fullest extent. The same language is applicable to the ocean. See 31 I. C. C. 281, and other cited cases. Nelson S. S. Co. v. B., A. & P., 109 I. C. C. 529, 536.

(j) Class rate on window glass moving rail and water from Jeanette, Pa., to Jacksonville, Fla., found not unreasonable, discriminatory, or unduly prejudicial as compared with rail and water commodity rates from the same origin point to Savannah, Ga. Allegations of complaint rest solely upon fact that on certain other commodities the two ports are accorded same rates. However, no showing was made that any of the commodities upon which rate parity is maintained compete with window glass, or that assessment of a class rate on window glass and a commodity rate on a competing commodity results in undue prejudice. Towers Hardware Co. v. P. R. R., 109 I. C. C. 651.

(k) Complainant attacked through rail and water rates charged on 24 cars of small arms ammunition between July 25, 1922, and June 9, 1924, from Bridgeport and New Haven, Conn., to Texas destinations as unreasonable, unduly prejudicial and in violation of the fourth section. Shipments moved New Haven to New York, S. P., or Mallory Steamship Lines coastwise to Galveston, Tex., thence rail lines. Allegation of violation of the fourth section is due to the fact that rates to points beyond such as Shreveport, La., Texarkana, Ark., Little Rock, Ark., are lower. The fourth section departures are protected by appropriate fourth section applications. HELD: Rates attacked not unreasonable or otherwise unlawful, complaint dismissed. Herrick Hardware Co. v. N. Y. N. H. & H. R. R., 112 I. C. C. 565.

(l) Complainant attacked class rate charged on one less carload of iron bolts and nuts, from Millsdale, Conn., to Little Rock, Ark., as unreasonable and inapplicable, moving in July 1922. Shipment routed New Haven, Clyde Steamship, Southern and Rock Island. Rated fifth class in southern and fourth in western, rate charged fifth class rate of $1.14. Complainant contended that the applicable rate was fourth class of $1.065 governed by western classification. Both rates were published in Lelands I. C. C. 1418. Class rates from New York and other eastern points were published in that tariff on page 99. These rates were governed by western classification and fourth class was provided. Milldale

was shown as taking New York rate basis. HELD: Applicable rate was $1.065, reparation awarded. Fones Bros. Hdw. Co. v. C. R. I. & P. Ry., 112 I. C. C. 611.

(m) Complainant attacked combination rate charged on a car of canned vegetables in tin and glass shipped on Oct. 18, 1924, from Albion, N. Y., to Jacksonville, Fla., as unreasonable, unjustly discriminatory and unduly preferential. Shipment moved as routed by consignor over the N. Y. C., and Pennsylvania to Baltimore, Md., and M. & M. Transportation Co. beyond, charged 62.5c, composed of fifth class rate of 32c to Baltimore and commodity rate of 30.5c beyond. Complainant is contending for a rate of 57c apparently on the ground that the rate from Albion to Jacksonville should not exceed the commodity rate from Brocton, Fredonia, Ripley and Westfield via Baltimore to Savannah. HELD: Rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Zaring Co. v. N. Y. C. R. R., 112 I. C. C. 621.

(n) Complainant attacked all rail and rail and water rates on tanning extracts and materials, carloads, from New York, N. Y., and other eastern seaboard cities to Buford, Ga., all rail and rail and water since April 1, 1921, as unreasonable, unduly prejudicial and in violation of section four. Buford is on the main line of the Southern Ry., 37 miles northeast of Atlanta. The all rail movement is by way of Potomac Yard, Va., and rail and water movement is through the ports of Norfolk, Va., Charleston, S. C., or Savannah, Ga. Complainant is mainly interested in the rates on quebrache extract and wattle bark, most of its shipments of tanning materials in recent years consisting of these two commodities. Present rates apply uniformly on the different kinds of extracts and materials. No testimony was offered by defendants to justify different rates in the past. Prior to July 1, 1922 an all rail rate of 75.5c was in effect on wattle bark and divi divi pods from New York to Rome, Ga. This rate applied through Buford, and was published subject to rule 77. HELD: Rates attacked on and since Aug. 1, 1924, not unreasonable but prior to that date unreasonable to extent they exceeded from New York prior to July 1, 1922, all rail 60c, lake and rail 59.5c, subsequent to that date 54c all rail and 53.5c lake and rail, reparation awarded. Bona Allen v. B. & M. R. R., 113 I. C. C. 215.

(o) Failure of carriers to establish joint rail-and-water commodity rates on plain iron wire, c. l. and l. c. l., from Fostoria, Ohio, to Savannah, Ga., and Jacksonville, Fla., while contemporaneously maintaining such joint rates from Pittsburgh, Pa., and from Youngstown, Cleveland, and Greenwich, Ohio, to same destinations, found unduly prejudicial. Nonprejudicial relationship prescribed. Seneca Wire & Mfg. Co. v. B. &. O., 112 I. C. C. 95.

(p) Proposed increased translake rate on salt from Ludington and Manistee, Mich., to Chicago, Ill., and intermediate points, applicable over car-ferry route of the Pere Marquette to Milwaukee, and the C., M. & St. P., beyond, found justified. In Salt Cases of 1923, 92 I. C. C. 388, commission fixed minimum translake rate 1 cent under all-rail rates. The Pere Marquette has its own rails from Ludington and Manistee to Chicago, but the differential in favor of translake route attracts all the traffic and in order to secure the entire haul it desires to maintain same rate over both routes. In the general cases carriers were specifically authorized to apply all-rail rate over translake route and commission sees no reason for changing the finding made therein to effect that a translake rate equal to all-rail rate is justified. Salt from Ludington Group, 112 I. C. C. 255.

(q) Upon further argument findings in original report, 100 I. C. C. 127, with respect to a proposed general revision of all-rail and rail-and-water rates on furniture from southern manufacturing points to trunk-line and New England territories, affirmed, and proposed increases embodied therein found justified. Furniture from Southern Points, 112 I. C. C. 302.

(r) Rail-water-and-rail rates on small arms ammunition from Bridgeport and New Haven, Conn., via Galveston, to Texas points, found not unreasonable or otherwise unlawful as compared with lower rates via same route to Shreveport and other farther distant points in Arkansas and Oklahoma. The fourth section departures were protected by appropriate application and lower rate to Shreveport is due to the fact that ratemaking route is via New Orleans and not Galveston. The rate to Shreveport is

made to meet competition of routes through south Atlantic ports and the lines composing south Atlantic port routes are not parties to the complaint. Moreover, the bulk of movement is through the south Atlantic ports, records of carriers failing to show any movement through Galveston except to the Texarkana group. Herrick Hardware Co. v. N. Y., N. H. & H., 112 I. C. C. 565.

(s) Rate on canned vegetables in tin and glass, moving by rail from Albion, N. Y., to Baltimore, thence via water to Jacksonville, Fla., found not unreasonable, as compared with rates on like traffic when moving rail-and-water through New York. Existence of lower rates over other available routes does not of itself warrant a condemnation of the rate charged over route of movement. Zaring & Co. v. N. Y. C., 112 I. C. C. 621.

(t) Rate on canned vegetables, in tin and glass, from Albion, N. Y., to Jacksonville, Fla., moving rail-and-water through Baltimore, found not unreasonable or otherwise unlawful, as compared with lower rates on like traffic when moving rail-and-water through New York, or with joint rates contemporaneously in effect from Mount Morris and other New York points to Savannah and Jacksonville, when moving by rail to Baltimore and water beyond. Zaring & Co. v. N. Y. C., 112 I. C. C. 621.

(u) The mere fact that there has been a considerable movement of a commodity by water from and to certain points is no proof that all-rail rates on same commodity from and to same points were or are depressed or subnormal. Dutton Lbr. Corp. v. Director General, 112 I. C. C. 661, 674.

(v) Respondents proposed to restrict the rates on class traffic and various commodities from Duluth, Minn., and several Michigan points to destinations on the New Haven, so as not to apply in connection with the Grand Trunk by way of the Niagara frontier. The route in question is by way of the Minnesota Atlantic Transit Co., a boat line, to Port Huron, Mich., the Grand Trunk from that point to the Niagara frontier, thence various trunk lines to junctions with the New Haven, and thence over that line of that carrier. That portion of the route from Port Huron to the Niagara frontier is wholly in Canada. Three other routes are available. The first is in connection with the same boat line to Port Huron, thence main line of the Grand Trunk through Montreal, Que., or Swanton, Vt., and C. V. thence to Willimantic, Conn., where connection is made with the New Haven. The second is identical with the route under consideration except that the intermediate carrier from Port Huron to the Niagara frontier is the P. M. The third differs from the route sought to be eliminated in that the entire transportation from Duluth to Buffalo is by way of the Great Lakes Transportation Corporation, another boat line. The jurisdiction of the Commission with respect to the divisions accruing to the New England carriers out of joint rates with their Canadian connections obtains only in so far as the transportation takes place in the United States. Thus, although the joint rates are now in effect over the route sought to be eliminated and the use of that route is of material importance to shippers, the principle referred to as ordinarily controlling a situation of this kind has no application here. The Commission has no authority either to require the establishment of joint rates over this route or to prevent their cancellation. HELD, proposed schedules not justified. Elimination of Grand Trunk Ry. from certain routes, 115 I. C. C. 609.

(w) Jurisdiction assumed by commission over an intrastate rail haul where such movement was part of a through rail-and-water movement. Kay County Gas Co. v. G., C. & S. F., 115 I. C. C. 736.

(x) Rates on compressed cotton over all-water-and-rail routes from Opelousas and Bunkie, La., to destinations in New England and New York found unreasonable to extent they exceeded rates contemporaneously maintained on like traffic from Shreveport and Alexandria, La., to same destinations. Reasonable rates for future prescribed and reparation awarded. Manget Bros. Co. v. A. C., 118 I. C. C. 85.

(y) Rail-water-and-rail rates on newsprint paper from Berlin, N. H., to Birmingham, Ala., which exceeded or exceed similar rates contemporaneously maintained to Memphis and Nashville, found unreasonable and to subject Birmingham to undue prejudice. Reparation awarded and undue prejudice ordered removed. Birmingham News Co. v. A., B. & A., 118 I. C. C. 205.

(z) Respondents, The St. Louis &

Tennessee River Packet Co. and connecting rail carriers proposed to change the rates and description on cotton from landings on the Tennessee River between Florence, Ala., and Paducah, Ky., served by respondent to New Orleans from $3.80 in bales, uncompressed, per bale, average weight 500 pounds to 94.5 cents per 100 pounds in bales, compressed or uncompressed, with privilege to carrier of compressing at origin or in transit when delivered to the carrier uncompressed. Both the present and the proposed tariffs provide for interchange with respondent rail carriers at a number of points, including Riverton, Ala., and Johnsonville and Danville, Tenn., through which the bulk of the traffic moves. The rates on cotton, carriers privilege, from these points to New Orleans are 84, 81 and 81 cents, respectively. The proposed rates will remove the possibility of fourth section violations, which would occur when, if ever, cotton should move uncompressed from the intermediate points to New Orleans. Apparently the water hauls are short. From many of the rail points the rates apply over two or more lines. The evidence fails to show any justification for maintaining rates from the boat landings on a higher basis than the joint line rates applicable from rail points in the same territory. HELD, proposed schedules not justified, but that the carriers privilege description and rates no higher than the 84 cent rate applicable from Riverton would be reasonable for application on cotton from the Tennessee River landings west of Florence to New Orleans. Cotton from Tennessee River Landings, 120 I. C. C. 51.

(aa) The provisions of the act relating to water-and-rail transportation to foster and preserve in full vigor both rail and water transportation do not tie the hands of the commission in dealing with proposals of rail carriers to establish unreasonably low ex lake rates. Ex Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 78.

(bb) Paragraph 13b of section 6 confers upon the commission power to establish through routes and maximum joint rates between and over the rail and water lines and with respect to the transportation referred to in the opening paragraph of paragraph 13 of section 6. Wool Rates Investigation, 1923, 120 I. C. C. 493, 496.

(cc) The commission has recognized that the cost of transportation per mile by water is comparatively high for short distances and very small for long distances. In a comparison of water transportation, with rail transportation, where a ratio is used for the water haul, the ratio used can not be supposed to be the exact equivalent of the water haul expressed in terms of rail mileage. A comparison of such dissimilar services can not be made with mathematical accuracy Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

(dd) Proposed reduced rate on ex-lake iron ore from Chicago to Granite City, Ill., found justified. Carriers showed that they carry a large volume of coal from mines near Granite City to Chicago with a practically complete empty-return movement due to present rate proving too high to attract the ore traffic. The rate proposed, which is not less than a reasonable minimum, will enable a furnace at Granite City to share in ore movement by lake and enable it to increase its output in competition with rival plants located in Chicago district and elsewhere. Rail carriers will not be deprived of any important traffic and the extremely low all-rail rates now in effect offset the probability of a rate war. Moreover, the rail-lake-and-rail route to Granite City is a natural one possessed of marked economic advantages, and its increased utilization seems clearly in public interest. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75.

(ee) The commission has not interpreted various provisions of the act relating to water-rail transportation, presumably enacted by Congress in furtherance of its stated policy "to foster and preserve in full vigor both rail and water transportation," as tying its hands in dealing with proposals of rail carriers to establish unreasonable low ex-lake rates. See also 69 I. C. C. 589. Ex-Lake Iron Ore from Chicago to Granite City, 120 I. C. C. 75, 78.

(ff) Shipment specifically routed rail-and-water was refused by water carrier because of damaged condition. Complainant, upon learning of refusal to transport, wired carrier, "If you can not cooper so acceptable ship all rail * * * with understanding claim filed difference rate and other charges." Carrier thereupon diverted shipment to destination via all-rail route. HELD, it was carrier's duty to forward over route designated by shipper. Necessity for change

in routing resulted from damaged condition, and telegram sent by complainant was intended merely to mitigate damages and did not order diversion or relieve carrier of duty of forwarding as routed. Shipment was therefore misrouted. Reparation awarded. Lewis-Chitty Consolidated v. B. & O., 120 I. C. C. 384.

(gg) Establishment of through routes and joint rail-and-water rates on wool and mohair from interior points on shipments moving via Pacific ports and Panama Canal to Boston and other north Atlantic ports found not necessary or desirable in public interest, and failure of carriers to establish same and issue through bills of lading found not unreasonable or otherwise unlawful. The commission has never required establishment of joint rail-and-water rates when, as here, both the rail and water carriers are opposed thereto and no such rates are in effect on any commodity over routes here involved. While the time may not be far distant when their establishment on many commodities will become a reality, the record is not convincing that as yet the public interest, considered broadly, requires that such joint rates be prescribed on wool. Wool Rates Investigation 1923, 120 I. C. C. 493.

(hh) The commission has power to establish through routes and prescribe maximum joint rail-and-water rates on wool and mohair from interior points on shipments moving via Pacific coast ports and Panama Canal to Boston, Mass., and other north Atlantic ports. See 87 I. C. C. 392 and other cited cases. Wool Rates Investigation, 1923, 120 I. C. C. 493, 495, 497.

(ii) The ratio in favor of water transportation as compared with rail transportation increases with the length of water haul, but what the ratio may be in case of long hauls between the costs through Panama Canal is purely speculative. Wool Rates Investigation, 1923, 120 I. C. C. 493, 503.

(jj) In cases involving prescription of through routes and joint rates for rail-and-water movements, expense of transfer between rail carrier and water line is a factor which must be taken into consideration. Wool Rates Investigation, 1923, 120 I. C. C. 493, 506.

(kk) While commission has frequently prescribed joint rates lower than the aggregate of intermediate local rates both for all-rail and for rail-and-water movements, it does not follow that in all cases such rates should be prescribed. Wool Rates Investigation, 1923, 120 I. C. C. 493, 506.

(ll) Complainant attacked commodity rates charged on cocoa beans, carloads, from New York, N. Y., to Salt Lake City, Utah, applicable over ocean and rail routes as unreasonable, and in comparison with rates to Los Angeles and San Francisco, Calif., Portland, Ore., and Seattle and Spokane, Wash., unduly prejudicial. On Sept. 1, 1923 a rate of $1.35 was published over the ocean and rail lines from New York to California points and intermediate points and as the D. & R. G. W., through error, was shown as a participating carrier it was applicable to Salt Lake City until by an amendment to the tariff on Dec. 1, 1924 the concurrence of that line was eliminated. The S. P., did not participate in the $1.35 rate over the route through Salt Lake City, and its application was limited to the route of the Mallory line and rail connections. The $1.35 rate was the basis applicable from Chicago and other points in group D. The ocean and rail rates on cocoa beans from New York to Salt Lake City bear the usual relationship to the rail rates between the same points. HELD, rate attacked not unreasonable, complaint dismissed. McDonald Chocolate Co. v. A., T. & S. F. Ry., 122 I. C. C. 493.

(mm) Complainant alleged less carload rate on cotton factory products from Mobile, Ala., to Rockland, Md., applying over the Mallory Steamship Line and Pennsylvania is unreasonable. Rockland is on the Pennsylvania 7 miles north of Mount Vernon station, Baltimore, Md. Prior to Oct. 15, 1925 the applicable rate was 93.5 cents made up of commodity rate of 70.5 cents to Baltimore and 23 cents beyond. Effective Oct. 15, 1925 a joint commodity rate of 86.5 cents was established. HELD, rate for future unreasonable to extent it exceeds 75 cents, overcharges to be refunded. Cotton Mills Products Co. v. Mallory Steamship Co., 123 I. C. C. 25.

(nn) Complainant attacked commodity rate charged on three cars of redwood lumber shipped from Pittsburgh, Calif., Sept. 8 and 27, 1923 to Hayden, Ariz., as unreasonable and unduly prejudicial. Shipments originated at Casper, Calif., a waterlocked port north of San Fran-

cisco Bay. They moved to Pittsburg by steamship and beyond that point over S. P., to Maricopa, Ariz., thence A. E. Distance Pittsburg to Hayden, 963 miles, charged local rate of 64.5 cents. At the same time there was in effect a proportional rate of 49.5 cents from Pittsburg to Phoenix, 884 miles, and to Mesa, about the same distance, applicable on lumber originating at Casper and certain other California ports and moving to Pittsburg by water. When the shipments moved there was no ex water rate from Pittsburg to Hayden but a rate of 55 cents became effective Dec. 11, 1923. The subsequent reduction of the rate is not conclusive of the unreasonableness of the higher rate, HELD, rate attacked not unreasonable or otherwise unlawful, complaint dismissed. Redwood Mfg. Co. v. S. P. Co., 123 I. C. C. 30.

(oo) The nonconcurrence plan of publishing ocean-rail rates should be continued and joint through rates substituted therefor. The commission has repeatedly disapproved similar through rates applied to all rail routes. Consolidated Southwestern Cases, 123 I. C. C. 203, 380.

(pp) Rate on cocoa beans, from New York, N. Y., to Salt Lake City, Utah, applicable over ocean-and-rail routes through Galveston, Tex., found not unreasonable or unduly prejudicial as compared with rates to Los Angeles, San Francisco, Portland, Seattle, and Spokane. Rates assailed bear the usual relationship to rail rates between same points and comparisons made by complainant do not justify a finding that rates attacked are out of line with rates on comparable commodities. McDonald Co. v. A., T. & S. F., 122 I. C. C. 493.

(qq) No necessity therefor being shown, request for establishment of additional ocean-and-rail routes on cocoa beans from New York to Salt Lake City, denied. McDonald Chocolate Co. v. A., T. & S. F., 122 I. C. C. 493.

(rr) Commission can not fix freight rates or transit charges so as to preserve a fixed relationship between through charges by all-rail and rail-lake-rail routes. Birkett Mills v. D., L. & W., 123 I. C. C. 63, 67.

(ss) Owing to difficulty of ascertaining accurate ratio of water miles to rail miles, it is difficult to compare ocean-rail rates with all-rail rates. Consolidated Southwestern Cases, 123 I. C. C. 203, 289, 290.

(tt) There appears to be no generally accepted ratio of water to rail miles but carriers have frequently estimated comparatively short water distances from north Atlantic to south Atlantic ports on basis of approximately 2.5 statute water miles to 1 rail mile. In 81 I. C. C. 312, in considering the ocean distance from New York to Galveston, commission adopted a ratio of 3 miles of water haul to 1 mile of rail haul, and in an earlier case, 24 I. C. C. 570, a ratio of 6 to 1 was used between the same points. Consolidated Southwestern Cases, 123 I. C. C. 203, 369.

(uu) It is generally accepted that where water hauls are long the ratio of water miles to rail miles may properly be greater than where hauls are comparatively short. Consolidated Southwestern Cases, 123 I. C. C. 203, 370.

(vv) Generally speaking, terminal services are relatively more expensive in connection with water service than with rail service. On other hand, what may be termed line-haul expenses of ocean carriers are relatively low for long hauls. Consolidated Southwestern Cases, 123 I. C. C. 203, 370.

(ww) Ocean-rail rates between north Atlantic ports and interior trunk-line and eastern defined-territory points, on the one hand, and points in Kansas and in the Southwest, including Texas differential territory, on the other, via south Atlantic and Gulf ports, found unreasonable and unduly prejudicial. Reasonable and nonprejudicial rates prescribed for future and findings in 95 I. C. C. 188, that ocean-rail rates via Gulf ports should not exceed 80 per cent of the combinations on those ports and should include marine insurance, overruled. Consolidated Southwestern Cases, 123 I. C. C. 203, 377, 378.

(xx) Tariffs naming one-factor through ocean-rail rates between interior trunkline and eastern defined-territory points and the Southwest and Kansas-Missouri territory without concurrence of rail lines to north Atlantic ports, found unlawful. Such rates required to be published as joint through rates in accordance with provisions of section 6 of the act and commission's tariff rules promulgated pursuant to that act. Consolidated Southwestern Cases, 123 I. C. C. 203, 380.

(yy) Refusal of rail carriers at Duluth to accord the Minnesota-Atlantic Transit Co., increased divisions for handling carload freight between cars and floor of its privately owned docks, found not unjustly discriminatory, unduly prejudicial, nor in violation of section 1 (4) of the act. The law does not require defendants to perform service sought merely because they perform them at their own docks so long as no discrimination is practiced. Here defendants perform no loading or unloading at any private dock, at any dock leased by it to steamship lines or shippers, or at docks of other carriers to which, for convenience of shipper to steamship line, it switches cars. Moreover, the issue of divisions has not been presented with sufficient particularity to warrant a finding as to their reasonableness. Minnesota-Atlantic Transit Co. v. C., St. P., M. & O., 123 I. C. C. 485.

(zz) In Manget Bros. v. A. C. R. R. Co. 118 I. C. C. 85, the Commission found that the rates on compressed cotton, over rail water and rail routes from Opelousas and Bunkie, La., to New England and New York which had exceeded or might exceed the rates from Shreveport and Alexandria, La. to the same destinations, had been and were unreasonable and awarded reparation. The findings, through oversight, were confined to rates on compressed cotton, although the complaints attacked the rates on both compressed cotton and uncompressed cotton, the latter being compressed by and at the expense of carriers. HELD, rates attacked unreasonable to extent they exceeded rates from Alexandria and Shreveport, reparation awarded. Manget Bros. Co. v. A. C. R. R., 126 I. C. C. 403.

(3a) Rail-water-and-rail rates on finished wall paper from Niagara Falls, N. Y., to Dallas, Tex., FOUND not unreasonable as compared with all-rail rates between the same points; with those from Kansas City, Mo., and Chicago, Ill., or with rates contemporaneously in effect on wrapping paper. Carriers point out that wall paper is more susceptible to damage than wrapping paper, and there is no relationship or analogy between that commodity and wall paper. Moreover, in 122 I. C. C. 333, rates on wall paper from Joliet, Ill., to Dallas were found not unreasonable as compared with those on wrapping paper. Tex-Mex-Jobbing House v. L. V., 126 I. C. C. 175.

(3b) Upon contention that commission has no jurisdiction over rates on traffic moving up to Lake Erie ports for transshipment by vessel, upon theory that because of lack of control over the water carriers which handle traffic beyond the ports, commission has no authority to deal with or prescribe proportional rates on traffic over which it does not have jurdisdiction for the entire movement from point of original shipment to point of ultimate destination, HELD: Where transportation to the port is interstate or foreign in character, it is subject to commission's jurisdiction under general provisions of section 1 of the act, irrespective of the mode of transportation beyond the port. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 313, 314.

(3c) Commission's finding in former report 118 I. C. C. 85, were confined to rates on compressed cotton. However, except that uncompressed cotton is compressed by and at the expense of carriers, circumstances surroundings its movement and that of compressed cotton are identical. Accordingly, original report modified and rates on uncompressed cotton moving rail-water-and-rail from Opelousas and Bunkie, La., to destinations in New England and New York, FOUND unreasonable to extent they exceeded rates contemporaneously maintained from Shreveport and Alexandria, La., to same destinations. Reasonable rates prescribed for future and reparation awarded. Manget Bros. Co. v. A. C. R. R. 126 I. C. C. 403.

(3d) Shipments of linseed oil, in tank-car loads, previously imported, from San Francisco to Los Angeles, found to have been intrastate and beyond the commission's jurisdiction. The oil arrived from England, was pumped directly into complainant's storage tanks near the wharf, and subsequently reloaded into tank cars and moved to destination. Complainant's contention that movement was in foreign commerce is based solely upon fact that oil originated in England. However there was no connection between ocean transportation to the United States port and subsequent rail movement beyond. Oil passed into possession and control of complainant at San Francisco and remained part of its general stock for commercial distribution. Moreover, complainant does not contend that the stoppage at San Francisco was merely a transportation incident between receipt from water carriers and subsequent rail

movement. See 6 Fed. (2d) 911; 209 U. S. 211; 102 I. C. C. 363. Fuller & Co. v. S. P., 128 I. C. C. 199.

(3e) Rate and minimum weights on poles from San Pedro to Thenard, Calif., being part of through movement from interstate points, of shipments reaching San Pedro by water, found not unreasonable or otherwise unlawful as compared with rates accorded competitors at Los Angeles, or with rates and minimum weights on lumber between points in the Los Angeles harbor district. While poles received by competitors are creosoted in the Pacific Northwest thus reducing weight of poles transported, creosoting is permitted at Thenard and the creosoted poles move at the lower minimum sought on the green poles under the through rates from San Pedro to Los Angeles and other southern California destinations. Although none of shipments involved exceeded the applicable minimum, evidence does not establish that cars covered by the complaint were were loaded to full capacity or that the applicable minimum could not have been loaded. Moreover, in 87 I. C. C. 1, per-car rate on lumber equal to that here assessed was found reasonable. Baxter & Co. v. S. P., 128 I. C. C. 211.

(3f) All-rail and river-and-rail rates on refined sugar from Louisiana refining points to Shreveport or Monroe, La., to extent they are lower, distance considered, than corresponding contemporaneous rates maintained on interstate traffic from same points to Wilmot, Texarkana, and Hope, Ark., or from Sugarland or Texas City, Tex., to Shreveport, found to result in undue preference and advantage of competing shippers in intrastate commerce at said Louisiana points, in undue prejudice and disadvantage to Arkansas and Texas points, and in unjust discrimination against interstate commerce. Manner of removing undue prejudice and discrimination prescribed. Sugar Between Louisiana and Texas Points, 128 I. C. C. 309.

(3g) All-rail rates on refined sugar from New Orleans and other Louisiana refining points to points in Arkansas, found unreasonable as compared with lower rates contemporaneously in effect to numerous points in southern territory; to various points on the Mississipi and Ohio Rivers for comparable distances; and to extent they exceed rates that will result from application of distance rates prescribed in Consolidated Southwestern Cases, 123 I. C. C. 203. Although evidence is inadequate to determine maximum reasonable river-and-rail rates, unless there are circumstances and conditions not revealed by the record, river-and-rail rates related differentially to all-rail rates on usual bases should be established. Sugar between Louisiana and Texas Points, 128 I. C. C. 309.

(3h) Complainant alleged that the all rail and rail water rates on furniture and household furnishings, in straight and mixed carloads and in less carloads, from Memphis, Tenn., to specified rate subdivisions of southern and official territories are unreasonable and unduly prejudicial; and that the all rail rates on these commodities to certain intermediate Virginia and West Virginia points which are higher than the rates to Virginia cities beyond, are unreasonable and in violation of the fourth section. Mixed furniture, in carloads, is rated second class in official classification and third in southern. Chattanooga, Tenn., and Atlanta, Ga., are the chief competitors of Memphis in southern territory, but it also meets the competition of North Carolina points, Little Rock and other Arkansas points, and furniture manufacturing centers in official territory. RATES TO VIRGINIA AND EASTERN CITIES. The rates from Memphis to trunk line and New England territories are commodity rates published on the same basis as the former class rates governed by the official classification, a method of publicatoin by which increased rates on furniture were avoided when the class rates from Memphis to those territories were revised on Jan. 15, 1922, following 64 I. C. C. 107. In the reverse direction class rates apply on furniture which complainants say would be prohibitive if established from Memphis, in view of the lower rates maintained from Chattanooga and Atlanta. Class rates are in general applicable on furniture, in carloads and l. c. l. between points in trunk line territory and between trunk line and central territories. Class rates are also applicable from trunk line territory to the south which are higher than the commodity rates in the reverse direction. It appears that these rates are for the most part relatively lower than the rates which the Commission has found reasonable from central territory manufacturing points to destinations in trunk line territory, and also lower than rates in the reverse direction and that on the

whole they compare well with rates to eastern port cities from Atlanta and Chattanooga, except in the cases of the l. c. l. rates on mattresses. No reason appears why the commodity rates on the mattresses should not be canceled, so that the lower first class rates under the southern classification may apply. RATES TO CENTRAL AND BUFFALO PITTSBURGH TERRITORIES. The rates between Memphis and Buffalo Pittsburgh territory are joint rates; but Ohio river combinations apply to central territory, whereas in the reverse direction joint rates are maintained. Shippers of furniture between points in central territory pay class rates on all less carload shipments and second class rates in nearly all instances on carload shipments. The fact that furniture moves on class rates within central territory and that the Commission has found this reasonable, is not proof that furniture should move on class rates from Memphis to central territory destinations. The revised class rates between southern and central territories will be governed by the southern classification and will be much higher in level than the central territory class rates. Rates made on the basis of 60% of the revised first class rates will be reasonable for application on mixed furniture, in carloads, from Memphis to central territory destinations. No justification has been offered for the disparity as between the northbound and southbound rates. RATES TO OHIO RIVER CROSSINGS AND ST. LOUIS. It has not been shown that the rates assailed on furniture from Memphis are unreasonable. It has been shown, however, that certain of the rates to these destinations from competing points of production in southern territory and from Chicago are improperly related to the rates from Memphis. RATES TO THE SOUTHEAST. RATES TO THE MISSISSIPPI VALLEY. Complainants seek rates to the Mississippi valley from Memphis "which do not exceed relatively" the rates from the alleged preferred points. Commodity rates apply from Memphis on carloads and class rates on less carloads. The evidence bearing upon the rates to Birmingham, Ala., will not support a finding on the allegation of undue preference of Little Rock, Ark. RATES TO NORTH CAROLINA AND VIRGINIA. In respect of these rates undue preference is alleged of manufacturing points in North Carolina and Virginia to the extent that the rates from Memphis to such points exceed the rates in the reverse direction. RATES TO CERTAIN VIRGINIA AND WEST VIRGINIA POINTS. Complainants show that the rates to certain Virginia and West Virginia points on the C. & O. and N. & W. exceed the rates to the more distant Virginia cities over the same routes. From Memphis all Virginia cities take the Norfolk basis, but to the designated intermediate points the carload rates are made on Cincinnati combinations and the less than carload rates on the nearest Virginia city combination. Memphis Freight Bureau v. A. G. S. R. R., 128 I. C. C. 445.

(3i) Complainant assailed rates charged on certain less carloads of food products and merchandise shipped between April 1 and May 29, 1924, from Hoboken, N. J., to Norfolk and Richmond, Va., as unreasonable, unduly prejudicial and illegal. Shipments were loaded in trap cars at complainants warehouse on the Hoboken Mfrs. R. R., at Hoboken, and moved over that line D. L. & W. and old Domino Steamship Co. at Norfolk. Shipments moved to Richmond-Hoboken Mfrs., Lackawanna, Richmond-New York Steamship Lines. Charged combination to and beyond New York. On Jan. 5,1925, subsequent to the movement here considered, defendants amended the provision in the terminal tariff in such a manner as to make the rates applying in connection therewith inapplicable over the lines of the steamship lines. If it was intended that the rates should not apply from New York Lighterage station, Hoboken, on traffic originating on the Hoboken Mfrs. and routed over the steamship lines, the tariff should have contained appropriate provisions in terms that could not give rise to a reasonable doubt as to this intention. HELD, rates applicable were class rates, reparation awarded, complaint dismissed. Jewell Tea Co. v. D. L. & W. R. R. 129 I. C. C. 424.

(3j) Complainant alleged fifth class rate charged on 16 cars of quebracho extract from New York and Brooklyn, N. Y., to St. Louis, Mo., was unreasonable. Shipments moved between July 12, 1924, and June 10, 1926. Thirteen moved over Ocean Steamship Co. to Savannah, Ga., thence C. of Ga., I. C. and the three remaining shipments moved Old Dominion Steamship Co. to Norfolk, Va., thence rail over N. & W., Pennsylvania, Terminal delivery, rate charged 62c. The rates assailed are made 4c less than the all rail fifth class rate. An all rail sixth class

rate of 52.5c applied from Glenn Falls, N. Y., to St. Louis, and 40c from Norfolk to St. Louis. On July 20, 1926, an all rail commodity rate of 52.5c was established on dry and liquid tanning extract from New York and Brooklyn to St.Louis. On Aug. 31, 1926, a commodity rate of 50.5c was established from New York rate points to St. Louis over both routes of movement, based on a differential of 2c under the all rail commodity rate. HELD, rate assailed not unreasonable, complaint dismissed. Herman Oak Leather Co. v. C. of G. Ry., 129 I. C. C. 725.

(3k) Rates on cotton and linters for export or coastwise movement from points west of Mississippi River to Mobile, Ala., by rail to Alabama ports on Warrior Rver and barge beyond, found not unduly prejudicial as compared with rail-and-barge rates contemporaneously in effect from same points to New Orleans via Memphis, Tenn., or Vicksburg, Miss. Evidence submitted fails to show similar transportation costs over route sought via Cordova, Ala., or that traffic would move over that route if established. However, certain carriers have agreed and will be expected to publish rail-and-barge rates from western Tennessee, western Kentucky, and Mississippi through Cordova, or some other Warrior River port to Mobile, based on principles laid down in 77 I. C. C. 317; 100 I. C. C. 491. Mobile Chamber of Commerce v. A. & V., 129 I. C. C. 103.

(3l) Receivers of coal by the rail-and-water route from Pennsylvania anthracite fields fix selling price of anthracite at Boston and the determinative factor in that selling price is the rail-and-water rate. Chadwick Coal Yard Co. v. N. Y., N. H. & H., 129 I. C. C. 165, 172.

(3m) Rates on finished wall paper from points in Illinois, Missouri, New York, and Pennsylvania to Dallas and Fort Worth, Tex., via all-rail, rail-water-and-rail, and water-and-rail routes, found not unreasonable as compared with rates on same and various other paper articles between same and various other points for comparable distances. All-rail rate assailed in 122 I. C. C. 333, was found not unreasonable as was the rail-water-and-rail rate under consideration in 126 I. C. C. 175, from Niagara Falls, N. Y., to Dallas, which was higher than rates here under consideration. Moreover, rates assailed are lower than fourth-class rate on wall paper n. o. i. b. n., and are generally lower than those prescribed in 123 I. C. C. 203, for application in same general territory. Apex Co. v. A. & V., 129 I. C. C. 283.

(3n) If a shipper desires his shipment to move over a rail-and-water route, which is cheaper than the all-rail route, he must specify such routing. See 68 I. C. C. 485; 83 I. C. C. 483. South Alabama Grocery Co. v. C. of G., 129 I. C. C. 327, 328.

(3o) Rate on bituminous coal from Castle Gate group mines in Utah to Seattle, Wash., and other north Pacific coast ports for transshipment beyond by water to Alaska or foreign countries, found not unreasonably low or otherwise unlawful. Complainant contends that since rate assailed is lower than rates prescribed in 80 I. C. C. 383; 89 I. C. C. 666, between same points, the rate relationship between the mines established by prescribed rates has been disturbed and burden is upon carriers to justify the reduced rate. However, rate assailed applies only for transshipment beyond by water and was not considered in those cases, nor is there anything to indicate that it is not remunerative or impairs other rate structures. Washington Coal Producers Asso. v. U. P., 129 I. C. C. 499.

(3p) Class D rates and switching charges collected on interstate shipments of smithing coal from San Diego to Los Angeles, Calif., originating at Douglas, W. Va., found not unreasonable or otherwise unlawful. Exceptions to governing tariff provided a minimum class scale applicable to the total of the combinations of separately established class rates or class and commodity rates applicable on continuous through movements. Complainant's contention that switching charge, under the tariff, should be considered a commodity rate, and that minimum class scale was applicable to combination of class rates plus switching charge, not sustained. The switching charge was an incidental one for a special service performed upon completion of the line haul. Romann & Bush Pig Iron & Coke Co. v. A., T. & S. F., 129 I. C. C. 509.

(3q) Contention that commission has power to prescribe maximum reasonable joint rates only, and that inasmuch as all-rail rates are depressed they can not

properly be used as a yardstick for measuring maximum reasonable rail-barge rates, not sustained. Obviously if another through route is sought between certain points in competition with existing through routes, joint rates prescribed over the new through route must be comparable with those over existing through routes or they will be of no avail. Under section 15 (3) of act commission is empowered to establish through routes and joint rates "or the maxima or minima, or maxima and minima, to be charged (or, in case of a through route where one carrier is a water line, the maximum rates, fares, and charges applicable thereto)," which is an alternative to preceding provision empowering commission to establish through routes and joint rates without specifying that latter must be on either maximum or minimum level. Doubtless rates must be reasonable but must not necessarily reach pinnacle of reasonableness. See 92 I. C. C. 528, 546 and other cited cases. Inland Waterways Corp. v. C. G. W., 129 I. C. C. 521, 529, 531.

(3r) All-rail and water-and-rail rates on sugar from San Francisco and Crockett, Calif., to Missoula, Mont., found unreasonable as compared with lower rates, distance considered, contemporaneously in effect from San Francisco to Utah, Colorado, and various other points; and rates from Portland, Oreg., Seattle and Tacoma, Wash., to Missoula, found unreasonable and unduly prejudicial to extent they exceed corresponding rates from Seattle, Tacoma, and Portland to Spakone, Wash., by more than 20 cents per 100 pounds. Reasonable rates prescribed for future and reparation awarded. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591.

(3s) Joint water-and-rail rate on sugar from San Francisco, Calif., and points taking same rates, to Spokane, Wash., through ports of Portland, Oreg., and Seattle and Tacoma, Wash., found not unreasonable or otherwise unlawful as compared with rates contemporaneously in effect from Salt Lake City and Ogden, Utah, and elsewhere, but local rate from Portland, Oreg., to Spokane, Wash., found unreasonable as compared with rates between various points for comparable distances. Reasonable rates prescribed for future and reparation awarded. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591.

(3t) All-rail and water-and-rail rates on canned goods from San Francisco, and points taking same rates to Missoula, Mont., found not unreasonable as compared with rates contemporaneously maintained to various other Montana, Idaho, and Utah points for comparable distances, but unduly prejudicial to extent they exceed those contemporaneously in effect to Spokane, Wash., by more than 20 cents per 100 pounds. M'Clintock-Trunkey Co. v. McCormick S. S. Co., 129 I. C. C. 591.

(3u) Fifth-class water-and-rail rates on quebracho tanning extract from New York and Brooklyn to St. Louis, Mo., found not unreasonable as compared with lower all-rail sixth-class rates from Glenn Falls, N. Y. and all-rail commodity rates from Norfolk, Va., to same destination, or with lower commodity rates applicable all-rail or rail-and-water, subsequently established. In 120 I. C. C. 711, fifth-class rates on liquid tanning (quebracho) extract, from Brooklyn to Winchester and Peabody, Mass., were found not unreasonable and evidence of record does not warrant a different conclusion with respect to rates assailed. Herman Oak Leather Co. v. C. G., 129 I. C. C. 725.

RAILROAD COMPETITION

See Differentials; Discrimination §8 (3), §8 (4); Equalization of Rates §4 (2); Evidence §14 (3); Long and Short Hauls §4, §4¼, §9; Rail-and-Water Rates. Reasonableness of Rates §8 (2), §27½, §37; Through Routes and Joint Rates.

RATE SCALES

(a) In view of particular circumstances and conditions surrounding transportation and marketing of cement the commission is becoming more and more persuaded that there is substantial merit in the destination-scale principle for more general application to cement rates in western territory. Iola Cement Mills Traffic Asso. v. A. V. I., 115 I. C. C. 49, 63.

II. ELEMENTS DETERMINING REASONABLENESS.

§2. In General.

(a) Regardless of who complains about rates or who would use them, shippers are entitled to reasonable rates.

Cattle & Horse Raisers Asso. v. N. P., 104 I. C. C. 51, 60.

(b) Section 15a of the act requires or authorizes commission to fix remunerative reasonable rates in circumstances which embrace honest, efficient, and economical management as a condition or limitation. Commission should have information in that respect which will aid an effective exercise of its duty and authority, but it is not commanded to insure or empowered to enforce such management, responsibility for which at all times rests upon carriers. M. K. T. v. K. C. T., 104 I. C. C. 203, 224.

(c) Shipments of coal from Grants, Ala., to Florence, Ala., originally unrouted, were moved over an interstate route. Due to a strike at time of movement traffic over short-line intrastate route was delayed, so shipper gave instructions that cars be moved via L. & N. from Birmingham. Upon contention that such instructions did not constitute routing over interstate route, but that movement was expected via an intrastate route through Decatur, FOUND: Instructions constituted complete routing and shipments were therefore not misrouted. Moreover, had they moved via intrastate route through Decatur, charges would have exceeded those applicable via route of movement. Florence Chamber of Commerce v. C. of G. Ry., 104 I. C. C. 373, 374, 375.

(d) Rates on sporadic shipments of fruit-wrapping paper from Los Angeles to Ordway and Rocky Ford, Colo., found unreasonable as compared with rates from paper-producing points in Washington, Oregon, Wisconsin and Minnesota to same destinations, and to extent they exceeded lower rate subsequently established. Reparation awarded. Crown Willamette Paper Co. v. U. P. R. R., 104 I. C. C. 399.

(e) Proposal to readjust interstate rates on flaxseed from Minnesota, South Dakota, and certain North Dakota points to western trunk-line destinations, resulting in both increases and decreases, and establishment of a different level of rates from specified points in the Dakotas than applies from other North Dakota points, found not justified. Proposed rates are admitted by all parties concerned to be unduly prejudicial to South Dakota shippers. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35.

(f) Rates proposed by carriers must be shown to be not only reasonable but otherwise lawful. South Dakota R. R. Commrs. v. C. & N. W., 107 I. C. C. 35, 47.

(g) Upon further hearing, rates on asphalt, in barrels, c. l., from Richmond, Calif., to El Paso, Tex., found not unreasonable or otherwise unlawful as compared with lower rates from point of origin to Albuquerque, N. Mex., and Denver, Colo., which lower rates were subsequently established to El Paso. Shipments from Richmond originated on the Richmond Belt Railroad, maintained partly by the Southern Pacific and partly by the Santa Fe, maintenance and operating expenses amounting to approximately 20 cents per ton, and were twice classified before reaching El Paso. Moreover, defendants pay the Richmond Belt a rental charge of 5 cents per ton. Original report, 85 I. C. C. 425, reversed. El Paso Bithulithic Co. v. E. P. & W. R. R., 109 I. C. C. 42.

(h) The reasonableness or unreasonableness of a rate is a question to be determined upon governing facts. Pressed Steel Car Co. v. Director General, 109 I. C. C. 75, 79.

(i) Fact that one point has a decided advantage in distance to specific destinations does not establish unreasonableness of rates from the former. Bliss Syrup Refining Co. v. A., T. & S. F., 109 I. C. C. 391, 393.

(j) Evidence tending to show low earnings derived from the transportation of a particular commodity, as compared with other traffic, can not be accepted as the sole criterion in measuring the reasonableness of the rates thereon. Rates applying on same commodity in same general region must also be looked to. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C. 501, 511.

(k) Rates on fresh tomatoes from Silver Creek, N. Y., district to Pittsburgh, Pa., found not unreasonable and findings in 91 I. C. C. 358, reversed. Evidence does not indicate that rates assailed are too high to move traffic or that they are unreasonable per se. There are no commodity rates on this traffic from Silver Creek district to any destination, or from any point of origin to Pittsburgh. Assailed rates are those prescribed and approved in numerous cases, and while various commodity rates are in effect both in c. f. a. and trunk-line territories, but few apply for dis-

tances comparable to the haul here considered, ripe tomatoes generally moving short distances under commodity rates made with reference to truck competition. Here traffic moves in considerable volume only during an annual 60-day period, which fact does not entitle it to a commodity rate since commodities may move in considerable volume and yet remain on a class-rate basis. Heinz Co. v. Director General, 112 I. C. C. 206.

(l) Mere fact that two rates reflect varying general changes does not conclusively establish that each is on a proper level, and fact that rates on one commodity may not be on a proper level does not prove that rates on other commodities which reflect same general changes also are not on a proper level. Nat'l Council of Furniture Assos. v. A. A., 112 I. C. C. 289, 309.

(m) Combination class rates to and beyond York, Pa., or Baltimore, Md., charged on l. c. l. shipments of marble moving from Cardiff, Md., to destinations in eastern and New England States found not unreasonable or unduly prejudicial as compared with rates on same classes from such noncompetitive points as Baltimore, York, Philadelphia, and New York City, or with rates from Westfield, Mass., and Roxbury, Vt., from which latter point Cardiff is said to meet its principal competition. Traffic and transportation conditions in connection with shipments from Cardiff, in so far as initial part of movement is concerned, are materially different from and less favorable than those obtaining between trunk-line points with which comparison is made, and whatever rate disadvantage complainant may be laboring under in marketing of its products appears to be principally due to location of its quarry on an independently owned and operated short line of light traffic density and unfavorable operating conditions. Cardiff Green Marble Co. v. M. & P., 113 I. C. C. 655.

(n) The law imposes upon the carriers the duty of initiating their rates, under the injunction of the statute that they shall be reasonable and just. In the performance of the duty by the carriers they must exercise judgment and discretion by a like resort to existing facts, circumstances, and conditions in the first instance just as the commission must later do when the rates are brought in question before it. The carriers are presumed to act in good faith in their exercise of discretion and judgment under this somewhat indefinite standard of the statute in its practical application, and therefore rates established by the carriers can not be condemned except upon investigation and full hearing. A rate reasonable in view of the circumstances and conditions when it is established may in course of time become unreasonable by virtue of changed circumstances and conditions. It is manifestly impracticable for the carriers or the commission in such a case to determine at what exact time in the gradual process of changes the rate becomes unreasonable. United Fig & Date Co. v. A. C. L. R. R., 115 I. C. C. 643, 648.

(o) It does not follow that because the judgment of the Commission and that of the carriers as to what will be reasonable rates for the future differ, in relatively small degree, that the rates now found reasonable would have been maximum reasonable rates for a period extending back to November, 1921, or two years prior to the filing of the complaint. United Fig & Date Co. v. A. C. L. R. R., 115 I. C. C. 643, 648.

(p) Fact that certain shippers have paid class rates without protest is not conclusive of their reasonableness. Bender Iron & Supply Co. v. K. C. S., 118 I. C. C. 661, 665.

(q) Subsequent to hearing and prior to issuance of commission's decision in which certain class rates on high explosives were found unreasonable, carrier published specific commodity rates. Upon supplemental petition of complainant seeking reparation on shipments made subsequent to hearing and on which charges were assessed at specific commodity rates, HELD: Change made by carriers in nature of rates during pendency of proceeding had the effect of removing them from application of finding of unreasonableness of class rates and on such shipments there is no basis for an award of reparation. United States v. Director General, 118 I. C. C. 677.

(r) Determination of the reasonableness of rates is not a matter of mathematical computations or formulae, but involves the exercise of an informed judgment. To follow complainants contention to its logical conclusion would mean that any rate, regardless of its level, not made according to a certain method, even though such method may

be the one usually employed by the carriers, is unreasonable. Obviously such a conclusion is fallacious, and the contention leading to it must fall. Louisiana Oil Refining Corp. v. St. L., S. W. Ry., 122 I. C. C. 503, 504.

(s) Fear of possible misuse in the future can hardly be urged seriously as a reason for abandoning a sound conclusion in favor of one that is unsound. A minimum reasonable rate is not necessarily or often a maximum reasonable rate. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 512.

(t) Determination of the reasonableness of rates is not a matter of mathematical computations or formulæ but involves the exercise of an informed judgment. Louisiana Oil Refining Corp. v. St. L. S. W., 122 I. C. C. 503, 504.

(u) Evidence which goes to the question of reasonableness of rates can not affect interpretation of tariffs in a proceeding involving legality of rates under section 6 of the act. Fraser v. A. C. L., 122 I. C. C. 520, 526.

(v) While there may be reasons in some instances to justify the construction of grain rates so that through rates are equal to combinations of rate factors to and from important grain markets, there is a limit to the extent to which such a policy can be followed with propriety in view of requirements of the act that all rates must be just and reasonable. Ogden Grain Exchange v. A. & S., 122 I. C. C. 691, 702.

(w) A minimum reasonable rate is not necessarily or often a maximum reasonable rate. Ex-Lake Iron Ore from Chicago to Granite City, 123 I. C. C. 503, 512.

(x) As a prerequisite to the commission's approval of rates under section 1 of the act it is only necessary for carriers to show, as it is in all suspension proceedings where the commission approves rate changes, that the rates are within the limits of reasonableness, i. e. not more than reasonable maxima not less than reasonable minima. Federated Metals Corp. v. C. R. R. Co. of N. J., 126 I. C. C. 703, 709.

(y) No different tests or standards are prescribed for determination of just and reasonable minimum rate than for just and reasonable maximum rate. Jefferson Island Salt Mining Co. v. United States (Interstate Commerce Commission, Intervener) 6 Fed. (2d) 315.

(z) In determining the correctness of a freight rate established by a railroad company covering shipments from loading point to destination, all items of cost and expense to the carrier, incident to the shipment, must be taken into account, including cost and expense of switching and spotting cars for unloading, and particularly so, where conditions attendant at delivery points are such as to substantially increase cost to carrier; and a freight rate that does not embrace a reasonable profit over and above actual cost and expense to the carrier is not a reasonable rate. New York Cent. R. Co., v. Public Utility Commission of Ohio, (O., 1927) 155 N. E. 862.

(aa) The determination of the reasonableness or unreasonableness of a rate is not a matter of mathematical computation. Murphysboro Paving Brick Co. v. I. C. R. R., 128 I. C. C. 635, 636.

(bb) What is the reasonable rate that shall be charged to the shipper? The legislature may not make rates so as to confiscate the carriers property. The carrier, on the other hand, may not make rates which are unjust for those who by economic necessity are compelled to employ its services. Here, then, we have the minimum of legislative power and the maximum of the carriers power. Between these lies a zone, indefinite and variable. Without question the carrier will tend toward the maximum, while governmental authority will be inclined—in fact has been created—to repress its upward tendency. One moves inevitably upward to the highest rate which the traffic will bear; the other attempts to discover some relation between charge for service and cost of service. Calif. Growers & Shippers Protective League v. S. P. Co., 129 I. C. C. 25, 33.

(cc) A reasonable rate may be said to be somewhere between minimum charge that can be made for the service and permit carrier to live, and the maximum charge that can be borne by shipper. Otherwise stated, there is a zone of reasonableness within which any rate is just and reasonable to the carrier as well as just, fair, and reasonable to the shipper that utilizes carrier's services. Calif. Growers' & Shippers' Protective League v. S. P., 129 I. C. C. 25, 33, 34.

§6. Car-mile or Train-mile Revenue.

See Evidence §6, §8.

(a) Determination of reasonableness or unreasonableness of rates is not a matter of mathematical computation, but involves exercise of an informed judgment. It can scarcely be said with any degree of accuracy that comparison of car-mile earnings under rates on one commodity computed on same weight is lacking in probative value. There is no fixed scale of progression or regression with changing distance for earnings per mile. Nat'l Council of Furniture Assos. v. A. A., 112 I. C. C. 289, 309.

(b) Fact that car earnings under a given rate exceed those on certain other unrelated commodities does not of itself tend to show unreasonableness. United Paperboard Co. v. C. & E. R. R., 120 I. C. C. 27, 30.

§7. Changed Circumstances.

See Advanced Rates §7; Evidence §9.

(a) Taking into consideration the gradual change in conditions surrounding transportation and marketing of peanuts over a number of years and gradual downward revision of rate structure to meet those conditions, with apparently no dissatisfaction with general rate adjustment on part of those in the industry, FOUND: That it does not follow because commission's judgment and that of carriers as to what will be reasonable rates for the future differ, in relatively small degree, that rates found reasonable for future would have been maximum reasonable rates for a period extending back two years prior to filing of a complaint. Accordingly, and in the light of commission's findings in 20 I. C. C. 43, 50, rates on this commodity in the past found unreasonable only back to date of filing of complaint, and not for the full two-year period prior thereto. United Fig & Date Co. v. A. C. L., 115 I. C. C. 643, 648, 649.

§7¼. Combination of Rates.

See Evidence §10.

(a) Applicable combination rates on muriate of potash from Salduro, Utah, to Chicago Heights, Ill., a Group D point, found not unreasonable as compared with lower rates contemporaneously in effect to St. Louis, Mo., a Group E point. Complainant showed that same rates applied to both groups on a number of commodities and that prior to and subsequent to movement equal rates applied to both groups on potash. Carriers, on the other hand, contend that rates established were depressed and were made to meet competition with imported fertilizer materials from Atlantic ports, and showed that on a number of commodities the rates between Salt Lake City and Chicago are higher than those to or from St. Louis. Armour Fertilizer Works v. W. P. R. R., 115 I. C. C. 684.

§7½. Comparisons.

See Blanket Rates §18; Classification §20; Comparative Rates; Evidence §11, §12, §13; Through Routes and Joint Rates §15.

(a) Rates on coal from Grants, Ala., to Florence, Ala., via an interstate route through Columbus, Tenn., found not unreasonable as compared with rates between various points in same general territory for comparable distances. Here interstate route was used because of delays over customary intrastate route caused by a strike. Such interstate route was not logical or reasonable route and will probably not be used again except in case of emergency. Florence Chamber of Commerce v. C. of G. Ry., 104 I. C. C. 373.

(b) Although in determining reasonableness of an interstate rate commission may give consideration to comparisons with intrastate rates, mere fact that carriers comprising longer interstate routes do not see fit to meet rate of the direct intrastate line does not establish unreasonableness of the interstate rate. Florence Chamber of Commerce v. C. of G., 104 I. C. C. 373, 375.

(c) Interstate rates on dried-apple pomace found not unreasonable as compared with lower intrastate rates applicable on same commodity for relatively shorter hauls. Greenwald Vinegar Co. v. B. & O., 104 I. C. C. 637.

(d) Mere comparison of through rates with combinations does not prove that combination rates are unreasonable. Beatrice Creamery Co. v. C., B. & Q., 107 I. C. C. 568, 570.

(e) No convincing reason found why rates on vegetables, generally, from producing districts in South Carolina to interstate destinations, should be made with relation to rates on potatoes, except perhaps as a matter of convenience. Vegetable rates in Mississippi Valley are not constructed upon any fixed relationship to rates on potatoes, and while in

43 I. C. C. 291, commission approved certain rates on fruits and vegetables which were made over the rates on potatoes, it is not committed to this doctrine for general application. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 615.

(f) Contention that rates on cabbage from South Carolina producing districts to interstate destinations are unreasonable to extent they exceed contemporaneous rates on potatoes, not sustained, carriers showing that rates on potatoes from South Carolina are maintained upon a low basis and to accord such a rate basis would result in a low level of cabbage rates from South Carolina. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 615, 618.

(g) Lettuce, spinach and asparagus: Upon complaint seeking rates on, from South Carolina producing districts to interstate destinations, made 18.5 cents over the contemporaneous rates on potatoes, FOUND: Rates proposed are on a decidely low basis and are conspicuously low as compared with contemporaneous rates from producing points in Virginia, North Carolina, and Florida, with which present rates compared favorably. South Carolina Produce Asso. v. A. & R., 107 I. C. C. 613, 618, 623.

(h) Rate on building paper from Downingtown, Pa., to Jacksonville, Fla., on shipments moving by rail to Philadelphia, thence by water beyond, found not unreasonable as compared with lower rate contemporaneously in effect on like traffic from York, Pa., moving by rail to Baltimore, thence water to Jacksonville, or with lower rail-and-water rate subsequently established from Downingtown to Jacksonville through Philadelphia in order to place complainant in a better position to compete in the Jacksonville market. Baker & Holmes Co. v. P. R. R., 109 I. C. C. 396.

(i) Mere comparisons of the rates and earnings on one commodity with the rates and earnings on other commodities for the purpose of showing reasonableness of rates is not convincing without a showing that such rates are comparable in other respects. Ballman-Cummings Furniture Co. v. C. & E. I. Ry. Co., 109 I. C. C. 413, 415.

(j) Evidence tending to show burdens and expense of handling a particular commodity, and, as compared with other traffic, low earnings therefrom, can not be accepted as the sole criterion in measuring reasonableness of the rates thereon. Rates applying on same commodity in same general region must also be looked to. Sioux Falls Live Stock Exchange v. A., T. & S. F., 109 I. C. C., 501, 511.

(k) Tamms, Ill.: Class D rates on iron ore from Ishpeming and Negaunee, Mich., to, found unreasonable as compared with commodity rates contemporaneously in effect to St. Louis, Mo., and East St. Louis and Granite City, Ill., and with commodity rate established subsequent to movement. Reparation awarded. Tamms Silica Co. v. C. & N. W., 109 I. C. C. 618.

(l) Complainant attacked commodity rates charged on tank cars of fuel oil shipped between July 21, 1921 and Sept. 23, 1922, from Kansas City, Mo., and Oklahoma to Cedar Rapids, Waterloo and Ottumwa, Iowa, as unreasonable and unduly prejudicial. Rates charged ranged from 28.5 c. to 37 c. and were 0.5 c. to 2 c. less than the rates on refined oils. HELD, rates attacked unreasonable to extent they exceed 6.5 c. less than rates on refined oil between July 21, 1921 and June 30, 1922 and 6 c. thereafter, reparation awarded. Shores Mueller Co. v. A. T. & S. F. Ry., 112 I. C. C. 603.

(m) Comparisons based merely upon differences in distance do not constitute sufficient justification for a finding either of unreasonableness or of undue prejudice. Bos Sand Co. v. A., T. & S. F., 112 I. C. C. 121, 123.

(n) While reasonableness of any given rate can not be measured solely by comparing its earnings with average earnings on all traffic, comparisons of this kind are not entirely without significance in a case where commission is called upon to determine proper rating on an article for application throughout a widespread region. Nat'l. Council of Furniture Assos. v. A. A., 112 I. C. C. 289, 297.

(o) In the absence of evidence as to comparative transportation and other conditions, rate comparisons of different commodities are of little probative force in measuring reasonableness of rates on a particular commodity. Bunte Bros. v. C. & N. W., 112 I. C. C. 557, 558.

(p) Rate on slack coal from points in the Oak Hills district, Colo., on the Denver & Salt Lake R. R., to Superior, Nebr., found not unreasonable. Complainant relied on comparison of rates

to the same destination from the Walsenburg and other districts, and seeks reparation on slack coal to a basis of rates lower than on lump coal. Little consideration, however, was given to difficulties under which the Moffat road labors, and complainant erroneously contended that an unfair relationship existed between the Oak Hills and the Walsenburg and other districts. Nebraska Cement Co. v. C., B. & Q., 113 I. C. C. 729.

(q) Class A rate assessed on castings and forgings, finished, parts of compresses, from Monroe, La., to El Paso, Tex., found not unreasonable as compared with commodity rates on structural iron and steel, including unfinished castings and forgings. Rate assailed is maintained on same description of traffic to all points in the Southwest similarly situated and was prescribed in 34 I. C. C. 472 and other cited cases. Moreover, commodity rate on structural iron and steel is affected by competition. El Paso Compress & Fumigation Co. v. M. P. R. R., 115 I. C. C. 166.

(r) Rate on sawdust found unreasonable as compared with rate on fuel wood and to extent it exceeded lower rates contemporaneously in effect on fuel-wood mill refuse. Reasonable rates prescribed for future. Apache Powder Co. v. A., T. & S. F., 115 I. C. C. 339.

(s) Rates on shooks, box, found unreasonable as compared with rates on railroad ties, timbers, lumber, and various other commodities. Reasonable rates prescribed for future and reparation awarded. Apache Powder Co. v. A., T. & S. F., 115 I. C. C. 339.

(t) Rates on staves and headings, found unreasonable as compared with rates on lumber, commission having indicated in 52 I. C. C. 598, 619, that carriers should observe as maxima the lumber rates on various kinds of cooperage stock, including heading and staves. Jackson Traffic Bureau v. A. & V. Ry., 115 I. C. C. 570.

(u) Rates on automobiles from Lansing and Detroit, Mich., and Springfield, Ohio, to Santa Fe, N. Mex., found not unreasonable or otherwise unlawful as compared with lower rates contemporaneously in effect to Columbus, N. Mex. Complainant contended that lower rate was applicable to Santa Fe as that point was intermediate to Columbus under an appropriate tariff provision which provided for application of Columbus rate as maximum to intermediate points. However for a shipment to pass through Santa Fe over A., T. & S. F. would require an out-of-line haul, except when routed via the New Mexico Central, and lower rate is not applicable over that route. Moreover carriers showed that Columbus rate was on an improper and depressed basis and has since been increased to a parity with rate assailed. Thomas Motor Co. v. A., T. & S. F., 118 I. C. C. 631.

(v) It is seldom, if ever, that a rate can be found unreasonable without comparison with rates to other points. One of the best tests of reasonableness of a rate is by comparison with rates on like traffic in same territory. The act recognizes no distinction between relative unreasonableness and intrinsic or absolute unreasonableness. Sioux City Chamber of Commerce v. B. & O., 120 I. C. C. 7, 14.

(w) Comparisons of inbound and outbound rates are not very helpful in establishing unreasonableness or undue prejudice where only the inbound or outbound rates are in issue. Anthony Produce Co. v. B. & A., 120 I. C. C. 224, 227.

(x) Comparisons of rates on unlike commodities are of little value in determining reasonableness of proposed rates on a particular commodity. Vegetables from Virginia, 120 I. C. C. 319, 323.

(y) The most helpful evidence in determining reasonableness of rates are comparisons of rates on like traffic, moving under like circumstances and in same territory. McLeod v. T. & P., 120 I. C. C. 550, 553.

(z) Mere existence of a lower intrastate rate under which a commodity does not move, has little, if any, probative value in determining the reasonableness of interstate rates under which there is a movement. Tanning Extract from Lynchburg, 122 I. C. C. 647, 650.

(aa) Rate comparisons, without evidence of circumstances and conditions surrounding the traffic, are not controlling in measuring reasonableness of rates on a particular class of traffic. Farrell Foundry & Machine Co. v. A., B. & A., 123 I. C. C. 127, 130.

(bb) Rates on wooden box shooks from, Baltimore, Md., to Jersey City, N. J., found unreasonable and unduly prejudicial as compared with rates con-

temporaneously in effect from Norfolk and other competing points in Virginia and North Carolina. While rates from latter points are depressed due to water competition, it was not shown that they are less than reasonable. Moreover, narrow spread in rates as compared with great difference in length of haul under substantially the same transportation conditions, can not be ignored. Reasonable and nonprejudicial rates prescribed for future and reparation awarded. Canton Box Co. v. P. R. R., 123 I. C. C. 663.

(cc) A mere comparison of rates and earnings, without other supporting data is not helpful in determining reasonableness of rates. Federated Metals Corp. v. P. R. R. Co., 126 I. C. C. 144, 146.

(dd) Comparisons with rates on commercial coal are not conclusive of reasonableness of rates on lake-cargo coal. Lake-cargo coal has a more concentrated movement and moves at a more favorable season of the year than the heaviest movement of commercial coal. Commercial coal also constitutes the larger proportion of joint-line hauls and there is a vast difference in the terminal delivery service of the two classes. Moreover, there is a greater availability of cars used for shipping lake-cargo coal for return loading with ore. Lake Cargo Coal Rates, 1925, 126 I. C. C. 309, 361.

(ee) Rates on brass and copper, standing alone, can not properly be used to measure the reasonableness of rates on lead alloys. Federated Metals Corp. v. C. R. R. Co., of N. J. 126 I. C. C. 703, 709.

(ff) In appraising the evidence of parties bearing on the reasonableness of rates, it is proper to consider rates found reasonable by commission on other commodities in same general territory. Federated Metals Corp. v. C. R. R. Co. of N. J., 126 I. C. C. 703, 709.

(gg) Fifth-class rates on denatured alcohol from New Orleans, and points taking same rates, to Oklahoma City and other destinations in Oklahoma, found unreasonable as compared with lower rates contemporaneously in effect to St. Louis, Kansas City, and Chicago; to destinations in Texas and Arkansas for comparable distances; and to extent they exceeded maximum reasonable fifth-class rates prescribed in 123 I. C. C. 203 for application between same points. Reasonable rates prescribed for future and reparation awarded. Oklahoma Traffic Asso. v. A. & V., 128 I. C. C. 89.

(hh) The exhibits fail to show the value of the articles, the volume of movement, the average loading, or any other information, except the classification ratings, which is usually considered in determining the relative reasonableness of rates, and, therefore, are of little probative value. Fisher Supply Co. v. A. & V. Ry., 128 I. C. C. 215, 218.

(ii) Third-class rate on oleomargarine found unreasonable to extent it exceeded rate on butter. While value of oleomargarine is about one-half that of butter, both have practically the same transportation characteristics, see 53 I. C. C. 59, and other cited cases; both are rated third class in principal classifications; and where commodity rates are published on the two they are generally the same. Record indicates that rates on oleomargarine should not be higher than those on butter, but it is not convincing that oleomargarine should take lower rates. Moreover, in 60 I. C. C. 663, rate on oleomargarine was found unreasonable to extent it exceeded rate on butter. Reasonable rate prescribed for future and reparation awarded. Boren-Stewart Co. v. G., C. & S. F., 128 I. C. C. 493.

(jj) Upon contention that a combination of three locals is an unreasonable basis for making of rates, and in conflict with views expressed in Southern Class Rate Investigation. 100 I. C. C. 513, 661. FOUND: This depends upon whether local rates making up the combination are normal or depressed. Duplex Printing Press Co. v. B. C. E., 128 I. C. C. 692, 693.

(kk) Best test of reasonableness of a rate is a comparison with other rates on the same or analogous commodities between points in the same general territory for similar distances. Continental Roofing & Mfg. Co. v. G. & S. I., 129 I. C. C. 313, 316.

§8. Competition.

(1) In General.

See Competition; Long and Short Hauls §4¾.

(a) Class rates on candy and confectionery, c. l. and l. c. l., from Salt Lake City, Utah, to destinations on Mississippi and Missouri Rivers, and to St. Paul, Minn., and Chicago, Ill., rate territories, found unreasonable and unduly prejudicial to extent they exceeded lower commodity rates contemporaneously applicable from San Francisco, Calif., to

same destinations. Reparation awarded. McDonald Chocolate Co. v. B. E. R. R., 118 I. C. C. 45.

(b) Rates on bale ties and woven and barbed wire fencing from Sterling, Ill., to Montgomery, Ala., found unreasonable and unduly prejudicial as compared with rates contemporaneously in effect to Mobile and Pensacola, farther distant competing points, and to extent they exceeded rates subsequently established when Montgomery was placed upon a rate parity with the latter-named points. Teague Hardware Co. v. C., B. & Q., 118 I. C. C. 221.

(c) The commission should not require the maintenance of a definite relationship between the rates on specific commodities on a showing that such commodities meet competitively in a relatively limited number of uses. Federated Metals Corp. v. C. R. R. Co. of N. J. 126 I. C. C. 703, 711.

§8 (1½). Market Competition.

See Market Competition.

(a) Commodity rates on staves found not unreasonable as compared with rates on cordwood and other commodities. Cordwood rates are on a low basis because of competition with other fuel and being a low-grade commodity would not move unless rates were low. A rate of sixth class would apply on staves in absence of lower rates, sixth class being found not unreasonable on lumber in 81 I. C. C. 401. Stave rates here in issue are 58 per cent of sixth class, and commodity rates on lumber applicable between various points in same territory as here involved compare favorably with stave rates under attack. Washington Building Lime Co. v. B. & O., 115 I. C. C. 128.

(b) Rates on pulp wood from Reedsport, Oreg., to Camas, Wash., found not unreasonable as compared with rates contemporaneously maintained on fuel wood. Pulp wood is more valuable and loads heavier than fuel wood, is also a commercial commodity and should bear its share of costs entering into manufacture of paper, while fuel wood is a waste commodity on which rates are made low in order to permit of its movement in competition with other fuel, particularly in he territory considered where it moves in large volume. Moreover, rate assailed is a joint rate applying not generally for average conditions but between specific points where transportation conditions are unfavorable and extremely costly. Crown Willamette Paper Co. v. S. P. Co., 118 I. C. C. 95.

(c) Rates on strawberries from certain North Carolina points to Providence, R. I., found not unduly prejudicial in comparison with rates to New York City. There is no evidence of competition between Providence and New York in marketing of strawberries, nor of any damage to complainant resulting from difference in rates to the two points. Providence Exchange v. N. Y., N. H. & H., 118 I. C. C. 190.

(d) Interstate rates on sand, gravel and crushed stone from producing points in Zone I in Illinois and certain producing points in Zone II in Illinois and Wisconsin to Chicago, Ill.,-Gary, Ind., switching district and other destinations in northern Illinois, southern Wisconsin, and eastern Iowa, found not unreasonable or unduly prejudicial except that such rates to district are unduly prejudicial in favor of producers of sand, gravel, crushed stone, and slag within the Chicago district; and interstate rates from Joliet, Ill., are unduly prejudicial in favor of producers of slag at that point. Nonprejudicial rates prescribed for future and reparation denied. Chicago Gravel Co. v. A., T. & S. F., 118 I. C. C. 633.

(e) Fifth-class rates on vinegar from New York points to mid-western destinations, found not unreasonable or otherwise unlawful as compared with rates from Pacific Coast to same destination territory. Vinegar is manufactured at low cost on Pacific Coast as compared with similar costs in New York territory and New York producers also suffer from disadvantage of buying their barrel material from Pacific Coast points. While complainant contended that an increase in Pacific Coast rate would remove the prejudice here involved, the evidence shows that its principal competition is encountered from producers located in destination territory, and any increase in Pacific Coast rates would be of little avail to complainant. American Cider Vinegar Mfrs.' Asso. v. N. Y. C., 118 I. C. C. 721.

§8. (2). Railroad Competition.

See Railroad Competition.

(a) It is not commission's province to require circuitous or more expensive routes to meet rates of shorter or less expensive routes. However, commission

may, in fixing rates by any route, give consideration to rates of other routes and attempt to devise an adjustment which on the whole will provide reasonable rates and at same time, as nearly as may be, permit various routes to engage in the traffic where they so desire. Consolidated Southwestern Cases, 123 I. C. C. 203, 374.

§8. (4). Water Competition.

See Evidence §14 (5); Water Competition.
